

# INFLUENCE OF COLOR

By F. A. WALKER

YOU may declare to your intimates that you are weary of the monotony of life; that for some inexplicable reason you fall to find pleasure in diversions which only a few months ago gave infinite joy, and that altogether your existence is becoming a dismal phantom from which you would gladly run away.

This sort of ennui is common, but not alarming. No one seems to escape its weariness and defatigation, especially in the season of falling leaves, when the skies are flecked with gray clouds, the hills are bare and the award is devoid of brightness.

When the eye is entertained with glorious hues and the streams reflect

purple and gold, the soul is apt to forget that it is imprisoned in clay. So it sings silent songs from dawn to starlight, unmindful of captivity, in its delightful environment.

When the dull, leaden days creep over the steel-blue hillsides, and the cold winds whip the naked branches of the trees, there is in all of us a natural inclination to become dejected and sad-hearted.

The reason for this mental state is that we are unconsciously influenced

by color. The duns, bays and bistres for some psychological cause are depressing, while, on the other hand, the reds, greens and yellows are cheering, calling us away to happy realms and delightful visions.

We all know how we are stirred to our inmost being by a gorgeous sunset, a garden of beautiful blooming flowers, or an orchard when the verdure is new and the trees are laden with waving pink and white blossoms, and the atmosphere is tinged with subtle hues of violet.

What is there in our winter home life that gives us more acceptable cheer than the kindly blaze on the open hearth?

Who does not enjoy sitting before the orange flames to give himself or herself up to pleasant reflections, while the shadows play hide and seek upon the walls and the snowflakes peit the crystal pane!

It is not so much the genial warmth that we relish as the elusive colors. If you doubt this, blindfold your eyes and note how quickly your pleasure steals away and leaves you groping in a land of gloom!

# TWO QUEENS RESULT OF TIE VOTE

Two beauties, Mona Rico of Mexico City (left), and Dorothy Day of Anaheim, Calif. (right), were tied in the vote for the honor of being Queen Valencia at the ninth annual orange show at Anaheim. So it was decreed that they should share the throne.

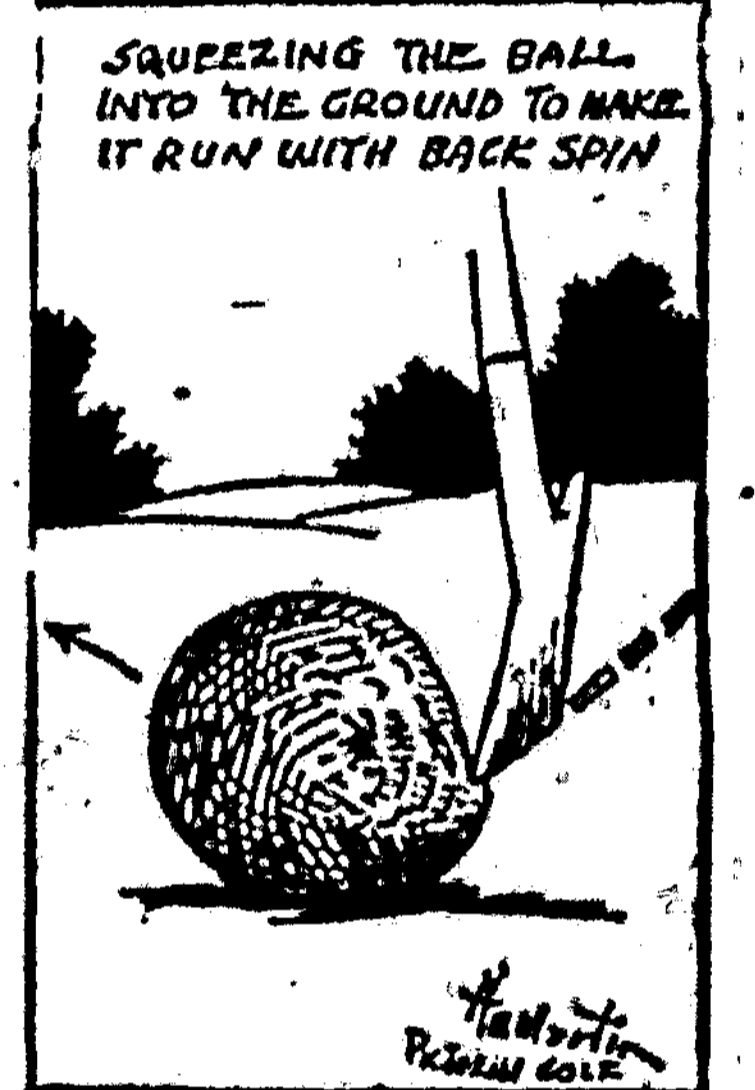

# PICTORIAL GOLF INSTRUCTION

By H. B. MARTIN

## Imperative to Keep the Head Down

IT IS a cardinal rule in golf to keep the head down in all shots. It is almost absolutely imperative that one do this in playing a mashie pitch. The main part of an approach shot if it is over a trap or water is that it goes high enough to clear everything. If the head is not kept down there will be a tendency to bring the club up also. This must not be done, as the club in order to make sure of picking up the ball must go forward. This permits the loft on the club to take care of the height of the flight. One may take the eye off the ball so long as the head is held in position, but it is not wise to attempt this.

## Pinch Shot a Valuable Asset

A VERY valuable shot to know is the squeeze or pinch shot where the ball runs quickly along the ground with back spin. This shot is made by hitting the ball towards the top and squeezing it into the ground. It will jump slightly with a lot of back spin and run straight to the pin. Those who play this shot find it useful on some courses. Those that are hard baked are preferred but soft greens are more for pitching directly to the hole. The shot must be played a lot to understand it and gauge the distance. Once the distance is properly gauged it is easy to make and a very useful shot. However, it may be said that the best golfers do not use this shot except on rare occasions.

## In Putting, Keep Weight on Left Foot

WHEN Walter Hagen sets himself for a long putt, one watching from the edge of the green has the feeling that he is going to sink it. Walter certainly looks businesslike; he is at least prepared to give the ball a chance. He may have faults through the green, but making a chronic habit of stopping short of the cup is not one of them. Notice any photograph of Walter in a putting stance and you will see that he is posed with the weight on the left leg as it should be. This means that there will be no underpin on the ball. The ball will run without a drag, especially if it is played off the left heel.

## FOR THE GOOSE—

NOWADAYS the hardest thing for a girl ain't pretendin' to know what she don't, but accountin' for what she does.

It's all right bein' haughty, if you enjoy playin' solitaire.

If you're afraid to suffer, you suffer from bein' afraid.

## FOR THE GANDER—

If you're lucky you have a lot of friends. If too lucky, a lot of enemies.

You might surprise a woman with a kiss, but never on the mouth.

Tears ain't the earthquake most men think they are; they're only the breakin' up of a spell of bad weather.

# Evening Story for the Children

BILLIE BROWNE, who had been given the power by Mother Nature to understand her children, thought he would like to talk to a beaver.

He went to a beaver home in a marsh and, sitting near the great Beaver establishment, he talked to little Master Brown Beaver.

"I was one of four," said little Master Brown Beaver. "My mother was barely two years old. She was what you would call a young mother, but that is the way with Beavers.

"Their mothers are young and their daddies are young, too; but it does not mean they act like children.

"No, they grow up and become wise and solemn and of full growth by the time they are two years old. So it is with me.

"I am a good worker—we all like to work, to build and to do what we can.

"And I'm a strong beaver, just as all the members of our family are strong and healthy.

"I eat good, substantial meals of the bark of willows and small spruce.

"These make me strong. Then, too, it doesn't make any difference, really, about the trees, as these trees, they say, are of little use and of little value as 'timber.'

"That is what the authorities say, and authorities, I have been told, know what they are talking about. They wouldn't be authorities if they didn't.

"But I must go on with my work.

It is getting late, and when it gets late I get busy. For we like to work at night best.

"I've some relatives in the zoo, too, I'm told. They are friendly and affectionate, and make good pets. They

"We're All Hard Workers."

work hard, they and their help the zoo people.

"Sometimes they do work which is not expected of them and which isn't just the work that is wanted, but no matter. We're all hard workers.

"So I mustn't talk too much, but must really act instead.

"I've talked a great deal for a beaver.

# Superstition About Colors

By H. IRVING KING

THE color of the first butterfly you see in the spring indicates the color of a dress you will have in the course of the year. That is a widespread superstition, both in this country and Europe. In some sections they say the new dress will be given you. In some sections they say that you must bite the head off the butterfly and throw it over your shoulder in order to be sure of the new garment. Another variant is that when you see the first butterfly of spring you must wish for a new dress and you will get it.

There are many other superstitions

Herrick did this very thing, not for personal gain or glory, but for service to humanity. For this remarkable service he will always be remembered and honored. "This that he hath done shall be told as a memorial of him."

(C) 1925, Western Newspaper Union.

with regard to the butterfly based upon its ancient symbolism of the soul and as an insect into which souls transmigrate. Thus the Solomon Islanders frequently choose a butterfly as the creature into which they wish their souls to pass after death and in some sections of India the butterfly is supposed to contain souls in their last incarnation. In England a red butterfly is always killed in the rural districts as it is supposed to contain the soul of a witch. But the superstition with regard to the butterfly and a new dress arises from no such purely mystic conception. It would appear to be more largely materialistic and based on analogy, as the butterfly comes forth in the spring in a new dress. There is, of course, the ancient, primitive idea that mystic is a mystic creature entering into the superstition; otherwise it would not be able to thus control the future.

# Alpine Troops Awaiting Blessing by the Pope

Twenty-five thousand Alpine troops of Italy assembled in the pinn of St. Peter's in Rome to be blessed by the pope.

# Some Summer Desserts

By NELLIE MAXWELL

THERE is no pie which is any more popular than the fresh cherry pie. Cherries are a favorite fruit for puddings as well.

## Cherry Relay Paly.

Roll a rich biscuit dough very thin, spread with canned, drained cherries, adding more sugar if needed. Roll up like a jelly roll, press the edges close together and fold in the ends. Arrange in a buttered baking dish, pour around it the juice from the canned fruit, using two cupsful, adding water if there is not enough juice. Sweeten with half cupful of sugar and bake in a brick oven for 45 minutes, heating three times during the baking. Serve with cream if there is not enough sauce.

## Fresh Cherry Duff.

Mix and sift two cupsful of flour with four teaspoonsful of baking powder and one teaspoonful of salt. Rub in one tablespoonful of butter, and when well mixed add three-fourths cupful of milk. Add two quarts of cherries, all stems and reserve the

juice; add two cupsful of sugar and turn into a baking dish. Cover with the dough mixture, patting it down in shape. Steam 50 minutes. Serve in the baking dish. Thicken the juice with arrow root, add a little butter and sugar if needed and serve with the pudding.

## Christina's Pudding.

Use the recipe for a plain custard or cottage pudding and serve with: Strawberry Sauce.

Cream one-half cupful of butter, add gradually one and one-half cupsful of confectioner's sugar and slowly, two cupsful of strawberry pulp and juice, stirring constantly. When well blended add the stiffly beaten white of one egg.

## Poached Egg Dessert.

Cut rounds of sponge or any good pound cake, place on top of each round one-half of an apricot cut-side down, pour over some of the canned syrup and place around the fruit a row of piped whipped cream slightly sweetened and flavored with almond.

# ARTIE

His Adventures in Love, Life and the Pursuit of Happiness  
By GEORGE ADE

## Artie and the High Hat

ARTIE and Miller had gone to a matinee on Saturday afternoon. They seldom did this, but it was cold and cloudy and they wanted to stop thinking about the world in which they were living.

After the second act they had walked out to the lobby, where a pale-faced young man in a uniform keeps saying, "No smoking, please"—and everybody smokes.

While they were standing there, telling each other what was wrong with the drama, who should come floating in but Bancroft Walters.

Bancroft Walters is the second son of LaGrange Walters, who manufactures a superior kind of roofing and has never known a losing year.

Bancroft goes to a great many parties, and probably belongs to that useful division of the human race known as "dancing men." He has a desk in his father's office and it is just as good as new. He attended college for two years, and then departed because the faculty felt that it wasn't any use trying.

When Bancroft saw Miller and Artie he smiled beaming and said, "Hello, men."

"Why, how do you do, Mr. Walters?" replied Miller.

Artie said nothing but looked something.

Bancroft bought his seats and then walked over to Artie and slapped him on the back.

"I haven't seen you for a long time, Artie."

"I seen you since you seen me," replied Artie.

"Is that so?"

"Yes, and I want to tell you something, Banny. You're nothin' but a two-spot. You're the smallest thing

but did you ever get the worst of it in such a way that you couldn't come back at the time, and yet you was so sore that you could o' cried? Well, that was me."

"I'm surprised."

"Wasn't it? Why, I went to school with that guy out on the South side when my old man had a job in the foundry and old Walters was just beginning to get a little dough. The family didn't put on such dog in them days. But then, there's no roar comin' on that, because the old man's still as democratic as peanuts, and this same two-spot's got a slater that can have my seat in the car any time she comes in."

"I thought this fellow was on the up and up. I've known him to speak to ever since we learned to smoke cigarettes together back o' the car barns. Here not more'n six months ago he comes into a cabaret where I was settin'. He was with a mob of debutants and purty soon he comes over an' touches me for half a yard. Now, you know you can't go up and bone a stranger for that much, can you? He knew me well enough to get the fifty."

"Did he pay it back?"

"Sure he did. I ain't sayin' he's crooked. I'll tell you when he give it back to me. It was one night out at the boat club when I was havin' some bouts there. I brought over a handy boy from the West side to put him against a little fellow from a boxin' school. What I was goin' to get at was that Banny was there."

"Who's Banny?"

"That's his name. We used to call him that when he was a kid. Well, he was out there that night bettin' all kinds of talk, and you'd thought I was his long lost brother. He stood around the corner where I was handlin' my man, and it was 'Artie' this and 'Artie' that, all the time. He loved me that night. Mebbe that's because he had a few under his belt, but anyway it went with me. I thought the boy was all right."

Artie paused in his story and put a cigarette into his mouth. Miller reached into his pocket for a match, but Artie shook his head.

"This is how I found the streak o' yellow in him," said he. "One after-

# FARM STOCK

## SHIPPING LOSSES MAKE LARGE ITEM

### One of Big Faults Is Overloading Cars in Summer.

Losses sustained by swine producers of the United States in marketing their hogs amount to the astonishing sum of more than three million dollars yearly. This tremendous waste can be charged directly to the carelessness of shippers and the negligence of transportation companies. In the language of the day, "Something ought to be done about it."

"One of the biggest factors in causing these heavy losses is the overloading of cars, especially in hot weather," says E. E. Ferrin of the division of animal husbandry of the University of Minnesota. "This fault is chargeable chiefly to the carrier which compels the shipper to pay freight on a greater weight than can be loaded without risk. Cars in need of repairs cause crippling or damage to hogs in transit. Holes in floors, nails projecting on the inside of cars, cleats on floors, and unsafe doors, are all minor causes of loss which could be remedied by the railroad company. The carriers are further at fault in delivering unclean cars for reloading, although an order of the Interstate Commerce commission expressly provides that cars must be cleaned."

"But the carriers cannot be held for all the loss. The disposition of the shipper to take a chance induces the practice of overloading, improper bedding of cars, and neglect to remedy minor defects in cars delivered to the loading station. In shipments of mixed cars of cattle and hogs, flimsy partitions which break down result in losses. Proper bedding of cars will save much loss. In hot weather sand soaked with water is by far the best material. In very cold weather losses could be prevented by tacking one width of building paper along one side of the car near the floor. This protection is necessary only on the side of the car which will be toward the north as the car is moved to market. Most of our live stock goes to market in an eastward or westward direction."

## Render Assistance to Sow When Farrowing

At farrowing time the herdsmen should be on hand to render assistance if necessary, but should otherwise not disturb the sow. In large herds it has been found an exceedingly profitable plan to have an experienced man nearby during the night at this time to inspect the sows every three hours. The farmer with only a few sows will find that a few night trips to the hog house at farrowing time will save many a litter, and prove a most profitable investment of his time and energy.

In the case of heavy, clumsy sows, or those which are very restless at farrowing time, it is a good plan to separate the pigs from the dam by placing them in a warm box or half barrel as they are farrowed. Sows properly handled before farrowing will not usually resent such separation. When the sow has become quiet, and as quickly as possible after farrowing is over, the pigs should be, one by one, carefully replaced at a nipple and watched until their safety is assured. If the sow is very cross and irritable, it may be necessary to keep the pigs away from her for a longer time, returning them to nurse every two or three hours. A chilled pig may be revived by immersing it up to the head in water as warm as the hand will bear.

## Live Stock Facts

Remove the ram from the flock as soon as the breeding season is over.

Non litter methods grow hogs for market when prices of pork are most profitable.

Hogs should sell on profitable levels all through this year, judging from the supplies available.

Good box men put in all the time possible with their herds, and often are able to nail what might be future trouble right at the outset.

Buttermilk, or skim milk cannot very well be compared to barley because barley is a dry feed containing only about 10 per cent moisture while buttermilk and skim milk contain about 80 per cent of moisture.

Young pigs prefer their barley and oats ground. Usually there is nothing to gain by grinding corn.

Buttermilk that is free from dilution with wash water from the churn is practically equal pound for pound to skim milk for feeding to hogs.

The farmer who keeps 35 brood sows and averages four pigs to the litter can hardly compete with the farmer who keeps 25 sows and averages eight pigs to the litter, 200 pigs being produced in each case.

### Says Dresses Caused Cold

Short dresses worn by some of the maidens of Buchan, Czechoslovakia, were responsible for the severe cold spell in Europe. So declared the preacher of the Buchan church recently. He announced from the pulpit that a spirit appeared to him and explained about the weather and the dresses. His pious congregation accepted this interpretation of the phenomenon.

### French and American Cities Closely Linked

An American city was officially represented at the impressive ceremonies held in Orleans, France, in celebration of the five hundredth anniversary of the raising of the siege of Orleans by Joan of Arc.

The city is that which the French colonists of Louisiana founded in 1718 and christened La Nouvelle Orleans.

The two cities of Orleans, old and new, have long maintained friendly relations. On the two hundredth anniversary of the founding of New Orleans her sister in France took part in impressive ceremonies, and in the following year received from New Orleans a bronze medal and later the embroidered silk flag of the city. The flag now hangs in the Hotel de Ville at Orleans. On anniversaries of the battle of New Orleans, old Orleans takes the flag out and flies it from the rooftop.

W. N. U., DENVER, NO. 23-1929.

A poem in the mind saves stamps if it is kept there.

Many habits that are not good for men do not kill them.

"I've Got a License to Give You a Bust in the Nose."

in the deck. Say, I see pan-handlers moochin' around for hand-outs that was princes of Wales alongside of you. Now, I'll put you hep to one thing: I want nothin' to do with you, becuz I've got your number."

"I insist upon an explanation." Bancroft was frowning fiercely, but also he was very red.

"You know what I mean. You can't high hat me and then come around and give me a message. Not in a billion! I tell you, you're a two-spot, and if you comes into the same part o' town with me there'll be a cloudburst and you'll be all wet, too?"

"I've got a license to give you a bust on the nose."

Walters said, in a voice trembling with rage: "I'm not going to have any trouble in this kind of a place."

Then he turned and walked away with the best show of dignity at his command.

"What made you act that way?" Miller demanded.

"Do you know that bird?"

"Well, I've met him."

"Yes, but you don't half know him. I ought o' socked him before he opened his face."

"What's the trouble between you two?"

"Oh, let's let it go. He knows, though. He knows. And I think he'll remember two or three things I told him."

They did not enjoy the last act of the play.

Artie was still stammering and he was also worried to think that he was in wrong with Miller.

As they were leaving the theater Artie said: "I think I'll just tell you why I've got it in for that lad. I ain't stuck on tellin' it, for it made me look like a sap."

"I couldn't imagine what was the matter," said Miller. "Walters always seemed to me to be a nice sort of fellow—that is, harmless."

"Harmless? He ran over me, just like a truck. Ooh! He made me feel like a tramp. Say, Miller, if I was to leave his body on the railroad tracks I couldn't fetch even. He sure scared me up. Now, this is under your bat-

noon the boss sent me out to Grand Crossin' to see a man. I stayed for dinner out there and was comin' in on the train along towards eight o'clock. At one o' them stations out there, here comes a whole crowd o' people—a lot o' swell girls and their boy friends. The car was nearly full and I was alone in a double seat, see? A girl comes runnin' down the aisle and sets down right across from me and says, 'Hurry up and grab this place.'

"Then who comes up and drops in to the seat with her but Banny, understand? I'm readin' the paper, but I drops it and makes a horrible play. I lifts my kelly clear o' my head and I says: 'Good evening!' Say, he was four feet away. Say, it was just like you there and me here. This queen with him sees me make the play and kind o' giggles. Mebbe I didn't do it right."

"But him—he turned around sideways in his seat and begins chinin' her and never sees me at all. Course, you couldn't expect him to. I was nearly three feet away and lookin' right at him."

"Miller, this is straight, so help me. He threw me down. He'd never seen me before. I was groggy. Never did I get it harder. Talk about a hook to the jaw!"

"It was a confounded shame," said Miller, warmly.

"Say, Miller, am I a vag? Am I fit to ride on a train with other people? Would a man ruin himself by speakin' to me? Now, I didn't expect no knockdown to his girl. I don't trot in her class. But to think of that onion high hatlin' me because I spok'to him. That's what burned me up! I won't forget it—never. When they find him floatin' in the river that's the time the cops want to arrest me."

"Evidently a mob," said Miller.

"Well, I didn't see him again till today. You heard what I said. At that, he's got the best of it. I never will be able to give him the right kind of a comeback for what he done to me that night."

(By George Ade)

### Mysterious Jewelry

Little Betty was very fond of rings, and her fingers were always bedecked with all sorts of them. One day after she had visited her aunt she told her mother that she wanted a ring just like auntie's. When asked what kind of a ring auntie wore, she replied, "A musical ring."

"A musical ring," inquired the mother, "and what kind of a ring is that?"

After turning this over in her mind without a solution, mother got the aunt on the telephone, and much to her amusement learned that auntie was wearing a "band" ring.

### Always Worn Out, Too

### OLD FOLKS SAY DR. CALDWELL WAS RIGHT

The basis of treating sickness has not changed since Dr. Caldwell left Medical College in 1875, nor since he placed on the market the laxative prescription he had used in his practice.

He treated constipation, biliousness, headaches, mental depression, indigestion, sour stomach and other indispositions entirely by means of simple vegetable laxatives, herbs and roots. These are still the basis of Dr. Caldwell's Syrup Pepsin, a combination of scana and other mild herbs, with pepsin.

The simpler the remedy for constipation, the safer for the child and for you. And as you can get results in a mild and safe way by using Dr. Caldwell's Syrup Pepsin, why take chances with strong drugs?

A bottle will last several months, and all can use it. It is pleasant to the taste, gentle in action, and free from narcotics. Elderly people find it ideal. All drug stores have the generous bottles, or write "Syrup Pepsin," Dept. 33, Monticello, Illinois, for free trial bottle.

Hoops and Huggy

Blinks—Jackson is so old-fashioned. Jinks—Say, when that bird starts planning a vacation trip he still hunts up a time table instead of a road map.

**SYNTHETIC RED BLOOD POSSIBLE AS CURE FOR ANEMIC CONDITION**

Munich, June 6.—The recent production synthetically for the first time of haemin, the principal constituent of red color in blood, has stirred medical circles in Germany with hope for future accomplishment.

Haemin carries iron to the tissues. It also carries the indispensable oxygen, without which higher organisms cannot live. It is one of the most important of all elements in animal vitality.

The synthesis was achieved after 17 years of endeavor by Dr. Hans Fischer, professor of chemistry at the Munich polytechnic. While for the moment the discovery is considered of purely theoretical value, Professor Fischer and many other German scientists see in the synthetic production a valuable means of enlightenment on the chemical composition of haemin.

Many believe that Fischer's synthesis may pave the way to determining a remedy or cure for anemia and for carbon monoxide poisoning. Anemia is caused by a diminution of haemin in the red blood corpuscles. The gas poisoning is caused by carbonic acid gas entering the blood. There, because it has a greater affinity for haemin than has oxygen, it displaces and prevents the normal process of oxygen use.

For some time a non-synthetic haemin has been made in factories from ox blood, but the value of the chemically made product is its greater purity. Knowledge of exactly all the substances composing the synthetic article is highly suited for the precise measurements required in the delicate tests whereby human uses are sought.

In his successful synthesis, Professor Fischer first split a molecule of haemoglobin into a colorless albumen, called globin, and an iron-carrying haemin. The globin continues to be a comparatively unknown substance, but the haemin can be resolved into various chemical groups known as porphyrins.

Fischer and his assistant found various synthetic methods for making such of the porphyrins as are most closely allied to haemin. Then they produced a dextro-porphyrin to which acetyl was added. Acetyl is a chemical of the alcohol group. After the acetyl step the desired haemin ultimately was derived.

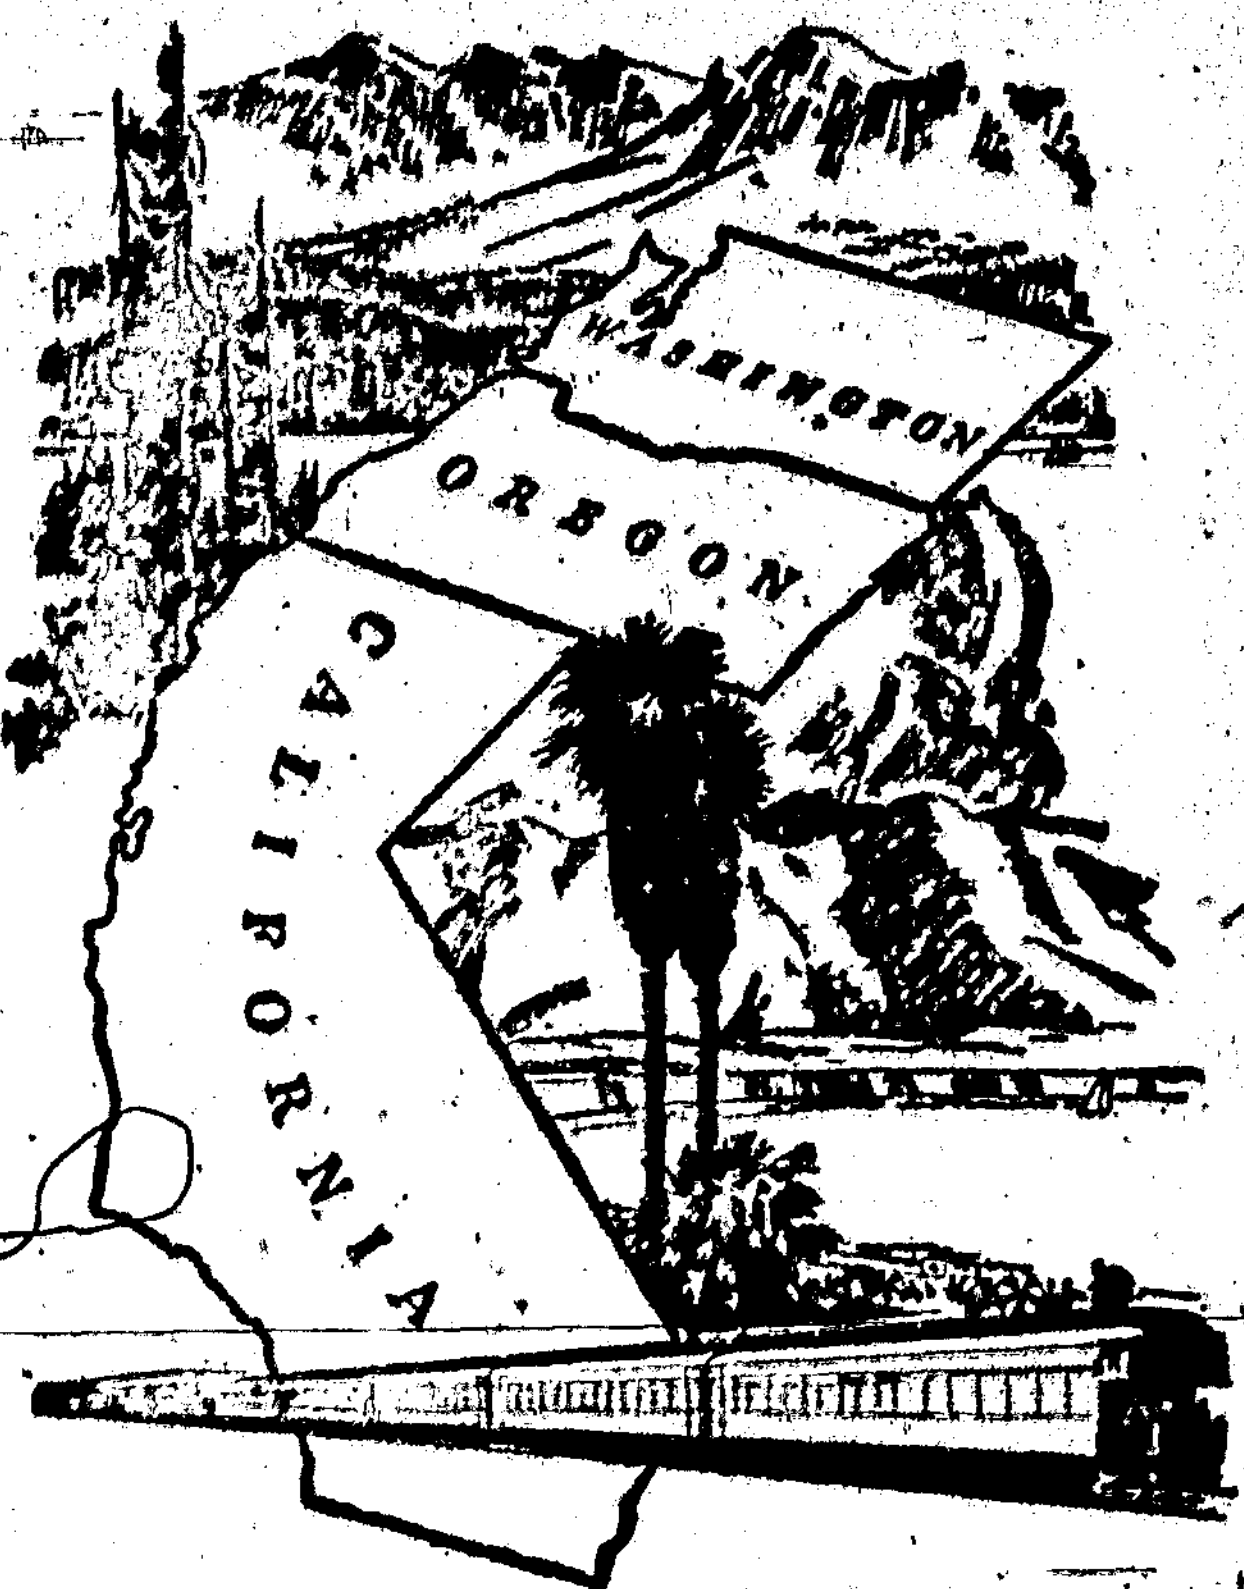

**NEW WOOD PRESERVATIVE TO SAVE MILLIONS FOR AMERICAN INDUSTRY**

New York, June 1.—Announcement of the development of a new wood preservative, which will add many years to the life of wood and which will ultimately save American industry millions of dollars annually, was made yesterday by the Western Union Telegraph Company. This preservative, Zinc Meta-Arsenite, was developed by Dr. Leo Patrick Curtin, Chemist of the Telegraph Company, after several years of research. Public announcement of the preservative by the Telegraph Company has been withheld pending development of commercial facilities for producing it, and completion of various tests by which the effectiveness of the process has been definitely established.

"The economic importance of this discovery can best be appreciated when it is realized that at least 16% of all the timber used in this country each year goes to replace wood that has decayed in service," a statement issued by the Western Union pointed out. "Zinc Meta-Arsenite, which is commercially known as ZMA, has properties possessed by no other wood preservative. It is applied by means of a water solution, which is non-corrosive to iron and steel, and penetrates wood easily. Having been deposited in wood, the preservative is henceforth insoluble in water and cannot be leached out of the wood by rain or other weathering influences. It, therefore, is more permanent than any material which has heretofore been used to prolong the life of wood. Furthermore, it is highly toxic to decay organisms and insects. ZMA produces no change in the color, appearance or physical characteristics of wood, and wood treated with it can be painted as satisfactory as untreated wood. We are already obtaining thousands of telegraph poles treated with Zinc Meta-Arsenite, and we believe its use will save us millions of dollars in the next few years."

Dr. Curtin, internationally recognized expert on wood preservation, has studied many different types of wood destroying fungi. His researches have definitely established the fact that Zinc Meta-Arsenite will add many years to the life of wood. In fact, his work indicates that ultimately the increase in life will be greater than that affected by any of the other, present day, more expensive preservatives.

The new preservative will prolong the life of timber used in any climate and under practically any conditions. It is admirably suited for treating railroad cross ties, pole line timbers and lumber for general construction. It furnishes permanent immunity to attack by decay organisms and insects. Wood treated with it, being palatable, meets all requirements for building and construction lumber. It is especially suited for use in the South and in tropical countries, where the destruction of timber by decay and insects is excessive.

**Low Fares to Pacific Coast**

Make the Pacific Coast your vacationland this summer. Los Angeles, San Diego, world-famous beaches and resorts. Then on to Santa Barbara, San Francisco and the Evergreen Playground of the Pacific Northwest. See the whole Pacific Coast at low cost. Here are some examples of the low roundtrips, return limit Oct. 31.

**The Livestock Situation**

There appears to be a continued firm undertone in the beef cattle market, as every indication still points to a continued period of light supplies on the western markets. Feed conditions in California this year have been disappointing, with the result that the Pacific Coast markets did not have the usual extremely heavy supplies of grass-fat cattle marketed in May that usually occur. June receipts are likely

to be rather light for this season of the year, and the trade is showing a disposition to quickly buy up all decently fleshed steers. On the other hand, the poor feed conditions have forced some cattlemen to ship to market a great quantity of half-fat and plain cattle which are, of course, not popular with the meat trade. On this class of material, the demand has been rather narrow and buyers are slow to take hold of such stock.

Seven days without food makes one weak.

General Car Tires

TEXAS AND SINCLAIR GASOLINE

MIKE BARNETT, PROP.

Thin cattle are still selling relatively high, in the opinion of cattle feeders, and all of this and half-fat stock is going into killer channels. There seems to be a considerable amount of grain stubble fields available for short pasturing, supplemented with cottonseed cake, but with money rather scarce and interest rates higher than normally, those who ordinarily might be buyers for finishing purposes are not showing a disposition to buy.

There seems to be no real indication of any material increase in cattle production in the entire country. This is particularly true in the western states, where range feed is none too satisfactory, particularly in the cattle breeding states, such as Arizona and New Mexico. Then too, cattlemen are backward about paying prevailing prices for breeding cows and heifers, because of both scarcity and competition from meat distributors, are relatively high. Coupled with high money rates, the situation does not appear to be conducive to increased beef production. Southwestern cattle breeders who are fortunately situated as to feed are showing a greater disposition to hold back their female calves and yearlings but this is not being done on a large scale, and even if it were, it would, of course, take another two or three years before the young stock would start produc-

ing calf crops. All in all, the beef situation is on a strong basis. There appears to be no thought in the mind of anyone in the trade of any lower scale of beef values for sometime to come. On the other hand, it must be borne in mind that the value of beef cattle on the market must always depend upon the ability and willingness of the consumer to pay. Further, beef prices, as ever, will continue to be regulated to a great extent by competition from other foods, including other meats, and all sorts of vegetables, fruits and cereal foods. The human system requires just so much food, and if it is filled with other products, there will be just that much less beef consumed. Beef cattle producers realize, however, that in due time, our beef supply will again be built up to a normal supply. With this thought in mind, actual steps are being taken to popularize beef through a comprehensive and well planned advertising and publicity campaign, but it seems essential that serious consideration should be given to quality products. The hog market also seems to be on a strong footing and with prices even now on a relatively high plane, there are many in the trade who firmly believe that the late summer and early fall months will see hogs on a higher plane. The lamb market has held up well this season, in spite of great increased supplies. With good feed prospects in the big lamb producing sections in the Inter-mountain country and the Northwest, there seems to be a general feeling that lamb may be a cheaper meat than beef or pork this year. Due to sound production ideas and comprehensive advertising and publicity carried out by the wool growers, lamb is no longer a specialty and the beef and pork markets will, as a result, feel the effect of competition from lamb more than recent years.

**NOTICE OF SPECIAL MASTER'S SALE**

Notice is hereby given that under and pursuant to a decree of the District Court of the Third Judicial District of the State of New Mexico within and for the County of Lincoln, in Tax Suit No. 241, wherein the State of New Mexico is Plaintiff and Mrs. Lydia Goff

Defendant, which said decree was rendered on the 8th day of August, 1928, adjudicating the amount of taxes due on the property herein described and ordering the sale of said property, I will on the 12th day of July 1929, at the hour of 9 o'clock in the morning of said day, at the front door of the Court House, in Carrizozo, New Mexico, offer for sale at public vendue and sell to the highest bidder for cash, subject to the approval and confirmation of the Court, the following described property to-wit:

Southeast Quarter of Section Three (3); North Half of Section Ten (10) Township Five (5) South of Range Eleven (11) East, N. M. P. M.

ADDITIONAL LOCAL

Mrs. Ira Greer made a trip to El Paso this week.

Mrs. George L. Strauss and children drove to El Paso last Saturday.

C. E. Thornton, formerly a resident of Carrizozo, came in this week from Breckenridge, Texas.

Mrs. Rebekah Tignon returned Monday to her home in El Paso after a week's visit with friends here.

Mr. and Mrs. Slater Hughes have gone to Alamogordo, where Slater will run for a month on the Cloudercroft branch.

Mrs. Callie Kahler, one of the old residents of Carrizozo, now living in El Paso, came up Monday for a visit with friends.

Mr. and Mrs. L. B. Crawford drove to Tucumcari Wednesday. Len is another of the boys who run into Carrizozo now, when he formerly ran out of it.

Rev. T. V. Ludlow went this week to meet his daughter, Miss Merry Elma, and bring her home. Miss Mary Elma has been attending College at Abilene, Texas.

Mr. and Mrs. A. W. Varney came down from Corona Sunday and drove over to Ruidoso that day. Rev. and Mrs. F. C. Rowland accompanied them to the mountains.

Morgan Reiley and Emil Anderson, both former Carrizozo boys, now on the road as tobacco salesman out of El Paso, were here this week, putting up advertisements and calling on dealers.

Mrs. Rufus Hughes and children spent the first part of the week in El Paso. They make an addition to the families who left here, or are preparing to leave, because of the inconvenient layovers at this end of the line.

Supt J. M. Helm and H. J. Garrard left yesterday for Elephant Butte, to return Sunday. Hiram will, no doubt, regale us with some big fish stories, when they return, but it's difficult to think of Supt Helm as an enthusiastic disciple of Isaac Walton.

Mrs. J. T. Dolan, of Omaha, Nebraska, and Mrs. J. A. Putnam, Columbus, Nebraska, arrived this week. The former is Pat Dolan's mother, and she may remain throughout the summer. The latter is Pat's niece who will be here a period, how long she has not determined.

Mrs. Alice Roberts and daughter, Mrs. Anna Roberts, left Tuesday morning of last week for Oakland, California, to be with two of the boys, Bert and Pink Roberts. The elder Mrs. Roberts expects to remain on the coast during the summer, while her daughter's stay is indefinite.

Mr. and Mrs. Frank J. Sager drove to Roswell and back Tuesday. They left again yesterday, going to Santa Fe to meet their daughter, Miss Lorena, who comes from Denver to spend her vacation with homefolks. The Spence children, Virginia and Charlie, will also return with their grandparents.

Judge Hewitt, mention of whose injury three weeks ago was made, is reported, by many friends who have visited him at White Oaks, to be improving. Almost daily friends from here drive up to see how the old veteran is getting along and bring the cheering news that he is making a winning fight, and all hope to see him out soon.

Will G. Thornboro and son Don came in last week from Ganton, Illinois, and are located for a good part of the summer, at least, in Nogal Canyon. Bill's hair needs bobbing—yet we'd hate to suggest it. The passage of several winters over his head, however, has frosted Bill's locks but little and but for the son, who is a fine, upstanding young man, the father might be taken for a colt himself.

Notice of Special Master's Sale

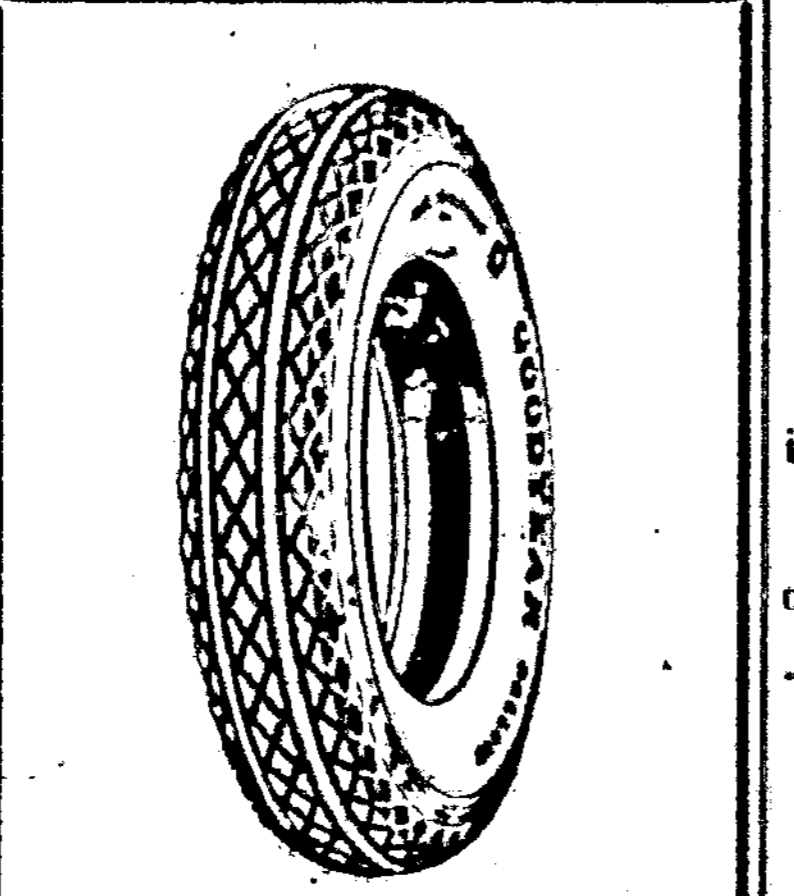

Notice is hereby given that under and pursuant to a decree of the District Court of the Third Judicial District of the State of New Mexico, within and for the County of Lincoln, in Tax Suit No. 76, wherein the State of New Mexico is Plaintiff, and Herman Conshbruch, et al., Defendants, which said decree was rendered on the 21st day of June, 1928, adjudicating the amount of taxes due on the property herein described and ordering the sale of said property, I will on the 12th day of July, 1929, at the hour of 9 o'clock in the morning of said day, at the front door of the Court House, in Carrizozo, N. M., offer for sale at public vendue and sell to the highest bidder for cash, subject to the approval and confirmation of the Court, the following described property, to-wit:

Beginning at a point known as the quarter section corner on the west boundary of Section 12, Twp. 10 S Rge. 12 E., and running thence 1320 ft. E.; thence 932 ft. N.; thence 28 ft. S. 70° 30' E.; thence 516 ft. N. 15° 30' E.; thence 235 ft. W.; thence 458 ft. S. 10° W.; thence 368 ft. N., 74° 30' W.; thence 350 ft. N.; thence 250 ft. W.; thence 125 ft. N.; thence 350 ft. W.; thence 785 ft. S.; thence 200 ft. W.; thence 660 ft. S to place of beginning, containing 35 1/4 acres, more or less. Variations in all courses 13° 30' East.

Notice is further given that the amounts to be realized from said sale according to the terms of said decree are as follows: Judgment of the State of New Mexico, with interest to date of sale \$46.20 Special Master's Fee \$2.50 and the cost of publishing this notice.

From Ancho

The Straley home at Luna was the scene of a happy gathering, Thursday 13th, ostensibly, a regular business meeting of the Ladies' Aid, but in reality a surprise shower in honor of Miss Lavona Drake, who will be married June 15th to Mr. Price Miller of near Ancho. Dressed as a groom in long tailed coat and silk topper little Tommy Knight and Sara Allen Silvers with trailing bridal veil, drove in a miniature auto laden heavily with gifts, beautiful and comic. While gracefully making acknowledgement, Miss Drake was handed a marvelous bridal cake, containing fortune telling tokens which provoked much merriment. Snapshots of the tiny "bride and groom" in their auto and of the guests in groups were taken, refreshments of ice-cream and angel food cake were served, and the guests departed with hearty good wishes for the happiness of the bride to be.

Card of Thanks We wish to thank our many friends for their kind assistance, words of sympathy, and the beautiful floral offerings during the recent illness and death of our beloved daughter, sister, granddaughter, and niece, Rachel. FEED THE LIVESTOCK PLENTY OF MINERALS N. M. Extension Bulletin: There are only a few minerals that need to be given to livestock to supplement that which is procured in their feed. says J. L. Lantow of the New Mexico Agricultural College. Most feeds contain enough of the different minerals, so that no thought need arise concerning them. However, such should always be supplied with care. The part of the soil that is most deficient has been proved to be phosphorus. In some areas there is a deficiency of iodine in the water, and if there is little or none in the feed, such a condition brings about an undeveloped or improperly developed fetus. Many people have observed cattle having bones, an indication of a condition that may develop into what is known as loin disease. This disease is often called creeps, which is caused largely by a lack of non-oxidation of phosphorus. Vitamin D, or sunlight, helps in the metabolism of calcium and phosphorus. There may be a lack of phosphorus and calcium even though no outward appearance indicate it. A number of these cases will be present wherever places extremely lacking in these minerals occur on the range. It has been advisable in such cases to place before the cattle a mixture consisting of three parts of bone meal and two parts salt. This mixture will be eaten quite readily. It is thought that possibly there is apt to be more of a mineral deficiency on the range when the forage is dry than when it is in a succulent condition. Whenever a deficiency exists the addition of bone meal will increase gains in both dam and young, raise the state of health, prevent creeps, and increase the percentage of calf crop. It might be assumed that the animal's appetite for any mineral is an indicator of the need of it.

FOR RENT: Bed rooms, with bath—hot and cold water—rates reasonable at the Ding wall Place. NOTICE OF SPECIAL MASTERS' SALE Notice is hereby given that under and pursuant to a decree of the District Court of the Third Judicial District of the State of New Mexico within and for the County of Lincoln, in Tax Suit No. 247, wherein the State of New Mexico is Plaintiff and C. ### FINNEY OF THE FORCE

### A Business Proposal

## GARB DOESN'T MAKE THE MAN IN RUSSIA

### Sheer Necessity Forces Outlawry of Style.

Moscow.—In the Soviet capital, at least, clothes do not make the man; nor the woman, for that matter. Style is among the antiquated "bourgeois" notions thrown into discard by the Bolshevik revolution.

Sheer necessity—the lack of textiles and of cash—had more to do with outlawing style than did Communist principles. In the bitter years of civil strife and famine people were happy enough to have their bodies covered without bothering about the cut or color of the covering. While conditions are incomparably better, those who can afford to worry about the hang of their trousers or their skirts are still a small minority.

Many men, of course, threw off the yoke of a tailored jacket for the freedom of a peasant blouse out of revolutionary ardor; but the overwhelming majority did so because their jackets had fallen to pieces and they could not buy a new one.

**The Russian Flapper.**  
A generation of Russian girls adopted rough boyish attire and scoffed at female finery. One may be pardoned for guessing, however, that many of them were making a virtue of necessity. Certainly the first sign of easier economic conditions here, as in the rest of the world, was the better-dressed young woman. The Russian "flapper"—a boy's cap pulled rakishly over her close-cropped head and a man's overcoat over her nondescript dress—is definitely on the decline.

Between poverty and principle, however, style has fared badly enough. Anything but stark nakedness (and the rigors of Russian climate discourage that) passes muster. Moscow undoubtedly holds the world record for diversity of costume. The queerest sartorial combinations will attract not the slightest attention on Moscow streets. The most grotesque patch-work passes unnoticed.

**Can't Judge by Clothes.**  
Another result of the discarding of style is that one can no longer judge anyone's social status from his or her clothes. The fellow you bump into on the stairway may be the commiserate or the humblest of his clerks—you can't tell from his apparel. Indeed, if he shows a tendency towards elegant European dress he is most likely to be the clerk.

Foreigners who have visited Moscow over a period of years agree that in general people here are enormously better dressed than a few years ago, although the standard is still far below western Europe, or even a city like Warsaw. Smartly dressed women are more in evidence and the popularity of "Modes," a pitiful little magazine devoted to the Paris fashions, may be a sign of the times.

### Fruit Growers Profit From Europe's Winter

Lindsay, Calif.—The "it's an ill wind—" adage was borne out literally in Europe this year, with California orange growers reaping the benefit of the suffering of European growers.

The most severe European winter in 230 years caused great damage to the Spanish citrus crop, next largest in the world to that of California. One result was that the California Fruit Growers' exchange has already moved its first shipment of oranges to Europe, docking in London the latter part of April. Others are being loaded, and before the season ends it is estimated California citrus growers will have benefited to the extent of marketing 2,500 carloads of their product that never would have been able to compete with European growers under ordinary circumstances.

The extra market proved extremely fortuitous to California growers, burdened with an unusually large Valencia crop. It is estimated more than 1,000,000 boxes of oranges will go to Europe this season at prices that will net the grower from \$2 to \$4 a box.

### New Hampshire Man Has Wagon 113 Years Old

Franklin, N. H.—Frank H. Gerlach says he owns a wagon one hundred and thirteen years old and in perfect running condition. It has original tires and paint, he says, and he has absolute proof as to its age.

It is said to be one of the very first wagons that Abbott Downing, the famous builder of the Concord coach, constructed. It has no springs similar to the leaf springs in use on wagons and automobiles today, but it nevertheless rides like a cradle. In place of springs there are leather straps running from the front to the rear axle and the body of the wagon is suspended upon these similar to the manner in which the stage coaches were constructed.

At the places on the leather where the front wheels hit when the wagon is turned there is a protection in the shape of steel plates to prevent the tires from wearing out the leather.

### Orders Dress for Maid Tattooed on Tar's Arm

Lynn, Mass.—Gordon Smith wanted to join the navy. He passed the mental and physical examinations, but during the latter process, recruiting officers discovered the tattooed figure of a nude woman on his arm. Before approving his enlistment papers they forced him to have a dress tattooed on the offending picture.

## South West PARAGRAPHS

George Bergfeld has been elected principal of the Douglas, Ariz., high school, succeeding Charles W. Graeber, resigned.

Cattle shipments from the state of New Mexico for April totaled 41,236, according to figures by M. G. Keenan, secretary of New Mexico cattle sanitary board.

At the annual commencement of the University of Arizona in Tucson, held the evening of June 5, there was granted 32 advanced degrees and 240 bachelors degrees.

Thomas Montoya was shot and instantly killed at the San Lorenzo store on the Mimbres River near Silver City. George Karr is charged with the shooting. He claims self-defense.

Condemning mixed bathing parties and urging a dress reform, the Arizona Baptist Association in annual convention in Globe unanimously adopted a report dealing with present day moral conditions.

The famous Smoki coronations were held in Prescott, June 8. These dances are considered among the most picturesque and educational of their kind, and over 300 persons assisted in the coronations this year.

Judge Orlo Phillips has appointed Miss Jennie Johnson of Las Vegas as his secretary in his new capacity as judge of the tenth circuit of the United States circuit court of appeals, he announced in Albuquerque recently.

Ground will be broken and construction on a proposed \$2,500,000 plant for generating electricity will be started in Phoenix within 60 days, it is reported at the offices of the Central Arizona Light and Power Company. The plant will be built just outside the city limits.

Bryant Williams, sheepman of Hope, N. M., recently hung up what he believes to be a record for growing big lambs. Williams loaded 274 lambs for market which weighed 22,620 pounds, or an average of 82½ pounds each. The lambs were between four and four and one-half months old.

The Arizona State Board of Education has awarded the contract for arithmetic for state grammar schools to Scott, Forman and Company. The board has adopted "Our Arizona," by Mrs. Ida Floyd Dodge of Tucson, as the supplementary history of the state for reading in the upper grammar grades.

Charles Foster, whose home is in Clayville, Pa., was found guilty of the murder of Martin Parko, by a jury in Tombstone, Arizona, which deliberated less than half an hour and recommended that the defendant be hanged, leaving only the formal sentencing and fixing of the execution date to be carried out.

Ramon Tafaya was vindicated of a first degree murder charge on an instructed verdict in District Court at Las Vegas, N. M. Tafaya was charged with the murder of Mrs. Longina Montana de Trujillo, whose mutilated remains were found early on the morning of July 6th, 1927, beside the Santa Fe railroad tracks leading into Las Vegas.

The accidental discovery of a series of vast caverns, the extent of which is unknown at present, located 40 miles from Globe, Arizona, on the Mammoth Highway, was announced in Globe recently by A. L. Logan, who discovered the caves, jointly with Fred Rhodes. A grand opening for the general public will be held on June 2, Logan said.

The Chamber of Commerce of Astec, N. M., endorsed the San Juan county fair to be held at Farmington, N. M., this fall at a recent meeting, at which representatives of the Farmington Chamber of Commerce attended. The Astec Chamber of Commerce will lend every assistance in the project and will help in every way possible to make the fair a success.

J. A. Lawrence of Las Cruces, N. M., recently found an old Springfield rifle on his ranch 85 miles west of Socorro, N. M., which had been leaning in the fork of a cedar tree for so long that the tree had grown around part of the barrel of the rifle. The old rifle is of the "cap and ball" variety and bears the stamp of the United States of the year 1848. In spite of its long exposure to varied weather the rifle is still in working order.

The Deming steam laundry and a frame house were destroyed by fire in Deming with a total loss of \$7,500.

Twenty department heads, engineers and technical men in the employ of the Arizona highway department will receive salary boosts totaling \$17,100 annually, according to action of the State Highway Commission announced in Phoenix. The increases, ranging from \$800 to \$1,200 per annum, will become effective July 1, when the new highway budget funds are available.

A transcontinental air transport meteorologist has completed installation of a meteorological station in Prescott for use in furnishing weather information to planes that will be used in connection with the projected rail-air passenger service soon to be inaugurated between New York and the Pacific coast.

Arizona will spend five million dollars on roads this year. Tourists driving across the state last year left seven million dollars in profit with the people. A handsome return on the investment.

Her Usual Thought  
"Heard the news? Lily is thinking about getting married."  
"News? When wasn't she?"—Stray Stories.

"O Happy Day" sang the landlady as she hung the snowy wash on the line. It was a "happy day" because she used Red Cross Ball Blue—Adv.

Even people who borrow trouble have to lend.

Many a sunny-haired girl has a cloudy disposition.

## WILL DO ALL IT CLAIMS TO DO

Mrs. Steele Says of Lydia E. Pinkham's Vegetable Compound

Pratt, W. Va.—"I was so weak and nervous that I was in bed most all the time and couldn't sit up and I am only 30 years old. I saw your advertisement in a magazine and after I had taken three doses of Lydia E. Pinkham's Vegetable Compound I could feel that I was better. After taking two bottles I began doing my work and I feel like a new woman. I recommend the Vegetable Compound to my friends and say it will do all it claims to do and more. I will gladly answer to all letters. I feel very glad to hear from you. I feel very glad to hear from you. I feel very glad to hear from you."—Mrs. E. H. Steele, Pratt, W. Va.
