PRICE \$2 THE YEAR

PERSONALS

Benton W. McGinness is ill this week but is improving.

Perfecto Sanchez of Arabela was here Saturday and made this office a friendly call while in town.

Mr. and Mrs. H. M. Kennedy of their ranch in the Jicarilla mountains were here on business yesterday and made this office a pleasant call.

A letter was received yesterday from Jeff Herron, who says Mrs. Herron is going to visit him soon in Philadelphia and New York City.

Mrs. Chloe Fisher, mother of our County Clerk S. E. Greison, is ill at her home in Capitan and was at one time threatened with pneumonia, but while her improvement is slow, it nevertheless offers encouragement to the family.

Mrs. J. M. Smith and R. W. (Tex) Moran were here from the Smith ranch north of town Tuesday. Tex is the all-around range rider, fence-rider, bronco buster and although young in years, he is a "go-getter" in ranch work.

Mesdames E. H. Ramey and George Sohn of Lincoln were Carrizozo visitors Tuesday, returning home in the afternoon. Mrs. Ramey is the mother of ex-county clerk and Mrs. Sohn's husband is a marine officer, now in the Pacific.

At the Lyric Theatre conditions are getting back to normal. Mr. Walker, who for a long time was incapable of making change at the ticket office, now handles the cash in the same manner as before. This enables Mrs. Walker to again operate the popcorn machine, all of which gives pleasure to patrons and managers alike. Mr. Walker's hands are improving nicely from the accident which he suffered nearly one year ago. Congratulations, folks.

Mr. and Mrs. Harry Miller returned Wednesday from an extended visit of seven weeks with relatives in different parts of the south. On their return trip, they were accompanied by Mrs. Miller's mother, Mrs. E. L. Ferperman, sisters, Mesdames E. D. Dixon and H. C. Cobb, all of Birmingham, Alabama, who will visit for a short while with Mr. and Mrs. Miller. During their absence, Manuel Chavez attended to Mr. Miller's business interests.

Comments

Lewis Burke

Quoting George Washington: This country is advised not to become involved in foreign affairs.

Not wishing Hitler any bad luck, but we hope he'll be blown to smithereens!

Quoting Will Robinson, editor of the Koswell Dispatch: Mrs. Grace Eaker and Mr. Henry Hoffman were elected recently at the school board election in Carrizozo without any fuss nor feathers.

Note—Mrs. Eaker was almost defeated, securing 110 votes out of the 112 votes cast.

Stalin has taken over Poland, Churchill takes Greece, while Roosevelt takes Montgomery Ward.

Wun Lung Gon said it—The wisest men can be led by a dancing girl.

A short wave radio message was received by a man in New York and also a lady in New Jersey from Lieut. Harry D. Edmiston this week saying: "I am OK; not wounded and in good health, so don't worry. Love"—Lt. Harry D. Edmiston

Andy Davine—I spent a considerable amount of time while Manhattan looking for Indiana.

Dick Powell—The Indians are extinct.

Andy—Your 'ingin' doesn't sound so hot to them, either.

Headline—Russian army only 34 miles from Berlin. Note: The Reds have been that close to the German capital for two or three weeks.

Ever note the change: Stalin, instead of being called "Bloody Joe" is now affectionately termed Marshal Joseph Stalin?

—Yes verily: Uncle Joe is on OUR Side!

Who said that? Politics makes queer bed-fellows?

Berchtesgaden, Hitler's retreat in the Bavarian mountains, has been blasted by United States planes this week.

Remnants of the Old Pendergast Machine Looking Hopefully to Truman to Help Regain Lost Power

(A. L. Burke)

It is no secret, says the Christian Science Monitor, that remnants of the Pendergast political machine are looking hopefully to Vice President Harry S. Truman for federal patronage to help them gain some measure of control of Missouri politics.

What is left of the old machine (and there is still plenty of it left under cover) places strong hopes of the influences he now has by virtue of the fact that his power might and perhaps will be used to pay back some of the many favors the machine has handed out to him in the past.

You might say, on what grounds is there any hope for the Vice President to extend such favors? In answer to that Truman owes everything he has had in the past, politically, to the Pendergast machine. It took him from a small haberdashery to the United States Senate, but the recent passing of the gangster has lessened the machine's grip on Truman from the fact that the leader was directly responsible for Truman's advancement to the Senate, but James Pendergast, Jr., is in charge of the machine now working under cover in Kansas City and still

has enough power to ask and receive strong political favors from the Vice President.

To prove that, let us review some of the doings and sayings of this man in the important position of Vice President, which would in the event of the passing of the President, make him President of the great United States. After the prosecutions of Tom Pendergast and when the machine seemed to be going to pieces, he said: "They are still my friends and I will not desert a sinking ship." At Tom Pendergast's funeral, he flew from Washington to Kansas City in a big B-29 at the expense of the taxpayers and was one of the chief mourners at the rites.

To again refer to the Christian Science Monitor, we quote: "From the standpoint of practical politics, it can be said that Mr. Truman in Kansas City and generally in the state of Missouri today, is indelibly associated with that element, which the housewives with their brooms, the businessmen and oppressed citizens have been fighting for the past five years." What a spectacle for the heir-apparent to the throne of the United States!

Baptist Church

We are beginning, next Sunday, Feb. 25th, a Sunday school Enlargement Campaign. We will have classes for the adults and intermediates each evening for five evenings, beginning at seven o'clock. Rev. Wayne Evans, Baptist church of Claunch will teach the Adults, the book, "The Improvement of Teaching in the Sunday School" at the same time the pastor will teach the Intermediates "Training in Christian Service." The Juniors will meet each afternoon 4:15 and will study "This is my Story" under the leadership of Mrs. Oldham.

Between now and the first of March, we will take a religious Census of the town and community.

We have organized the G.A.'s (Junior Girls) R. As (Junior Boys) and Sun Beams. These groups meet each Thursday 4:15 p. m. Mrs. I. E. Keisley is leading them in the music and is organizing them into a Junior Choir. Last Thursday we had twenty boys and girls present. All junior boys and girls who are not in some other church work, are invited to meet with us.

We had great services last

Sunday, both hours, morning and evening. We appreciate your presence and help.

O. L. Oldham, Pastor.

Henry Powell

At the home of the pastor of Baptist Church, Saturday, Feb. 17 at 2 p. m., Miss Helen Henry of Portales and Ashley Powell of Elida, were united in marriage with Rev. Oldham performing the ceremony.

L. L. Simpson, President of the Chamber of Commerce of Ruidoso was a Carrizozo business visitor Wednesday; from him learned that the picture "The Union Pacific" shown at the Pueblo Theatre Feb. 20, was a decided success and the proceeds netted the sponsors over \$400. The Chamber of Commerce and other organizations at Ruidoso are laying plans for future projects in the interest of that community during the spring and summer.

Lesnett (Buster) Anderson was here this week from Las Cruces, visiting his mother, Mrs. Edith Crawford, uncle, Milt Lesnett and other relatives.

In the Service

Pvt. Ernest Snell Released From Jap Prison in the Philippines

He is of Nogal and has been a prisoner for three years. He is a member of the ill-fated 200th coast artillery. His home folks received a telegram stating the above facts. May we look for you home soon, Pvt. Snell?

Tough Luck!

Pvt. Ben Leslie, son of Mr. and Mrs. Bob Leslie of Capitan who is a Jap prisoner, was transferred to another Nip camp in Japan, just before Gen. MacArthur liberated numerous Yank prisoners recently.

Now Nazi Prisoner

Lt. Harry D. Edmiston, oldest son of Capt. Maurice Edmiston and grandson of Mr. and Mrs. Harry Edmiston, is a Nazi prisoner, according to word received this week by Mrs. Edmiston.

Sgt. Jay Truax, who has been awarded the Purple Heart, Silver Star for being wounded in action overseas, is now in the hospital at Staten Island, N. Y., with a broken leg.

Wanted—A baby's play pen and high chair—Mrs. Hatfield, Carrizozo Hardware (English apartments.)

Lieut. Mark Sloan, son of Mr. and Mrs. Bruck Sloan, is now in Liberal, Kansas, where he is 1st pilot on a B-24.

1st Lieut. Harold Hoffman, son of Mr. and Mrs. Henry Hoffman of this place, is in the air corps; he writes he was in nine bombing raids over Tokyo—congratulations!

Sgt. Richard Dow, son of Mr. and Mrs. Larry Dow, has been transferred from a camp in California and is possibly overseas by now.

Pvt. Ansel Swearingen has been transferred from Camp Roberts, Cal. to some undesignated station, according to his mother Mrs. Mary Swearingen.

Mr. and Mrs. Bryan Hightower were here on business Tuesday from Ancho. They have a son Lt. John Allen Hightower and a son-in-law Lt. Ivy Payne in the service.

Wm. E. Morrison, better known as "Gene" to his Lincoln County friends, entered the army air force Feb 15 and has gone to Keesler Field, Biloxi, Miss. for his basic training, after which he will go elsewhere for his Bombardier training. The Morrison family were recently lived here. Mr. Morrison being employed as brakeman on the SP. They now reside in Albuquerque.

2nd Lt. John A. Hightower, son of Mr. and Mrs. Bryan Hightower of Ancho has been transferred from the Carlisle army air field to Ardmore, Okla. He is a graduate of State College.

A. R. Soper, Instructor in Mechanical Flying, who had served overseas for two years and six months, arrived here Jan. 21, remained for three days and left for El Paso, accompanied by his mother, Mrs. G. V. Harrison and after visiting friends went to Colorado City, Texas where they visited relatives for three weeks. From there Mr. Soper reported Corpus Christie for re-assignment and is now at Beeville, Texas, continuing instructing in the line of mechanical instruction work. During her visit with her son, Mrs. Harrison closed the Cottage Cafe, but on her return she opened up and is now serving the public in her usual good style, where home meals are prepared and served. Give her a call.

In a lengthy article to many papers over the country, Major W. B. Sharp, commanding officer of the Army Transportation Corps in France, writes of what the soldiers have undergone and how the German people like the American food compared with what they have been accustomed to. He speaks of the "Last Chance Saloon" where they have their last chance of comfort before going into battle. We regret that the article is too lengthy for publication for it abounds with interest. Major Sharp was our trainmaster here with the S. P. railroad before entering the Army.

Airplane Speed Indicators Correct Only at Sea Level.

As speed indicators in airplanes register accurately only at sea level, pilots have to estimate speeds by adding 2 per cent to their readings for each 1,000 feet in altitude.

For example, when the indicator registers a speed of 225 miles an hour at 5,000 feet, a pilot knows that he is actually traveling almost 248 miles an hour.

POST'S Raisin BRAN

GOLDEN-FLAKES OF WHEAT AND BRAN COMBINED WITH SUGAR-SWEET TENDER RAISINS

delicious NEW breakfast idea

A magic combination! Crisp Post's 40% Bran Flakes—plus tender, chewy seedless raisins...right in the same package. Delicious—nutritious—that's Post's Raisin Bran! Don't miss this wonderful new flavor sensation! Ask your grocer for Post's Raisin Bran, today!

It's Now!

Here's How to Insure Your Baking Success

... says Mother Maca

With Amazing MACA YEAST The Fast, Dry Yeast You USE JUST LIKE COMPRESSED YEAST!

Think of it! This one marvelous yeast offers you the advantages of compressed yeast and granular yeast COMBINED!

ACTS EXTRA FAST! No special tricks when you bake with fast-acting, dependable Maca Yeast. Just follow your regular methods. Maca rises so quickly, you're finished baking in double-quick time.

And your results will thrill you! Maca gives bread and rolls a wonderfully smooth texture, a rich golden color, and a real old-fashioned flavor—a delicious, nut-sweet flavor like grandma's bread used to have.

Stays Fresh for Weeks Without Refrigeration

Maca is such a convenience! You can always keep a handy supply on your pantry shelf, save yourself extra trips to the store. For your complete protection, we dew every package.

To insure your baking success with Maca, the original fast, granular yeast that you use just like compressed yeast.

All Yeast! No Water, No Filler!

Remember—Maca, too, is serving the armed forces. If your grocer doesn't always have it, ask for Yeast Foam (Maca Yeast), the tried-and-true product that also gives a fine old-time flavor.

NORTHWESTERN YEAST COMPANY 1750 N. Ashland Ave. Chicago 22, Ill.

Army and Navy Turn to Rocket Weapons As Answer to Need for More Fire Power

Munitions Schedule Greatly Stepped Up To Meet Demands

War rockets are not new. The Chinese used crude projectiles in 1232 against the Tartars; the British fired them at American troops in the War of 1812, during the battle of Blandensburg, when they routed Stansbury's American brigade, and then marched on Washington. Francis Scott Key, going aboard a British prison ship in the Chesapeake to discover the fate of a friend, was obliged to stay aboard during the British rocket ship attack on Fort Mchenry. On the basis of this experience, he wrote the rocket references in the American national anthem: "And the rockets' red glare, The bombs bursting in air."

Rockets, however, were never used before in 20th century warfare. In this war these projectiles have become important and destructive weapons. Their considerable use in combat is one of the principal weapon innovations of this war. Amazing expansion of use and production of American rockets, since the bazooka was invented in 1941, has been reported by the army, the navy and the Office of Scientific Research and Development.

The increase in rocket production, of course, based on increased requirements for rockets to use in combat, is shown by these facts:

In November, 1944, the navy's bureau of ordnance reported that by the end of the first quarter or early in the second quarter of 1945, the navy would be spending approximately \$100,000,000 per month on rocket ammunition alone, which is as much as is now being spent per month on all types of naval ammunition.

In December, 1944, however, the navy's bureau of ordnance said that in a few months navy rocket production would be stepped up by nearly 300 per cent.

The army, which placed its first rocket orders of this war in 1941,

Most all pursuit planes are now being equipped with bazookas. This P-47 has six tubes, mounted under the wings. The rocket projectiles are fired electrically by the pilot. The picture shows a ground crewman loading one of the bazookas. Three of the big rockets are standing on end in front of one of the wheels in the foreground. This plane is also armed with eight .50-caliber machine guns.

Fourth of July skyrocket, these new rockets are artillery-type weapons, with the rockets being equivalent to shells and the launching devices equivalent to guns. Fired from tubes that vary in length and diameter according to the type of rocket, the weapons have warheads carrying explosives, or smoke, or incendiary chemicals. The tube that extends to the rear of the warhead contains the propellant, a material that, after being electrically ignited, generates expanding gas. The gas, pushing against the head, forces the rocket forward.

The M-8 rocket, that was developed after the bazooka, is a 4.5 inch projectile that equals in firepower the 105-mm. medium artillery gun. The M-8 rocket weighs only 38 pounds. The M-8's launcher, M-12, weighs 35 to 40 pounds, while a 105-mm. gun weighs approximately 12 tons. The M-12 launcher costs only \$104, while a 105-mm. gun complete costs \$0,400.

M-8s Clear the Way. The navy put M-8 rockets to their first real test in the Pacific amphibious operations. By the time the European theater invasions began, rocket-firing craft had become essential equipment for landings on hostile beaches. On the China-Burma-India theater M-8 rockets, fired by army air force P-51 Mustang fighter planes, carrying six rockets each, destroyed in 220 rounds of firing six large warehouses, 12 medium-sized warehouses, one foundry, four locomotives, 10 Japanese aircraft, two river boats and four native shacks; and damaged two medium-sized warehouses, five medium-sized buildings, one locomotive, and 13 Japanese aircraft.

P-38 Lightnings, P-39 Airacobras, P-40 Warhawks, P-47 Thunderbolts, as well as the Mustangs, are the fighter planes equipped with rockets by the army air force. Grumman Avenger torpedo planes and such lighter-navy fighter planes as Hellcats have been armed with rockets. Navy carrier task forces are using rockets in ever-increasing quantity.

Army air force fighter planes, carrying rockets slung in underwing mounts, have combined rocket fire with bombing to destroy concentrations of armored vehicles, rail lines, rolling stock, trucks and troop convoys, light field fortifications such as bunkers, pillboxes, artillery emplacements, radio installations, and light naval and cargo craft, both in Europe and in the China-Burma-India theater of war.

For more than two years the navy has been using a type of rocket weapon against Axis submarines. Now standard for all navy amphibious operations is the rocket-weapon that was used successfully in the invasions of North Africa, Sicily, Italy, and France, in the landings on Araware and subsequent landings in the Pacific.

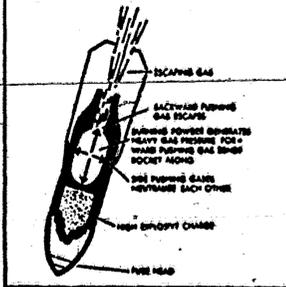

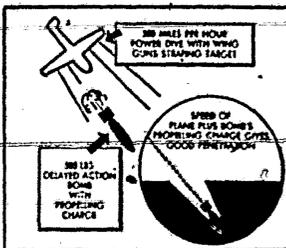

Blast Shore Installations. LCIs (landing craft, infantry) attacked with rockets at Kwajalein, Eniwetok, Guam. Several thousand rockets were hurled at Japanese shore installations by LCIs on Guam. These rockets were fired by electrical control from multiple banks of launchers that had been welded to forward well decks.

Operational and tactical reports of rocket successes from field commanders and in various theaters of war have increased markedly over 1942. After analyzing the wide destruction of enemy ground targets by rocket-firing P-47s of the Ninth air force, the operational research section of the force recommended more extensive use of airborne rockets.

Since 1941 American rocket research and development have been forwarded by the war and navy departments, working with scientists of the Office of Scientific Research and Development. The latter is responsible, among other things, for initiating and supporting scientific research on weapons of war. The air technical service command technicians; the army ordnance department, and civilian scientists of the N.D.R.C. group, developed airborne rockets for tactical use in the war after only two years of research at Wright Field, Dayton, Ohio, and other proving grounds.

While rockets have great fire power and mobility, and may be fired without recoil, which increases their adaptability for use where guns cannot be employed, only when fired from high speed aircraft are they of pinpoint accuracy. Ground forces' rockets have great possibilities as a barrage weapon. Rocket launchers, as compared with guns, are relatively simple and cheap to manufacture in mass production, according to the National Defense Research Council and the army and navy.

Rocket Bombs

For greater penetration, as well as more accuracy, a rocket bomb has been developed. A propelling charge is set off just as the bomb leaves the dive bomber. This added impulse speeds up the missile's descent and consequently its impact with the target is more forceful.

Two men with a bazooka can blast a hole in a medium tank. This strange weapon, nevertheless, is light to carry and easy to handle. The forward man holds the tube and aims it, while the rear man loads the rocket missile. There is no recoil, since the tube is open at both ends. The rocket pushes against the air instead of a breech block.

had approximately \$1,000,000 in rocket contracts during 1942. During 1943, the expanding rocket production program had shot up by 2,400 per cent over that of 1942. And in 1944 the program was further increased by another 400 per cent over 1943 production, according to the army ordnance department.

During 1945 the army will be spending approximately \$12,000,000 per month on rocket ammunition alone, while the navy will produce rockets for all branches of the armed forces and will be responsible for loading and testing the projectiles. The army will be responsible for the manufacture of a rocket propellant charge that will not dissolve in ordinary solvents, such as water, and of rockets of sizes not produced by the navy.

New Types More Powerful. Rockets used by the American armed forces today, including the navy's latest type airplane rocket and the latest plane type used by the army air forces, are even more potent weapons than the bazooka, which was the army's anti-tank rocket first put into production in 1941, and first used in combat in the North African invasions. According to the National Defense Research Committee, rockets are accurate weapons when fired from high speed aircraft. And the navy reports that rockets fired from planes can be pinpointed on the target.

In this war American rockets are fired from naval craft, aircraft, and from the ground or from ground vehicles. Similar in principle to the

Air Corps Will Use Jet-Propelled Fighters on Japanese Front

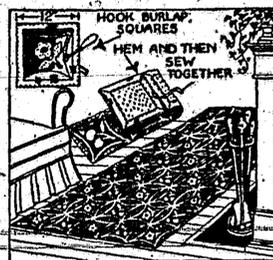

The jet-propelled fighter plane, now constituting a rapidly growing segment of the aircraft production in this country, will displace "to a great degree" the standard type of fighter-escort craft in the war against Japan, according to war production officials.

Scheduled increases in the output for this year are described as "terrific" and by 1946, it was stated, production of the new plane may make it the largest single item in

the wide range of United States aircraft types. The Germans are using a jet-propelled plane on the western front in combat against Allied bombers and their fighter escorts. It is acknowledged to have as principal advantage the speed with which it can attack and then elude conventional American fighter planes. American aircraft designers and engineers are trying to eliminate what appears to be the chief disadvantage of the jet-plane, its short range. Because of its prodigious consumption of fuel, it is necessary that the plane be close to its base for frequent refueling. Until the range is lengthened, its use as a bomber escort will be confined to raids against targets reasonably close to sources of fuel supply, experts point out. They add confidently, however, that the short range will not always be an obstacle to extensive use of the plane.

You Can Add Square a Time to This Rug, in Flower and Cherry Design

By Ruth Wyeth Spears

when sewn together, they form this fascinating design. No large frame is needed and your hooking is easy to carry with you or to use for pick-up work.

NOTE—Pattern 201 gives actual-size design for this rug with color guide and complete directions for preparing materials and hooking. Ask for pattern by number and enclose 15 cents with name and address direct to:

MRS. RUTH WYETH SPEARS Bedford Hills, New York

Less Than a Cup of Sugar Solves Dessert Problem (See Recipes Below)

Dessert Fancies

When your tables aren't set with just exactly the meat you'd like to serve, or when meals tend to become monotonous then give your family a dessert that's really elegant. It'll make up for a lot of omissions in the easiest way.

No, I'm not going to give you a lot of recipes calling for sugar or high-point canned fruits. I'm going to tell you of simple but fanciful desserts that will make it seem like you're splurging.

A bit of the "right tang in a pudding, a colorful cake with an unusual icing or a sweet tidbit like marmalade scones are some of the sweets I'm recommending. They'll keep the sugar budget in trim condition and still satisfy sweet-seekers:

*Pudding Princesses.

(Serves 5-6)
 3 egg yolks
 1 teaspoon grated lemon peel
 1/2 cup sugar
 1 tablespoon unflavored gelatin
 2 tablespoons cold water
 1/4 cup lemon juice
 2 stiffly beaten egg whites
 Beat egg yolks until thick and lemon colored. Add lemon peel; gradually beat in sugar. Soften gelatin in cold water. Add lemon juice and gelatin to egg yolk mixture. Fold in whites. Pour into an oiled mold. Chill. Unmold, and serve with stewed dried fruits or stirred custard sauce.

Sponge cake with two eggs? Baked in 30 minutes? Yes, it's possible if you'll follow this recipe. It doesn't have to be iced but you'll like it with the simple baked-on icing:

Lightning Sponge Cake.

2 eggs
 1/2 cup sugar
 1 cup sifted flour
 1/4 teaspoon salt
 1 teaspoon baking powder
 1 tablespoon butter
 1/4 cup hot milk
 Beat eggs until thick and light. Slowly add sugar and beat with a spoon for five minutes. Fold sifted dry ingredients into egg and sugar mixture all at once. Melt butter in hot milk and add all at once. The folding of the milk and dry ingredients should take only about 1 minute.

Bake in a waxed-paper-lined 8-inch square pan in a moderate (350-degree) oven for 30 minutes.

Baked-On Frosting.

1 egg white, beaten stiff
 1/4 teaspoon baking powder
 1/4 cup brown sugar or honey
 1/4 cup chopped nuts
 Add baking powder to the egg white which has been beaten. Add the sugar or syrup gradually, blending in gradually, then spread over cake while it is still hot. Sprinkle with 1/2 cup nuts. Bake in a moderate oven until lightly browned.

Minimum is the description of ingredients for these delectable scones made into a whirl. A coffee cake dressed up like this one will go nicely for dessert:

Lynn Says:

Colorful Combinations: Salmon steaks with egg sauce, home-canned string beans, hashed brown potatoes, jellied tomato aspic, apricot strip pie, beverage.
Spaghetti in tomato sauce, salad of mixed greens, tray of radishes, pickles and dark olives, dark rye bread or bread sticks, and stewed plums.
Kidneys in rice-parley ring, brown sauce, green peas and celery, cabbage, apple and orange salad, pudding princess with sliced, sweetened apricots.

Lynn Chambers' Point-Saving Menu

- Baked Stuffed Heart
- Mashed Potatoes
- Creamed Spinach
- Jellied Apple Salad
- Parker House Rolls
- Jelly
- *Pudding Princess
- *Recipe Given

Marmalade Scone Whirl.
 (Makes 1 10-inch coffee cake)
 2 cups sifted flour
 3 teaspoons baking powder
 1 teaspoon salt
 1 tablespoon sugar
 1/4-cup shortening
 1 egg
 1/2 cup milk
 1 1/2 cups citrus marmalade

Sift together all dry ingredients. Cut or rub in shortening. Beat egg and add milk. Add to flour mixture. Stir only enough to moisten. Spread dough into greased 10-inch pan. With fingertips press dough down in grooves an inch wide, making a circular pattern. Make first groove one inch from edge of pan and second 1 1/2 inches from first. Fill grooves with citrus marmalade. Bake in a moderately hot (400-degree) oven 20 minutes.

In a recent survey among homemakers, it was discovered that the biggest leftover problem was that of stale bread. Combined with healthful eggs and milk, this leftover bread can make a delectable pudding:

Bread Pudding.

(Serves 8)
 2 cups dry bread cubes
 4 cups milk scalded
 1 tablespoon butter
 1/4 teaspoon salt
 1/2 cup sugar
 4 slightly beaten eggs
 1 teaspoon vanilla extract
 Soak bread in milk for 5 minutes. Add butter, salt and sugar. Pour slowly over eggs; add vanilla extract and mix well. Pour into a greased baking dish. Bake in a pan of hot water in a moderate (350-degree) oven until firm, about 50 minutes.

Variations of Bread Pudding.

Raisin Pudding: Add 1/2 cup seeded raisins before baking. Serve with lemon sauce.
 Bitterscotch Bread Pudding: Substitute brown sugar for white.
 Chocolate Bread Pudding: Melt 1 ounce unsweetened chocolate in hot milk before adding bread. Serve with butter or foamy sauce.
 Lemon Sauce.

1/2 cup sugar
 1 tablespoon cornstarch
 1/4 teaspoon salt
 1/4 teaspoon nutmeg
 1 cup boiling water
 2 tablespoons butter or substitute
 1 1/2 teaspoons lemon juice.
 Mix dry ingredients in order given. Gradually add water and cook over low heat until thick and clear. Add butter and lemon juice and blend thoroughly.

Victory Cookies.

1 1/2 cups sifted flour
 1 teaspoon baking powder
 1/2 teaspoon baking soda
 1/2 teaspoon salt
 1 teaspoon cinnamon
 1/4 teaspoon cloves
 2 cups broken walnuts
 1 1/2 cups each, pitted dates and raisins
 1/2 cup shortening
 1/2 cup brown sugar firmly packed
 2 eggs

Mix and sift dry ingredients. Toa together with fruits and nuts. Cream shortening; beat in sugar, then eggs and flour mixture. Drop by spoonfuls on greased sheet and bake in a moderate (350-degree) oven for 12 minutes. These cookies become soft after several days.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

BY HAROLD L. LUNDQUIST, D. D., Of The Moody Bible Institute of Chicago. Released by Western Newspaper Union.

Lesson for February 25

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

JESUS, THE SON OF GOD

LESSON TEXT.—Matthew 16:13-17. **GOLDEN TEXT.**—Whosoever therefore shall confess me before men, him will I confess also before my Father which is in heaven.—Matthew 10:32.

"What think ye of Christ?" There is a question that every human being must answer. Jesus asked it (Matt. 22:42), and each of us makes some kind of reply. It is the touchstone that tries men, and churches, organizations and movements. The answer to it is of deep importance, for it determines character, condition, and destiny for time and eternity.

Jesus, the Christ, the Son of the living God, is the center of the entire lesson.

I. Jesus Confessed (16:13-17). With His crucifixion now only six months away, our Lord in preparation for it is about to make a more definite claim to Messiahship, and thus to establish the truth in the minds of His disciples. He therefore asks this all-important question about Himself.

First, it is a general query, "Whom do men say that I am?" The answer (v. 14) indicates that the common opinion concerning Christ was a very high one. He had made an impression on the people of His time, and this has been true down through the ages. Even those who do not believe on Him admit that He was "the ideal representative and guide to humanity," or the person before whom "everyone would kneel." But beautiful tributes to His character and leadership are worse than meaningless unless they lead to a personal confession of Him as Lord and Saviour.

The question becomes personal as He asks, "Whom do ye say that I am?" That question no one can escape. We cannot refuse to answer. Neutrality is impossible. Whatever we do or say, or do not do or say, is a decision.

Peter's answer is really the sum and substance of Christian doctrine. He recognized Him as the Messiah, the fulfillment of all Hebrew prophecy, and as the Son of the living God, the Redeemer and Saviour of men, the One in whom centers all Christian faith.

II. Jesus Transfigured (17:1-3). As His amazed disciples looked on, the eternal, divine glory of the Son of God could no longer be hidden by the human body and the humble garments of our Lord, and "His face did shine as the sun and His raiment was white as light."

They saw their beloved Master now for what He really was, the Son of God. The testimony of Peter was no longer mere words, although ever so blessed. His speech had been confirmed by sight and they knew their Master as the Lord of glory.

It is essential in both the life and service of a Christian that he clearly understand the truth about Christ, His person and His work. When that understanding is tied up with a personal vision of His glory, there is assurance and power.

The want of such a vision explains the lack of zeal for soul-winning, the ineffectiveness of witness, the unwillingness to suffer or sacrifice for Christ's sake. "Where there is no vision, the people perish" (Prov. 29:18) for want of a witness concerning the Saviour.

III. Jesus Triumphant (17:4-6). The crowning point of the transfiguration came when the voice spoke out of the bright cloud and gave not only the Father's unqualified approval of Christ, but also His command that men should listen to Him and heed His message of redemption.

Note how this word of the Father completed the transfiguration. In itself it might have been likened to that which happened to Moses (Ex. 34:29, 30). We say likened to, because the glory which showed forth in Jesus was from within, not just a reflected glow.

But the words from heaven provide the conclusive and final witness. They so impressed Peter that he talked of them as a cherished memory and a transforming power in his life, even when he was an old man (II Pet. 1:16-18).

How do they impress you? Are you ready to acknowledge Jesus as the Christ, the Son of God, and take Him as your Saviour?

IV. Jesus Only (17:7-9). Having seen Him in His glory, they now saw Him alone. True, the others had gone, but is there not also the thought that He, the blessed God, now filled the vision of their souls?

Surely we find it right at hand to make that application to our own lives. When we really see Him as He is, then He fills our vision, and when He does that, we have reached real satisfaction of life.

"Jesus only" is more than a motto or a theme for a song. It is the epitome of a life worth while. It makes one want to ask everyone, "Do you know Him?" Well, do you? If not, will you take Him as your Saviour right now? Christian, will you let Him fill your life?

SEWING CIRCLE PATTERNS Well-Fitting Afternoon Frock Add Bolero to Sun-Back Dress

1292 36-52
 1983 10-20

Afternoon Frock. THE sort of dress every woman likes—with its soft, graceful skirt, nice shoulder detail and flattering sweetheart neck edged in ruffling. Especially designed to give you a poised, well-groomed feeling.

Pattern No. 1292 comes in sizes 36, 38, 40, 42, 44, 46, 48, 50 and 52. Size 38, three-quarter sleeves, requires 3 1/2 yards of 36-inch material; 1 yard edging for neck trim.

Sunback Dress. THIS smart sunback frock has gay over-shoulder ruffles to give it a jaunty air. A "cover-up" bolero is included in the pattern which adds up to an ideal mid-summer outfit. Make it in polka dots or bright checked cottons.

Pattern No. 1983 comes in sizes 10, 12, 14, 16, 18 and 20. Size 12, with ruffles, requires 3 1/2 yards of 33 or 35-inch fabric; 7 yards rick rack to trim ruffles and skirt; plain dress, 3 1/2 yards; bolero 1 1/2 yards.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers. Send your order to:

SEWING CIRCLE PATTERN DEPT. 539 South Wells St. Chicago Enclose 25 cents in coins for each pattern desired. Pattern No. Size Name Address

Heat Pickup In the split second that is required to light a safety match on the surface of the container, the heat of the friction increases the temperature of the head to its ignition point of between 333 and 388 degrees Fahrenheit.

FOR QUICK RELIEF FROM MUSCULAR ACHES Stiff Joints • Tired Muscles • Sprains • Strains • Bruises What you NEED is SLOAN'S LINIMENT

To Relieve Bad Cough, Mix This Recipe, at Home

Big Saving, No Cooking, So Easy. You'll be surprised how quickly and easily you can relieve coughs due to colds, when you try this splendid recipe. It gives you about four times as much cough medicine for your money, and you'll find it truly wonderful. Make a syrup by stirring 2 cups of granulated sugar and one cup of water a few moments, until dissolved. No cooking needed—it's no trouble at all. (Or you can use corn syrup or liquid honey, instead of sugar syrup.) Then put 2 1/2 ounces of Pinex (obtained from any druggist) into a pint bottle. Add your syrup and you have a full pint of medicine that will amaze you by its quick action. It never spoils and tastes fine. This simple mixture takes right hold of a cough. For real results, you've never seen anything better. It loosens the phlegm, soothes the irritated membranes, and eases the soreness. Pinex is a special compound of proven ingredients in concentrated form, well-known for its prompt action in coughs and bronchial irritations. Money refunded if it doesn't please you in every way.

Red Cross Faces Greatest Task in Fourth War Year

WASHINGTON, D. C.—Facing the greatest task in its history in serving American fighting men on advancing war fronts overseas, their families at home, their buddies returning to the United States after discharge, and the American people in emergencies on the home front, the American Red Cross will launch its third War Fund campaign March 1.

That the American people will respond with overwhelming generosity to the appeal for \$200,000,000 to carry on this world-wide program is already indicated in the nation-wide determination to meet all its war needs and to bring the five-year struggle to an early and successful conclusion.

In every invasion during the past year, Chairman Basil O'Connor of the American Red Cross said, Red Cross workers have either gone with the troops, or have followed within a very short time. Red Cross field directors were with General Eisenhower's men in the great amphibious invasion of France, and with General MacArthur's forces when they returned to the Philippines.

Ten thousand men and women wear the Red Cross uniform overseas, serving in every theatre of war and with every command. They work in leave clubs, clubmobiles, rest houses, hospitals. Red Cross men attached to fighting units are with those outfits even in actual combat. Red Cross girls dispense snacks at air fields, along trucking supply routes, behind front areas and in liberated cities.

Many, both men and women, are on duty at scores of isolated outposts throughout the world, and give aid to wounded men in hospitals and on hospital ships, planes and trains. Away from the battle areas, thousands more serve at military and naval installations within the United States.

Red Cross service on the home front has expanded with the ever-increasing demand upon it. Mr. O'Connor said. In addition to collecting more than ten million pints of blood for plasma since the beginning of the war, the Red Cross has met requests of the Army and Navy for whole blood shipments to European and Pacific battle areas. Ten centers on the East and West coasts already participate in the collection of Type O whole blood, while others stand ready to join in that program as military needs warrant.

At four packaging centers, manned by volunteer workers, more than 20,000,000 food parcels have been turned out in a steady stream for shipment to prisoners of war and civilian internees in Germany and the Far East. Surgical dressings—775,000,000 of them—were prepared in the past year alone for front line and hospital use. Production workers in hundreds of communities have continued the never ceasing program of making warm garments for destitute civilians in war-torn countries overseas, and in those countries the Red Cross has assisted the Army in caring for refugees and homeless people.

Nor has its service to the armed forces on a global scale caused any relaxation on the part of the Red Cross to carry out its traditional service to the American people in time of disaster. More than 200 domestic disasters—floods, high winds and fire—have found Red Cross workers on the job to relieve stricken families and to aid in the rebuilding of communities.

"The need for Red Cross services in the coming year will be greater than ever before," Mr. O'Connor said. "In fulfilling the Red Cross appeal for \$200,000,000, the American people will indicate its wholehearted backing of men in the front lines."

Notice of Hearing of Final Report and Account

In the Probate Court of Lincoln County, State of New Mexico, No. 434

In the Matter of Last Will and Testament of James V. Tully, Deceased.

To Ora G. Tully, Glencoe, New Mexico, Fred W. Tully, 2016 E. Hawthorne, Tucson, Ariz., Mrs. Leon V. Sheehy being the same person as Susan T. Sheehy, Rt. 1, Box 375, El Paso, Texas, Mrs. M. E. Morgan being the same person as Geraldine T. Morgan, Alamogordo, New Mexico, Gerald Tully, Glencoe, New Mexico, Kiyas Tully, Tularosa, New Mexico, James V. Tully, Jr., Glencoe, New Mexico, and to all unknown heirs of the decedent, and all unknown persons claiming any lien upon, or right, title, or interest, in or to, the estate of the said decedent, and by whom it may concern:

You, and each of you are hereby notified, and notice is hereby given that Ora G. Tully, executrix of the Last Will and Testament of James V. Tully, deceased, has filed in the above entitled Court her final report and account as such Executrix, and the Court has appointed January 26, the 26th day of March, 1946, at the hour of 10 o'clock A. M. as the hour and day for hearing of objections, if any there be, to the approval and settlement of said final report and account, and the discharge of the said Ora G. Tully as such executrix, and at the hour on the day named, the Probate Court will proceed to determine the heirship of said decedent, the ownership of his said estate and the interest of each respective claimant thereto and therein and the persons entitled to the distribution thereof.

The name and post office address of the attorney for the executrix is John E. Hall, 510 Sunshine Building, Albuquerque, New Mexico.

Witness the honorable Paulino A. Diaz, Judge of the said Court, and the seal thereof, this 5th day of February, 1945. (Seal) S. E. Grelson, Clerk.

NOTICE OF PENDENCY OF SUIT

The State of New Mexico: To George S. Vineyard, impleaded with the following named defendants against whom substituted service is hereby sought to be obtained, to-wit: George S. Vineyard; the unknown heirs of the following named deceased persons: Samuel P. Vineyard, deceased; the following named defendants by name if living, if deceased, their unknown heirs: Leah Guydelle Winters, Mary Mildred Vineyard, Jo Frances Vineyard; and all unknown claimants of interest in the premises described in the complaint of the plaintiff herein after named, adverse to the plaintiff:

You are hereby notified that there is pending in the District Court of Lincoln County, New Mexico, a certain cause, Number 5150 on the Civil Docket, in which Gladys Adams is plaintiff and you are defendants. The general object of said action is to quiet the title and interest of the plaintiff to the property described in the complaint in said cause, being certain real estate situated in Lincoln County, New Mexico, and described as follows: Lots 1 to 8, inclusive, in Block P of Ruidoso Pine Lodge Company Subdivision.

You are further notified that unless you enter your appearance in said cause on or before the 7th day of April, 1945, judgment will be rendered in said cause against you by default.

Attorneys for the plaintiff are Shipley & Shipley, of Alamogordo, New Mexico.

Witness my hand and the seal of said court at Carrizozo, Lincoln County, New Mexico, this 14th day of February, 1945.

S. E. Grelson, Clerk of the District Court of Lincoln County, New Mexico. (Seal)

WEEKLY NEWS ANALYSIS

Allied Armies Squeeze Nazis As Big Three Map Knockout Drive; AFL, Industry Buck Labor Draft

Released by Western Newspaper Union. (EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

With one member carrying cumbersome anti-tank weapon, Berlin home-guarders mobilize for action as Russ march on capital.

EUROPE: Plan Knockout

As Swedish reports played up a big shakeup in the German government in an effort to form a more respectable regime for approaching the Allies for peace, the Big Three conference continued in the Black Sea area, with Messrs. Roosevelt, Churchill and Stalin announcing completion of plans for the knockout of the Nazi military machine.

Although Hitler would remain as the head of the German state under the reported shakeup, actual power would pass into the hands of wily Fritz von Papen, ace diplomat and Reich chancellor before the Fuehrer's ascension to dominance. Although a conservative in tone, Von Papen, reports had it, would have as Finance Minister Hjalmar Schacht, who devised the Reich's

Stalin, Roosevelt and Churchill in confab.

complex prewar barter system, by which the Reich attempted to do business without formal exchange.

In agreement on military plans, the Big Three also were reportedly in harmony on postwar occupation of Germany, with Britain taking over the northwest, the U. S. the southwest and Russia the east.

Twin Thrusts

While the Russians drove in from the east, the U. S. and British undertook a large-scale offensive in the west, with Field Marshal Bernard Montgomery's Tommies attempting to outflank the Siegfried line terminal of Kleve on the northern end of the front and move down the Ruhr valley.

Following 11 hours of intensive aerial and artillery bombardment, Montgomery's forces, paced by tanks and flame throwers, fought deep into the Reichswald forest screening Kleve, while the Germans rushed up reinforcements in an effort to curb the offensive. Not only would a British breakthrough imperil the industrial Ruhr valley, but it would place the Tommies at the rear of Nazi troops holding a line against the U. S. First and Third armies farther south.

While Montgomery's offensive mounted, the First and Third armies continued to chew deeply into the once formidable Siegfried line, with the battering tanks encountering new earthwork defenses beyond the west wall's concrete bunkers, pill-boxes and tank-traps. Strongpoint after strongpoint in the Siegfried line fell as the Nazis appeared to be falling back into the earthwork system, stretching as far back as the Rhine in some places.

Attack in West

While a great battle raged for the battered Prussian stronghold of Berlin, another great and equally important fight flared for Silesia's interior industrial district.

In pressing their great offensives along the sprawling eastern front, the Reds threw numerous bridge-heads across the Oder river, whose ice-packs were thawed by warm winds. With artillery laying down heavy barrages, Red armored columns, backed by waves of in-

WORK OR FIGHT?

Bill Bucked

Still strongly opposed by labor and industry, the administration's "work or fight" bill forcing men between 18 and 45 to accept essential jobs or face induction or fine and imprisonment received close septe consideration after house passage.

As the solons took up the bill, the AFL's executive council meeting in Miami, Fla., declared that no actual manpower shortage existed, but that some plants were hoarding labor to keep up production costs and allow them a greater percentage of profit, and contracts were being let in tight labor areas while establishments were forced to lay off help in others. The AFL recommended a substitute under which hoarded labor would be drafted.

Claiming that only 150,000 workers were needed, the National Association of Manufacturers said that voluntary cooperative efforts of industry, labor and government had largely been successful in recruiting needed help, and said that lower employment ceilings in unessential plants could "flush out" surplus workers. Reductions in absenteeism, elimination of wasteful labor practices and shifting of skilled help would serve to draw the most from available manpower, the NAM said.

PACIFIC:

Manila in Flames

Overwhelmed by American forces moving from the north, and squeezed by other U. S. units moving in from the south, Jap defenders of Manila destroyed all bridges over the Pasig river dividing the city in two and put the business district to the torch.

As the Manila business district's reinforced concrete, streamlined and air conditioned buildings billowed in flame, winds blowing in from the bay spread the fire, forcing the removal of freed prisoners and internees by truck to outlying

suburbs. As U. S. troops worked their way through the barricaded streets, they came under heavy sniper gunfire.

In telling his troops that they "have redeemed a country's pledge to recapture its lost land," General MacArthur said that the conquest of Manila marked the end of one phase of the war and the opening of another. Declaring that his command was ready to carry on the campaign against the Japs, in what was interpreted as his bid for continued leadership of Allied forces in the Pacific, MacArthur proclaimed: "On to Tokyo."

fantry, pressed into the fortified zones before Berlin.

Farther to the south, the Russians headed for Silesia's interior industrial district around Schwidniz and Wunschelburg, nestled deep in the shadow of the towering Sudeten mountains rimming Czechoslovakia. Capture of this region would add to the conquest of the eastern Silesian industrial district and further impair Nazi industry.

SURPLUS GOODS:

Investigate Sales

With congress announcing its intention to go into the whole question of surplus property disposal now to develop fair practices rather than to wait until most of the goods had been sold, the senate war investigating committee ranged over the whole matter, with emphasis on operations of an auctioneering firm allegedly soliciting business through high officials.

During the course of the committee's inquiry, it was learned that purchasers bought surplus materials at bargain prices and then resold them to the government at big profits, and that test tubes, stopper corks and surgical dressings were being classed as surplus while factories worked around the clock turning out more of the same items.

In investigating the affairs of Surplus Liquidators, Inc., it was brought out that Herbert Bayard Swope, consultant to Secretary of War Henry Stimson, had written to Jesse Jones, former secretary of commerce, asking for the latter's consideration of the firm's plans for disposal of surplus goods. There not only was pre-arranged bidding at Surplus Liquidators' auctions, it was charged, but sales were made without any competitive bidding at all, and in some cases buyers later were asked to pay higher prices for goods they had previously bought.

COURT-MARTIAL:

Stirs Nation

In a case that stirred nation-wide interest and created a flurry on the floor of the U. S. senate, the army's sentencing of Pvt. Henry Weber, 27, of Vancouver, Wash., to hanging for refusal to bear arms in a drill was changed to life imprisonment at hard labor.

Henry Weber

As Weber's wife said that his deep personal conviction against killing in war should have entitled him to consideration as a conscientious objector before his induction, he, himself, declared: "I am interested in a world in which all men can live peacefully. To be a good soldier you have to learn to hate and to kill. I am willing to do anything I can to get the war over as long as I do not have to kill other people."

Exclaiming "... It is inconceivable to me that army officers would sentence a man to death because he refused to drill," Senator Wheeler (Mont.) threatened to press a congressional inquiry into the case when it was first announced. "Whoever sentenced that boy to hanging ought to be discharged," he said.

CANADA:

Draft Trouble

Reaffirming its traditional privileges of self-government under the British North America act (the Canadian constitution), French-speaking Quebec's 22nd legislature convened in the same week as English-speaking voters in the Grey North district of Ontario repudiated the dominion government's compromise overseas draft policy.

Strongly opposed to an overseas draft, the Quebec legislature's firm declaration of self-government, coupled with the assertion that the minority's interest in any change in the dominion's constitution should be respected, indicated that French-Canadians aimed to maintain their position on conscription.

Meanwhile, repudiation of the government's compromise overseas draft policy to avoid a head-on collision with Quebec meant that Premier King may be compelled to call a general election to thrash out the question publicly and strengthen an administration's hand on dealing with the touchy problem.

RAIL TRAFFIC:

Car Shortage

One great artery linking the nation into a whole, the U. S. railroad system's operations in one section must strongly affect activities in another as the recent heavy snowstorms and frigid weather in the northeast have proved.

Because of the delay in returning rolling stock from the storm area, and the necessity of giving important military freight the right of way, an acute shortage of box cars has developed in the middle west, it was said. The situation has been all the more complicated by the fact that terminal mills and grain elevators have made a heavy demand for box cars in the face of a record 1944 harvest and a large carry-over.

Freight difficulties have been equally matched by passenger service troubles, it was also said, what with the severe winter weather delaying the arrival of many trains in midwest terminals and resulting in travelers missing connections on lines leaving for the west.

Income Drops

Class I railroads of the United States in the year ended December 31, 1944, had an estimated net income, after interest and rentals, of \$600,000,000 according to reports filed by the carriers. The decrease in net railway operating income in 1944 compared with 1943 was 18.9 per cent, with the drop ascribed to increased wages growing out of adjustments made in 1943 but in some cases not effective until 1944, and higher prices of fuel, materials and supplies.

Washington Digest

Calls 'Hydromania' Threat To U. S. Water Resources

Expert Charges Disregard for Natural Values In Engineering Projects; Sees Danger To Wild-Life Especially Acute.

By BAUKHAGE

News Analyst and Commentator.

WNU Service, Union Trust Building, Washington, D. C.

As the prospects of fat public works budgets for the postwar area arise on the Washington scene, the planners, big and little, rush up to drop their pet blueprints into the hopper.

Recently, I witnessed the preliminaries of a counter-balancing move, something that might be called a prophylactic effort to save some of the beneficiaries of governmental projects from being killed by too much kindness. This effort is embodied in a bill presented by Rep. Karl Mundt of South Dakota, and I heard a sort of informal preview of some of the testimony that will be offered before the committee on rivers and harbors in its behalf.

The bill is H.R. 519 and it deals with protection against pollution of the country's waterways. It was in the course of the preview discussion that I heard another affliction, "hydromania," a cure for which may be harder to find. It is said to result from "overindulgence in damming." It is not mentioned in the Mundt bill but the connection is obvious.

The purpose of Mr. Mundt's measure is as follows:

"To prevent pollution of the waters of the United States and to correct existing water pollution as a vital necessity to public health, economic welfare, healthful recreation, navigation, the support of invaluable aquatic life, and as a logical and desirable postwar public works program."

As I say, Mr. Mundt doesn't mention hydromania in his bill, but one of his close friends who had much to do with writing the legislation has. He is Kenneth Reid, executive secretary of the Isaac Walton league. Since the proposed legislation has also to do with the problem of protecting our piscatorial and aquatic life, I want to quote a few of Mr. Reid's observations on one kind of "killing with kindness" which frequently accompanies over-generous government spending.

Mr. Reid I should call a "hydrophile," for he ardently pleads the case for what he refers to as "the orphan stepchild" of our natural resources—water. Conservation of the land is pretty well understood but water, says Mr. Reid, "has been dammed and diverted, drained and polluted, stolen and wasted, with utter disregard of existing natural values, with-bland unconcern for its biological functions and its public, aquatic and recreational values."

"From the early days of our nation down to the present time," he continues (and this is where hydromania comes in), "water has run the gamut of a horde of engineers (whether private or governmental, makes no difference) who see in a running stream or a sparkling lake only the material uses to which the water can be put."

Existence of

Fish Menaced

Reid is an engineer himself and is not unsympathetic with the great achievements of his profession. But his colleagues sometimes outrun their zeal and he appears perturbed lest postwar public works activities threaten our lakes and rivers, their natural beauty and all that is in them.

What he is fighting is the kind of engineering activity, stimulated by grants-in-aid from the federal government, which will damage the waterways and their inhabitants, flora and fauna. On the other hand, he is all for the encouragement of constructive construction which will work in the opposite direction.

He thinks we have overdone the damming; he questions the economy of reclaiming land at a great capital cost per acre with certain irrigation projects. These, Reid opines, likewise often destroy fish by cutting them off from their spawning grounds. He mentions the dams in the Columbia river which, he says, threaten a ten million dollar annual salmon take.

That is the effect of hydromania resulting from well-intentioned and unselfish but unwise use of the engineering art. He points out that anything which kills fishes and interferes with the nation's wildlife is interfering with one of the nation's

major industries. He estimates that the total expenditure in hunting and fishing, including licenses, equipment and other incidentals, reaches a billion dollars a year and therefore constitutes a major American industry and one which should be protected.

Reid also stresses the esthetic and recreational values destroyed in the building of great dams and reservoirs as well as by the pollution of streams.

Pollution

Health Peril

The security feature which has been emphasized in the present war when the bombing of dams has caused such destruction, is another argument seized upon by Mr. Reid. His specific example of this phase of the argument sent a shudder down my back when he offered as an illustration the construction of 14 major dams in the Potomac watershed which was strongly advocated recently. "If this project had gone through, he told me, my home town and the seat of our government would have been made 'extremely vulnerable to air attack through breaching of the big dams that would be immediately above Washington.'"

"The engineer's desire," says Mr. Reid solemnly, "to pour concrete in prodigious quantities, impound great areas of water behind magnificent monuments" to engineering, dig ditches and canals, bore tunnels and otherwise remake the landscape of America, is quite irrepresible."

However, what he and his colleagues are now most concerned in eradicating is pollution and that, I think, will meet the approval of most people even if they won't go all the way with Mr. Reid concerning hydromania.

Protection against pollution, the proponents of the Mundt bill insist, "won't cost a thin dime" because the money saved by eliminating the need of purifying polluted water will more than make up for it.

Besides destruction of aesthetic and property values, it is pointed out that pollution is a growing menace to health. The Mundt bill would give the states every chance to clean up their own situations but, it is argued, "since streams flow by gravity without any regard for state boundaries pollution is logically and constitutionally a matter for federal control."

Provisions to take care of these various angles are included in the Mundt bill. Such measures in the past have been opposed by some communities which thought it was cheaper to dump their sewage in the rivers, and by industrial plants that felt the same way.

Although machines compete with humans and with horses and mules in this war, the dog, never before used officially by American forces, has become the competitor of mechanized devices.

A dog, by his sense of smell, can detect a strange presence at 500 feet. Up to October 1 of last year the army, coast guard and marines had used over 9,000 trained dogs.

The first thing a K-9, as they are called, learns, is to be a one-man dog. They won't accept food from any but their masters nor will they allow anyone else to pet them. Then the training gets more complicated and includes even parachute jumping. But there is one thing that these otherwise clever animals cannot be taught, namely, to tell enemy troops from their own. This has one advantage, however — they don't treat a German wearing an American uniform any differently than if he weren't an enemy in disguise. Soldiers sometimes do.

Demand for farm products is likely to continue at present wartime levels throughout most of 1945. Regardless of the course of the war the demand for many farm products, at ceiling prices, may continue to exceed supplies in 1945.

Consumers' food costs in large cities in recent months have been slightly lower than they were in mid-summer. The index for November, 1944, was 136.5 as compared with 137.7 in August and the peak of 143.0 in May, 1943. Nonfood costs have been following a somewhat different trend.

BARBS... by Baukhage

The Russians had a chance to get "on to Berlin" before the rest of us in more senses than one. Until they could lick 'em they were smart enough to join 'em.

A chain is no stronger than its weakest link, and a chain-smoker's chain is no longer than the link he has to stand in to get the links to chain-smoke with.

The character of the Jap boy, says the Infantry Journal, is patterned after the carp. He is taught to fight his way everlastingly upstream. And waiting to catch him, they might add, is a Yank with a bayonet.

Now that there is a shortage of fat-back there will be a shortage of grease to turn in to get coupons to get fat-back with.

CLASSIFIED DEPARTMENT

Persons now engaged in essential industry may register without statement of availability from their local United States Employment Service.

AGENTS WANTED

LADY WANTED in every community, both rural and city, to sell line of household necessities to her neighbors. Our line includes such scarce items as cheese and laundry soap. Liberal commission. General Products Company (U-3), Albany, Georgia.

AUTO BATTERIES

TEST YOUR OWN CAR BATTERY in car. No. 2000. Simple, accurate, interesting money saver. Instructions. 25c. BATTERY MAN, 901 South Avenue Grand Junction, Colo.

BIRTHDAY CARDS

LADIES! 14 BEAUTIFUL birthday cards \$1.25. Send now! Variety Greeting Card Co., 625 E. 17th Ave., Denver 2, Colorado.

CIGARS

CIGARS, FIFTEEN CENT SIZE, 8¢ in box, sent postpaid any address in U. S. 50 cents with order. No. C-2. General Products Company (U-3), Albany, Georgia.

FARMS

Fertile Farm, irrigated 80 ac., Delta County, 3-rm. dwelling, bath, granary, shade trees, fruit, berries; school bus, gravel road, elec. Pay \$750 cash, bal. carried 5%. Porter Nelson, California Bldg., Denver.

FEATHERS WANTED

FEATHERS WANTED, NEW OR OLD. Ship or write to STERLING FEATHER Co., 911 North Broadway, St. Louis, Mo.

ONION SEED

Crystal Wax Onion Seed, High Quality, Pottoland \$3.75. Send for plant catalog. Cabbage, Onion, Broccoli, Tomato plants. LAKE READ FARMS, Overton, Nevada.

PHOTOGRAPHY

FREE 3x5 ENLARGEMENT for your name and address. Send negative. LOWELL STUDIO, Box 1907, Lowell, Ariz.

POULTRY

PURE BROAD BREAST Bronze Roule and pure hybrid baby chicks. Order early. Circular free. Sibley's Hatchery & Turkey Farms, Osgo City, Kansas.

WILLIS TOP QUALITY CHICKS as low as \$2.00 per 100 prepaid. All popular breeds. Early order prices. Free catalog. WILLIS HATCHERY, Oskaloosa City, Mo.

Poultry and Eggs Wanted

POULTRY AND EGGS WANTED FOR SHIPMENT to OVERSEAS ARMED FORCES. 100% of all profits processed up for the overseas armed forces. Paying top prices. ADELMAN PRODUCE CO. KE. 7251, 1537 Market, Denver, Colo.

WANTED—ALL KINDS of live and dressed poultry and eggs. RHODES RANCH EGG COMPANY, 1525 Market St., Denver, Colorado.

RABBITS WANTED

WANT RABBITS, BEST PRICES. JIM SMITH, 4th & Wadsworth, Lakewood, Col.

SHOES

GET MORE WEAR out of your work shoes. Send self-addressed stamped envelope for circular. FREDERICK W. LEE, 218 University Ave., Palo Alto, California.

WASHER PARTS

MAYTAG WASHERS are real war-time friends! Keep them running by using genuine Maytag parts and Special Maytag Lubricants. Write now to get them from your local dealer or write factory branch. Maytag Rocky Mountain Co., Colorado Springs, Colorado.

It's Home, Sweet Home, for Vets

The first problem which will face the returning serviceman and one which is a necessary first step before he embarks on his postwar career, is a decision on the place in which he is to live. To this question, the great majority of the men have given the answer: "We're going back home," according to a report of the army service forces. The survey shows that eight out of

every ten white enlisted men expect to return not only to the same region, but also to the same state in which they lived before the war. Only one in ten anticipates moving to another state; the remainder are still undecided. Negro enlisted personnel tend to be somewhat more migratory. Only about two-thirds expect to go back to the same state in which they lived in civilian life.

WEEKLY NEWS ANALYSIS

Allied Armies Squeeze Nazis As Big Three Map Knockout Drive; AFL, Industry Buck Labor Draft

Released by Western Newspaper Union. (EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)

With one member carrying cumbersome anti-tank weapon, Berlin home-guarders mobilize for action as Russ march on capital.

EUROPE: Plan Knockout

As Swedish reports played up a big shakeup in the German government in an effort to form a more respectable regime for approaching the Allies for peace, the Big Three conference continued in the Black Sea area, with Messrs. Roosevelt, Churchill and Stalin announcing completion of plans for the knockout of the Nazi military machine.

Although Hitler would remain at the head of the German state under the reported shakeup, actual power would pass into the hands of wily Fritz von Papen, ace diplomat and Reich chancellor before the Fuehrer's ascension to dominance. Although a conservative in tone, Von Papen, reports had it, would have as Finance Minister, Hjalmar Schacht, who dethroned the Reich's

Christians Stalla, Roosevelt and Churchill in confab.

complex prewar barter system, by which the Reich attempted to do business without formal exchange. In agreement on military plans, the Big Three also were reportedly in harmony on postwar occupation of Germany, with Britain taking over the northwest, the U S the southwest and Russia the east.

Twin Thrusts

While the Russians drove in from the east, the U S and British undertook a large-scale offensive in the west, with Field Marshal Bernard Montgomery's Tommies attempting to outflank the Siegfried line terminal of Kleve on the northern end of the front and move down the Ruhr valley.

Calls 'Hydromania' Threat To U. S. Water Resources

Expert Charges Disregard for Natural Values In Engineering Projects; Sees Danger To Wild-Life Especially Acute.

By BAUKHAGE

News Analyst and Commentator.

WNU Service, Union Trust Building, Washington, D. C.

As the prospects of fat public works budgets for the postwar area arise on the Washington scene, the planners, big and little, rush up to drop their pet blueprints into the hopper.

Recently, I witnessed the preliminaries of a counter-balancing move, something that might be called a prophylactic effort to save some of the beneficiaries of governmental projects from being killed by too much kindness. This effort is embodied in a bill presented by Rep. Karl Mundt of South Dakota, and I heard a sort of informal preview of some of the testimony that will be offered before the committee on rivers and harbors in its behalf.

The bill is H.R. 519 and it deals with protection against pollution of the country's waterways. It was in the course of the preview discussion that I heard another affliction, "hydromania," a cure for which may be harder to find. It is said to result from "overindulgence in damming." It is not mentioned in the Mundt bill but the connection is obvious.

The purpose of Mr. Mundt's measure is as follows: "To prevent pollution of the waters of the United States and to correct existing water pollution as a vital necessity to public health, economic welfare, healthful recreation, navigation, the support of invaluable aquatic life, and as a logical and desirable postwar public works program."

As I say, Mr. Mundt doesn't mention hydromania in his bill, but one of his close friends who had much to do with writing the legislation has. He is Kenneth Reid, executive secretary of the Isaac Walton league. Since the proposed legislation has also to do with the problem of protecting our piscatorial and aquatic life, I want to quote a few of Mr. Reid's observations on one kind of "killing with kindness" which frequently accompanies over-generous government spending.

Mr. Reid I should call a "hydrophile," for he ardently pleads the case for what he refers to as "the orphan stepchild" of our natural resources—water. Conservation of the land is pretty well understood but water, says Mr. Reid, "has been dammed and diverted, drained and polluted, stolen and wasted, with utter disregard of existing natural values, with blind unconcern for its biological functions and its public, aquatic and recreational values."

Existence of Fish Menaced

Reid is an engineer himself and is not unsympathetic with the great achievements of his profession. But his colleagues sometimes outrun their zeal and he appears perturbed lest postwar public works activities threaten our lakes and rivers, their natural beauty and all that is in them.

What he is fighting is the kind of engineering activity, stimulated by grants-in-aid from the federal government, which will damage the waterways and their inhabitants, flora and fauna. On the other hand, he is all for the encouragement of constructive construction which will work in the opposite direction.

He thinks we have overdone the damming; he questions the economy of reclaiming land at a great capital cost per acre with certain irrigation projects. These, Reid opines, likewise often destroy fish by cutting them off from their spawning grounds. He mentions the dams in the Columbia river which, he says, threaten a ten million dollar annual salmon take.

That is the effect of hydromania resulting from well-intentioned and unselfish but unwise use of the engineering art. He points out that anything which kills fishes and interferes with the nation's wildlife is interfering with one of the nation's

major industries. He estimates that the total expenditure in hunting and fishing, including licenses, equipment and other incidentals, reaches a billion dollars a year and therefore constitutes a major American industry and one which should be protected.

Reid also stresses the esthetic and recreational values destroyed in the building of great dams and reservoirs as well as by the pollution of streams.

POLLUTION

Health Peril

The security feature which has been emphasized in the present war when the bombing of dams has caused such destruction, is another argument seized upon by Mr. Reid. His specific example of this phase of the argument sent a shudder down my back when he offered as an illustration the construction of 14 major dams in the Potomac watershed which was strongly advocated recently. If this project had gone through, he told me, my home town and the seat of our government would have been made "extremely vulnerable to air attack through breaching of the big dams that would be immediately above Washington."

"The engineer's desire," says Mr. Reid solemnly, "to pour concrete in prodigious quantities, impound great areas of water behind magnificent monuments to engineering, dig ditches and canals, bore tunnels and otherwise remake the landscape of America, is quite irrepressible."

However, what he and his colleagues are now most concerned in eradicating is pollution and that, I think, will meet the approval of most people even if they won't go all the way with Mr. Reid concerning hydromania.

Protection against pollution, the proponents of the Mundt bill insist, "won't cost a thin dime" because the money saved by eliminating the need of purifying polluted water will more than make up for it.

Besides destruction of aesthetic and property values, it is pointed out that pollution is a growing menace to health. The Mundt bill would give the states every chance to clean up their own situations but, it is argued, "since streams flow by gravity without any regard for state boundaries pollution is logically and constitutionally a matter for federal control."

Provisions to take care of these various angles are included in the Mundt bill. Such measures in the past have been opposed by some communities which thought it was cheaper to dump their sewage in the rivers, and by industrial plants that felt the same way.

Although machines compete with humans and with horses and mules in this war, the dog, never before used officially by American forces, has become the competitor of mechanized devices.

A dog, by his sense of smell, can detect a strange presence at 500 feet. Up to October 1 of last year the army, coast guard and marines had used over 9,000 trained dogs. The first thing a K-9, as they are called, learns, is to be a one-man dog. They won't accept food from any but their masters nor will they allow anyone else to pet them. Then the training gets more complicated and includes even parachute jumping. But there is one thing that these otherwise clever animals cannot be taught, namely, to tell enemy troops from their own. This has one advantage, however—they don't treat a German wearing an American uniform any differently than if he weren't an enemy in disguise. Soldiers sometimes do.

Demand for farm products is likely to continue at present wartime levels throughout most of 1945. Regardless of the course of the war the demand for many farm products, at ceiling prices, may continue to exceed supplies in 1945.

Consumers' food costs in large cities in recent months have been slightly lower than they were in mid-summer. The index for November, 1944, was 136.5 as compared with 137.7 in August and the peak of 143.0 in May, 1943. Nonfood costs have been following a somewhat different trend.

BARBS . . . by Baukhage

The Russians had a chance to get "out to Berlin" before the rest of us in more senses than one. Until they could lick 'em they were smart enough to join 'em.

A chain is no stronger than its weakest link, and a chain-smoker's chain is no longer than the link he has to stand in to get the links to chain-smoke with.

The character of the Jap boy, says the Infantry Journal, is patterned after the carp. He is taught to fight his way everlastingly upstream. And waiting to catch him, they might add, is a Yank with a bayonet.

Now that there is a shortage of fat-back there will be a shortage of grease to turn in to get coupons to get fat-back with.

CLASSIFIED DEPARTMENT

Persons now engaged in essential industry will not apply without advance consent of available local United States Employment Service.

AGENTS WANTED

LADY WANTED in every community, both rural and city, to sell line of household necessities for her neighbors. Our line includes such scarce items as cheese and laundry soap. Liberal commission. General Products Company (U-S), Albany, Georgia.

AUTO BATTERIES

AT FIRST SIGN OF A COLD USE 666 Cold Preparations as directed WNU-M 7-45

When Your Back Hurts - And Your Strength and Energy is Below Par It may be caused by disorder of kidney function that permits poisonous waste to accumulate. For truly many people are tired, weak and miserable when the kidneys fail to remove excess acids and other waste matter from the blood. You may suffer aching backache, rheumatic pains, headaches, dizziness, feeling up tight, leg pains, swelling. Sometimes from kidney and early warning signs that something is wrong with the kidneys. There should be no doubt that prompt treatment is wiser than neglect. Use Doan's Pills. It is better to rely on a medicine that has won country-wide approval than on something less favorably known. Doan's have been tried and tested by millions of men and women all over the world. Get Doan's today. DOAN'S PILLS

It's Home, Sweet Home, for Vets

The first problem which will face the returning serviceman and one which is a necessary first step before he embarks on his postwar career, is a decision on the place in which he is to live. To this question, the great majority of the men have given the answer "We're going back home," according to a report by the army service forces. The survey shows that eight out of

every ten white enlisted men expect to return not only to the same region, but also to the same state in which they lived before the war. Only one in ten anticipates moving to another state; the remainder are still undecided. Negro enlisted personnel tend to be somewhat migratory. Only about two-thirds expect to go back to the same state in which they lived in civilian life.

YOU CAN'T BUY more in aspirin than the assurance of quality and purity guaranteed when you buy St. Joseph's Aspirin, world's largest seller at 10¢. Demand St. Joseph's Aspirin.

MUSTEROLE

SNAPPY FACTS ABOUT RUBBER

Rubber does not enter into the making of tents, yet the demand for military tents has reduced the manufacture of passenger car tires. Tire cord and yarn for tent duck are made with the same machinery.

In your car... B.F. Goodrich FIRST IN RUBBER

Beware Coughs from common colds That Hang On. Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal the tender, inflamed bronchial mucous membranes.

Which of his two wives will he come home to... Mrs. "Gay" or Mrs. "Glem"? Irritable, depressed moods are often related to constipation. Take Nature's Remedy (NR Tablets). Contains no chemicals, no minerals, no phenol derivatives.

ALL-VEGETABLE LAXATIVE. Nature's Remedy NR TABLETS. ONE WORD SUGGESTION FOR ACID INDigestION—TUMS

GOD IS MY CO-PILOT. Col. Robert L. Scott. WNU RELEASE

The story thus far: After graduating from West Point as a second lieutenant Robert Scott wins his wings at Kelly Field and takes up combat flying. When the war breaks out he is an instructor and is told he is too old for combat flying. He carries his case to several Generals and is finally given an opportunity to get into the fight.

CHAPTER XIX. But on the day when he finally got out on his way to what he wanted to do most, the Japs struck at Pearl Harbor. Ajax had just landed at Wake Island, and soldier that he was, he had reported to the Marine Commander for duty.

Ajax used to say that the unusual strength he demonstrated that morning was due to the heavy supply of vitamin pills he had taken. As the first bomb hit the runway of the field, he ran with the others for the door and the safety of the slit trenches on the outside.

Baumler got out of Wake Island the next day on the last clipper, but to join the AVG he was no longer going West. It was now necessary to go all the way back and around the other way, towards the East.

During the month of our battle of Hengyang, I saw Captain Baumler do some of the nerviest things I've ever seen any man accomplish. We had a few ships that had been strafed badly on the ground; some of them had been shot to pieces, and in others the engines or hydraulic systems had been damaged.

One of these was old Number 104, the ship that Ajax had been flying. The ground crew had worked on it for days, but whenever they'd have it just about ready to be taken back to the factory in Kunming for overhaul, the Japs would catch it again.

I was on the ground that day, and didn't see it. But I heard Ajax talking on the radio, and I heard his six guns when he caught one of the Zeros. Just a little later I saw the trail of black smoke that marked the enemy ship going down.

On his take-off from Hengyang, as he gave the ship the gun Baumler had felt a terrible electrical shock through his sweaty hand on the stick control. He couldn't turn the stick loose or the ship would have crashed in the take-off run; so he grimly held on.

couldn't wait—the Japs would be there in a matter of minutes. He tried a take-off with the current going through his arms, again and the engine spitting and sputtering—and at the end of the runway he still hadn't enough speed to get into the air.

But it wasn't all hard work and no play in China. Some evenings we used to sit in our cave down at Kwelin and listen to the Tokyo radio. They would give us reports on the missions that we flew to Hankow, Canton, and the cities near Lake Puyang Hu—Nanchang and Kukiang.

One night while we sat there calmly listening to the news and playing gin rummy, Tokyo news-analysts announced they did not think the American fighter force in China was large. True enough, said the radio, they had struck weakly at several cities, in their barbaric way bombing innocent Chinese women and children, and for this the American pirates would pay when they were prisoners of the Imperial Japanese Government, now fighting to liberate Asia for the Asiatics.

We listened to the usual "blah" without raising an eyebrow, until Radio Tokyo continued: "We don't think the American fighter force in China is more than three hundred ships."

There was a squadron that came over from Assam to work with us, part of another group from India. In this squadron there were some fine fighter pilots, one of whom was Lieut. Dallas Clinger from old Wyo-

Pilots of the China Air Task Force on the alert at Hengyang.

Clinger was another man who in years gone-by in the West would have been a great gunman like Tex Hill. Only Clinger wouldn't have cared whether he was on the side of the Law, the Mormons, the Church, or Jesse James. He just wanted to fight.

One morning Clinger was one of a formation of three fighters over Hengyang. His combat report read like this:

"I was flying on my leader's wing—Lieutenant Lombard—at 23,000 feet when we saw three enemy planes down below circling. There were larger formations reported around. Just then I heard my flight leader say: 'There are three stragglers—let's attack 'em.'" So we dove into them like mad. As I shot into the Zero on the right of the formation I saw that we were in the midst of twenty-four other Zeros, all snorting at us.

This was signed "DALLAS CLINGER—2nd Lieutenant—Almost Unemployed." What Clinger had really done was the greatest piece of daredevil flying that any of us had ever seen. Instead of diving away from the twenty-seven ship circus as the others had done, he had stayed and fought the old-fashioned "dog-fight" until the Japs just about took him to pieces from sheer weight of numbers.

When they straggled home they must have been the most surprised bunch of pilots in all Japan, for this crazy American with his heavy P-40 had done everything in or out of the book. He fought right side up and upside down, from 23,000 feet down to less than one thousand. As many Japs as could fill the air behind Clinger would get there and try to hang on while they shot; but Clinger wouldn't fight fair and stay there.

He was last seen after the unequal fight skimming over across the rice paddies, making just about 500 miles an hour, with some ten to twelve Zeros following. For some reason they seemed reluctant, as though they didn't know whether to run after Clinger or leave him alone. He came in for lunch with his ship

badly shot up by their cannon. But he had shot one of them down and had got another "probable."

Down Lingling way on another morning, Clinger went into an attack with his engine acting up. After the first contact with the enemy, he was forced to land, followed by two enemy strafers. As Clinger maneuvered the falling fighter into a safe landing, the two Zeros came down shooting at his rolling P-40.

Dallas from Wyoming got out on the wing to jump onto the ground, with his ship still rolling. Just then one of the Jap bullets went right through his seat-pack chute, passing exactly between Clinger's pants and where he sat on the parachute. He got so mad he jumped back in the cockpit and shot at two Zeros as they passed over his nose. After all, air-cooled guns are made to shoot while the ship is going two or three hundred miles an hour—but Lieutenant Clinger said he got in a pretty good burst from his grounded fighter before the six Fifties froze.

Johnny Alison had helped to train Clinger in the tactics of fighter pilots. In fact, Johnny used to fly with every man in his flight on his wing, at one time or another. In one training flight such as this he took Clinger up and they practiced attacking one another—"dog-fighting," the "pea-shooter" pilots say. Up there at nearly 20,000 feet they came at one another head-on, time after time, until the moment when, as Johnny told me later, he was sure Clinger was going to run into him.

Alison, who usually forced others to give way, had to dive under Clinger's P-40. They circled and tried again, and again Clinger kept right on coming, until, as the ships drew together at well over six hundred miles an hour relative speed, once more Johnny had to dodge, and the Wild Man from Wyoming went on over his head.

They landed then, and by the time Johnny had climbed out of his ship he had calmed down. Clinger came nonchalantly over. "Just in passing Alison said, 'That was pretty good flying, Clinger; you fly formation well and you look around okay. But you want to watch those head-on runs—you nearly hit me up there. Did you know that?'"

Clinger shifted the weight of his body back to both feet. With his chin out, he answered: "Yes, Sir, Major—I tried to. You see, you've been flying longer than I have and I know I'm not as good a pilot as you are. But, Sir, I knew I'd come closer to you than you would to me."

You can find the remains of a good many Japs in China, or somewhere down in the China Sea, who know that Clinger meant just what he said. He'd keep coming at them head-on and shoot them out of the sky before they got to him.

The battle for the defense of Hengyang lasted through August, but we didn't just sit there on the defensive. We rapidly took the offensive as our best defense, and kept it up until higher headquarters sent us a very classic radio:

"You either did not understand or did not receive my last radiogram to remain on the defensive. Repeat quote on the defensive unquote. Signed, Chennault."

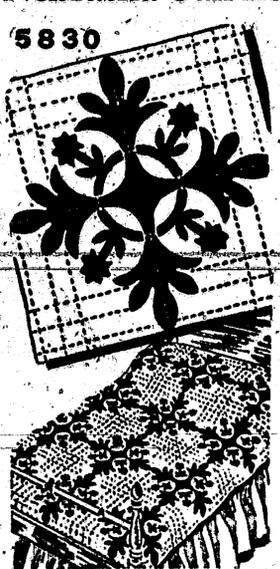

At Nanchang, on August 11, 1942, I shot down my fourth enemy plane that was confirmed. Though I hate the Japs with a passion, I felt sorry for that pilot, for he never saw me at all. But as I left his burning ship North of the runway that he had been taking off from, I thought of the boys in the Philippines and Java, and I wasn't so sorry.

I had dropped my five-hundred-pound bomb on the hangars, when in pulling out of the dive I saw Lieutenant Barnum, from Old Lyme, Connecticut, continue his dive on a Jap ship, and begin to fire on it. I looked below. There was dust at the far end of the Jap field where one enemy plane was taking off. I rolled over and dove, pulling out about a half mile behind the enemy at the moment he got off the ground.

His wheels had just begun to move to the "up" position as I got him dead in my sights and pressed the triggers. As the pilot died, his new 1-97-2 pulled straight up, then spun into the ground, the few feet it had climbed. I passed over it as the flames belched from the wreckage. I climbed for an enemy observation plane higher over Lake Puyang Hu, but the Jap outclimbed me, and though I fired at him several times from long range, he finally got away.

On this trip, Barnum had shot down one enemy ship, and Lieutenant Daniels, though unable to destroy his wing-rack fragmentation bombs, had strafed the field with his bombs hanging on. After the attack, this pilot had force-landed his plane in a rice paddy near Hengyang rather than ball out—and this decision to save the ship for spare parts had been made with the six frags still hanging from the faulty wing-racks. He got away with it, and Captain Wang was able to salvage the fighter.

SEWING CIRCLE NEEDLEWORK. Nebraska Oak Leaf Heirloom Quilt.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

SEWING CIRCLE NEEDLEWORK. 330 South Wells St. Chicago 7, Ill. Enclose 16 cents for Pattern. Name: Address:

Warning! WATCH OUT FOR SNIFFLY Head Colds. Head colds can cause much suffering. Don't suffer needlessly. Just put a little Vicks Vapo-Rol up each nostril. Relieves sneezy, stuffy noses. Also helps prevent many colds from developing if used in time! Try it. Follow directions in folder. Works fine!

Upset Stomach. Believed in 5 minutes or double money back. When an upset stomach and/or nausea, sour stomach, gas, heartburn, indigestion, or constipation, the fastest-acting medicine known for symptomatic relief—menthol like those in Hall's Tablets. No inactive. Believes brings comfort in a 5 or 10 minute period. Money back on return of bottle to us. No at all charges!

When winter winds cut like a knife... CHAPPED LIPS SOOTHED QUICKLY!

Cracked lips—so cruel, and painful! Caused with raw, bitter weather. Mentholatum soothes, relieves, and heals. Mentholatum acts medicinally: (1) Stimulates local blood supply. (2) Helps revive tightly cells so they can retain moisture. For sore hands, lips—Mentholatum. In jars or tubes, 30¢.

CLABBER GIRL Baking Powder. It's BALANCED... that's the answer. Balanced double action... for positive action in the mixing bowl... for gratifying results in the oven. You'll be Surprised!

BROWN ACTS OLD TODAY. DUE TO MUSCULAR PAINS! SORETONE soothes fast with COLD HEAT ACTION.

Naturally a man looks old beyond his years when he's sore from lumbago or other muscle pains. The famous McKesson Laboratories developed Soretone Liniment for these cruel pains—due to exposure, strain, fatigue or over-exercise. Get the blessed relief of Soretone's cold heat action! 1. Quickly Soretone acts to enhance local circulation. 2. Check muscular cramps. 3. Help reduce local swelling. 4. Dilate surface capillary blood vessels. Soretone contains methyl salicylate, a most effective pain-relieving agent. There's only one Soretone— insist on it, for Soretone results. 50¢. A big bottle, only \$1. MONEY BACK— IF SORETONE DOESN'T RELIEVE. McKesson makes it!
