

COUNTY CLERK

CARRIZOZO OUTLOOK

Published Weekly in the Interest of Carrizozo and Lincoln County

8 PAGES

VOL. 24—NO. 18

CARRIZOZO, LINCOLN COUNTY, NEW MEXICO, FRIDAY, AUGUST 25, 1944

PRICE \$2.00 THE YEAR

PERSONALS

Mr. and Mrs. Frank Maxwell of the Claunch country were here on business Tuesday.

Mrs. O. L. Wilson of the Worth Co. of Capitan was business visitor here Monday.

Mr. and Mrs. Sherwood Corn of their ranch near Bingham were shoppers in town the last of the week.

Mrs. Fred Shumate of Claunch was a business visitor here last Friday and included this office in her business calls.

Mr. and Mrs. R. W. Lacey of Nogal have sold their ranch ranch to a man from El Paso and have moved to Alamogordo.

Leo Smith flew from Honduras in 36 hours and spent a night in Mexico City, arriving in Carrizozo in time for his father's funeral.

John W. Harkey of the Harkey Lumber Co., is ill at this writing and confined to his bed, but his condition is much improved.

Mr. and Mrs. Ernest R. Blood of the Angus country were here the last of the week. Mr. Blood is Republican Chairman of the Ancho voting precinct.

Mr. and Mrs. Proceso Salcido and children were here the last of the week from their ranch-farm near Hondo. Mr. Salcido is the popular Republican candidate for County Commissioner of district 1, Lincoln.

Mr. and Mrs. S. E. (Ben) Greisen were here from Capitan Monday. They remained here most of the day and returned home in the evening. Ben is the Republican candidate for the office of County Clerk.

Miss Ruth Barnett and Mrs. Fred Greer are here from Tucumcari for a portion of the week, which they will spend with the home folks, after which they will go to Eagle Creek to spend the remainder of their vacation of two weeks.

R. A. Walker of the Lyric Theatre, who suffered an injury from a gas blast several weeks ago, is again able to be out and looks fairly well considering the ordeal through which he went. Jim Gatewood, who was with him at the time, is not improving as well as Mr. Walker, so we understand.

Mr. and Mrs. Cooper Hightower of Tucumcari, son and daughter were here last Friday on their return trip from the Sherwood Corn ranch near Bingham, where they spent about ten days, that being their vacation. Cooper is a trainman on the S. P. and makes frequent trips to this point during the week.

Mr. and Mrs. Meyer Barnett have received word from their daughter Hilda, who is now at Oxnard, Calif., and employed at the air base. Her aunt and uncle, Mr. and Mrs. Sam Kelsey reside at Oxnard, also. According to the letter, her position carries with it a good amount of responsibility and Hilda is equal to any task set before her. She sends regards to her many home friends.

George Wandell Meets Big Bear on the Bonito

Last Saturday afternoon George Wandell left his home in Nogal and took a trip on foot into the White Mountains in quest of romantic thrills, so taking his picture machine he ventured far into the mountain regions of the skyline.

After gaining a high point on the south fork of the Bonito, he sought a place that would give him a good view of the valley far below him and also a good vantage point on the mountain range across the valley.

He sought out a suitable place and stretched out to take a rest. He took several pictures of the surroundings, but all at once, a herd of does met his gaze only a short distance away, then a flock of wild turkeys came in sight, next was a doe on the mountain side, racing and playing with her little fawn.

All the above sights George got good pictures of and the hour growing late, he decided to take back-track for home when he heard a noise close behind him and turning his head, he saw a large cinnamon bear looking direct at him. In reaching for his camera, the bear retreated a short distance, raised to his hind feet, started toward George. In that position, he got another good picture of his strange mountain associate. He came close enough to see that the figure was that of a man and bear a hasty retreat. George was dressed in black and by that he thinks the bear thought he was a black bear and by his walking on his hind feet, towards George he meant to make love to him and give him a nice hug, but George said, "Oh, Boy, if he could have got his arms around me, wouldn't that been a nice story to tell my wife, if I could have lived to tell it?"

Farm War News

With the addition of used garden tractors and tractor-mounted mowers to the list, there is now a price ceiling on almost all used farm machinery. District OPA officials are urging New Mexico farmers to make sure of ceiling price before they buy or sell a used implement.

The 92-cents-a-pound average price that producers received for wool in June was the highest price reported for June since 1919. Mill consumption of apparel wool for first five months of the year was at annual rate of 610,000,000 pounds, scoured basis.

The indicated pig crop of 88,000,000 head for 1944 is a sharp reduction from last year, but it would still be the third largest on record.

With present crop indications pointing to larger feed supplies for livestock, analysts of the Bureau of Agricultural Economics believe that cattle feeding may increase this fall and winter.

Because of a reduced lamb crop and prospective smaller marketings for the rest of the year, WFA officials expect lamb prices to be better than they were last year.

Mr. and Mrs. George Wandell of Nogal were business visitors here Monday. George had an unusual exciting experience last Saturday, which appears elsewhere in this issue.

The New Deal Carefully Hides the "Nigger in the Woodpile" on Pearl Harbor Mess

People of this country should pay close attention to a recent letter written by Rear Admiral Kimmel, in answer to an article in Collier's Magazine, in which Senator Truman, candidate for Vice President made a vicious attack on Kimmel, accusing him of all kinds of misdemeanors and becoming a man in his official position.

In fairness to the Admiral, we arise to say without fear of contradiction, that the investigation into that remarkable case has been delayed until after the election. Why? Because as Kimmel says in his letter, the truth of the matter has never been told and when the "Limburger" is uncovered, it will smell to high heaven and implicate even inhabitants of the White House. Kimmel has never been given the shadow of a chance to tell what he knows about what

caused the attack, who was at the head of it or who in our big circles caused it to come on when this was the last resort to get us into war.

The why, may we ask, after three years of waiting has not that investigation been made in fairness to all concerned? and again might we ask, as it was scheduled to be held in 1944, has it been delayed until after the election? Would it not appear to the fair-minded person, that to bring it up now, or at any time in '44 as promised, that it would so single the robes of those on the throne at Washington, as to gravely endanger the election of the President and his Tom Pendergast partner? This is not guesswork, but facts as plain as the nose on one's face. Let the reading man and woman pause and reflect before they cast their ballots in November

William Lee Smith

William Lee Smith was born in Coryell County, Texas, Dec. 9, 1875. He moved with his family to Comanche County in the early 1890. There in Comanche at Sipe Springs in 1897 he married Mollie A. Grove. Two sons were born to them. Then in 1900 they moved to Otero County, N. M., Jampa Canyon, where he went to work for the E. P. & S. W. Railroad Co. He worked for that company until 1923 when he had a serious accident coming from Russia Y* to Cloudford.

He was bringing a log train from Russia Y* to Alamogordo—the logs were on a flat car—he was standing by the train waiting for the snow plows to clear the track when two huge logs rolled off the top of the car on him breaking his back, his leg, his ribs and doing much internal injury. He was seriously ill and in bed for a year. It was generally believed that he would never walk again, but with the aid of a heavy brace for his back and a world of determination he was up and around. He was able to be manager of the S. P. Club House at Carrizozo for eighteen months in the years of 1925 and 1926, but was not able to work regularly. He was well known and well liked and enjoyed a wide and warm friendship among the men of the Railroad Fraternity.

He will long be remembered for his love for flowers and his kindness to friends and his family.

He has lived in and around White Oaks for the last fifteen years.

He is survived by his wife and his two sons, H. Orris Smith, rancher north of Capitan and Leo R. Smith with the U. S. Government at Honduras, Central America.

Funeral services were held at the local Methodist Church with Rev. Loudin conducting the same and interment was at the White Oaks cemetery.

Roy Roper

Funeral services for Roy Roper were held Sunday at the Corona Baptist Church, followed by burial at the Corona cemetery. Mr. Roper, a rancher at Gallinas, was instantly killed Friday of last week in an auto-train collision at Gallinas.

Young GOP Meets

James I. Chacon, Albuquerque, was elected President of the New Mexico Young Republicans at the organizations biennial convention Sunday at the Franciscan Hotel in Albuquerque. He succeeds Ben F. Meyer, a Republican nominee for Congressman.

Among other officers elected were J. G. Moore of Carrizozo as National Committeeman; Mr. Moore is Chairman of the Lincoln county Central Committee.

This paper feels that Lincoln county has been honored by having one of its citizens named to so important a position and wishes to extend its congratulations to Mr. Moore and to Mrs. Geraldine Perkins, Corona, who was elected as an alternate to the National Convention in Springfield, Ill., making this a double honor for Lincoln county. Mrs. Perkins is well known in State political circles, being a member of the State Central Committee from Lincoln county. Mr. Moore stated that he was confident Mr. Chacon would prove an excellent state leader and would develop an active Republican organization in every county in the state. He said plans were underway to open a state headquarters in Albuquerque immediately.

Boy Scouts Court of Honor

There will be a Boy Scout Court of Honor for district 6 at the High School auditorium at 7:45 p. m. Wednesday, Aug. 30. Carrizozo troop 58 will be the Host Troop. Troops which are expected to attend are Capitan, Hondo, Ft. Stanton, Hollywood, Mesalero, Ruidoso. 2nd, 1st, Star, and Merit Badges will be presented. The public is invited.

A. J. Rolland is ill this week

Mr. and Mrs. Will Ed Harris of their ranch in the Claunch area were visitors in town yesterday.

Attention Masons

There will be a special meeting of Carrizozo Lodge No. 41, A. F. and A. M. for the purpose of conferring the entered apprentice degree. Bert Pfingsten, W. M. R. E. Lemou, Sec.

In the Service

Eddie Penfield, former county clerk, is serving overseas as instructor in several languages the principal one being Spanish.

Pvt. Lorenzo Mirabal, who is a Jap prisoner in Tokyo, sent his wife a radio last week, sent his love to her and his baby son. It was heard by Mr. Montgomery of Claunch, who came to town the same day in order to tell Mrs. Mirabal about it.

Seaman Maurice Spear of Claunch is home to spend his furlough, being stationed at Oakland, Cal. Mr. Spear also has two sons in the service.

Pvt. Ernest Pehm, who is a prisoner of the Japs, wrote his mother a card last week and sends his love to her and also gives his old friends best regards.

Staff Sgt. D. Deweber, son of Rev. Deweber of the Assembly of God Church, writes home that he has lately been promoted to the above named rank. He is well and his location is somewhere in India.

Ben Barnett, Navy Motor Machinist 2-c, is in the Solomon Islands. Ben is the son of Mr. and Mrs. Meyer Barnett.

Aviation Machinists Mate 2-c Bob Shafer was somewhere in the Pacific ocean when last heard from and said by the time his folks received his letter, he would be at his base, which is Pearl Harbor. Bob is the son of County Commissioner and Mrs. Roy Shafer.

Staff Sgt. Richard Dow, son of Mr. and Mrs. Larry Dow, has been transferred to Camp Planche, New Orleans.

Triple-Stitched Shuttlecocks Price Is Settled By OPA

By Francis J. Kelly
Washington, Aug. 19.—OPA set a jobbers' ceiling price of \$48.96 a gross today on triple-stitched shuttlecocks made from the middle wing feathers of white geese.

Even though the graduated maximum price schedules were fixed as low as \$25.80 a gross on the poor man's shuttlecock—which is only double-stitched and is fabricated from chicken feathers—some Republican lawmakers showed campaign year discontent with the order.

"Shuttlecocks, Senator Alexander Wiley said severely, 'are not regarded as a cost-of-living item in Wisconsin.'"

Senator Kenneth Wherry of Nebraska announced he intends to speak to the Senate on the shuttlecock situation. "This beats anything I ever heard of," he stated.

Nobody here seemed to have any idea how many pounds of feathers are consumed by the shuttlecock industry.

The OPA order was silent about battledores, the thing you hit a shuttlecock with. It did specify that all shuttlecock sellers must give a written explanation of the maximum price order to persons who buy them for resale.

"This notice may be given in any convenient form," Administrator Chester Bowles ruled. Here—clip this out, pin it to a shuttlecock and hand the sales manager his battledore. — Can you beat it?

Faculty Carrizozo Public Schools '44-'45

Miss Minnie Lee Neill, First Grade, B. S. Degree, North Texas State Teachers College, University of New Mexico.

Miss Dorothy Ator, Second Grade, North Texas State Teachers College, University of New Mexico.

Miss Lois Roseberry, Third Grade, Highlands University.

Miss Virginia Embrey, Fourth Grade, Highlands University.

Mrs. Mary B. Smith, Fifth Grade, Highlands University.

Miss Thelma Zuber, Sixth Grade, A. B. Highlands University.

Mrs. Janie Key, Social Science and English, A. B. Phillips University.

Sedala A. Followell, Mathematics and Coach, B. S. Degree, North Texas Teachers College.

Mrs. Glenneth Stokes, Science B. S. Degree, University of New Mexico.

Mrs. Ann Breeden, Social Science, A. B. Degree, University of Oklahoma.

Mrs. Eva Karlin, English and Drama, A. B. Degree, Highlands University.

Miss Mildred Harrell, Commerce and Spanish, A. B. Highlands University.

Miss Lois Brennan, Homemaking and Girls Physical Education, B. S. Degree, University of New Mexico.

L. Z. Manire, Science and Mathematics, B. S. Degree, North Texas State Teachers College.

Mrs. Mary F. Johnson, Office Clerk, Highlands University, New Mexico Teachers College.

Santa Rita School
Sister Mary Regis, Fourth, Fifth and Sixth Grades, Mt. Mercy College, Catholic Teachers College of New Mexico.

Sister Mary Pauline, Second and Third Grades, Mt. Mercy College, The Teachers College, Athenaeum of Ohio.

Hedda Hopper: Looking at HOLLYWOOD

AS ONE of the first, possibly the first, young couple to return from active service to the fighting fronts, Hollywood's Director Leslie Fenton and his actress wife, Ann Dvorak, are providing a pattern for thousands of other couples who will shortly be returning to pick up the threads of their personal and professional lives which they dropped when they heard the call to duty.

Fenton and his wife departed for England early in 1939. He served as commander of a British PT boat patrolling the English channel and waters off the coast of Scotland,

Ann Dvorak and Leslie Fenton.

was wounded in the now historic commando raid on the port of St. Nazaire. He holds the distinguished service cross, presented to him by King George personally at Buckingham palace.

When Fenton departed for England he was directing at M-G-M. He had just finished production on "Arouse and Beware," starring Wallace Beery. His wife was playing in a Warner's picture. She could not accompany him, but followed on the next boat. She made arrangements for relatives to take over the running and management of their prosperous 40-acre San Fernando valley walnut ranch, which they purchased shortly after their marriage in 1931. On arriving in England she enlisted in the M. T. C. Britain's mechanized transport corps, and drove an ambulance under bomb fire during the Nazi blitz.

Good Job Well Done

When Fenton was invalided out of the service and ordered home, Ann, her patriotic duty in that phase of the war effort ended, accompanied him as nurse.

Producer Lester Cowan was about to film the Broadway stage success "Tomorrow the World," with Fredric March and Betty Field. A story Fenton understood and warmed to. Fenton signed to direct this production.

Ann, her home in order and her garden growing, signed with Republic and is currently doing a starring role in "Flame of the Barbary Coast."

Full Appreciation

"It's almost like the war's over, coming back here," they say, "after living in England, and we don't mean this as any criticism, merely observation. The war is so close in England. For a long time it was right overhead and at your front door. No one knew what would happen next."

When Fenton first came to the screen from the legitimate stage, he played the neurotic young soldier who went berserk in "What Price Glory." From this he gravitated into sinister roles through the gangster era, which began with "Public Enemy No. 1," with James Cagney; "The Hatchet Man," with Edward G. Robinson, and similar underworld films.

He was given a part in "The Strange Case of Mollie Louvain," opposite Ann Dvorak, whom he'd never met. They fell in love, and in 1931 they were married.

Change of Character

He and Ann went to Europe on their honeymoon. There he played romantic roles for a year in European productions in London and Berlin.

When Fenton returned from this trip he decided to forsake acting and try directing. Ann meanwhile went back to Warner's and resumed her contract.

Fenton returned to the obscurity of a shorts director at M-G-M and after a two-year apprenticeship was given a contract to direct features. "Stronger Than Desire," with Walter Pidgeon, and "The Golden Fleecing," with Lew Ayres, were among the productions he made.

He'll continue directing and Ann will continue acting. "If any of the pictures we make cheer up the troops or provide entertainment for the people actually in the war effort we feel we're doing something."

A Promise Is to Be Kept

C. B. De Mille's next, which is "Rurales," started 53 years ago. In 1913, Pancho Villa, who loved Mexico, and wanted us to do likewise, tried to get C. B. to tell the story on the screen. He offered to meet C. B. at the border and remain his personal bodyguard, C. B. to name his own salary. "Thanks for the promise of safety," wrote C. B. "Dead I can do you no good; alive I can make you a good picture." But Villa lost out.

Air Evacuation of Wounded Takes Its Place With Sulfa Drugs and Blood Plasma as One of Modern Military Medicine's Greatest Life-Saving Plans

By ELMO SCOTT WATSON
Released by Western Newspaper Union.

HE WAS one of the doughboys who jumped down from a landing barge to the sandy shore of Normandy on D-Day.

A chattering machine gun in a German pillbox, that hadn't yet been silenced, sprayed lead across his path and he slumped to the ground. There was a cry of "Medic! Medic!" and a moment later skilled hands were binding up his gaping wounds.

The next morning four planes (unarmed C-54s) swooped down near the field hospital where he lay. Land mines were exploding 150 yards away when the first two ships landed. Out from these planes sprang two flight-nurses—Marjean Brown of Columbus, Ohio, and Suella Bernard of Waynesville, Ohio. "All right, soldier, you're going to take a little trip with us!" smiled one of them.

Within two hours they had gathered up not only this GI Joe but dozens of other desperately wounded, loaded them into the planes which were soon winging their way back to England. Two weeks in an American army hospital there and then on June 29 a huge Air Transport Command plane settled down on an airfield on Long Island, N. Y. It was just 19 hours since it had left the British Isles.

A day's rest in a hospital near New York—then aboard a plane again. And today this GI Joe is convalescing in an army hospital out in the Colorado Rockies, near enough to his home so that Dad and Mom and Sis can come to see him get well. It's several thousand miles from the place where his blood dyed the sands of the French coast to this place where both his body and mind are being healed of the wounds of war but this cycle of life, near-death, then life again, is encompassed within the time span of less than four weeks!

The reason for this can be summed up in two words: air evacuation. No wonder that Maj. Gen. David N. Grant, air surgeon for the army air forces, was able to declare recently that the army's system of air evacuation of its wounded takes its place with sulfa drugs and blood plasma as "one of the three greatest life-saving measures of modern military medicine!"

Because of air evacuation, men are alive today who would have perished in the jungles of Makin Island or on the Anzio beachhead, and personnel of the air transport command's ferrying division, who have participated in the air evacuation of more than 7,500 war wounded, have no hesitancy in indorsing the air surgeon's statement.

It's a part of the army's policy of handling wounded soldiers through a progressive system of unit hospitalization which has been developed to a high degree under the direction of Maj. Gen. Norman T. Kirk, surgeon general of the army. Because of front-line treatment given American soldiers, more than 97 per cent of the wounded brought from battlefields to evacuation hospitals have been saved.

Once the wounded have been treated, they must be sent to hospitals far from the scene of battle where they can rest and recover and, of course, the quickest way to get them there is by airplane. Part of these wounded have been flown from foreign theaters of war to their homeland and thousands of them have been flown from hospitals on the coast to hospitals near their homes where they can convalesce and benefit in spirit from visits of family and friends, for it is a basic army policy to get its wounded soldiers as close to home as possible for the convalescent period.

In a recent report on the handling of men wounded during the invasion of France, Maj. Gen. Paul R. Hawley, chief surgeon of the European theater of war, stated: "There has not been the slightest hitch in the chain of evacuation. As a result of the speed with which these wounded were evacuated from Normandy, the condition of the casualties on arrival in the United Kingdom has been surprisingly fine." To that comment might be added the fact that approximately 4,000 sick and wounded have been returned to this country aboard Air Transport command planes, part of them over regularly scheduled transport services operated by the ferrying division of ATC.

GOING HOME—A soldier is carried aboard a plane operated by the ferrying division of Air Transport command and in a few minutes will be flying to a hospital in the vicinity of his home. Flight surgeons inside the aircraft supervise the job.

Many hops are as long as 12,000 miles. Only one patient among those evacuated by the Air Transport command has been lost as the result of air travel.

Cooperation Does It.

Close cooperation between the several organizations of the army makes possible successful air evacuation of the war wounded. The combat air forces outside the United States, the foreign wings of Air Transport command and various air commands in the United States, notably the First Trooper Carrier command, have done experimental work on the problem. In 1943, a total of 173,527 sick and wounded patients were evacuated by American military aircraft throughout the world, ATC carrying all those returned to this country.

Here is the way evacuation from the combat areas is accomplished: Suppose the scene is Anzio beachhead. Medical corpsmen have toiled across the bullet-swept area, given a guy named Jim emergency attention, then inched back with him to the beach where he receives more extended treatment. At a nearby clearing station, the flight surgeon classifies the patients. He determines that this soldier, just arrived from the front, has a serious head wound which requires immediate surgical attention. When the transport plane flies in, Jim is among the outgoing patients.

The medical air evacuation units transform the plane from its troop or cargo-carrying mission and do it quickly. Litter equipment is installed in three or four tiers and as many as 24 patients are loaded. Two men carry each litter to the plane, two more place it in position inside and a third man inside fastens it in place. In an emergency, the flight nurse in the plane must use untrained personnel for this work and occasionally she takes the place of a loader.

When the plane takes off, the flight nurse is in medical charge. Only in extreme emergencies does the flight surgeon accompany her. A surgeon checks, when possible, during the refueling stops. Otherwise the flight nurse and a surgical technician, an enlisted man with non-commissioned officers' rating, handle the patients. The plane is equipped with an ambulance chest which is a small trunk containing bandages, medicine for the relief of pain, equipment for administering intravenous medication and blood plasma also is on the plane.

Once in the air, the flight nurse is in complete charge, aided by a trained staff sergeant. A staff sergeant handles any emergency and does anything a doctor would have to do—except operate. Already the men borne aloft from Anzio were feeling better. Removed from the din of battle, their shock condition improved. Jim, for example, mustered sufficient interest in life to ask where he was going. Six hours after he left Anzio he was in a base hospital in North Africa undergoing a delicate brain operation.

The evacuation chain does not end at the base hospital overseas. Efficiency and medical factors suggest that the men be kept moving rearward until they are as close to home as possible. Part of the wounded, of course, come home by ship. Pa-

tients for the trans-ocean flights are selected by flight surgeons.

Four Kinds of Patients.

Patients' general fitness for air travel is the deciding factor and they are grouped into four medical categories:—(1) Mental patients requiring security accommodations en route; (2) Hospital litter patients who must remain in bed, services rendered by other individuals; (3) Ambulance patients requiring medical care en route from other individuals; (4) Troop class patients needing little medical care en route who can take care of themselves, even in emergencies.

Air evacuation increases enormously once the patients have reached coastal receiving hospitals in the United States, either by aircraft or by surface shipping. The same system of screening is employed at the coastal receiving hospitals that was described previously as prevailing overseas. Urgency of the patients' conditions, together with their susceptibility to air transportation are primary considerations.

Sergt. Walter A. Smith of Springfield, Mass., can testify that the army doesn't stint on its resources when one of its wounded needs special attention. On May 9, 1944, he was wounded in action in Italy. He reached the United States June 14 in a convoy and entered Baker General hospital at Martinsburg, W. Va. An examination by the staff there revealed that immediate surgical attention was necessary. Ashford General hospital at White Sulphur Springs, W. Va., had the specialist for the type of operation required.

Two mornings later a ferrying division plane was at Hagerstown, Md., when Sergeant Smith arrived by ambulance. He was placed aboard with a full crew making certain that the solitary patient received every attention. By noon that day, the sergeant was on the operating table at Ashford General hospital receiving the best surgical care that the army has.

7,000 Patients Moved.

Ordinarily ferrying division planes engaged in air evacuation are completely utilized with all space occupied. Within the continental United States, the evacuation by air of the army's war wounded is the responsibility of the ferrying division of the Air Transport command. Since this responsibility was assumed more than 7,000 patients have been moved without injury to any of the personnel involved.

"The air evacuation of sick and wounded personnel of the armed forces was pioneered by the medical services with the AAF and it can be considered as one of the greatest life-saving measures in modern military medicine," Lieut. Col. Andres G. Oliver, surgeon of the ferrying division comments, "its rapid and comfortable delivery of the patient to a hospital where he or she will get the best (and most specialized) treatment; or to another closer to his home, where his convalescence will be shorter and far more pleasant, has become a great morale factor among our returning heroes."

Thus justice is being served when the aircraft, so terrible an instrument of death and destruction, can be converted to such humanitarian functions as air evacuation.

Air Medal Ribbon Winner

MORALE BUILDER—Typical of the flight nurses assigned to the ferrying division of the Air Transport command is Lieut. Gerda H. Beauwhals of Kalamazoo, Mich. In this picture she is giving a wounded soldier some attention that is obviously much appreciated. Lieutenant Beauwhals wears the Air Medal ribbon in recognition of heroic service performed in the South Pacific war theater.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D., Of The Moody Bible Institute of Chicago. Released by Western Newspaper Union.

Lesson for August 27

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

ISRAEL'S FIRST KING

LESSON TEXT—1 Samuel 9:15-21; 10:25-27; 11:12-15.
GOLDEN TEXT—Honor all men. Love the brotherhood. Fear God. Honor the king. —1 Peter 2:17.

"Well begun is half done," says the old proverb, reminding us of the importance of a good beginning. While it does not guarantee success (see next week's lesson), it is apparently desirable, and truly helpful. Israel had foolishly tried of being a God-ruled nation and had begun to demand a king.

Samuel was directed of God to the man of His choice, Saul, in a very remarkable way. He entered upon his service as king as an obedient and earnest ruler. (Would God that he had continued in that way!) We note a number of favorable elements which indicated the possibility of a successful reign. He was—

I. Wanted by the People (9:15, 16).
"A ruler forced upon a nation is sure of opposition, but here the people were clamoring for a king to rule over them. The way was wide open to the interest and the affection of their hearts. Saul was just the type to please them. Physically he was head and shoulders above the people—a desired thing in a ruler (see 10:23). He was mentally fitted (10:25)—humble (9:21), spiritually right (10:6-9), tolerant and kindly (11:13), and a good military leader (ch. 11).

II. Chosen by God (9:17).
All these qualities commended Saul to God as well as to the people. In fact, he was God's choice. A man could not enter upon high office with any more auspicious token for good. Observe that what looked like a purely chance visit to Samuel, when Saul was on business for his father, was the occasion for the making known of God's choice. Out of a simple experience in daily life came an event which changed his entire destiny.

III. Anointed by the Prophet (9:16-20).
The man of God's choice had met God's man, Samuel, who proceeded to instruct him, and to privately anoint him as king. It was a tender scene. The aged prophet, rejected by the people as God's ruler over them, quietly and sweetly obeyed God's command to anoint the young man to be king.

Public recognition, which came later, was important, but, with Saul as with every servant of the Lord, the personal anointing of God, in the hidden place of communion with Him, was the matter of highest importance.

IV. Humble in Attitude (9:21).
That pride, which was ultimately to be Saul's downfall, was beautifully absent at the beginning of his reign. Although of good family, and well-equipped, he saw himself as poor and insignificant, not ready for such an honor.

V. Guided by Principle (10:25).
Saul did not enter upon his office, new as it was to both him and to Israel, without a Constitution; that is, without principles of action. Samuel, the Lord's prophet, wrote down "the manner of the kingdom" in a book. How interesting, and how important.

Rulers who imagine themselves so wise that they need no controlling laws, and so powerful that the law may not question their decisions, are certainly not rulers after God's plan. Knowing the heart of man, his weakness and pride, God has provided true principles by which the ruler is to be guided, yes and controlled.

VI. Forgiving in Spirit (10:26-27; 11:12, 13).
Some "worthless fellows" despised Saul and would not recognize him as king. The urge of the flesh was to destroy them, and especially did that seem proper because of their worthless nature. But Saul, in true kingly spirit, said that there was to be no revenge, just rejoicing.

To be of the right spirit toward one's enemies is the hall mark of Christian character.
VII. Established in Office (11:14, 15).
While there is the secret whisper of God in the heart, and the personal anointing by the Lord's servant, there should be the public recognition which establishes the Lord's servant in the eyes of all people. Saul had this at Gibeon. It placed him among the kings of the earth, and prepared the way for his dealing with other nations as well as with his own people.

Applying that truth to those who serve Christ, we say that there is upon the church the obligation to recognize God's call and anointing by giving that official recognition which sets the testimony and service of the individual free to exercise itself among men in general.

SNAPPY FACTS ABOUT RUBBER

Using a combination of natural and synthetic rubber in the post-war period may result in automobile tires that will establish new high marks for longevity, according to a E. F. Goodrich chemical technician. He cites the big mileage returned from Goodrich synthetic tires, made in 1940 and composed of both types of rubber, as the basis for his predictions about post-war tires.
Another reason for tires for essential transportation: At the beginning of last year, 85,168 school buses were in service transporting 4,258,788 children over 1,383,091 miles of one-way route.

Keep Cool With Shrimp Salad in Aspic (See Recipes Below)

Keeping Cool

There are still warm days ahead through late summer and early fall, and plenty of opportunity for keeping cool.

Formerly it was thought that one should eat extremely lightly of just low-calorie salads with hardly enough nourishment for the body, and cold drinks. Now we recognize the necessity of using enough proteins,

in the diet to keep the body in good condition, and also know that a cup of hot soup will be as cooling as the coolest drink.

Naturally our proteins may be in the form of salads for we like them especially well in the summer. Here is a good one using a shrimp in aspic, both cooling and nutritious:

Lemon Aspic (Serves 6)

- 2 tablespoons gelatine
- 1/4 cup cold water
- 1 1/2 cups hot water
- 1/2 teaspoon salt
- 1 tablespoon sugar
- 1/2 cup lemon juice
- 1 cup cooked or canned shrimp
- 1 cup chopped celery
- Chicory or other salad greens

Sprinkle gelatine into cold water. Add hot water, salt, sugar and lemon juice. Cool, then add shrimp and celery. Chill in ring mold. Unmold on crisp salad greens. Fill with:

*Shrimp Salad (Serves 6)

- 1/2 cup cooked or canned shrimp
- 2 tablespoons french dressing
- 1 cup diced celery
- 1 cup lettuce, cut in pieces
- 1 cup peas
- Mayonnaise to blend

Marinate shrimp 15 minutes in french dressing. Combine with remaining ingredients. Garnish the lemon aspic with lemon quarters and shrimps.

Do you ever feel that potato salad has a flat taste? That can easily be remedied by marinating the cubed potatoes in french dressing to give them an extra flavor.

Creamy Potato Salad (Serves 6)

- 4 cups cold, boiled potatoes, cubed
- 1/2 cup french dressing
- 1 1/2 teaspoons salt
- 1 medium onion, minced
- 3 hard-cooked eggs
- 1/4 cup diced celery
- 2 slices bacon, fried and crumbled
- 6 sliced radishes
- 1/2 cup mayonnaise or boiled dressing

Marinate potatoes in french dressing one-half hour. Toss together with remaining ingredients and serve with cold meats, wedges of tomato and cucumber slices.

Chicken Salad (Serves 6)

- 2 cups diced chicken or veal
- 1/2 cup diced celery
- 1/2 cup sliced, toasted almonds
- Salad dressing

Mix all ingredients with enough

Lynn Says

Go-Togethers: Some foods served together are inspired combinations. You'll like:

Roast loin of pork with minted applesauce, creamed onions, brown bread and coconut cake.

Curried Chicken with boiled rice; corn muffins with fig jelly or jam, or quince honey; lettuce salad; date and nut pudding with cream.

Beef en casserole, with potatoes, carrots and green beans; apple salad; bread and butter pickles; bread with plum jam; peach crumble.

- Rye Bread-Cream Cheese Sandwiches
- Olives Pickles
- *Peach Crumble
- *Recipes Given

salad dressing to moisten. Serve on lettuce and watercress.

If you are looking for fruity salads, there are any number the family will like:

Fruit Ginger Ale Salad (Serves 6)

- 1 tablespoon gelatine
- 1/4 cup cold water or fruit juice
- 1/4 cup orange or other juice
- 2 tablespoons sugar
- 2 tablespoons lemon juice
- 1/4 teaspoon salt
- 1 cup ginger ale
- 1 cup fruit

Soften gelatine in cold water. Place bowl over warm water and stir until gelatine is dissolved. Add sugar, salt and fruit juice. Cool and add ginger ale. Chill, and when mixture begins to thicken, add fruit cut in small pieces (canned pineapple, pears, apricots, cherries or fresh fruit such as oranges, apples, grapes or bananas). Two tablespoons of ginger may be added if a high ginger flavor is desired. Turn into individual molds that have been rinsed in cold water. Chill. Unmold on lettuce and serve with mayonnaise.

Best Salad (Serves 6)

- 1 tablespoon gelatine
- 1/4 cup cold water
- 1 cup cooked salad dressing
- 1 cup cream or evaporated milk, whipped
- 1 1/2 cups chicken or diced veal
- 1/2 cup almonds, blanched and chopped
- 1/2 cup malaga grapes, canned
- 1/2 cup pineapple or oranges
- 1/2 teaspoon salt

Soften gelatine in cold water. Place in dish over boiling water and stir until gelatine is dissolved. Cool and combine with salt, salad dressing, whipped cream or whipped evaporated milk. Fold in chicken, using white meat, almonds, and skinned grapes, seeded and cut into pieces. Turn into mold, rinsed with cold water, and chill until firm. When firm, unmold and garnish with lettuce, almonds and grapes.

Fruit desserts? Here are two with apricots and peaches:

*Peach Crumble (Serves 6)

- 8 fresh peaches, sliced
- 1/4 cup water
- 1 teaspoon lemon juice
- 1/2 cup flour
- 1 cup brown sugar
- 2 tablespoons butter
- 1/2 teaspoon salt

Arrange peaches in buttered baking dish; sprinkle with water and lemon juice. Blend sugar, flour, butter and salt together until mixture resembles rough cornmeal. Sprinkle over peaches. Bake in a moderate oven (350 degrees) until peaches are soft and top is brown and bubbly, about 35 minutes.

Apricot Dessert

Fill honeydew melon ring with orange sherbet and garnish with apricots halved and peeled, marinated in lemon juice and cantaloupe balls.

Lawn Chair Like Mother's and Dad's Is Sure to Delight the Little Children

By Ruth Wyeth Spears

HERE is a pint-size lawn chair to delight the children and their young visitors. The seat is 10 1/2 inches high, 13 inches deep and 15 inches wide—a good size for little ones now and roomy enough to be comfortable right up through their early teens.

A hammer and saw and screw-driver are all the tools you need to make this chair as well as the larger edition that you see in the sketch. All the pieces are straight cuts of standard widths, yet both of them have seats and backs at comfortable angles. The lines and proportions are good and the backs are removable for winter storage.

Counsel Had Gone to Great Length to Make It Clear

The scene was in a courtroom. Counsel looked sternly at the man on the stand and demanded:

"Did you, or did you not, on the date in question, or at any time previously or subsequently, say, or even intimate to the defendant or anyone else, whether friend or mere acquaintance, or, in fact, a stranger, that the statement imputed to you, whether just or unjust, and denied by the plaintiff, was a matter of no moment or otherwise? Answer me! Did you or did you not?"

The man in the dock clutched at his throat.

"Did I, or did I not, what?" he gasped.

NOTE—Pattern 253 gives a complete list of materials, large diagrams for cutting all the pieces of the child's chair and step-by-step directions for assembling. Pattern 259 lists materials with diagrams and directions for the adult-size chair. Patterns are 15 cents each postpaid, or both patterns for 25 cents. Order from:

Get It Over With
Sentry—Who goes there?
Major—Major Jones.
Sentry—I can't let you proceed without the password, sir.
Major—Drat it, man, I've forgotten it. You know me well enough.
Sentry—Must have the password.
Voice from guardhouse—Don't stand there arguing all night; shoot 'im.

That Proves It
Bobby—Daddy, will you buy me a pair of roller skates if I can prove that a dog has ten tails?
Father—Well, yes, I think I can promise that.
Bobby—Well, one dog has one more tail than no dog, hasn't he?
Father—Yes, that's right.
Bobby—Well, if no dog has nine tails, and one dog has one more tail than no dog, then one dog must have ten tails.

Indicator
Clarkson—That man must live in a very small apartment.
Harkson—What makes you think so?
Clarkson—Well, can't you see how his dog wags its tail up and down instead of sideways?

"I've been jeered," cried the pedestrian as the army car hit him.

AROUND THE HOUSE

A tablespoonful of turpentine boiled with your white clothes will greatly aid the whitening process.

A dry cloth is better for removing a pan or dish from the stove or oven than a damp or wet one.

To repair a break in an extension cord, strip the insulation from the wires for a few inches on either side of the break, twist the ends of broken wires together, solder, tape with rubber splicing compound and wind with friction tape. Don't put two splices side by side when repairing broken wires. Offset them a little.

Waffles are grand for dessert when topped with cream cheese mixed with cherry or blueberry jam. Be generous with both the cheese and jam. No need for butter as the cheese is rich enough.

Braising, browning and cooking in a small amount of moisture with the lid on, is used for less tender meat cuts.

Milk which has changed may be sweetened or rendered fit for use again by stirring in a little soda.

Never pull awnings up or leave them up while wet. Rolled damp they will mildew or rot.

KEEP ON
WITH WAR BONDS

War Bonds as Investment for Farmers

by Warren W. Hawley, Jr., President
New York State Farm Bureau Federation

IN CHECKING figures of the Farm Credit Administration, I find that farmers are paying off mortgages faster than at any other period in the history of the Federal Land Bank.

At the same time, farmers are building up cash reserves, but the wise investment of this money is an extremely hard job for farmers to undertake. The temptation is to try and obtain as high an interest rate as possible.

Many of us see no reason why we should not get as much interest on our money now as we had to pay the bank when we were forced to borrow during the depression.

The answer is that today money is cheap—"expanded", as the bankers express it. Therefore interest rates are low except in very speculative securities. Naturally no farmer wants to risk losing his hard earned cash.

We farmers know our own business and we can invest money in it safely because we understand it. However, when we branch off

into other fields, especially the highly technical field of investments, most of us encounter sad experiences.

In these days it is virtually impossible for farmers to put their surplus cash back into the farm. War-time conditions prevent us from repairing buildings, and buying new machinery, automobiles, trucks and other equipment we must eventually have if we are going to stay in business.

So the smart thing for farmers to do is to invest their surplus money in War Bonds where it is as safe as a dollar bill. These bonds increase in value the longer they are held; they can be cashed after sixty days in case of need, and they will provide a reserve for investment after the war in the business the farmers know best—the business of farming.

I confidently predict that if farmers will do this, the dawn of peace will signalize a new day for agriculture.

U. S. Treasury Department

The Farmer and War Bonds

by Mr. A. S. Goss

Master of the National Grange

WE FREQUENTLY hear farmers raise the question as to whether or not they should buy War Bonds as long as they are in debt. The answer to this question should depend in large measure upon the nature of the debt and whether or not it is current. If part of it is past due, and the borrower expects to experience difficulty in meeting past due payments, he probably should bring his debt into current position before investing in Bonds. If, however, his payments are current, there seems to be no reason why farmers should not buy as many Bonds as they are able. Most individual investors in government Bonds are carrying debt in one form or another, at rates higher than the Bonds will yield. This is as it should be if the purchaser is in an earning position which permits the accumulation of some surplus, for we all owe it to our government to do our utmost in the financing of the war, even though the transaction may result in our paying some extra interest on outstanding debts.

When a farmer owes money, he is always concerned as to whether his crops will sell at prices which will enable him to repay his debt. When prices are high it is good business and conservative finance to reduce the debt as rapidly as possible because when prices are low, it takes more crops and more efforts to make the payments.

We should not forget, however, that a government Bond will pay off an equal amount of dollars of debt, no matter whether prices are high or whether prices are low. It is, therefore, a sound and conservative practice to buy government Bonds and lay them

aside to make payments on existing debts when they fall due. In fact, quite aside from the patriotic appeal, it is good business to buy Bonds rather than make pre-payments on debt, because the time may come when the ready cash is needed and the money tied up in pre-payments cannot be returned. If this money is invested in Bonds, it can be converted into cash to meet any needs which may arise.

If everyone followed the policy of buying no War Bonds until their debts were paid, few Bonds would be sold to the public. We have an obligation to help finance this war which is vastly more important than the income we may receive on the investment of money in War Bonds.

Farmers are finding it impossible to maintain their machinery and buildings in a satisfactory state of repair. They are finding that they cannot replace worn-out equipment except at exceedingly high cost.

It would seem to be sound and conservative business practice to lay aside money to make the repairs and replace worn-out equipment when material and machines are again available. No safer place can be found to lay aside money for such purposes than in government Bonds.

Every time we buy a Bond we are not only assisting in financing the war, but we are also doing our bit to prevent that most dreaded economic disaster called inflation. If each one of us would invest as much as we could in government Bonds, the danger of inflation would be greatly reduced.

In the Third Judicial District Court of the State of New Mexico Within and for Lincoln County.

No. 5122
J. E. Johns and Ruth W. Johns, Plaintiffs,

vs.
W. H. Wilhem, et al, Impleaded with the following named defendants, against whom substituted service is hereby sought to be obtained, to-wit: The following named persons, by name if living, if deceased, their unknown heirs; W. H. Wilhem, J. H. Wilhem, Martha M. Wilhem, W. G. (W. I.) Kingsberry, David L. (D. L.) Brainard, J. M. Banister; unknown heirs of Henry P. Kingsbury, deceased, and all unknown claimants of interests in the premises adverse to the estate of the plaintiffs, Defendants.

Notice of Pendency of Suit

The State of New Mexico:
To each of the above named defendants against whom substituted service is hereby sought to be obtained, Greeting;

You and each of you are hereby notified that the above named plaintiffs have filed their complaint against you in the above numbered and entitled case and court.

The general object of said suit is to quiet plaintiff's title to the real estate described in the complaint, situate in Lincoln County, New Mexico, and being in:

Section 7, Township 9 South, Range 14 East, N. M. P. M., against the adverse claims of you and each of you, and anyone claiming by, under or through you, and to forever bar and estop you from having or claiming any lien upon, or right or title to said real estate.

Unless you enter your appearance in said cause on or before September 16, 1944, judgment will be rendered in said cause against you and each of you by default.

Plaintiff's attorney is John E. Hall, Carrizozo, New Mexico.

Given under my hand and the seal of the Third Judicial District Court of the State of New Mexico this August 2nd, 1944.

(D. C. Seal) (Sgd.) Felix Ramey, District Court Clerk.

Notice of Hearing of Final Report and Account

No. 867
In the Probate Court of Lincoln County State of New Mexico.

In the Matter of the Estate of George W. Grove, Deceased.

To Myrtle Grove Imhoff, daughter; Elsie B. Grove, son; Louisa Grove Garland, daughter; Mable Grove Colbaugh, daughter; Grace Grove Easley, daughter; Elva Boykin Kendall, Wanna Boykin Roberts, Olga Boykin Jennings, grand-children, and to all unknown heirs of the said decedent, and all unknown persons claiming any lien upon, or right, title, or interest in or to, the estate of the said decedent, and to whom it may concern:

You, and each of you are hereby notified, and notice is hereby given, that Myrtle Grove Imhoff, administratrix of Estate of George W. Grove, deceased, has filed in the above entitled Court her final report and account as such administratrix, and at the hour on the day named, the Probate Court will proceed to determine the heirship of said decedent, the ownership of his said estate and the interest of each respective claimant thereto and therein and the persons entitled to the distribution thereof.

The name and post office address of the attorney for the administratrix is John E. Hall, Carrizozo, New Mexico. Witness the honorable Pauline Aldaz, Judge of the said Court, and the seal thereof, this 18th day of August, 1944.

(Seal) Clerk. By Margaret Stinnett, Deputy.

Local Interest--National Scope

MUCH of the merit of our American system of free, chartered banking lies in the fact that each bank has deep local roots, yet has nation-wide effectiveness. This means better community service, deeper interest in the individual, genuine helpfulness based on intimate knowledge of local problems. It is the best banking system for the nation, and for you.

CHURCHES

Methodist Church
Church School 10.
Preaching Service 11.
Youth Fellowship 6:30.
We are here to serve. Will you
do your part?
You are welcome; come and
worship. John Loudin, Minister.

CHURCH OF CHRIST
Sunday services:
Bible school, 10 a. m.
Worship, 11 a. m. and 7:30 p. m.
Midweek Bible study, Wednesday
7:30 p. m.
Preaching at Capitan each Sunday
at 3 p. m., in own church
building.
Preaching at Nogal 7:30 p. m.
You are welcome to all of our
services.

Santa Rita Church
Sunday Masses: 6:45 a. m., second
Mass 8 a. m., Ruidoso Mass every
Sunday at 11 a. m.
Rev. Salvatore Goyanni,
Pastor.

First Baptist Church
G. H. Benson, Pastor
9:45 S. S., classes for all.
11 A. M., morning worship.
7 P. M., church training service,
classes for all.
8 P. M., evening worship.
7 P. M., Wednesday, prayer
service. Come.

Change of Location
Assembly of God Church
moved to location block east of
court house.
Services Tuesday and Friday
evening 8:30.
Sunday Services: Sunday
School 10:30 and Preaching 11 a.
m.
Evening Services at 8:30.
Come out and hear the Old
Fashioned Gospel Message.
John A. Deweber, Pastor.

NOTICE OF REVIVER
State of New Mexico
To: Vellie Casey, Arthur Casey,
Jack Casey, R. A. Casey and
Doyle Casey, heirs of John S.
Casey, deceased; Tatum Moore,
Willie E. Moore, and Albert R.
Moore, heirs of Ellen E. Moore,
deceased, GREETING:
You and each of you are hereby
notified to be and appear before
the District Court within
and for Lincoln County, New
Mexico in a certain proceeding
entitled Lillie C. Klanner, plaintiff,
vs. R. F. Casey, et al., defendants,
No. 3723, on or before
September 12, 1944, and show
cause why the said above entitled
action should not be revived
against you and each of you as
the surviving heirs of the original
defendants, John S. Casey
and Ellen E. Moore, both of
whom are now deceased.
WITNESS my hand and the
seal of said court this 15th day
of August, 1944.

Felix Ramey,
Aug. 18, 25 Sept. 1, 8 Clerk.

What makes a train run?

When a train such as the *Cascade*, *Overland Limited*, *Golden State Limited* or *Sunset Limited* thunders by, all you're conscious of is the thrill of a thousand tons of steel going places. You may catch a brief, friendly wave from the engineer, but he's about the only man you see.

The purpose of this advertisement is to take you behind the scenes and show you how many men and women are necessary to make a train run. The locomotives, cars and tracks are only the tools with which these people work.

2 Track Workers "manicure" every foot of Southern Pacific's 16,000 miles of line. Carpenters and Bridge and Building Men maintain the countless bridges, tunnels and trestles.

3 Signalmen, Electricians and Linemen regularly inspect and repair the thousands of miles of wire, and all the signals, motors and apparatus it takes to run trains safely and on time.

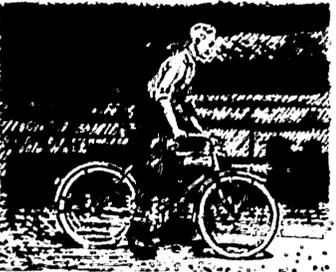

5 Lubricators, Greasemen, Boiler Inspectors and their helpers give locomotives a thorough going over at the end of every run, put them in tip-top shape.

6 Machinists, Blacksmiths, Boilermakers, Carmen, Sheet Metal Workers and other craftsmen repair war-worn equipment for the busy Main Line.

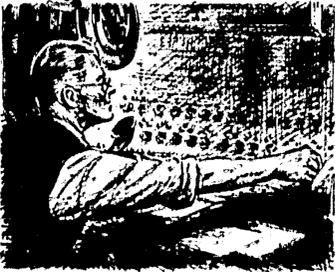

8 Car Cleaners, Car Inspectors, Air Brake Inspectors and Electrical Inspectors are among the thousands of workers who help to make the railroad run.

9 Last but not least, the Call Boy—smallest cog in the railroad machine. He wakes up the train crew and makes sure they report for duty on time.

1 Besides the Engineer and Fireman, a long distance train usually carries Railroad and Pullman Conductors, Brakemen, Porters, Steward, Cooks, Waiters, Baggage men, Mail Clerk, Express Messenger. For example, our streamlined *Daylight* (San Francisco-Los Angeles), requires 62 people.

4 Dispatchers control the movements of trains, sometimes automatically by "Centralized Traffic Control" (see above). Telegraphers receive train orders and report train movements.

7 Commissary Workers make sure that only the finest food is prepared in S.P. diners. Last year Southern Pacific served more military meals than any other two railroads combined!

S.P.

The friendly
Southern Pacific

NEW! "BACTERIOSTATIC" FEMININE HYGIENE

now finding great favor among women...

Many doctors urge the regular use of douches for women who want to be refreshingly clean — for women troubled by offending odor, itching or discharge. Some products may be harmful germicides which burn, harden and damage sensitive tissues. But NOT Lydia E. Pinkham's Sanative Wash! Instead—Pinkham's Sanative Wash is an effective "bacteriostatic" (a new modern trend). It not only discourages growth of the more vulnerable bacteria but cleanses, deodorizes, relieves minor irritations and discharge. Despite its great strength—Pinkham's Sanative Wash has a beneficial effect on delicate membranes. Inexpensive!

Lydia E. Pinkham's
SANATIVE WASH

ON CHANGING HORSES

"There are now 26 Republican wartime Governors. In these states the people did not change horses, they changed vehicles. For times like these and in a stream like this, transportation by horse is not good enough. The American people have common sense. They have been around. When they want to get ashore quickly, trust them to get off the horse and take a speed-boat."—Gov. Dwight Griswold.

forgetting twelve years ago when the President was all for ousting members of the Supreme Court because they were old men, a state in life to which he himself is now engulfed. He was for youth and vigor at the time but then he was twelve years younger.—Davis (Calif.) Enterprise.

MAKE IT SIMPLE!

An Ohio farmer's wife wrote the OPA asking for the price of turkeys, received in reply 30,000 words of printed matter, then in desperation wrote her Congressman, "I still do not know the price of turkeys. It would take a Philadelphia lawyer to cipher it out. Isn't there something that can be done to make them answer a simple question simply?"

NEWS BEHIND THE NEWS

By PAUL MALLON

IS ANOTHER WPA ON THE WAY?

WASHINGTON. — The administration seems preparing, with resumption of the congressional session, to promote legislation for what could be another WPA.

The CIO-Kilgore bill, backed by left-wing new dealers, proposes unemployment compensation for war workers up to \$35 a week, in effect establishing this amount as a minimum wage since no one would care to work for less.

A hue and cry is being spread that there may be 13,000,000 unemployed, and under the pressure of that fabulous supposition, the movement is being generated for the utmost funds, to be handled by the federal government — in time for election usage, if the peace comes as soon as Mr. Churchill has predicted.

Mr. Roosevelt's running mate, Senator Truman, engineered the bill out of the military affairs committee, no doubt under order.

This may be at least one fresh factor behind Governor Dewey's recent concentration of attack upon the centralization of authority in the federal government, certainly no amount of money could be raised to match the \$30,000,000,000 campaign influence of such an industrial unemployment compensation measure, plus the soldier benefits up to \$25 already passed.

Also, its provision opened legal possibilities for such things as a new NHA ordering businesses to work, refusing to give materials to businesses which do not cooperate, etc.

The form of the legislation in what will count if it is to be taken out of politics, congress will have to adopt some modification of the federalized controls as well as modify the rates.

Democratic Senator George has a bill which would set up a state method of payment in accordance with the existing social security scheme, now covering 30,000,000 people. The federal government would guarantee the solvency of state funds although state directors contend they have a sufficient sum of four to five billions to meet the shock of postwar employment now credited to them.

Byrnes Has Plan.

A third course has been offered by economic stabilizer James F. Byrnes, somewhat like the Kilgore bill, unifying standards under federal management and reimbursing the states. While this was presumed to be the official administration idea, it appears now that Truman, not Byrnes, is acting for the White House even though the bill violates several recommendations of the President's special advisor on this subject, Mr. Baruch.

The reason the CIO course will probably lose in the end is that all states, Democratic and Republican, are resentful of the inroads that have been made on their sovereignty and fearful of what this would do to business. Most Republicans probably will join in behind the George measure along with the southern states-rights Democrats.

As Republican Senator Vandenberg has said, the Kilgore rates would not only give the industrial workers, who have been making highest war salaries, a greater benefit than the soldier, but would be more than a normal wage for many ordinary non-war workers. In the South, he thinks, no one would work for a time.

As far as northern industrial states are concerned, some now pay over \$20 a week in benefits. Consequently, there will be a tendency to delay action on the measure in the belief that the states can care for the situation.

Are we not today being just as short-sighted in our thinking on defense and our preparations for our future security, as were the French, the ancient Chinese, and, in fact, all defense of every nation in the history of the world.

What is security, if it is not walls, navies, planes, armies? What can make a people secure?

Only their own ingenuity, in my opinion. Only in the mind of man can he find the stones for impregnable fortifications. Only by constant alertness and wise leadership can he provide for his safety.

Wisdom, in my opinion, is more important today than navies, planes and armies, because what good are these if they are not put to use.

The robot bomb has now been doubled in size. Nazi-bred rumors predict one eventually which will cross the ocean and descend on New York. The Sunday supplement dreams of warfare are supposed to have come true.

By these and other new implements, many of which we ourselves have alertly developed through necessity, the people have come to realize that weapons of the future will spread greater destruction. Single implements will increasingly kill more and more thousands.

WEEKLY NEWS ANALYSIS

Yanks Set Pace in Paris Drive; New Pacific Blows Loom as U. S. Bombers Strike at Philippines

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

Pacific—Top picture shows U. S. 5th air force bomber at right struck by Jap anti-aircraft fire above Kokas, Dutch New Guinea, while bottom photo depicts its crash into the sea while accompanying plane flies back home alone.

EUROPE: Fronts Afire

The whole French battlefield quivered to the clasp and clatter of gunfire as U. S. and British forces pressed their twin offensives against the German lines, with American troops reported approximately 50 miles from Paris.

While mechanized columns speeded the U. S. advance upon the former French capital from the west, British and Canadian forces were making slower progress to the north below Caen, where strong enemy armored formations backed away to contain the onslaught while still other large concentrations defended their exposed flank.

As the Allied drive on Paris rolled on through good tank country, U. S. forces in Brittany threw in all the weight of their superior gun and tank fire to reduce the coastal ports of Brest, Lorient and St. Nazaire, which would open up important supply lines from the Atlantic ocean.

With every man, woman and child in East Prussia mustered for civilian war service, and Russian forces

Tough German paratroopers, who faced the American onslaught at St. Lo, developed a deep respect for U. S. fighting qualities.

According to one of their reports, which fell into American hands, they declared: "Enemy artillery is distinguished by the accuracy of its fire and maneuverability. Employment in depth, changes of positions, self-propelled guns—during infantry attacks close to the front lines—is the doctrine followed. A great number of observation planes makes it possible . . . to fire effectively even on small targets."

Speaking of U. S. fire and phosphorus bombs and high explosive ammunition, the report revealed: "They cause stomach trouble and headaches. . . ."

lurching on the threshold of their "holy soil," Nazi armies fought bitterly to hold off the Red forces advancing on that Baltic province of Germany.

Farther to the south, the Nazis countered Russian advances upon the former Polish capital of Warsaw with equal stubbornness, with the Reds seeking to relieve the stalemate by switching their attack from the front of the city to the northeast in an encirclement attempt.

On the southern end of the long eastern battlefield, the Russians pushed within 75 miles of the German industrial province of Silesia, while other Red forces moved within 27 miles of the Czecho-Slovak border in the towering Carpathian mountains, where the rugged terrain was suitable to Nazi defense.

As U. S. and British troops poised for their assault on the enemy's "Gothic Line" in the hills north of the Arno river in Italy, Polish and Italian units harassed the Germans on the eastern or Adriatic end of the battlefield.

With the Allies girding for an all-out drive on the latest enemy mountain fortifications, their problems of supply over earthy, choky roads in the rugged country were relieved by the restoration of the seaports of Livorno, Civitavecchia and Piombino.

PACIFIC: Battle Plans

"It's good to see you, Doug," said the President upon greeting General MacArthur at Pearl Harbor, and on that note did the nation's chief executive open a three-day war conference with Pacific military and naval leaders on the development of new offensives for the unconditional surrender of the Japanese.

Heralding things to come in the Pacific theater, American Liberators raided the Philippines for the first time in 27 months, striking at airfields on Mindanao Island, while giant B-29s flew over Japan itself to rain fire-bombs on the shipbuilding center of Nagasaki, and attacked oil refineries at Palembang in the East Indies.

Completely restored after the attack of December 7, 1941, Pearl Harbor was bristling with acres of planes, tanks and other battle equipment as Mr. Roosevelt inspected installations during the conferences. As a result of these developments, the President said, Hawaii was no longer an outpost of U. S. defense, but "one of our rear areas."

WEATHER: Rain Needed

As another heat wave struck parts of the Middle West, drought conditions were intensified east of the Mississippi river, with crop growth faltering in many sections.

According to the weather bureau, Kentucky may harvest only 50 per cent of a corn crop, while condition of the grain was spotty in Illinois, Michigan, Indiana and Ohio, due to heat and moisture deficiency. In southern Illinois, soybean growth was poor to good, while extensive failures of potatoes, pastures and gardens were reported in Ohio.

West of the Mississippi, however, corn prospects were excellent, with promise of a banner crop in Iowa where the drought was broken in the south, and a record harvest in Nebraska, with one more good rain.

OIL: Allied Accord

The withholding of raw materials from prospective aggressor countries to contribute to postwar peace loomed as a result of an oil pact signed between the U. S. and Great Britain, which conditioned future distribution of the product on supervision of an international organization to maintain world security.

Calling for availability of oil to all peaceable countries at fair prices and the orderly development of re-

U. S.-British oil conference included (left to right) Interior Secretary Ickes, Under Secretary of State Stettinius, and Lord Beaverbrook.

sources without competitive wastes, the pact envisions the future organization of an international oil commission to advise governments on how they should produce and sell the product.

Other provisions of the pact seek to assure the recognition of the principle of equal opportunity in obtaining concessions.

RATIONING: New Values

In an effort to control consumption, OPA removed utility grades of beef and lamb from rationing, restored pork loins, hams and canned fish, to the lists, and increased the point values of cheese.

OPA's removal of utility grades of beef from rationing was prompted by the large movement of such classes of cattle to market, while the elimination of points on lamb was intended to spur the consumption of such meat.

Restoration of pork loins and ham to rationing, on the other hand, resulted, from a seasonal decline in hog marketing. Canned fish was put back on the lists because of short supplies throughout the country.

Increases in point values of such cheeses as cheddar, colby, cream, neufchatel, creamed cottage, Swiss, Italian, Munster and Limburger were necessary to slow down their movement into consumer channels.

WAR PRODUCTION: Big Speedup

Army officials continued to stress the need for an increase in the production of tanks, trucks, big guns and ammunition in view of greater demands from the flaming battlefronts.

Latest army bigwig to call for more production was Maj. Gen. Lucius D. Clay, director of material for the army service forces, who declared that schedules for the last half of 1944 called for a 77 per cent boost in output of aircraft bombs over the first six months.

Production programs for heavy artillery ammunition will be up 110 per cent; heavy artillery weapons, 23 per cent; light-heavy and heavy-weight trucks, 40 per cent; heavy-heavyweight trucks, 123 per cent, and tanks, 50 per cent.

New Oddities

Birth of quadruplets to the second wife of a 75-year-old artisan of Amalfi, Colombia, brought the number of his children to 47. He had 30 by his first wife and now has had 17 by the second.

Mary Phillips

Craving excitement, 19-year-old Mary Phillips of Trimsaran, Wales, stowed away on a landing barge which took her to the bustling Normandy beachhead.

After spending two weeks on the beachhead amid the rattle and roar of guns and bombs, Miss Phillips returned to Britain, none the worse for wear.

When Sheriff Claude Sullivan of Murphy, Idaho, decided to close his store after suffering injuries in an automobile accident, the town which serves as seat of Owyhee county has left with only a billiard parlor as a place of business.

POSTWAR RELIEF: Hot Issue

While the nation's production hummed at top peak in the fevered war effort, senators wrangled over measures designed to afford relief to millions of workers who may be left unemployed in a postwar economic relapse.

Joined by southern Democrats, the Republican minority waged a successful fight against the Kilgore-Murray bill's delegation of authority to a federal work administrator, who could deny the unemployed compensation if they refused to accept positions offered them, which might involve moving their families to other regions in some cases.

While the administration forces gave way before the onslaught on this provision, they put up a stiffer fight for the payment of unemployment compensation ranging up to \$35 a week, while the opposing coalition stuck by the George bill, which would leave these disbursements up to the individual states, where they run from \$15 to \$22 a week. The George bill also would place all federal shipyard, arsenal and other workers under state unemployment compensation systems.

TIRE OUTPUT: More Sought

In seeking to speed up the manufacture of heavy tires to keep essential military and civilian transportation rolling, the War Production board revealed that it would strive to have CIO workers shift from passenger to truck tire production, and also persuade them to go over their own self-imposed quotas of output.

In attempting to arrange for a shift of workers from one department to another, the WPB sought to assure their seniority privileges to protect them against later layoffs, while the WPB proposed proportional pay boosts for increased output to counteract the employees' alleged policy of limiting their work to avoid rate cuts for more production.

LAND SALES

Sales of farm land acquired by the government should be limited to those who need it for a home and living, with first preference for former owners, and second for war veterans, Secretary of Agriculture Claude Wickard told the house.

Surplus land, he said, should be sold on the basis of its long-time earning capacity and not at current inflated prices. Some 6,500,000 acres have been acquired by the government, only 3,500,000 acres of which is considered suitable for farming.

Washington Digest

Capital Answers Urgent Appeal for Farm Help

Political Bigwigs, War Workers, Service Folk, Pitch In to Aid in Production of Orchard and Field Crops.

By BAUKHAGE
News Analyst and Commentator.

WNU Service, Union Trust Building
Washington, D. C.

Washington, the town of bureaucrats, of desk-soldiers and sailors, the place that tells you what to do and "don't do nothin'" itself but "jes' keeps rollin' along."

I know that's what you say about us. But when it comes to volunteering for the emergency farm labor program—how about your national capital?

Believe me, Washington is in there pitching.

I use the figure of speech advised by for the man who rallied a corps of volunteer farm help which will probably amount to fifteen thousand citizens of the District of Columbia by the time the peach and apple harvest is at its height, is an old ball-player. Not so old at that for Johnny Jones, formerly of the Philadelphia Athletics, farm boy from Coatsville, Pa., and now of the department of agriculture extension service, is practically fresh off the diamond. He quit baseball in 1936 and is now back as near to the calling of his fathers as he could get.

Jones' job is dealing with the farm-help shortage and I interrupted him while he was in batting for a

Woman marine digs postholes.

missing mimeographer because of his own private manpower shortage. He had just rolled off several thousand forms inviting government officials, war-workers, simple citizens and others in the District, to attend his vacation camps which are already rapidly filling.

We aren't allowed to tell names of the higher-ups who volunteer but Jones has helpers who give their Sundays, or longer periods, from the White House staff, the offices of cabinet members, senators and congressmen. If it weren't an election year he thinks he'd have quite a showing of the senators themselves.

But what he takes most pride in is the service folk. This includes the girls, the WACS and the WAVES, and the Marines and the SPARS, as well as the sailors and soldiers on duty here or convalescing.

Tells It to Marines With Good Results

The other day a tobacco farmer over the district line in Virginia (Jones' territory doesn't run more than 125 miles from the White House) wanted to clear an acre of thick timber needed for firewood—it takes a lot of smoke to cure the tobacco for your smokes. He couldn't hire help locally. Jones "told it to the Marines" (female) and some 50 answered with action. They cut the timber (trees of about 28 inches), sawed it into eight-foot lengths, piled it up.

And soldiers and sailors seem glad to take a week's furlough to go out and pitch hay; get in the wheat and tobacco crops, or turn a hand to any other little chore. They say they consider it a great relief from loafing around a hospital or guarding government buildings or doing any other of the strictly military jobs they have.

Even among the groups of girls, Jones says you'll find enough who can run a tractor or hitch and drive a team of horses. One group cleared five and a half acres, cut the trees, sawed them up, burned the brush. And there is no shortage of civil-

ian help either. As elsewhere there are the boys' and girls' camps which run all summer; there are other vacation camps where grown-ups pay a week, get a dollar and a half day expenses, and earn 35 cents an hour, or at peach-picking as much or more than \$3.50 a day at 10 cent a basket, if they are handy. Some earn \$10 a day at that rate but they are old hands.

Postwar German Underground Seen

There is nothing new to Europeans about an "underground movement" which might be defined as a group of persons, united by an idea, which persists as an opposition to a particular government with the purpose of eventually overthrowing that government.

With the defeat of Germany it can be taken for granted that two German movements will begin to burrow; perhaps retiring to "previously prepared positions" in the language of the communiques of a retreating army. They are the Junkers and the Nazis.

At the present writing, for the first time in history, military control of Germany has been wrested from the hands of the junker-generals. They did their best to act on their ancient adage: "We as a caste, must always live to fight another day." A lost war to them is an incident and considered merely a temporary set-back on the road to eventual world-domination. To that end they planned a peace before their ranks were too greatly weakened or their resources exhausted.

But the Nazis stepped in, wrecked their plans. As a caste they will probably be completely destroyed, their estates and therefore their means of livelihood removed. What many people do not know is that the German high command had their own private funds, voted by the government, which they managed themselves for the benefit of the army.

Whether the Nazis have obtained this, remains to be seen. But in any case, you may be sure the burning patriotism of those junkers who survive will keep an underground organization alive.

And then comes the Nazis, with a younger but equally fanatical loyalty to national socialism. Their underground organizations we know are already prepared.

Meanwhile there is a strong suspicion on the part of many persons in Washington that a third breeding place for totalitarian militarism is being cultivated right here in the Western hemisphere.

In the past weeks I have received several letters and one telephone call protesting against the action of the state department in breaking relations with Argentina. So far as I could tell the persons who communicated with me were perfectly honest. They all stressed the known fact that the chief characteristic of the Argentine attitude is traditionally "pro-Argentine" nationalists. The inference was that the government was not anti-North American or pro-Nazi-fascist, and should be let alone.

As a matter of fact, aside from Argentine's own aims there seems to be evidence that the German Nazis and perhaps some of the German Junkers are transferring their wealth to Argentina.

There is not the slightest doubt that the Buenos Aires government has aided and abetted in the spread of Nazi-fascist propaganda and is that, at this very moment looking sympathetically on the activities of Nazi agents within its borders. The army has long been indoctrinated with Prussian militarism through its officers who have been trained in Germany.

Unless the United States takes the lead in applying sanctions in the form of a strict embargo on Argentina, we may find ourselves with a full-fledged war of aggression on our hands right here in our own hemisphere.

In the case of Argentina we may be witnessing not only the growth of a powerful military dictatorship but one which will be used to nourish and sustain the very forces which we have spent our blood and wealth to suppress in Europe—an "overground" underground.

BRIEFS . . . by Baukhage

A German soldier captured in France had written the following in his notebook: "Blessed are those who retreat for they will see their homeland again."

Production of 12,762 electric ranges in the third quarter of 1944 has been authorized to three manufacturers without interfering with war work.

A new simple method for detecting low leaks in tires of automotive vehicles so as to minimize the possibility of "flats" along the highway is outlined in detail in a pamphlet just issued by Office of Defense Transportation.

German dentists have been ordered to restrict their care of patients "to urgent measures."

HIGHLIGHTS . . . in the week's news

CANNED FRUIT PRICES: Government support prices on canned peaches, pears, apricots, fruit cocktail and fruit mix packed in 1944 will be set at 66.4 per cent of the area average ceiling prices for the industry, or 66.4 per cent of the canners' gross civilian ceiling prices, whichever is lower, according to an announcement of the War Food Administration.

APPLES: An average crop of apples is predicted for the year by members of the International Apple Association. About 123 million bushels will be harvested, according to the association. Of these, 10 million bushels will go to the armed forces, and 36 million will be sent out as lend-lease food. Maximum prices have been set for the 1944 crop.

QUEENS DIE PROUDLY

W.N.U. FEATURES

THE STORY THUS FAR: Lieut. Col. Frank Kurtz, pilot of a Flying Fortress, tells of that fatal day when the Japs struck in the Philippines. Eight of his men were killed while seeking for shelter, and Old 99, with many other Fortresses, was demolished on the ground. After escaping to Australia, what is left of the squadron flies to Java, where they go on many missions over the Philippines and Macassar Strait. Sgt. Boone, gunner, tells how Queens die, from eye witness experience. Java sea is now full of helpless Dutch towns and a Jap bomb blows up the kitchen. Another bomb scores a direct hit on the fliers' supply of beer.

CHAPTER XVI

"The Dutch made us steel traps for them in a machine shop, but we had a hell of a time getting anyone to dig the holes. We were flying missions and couldn't do it ourselves. So Silva and I took the truck and went into Maduin. On the street corners we saw a bunch of natives standing around picking their teeth or scratching their bottoms. We argued they must be Jap sympathizers, or else they would have been busy helping win the war. So we pulled out our .45's, and by a coincidence they all got into that truck, and dug us some of the nicest foxholes you ever saw. After that, when the alarm would go off we could run to those foxholes and swing a gun—we knocked down five Zeros with them in the short time we were there.

"We were fixing up our planes, too. Our tail guns had finally cured the Japs of making attacks from behind. Now they were coming in at all directions, hunting for our soft spots, feeling us out like we were some dame on a sofa, but mostly they were hitting us head-on, because they discovered that in the nose we had only a single little .30-caliber. I guess the designers, after putting in those tail guns, had figured they could rest on their laurels, but you can never do that long in a war.

"So we got busy there on Maduin Field. We mounted a big .50-caliber down in the navigator's compartment, rigging it so it would fire out of the ventilator. And for good measure we stuck in another .30-caliber.

"Since then they're carrying out this idea at the factory, but the only way any factory can learn what is needed is from the combat crews themselves.

"But about the time we got those new guns rigged in the nose, the Japs started staying away from us. We'd be flying along pretty as you please when a flock of Zeros would come into view, but staying well out of range—just looking us over. Then one of our gunners might fire a burst in their direction, just to let them know we were on the balls. Or sometimes the Zeros might come in for one or two wide, sweeping passes. But mostly they'd go off with their tails between their legs. Toward the last they only tried to get us on the ground. They knew we had no protection there to speak of—no fighters in insolent as could be."

(Meaning the gunners were in the ball, sure to be ready to fire.)

"That was the week I got into something way over my head in this liaison work," said Frank, "but first you ought to look at that big de luxe hotel which was the unofficial capital of Java. Its lobby, bar, and dining room were crowded with uniforms—British, Dutch, and American. It looked like a Hollywood costume parade.

"It was an enormous high-ceilinged spacious thing, open to the soft Javanese air—little tropical birds would fly in and out of the dining room and roost on the gleaming chandeliers.

"The Dutch are great eaters, and they have something they call restaurant. You order it and they sit back and eat while twenty-three waiters line up and walk by your table, each carrying a different sauce or fish or bowl of relish or rice. I tried it once and managed to live by eating only every other course, but your true colonial Dutchman will stoke in all twenty-three into his big pot, drenching the layers down with mugs of beer.

"In the bar you might see the boys of Patrol Wing 10 in from reconnaissance, drinking Daiquiris (this hotel was Navy billeting headquarters), and often I would see my old Hollywood High School classmate John Robertson sitting there in his off hours, very handsome in his Naval pilot's uniform, and with him was the most beautiful girl in Surabaya.

"She had dark hair, and an almost ghostly pale face that was sad in repose. Then a smile would quickly light it up, and you'd wonder how you could ever have thought that. And the most beautiful legs in the city. When she'd walk through the bar clinging to John's arm and looking up at him, even the oldest and crabbest admiral would rustle a little in his chair and lean out to give them a formal inspection. The younger Naval pilots envied John to the point where they would have hated his guts if they hadn't liked him so much.

"John was very busy and I don't think he gave her much thought,

but still it's nice to have the most beautiful girl in town crazy about you, to the point where it even bothers the admirals.

"She was, so they said, a very high Dutch socialite and had lots of money, which you might guess by how simple and expensive her evening dresses were. In the daytime she wore a beautifully tailored uniform of one of the woman's volunteer organizations. I think she drove a car for the Dutch General Staff.

"Meanwhile my job was growing by leaps and jumps. In that hotel dining room you might see General Wavell, the British Commander in Chief, or Admiral Hart, or General Brett, who commanded the United States Air Force, or Van Oeyen, the Dutch Commander in Chief. I was circulating among the tables, and my brief case was so crammed with hot information I wouldn't trust it in a checkroom.

"There was a feeling of tension. Refugees had been crowding in from Singapore and Sumatra. Now there was a feeling that maybe they'd be crowding out soon. Lots of the natives had already left, and those servants who remained you knew were staying only because they were very loyal. But to whom? Maybe to the Dutch. Or maybe to someone else

The same fist which held the flashlight also held a steel knife.

—staying around to watch us, relaying information we knew not how, or to whom. You couldn't be sure of anything.

"Except that I knew they were watching me, maybe only out of idle curiosity as I circulated from one table to the other, and kept that brief case leaning against my leg when I sat at my own table.

"That hotel certainly wasn't built to keep military secrets. The big high-ceilinged bedrooms had only swinging half-doors like barrooms—open to the air above and below. The barefooted native servants looked after them, only I'd catch them slipping in and out of mine at queer times of the day. But I thought I only imagined it. I also suspected they were listening in the corridor outside. One evening a couple of the pilots were down from Malang—going back the same night—sitting on my bed while we talked over new orders, and somehow a feeling grew on me we were being watched. I whispered to the others to go on talking, slipped off my shoes, tiptoed to the door. Just as I opened it I caught a glimpse of a white robe flitting around the corner. When I got out into the blacked-out corridor, I could see nothing. But then I was sure.

"That night I slept with my brief case under my pillow. In addition every bed was provided with a Dutch widow. At first the American pilots didn't know what to make of this and would kick them out on the floor. I should maybe explain that a Dutch widow is a long padded bolster, and if you sleep with it between your knees, it keeps your legs from pressing together and sweating in the tropical heat. After a while the pilots began to like them.

"But that night I went to sleep wondering about the white shape I'd seen flit around the corner. It seemed about the same size as the waiter who had been staring at me in the dining room for the past three days. Only staring isn't quite the word. Because this particular little chili-picker had glassy eyes like a turtle. I could never catch them directly on me, but I had the feeling it was I he was interested in.

"Two nights later Lieutenant Jacquet came up from Malang. By the time we had finished work it was so late I suggested he'd better spend the night with me. I put my brief case under my pillow as usual. On this particular night it contained something so important I don't even like to talk about it now. Maybe

that was why I slept uneasily. Or maybe because the whole outlook for the war was so bad. I realized in the Philippines I had only been lucky, and I might never get out of Java. It was very hot, and in the distance a thunderstorm was muttering as it moved toward the city.

"Anyway, I'd been lightly asleep for about an hour when a glare awoke me. It was a flashlight, held very close—a haze of yellow light coming through the mosquito netting over my face. But in this haze I could see that the same fist which held the flashlight also held a steel knife, and that its point stuck down into the yellow cone of that flashlight. The other hand was just touching the edge of my pillow.

"I gave a yell and dived through that netting like a cat, but the yellow light instantly winked out, and I was standing there alone in the darkness, while Jacquet rolled out on the other side. He hadn't been as nervous as I, and was sleeping more deeply. But just then a blue lightning flash lit up the room, and by its quick glare I saw the door into the corridor closing (I was sure I had locked it). But when I got out into the corridor it seemed empty.

"Why hadn't he stabbed me? I think because he was surprised to find Jacquet there. One of us would surely have been able to make an outcry. And I thought to myself, 'Well, stranger, for a newcomer you're sure getting into a lot of things, because you never thought some guy you didn't know and had never bothered would ever try to kill you through mosquito netting in a place called Java.' The brief case was okay."

"And the queer thing was," said Margo, "that just at this time the report got back to America that Frank was dead. He'd been killed in a flying accident in Java. I was down in Florida by then, and the only man I could really talk to was Cliff Jensen, an Air Corps boy we had known at March and Albuquerque, and later at Morrison Field.

"He was stationed near by, and now was working twenty-one hours a day for the rest of the gang who were fighting in Java. I could really talk to Cliff—we understood each other. The rumor that Frank was dead somehow reached Australia, and of course the Air Corps is a small place. In a few days Colonel Truedell in California heard it from one of the ferry pilots, and a few days later Cliff heard of it. He didn't tell me, because he wasn't quite sure, but some people thought it had really happened.

"I could feel the difference. They were looking at me queerly now. They would say what a fine boy Frank had been. Or that they were praying for his safe return. They never understand. They can't see that what you're anxious about is not the distant future, but this very night. Is he hungry? Must he go out on a mission? Maybe he's been badly hurt during the day, and you don't know it yet.

"Praying that everything will be all right during those weeks and months to come scares you—it's asking too much, you're afraid. You just pray he's all right tonight, and isn't wounded, and will get enough sleep, so he'll be strong and alert and have a good chance tomorrow. You don't dare ask more.

"Also those strong plump sunburned men who could leave their business for months to lie around on the Florida sands were very 'realistic' about the war—sure it was all a terrible mess and everything was going to pieces, offering me lots of sympathy. But what had any of them ever done to get us a decent Air Force in the past? Or what good were they or their 'realism' doing anyone now? I liked Cliff's better. He knew what the boys were up against and was up half the night trying to hurry reinforcements. Out of the little we had (and he knew how little), so they could hold what they could. Cliff made sense. The rest was a nightmare."

"When we'd first hit Java," said Frank, "we'd been full of the offensive spirit—sure we were going to roll the Japs back off the Philippines onto Formosa with those thousand planes which, according to rumor, were coming within three months. The second month was almost up now, Java was unsteady under our feet, and we'd so far received about two dozen P-40's, maybe a few more Forts than that, and seven dive bombers. Hardly fifty planes in all.

"Now we knew the offensive was out for the time being. What we prayed for was fighters—to defend what was left of our Forts and those beautifully camouflaged Dutch airfields. With fighters to hold them off, we knew we could hold Java.

"All right, suppose the Japs had moved into Timor and cut the jugular vein from Australia, so that our P-40's could no longer hop on the island chain to us on their belly tanks? Why not a carrier? Couldn't the Navy spare just one—which could load up with P-40's in Australia and then, when it was well several hundred miles from Java and out of range of the Jap bombers, it could turn the P-40's loose, let them fly on in to us, and go back for another load?"

Star Dust

By VIRGINIA VALE

Released by Western Newspaper Union.

JACKIE GLEASON is the first new comedian to hit the networks for the coming fall season; the August 13th debut of the Jackie Gleason and Les Tremayne show establishes him on the air waves. He's no stranger to the air, of course, after starring in "Hi Neighbor" and "Laughing at Murder," and movie fans know him from his 12 pictures, including "Springtime in the Rock-

JACKIE GLEASON

ies." Currently he's starring on the Broadway stage in "Follow the Girls"; when he finishes that stint he begins his new contract with 20th Century-Fox.

Gloria De Haven, one of the stars in the new Sinatra musical, "Step Lively," was singing for Galli Curci and Frances Alda when she was 12. They advised her to study for opera, but she took to modeling instead, then began her career in the movies. Played a showgirl in her first picture, will be a chorus girl in "Dr. Red Adams," a new Dr. Gillespie that will go into production soon.

John Hodak is on his way up, and going fast. "Lifeboat" gave him a boost, and "Marriage Is a Private Affair," with Lana Turner, gave him another. So now he's set to play the coveted male lead, opposite Greer Garson, in Metro's "Valley of Decision."

An orange isn't an orange when it's been autographed by Chico Marx, it's a collector's item. Starring on Milton Berle's "Let Yourself Go," Marx did his stunt of playing the piano with an orange; it's now being cherished by the fan who had him autograph it.

Sonja Henie's new picture for International is "It's a Pleasure"—but in preparation Miss Henie rehearses two hours a day, six days a week, with male and female ice ballets, works on her own skating specialties two hours more, then rehearses dance steps all afternoon!

Four Metro pictures on 16-mm. film are now playing the Normandy beachhead "circuit." They are "A Guy Named Joe," "Meet the People," "See Here, Private McGrover," and "Andy Hardy's Blonde Trouble"—and were being screened shortly after the battle smoke cleared.

Dinah Shore's off on a blind date—a date with the American fighting men overseas. She finished her chores in "Belle of the Yukon," International Pictures' new Technicolor musical show, made three months' supply of records, and sailed, to return to Hollywood in October.

An empire numbering 500,000,000 people, one-fourth of all the land and people in the world, is the subject of the March of Time's latest film, "British Imperialism—1944." It's the story of what war is doing to the empire, and of how the dominions feel about the mother country today.

Joe Julian and Paul Mann, regulars on the Norman Corwin CBS series, often alternate roles. Recently, when Corwin wanted the effect of a man running up and down stairs, Julian, who was playing the lead, had on rubber heels, so actually stepped into Mann's shoes, which he borrowed for the broadcast.

Pretty fancy, that accident Danny Kaye had. For a scene in "The Wonder Man," he and Vera-Ellen did an acrobatic dance routine, leaping through the top of a paper-covered native drum and alighting on a trampoline which would bounce them out of the drum. Kaye landed off balance, and was hurled to the stage, with one leg twisted beneath him. So now they're shooting around him till he's recovered.

ODDS AND ENDS—Diana Lynn, soon 18, plays a heavy romantic role in "Out of This World," and gets her first screen kiss from Eddie Bracken. . . . Mae Clark, star of silent films, is playing a come-back role with Paulette Goddard in "Kitty." . . . The new format of CBS's "The Doctor Fights" is permanent, giving Raymond Massey a chance to act. . . . Those are some of the husky males in "The Great John L." are wearing a women's garter—men's arm bands just aren't made any more. . . . After seeing Marie McDonald's work in advance scenes for "Guest in the House," William Goetz borrowed her for "It's a Pleasure."

SEWING CIRCLE NEEDLEWORK

Smart, Comfortable House Jacket Pretty Skirts for Dressing Table

chambray, organdy, rayon crepe, chintz, pastel cottons, are only a few of the materials you can use. And making the "skirt" is much easier than you think!

To obtain complete instructions for making the Dressing Table Skirts (Pattern No. 5757) a variety of decorator finishing tricks, send 10 cents in coin, your name, address and the pattern number.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers. Send your order to:

SEWING CIRCLE NEEDLEWORK
536 South Wells St. Chicago, Ill.

Enclose 10 cents (plus one cent to cover cost of mailing) for Pattern No. _____

Address _____

40 YEAR MEXSANA

GIVE that old, scuffed table a new coat of paint or a wallpaper and glass top and a frilly, feminine "skirt" and you'll have achieved a dressing table that looks like a million dollars! Dotted net, scrim, seersucker, flowered

Gems of Thought

IT IS thy duty oftentimes to do what thou wouldst not; thy duty, too, to leave undone what thou wouldst do.—Thomas a Kempis.

"It isn't life that matters; it's the courage you bring to it."—John Galsworthy.

Success, the mark no mortal wit, Or surest hand, can always hit! For whatso'er we perpetrate, We do but ours, we're sinned by fate, Which in Success oft disappears, For spurious causes, noblest merits.—BUTLER.

From the lowest depth there is a path to the loftiest height.—Corlyle.

That Bulldog Grip

The proverbial "bulldog grip" of the bulldog does not result from obtuseness or any other quality but from the construction of the animal's mouth. The lower jaw is longer than the upper jaw, and therefore it is physically impossible for the dog to let go while there is any tension on the object being gripped.

For HEAT that makes you HAPPY, get a WARM MORNING COAL HEATER

Amazing, Patented INTERIOR CONSTRUCTION

Other heaters may look like WARM MORNING; others may have similar sounding names...but only WARM MORNING has the amazing, patented, interior construction feature that has resulted in such remarkable heating satisfaction throughout the Nation! It's the only heater of its kind in the world.

GO TO YOUR DEALER—Ask him to show you the WARM MORNING...the coal heater that has been tried, tested and approved by hundreds of thousands throughout the Nation.

Farm and War News Roundup

by Carl P. Radcliff
County Extension Agent
The supervisors of the Upper Hondo Soil Conservation District are planning to sponsor a special educational meeting Saturday, September 9 at the Capitan High School. The purpose of the meeting is to give all land owners and operators an opportunity to learn more about the assistance that is available from the district, and to learn the details of how the Soil Conservation program functions. A free banquet will be served to all land owners and operators in the district, beginning at 8 p. m.

During the last six years 35 varieties of hybrid corn seed have been tested by 20 farmers and 4-H club members in Lincoln County. Seed for the test plots have been obtained from various seed companies, and the demonstrational plots were set up by the Extension Service for the purpose of comparing yields of various varieties of hybrid corn with the native varieties. The demonstrational plots have thoroughly proved that some varieties of hybrid corn is superior to the native corn. An increase of 15 per cent in yield over native varieties has been reported for some of the hybrids. As a result of the educational

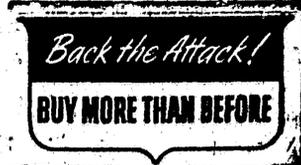

demonstrations, it is estimated that between 50 and 75 per cent of all corn grown in and county this year will be produced from hybrid seed.

Generally speaking, hens that stop laying in the summer are usually poor producers. A good layer should continue to produce until September or later. For this reason the latter part of August is a good time to do your fall culling of the entire flock.

It is likely that growers of sweet corn will have to combat the corn ear worm if they are to prevent damage from this worm. Inject $\frac{1}{2}$ teaspoonful of medicinal mineral oil into the base of the silk mass with an oil can or medicine dropper ($\frac{1}{2}$ average dropperful) as soon as the silks have become wilted, or about the fourth day following silk exposure.

Five to 10 pounds of finely ground sulphur, mixed with each 100 square feet of road dust and placed where chickens can roll in it and dust themselves, has proven effective for all three species of chicken lice. Feeding sulphur to chickens is only partially effective, while the dust bath method is better.

TIME FOR CHANGE

It isn't at all surprising nor is it unexpected that New Deal proponents should lose no time getting out the mud balls to hurl at Governor Dewey, or any other candidate that might have been put forth by the Republican Party. So much mud has been heaved at the G.O.P. in the past twelve years another plastering won't make much difference. The fact still remains, the definite swing away from the New Deal has the boys worried and it can be confidently expected this time that many a mud ball will contain a brick.

The biggest howl will undoubtedly come from those who feed, financially, at the public trough. To them it's like a dentist bearing down on an exposed nerve and their groans will be heart rending. They'll cuss Hoover, who isn't a candidate for anything, to high heaven for exercising the rights of any citizen to express his views, they'll belabor Dewey because "he isn't keeping faith with the people of New York" by not staying on the job, forgetting Roosevelt was a Governor and campaigned for the Vice Presidency years ago and then they'll even bring out the Boy Scout charge on Dewey.

Gall Bladder Sufferers Show CONSTIPATION

Fried Hot Water and Kraschea Before Breakfast Brings Wonderful Relief

In a glass of hot water put one teaspoonful of Kraschea Salts and drink about half an hour before breakfast. In 20 minutes later follow with your usual breakfast cup of hot coffee or tea. Usually within an hour you get prompt and effective relief and should begin to feel bright and refreshed again. Be sure to follow the simple easy directions.

Keep this up for 3 straight days—and learn why thousands have found Kraschea Salts so successful in relieving that old-fashioned "out-of-order" bronchial coughing. Get Kraschea Salts today at all drug stores.

Over 345 million bottles sold in the past 100 years—it must be good.

Card of Thanks

Our friends were wonderful in our hours of great sorrow. Our friends of White Oaks, Carrizozo and our many ranch friends did not neglect us one minute. They brought food, flowers, spent their time, their many kind words and thoughts of sympathy were of great comfort to us. May many rich blessings come to all. Leo, Oris and Mrs. W. L. Smith.
