

OFFICIAL LINCOLN COUNTY PAPER—Under Contract With County Commissioners

CARRIZOZO OUTLOOK

Published Weekly in the Interest of Carrizozo and Lincoln County

8 PAGES

VOL. 24—NO. 5

CARRIZOZO, LINCOLN COUNTY, NEW MEX. CO., FRIDAY, JUNE 2, 1944

PRICE \$2.00 THE YEAR

PERSONALS

F. E. Richard is in this week.

M. O. Lavelle was an El Paso visitor yesterday.

Mrs. B. A. Dindrey is assisting at the local welfare office.

Jim Greer is a guard at the Nazi camp in Fort Stanton.

The Poppy Sale met with the best of success; Mrs. Calvin Carl was Chairman.

John Harkey, Ralph Petty and Lonnie McClintock spent the week end fishing at Elephant Butte Dam.

Mrs. Champ Ferguson was here from Capitan Wednesday, visiting at the home of her sister, Mrs. Albert Snow.

Mr. and Mrs. Meyer Barnett have moved from the old Spence residence to the residence next door to the English residence.

The Downing brothers, John and Ed were here from Capitan and attended the Memorial services and IOOF joint meeting Tuesday night.

Frank Maxwell and son Sgt. Warden Maxwell were here this week from the Maxwell ranch, Warden being here on a furlough. He looks well and enjoys the service.

Mr. and Mrs. Wrasche Lutz were in town Monday and said they had sold their ranch property to the Stralays of Ancho. Their new address is Ft. Sumner and wish their Outlook best on to them at the above address.

Mr. and Mrs. J. H. Fulmer attended the graduation exercises at the New Mexico Military Institute at Roswell last week and returned accompanied by their son Bill, who has just finished his first term at the institute.

Otto E. Prehm, S. K. 3-c of the U. S. Navy, who was located at Joliet, Ill., but now at New York, was here for a few days this week, visiting his mother, Mrs. Minnie Prehm. He had but a short leave of absence judging from that, one might presume that being near the Atlantic seaboard, he would soon be on overseas service.

The Misses Josie and Dorothy Ferguson were here from their home in Roswell last Saturday returning home in the evening. The reason for their short stay was because of Josie being needed at the air port, where she is employed. Miss Dorothy is now in high school and will graduate next year, so we understand.

Rancher's Camp Meeting

The committee of the Rancher's Camp Meeting Association met this week and made all arrangements for the annual camp meeting.

The meeting which will last four days, will begin Wednesday night, August 2 and continue until Sunday, closing Sunday night, August 6. During these four days, there will be services both morning and evening. To all services, the public is cordially invited.

Stitch and Chatter Club

The S. C. Club met at the home of Mrs. R. B. Moore. Several important items were brought up and discussed. The business meeting closed at the end of one hour. Several of the girls played bridge while others served. Lovely refreshments were served by the hostess and co-hostess, Mrs. Felix Ramey. The next meeting will be held on Wednesday, June 7th at 8 p. m. at the home of Mrs. Johnson Stearns. Members please attend.

Bessie Hodgkin, Reporter.

Announcement

I wish to announce my candidacy for the office of County Sheriff on the Democratic ticket subject to the decision of the voters at the primaries June 6.

IS A DEMOCRAT VOTE A VOTE FOR COMMUNISM?

I have just been informed that the Communists in the United States have heartily endorsed Roosevelt, and that they have even gone so far as to discontinue their party and join up with the Democrats. I wonder what that means, and what is happenin' to the Democrat Party. How come it that the Communists didn't join the Republican party?

The time was when Americans were either Democrats or Republicans. If you were a Republican, you wanted a Protective Tariff, and if you were a Democrat you were supposed to want Free Trade. Then along came the Communist Party, but nobody knew exactly what they wanted, unless it was to bust up things in general and make Bolsheviks out of good old line Americans. Now that the Communists have seen fit to accomplish their aims by joining forces with the Democrats, I don't

know what we've got, or where we stand. It begins to look to me as if we were back to the two parties again. Yes, but instead of being a Tariff issue that separates them now, it's a case of are you an American, or what are you? If you are old-fashioned enough to be a Republican, you are still an American, but if you are a Democrat you hardly know what you are or what you stand for. Yes, or what you're going to have to stand for before you wake up. Yes, verily, these new-fangled politics doth make strange bedfellows. Personally, I think the time has arrived when we ought to come right out flat-footed and call the Republican Party the American Party. That would sure be letting folks know exactly where we stand and what we stand for. It might also give folks a mighty good hint as to why the Communists didn't join the Republicans.

A Reader.

NOTICE

Alturas, Calif., Sept. 6, 1940.
To Whom It May Concern:

I have been personally acquainted for many years with Mr. Harry A. Miller, who is now residing at Carrizozo, New Mexico.

Mr. Miller resided here at Alturas several years ago and during his residence here he was employed by the Nevada-California-Oregon Railway Company that operated a railway system through this section of the country.

Mr. Miller was also Deputy County Clerk of Modoc County, California for several years and also served in the capacity of Judge of the Justice's Court of Alturas Township, Modoc County, California.

To my knowledge, Mr. Miller was always very attentive to his duties and performed them with efficiency and honesty. I always considered him a very capable man, and a man of industry and integrity.

It is my honest opinion that if he is elected Clerk of the county in which he is now residing in New Mexico, he will handle the office efficiently and with credit to the people of his county as well as to himself as I know him to be well qualified for the office of County Clerk, which office he is now seeking in the county of his residence in the State of New Mexico.

A. K. Wylie,
Judge of the Superior Court of Modoc County, California.

To The Voters

In furtherance of this recommendation will say that my education comes from the school of experience, founded on six years in the study of Law and many other vocations — worked for Uncle Sam during the entire time of World War I and am now and have been ever since this war started working for the S. P. Railroad Co, considered in the first line of defense, and if elected, will continue to handle both services satisfactory to all until this unfortunate struggle is over.

Your support will be highly appreciated.

Harry Miller,
Paid pol. adv.

Roper's Dance

The Lincoln County Roper's Club will give another of those popular dances tomorrow, Saturday night, this time at Capitan — the last one being given here at Carrizozo. Be sure to attend.

The "Korn-Kobbers" orchestra of Carrizozo will furnish the music. Patronize this event and help the club to flush paying on their rodeo grounds near Capitan.

To Our Friends:
We have NOT sold our ranch near Corona — and it is not for sale. Mr. and Mrs. J. R. Jenkins

ANNOUNCEMENT

Mildred Ramey, Democratic Candidate for County Clerk

Mildred Ramey is 26 years of age and a native born New Mexican. Her home and voting precinct is Lincoln. She is the wife of present County Clerk Felix Ramey and the mother of two children. Mrs. Ramey is well qualified for the job. She has attended and completed the General Business Course, consisting of Filing, Commercial Law, Bookkeeping, Typing, Short-hand, and Business Correspondence at El Paso Technical College, El Paso, Texas, and she holds a Bachelor's Degree from the New Mexico State College at Las Cruces. Mrs. Ramey, like all loyal American Women wishes to do her part on the home front. Your vote will be appreciated until the boys come marching victoriously home.

Hedda Hopper: Looking at HOLLYWOOD

THE other day when I was at the M-G-M studio I decided to call on my old friend Sidney Franklin. He's their top producer now, and the only one who has proved himself worthy of stepping into Irving Thalberg's shoes. If you challenge this I'd like to remind you that it was Sidney who directed such films as "The Good Earth," "Barrett's of Wimpole Street," "Smilin' Through," and "The Guardsman." And he has produced "Goodbye, Mr. Chips," "Mrs. Miniver," "Madame Curie," "Random Harvest," and "White Cliffs." How's that for a record? Guess there can be no protest about whose shoes Sidney Franklin is standing in!

Sidney Franklin is standing in!

We've been friends for so many years I don't like to count them. Let's settle for a quarter of a century! So when I breezed up to his office I knew I'd be welcome. However, I knocked politely and waited. A barking dog answered me, so I opened the door and walked in. What met my startled glance? Four solemn men were seated in a semicircle looking intently at Sidney, who was crawling on his hands and knees from behind the couch, barking!

"What gives?" says I. Sidney rose, blushed a little, and extended his hand. "I haven't gone to the demerol bowwows," says he. "I was just acting out the pup's scene!"

There's Teamwork

And there you have the answer to his success; there isn't even the smallest role in any of his pictures that doesn't come alive in Sidney's office before the scenario is handed over to the director and actors. These men with him were writers, director, and art director. They filed out soberly, as we all do when we have just been impressed by some one's knowledge and integrity, leaving Sid and me to talk about the old days; about those years of struggle and all they entail. Sidney likes to talk about the past so do I.

Sidney came here from San Francisco 30 years ago. He was then a school boy on a summer vacation, hanging around the gates of the old Selig studio and trying to catch a glimpse of the mysteries beyond. One day a husky guy was unloading equipment from a big van. He saw this shy kid looking up at him with eager eyes. "Wanta lug this camera into the studio for me?"

Gadgets to Grease Paint

Sidney sprang into action, and once inside those gates, they couldn't get rid of him. There was drive and determination in that kid. By the time he took a job in the old Hobart Bosworth studio, about a year later, he had schooled himself to do so many chores, and to do them well, that he was nicknamed Sid Detail. Then came that memorable day when an actor didn't show up. He was scheduled to play opposite a growing grizzly bear! Several actors refused the role. At last driven to desperation, the director yelled, "Where's Sid Detail?"

Around the corner came little Sid — so thin he could sit on a dime and show the edges. He looked at the bear. The bear looked at him. But Sid Detail was used to taking orders, and the director was telling him what he was to do in the scene. An hour later, when the cameras stopped grinding, a comedian was born. He could have taken his place beside Harold Lloyd or the others.

Brawn and Brain

All of us urged him to go on acting. But he locked the self-explicitation actors need. Direction interested him more. In that capacity he could express himself behind the camera, pulling the strings, a shadowy figure on the sidelines. But, having the potentialities of a fine actor, he helps his writers to visualize scenes, always acting out every role until they themselves can detect any false situations or actions. A hard taskmaster — all perfectionists are. But his writers love him, even when he wears them to the bone. One of them said: "Hedda, that guy works from the heart as well as the brain. In story conferences he's inspirational and untiring."

I smiled. I'd listened to the same story for years, but in spite of this grueling work in the Franklin unit there isn't a writer who doesn't plead for the opportunity.

Impressive Christening

I've done nothing to deserve the honor that was bestowed on me recently, when I christened one of Douglas C-47 ambulance planes which the company is naming Hedda Hopper. Having one of those giant birds of mercy bearing your name is something to have lived for. When Asta, "This Man's" dog, hears his name he barks, as a hint in "This Man Comes Here" about Astor hotel had to be changed to Sherry-Netherland hotel. Whenever they said "Astor," the dog barked.

Chemists Strengthen Low Grade Lumber, Promise Profitable New Field for Farmers

Treated Wood Almost Hard as Metal.

By BARROW LYONS
(WNU Washington Correspondent.)

The alchemy of modern chemistry suddenly has prepared a new field of profit for farmers. By the use of relatively inexpensive equipment and by the application of certain cheap chemicals, ordinary soft woods can be transformed into material of almost any desired hardness and color.

Not only does this multiply the uses for which wood may be used in building and furniture manufacture, but opens possibilities for its use under conditions of pressure, humidity and moisture that formerly only metals and plastics could satisfy. Also, the decorative value of many woods can be vastly enhanced. And fast growing species of trees, use of which was formerly limited, can now be grown like crops to replace the slower growing varieties.

These facts were revealed recently by Dr. J. F. T. Berliner of the ammonia department of E. I. du Pont de Nemours and company, who recently told a group of scientists and writers about the development of the chemical called methylolurea, the reagent which transforms the inner structure of wood into new substances.

The chemicals used in this process cost only 3 1/2 cents to 4 1/2 cents per board foot treated, although the cost of equipment and labor will add to that figure in producing the new product. For the average veneer the cost of chemicals used amounts to less than two-tenths of a cent per square foot.

This development assumes unusual significance in view of recent efforts of the department of agriculture to bring about a new realization of the potential importance of the woodlot to the farmer. John F. Preston, U. S. soil conservation service, estimated a few weeks ago that the income to farmers from farm woodlands could be increased to \$500,000,000 a year, or more. The discovery of the Du Pont chemists may considerably raise this estimate.

Income from Woodlot.

"Farmers are interested in woodlands not only as sources of income with which to pay taxes, buy seed,

harder than the hardest tropical woods. The compressive strength of wood is so increased, and other properties imparted, that in fact a new material is created, which can be called "transmuted" wood. By this process, near-at-hand species of woods that grow on your own woodlot can be made as useful as the costlier, scarcer varieties, many of which are imported from distant lands.

Won't Warp or Shrink.

Furniture made from the transmuted wood can be shipped throughout the world to humid tropics or dry areas with assurance that it will not warp, swell or shrink. A built-in finish is imparted so that scratches may be removed by simply smoothing and rubbing. By mixing dyes with the impregnating chemicals, light-colored pine may be given the color of cherry, mahogany or ebony; or the wood may be made green, purple or any bright color throughout.

Veneers sufficiently treated become self-bonding, requiring no adhesive to be formed into plywood, since heat and pressure fuse the product into a hard, dense substance. Even sawdust, shavings and similar woodwastes may be mangled into articles with dyes incorporated.

Methylolurea — pronounced meth-ill-oh-urea — is compounded by adding urea to dimethylolurea. Both materials are white and soluble in water. They are produced from ammonia, carbon dioxide and methanol, which are synthesized from coal, air and water. Urea results from the reaction of ammonia and carbon dioxide. Formaldehyde, which is derived from methanol, condenses with urea to form dimethylolurea.

These chemicals are being produced cheaply on a large scale, but are under allocation by the war production board. Small quantities for investigation and preliminary tests, however, can be obtained without formal allocation. After the war large quantities can be obtained.

The equipment required may be quite simple. In fact, most of the apparatus now used in impregnating wood with various substances, such as creosote and flameproofing chemicals, can be adapted with minor alterations.

Because of shorter treating periods, however, smaller scale equipment can be used. An ingenious mechanic who understood the principles of the new process could rig up equipment from elements on hand in most plants, the chemists declare.

Equipment Simple.

All that is required is a chamber capable of withstanding the neces-

sary vacuum and pressure in which the wood is placed. A steam jet ejector is an effective, simple means of producing the vacuum. The chamber should be equipped with a pressure door or removable head, and with a source of vacuum and of pressure. A tank for preparing the solution, an auxiliary overflow tank, and means for drying the wood are also needed. Mild steel equipment may be used.

The chemicals are no more corrosive than water, and are neither flammable nor poisonous. To prevent rusting, it is desirable to apply a waterproof finish to the exposed surfaces of the equipment. This type of equipment could be set up and operated in almost any lumber handling concern throughout the country.

A chemical change takes place in the actual fibers of the wood under treatment. Methylolurea in solution enters the wood structure. In the course of drying it gradually reacts with itself and with the components of the wood, first to form insoluble but fusible products. Given sufficient time or heat, the reaction is completed and an infusible product results. If the wood is subjected to sufficient heat and pressure while the resin is still in the fusible stage, the resin will melt, flow and allow the wood to compress. This treatment converts the resin to the final infusible form, maintaining the wood

in the dimension resulting from the press.

Thus, treated wood may be compressed to produce a stable, extremely hard, dense product with a consolidated closed surface requiring no filling, sanding or polishing. It is possible to apply moderate pressures sufficient to compress and consolidate only the surface or outer zone of the treated wood to produce a hard finish. If polished or embossed platens are used, these finishes can be reproduced on the surface of the wood. As far as is now known, the treatment does not have any adverse effect on the gluing and finishing characteristics of the wood. Flame resistance is improved, and the wood is also more resistant to fungi, rot and pest infestation.

But from experiments made in Du Pont laboratories, it appears certain that a process has been developed which will give new value to the trees standing on every farm woodlot. That should give an impetus to reforestation of many marginal forms, bringing back a woodland

cover to the soil that will conserve rainfall and lessen the danger of floods.

The scientists who perfected this process say there are in the United States some fifty species of tree now used for industrial purposes, and nearly 1,000 types for which no practical use has been found, largely because of their softness. With this new magic applied to the very soft woods, all can now be added to the resources which will help to make a victorious postwar America something like the dream which the technicians have envisaged.

A partial solution probably will be found in the development of frequency-modulation (FM) stations for local areas, while some of the local channels may be cleared and given to high-powered stations. FM gives considerably improved reception. Some half-million sets are now equipped to receive it. It operates at higher frequencies than the present commercial broadcast bands.

Mr. Hogan pointed out to me that a new system of relays has been developed which could hook up FM stations to each other, with the effect of creating new networks

Even then, not all parts of the country are well served by the big, clear-channel stations, because these are located mostly in big cities. Today there is controversy as to whether the number of high-powered stations should be increased, with a consequent decrease in the number of small stations, or whether there should be more small stations to emphasize local news and advertise local commercial interests. At present, more than 500 of the more than 900 commercial radio stations in the United States are in metropolitan areas with populations over 50,000, while only 17 stations are in towns of under 5,000 people.

Federal Communication commission officials are deeply concerned with this situation. They point out that the rapid growth of radio in the last decade has meant more varied and additional service to city listeners, with little improvement in small-community and rural radio service. Yet the economic and social interests of the farm and small town business are enormous. Viewed from the political standpoint, the country areas send to congress almost two-thirds of the representatives.

Nevertheless, the unprofitable economics of small-station operation have been demonstrated repeatedly. Of the 300 stations which were just about breaking even, or were operating at a loss, in 1942 the majority were small, independent outlets, most of them located in communities with no other radio station. The books of 194 of these 300 borderline stations show them to be actually operating "in the red."

Break for Small Communities

The FCC in April, 1942, relaxed its wartime freeze policy on the use of critical materials for civilian radio construction to encourage expansion of radio service to small communities. It also reduced telephone line charges to broadcasting stations, which made it easier to obtain network affiliation.

In August, 1943, the FCC adopted an order permitting the use of idle equipment to construct new local-channel stations of 100 to 250 watts power in communities where no station was located, or in communities which did not have good service from nearby metropolitan center.

Break for Small Communities

Let's Face Facts

Coming Big Expansion Of Radio Broadcasting Opens Exciting Vistas By BARROW LYONS
—WNU Staff Correspondent—

WASHINGTON, D. C.

A new idea of what radio will mean after the war was given to me the other evening at supper by a man who ought to know. His ingenuity has played an important part in improving the quality of radio broadcasting during peace, and he is today playing an important part in winning the war by helping to keep our radio and radar development one jump ahead of the enemy.

Barrow Lyons

The man was John V. L. Hogan, special assistant to the WPB office of scientific research and development, and president of the New York radio station WQXR, which has presented exceptional programs. Commercial radio, he said, stands on the threshold of tremendous expansion and improvement. During the war great technical progress for military purposes has been made in radar and television, but also important advances have been effected in sound transmission by ether waves.

When the war ends this technical progress will be transferred to commercial broadcasting by freeing our vastly expanded manufacturing facilities and releasing thousands of technicians.

Mr. Hogan believes this will mean not only improvement in the programs offered to owners of radio and television sets in and near the large cities, but that daylight broadcasting of better programs to the most remote sections of the country will become a reality.

It is not generally known that at present about one-eighth of the people who live in the country areas get no radio service whatever in daylight hours, even from the most powerful broadcasting stations. During the daytime only the "ground wave" can be transmitted by the ordinary radio station, and these have an effective sending radius of only 100 to 150 miles. When the "heavyduty layer" is formed in the upper atmosphere after darkness, radio impulses are reflected from the larger sending stations for about 750 miles.

Powerful Stations in Cities

Even then, not all parts of the country are well served by the big, clear-channel stations, because these are located mostly in big cities. Today there is controversy as to whether the number of high-powered stations should be increased, with a consequent decrease in the number of small stations, or whether there should be more small stations to emphasize local news and advertise local commercial interests. At present, more than 500 of the more than 900 commercial radio stations in the United States are in metropolitan areas with populations over 50,000, while only 17 stations are in towns of under 5,000 people.

ON THE HOME FRONT

With RUTH WYETH SPEARS

HERE is a cookie jar that may be made at home from odds and ends of wood stenciled with gay peasant figures and quaint lettering. But that is not all. This jar or box sits on an old fashioned brightly painted corner shelf

USE ACTUAL SIZE PATTERN TO CUT COOKIE BOX AND CORNER SHELF OF THIN WOOD

STENCIL PEASANT FIGURES AND LETTERING ON BOX

which may be cut out of thin wood and put together quickly with glue and brads. Even if you do not have a jig saw or a coping saw to cut out the graceful curves of the shelf pieces, you may mark the design on a piece of plywood on other thin wood and have it cut at your nearest woodworking shop. As for the cookie box, it is all straight cuts.

NOTE—Mrs. Spears has prepared an actual size pattern for this corner shelf and cookie box; also a stencil pattern with complete color guide for the lettering and peasant figures; all on one large sheet which will be mailed for 15 cents which includes cost and postage. Ask for Pattern 266 and write direct to:

Elephants and Some Fish Are Restless Creatures

In the animal world the elephant, by reason of its size and strength, might be expected to enjoy long and profound periods of slumber. Not so, however, for it seldom has more than two or three hours' rest at a time. It very seldom lies down, and spends the greater part of the day and night in restless shufflings and oscillations.

From observations made in captivity on miniature whales, dolphins and porpoises, it would appear as if these animals never slept at all. A porpoise kept in an aquarium continued to swim round and round its tank throughout the 24 hours. The specimen in question never once stopped in the course.

Kidneys Must Work Well

For You To Feel Well

It takes every day, 7 days every week, never stopping, the kidneys filter waste matter from the blood. If more people were aware of how the kidneys must constantly remove surplus fluid, excess acids and other waste matter that cannot stay in the blood without injury to health, there would be a better understanding of why the whole system is upset when kidneys fail to function properly. Burning, starchy or too frequent urination, dizziness, headache, backache, are signs of kidney trouble. You may suffer from such troubles, headache, dizziness, backache, getting up at night, swelling, etc. Why? Because your kidneys are not working properly. Doan's Pills help them to work, and patients write from the best hospitals that they have been cured of their kidney trouble. Get Doan's Pills. Use with confidence. At all drug stores.

DOAN'S PILLS

HOUSEHOLD MEMOS... by Lynn Chambers

Refresh Yourself With Chilled Drinks (See Recipes Below)

Frosty Foods

Along about summertime, there should be a new word added to our vocabularies — coolconscious. That's right, something cool and luscious to make us forget sweltering sun, high temperature and humidity. In this class of foods come the cool, tinkling drinks, dewy salads and frosty desserts. Even the main dish can be cool, a filling meal salad for those who want hearty foods, jelly tuna or salmon molds with icy cucumber sauce, or heaps of satisfying potato salad. Whole meals can be made from cool foods, but it's a good idea to have something warm, even if only toasted or heated rolls so the family does not tire of them. Sometimes you'll find a cup of hot tea more cooling with cool foods than an iced drink; other times, it's just the opposite. Let your judgment guide you.

Let's begin with a round-up of cooling drinks, some plain, some pertified:

Strawberry Frost.
1 pint strawberries
1 pint lemon ice
Carbonated water
Clean and crush berries. Pour into six glasses. Add lemon ice and stir until well mixed, then fill glasses with carbonated water.

***Fruited Tea.**
(Serves 8)
3 lemons
1 cup boiling water
1 cup granulated sugar
1 quart cold, strong tea
8 oranges, sliced
1/4 cup maraschino cherries
1 cup canned apricots

Squeeze juice from lemons. Cover skins with water and let stand until cool. Drain, pressing water off skins. Combine with sugar, lemon juice. Add tea, orange slices, juice drained from cherries and apricots. Chill. Chop apricots and cherries; add with ice to beverage just before serving.

Serve Used Fats!
Cherry Milk Flip.
8 tablespoons canned cherry juice
2 tablespoons corn syrup
Few grains salt
1 cup milk
Blend cherry juice with corn syrup. Add salt and stir in cold milk. Turn into chilled glass and top with a spoonful of whipped cream, garnish with fresh or canned cherry and a sprig of fresh mint. Yield 1 glass.

Lemonade Syrup.
(Makes 1 pint)
1/2 cup lemon juice
2 cups boiling water
1 cup granulated sugar
Squeeze juice from lemons. Pour water over them and let stand 15 minutes. Drain, press water from skins, then combine with juice and sugar in saucepan. Simmer for 10

Lynn Says
Cool Lunch Quickies: For quick, summer lunches, store sandwich fillings in tightly covered jars in refrigerator. When ready to serve, take out spread bread: Try grated carrot with chopped celery, mayonnaise, salt and pepper. Combine chopped green pepper with salad dressing and spread over sliced tomatoes. This is colorful, too! Flake leftover salmon, mix with pickle relish, mayonnaise and use on rye or whole wheat bread. Cold leftover ham loaf is good with mustard or horseradish on pumpernickel bread. Chopped hard-boiled eggs combined with sliced stuffed olives, softened butter, salt and pepper gives zest on toasted white bread.

Lynn Chambers' Point-Saving Menu

- Buttered Asparagus
- Pickled Beets
- Rolls and Butter
- *Strawberry Parfait
- Cookies
- *Fruited Tea
- *Recipe given.

minutes. Pour into sterile jar and store until ready to use in refrigerator. Use 4 to 5 tablespoons to glass filled 3/4 full with ice and water. Cooling salads may be either the mainstay of the meal, accompaniment to the meat or a dessert. Recipes for each of the types are given here:

***Macaroni Salad.**
(Serves 8)
1 8-ounce package macaroni
3 tablespoons grated onion
1/4 cup chopped green pepper
1/4 cup chopped stuffed olives
1 cup chopped tart red apple
1/4 cup chopped nuts
1 tablespoon lemon juice
1 teaspoon salt
1/2 cup salad dressing

Cook macaroni in boiling salted water until tender. Drain. Rinse with hot water. Chill thoroughly. Add remaining ingredients and toss lightly. Serve in crisp lettuce cups!

Molded Beet Salad.
(Serves 6)
1 tablespoon unflavored gelatin
1/4 cup cold water
1/2 cup boiling water
1/4 cup lemon juice
1 teaspoon sugar
1 teaspoon salt
2 1/2 cups cooked shredded beets
1/4 cup diced celery
2 tablespoons grated horseradish
Soak gelatin in cold water. Add to boiling water, stir until dissolved. Add lemon juice, salt, sugar and chill until mixture thickens. Add remaining ingredients. Mix well. Pour into a mold which has been rinsed with cold water. Chill until firm. Unmold on lettuce and garnish with green pepper slices.

Serve Used Fats!
Frozen Pear Salad.
(Serves 4)
1/4 pound soft American cheese
1/2 cup top milk
1/4 cup mayonnaise
1 cup cream or evaporated milk, whipped
2 tablespoons sugar
8 halves canned pears
1/4 teaspoon salt
Watercress
Rub cheese through sieve and mix together all ingredients except pears and watercress. Arrange pears, core side down in flat dish and pour over them the cheese mixture. Allow to freeze until stiff, then unroll on watercress.

Desserts that are menu-perfect and point-easy are these:
***Strawberry Parfait.**
(Makes 1 1/2 pints)
1/2 cup sugar
1/4 cup cold water
1 egg separated
1 pint strawberries
1 cup cream or evaporated milk, whipped
Boil sugar and water until syrup forms a thread. Pour over beaten egg yolk, beating constantly. Combine stiffly beaten egg white and beat until cool. Chill, fold in berries which have been pressed through a sieve and whipped cream. Put in refrigerator tray and freeze.

PAUL IN EPHESUS

LESSON TEXT—Acts 19:8-10; Ephesians 2:4-10; 3:14-19.
GOLDEN TEXT—We are his workmanship, created in Christ Jesus for good works, which God afore prepared that we should walk in them.—Ephesians 2:10.

Not peace—but a sword! With such graphic words Jesus indicated that His coming into the world would set men apart, either for or against Him (see Matt. 10:34-42). The gospel is the good news of redemption for all mankind, but the attitude of men toward the gospel divides them sharply, into the saved and the lost. Which are you?

Our lesson, telling of Paul's ministry at Ephesus and giving part of his letter to the Ephesians, shows that the gospel does divide, but that it also gives quickening grace and strength for Christian living.

I. Dividing (Acts 19:8-10).
Paul had a long ministry at Ephesus and a very successful one, but at the same time it was a stormy, trying experience. After all, do not those elements often go together? Paul began in the synagogue. That was the proper way, and his custom. He ran into opposition, and after three months he had to seek another place to meet the people. But notice, he did not give up and leave town.

The teaching of any truth results in division, and especially is that true of the gospel. It was found before long (vv. 23-41) that winning people to Christ interfered with the heathen business interests, and then things began to stir.

One wonders why modern business set for the destruction of men's souls by rotten plays, movies, books, amusements, and by the saloon is so content to let the church alone. Is it because our testimony does not harm their business? If so, we are certainly not walking in the footsteps of Paul or of Christ.

Christ is a divider of men. Yes, but those who stand on the right side of that divide also receive

II. Quickening (Eph. 2:4-10).

Dead men, spiritually, come to life when they meet Christ and believe on Him. We were all dead in trespasses and sins, entirely unable to help ourselves, when God in mercy and grace quickened us.

He did this for us, but also for His own glory. That really is the most adequate explanation of grace. It was and is for His glory, a showing forth (v. 7) of the exceeding riches of His grace, through all the ages to come.

Being saved, then, is not (as some describe it) a foolish thing of little import, that takes place in some mission or little crossroads Sunday school. It does happen there, thank God for that, but it reaches clear up to the highest heavens, and on into all eternity. This business of bringing men and women, boys and girls to Christ is the greatest of all occupations. Let's be busy about it!

Be sure to note in verses 8-10 that it is all of grace. No works can enter into salvation. We are "his workmanship," not the result of a cooperative enterprise or creation.

But at the same time do not fail to stress that we are created "unto good works" (v. 10). The professed Christian who talks about being saved by grace, but who does not live it out in the good works which God has ordained as the proper expression of salvation by grace, should not be surprised if the testimony of his lips is not believed.

If we are quickened to newness of life in Christ, we ought to bring forth fruit. That is not possible in our own puny strength. But wait, the gospel which divides and quickens is also—

III. Strengthening (Eph. 3:14-19).

Paul prayed for the Ephesians, but somehow one feels that he prayed for the Christians of all time, for every member of "the whole family in heaven and earth" (v. 15) who bear the name of Christ. The writer is rejoicing today that he belongs to that family, but he wonders how it is with you who read these lines. Do you belong?

Paul prayed in the Spirit, that is evident as one reads these sublime words. It is a comforting and encouraging thought, too, for Paul here asks for a Christian experience for his readers, which seems quite impossible of attainment, except for one thing. It is the power of God which is to bring it about. Prayer in the Spirit is prayer that God answers, always and fully.

So we read with confidence these magnificent, enriching petitions, and we say: "O God, make me that kind of a Christian, a real Christian."

Observe that there is to be a strengthening of the inward man by the Holy Spirit. This is not something "put on" or acquired. It is God's gift.

Note also that it has a normal development, a growth in the knowledge of Christ because of an ability to "comprehend" (v. 18). Is not that our great need? We are unthinkably rich in Christ, but we do not seem to know enough to take out our inheritance.

PATTERNS SEWING CIRCLE

8646 32-46
8592 1-5 yrs.

Pattern No. 8592 is in sizes 1, 2, 3, 4 and 5 years. Size 2, coat and bonnet, requires 2 1/2 yards of 36-inch material; dress and panties require 2 1/2 yards. Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

SEWING CIRCLE PATTERN DEPT.
530 South Wells St. Chicago
Enclose 20 cents in coins for each pattern desired.
Pattern No. Size.....
Name

A BEAUTIFULLY gored and fitted frock with trim, narrow belt and flattering waist with simple V-neck to be made up in nice fabrics. Use one of the smaller design sheer rayon crepes, an all-over print cotton, navy blue rayon crepe or a polka-dotted dimity.

Pattern No. 8646 is in sizes 32, 34, 36, 38, 40, 42, 44 and 46. Size 34, short sleeves, requires 4 1/2 yards of 36-inch material; 4 1/2 yards of 39-inch material.

Baby Clothes
LOVELY for a tiny baby when the complete set is done in white rayon silk or fine handkerchief linen. The small coat and dress have identical yokes. For the older child, make the set with a pastel or beige or navy flannel coat and bonnet—the dress of limity or organdie.

NERVOUS, RESTLESS HIGH-STRUNG, BLUE FEELINGS
On "Certain Days" Of The Month?
Do functional periodic disturbances make you feel nervous, irritable, uneasy, dizzy, tired and "dragged out" most times?
Then start at once—try Lydia E. Pinkham's Vegetable Compound to relieve such symptoms. Pinkham's Compound is made especially for women. Taken regularly—it helps regulate the menstrual cycle, keeps the system in good health, and relieves all the troubles that women have received benefit from. A good thing about Pinkham's Compound is that it contains no harmful poisons. It is made from natural vegetable roots and herbs (see Lydia E. Pinkham's Vegetable Compound Book). It's a perfect, safe, healthy, and sure way to keep your system in good health. Write for a free booklet. It's a good thing about Pinkham's Compound.
Lydia E. Pinkham's VEGETABLE COMPOUND

THE OLD JUDGE SAYS...

"I can't think of anything else you'll need for your Victory garden, Judge... you've got pretty nearly everything."
"I think so, too, John. Ever get your asparagus patch going?"
"I gave that up last year, Judge. Tried it six years in a row with no luck. Just haven't got the right soil, I guess?"
"Well, I think you're wise, John... no use keeping on trying things you know won't work. Just like prohibition. State-wide prohibition has been tried in this country seventy-two times in the last ninety years. It has been adopted forty-seven times in the past thirty-three years and discarded everywhere except in three states. Same thing was tried in eight provinces in Canada and in Norway, Sweden, Finland and Russia but it was an admitted failure and universally abandoned."
"The reason is prohibition does not prohibit. All you get is bootleg liquor instead of legal liquor, plus no end of crime and corruption."

Notice of Primary Election

Special Meeting of the Board of County Commissioners Monday, May 22, 1944.

The meeting was called to order at 1:00 P. M. o'clock Monday, May 22, 1944.

Present: Roy E. Shafer, Chairman; M. D. Atkinson, Manuel Corona, Felix Ramey, County Clerk.

PRIMARY ELECTION PROCLAMATION

WHEREAS, it is provided by the Primary Election Code of the state of New Mexico that the Board of County Commissioners shall at least 15 days before the election by proclamation and publication as therein provided, give notice of the election, the objects thereof, the offices to be voted for, the names of the candidates for each of the said offices as the same have been certified to the County Clerk as provided by law, the names of judges of election and counting judges and poll clerks, and the place where said election is to be held in each precinct and election district; and

WHEREAS, said Primary Election Code provides that said Act shall apply to all political parties for any of whose candidates there was cast at the last preceding General Election as fifteen percentum (15%) of the total number of votes cast for the candidates for Governor by all parties at such Election; and

WHEREAS, at the last general election, the Democratic and Republican parties were the only political parties of any of whose candidates there was cast as many as fifteen percentum (15%) of the total number of votes cast for the candidates for Governor by all parties at such election; and

WHEREAS, said Primary Election Code provides that the said Act shall apply to the offices of the Presidential Electors, Representatives in the Congress of the United States, and to an elective state, district, legislative, county and precinct officers in the state who are elected at the General Election; and

WHEREAS, all candidates desiring to participate in the Primary for Precinct, County or Legislative offices filed by Lincoln County, have filed their declarations of candidacy together with supporting nominating petitions with the County Clerk of Lincoln County; and in the cases of offices filled by the state at large and districts comprising Lincoln County and more than said County, such declarations and petitions have been filed with the Secretary of State and duly certified by the said Secretary of State to the Clerk of Lincoln County according to Law;

NOW, THEREFORE, by virtue of and authority and duty in us vested by law, We the Board of County Commissioners of Lincoln County, and the County Clerk of said county, do hereby public, proclaim and give notice as follows:

1. That a primary election be and the same is hereby called to be held throughout the County of Lincoln and in each precinct thereof on the 6th day of June, A. D. 1944.

2. That the said primary election shall be applicable to the following political parties to-wit: The Republican Party and the Democratic Party.

3. That said primary election shall be for the purpose of permitting the said Republican and Democratic parties to nominate candidates for each of the following offices herein mentioned, and that the names of all the candidates to be voted upon for candidates to Congress,

ational, State, Legislative, District and Precinct Offices, are as follows:

The Board of County Commissioners hereby appoints the following Election Judges, Counting Judges, Poll Clerks and Counting Clerks; and also designates the place of holding said election in the various precincts of Lincoln County:

Precinct No. 1—Lincoln
 Election Judges
 Republican Arthur Lloyd Hulbert Chairman; Cristobal Zamora, member Fortina Beltran, Alt.
 Democratic Mrs. T. J. Burleson
 Stuart Gage Alt. member.
 Counting Judges
 Republican Ronald G. Stewart
 member Eliego Griego member Mrs Ronald G Stewart Alt
 Democratic Mrs W A Wilson member Mrs Bryant O Cashion Alt
 Counting Clerks
 Mrs Emma Salas member Hugh Grafton Alt.
 Democrat Ramon S Luna member Robert Caven Alt.
 Poll Clerks
 Republican Helen H Meeks, member Mrs Arturo Lucero Alt
 Democratic Joseph V St Pierre member Mrs Sam Cox Alt
 Polling Place Lincoln School House

Precinct No 2—Hondo
 Election Judges
 Republican Fernando Gonzales chairman Mrs Earl V Morris member Ignacio Torres Alt
 Democratic Mrs W V Yeager member Frank K Parcella Alt
 Poll Clerks
 Republican Pablo Salas clerk Mrs Fernando Gonzales Alt
 Democratic Mrs Ambrose Guest member Mrs John D Bell Alt
 Polling Place Hondo School House

Precinct No 3—Arabela
 Election Judges
 Republican Fernan Pacheco chairman Domingo Maes, member Perfecto Sanchez Alt
 Democratic Jose Candelario member Faustino Aguilar Alt
 Poll Clerks
 Republican Roque Narsis clerk Eloy Candelario alt
 Democratic George Rus member Claudio Romero alt.
 Polling Place—Arabela School House Precinct No 4—Picocho

Election Judges
 Republican Mrs George Kimbrell chairman Jake Fresquez member Elsie Kimbrell alt
 Democratic Roman C Nunez member Mrs Bert Smith alt
 Poll Clerks
 Republican Mrs Daniel G. Avila member Julian Sandoval alt
 Democratic George Purcella member Mrs Modesto Chavez alt
 Polling Place Picocho School House Precinct No 6

Election Judges
 Republican Apolono Romero chairman Claudio Montoya member Guellerno Padilla alt
 Democratic Patrick Coor member Lloyd Taylor alt
 Poll Clerks
 Republican Macario Vilij member Eltego Montoya alt
 Democratic Mrs Robert Eahom member Mrs Grady Eldridge alt
 Polling Place Encino School House Precinct No 8—White Oaks

Election Judges
 Republican D L Jackson chairman Charles Littell member Miguel Torres alt
 Democratic Chas Stoneman member Pat Murphy alt
 Poll Clerks
 Republican W L Smith member Wm Vigil Hook alt
 Democratic Miss Thelma White member Mrs Sam Dillard alt
 Polling Place Cleghorn Hall Precinct No 9—Capitan

Election Judges
 Republican Mrs Lulu Ann Boone chairman Henry Romero member Seymour A Cozens alt
 Democratic Mrs Ben Leslie member Mrs Avis Letoy Henry alt
 Counting Judges
 Republican Mrs Sam Joseph Bigger member Miss Henrietta M Baknep member Alex Burk alt
 Democratic Mrs Elmer Coon member Mrs Chas H Farris alt
 Counting Clerks
 Republican Mrs Edward Vigil Aboya member Miss Sarah Louise Lewis alt
 Democratic Lewis Cummins member Mrs William H Gould alt
 Polling Clerks
 Republican Mrs Jim S Torres member Manuel G Miller alt
 Democratic Mrs Travis Werner member Mrs H W Dudds alt
 Polling Place Grade School Gym Precinct No 10—Ituldoso

Election Judges
 Republican Bruce Griffith chairman Juan Montes member Roderick P Johnson alt
 Democratic Henry Hale member Fred W Hensley alt
 Poll Clerks
 Republican Theodore Jones member Mrs Jesse Armstrong alt
 Democratic Mrs Warren Carpenter member Mrs E Miller alt
 Polling Place Station School House Precinct No 11—Nogal

Election Judges
 Republican A H Aguayo chairman Mrs Clyde Lucky member L R Lamay alt
 Democratic Mrs Ed C Pfingsten member Fred E Dawson alt
 Polling Clerks
 Republican Homer L M McDaniel clerk Dee McDaniel alt
 Democratic Mrs Gilbert E Peters member Mrs Ora S Stearns alt
 Polling place Nogal School House Precinct No 12—Bonita

Election Judges
 Republican Ernest R Blood clerk D O Jones member E B Stearns alt
 Democratic Mrs Charles Peables member Barney Lee Luck alt
 Poll Clerks
 Republican Mrs Ernest R Blood member Mrs D O Jones alt
 Democratic Mrs T L Jagg member, Dais S Hages, alt
 Polling Place Angus School House Precinct No 13—Corona

Election Judges
 Republican Wilbur Dishman chairman Wm M Bagley member Emiliano Lueros alt
 Democratic Mrs H L Hanceck member Alex J Jenkins alt
 Counting Judges
 Republican Frank A Dubois member Frank Sultmeier Sr member A C Hester alt
 Democratic Jack A Davidson member Mrs Clayton C Jones alt
 Counting Clerks
 Republican Gregorita Mares Lucero member R Archie Perkins alt
 Democratic Mrs Callie Frank s member Jesse V Wade alt
 Poll Clerks
 Republican Mrs Frank Sultmeier Sr member Mrs Procopio Tafayo alt
 Democratic Mrs W R Belden member Mrs Roy E Owen alt
 Polling Place Corona School House Precinct 14A—Carrizozo

Election Judges
 Republican Bernard S. Burns chairman Forro Chavez member Mrs Euela Sudoh alt
 Democratic Mrs E. S. Burns member L A Whitaker alt
 Counting Judges

Republican Mrs Henry Clarence (Mitchel) member Mrs Lloyd Vigil (Miss Mabel Mackey) Frank Richard alt
 Democratic Mrs Sat Chavez Sr member Mrs Ansel V Swearingen Sr alt
 Counting Clerks
 Republican Mrs Marvin Roberts member Mrs Alfredo Martinez alt
 Democratic Mrs Melvin Richardson member Ray Warner alt
 Poll Clerks
 Republican Miss Refugia Garcia member Mrs Pate Lopes alt
 Democratic Mrs Elva Sherrill member Mrs A L Vigil alt
 Polling Place Court Room Court House Precinct No 14B—Carrizozo

Election Judges
 Republican Andy Padilla chairman Carl E Degner member Peter E Johnson alt
 Democratic Mrs George P. Goodson member Mrs John H Hoffman alt
 Counting Judges
 Republican C E May member Mrs James Duncan member Miss Agnes Degner alt
 Democratic Mrs John Fay Harkey member Mrs John Littleton alt
 Counting Clerks
 Republican Mrs Tennis B Smoot member Mrs John W LaMay alt
 Democratic Mrs Walter A Nicholas member J F Tom alt
 Poll Clerks
 Republican Mrs Alfredo Baldonado member Mrs Mattie Littleton alt
 Democratic Albert Guebara member A B Sanchez alt
 Polling Place Community Hall Precinct No 16—Ancho

Election Judges
 Republican W J Balow chairman Henry Dale member Salomon Aragon alt
 Democratic Mrs Elvin I Harkey member Harry Straley alt
 Polling Clerks
 Republican Adolph Lobner member John V Dale alt
 Democratic Mrs Henry Dale member Walter L Hobbs alt
 Polling Place Ancho School House Precinct No 18—Lon

Election Judges
 Republican Edward Brown Goodrum, chairman, Mrs Eulena Emerson member, Oscar N Page, alt
 Democratic B Johnston member P E Morgan alt
 Poll Clerks
 Republican Mrs Oscar Page member Mrs. Edward Brown Goodrum alt
 Democratic Joseph Charles Mostaler member Mrs Margaret Young Prunett alt
 Polling Place Lon School House Precinct No 19—White Mountain

Election Judges
 Republican C C Chase chairman Fred Montoya member Robert Woolard alt
 Democratic Mrs. Robert L Boyce member Iva Gay Coleman alt
 Poll Clerks
 Republican Mrs Bertha E Kirk member Mrs R B Halladay alt
 Democratic Mrs Montie Gardenshiro member Mrs W A Hart alt
 Polling Place Suidoso school House Precinct No 21—San Patricio

Election Judges
 Republican Vicente Herrera chairman Mrs Roman Sanchez member Roman Sanchez alt
 Democratic Felix Herrera member Ray Taylor alt
 Poll Clerks
 Republican Aristo Chavez member Max C Sanchez alt
 Democratic S G Hester member Antonio E Herrera alt
 Polling Place San Patricio School House Done this 22nd day of May A. D. 1944

Board of County Commissioners of Lincoln County, New Mexico
 Roy E. Shafer, Chairman.
 M. D. Atkinson.
 Manuel Corona.

(Seal) Felix Ramey, County Clerk

NEW HOLLYWOOD MAN - TAILORED Ladies' Suits, Just received at BURKE GIFT SHOP

WEEKLY NEWS ANALYSIS

U.S. Employment Shows Decline; Nazis Continue Retreat in Italy; Japanese Tighten Grip on China

Released by Western Newspaper Union. (EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)

Zero Hour—Yanks await signal to attack Jap machine gun nest in Burma.

EMPLOYMENT: On Decline

For the first time since the war began, the nation's manpower appeared in balance with needs, with supply of labor in critical areas the only problem, the National Industrial Conference board said.

Earlier the department of agriculture noted a 4 per cent decline in farm labor, with some of the decrease attributed to the inability to get into the fields because of unfavorable weather.

Reflecting the continued drop in manufacturing industries, there were 41,000,000 non-farm workers in March, compared with the peak of 43,000,000 in July, 1943.

EUROPE: For Reels

With soldiers from six nations fighting shoulder to shoulder in Allied ranks, the Germans fell slowly back in Italy, their retreating columns under heavy fire of the advancing host, drawing closer to the Eternal City of Rome.

As the Allied blow fell in Italy, thousands of U. S. and British planes continued their heavy bombardment of Axis communications and industry in western Europe, their explo-

sives twisting steel rails into fanciful forms and reducing segments of factories into smouldering pyres. Preparatory to a great offensive from the east, Russian bombers hammered at Nazi supply bases.

With the collapse of their Gustav line in Italy, the Germans fell back slowly toward the Anzio beachhead to the north, where their embattled troops clashed with massed Allied forces struggling for a breakthrough, which would trap the retreating army from the rear.

West Wall

The searching eyes of aerial photography have uncovered what lies ahead of Allied troops massed to storm Germany's formidable west wall.

PACIFIC: 1,000-Mile Advance

With his forces taking another long jump of 125 miles to the northwest in Dutch New Guinea, Gen. Douglas MacArthur advanced closer to his cherished goal of the Philippines, there to avenge Bataan.

The latest gain drew U. S. forces nearer to the thick cluster of islands lying off Dutch New Guinea which the enemy reportedly has fortified with air bases to counter any Allied thrust against the Indies to the south or the Philippines to the north.

In advancing 125 miles westward, U. S. forces were 1,000 miles away from Milne Bay, far to the southeast and from which General MacArthur launched the campaign that has gradually pushed the Japs out of their farthest South-Pacific hold ings.

TRANSPORTATION: Overhauling Asked

Correction of inequalities and discriminations in present freight rate structures to reflect the cost of service, and creation of three permanent federal agencies to keep abreast of transportation problems, were among the recommendations made by a special board of investigation and research organized by congressional enactment in 1940.

At the same time, the board went into the south's protest against certain freight rate differences benefiting the northeast, declaring that figures showed that what the south really needed was a development of her own industry to utilize her abundant natural resources.

CHINA: Seek Unity

With the Japanese tightening their grip on China through their control of her seaports and productive industrial centers, Chiang Kai-Shek moved to gird the country for a final stand against the enemy by drawing the Communists in the north fully into the battle.

BRITISH EMPIRE: Favor League

Having concluded their long conference with Prime Minister Churchill, Britain's dominion premiers packed their bags for the trip homeward, but not before issuing a statement favoring a world peace organization and avowing a fight to the finish against the common enemy.

MISCELLANY:

LESS MEAT: There will be about ten pounds less meat per capita available during the latter half of the year, the bureau of agricultural economics estimates.

REHABILITATION: Navy Program

After six months of operation of the rehabilitation program for men and women at the U. S. naval hospital at Great Lakes, exhibits told an interesting story of the success of the project under direction of Lieut. Comdr. R. E. Kinneman.

OIL: New Field

With the discovery of a promising big oil field in Mississippi which already has brought in two large wells, attention was focused on a whole tier of southeastern states.

LABOR: Foremen Back

Three thousand five hundred members of the Independent Foremen's association of America trooped back to their jobs in Detroit, Mich., plants after the chief of the army air forces, Gen. H. H. Arnold, declared their strike had already cost production of 250 long-range P-51 fighter planes and could affect invasion operations.

As a result of the foremen's walkout over demands for union recognition which industry opposed on its traditional grounds that foremen are a part of management, nearly 50,000 workers had been laid off because of the lack of adequate supervision of production.

Following General Arnold's testimony, the association's national president, Robert H. Keyes, issued instructions for ending the strike, charging the government with delaying settlement of the case.

REFRIGERATION: Ease Space

With warehousemen and food handlers cooperating fully with the War Food Administration's information centers, cooler occupancy was at 82 per cent in May, with much space of this type not ordinarily used at this time well filled.

At the same time, WFA announced that freezer occupancy stood at 85 per cent in May, with much room made available by the clearance of fruits, vegetables and poultry.

JOINT COMMAND: Draws Support

The touchy question of combining the different branches of the services into a single command, so strongly favored by the army, drew the support of President Woodrow Wilson's secretary of the navy, Josephus Daniels.

Mincing no words, Daniels declared that the disaster at Pearl Harbor resulted from a divided command, and asserted: "History is replete with the squabbles between the army and navy which prolong wars, showing the necessity of combination."

DISEASE

The campaign against social diseases scored a victory on one front and lost ground on another last year. In the second half of 1943 there was a decline of 16 per cent in new cases of syphilis among civilians but gonorrhea cases jumped 11 per cent.

Allies, Holding Offensive, Have Invasion Advantage

'Veritas,' Famed British Military Expert, Sees Nazis Handicapped by Being Pinned Inside Defense Circle.

By BAUKHAGE News Analyst and Commentator.

WNU Service, Union Trust Building Washington, D. C. What happens when "the coiled springs of action" are released in the cataclysm of invasion?

Europe is enveloped in the smoke and confusion of battle and only occasionally does this fog lift "showing the swaying forms of vast armies amid the screaming clatter of mechanized combat." It descends again "blotting out the view and leaving us uncertain as to the shape of the plan."

That is the observation of one of the keenest British military experts, "Veritas," whose privately circulated analyses are cabled to this country and eagerly scanned by persons most interested in the conflict now going on.

And Veritas reminds us that we can only maintain our sense of perspective and proportion if we keep carefully in mind certain fundamental aspects of the military situation from the German standpoint. This, likewise, applies to the political aspects.

A well-known psychologist, Dr. Norman Maier of the University of Michigan who predicted the failure of the Munich appeasement program by demonstrating in advance that according to psychological principles, it could not succeed, recently made some interesting observations.

He said that Hitler would be liquidated and a revolution would take place in Germany as soon as the last of the "myths" created by the German propagandists for the purpose of lulling the Germans into a false sense of security were exploded. The Germans, he explains, belong to a "frustrated society." Hitler cured their frustration with aggression, when aggression is frustrated, nothing else will be left.

Training for Farmers

Recently, the Office of Defense Transportation announced that public vocational training schools in 190 cities throughout the country were turning over to the automotive industry a "constantly increasing number of workers trained in one or more phases of automotive industry."

The United States Office of Education is sponsoring the automotive maintenance training program. They are trying to help fill the gap in automotive maintenance personnel caused by the war.

But what many people do not realize is that it is also conducting courses that directly touch the farm. Congress appropriated \$12,500,000 for the food production war training program which the Office of Education administers.

The minimum age limits for both out-of-school and in-school persons have now been removed and all courses are now offered to urban as well as rural persons.

Twenty-two courses are being offered in which the farmer is interested, and they run all the way from the operation, care and repair of tractors, trucks and automobiles to soil and water conservation. And besides the various handworks in the mechanical line around the farm such as machinery repair, wood-working, elementary electricity and construction of farm machinery and equipment, there are special courses in milk production, poultry production, eggs, pork, beef, mutton, lamb, wool, soybeans, peanuts and various commercial vegetable production.

There is general training for farm workers, production of fruit and nuts, vegetable gardening and pretty nearly everything that one has to know how to do around a farm.

These courses are conducted through the cooperation of the public schools and are responsible to the state board for vocational education.

William T. Spanton, chief of the division for vocational agriculture, says he believes that on a dollar-for-dollar basis, no appropriations made by congress to stimulate increased food production have contributed more to this end than has been true of the appropriations already made to the U. S. Office of Education for these specific vocational training programs.

"Practically all of our 3,000 local departments of vocational agriculture, scattered widely throughout the entire country," says Mr. Spanton, "have available on the local school ground a well-equipped farm shop building where courses in farm machinery repair are given to farmers and where, at the same time, their much-needed farm machinery and equipment can and is being actually overhauled and repaired."

BRIEFS . . . by Baukhage

Of the 20,000 Australian civilians now employed by the U. S. army in the Southwest Pacific, about 30 per cent are women, as reported by a Melbourne broadcast to the U. S.

The rice produced in China's Japanese-occupied Kiangsu and Chekiang districts can be bought only by the Japanese at a fixed price, to be sent to Japan for military use.

JUST

One Way Doctor—Great Heavens! Who stuffed that towel in the patient's mouth? Patient's Husband—I did, Doc. You said the main thing was to keep her quiet.

Changed Him Lady—Aren't you the same man I gave a piece of cake last week? Tramp (sadly)—No, ma'am, I am not. And what's more, the doctor says I never will be.

Sweet Slumbers Jasper—My uncle got fired for lying. Joan—My goodness, what about? Jasper—About an hour too long in bed every morning.

Look Me Up "Won't you give me your telephone number?" he murmured. "It's in the book," she said. "Splendid," he sighed. "And what's your name?" "That's in the book, too," she snapped.

END LAXATIVE HABIT THIS EASY WAY!

Millions Now Take Simple Fresh Fruit Drink—Find Harsh Laxatives Unnecessary

It's lemon and water. Yes!—just the juice of 1 Sunlight Lemon in a glass of water—first thing on arising.

Then first thing in the morning, this wholesome drink stimulates bowel action in a natural way—assures most people of prompt, normal elimination.

Why not change to this healthful habit? Lemon and water is good for you. Lemons are among the richest sources of vitamin C, which combats fatigue, helps you resist colds and infections. They also supply B, and P. They alkalize, aid appetite and digestion. Lemon and water has a fresh tang, too—clears the mouth, wakes you up!

Try this grand wake-up drink 10 mornings. See if it doesn't help you! Use California Sunlight Lemons.

WOMEN #40's

Do You Hate HOT FLASHES? If you suffer from hot flashes, feel free, nervous, a bit blue at times, all due to the functional "middle-age" period peculiar to women—try Lydia E. Pinkham's Vegetable Compound to relieve such symptoms. Taken regularly—Pinkham's Compound builds up weakened systems, restores normal health, and makes especially for women. It helps nature and that's the kind of medicine you need. Lydia E. Pinkham's Compound. LYDIA E. PINKHAM'S VEGETABLE COMPOUND

QUEENS DIE PROUDLY

By W. L. White W.N.U. FEATURES

THE STORY THUS FAR: Lieut. Col. Frank Kurtz, pilot of the Flying Fortress known as "The Swoose," which escaped from Clark Field, tells of that fatal day when the Japs struck in the Philippines. Old 89, another Fortress, is struck down before it can get off the ground, killing eight of her crew. Kurtz and his men are getting ready for a reconnaissance trip over Formosa when they hear the whistling of bombs. They run for the nearest foxholes and stayed in them until the first Jap formation flew away. Then they get what antiaircraft is available, in action. The field is littered with the charred skeletons of Flying Fortresses, including Old 89. They plan to salvage the wrecks.

CHAPTER IV

"A lot of damned fools were waving flashlights around unnecessarily, and I thought, 'Suppose a Jap Recco plane catches a glint of this.' Pretty soon I heard a plane and raised up to listen, but when it came in plain-sight I recognized the deep four-motor grind of one of our own Fortresses—it was undoubtedly one of the dozen which had been left down on Del Monte Field, now coming in from the long-trip from Mindanao to spend the rest of the night on Clark and in the morning pound some of those scores of Jap transports which were said to be swarming off Luzon.

"And I hoped to God that single remaining runway strip had been cleared so they could get down, and they wouldn't have to circle and go back home. Just then a nervous antiaircraft battery opened up on the Fortress, and then they all did.

"Over at the field, six of the Mindanao gang had come up from Del Monte, coming in two and three at a time and landing on the two-thousand-foot strip of runway which was all that remained of Clark Field. Then they had been pulled off into dispersed areas while they were gassed up and loaded with bombs. The pilots of this half-dozen were now assembled while the Colonel gave them their targets, and towering over the group was Colin Kelly—I could see his curly black head, his shoulders back as usual. I knew the boys would be headed out into plenty of trouble, and I couldn't help walking over to listen while the Colonel briefed Colin. I felt a little brotherly about him because he'd been one of my co-pilots back on March Field. Now he was headed out on his first battle mission.

"Colin was photographing every word in his mind. He looked tired from flying all night, had had little if any sleep—his ordinarily neat uniform was smeared with grease as though he'd been working on his engines himself—and we had time only to exchange waves as he headed for his plane to load his bombs and I climbed up into the tower.

"The thing was practically a sieve from bullets which had ripped through the corrugated iron during yesterday's strafing. A couple of privates had been up there for twenty-four hours without food or relief—I guess everybody must have forgotten them, but they'd done a swell job. Looking at all those jagged holes in the sheet-iron walls, I didn't see how they'd come out alive, but they explained it—told me if I got strafed, I could lie down along one sheet-iron wall behind a pile of lead battery cases used to run the field lights.

"My job of course was to handle the tower lights—give the boys the signal when they could come in to land on the field—but the Colonel wasn't taking any chances losing any more of the ground. He said when any Fortresses came back, to keep them in the air, circling the field, until he changed the order.

"Presently there comes scooting in one of those little low P-26's that were used by the Filipino Air Force—an old stick-and-wire job with non-retractable landing gear which is practically a museum piece. I give him the green light, because I can see he is already so full of bullet holes I don't see how he can stay in the air—and out jumps this little Filipino fighter pilot. All he wants is more gas and more bullets for his little .30-caliber gun, and he's back up in the air for more of 'it. Those kids did a magnificent job for their islands with that decrepit junk.

"Everybody was jumpy—I didn't know what minute the Japs would come back. I watched one truck that was wandering around the field with a gang filling up bomb crates. Suddenly the air-raid bell sounded, and those guys dived out of the truck in every direction to run for foxholes, leaving the driverless truck to keep wandering right on over onto its nose in a shell crater. Those

phony alerts were a constant strain, even though each one was called off fifteen minutes later. I've since wondered if maybe fifth-columnists weren't turning in most of them.

"That morning our fighters (yesterday's raid had left maybe fifteen out of the two dozen which had been on Iba Field) were doing a magnificent job. And learning, too—this was their first day of real fighting, and there is just a hell of a lot about war that you can't find in any book and that they can't teach you in maneuvers. Buzz Wagner, the best fighter of them all, would have told you that.

"Buzz, with a single P-40, had done a job that ordinarily would be assigned to an entire squadron. (A fighter squadron is 25 planes.) Buzz had been sent out in the early morning full of ammunition for his six .50-caliber guns and with 30-pound fragmentation bombs under his wings, so he was ready to jackle almost anything he saw.

"He was out over the sea north of Luzon, sitting on the overcast, when suddenly a terrific ack-ack barrage came snorting up at him through the cloud layer. There was so much of it Buzz figured it must have been at least a Jap battleship shoveling it up at him, so he was pulling off to the south—still staying above the cloud layer—when he spotted four Jap fighters high above him. He was tempted to dump his bombs—which would give him more speed and maneuverability—and go up there to tangle with them, but those bombs, according to his brief-

The air raid bell sounded and those guys dived out of the truck.

ing, were destined for some planes the Japs had just put ashore on a field near Lingayen, so he kept on his course.

"But all of a sudden about three bushels of red-hot Jap tracers came whizzing by his cockpit. He pushed the stick forward to nose her down, and then in a climbing turn to the right pulled her back up into the sun—and then he looked back to see that two of the four Jap fighters had detached to work him over.

"They were coming hell-for-breakfast, so he pulled a cute maneuver—throttled back suddenly to let them go roaring on by him, and then opened up on their vanishing tails. His first burst put them both on fire. Those good old .50-calibers—the P-40 had six of them and when they speak, they do all the talking.

"Remember all this time Buzz hadn't dumped his bombs. They might easily have cost him his life, but his job was to get to Lingayen Field, where he had a rendezvous with Lieutenant Russell Church.

"As he approached Lingayen, first he saw Russ, who fell in on his wing, and then he saw his target—all those Jap planes on the ground lined up just like it was for an ordinary peacetime Saturday-morning inspection. I want you to get this—to see it isn't only the American Air Force which gets caught with its pants down and its suspenders trailing.

"They started the long glide down, circling the field, and then Buzz peeled off and started in on them. Russ was to follow, but at a good distance, so he wouldn't pick up in his propellers the fragments of Jap planes tossed up by Buzz's frag bombs.

"So down they went—Buzz first, then Russ, just skimming the field. As the first target came into sight Buzz let go first one and then the other of his 30-pound fragmentation bombs, and looking back over his shoulder, he saw old Russ was just coming in behind him. Buzz went on across the field and then pulled up sharply to watch Russ' bombs go right down the line. Russ' tail was on fire from Jap ack-ack, and he knew it, but he stayed dead on his run, making direct hits on those

neatly lined-up Jap planes, and then—Buzz still watching—Russ pulled up at the end of the field in a slow half-roll and—went in. Buzz says it's just possible Russ was able to bail out—he couldn't wait to be sure, for now he was getting ready for his second run, all alone. He came in on this second pass through the Jap ack-ack with his six .50-calibers packing away at those parked planes—some were already burning from the bombs he and Russ had dropped—crossed the field once, and had banked to come in for a third pass when Jap tracers began whizzing past his cockpit from behind. He looked over his shoulder to see that the last two of those Zeros were diving on him. Of course there was nothing he could do but push his throttle up to the fire wall, jamming on all the gas his engine would take—and try to get away.

(Air force slang meaning his plane went into the ground.)

"Inch by inch he pulled away from those Zeros—he looked back at the field once and saw about six good fires going—and Buzz said it was damned lucky he got back to the field, because he could tell the boys that a P-40 could outrun a Zero at sea level. Remember, though, he said out-ran, not outmaneuver.

"In those days everybody was learning stuff that wasn't in the book, and passing it on. Everybody had to learn, which is why we don't get bitter at being mishandled at first.

"But Buzz always hated to talk about himself. 'Did you hear about the Rat?' he asked me, very excited. The Rat of course was our old friend Lieutenant Sam Marrett, who had picked up this nickname at Randolph Field because of his pointed nose and small face. 'The Rat took four wimplings out on patrol, and they were laying back above a hillside on Lingayen when they spotted a Jap landing party, so they climbed to get altitude and then peeled off out of the sun onto it—the Rat leading, of course—in one long string, each picking his barge. What happened no one knew for sure. But one of the Rat's bullets must have touched off the magazine racks in the Jap barge he picked, anyway the barge blew right up in his face, and the Rat's plane disintegrated. But the other four kids continued on their run, first dropping their frag bombs, and then strafing back and forth—they had Japs diving off those barges in every direction.

"That day," said Frank, "my job was the tower, not going on missions myself or even listening to gossip. A little after noon I happened to be looking up at the overcast toward the roar made by one of our planes which I thought maybe would be trying to come in when suddenly I saw a parachute blossom just under the overcast—and another—and another. I counted eight, so it must be a Fortress—but no ninth. Instead, at the very end of these eight I saw a dark object go hurtling into the ground. One of our Forts, but whose? I didn't find out until evening that it was Colin Kelly. He'd been out there following his briefing that I'd heard that morning, which was to attack Jap transports and their naval escorts. He'd laid a direct hit square on the very biggest target any pilot could hope for and had been on his way home—had been about to let down through that overcast onto Clark Field—when two Jap fighters, who had been hanging on ever since he left the convoy, hit him. They put a lucky incendiary into his oxygen system, and of course it started to burn like cotton soaked in gasoline. But Colin wasn't rattled. He gave the regular orders over the interphone system for the other eight boys of his crew to climb into their chutes and abandon ship.

"Now a part of this procedure in a Fortress is that the pilot must be the last to leave. It's the same in the Navy, except that it's sometimes just a glib gesture, particularly when the captain can't help much by staying, and if the ship does go down under him he can float away from the bridge in his life jacket, and pretty soon someone's giving him a slug of rye and a brisk rub-down in the wardroom of another ship.

"But in the Air Force it's the real McCoy. Because if a Fortress is on fire, somebody has to stay on the stick to keep her level and right side up while the other eight make their jumps. That somebody is the pilot, and that's one of the things you must be ready to do in order to wear those pretty silver wings on your chest, that the better-upholstered girls stare at in the better-upholstered bars.

"Well, Colin stayed on the stick as his plane dropped with its oxygen system flaming, and all eight got out, and I suppose carefully counted one thousand—two thousand—three thousand like it says in the book, before they pulled their cords and their chutes blossomed.

"But by the time the last one was out, and Colin got his own chute on and opened his top escape-hatch window above that fume-filled cockpit and crawled up through it—well, he cleared the plane all right, but he was so close to the ground that he never had a chance to crack his chute.

(TO BE CONTINUED)

Star Dust

By VIRGINIA VALE

Released by Western Newspaper Union.

SMILEY BURNETTE, Republic's robust Western comedian, is celebrating his tenth year in films with his current "Border Town Trails." He's had quite a career. After barnstorming the Midwest for years he became the operator of a one-man radio station in central Illinois; he did everything, including writing songs for his programs. One night Gene Autry heard him; next day Smiley joined Autry in Chicago, and shortly afterward they went to Hollywood and into pictures together. Smiley has written more than 200 songs for himself, Autry, Roy Rogers and others in Republic films, and has made almost 100 pictures—and an enviable name for himself.

Nice spot Allan Jones landed in, with Universal Pictures demanding that he return to Hollywood to star in a new picture, while he, starring in his own radio show on Wednesdays and on "Broadway Matinee" Thursdays, could afford to refuse.

ALLAN JONES

He thought they could have used him before he signed his radio contracts, that it was his radio work that made them want him back—and he still shudders when recalling that he was assigned to a picture called "Paradise Isle," in which he was to play a singing newspaperman.

Cantinflas, Mexico's spectacular comedian, said to combine Will Rogers' acting gifts and Charles Chaplin's pantomime, is to make a picture under the auspices of RKO and Posa Films of Mexico. It will be his first appearance in an English-speaking production, and Mexican and American talent will be combined for the picture, which will get under way within the next three or four months.

Dennis Morgan's fan mail has been steadily increasing since the release of his first starring picture, "The Hard Way"; now it's reported that he received more than any other Warner Bros. star during April. He's starred in two pictures now in general release, "The Desert Song" and "Shine On Harvest Moon," and will play the lead in "Christmas in Connecticut," opposite Barbara Stanwyck.

Keenan Wynn says that, on that trip to China, Burma and practically everywhere, the GIs, sitting in the rain, insisted that he and Bill Gargan work out in the rain. Andy Barclay could stay under the canvas covering, to keep his instrument dry. And as for Paulette Goddard, she could work under the cover; in fact, the soldiers made every effort to do everything they could for her.

If anyone thinks that Ginger Rogers is afraid of competition, the line-up for "Tender Comrade" is the answer. Three top-flight women stars who've made their mark on Broadway as well as in films are in the cast—Ruth Hussey, Patricia Collinge and Mady Christians.

Dix Davis, who plays "Judy," brother on NBC's "Date with Judy," has just turned 36, and is a freshman at the University of Southern California, but he seems to have a touch of superman in his makeup. He keeps near the head of his class, and maintains a schedule of eight radio shows a week; he's heard on six other radio shows beside "Date with Judy."

Arthur Lake, "Dagwood" of the "Blondie" series, has spent most of his life as an actor bringing comic strip characters to life. His first came to prominence with his portrayal of "Harold Teen"; then was chosen as a natural for "Dagwood" on both air and screen.

ODDS AND ENDS—The sly Sammie Kaye features on his "Sunday Serenade." Let's all do more in '44, has received commendation from the U. S. treasury department. . . . Nita Ross, 18, new singer on Xavier Cugat's program, made her radio debut on Major Bowes' amateur program when 15. . . . During the final days of production on "Our Hearts Were Young and Gay" Gail Russell suffered from tooth trouble; it seemed that the greater the ache, the more comic the scenes. . . . Burgess Meredith, now an army captain, learned fans haven't forgotten him. They mobbed him for autographs after he appeared on the "Kate Smith Hour."

For you to make

5664

Tufted Fascinator

SMALL tufted snowballs perched all over a coral fascinator! Crochet it in a big mesh—sew the wool tufts made of a contrasting color on the finished fascinator. It's as pretty a fascinator as any you've seen!

You will obtain complete crocheting instructions for the Tufted Fascinator (Pattern No. 5664).

Strawberry Patch Quilt
A "STRAWBERRY patch" quilt makes one of the loveliest quilts you've ever seen! Big, fat berries about 5 1/2 inches across are appliqued—plain blocks have white strawberry flower designs to be quilted—leaf design around border is quilted in pale green thread.

You will obtain complete cutting pattern for Strawberry Quilt (Pattern No. 5397), quantities of materials specified, finishing directions and quilting directions.

Household Hints

Adhesive tape on toe and heel of baby's shoes will keep him from taking a header on the newly waxed floor.

A sewing machine should be oiled after every ten hours of use, by putting a drop of oil on each bearing, as directed in the book of instructions.

If you will keep your jar of peanut butter turned upside down on the pantry shelf, the oil will stay mixed and the top of the butter will not dry out.

A spring clothespin painted to match kitchen equipment is a useful addition to the kitchen for removing hot kettle covers of the ring type.

Make your own celery salt by drying celery leaves, rolling into a fine dust and adding in an equal amount of salt.

Pin a turkish towel over the table part of your sewing machine to keep slick materials from sliding off when sewing.

When there is sickness at home, set the alarm clock to ring at medicine-taking time.

To clear the room of tobacco smoke, place a dish of vinegar in the room.

CLABBER GIRL Baking Powder

For that WAR-TIME BAKING RECIPE Guard against baking failures by choosing proved ingredients. . . . Guard against waste and be sure of results with Clabber Girl, the baking powder that has been the baking day favorite in millions of homes for years and years. . . . Ask Mother, She Knows! Clabber Girl never fails on baking days!

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers. Send your order to:

SNAPPY FACTS ABOUT RUBBER

After the war American synthetic plants should produce enough to meet our military requirements, perhaps 200,000 tons or more a year, and as much additional as can be justified through the free play of economic forces to meet the current civilian needs. This is the recommendation of John L. Collier, president of the B. F. Goodrich Co.
