Probate Clerk

VOLUME IV—(Continued News, Vol. 25)

CARRIZOZO, NEW MEXICO, FRIDAY, NOV. 1, 1929

NUMBER 44

TIME TO ANSWER

(Santa Fe New Mexican)

Mr. Charles Springer, for thirty years a political boss and manipulator in New Mexico, representative of various wealthy corporations, legislative lobbyist, and warhorse of the Old Guard, opponent of labor laws, co-framer of a reactionary state constitution, and at present head of a political machine based on the state highway department, is due to make a statement to the people of New Mexico.

Something like a year ago the Republican state chairman warned him there was corruption in the highway department. More recently a newspaper published a mass of evidence exposing such corruption and calling upon him to do something about it. Misconduct in the department has been a subject of common rumor for a year or more. A grand jury made a searching and impartial investigation, sifted the evidence, listened to Mr. Springer, the governor, the state highway engineer and others, returned indictments for bribery and bootlegging against a subordinate, found Mr. Springer had been derelict in his duty in permitting such conditions and suggested his removal.

Behind the skirts of the governor, taking advantage of his personal friendship, and imposing silence on an engineer of good repute, whose job is dependent on Mr. Springer, the latter has uttered no word during all the months of this exposure.

Neither Mr. Springer, the governor nor anyone else concerned has denied one iota of the charges.

They stand today unrefuted and undenied by any person.

No one has impugned the evidence, no one undertakes to say that the grand jury finding was not warranted by the evidence.

On the other hand the defense of the underling comes into court and admits the facts. Whether pro forma, as a basis for a demurrer, a legal technicality or what not, it comes into court and waives denial of the facts.

What, then, is the defense to date?

Woman's Club Notes

The Carrizozo Woman's Club held its regular meeting Friday afternoon, October 25, at Community Hall. Mrs. M. J. Barnett had charge of the program—Community Service.

1. A paper—"Civic Improvement;" Mrs. Frigman.
2. Violin solo—Louise Sweet.
3. Dance—Mrs. Hoake.
4. 2 numbers—High School Orchestra.

Refreshments were served in the Community Kitchen by the hostesses.

The next meeting of the club will be November 15.

Minister—"As I gaze about, I see before me a great many bright and shining faces." Just then eighty-seven powder puffs came out of hiding.

First the cry of "politics." Second the cry of "frame-up." Third, "the grand jury has no authority."

Fourth, there is no law to punish Mr. Springer's employe for bribery.

Fifth, discharge of highway department employes who furnished the evidence.

Sixth, the highways are being well built.

Seventh, Mr. Springer is a fine citizen and public benefactor.

And not to this good day any denial of the charge that notorious corruption has been going on in the department and that Mr. Springer knew about it.

We invite Mr. Springer to come out from behind the governor and engineer, stand up front in of the people of New Mexico and deny the charges.

We know of no immunity he has won, from being answerable to the public whose servant he is supposed to be. Examination of his political career does not show any ground for exemption from the rules that apply to every other public servant.

We assume, for the sake of argument, that he has the moral courage to speak and to utter a denial.

Speak up, Mr. Springer. Every day of silence constitutes a separate and distinct tacit admission of the facts. Or if you can get some one else to deny it for you, that will be a starter. So far nobody has come forward to say it isn't true.

Expresses Appreciation

Carrizozo, N. M., Oct. 28, 1929.

To the Heads of the Various Fair Committees:

In behalf of myself and the directors of the Chamber of Commerce, I desire to express my appreciation of the way you handled your department during the fair. I shall be pleased to have you pass this on to the other members of your committee.

The fair exceeded all other efforts by a wide margin, and the net amount at this writing is \$924.19; the gross receipts \$2031.08; total expense \$1106.89.

The net amount of \$924.19 will take care of an expense note of a total of \$859.49, leaving a balance of \$64.62 to be otherwise applied. The building now carries only the balance of the bonded indebtedness of \$2950.00, with interest paid to July 25, 1929. The total cost of the Hall to date, excluding interest and upkeep has been \$10,607.86. This is what Audit No. 3 will show when we get around to make it.

If in handling your work you find that you can make suggestions whereby the efficiency of the department might be improved, when another fair is held, kindly feel free to make them, and we would appreciate having them at this time.

A complete financial report is being published this week.

Yours very truly,
E. M. Brickley, Active Manager;
Carrizozo Chamber of Commerce.

Fair Receipts and Expenditures

E. M. Brickley, Active Manager for Chamber of Commerce.

Committees Make Reports

Report of the Committee on Agricultural Exhibits

Although late in the season, it was surprising to note the high quality and variety of the exhibits shown. As space does not permit a detailed description of all entries, we will give a list of the prize winners only.

Loma Grande Products, (H. E. Keller.) Nogal. First on potatoes, beets, oats, barley, lettuce, stock beets. Second, on yellow turnips, white potatoes. Third, on cabbage and Cauliflower.

Hondo Valley Orchard Co. (Titsworth Co.) Capitan. First on apples (Stayman Winesaps) 2nd. on Stark's Delicious Apples. 3rd. on Stark's Delicious apples.

C. H. Thornton, O s o u r o. First on cider, pears and grapes. A. L. Hulbert, Lincoln. First on cabbage. 2nd on cabbage. E. M. Brickley, Carrizozo. First on carrots and parsnips. Frank Shelton, Corona. First on frijoles.

M. C. West and son, Capitan. First on corn.

Witt Sears, Capitan. First on cauliflower.

Mrs. E. T. Collier, Carrizozo. First on tomatoes.

Mrs. H. M. Bullard, Ancho. Second on carrots and cauliflower.

Robert Hinchey, Lincoln. Third on yellow dent corn.

Marion Hust, Nogal. Second on Yellow dent corn.

Mr. Fite of the State Agricultural College at Las Cruces assisted the committee to judge the exhibits. His assistance and suggestions were highly appreciated.

S. H. Nickels,
Chairman.

Report of the Committee on Floral Exhibits

The committee on Floral Exhibits desires to express its appreciation of the large number of vases of flowers entered. The display this year was the largest ever made at any fair held in Lincoln county. The winners alone are listed.

Mrs. Margaret Clouse, 1st on cactus dahlias, 3rd on showy mixed dahlias, 2nd on display.

Mrs. H. M. Bullard, 1st on asters.

Mrs. Sarah E. Hughes, 1st and 2nd on chrysanthemums; 1st on cosmos.

Mrs. Carrie Ziegler, 1st on penunias, 2nd on larkspur, 2nd on showy dahlias, 1st on display.

E. M. Brickley, 1st on roses, 2nd on cosmos.

The committee expresses appreciation to Mr. Webb, of the State Agricultural College, for

his assistance in judging the display.

Respectfully submitted,
Maggie Lovelace, Ch'm.

School Exhibits

The school exhibits for the County Fair were unique and attractive. They showed much thought and painstaking work on the part of both teacher and the pupils. The following schools had exhibits:

Ruidoso—health posters; teachers, Misses Fritz and Ballentine. Bogle—Luncheon set and silhouette work; teacher, Miss Lorenz Stimmel.

White Oaks—Pencil drawings, clay modeling and tree handmaps; teacher, Mrs. Ward.

Monte Jean—Mounted specimens of nature study; teacher Miss Ludlow.

Hondo—Moving picture of "Columbus' First Voyage; teacher, Miss Eva Rose.

Ancho—Needle work and posters; teachers, Misses Johnson and Key.

Jack's Peak—Beaded flowers, paper flowers and posters; teacher, Mrs. Wilson.

Glencoe—Water colors and crayolas; teacher, Mrs. Davis.

Upper Glencoe—Needle work and rubber flowers; teacher, Mrs. Ola Jones.

The Lincoln school and the Carrizozo school had outstanding exhibits; the teachers from all grades in these schools submitted specimens of their work.

The Lincoln school was awarded first prize and the Carrizozo school second prize. Attached is a detailed report of the exhibits from each of these schools.

The committee respectfully suggests that the exhibits for next year be classified and the teachers notified as to the class of work for which ribbons will be awarded and that the same kind of work in the different grades be considered and awarded ribbons rather than the schools as a whole.

Respectfully Submitted,
Alice M. French, Ch'm.,
School Exhibits Committee.

Lincoln School Exhibits

High school department—Commercial and industrial maps of the United States by the tenth grade geography class.

The different products of the United States were indicated by the following, and glued in the states where produced:

1. Corn—grains of corn.
2. Wheat—grains wheat
3. Rice—grains of rice.
4. Cotton—small pieces of cotton.
5. Wool—small pieces of wool.
6. Coal—small pieces of coal.
7. Iron—iron shavings.
8. Copper—pennies.
9. Gold—gold foil.
10. Silver—silver foil.
11. Cattle—small pictures of cattle.
12. Oranges—orange peel.
13. Petroleum—cansules filled with lubricating oil.
14. Sugar—cansules filled with sugar.

The ninth grade Spanish class made a picture book containing pictures of objects they had studied, in Spanish class, and a sentence in Spanish about each picture.

MISSING THE MORNING

By Douglas Malloch.

WHEN you breakfast at six and you labor at seven, Then you know about earth and you learn about heaven. I have met every star, and the sun is my neighbor; One has silvered my path, one has gilded my labor. For what know you of air, if you never have taken Just a breath of the dawn, when the grasses awaken? Or what know you of skies, if you never have seen them With their blues and their reds, and their purples between them?

Now we're stnyng up late, and we're getting up later, And we're missing the morn, and a thousand things greater Than your poor little toys and our cheap little pleasures, And are cheating the soul of the most of its treasures. I have walked to my work when the dew was a-glisten, I have heard a bird sing, and have watched a world listen, And whatever his wealth, and what titles adorning. How I pity the man who is missing the morning!

(© 1923, Douglas Malloch.)

Masonry furnaces similar in principle to modern blast furnaces were first made in Europe about 1400 A. D.

SUPERSTITIOUS SUE

SHE HAS HEARD THAT—
For the folks who do not close doors after them—it's hello, central, call the poor house—for they're liable to at ways be poor.

Of Malayan Origin

The word "batik" designates a process for coloring fabrics, originating among Dutch East-Indian natives, and now used in Europe for velvet, velour etc. in which the design is covered with melted wax and the uncovered portions dyed, the wax then being dissolved in boiling water. It is derived from the Malay batik.—Literary Digest.

Are Men Really "Unmanly"?

By JEAN NEWTON

THE reason why women hate men is that they are so unmanly!

That startling opinion is given in a recent magazine article by Ada Patterson, who claims that more women than men possess the qualities which we call "manly."

"A woman," we are told, "cannot love the average man if she knows him. To be what women consider 'manly,' he must be brave and strong and loyal and kind, and in all things adequate, which to every woman's sorrow, he most certainly is not." And for proof Miss Patterson points to the "unmanly" weakness of which most men are guilty—vanity, selfishness, love of flattery, illogicalness.

All of which accusations against men are true, of course—and yet we do not agree with Ada Patterson, surely we don't—that women hate and despise them. Whatever hating there is, I think, must be on the part of the half-baked woman, the young and inexperienced girl to whom "manliness" constitutes nothing less than godliness, and whose dream of her sweetheart or husband as a young god has been rudely interrupted by the emergence of a human man. A mature woman like Ada Patterson should know better!

No, women don't hate men. And if men are "unmanly," the trouble is with the definition. How many of us, for instance, would be "womanly" if womanliness meant perfection and godliness?

The point about men is which

proves such a disappointment to women with a preconceived notion of manliness, is that in some ways they never grow up.

It is true that a "man's vanity is as necessary to him as oxygen." Just like the child who is terribly agitated about being the biggest, strongest, best.

It is true that men are far more susceptible to flattery than women. While only the most foolish women fall for it, it is the rare man who is above it. But all children love it.

It is true that men are selfish, egotistical, unconsciously selfish. It has been said that the least selfish man puts the most selfish woman in the shade when it comes to selfishness! And I shouldn't be surprised! But there you have the child—egotistical, unconsciously selfish. Ditto illogicalness.

Do we hate children for those qualities? Heavens, no! We would not be so selfish. Nor do we hate men. The more womanly we are the more those very qualities which disassociate a man from a god appeal to our maternal instinct!

"Adequate in all things," men most certainly are not. But that doesn't necessarily make them unmanly. If by "manliness" we mean being "brave and strong and loyal and kind," manly men there most certainly are in this world, and their name is legion! Men who regard every woman as a goddess are bound to be disappointed. We cannot be goddesses, but we can

be women and womanly. If we do not flatter and wrong men by expecting them to be gods, we shall be the better able to appreciate the manliness in them.

What Does Your Child Want to Know?

Answered by BARBARA BOURJAILY

DO WE SEE A THING AS SOON AS WE LOOK AT IT?

No. It takes a tiny space you see. For light to travel near— And so you wait the wee-est bit Before you see things clear. (Copyright.)

When Food Sours

Lots of folks who think they have "indigestion" have only an acid condition which could be corrected in five or ten minutes. An effective anti-acid like Phillips Milk of Magnesia soon restores digestion to normal.

Phillips does away with all that sourness and gas right after meals. It prevents the distress so apt to occur two hours after eating. What a pleasant preparation to take! And how good it is for the system! Unlike a burning dose of soda—which is but temporary relief at best—Phillips Milk of Magnesia neutralizes many times its volume in acid.

Next time a hearty meal, or too rich a diet has brought on the least discomfort, try—

PHILLIPS Milk of Magnesia

School for Jobholders

The school of citizenship and public administration of the University of Southern California provided a special short summer course for public officials, personnel in public service and private persons and groups with public interests at heart. The three weeks' institute covered sections on principles of government, planning and zoning, public buying, taxation, water supply, public engineering, housing, city clerkship administration, juvenile welfare, airport management, recreation and parks, sanitary engineering, municipal chemistry and testing, police administration, special assessments, school trustees' problems, governmental accounting, budgets and personnel in public service.

A Household Remedy For External Use Only Hanford's Balsam of Myrrh

Encircled Globe in 77 Days
A letter started on an around-the-world tour from Sunnyvale, Calif., completed its journey and returned to Sunnyvale in 77 days. With some advance preparation and special attention, this record could have been beaten easily. It went to New York, Paris, Berlin and Hongkong. The postage was 14 cents.

Fresh, sweet, white, dainty clothes for baby, if you use Red Cross Ball Blue. Never streaks or injures them. All good grocers sell it.—Adv.

First-class talent in the editing of high-class magazines is the hardest to find.

Few of those who live to a great age are willing to give robustness to the credit.

Denver Boy is a Winner

Every mother realizes how important it is to teach children good habits of conduct but many of them fail to realize the importance of teaching their children good bowel habits until the poisons from decaying waste have begun to affect the child's health.

Watch your child and at the first sign of constipation, give him a little California Fig Syrup. Children love its rich, fruity taste and it quickly drives away those distressing ailments, such as headaches, bad breath, coated tongues, biliousness, feverishness, fretfulness, etc. It gives them a hearty appetite, regulates their stomach and bowels and gives tone and strength to these organs so they continue to act normally, of their own accord. For over fifty years, leading physicians have prescribed it for half-sick, bilious, constipated children. More than 4 million bottles used a year shows how mothers depend on it.

Mrs. C. G. Wilcox, 3365 1/2 Wolf St., Denver, Colorado, says: "My son, Jackie, is a prize winner for health, now, but we had a lot of trouble with him before we found his trouble was constipation and began giving him California Fig Syrup. It fixed him up quick, gave him a good appetite, made him sleep fine and he's been gaining in weight right along since the first few days, taking it." "To avoid infection" habitations of California Fig Syrup, always look for the word "California" on the carton.

The Children's Corner

Edited by DOROTHY EDMONDS

WHAT THE SEAGULL LEARNED

The tide had turned. Sparkling in the sun and playfully making white caps, the waves were coming up the sloping shore. There was little wind and the waves were very small indeed. They ran up the beach and then they ran back and every time, although you would not notice it unless you watched very carefully, they went up a tiny bit farther and did not go back quite so far.

Some children had been playing on the beach that morning and before they went home to lunch they had heaped up a big pile of sand. When the waves saw this ahead of them they felt discouraged. It did not seem as if they could ever get around or over so huge a sand heap. But they knew it was their duty to keep trying, so up the beach they ran, and back, and up again, over and over.

A sea-gull flew by, close over the tops of the waves. He was a young gull and not very wise so when he saw the tiny waves lapping at the base of the pile of sand he laughed and said, "Foolish little waves, you had better give up trying to climb that mountain."

But the waves paid no attention to this advice. Over and over they made their runs up and down the beach and if you had been watching you would have seen slowly, but surely, the big sand heap disappearing.

An hour or so later, the young sea-gull flew by that way again. He thought he would see if the foolish waves had given up trying to climb the mountain that was far too high for them to ever think of getting over. But when he reached that part of the beach he was so surprised that he almost forgot to flap his wings.

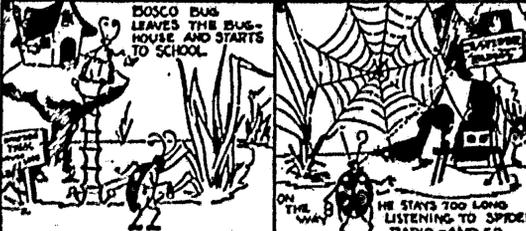

There was no mountain there! The sea-gull looked all around. Had he made a mistake in the place? No, he knew well that sheltered bit of shore just south of the big ledge of white rocks. There was no mistake, the mountain had gone. The waves had climbed right over it and covered it up!

"Well," said the young sea-gull to himself, "that just goes to show what keeping at a thing will do. Surely I'm as smart as a wave. After this I'm not going to give up trying to do a thing just because it seems hard." And before he flew off he dipped down close to the tops of the tiny waves and told them how sorry he was that he had called them foolish.

And the waves sparkled in the sun and murmured to each other as they ran gaily up and down the sloping shore.

BOSCO BUS RETURNS TO SCHOOL IN THE MODERN FASHION

THE PAPER BAG FAMILY
When paper bags come into your house, they spell fun. Draw a face on one, stand it up and watch Sonny Sackin smile at you. Cut a width up on each side, twist and there are arms. Stuff cotton in the top for a head and a draw string round it, slit the lower half in the middle and

twist for legs! The right sized sack will make a splendid house with doors and windows cut out. Another bag, laid on its side the long way, face made on the end, slits made in bottom edge and twisted for four legs, and at the other end for tail, makes the family pet. See, the pictures show you how!

—Florence Walton.

Giant Hornbill Comes From China

Harold J. Coolidge of the Kelly-Roosevelt expedition with the Giant Hornbill shot in a remote part of Indo China for the collection of the Field Museum of Natural History at Chicago. Coolidge, twenty-five-year-old naturalist, is a distant cousin of former President Coolidge and a member of the staff of Harvard university.

SOME RABBIT DISHES

By NELLIE MAXWELL

This would be a much more pleasant world if there weren't so many ways of making people unhappy.

By Baby Hunting, Daddy's gone a-hunting. Gone to get a rabbit skin To wrap up Baby Hunting in.

AS CHICKEN and rabbit are so alike in flavor and food value, it may be cooked and served in the same manner. Rabbits feed on vegetables and nuts as well as grains and are really more particular about their diet than the fowl.

Two medium-sized rabbits will serve eight persons. Split down the front to the tail, after removing the head and feet. Divide into six or eight sections.

Stewed Rabbit.

Cover the rabbits with boiling water to which a tablespoonful of vinegar has been added, cook five minutes, add onion, one tablespoonful of salt, a clove of garlic and simmer two hours. Stock should always be saved when cooking young rabbits, for the broth may be used as chicken broth.

Rabbit Pie.

Take two stewed rabbits, five tablespoonfuls of flour, one finely chopped onion, two teaspoonfuls of salt, three tablespoonfuls of fat, two and one-half cupfuls of stock, one-half cupful of chopped parsley, and one and one-half cupfuls of mashed potato and pepper to season. Remove the meat from the bones and place in a well-greased baking dish. Melt the fat, add flour and seasonings and when thoroughly mixed add stock, onion

and parsley. Stir until it boils; boil five minutes, then pour over rabbit. Spread with mashed potato and bake thirty-five minutes. Brown well at the last.

Tomato Sauce.

Take two cupfuls of tomatoes, one bay leaf, two tablespoonfuls of sugar, one-fourth teaspoonful of pepper, five tablespoonfuls of flour, one and one-half teaspoonfuls of salt, three tablespoonfuls of fat and one-half teaspoonful of stock. Cook tomatoes and seasoning ten minutes and strain through a sieve or colander, add the fat and flour cooked together, and cook five minutes.

(© 1919, Western Newspaper Union.)

Medical Terms

Allegretto is a diminutive of Allegro and as a time indication somewhat slower than the latter, and also faster than andante. Like allegro, it is frequently combined with other words. Examples are Allegretto moderato, et cetera, either modifying the pace or describing the character of the music. The word is also used as the name of a movement and in this sense is especially to be often found in the works of Beethoven.

Laziness Just Hunger

Laziness among farm workers in the Philippines led to an investigation of this supposed moral disorder, which turned out to be purely physical in many cases. It was found that a daily diet thought to be sufficient was resulting in undernourishment. An improved diet quickly stimulated the vitality of the tilters and their working capacity was greatly increased.

NEW MONOPLANE TO FLY FROM NEW YORK TO RUMANIA

A view of the new and specially designed two-seater tandem monoplane which was tested at Roosevelt Field, Long Island, in preparation for a proposed flight from New York to Bucharest, Rumania. The plane is said to be unassailable, and a tricycle landing gear prevents noseovers.

WESTERN FARMERS REDUCE MORTGAGES OVER 3 PER CENT

Wichita, Kan.—Farmers of the Ninth Federal Land Bank district, comprising Kansas, Oklahoma, Colorado and New Mexico, who operate their own farms, have reduced their mortgage indebtedness by about \$12,000,000, or a little more than 3 per cent, in the years 1925 to 1928, according to figures compiled by the bureau of agricultural economics of the Department of Agriculture.

Commenting upon these figures at the two-day meeting of the representatives of 116 national farm loan associations of Oklahoma with Federal Land Bank officials here, John Fields, president, pointed out that the farmers of this district have done better than the national average, which increased 1 per cent during that period.

He also stated that the decrease in the mortgage debt on owner-operated farms in this district is at approximately the same rate at which borrowers from the Federal Land Bank pay off their loans.

The bank at Wichita has made loans amounting to \$124,350,650 to 24,577 farmers in the twelve and one-half years in which it has been doing business. Of these, 8,197 loans, amounting to \$25,150,160, have been repaid in full, and payments on principal aggregating \$9,518,868 have been made on the 39,390 loans now in force.

As indicative that farmers have been improving their farm mortgage position, Fields showed that borrowers from this district have been paying their installments more promptly when due. Installment delinquencies of borrowers from this district decreased 13 per cent during the quarter ended Sept. 30, and the number of loans delinquent decreased 17 per cent. The total amount of loans involved in delinquencies decreased 22 per cent during the same period.

Prepares Woodshed for Home Malone, N. Y.—Arthur Plant, a Canadian who had resided in the United States for nearly thirty years, is preparing to spend the winter in his woodshed because that part of the residence, just north of Malone, which he purchased recently, is in Canada. The dwelling, attached to the woodshed, is in United States territory and Plant is prevented by United States immigration authorities from again entering this country. Plant is now busy making the woodshed waterproof for the winter.

New Rail Lines Planned Washington.—The three subsidiaries of the Atchafalaya, Tappan & Santa Fe railroad recently filed applications with the Interstate Commerce commission to construct new railroad lines aggregating 286 miles in Colorado, Oklahoma, New Mexico and Texas.

Business Maintains High Level Washington.—Secretary Lamont said here a few days ago that business is in a very healthy condition and that it had maintained a high level for the first nine months of 1929. The output of pig iron had steel ingots, he said, was "usually regarded as an accurate reflector of industrial conditions," and he cited that the output of these products was more than 17 per cent greater than for the corresponding period of last year.

THEN AND THERE HISTORY TOLD AS IT WOULD BE WRITTEN TODAY By IRVIN S. COBB Fugitive King Describes Own Flight

This is more than an eye-witness' account of a notable event in history. It is the tale of a royal fugitive's escape as told by himself—Charles II, born in 1630, died in 1685, king of Great Britain and Ireland. It is set well, even after the lapse of nearly three centuries, that one should meddle with the personal reminiscences of a famous monarch. So the text is reproduced here practically in its original form. There is no valid reason for doubting its authenticity. It first was published in 1766, having been extracted from a fuller narrative lifted from the voluminous library storehouse of that marvelous amateur historian, Samuel Pepys, as found in Magdalen college, Cambridge, long after the deaths of both the king and Pepys.

After the overthrow of the forces of his father by the army of Oliver Cromwell, the son, then a tall youth of sixteen, fled out of England. Charles I, as all men know, was captured and died on the scaffold—a scaffold erected in sight of the palace where he had reigned. The son reached Paris where he found an asylum. It was from France, four years later, that he ventured back to head a revolt against Cromwell in an effort to regain the throne. To the climax that campaign resulted most disastrously. For the second time in his young life he became a hunted refugee. It is with what happened to him following the collapse of his cause that his own story deals.

He was a Stuart, therefore a Scot. And to Scotland he returned in 1650 to raise his standard. But before he took the field he did certain things eminently typical of his uncertain nature. He swore to pledge which he had no intention of keeping. He signed a declaration testifying to his father's blood-guilt, to his mother's idolatry and to his professed abhorrence of the church in which he had been reared. He claimed his allegiance to Presbyterianism, a faith which privately he despised. So the Scots crowned him and while they were doing this, dear old Cromwell was coming up to lick an incongruous mixture of discontented English Royalists and rebellious Scotch Covenanters at Dunbar.

In the following summer Charles showed himself in his true colors, that is, if we concede that any of his colors ever were true ones. He shook off the Presbyterian influence which had served him as a cloak in his extremity, and at the head of 10,000 followers marched south. At Carlisle he had himself proclaimed king, was joined in Lancashire by recruits under the Earl of Derby and with 18,000 more or less disheartened men in his command entered the old English city of Worcester. Here occurred the decisive engagement which ruined his hopes. He fought bravely—courage was one of the few virtues that he possessed. In person he led a gallant but unsuccessful cavalry charge against the victorious Roundheads.

The battle, for his side, became a retreat and the retreat became a rout. He ran away, accompanied by a few noblemen and gentlemen—ran away with a price on his head and no place where he might rest the aforesaid head.

Another way of making my escape; which was to get over the Severn into Wales and so to get either to Swansea or some other of the seaports that I knew had commerce with France, to the end I might cross over to France that way as being a way that I thought none would suspect my taking.

So that night as soon as it was dark, Richard Penderell and I took out journey on foot towards the Severn. But as we were going in the night we came up by a mill where I heard some people talking, and the country-fellow desired me not to answer if anybody should ask me any questions, because I had not the accent of the country.

best man, was released and came home to his father's house. And as soon as ever it began to be a little darkish, Mr. Woolfe and his son brought us meat into the barn and then we discoursed with them whether we might safely get over the Severn into Wales, which they advised me by no means to adventure upon.

"Upon this I took the resolution of going that night the very same way back again to Penderell's house, where I knew I should hear some news of what was become of Lord Willmot, and resolved again upon going for London.

"So we set out as soon as it was dark; but we came by the mill again, we had no mind to be questioned a second time there, and therefore I asked of Richard Penderell whether he could swim or no, and how deep the river was, he told me it was a scurvy river, not easy to be passed in all places, and that he could not swim. So I told him that the river being but a little one I would undertake to help him over. Upon which we went over, some weeds by the river side and I, entering the river first to see whether I could myself go over, since I knew how to swim, found that it was but a little above my middle, and thereupon taking Richard Penderell by the hand, I helped him over.

Seeing, but Not Being Seen. "This being done, we went our way to one of Penderell's brothers who had been guide to my Lord Willmot and he believed might by that time be coming back again, for Willmot intended to go to London upon his own horse. When I came to his house I inquired where my Lord Willmot was—it being now toward morning and having traveled these two nights on foot; Penderell's brother told me that he had conducted him to a very honest gentleman's house not far from Wolverhampton. I asked him what news. He told me that there was one Major Careless in the house whom I knew, he having been a major in our army. I went for him into the room where I was and consulted with him what we should do the next day. He told me that it would be very dangerous for me either to stay in that house or to go into the woods—there being a great wood hard by Boscobel; that he knew but one way how to pass the next day, and that was to get up into a great oak in a pretty plain place where we might see round about us; for the enemy would certainly search the wood for our people that had made their escape from the battle. Of which proposition of his I approving, we (that is to say, Careless and I) went out and carried up some victuals for the whole day—viz., bread, cheese, small beer and nothing else, and got up into a great oak that had been lopped some three or four years before, and being grown out again very bushy and thick, could not be seen through, and here we stayed all the day.

"While we were in this tree we saw soldiers going up and down the thicket of the wood searching for persons escaped, we seeing them now and then peeping out of the wood.

"That night Richard Penderell and I went to Mr. Pitchcroft's, about six or seven miles off, when I found the gentleman of the house, here I spoke with Lord Willmot and sent him away to Colonel Lane's, about five or six miles off, to see what means could be found for my escaping towards London; who told my lord after some consultation thereon, that he had a sister that had a very fair chance of going by Bristol to a cousin of hers that was married to one Mr. Norton who lived two or three miles towards Bristol on Somersetside, and she might carry me thither as her serving-man; and from Bristol I might find shipping to get out of England."

This ends the narrative as the king himself set it down. Disguised as a common man-servant and after many perils he did escape across to Scotland and return following the Restoration and became one of the most picturesque, most uncertain and most disolute rulers Great Britain ever had.

As to Shooting Stars Meteorites differ greatly from meteors or shooting stars in many respects, possibly even in their origin. Meteor swarms are known, says Nature Magazine, to be the debris of disintegrating comets, following the same orbits. Meteorites or fireballs rarely appear in connection with swarms of meteors, though they occasionally appear in groups and many individual meteoric stones or iron often have been found in a single fall. In some instances their appearance is accompanied by loud detonations or a series of sharp reports, like that of artillery, or again the stone may burst into fragments with a sharp explosion.

Mothers find it magic for scuffs. One touch of the daint and scuffs disappear. Smooth, uniform color comes back to faded shoes. More than 50 marvelous shades—50 cents. Colors for black, brown, tan and white shoes—a neutral polish for others.

BARTON'S DYANSHINE SHOE POLISH. Finds Gold in City. J. A. Page is not a miner by occupation, but he has been reaping good returns for spare hours on Sundays. Panning for gold in Chico creek, within the city limits of Chico, Calif., Page has obtained three nuggets and a quantity of gold dust. The gold-bearing sand is washed down from the mountains by high water, Page says.

Waist Overalls for Men and Youths. Bib Overalls for Men and Boys. Levi Strauss Overalls. Two Horse Brand.

Peak Garmo Shown as One of Highest Mounts. Computations of triangulation observations of the Peak Garmo in Russia have just been completed by Richard Finsterwalder, a member of the Soviet-German expedition to Pamir, revealing that Peak Garmo has a greater altitude than any other mountain in the Union of Socialist Soviet Republics. Its height is computed as being 7,425 meters or about 24,533 feet. No mountain on that part of the world exceeds Peak Garmo in height. The tallest in North America, Mount McKinley, is only 20,000 feet in height, while South America's loftiest peak reaches but 23,090 feet. Peak Garmo is also taller than any of the peaks in the Alps. In fact, the only mountains which are known to be taller are some of the peaks in the Himalayas and other of the tallest Asiatic mountains. Peak Garmo lies among the wild and inaccessible summits of the Pamir mountains. Its heights have probably never been reached by any human being.

Forty Miles of Water Tunnels. There are sugar plantations on Kauai, Oahu and Maui, in the Pacific, with 40 miles of tunnels and ditches to carry life-giving water, and a famous aqueduct on Oahu taps four valleys and traverses a tunnel 14,443 feet long. One plantation uses more water than the city of San Francisco, says Nature Magazine. Thousands of artificial wells dot the countryside. In 1920, about 770,000 tons of sugar worth \$65,000,000 were raised on the 6,443 square miles that comprise this damb of water-saturated land. The pineapple crop brings a revenue of nearly \$31,000,000 annually.

ADDITIONAL LOCAL

Brent Paden returned last night from a week's stay in El Paso.

WANTED—Second hand adding machine stand, cheap. Apply at this office.

Mrs. George J. Dingwall is here this week from El Paso, to see her mother who has been ill.

Mrs. Maggie Pfingsten was down yesterday from her home on the Mesa, and made this office a pleasant call.

Miss Louise Sweet spent the week-end in El Paso, visiting her sister, Mrs. Jimmie Lee, and the new baby.

Milt Lesnet was here from his home in the northern part of the county, making final proof on his homestead, Tuesday.

Ed Haskins, a stockman of the Jicarilla country, was a business visitor to our town yesterday. Ed says about 8 inches of snow has fallen in the "Jicks."

W. M. Reilly and Will Ed Harris made a business trip to Roswell yesterday. On their return in the evening, they were accompanied by Mr. Reilly's daughter, Mrs. Clinton Branum.

L. A. Jolly has sold his tailoring and pressing establishment to a Mr. Renic, from San Marcial. The new owner is now in possession and is located at the same place—the Model Cleaners.

Joe Bickman came up from El Paso last evening. Joe met many friends who were glad to see him looking so physically fit. He has spent a part of the past two years in Carrizozo.

Mrs. R. W. Doster, daughters, Mrs. Gardenhire and Miss Dorothy, and Mrs. W. L. Burnett and little son, drove to Silver City Friday. They visited several places in that section and returned home Monday via El Paso.

Highway Man Injured

John Noonkester, an employe in the Highway service, met with a very serious accident Monday, near Nogal. He and a companion were riding in a truck, when the brakes failed to work, control was lost and the truck overturned. Noonkester suffered a fractured rib and contusions on limbs and body. His companion escaped injury.

The victim was brought to the Johnson hospital, had his wounds dressed and appeared to be doing very well. But within 24 hours his right arm, which had been punctured, began to swell and a gangrenous condition developed. Due to soil poisoning, and the arm was amputated just below the shoulder. The swelling and the infection have subsided, but the patient is still in a precarious condition.

Ft. Stanton News

On the evening of Oct. 25th David Tappan celebrated his 10th birthday by having in a number of his little friends. Games of all kinds were indulged in, until the dinner hour, when the children were invited to the dining room which was elaborately decorated with symbols of Halloween.

Among those present were Frank, Max and Elsie Faget, Virginia and Betty Fagan, Willet White, Bob Hobbs, Bill Cavanaugh, Eugene Merrel, Dorothy Parker, Miss Harris, and Mrs. Faget and Scott Howson. Halloween masks were given as favors. David was ably assisted by his mother, his sister Marian and little Bobbie. All enjoyed a very pleasant time.

Mr. G. Elderidge, wife and daughter, accompanied by Mrs. Wetshofer, departed Oct. 23 for their home in Indianapolis, Ind. Mrs. Wetshofer will visit relatives and friends during the next month.

Mr. and Mrs. James Anderson, son Jimmie, Mrs. Bery and Miss Rice attended the Masonic party at Carrizozo Tuesday night.

Mr. and Mrs. Fidel Durap have a fine new boy at their home.

Mrs. Tom Burleson and Mrs. Gylling will entertain their respective Sunday school classes at the home of Mrs. Gylling.

Margarite Gylling had the misfortune to receive a severe cut over the right eye while playing at school.

Halloween will be observed by O. T. Department in ward 11, tonight. Popcorn balls and candy, maybe a nice nip of fresh cider to welcome the ghosts and to make a little cheer for the boys.

Expresses Appreciation

I wish to thank the members who so ably and constantly served with me as the Hamburger-Hot Dog stand during the two-day County Fair. Their faithful service, unremitting labors and arduous duties performed entitle them to special commendation, and I sincerely appreciate the generous aid they gave.

Sincerely,
Mrs. Nellie Branum,
Chrm.

Off for N. M. E. A.

The entire faculty of the Carrizozo School, headed by Superintendent Helm, left yesterday morning for Albuquerque. Mrs. French, County School Superintendent, left the day previous, stated that, from the information she had, Lincoln county's representation from the rural schools would probably be very good.

Lincoln County School Notes

(Alice M. French, County Supd.)

The following schools have recently been visited by the County School Superintendent:

Corona, Brown, Joneta, Secotti Canyon, Mountain View, Arabela, Macho, Bethel, Bluewater, and Escondida. Both teachers and pupils are most cordial in their welcome and anxious to show the work they are doing.

The Corona High School this year has an enrollment of 47 pupils. Mr. Boucher took me over the entire school system and they are certainly doing a high class of work in the Corona school. Mrs. Mae Van Scoyoc and her Domestic Science classes deserve special mention. They are kalsomining and re-decorating the Domestic Science room and putting down new linoleum. When finished their quarters will present a very attractive appearance, and all the money for this work has been raised by the class.

Miss Frances Sandoval at Escondida and Mrs. Geo. Dixon of Bluewater had very attractive exhibits ready for the Fair but at the last minute were unable to get in with them. They have this work on display and it adds very much to the appearance of the room.

The State Teachers' Convention meets this week in Albuquerque and many of our County Teachers are planning to attend. As the last Legislature passed a bill allowing two full days salary to teachers attending the convention we anticipate a much larger attendance this year than formerly. The program offered at this Meeting is instructive and inspirational and we hope that all the teachers who possibly can will attend this meeting.

The following notes were sent in from the Arabela school:

"The Arabela school now has enrollment of 42 pupils and the attendance for last month was 95 per cent. This is the best record of attendance that has been recorded in this school for many years.

"The community is very proud of its school and is doing everything possible to build it up.

"The repairs on the school building are about completed and the play grounds have been improved. A Library has been started and in a month's time \$20.00 worth of literature has been donated.

"Miss Inez Gomez, Mrs. E. S. Dorsey and the school extended to Superintendent French and Mrs. Allie Stover a most hearty welcome when they visited us last week. We are always glad to have visitors and wish our superintendent, friends and patrons of the school would visit us more often.

"Mrs. Geo. Dixon also was a welcome visitor to our school on Friday, the 18th.

"Arabela was favored by a light snow and a visit from Jack Frost on the night of the 22nd."

Domestic Water Analyses

Dr. F. H. Johnson
County Health Officer
Carrizozo, New Mexico

Dear Doctor Johnson:

The following is the report of the State Public Health Laboratory on the water samples which you collected on October 22:

No. 1. Intake on Bonito. Total count 3 bacteria per cc. Negative for B. Coli.

No. 2. Nogal Lake. Total count 180 bacteria per cc. B. Coli present in one out of five 10 cc portions.

No. 3. Reservoir at Carrizozo. Total count 125 bacteria per cc. B. Coli present in one out of five 10 cc portions.

Sample No. 1 is satisfactory. Nos. 2 and 3 show some pollution.

Sincerely yours,
Paul S. Fox
C. E., Chief
Division of Sanitary Engineering and Sanitation.

Capitan News

Friday evening the student body of the high school gathered at the gymnasium to entertain the teams who won the cups at the county fair at Carrizozo. The time was spent in games and dancing. Refreshments were served at the close of the evening.

The high school and grade teachers will leave Wednesday for the Teachers' Convention at Albuquerque on Thursday, Friday and Saturday. School will be dismissed on Thursday and Friday.

Tuesday evening Mr. and Mrs. W. B. Payne entertained about eighty young people at a Halloween dance and card party at the Buena Vista Hotel.

Supt. C. V. Koogler drove to Carrizozo on business Monday. Mr. and Mrs. Williams of Albuquerque have been spending a few days at the Buena Vista Hotel this week. Mr. Williams is the new state supervisor for the Jefferson Life Insurance Company. Mr. and Mrs. Williams have been living in Nebraska before coming to New Mexico.

Auto Wreck

Jess Coker, passing through this section from Texas to the Mesilla Valley, was the victim of an auto accident that will very likely disable him for life. Sunday night, an auto in which Coker and some companions were riding, overturned near Three Rivers. Coker was injured, the car crushing him in the fall. His spine is affected and he is paralyzed from the waist down. He is cared for at the Johnson hospital.

Lovelaces Entertain

Mr. and Mrs. Morgan Lovelace entertained a number of friends at the Wetmore Hall last night, in recognition of Halloween. Everybody was either masked or wore bedecked in apparel of a former period. The prizes for the best costumes were awarded to T. A. Spencer, for the gentlemen, and Mrs. J. C. Burkett, for the ladies. Mrs. Elsa Charles copped the tacky prize for the ladies, while the editor won equal distinction in the same class, for men. Dancing furnished much of the evening's entertainment, which was followed by coffee and doughnuts.

O. E. S. Entertainment

The playlet by the Easter Star ladies, at Community Hall, Tuesday, and attended by Masons, Stars, Rainbows and families, was one of the most attractive and mirth-provoking entertainments presented here for some time. The ladies have been the recipients of many compliments for the manner in which the production was put on. Refreshments and a social hour followed the play.

Glencoe Woman's Club

To CELEBRATE BOOK WEEK

The Glencoe Woman's Club will celebrate "Book Week," November 17-23, and invite the public to come and visit their new library. The Librarian, Mrs. A. F. Roselle, lives just across the road from the library and will at all times be glad to display the books and explain the system and file application cards. Any books which persons would like to donate to the library will be called for by the committee, if you let us know. We would be glad to learn of anything interesting about children's books.

W. O. W. Dance

The Woodmen Circle gave a very pretty costume dance last night at Navarro Hall. The costumes were quite striking, and many worn by both sexes, quite unique. Miss Beatrice Pino was awarded the prize as the one most appropriately costumed.

CHAPTER IX—Continued

-12-

He was turning to go when, suddenly, he stopped.

"Oh, by the way, I saw a friend of yours before I left. No need to mention names, you lucky dog. When's the big thing coming off? Well, I must congratulate you again. She looks sweeter than ever. By-by."

He was off, leaving a very sinister impression on my mind. In his parting smile there was a trace of mockery that gravely disquieted me. I had thought much of Berna during the past few months, but as the gold fever took hold of me I put her more and more from my mind. I told myself that all this struggle was for her. In the thought that she was safe I calmed all my anxious fears. Yet at Locasto's words all my old longing and heartache vehemently reasserted.

In spite of myself, I was the prey of a growing uneasiness. I began to worry, so that I knew only a trip to Dawson would satisfy me. Accordingly, I hired a big Swede to take my place at the shore, and set out once more on the trail for town.

My strange, formless fears for Berna were soon set at rest. She was awaiting me. She looked better than I had ever seen her, and she welcomed me with an eager delight that kindled me to rapture.

We crossed the Yukon to the green glades of North Dawson, and there, on a little rise, we sat down, side by side. Never was I so happy as I. I spoke but little, for love's silences are sweeter than all words. From time to time she would give me a glance so full of trust and love that my heart would leap to her, and wave on waves of passionate tenderness come swooping over me.

"Yes," she was saying, "doesn't it seem as if we were dreaming? You know, I always thought it was a dream, and now it's coming true. You'll take me away from this place, won't you, boy?—far, far away. I'll tell you now, dear, I've borne it all for your sake, but I don't think I could bear it any longer. I don't know what I'd have done if it hadn't been for the rough miners. They've been so kind to me. When they saw I was straight and honest they couldn't be good enough."

She looked at me archly.

"And you know, I've had ever so many offers of marriage, from honest, rough, kindly men—and I've refused them ever so gracefully."

"Has Locasto ever made any more overtures?"

Her face grew grave.

"Yes, about a month ago he besieged me, gave me no rest, made all kinds of proposals and promises. He wanted to divorce his 'outside' wife and marry me. He wanted to settle a hundred thousand dollars on me. Then, when he saw it was no use, he turned round and begged me to let him be my friend. He spoke so nicely of you. He said he would help us in any way he could. He's everything that's kind to me now. He can't do enough for me. Yet, somehow, I don't trust him."

"Well, my precious," I assured her, "all danger, doubt, despair, will soon be over. I'll take you away from it all, soon. We'll go to my home, to Garry, to mother. They will love you as I love you."

"I'm sure I will love them. What you have told me of them makes them seem very real to me. Will you not be ashamed of me?"

"I will be proud, proud of you, my girl. On the first day of June, beloved, I will come to you, and we will be made man and wife. You will be waiting for me, will you not?"

"Yes, yes, waiting ever so eagerly, my lover."

I kissed her passionately, and we held each other tightly for a moment. I saw come into her eyes that look which comes but once into the eyes of a maid, that look of ineffable self-surrender, of passionate abandonment.

She rested her head on my shoulder; her lips lay on mine, and they moved faintly.

"Yes, love, yes, the first of June. Don't fail me, honey, don't fail me."

We parted, buoyant with hope, in an ecstasy of joy.

I got back to the claim. Everything was going merrily, but I felt little desire to resume my toil. I was strangely worried, worn out somehow. Yet I took up my shovel again with a body that rebelled in every fiber. Never had I felt like this before. Something was wrong with me. I was weak. At night I sweated greatly. I cared not to eat.

"Well," said the Prodigal one day, "it's all over but the shouting. From my calculations we've cleaned up two hundred and six thousand dollars. That's a hundred and three between us four. It's cool on about three to get out the start; so there will be, roughly speaking, about twenty-five thousand for each of us."

How jubilant every one was looking—every one but me. Somehow I felt as if money didn't matter just then, for I was sick, sick.

"Why, what's the matter?" said the

Prodigal, staring at me curiously. "You look like a ghost."

"I feel like one, too," I answered. "I'm afraid I'm in for a bad spell. I want to lie down awhile, boys . . . I'm tired. . . . The first of June, I've got a date on the first of June. I must keep it. I must. . . . Don't let me sleep too long, boys. I mustn't fail. It's a matter of life and death. The first of June."

Alas, on the first of June I lay in the hospital, raving and tossing in the clutches of typhoid fever.

CHAPTER X

I was lying in bed, and a heavy weight was pressing on me, so that, in spite of my struggles, I could not move. I was hot, insufferably hot. The blood ran boiling through my veins. My flesh was burning up. My brain would not work. It was all cobwebs, murky and stale as a charnel house. Then came the dream.

There was always Berna. Through a mass of grimacing, greed-contorted faces gradually there formed and lingered her sweet and passive one. I struggled to go to her. She was waiting for me, breaking her heart at my delay. Then the fever, the ravings, the wild thrashing of my pillow, all passed away, and I was left limp, weak, helpless, resigned to my fate.

I was on the sunny slope of convalescence. As I turned and twisted on my narrow cot it seemed as if the time would never pass. All I wanted was to get better fast, and to get out again. Then, I thought, I would marry Berna and go "Outside." I was sick of the country, of everything.

I was lying thinking over these things, when I became aware that the man in the cot to the right was trying to attract my attention. He had been brought in that very morning, said to have been kicked by a horse. He was in great pain, but quite conscious, and he was making stealthy motions to me.

"Say, mate," he said, "I piped you off soon's I set me lamps on you. Don't youse know me?"

I looked at the bandaged face wonderingly. Then, with a great start, I saw it was the Worm.

"Tain't no horse does me up," he said in a hoarse whisper; "it was a man. You know de man, de worst devil in all Alaska, Black Jack. Bad luck to him! He knocked me down and give me de leather. But I'm goin' to get even some day. I'm just laying for him."

The man's eyes glittered venomously between the white bandages.

"Twas all on account of de little girl he done it. You know de girl I mean. Black Jack's dead stuck on her, an' de farder she stands him off de more set he is to get her. Youse don't know dat man."

"Tell me what's de matter, for Heaven's sake."

"Well, when youse didn't come, de little girl she got worried. I used to be doin' chores round de restaurant, an' she asks me to take a note up to you. So I said I would. But I got on a drunk dat day, an' for a week after I didn't draw a sober breath. When I gets around again I told her I'd seen you an' gives you de note an' you was comin' in right away."

"Heaven forgive you for that."

"Yep, dat's what I say now. But it's all too late. Well, a week went on an' you never showed up, an' meantime Locasto was pesterin' her cruel. She got mighty peaked like, pale as a ghost, an' I could see she cried most all her nights. Den she gives me another note. I said she could lay on me dis time. I was de hurry-up kid an' I starts off. But Black Jack meet have cottoned on, for he meets me back of de town an' takes me wid takin' a spangus. Den he sets on me like a wild beast an' does me up good and proper. But I'll fix him yet."

"Where are the notes?" I cried.

"In de pocket of me coat. Tell de nurse to fetch in me clothes, an' I'll give dem to youse."

The nurse brought the clothes. There were the notes, folded very small, and written in pencil. There was a strange faintness at my heart, and my fingers trembled as I opened them. Fear, fear was clutching me, compressing me in an agonizing grip.

Here was the first.

"My Darling Boy: Why didn't you come? I was all ready for you. Has anything happened to you, dear? For Heaven's sake write or send a message. I can't bear the suspense."

"Your loving
"Berna."

Blankly, dully, almost mechanically, I read the second.

"Oh, come, my dear, at once. I'm in serious danger. He's grown desperate. Knew if he can't get me by fair means he'll have me by force. I'm terribly afraid. Why have you failed me? Oh, my darling, have pity on your poor little girl. Come quickly before it is too late."

It was unsigned.

Heaven! I must go to her at once. I was well enough. I was all right again. Why would they not let me

go to her? I was strong, so strong now.

Hal there were the Worm's clothes. It was after midnight. The nurse had just finished her rounds. All was quiet in the ward.

Dizzily I rose and slipped into the frayed and greasy garments. There were the hospital slippers. I must wear them. Never mind 'at.

I was out in the street. I shuffled along, and people stared at me, but no one delayed me. I was at the restaurant now. She wasn't there. Ah! the cabin on the hill.

I was weaker than I had thought. Many times I stumbled, cutting myself on the sharp boulders. The way seemed endless, yet stumbling, staggering on, there was the cabin at last.

On my hands and knees, I crawled to the door and hammered with clenched fists. There was silence within, then an agitated movement. I knocked again. Was the door ever going to be opened? At last it swung inward, with a suddenness that precipitated me inside the room.

The madam was standing over me where I had fallen. At sight of me she screamed. Surprise, fear, rage, struggled for mastery on her face. "It's him," she cried, "him."

"Berna," I gasped hoarsely. "Where is she? I want Berna. What are you doing to her, you devils? Give her to me. She's mine, my promised bride. Let me go to her, I say."

All at once I realized that the air was heavy with a strange odor, the odor of chloroform. Frenzied with fear, I rushed forward.

Then the Amazon roused herself. With a cry of rage she struck me. Savagely both of them came for me. I struggled, I fought; but, weak as I was, they carried me before them and threw me from the door. I heard the lock shoot; I was outside; I was impotent. Yet behind these log walls . . . Oh, it was horrible! Could such things be in God's world? And I could do nothing.

I was strong once more. I ran round to the back of the cabin. She was in there, I knew. I rushed at the window and threw myself against it. Crash! I burst through both sheets of glass. I was cruelly cut, bleeding in a dozen places, yet I was half into the room. There, in the dirty, drab light, I saw a face, the scalding, rage-distorted face of Locasto.

He turned at the crash. With a curse he came at me. Then, as I hung half in, half out of the window, he clutched me by the throat. Using all his strength, he raised me further into the room, then he hurled me rathlessly out onto the rocks outside.

I rose, reeling, covered with blood, blind, sick, speechless. Weakly I staggered to the window. My strength was leaving me. I felt the world go blank. I swayed; I clutched at the walls; I fell.

I had lost!

"No, no, I'm all right. Really I am. Please leave me alone. You want me to laugh! Hal! Hal! There! Is that all right now?"

"No, it isn't all right. It's very far from all right, my boy."

It was in the big cabin on Gold Hill, and the Prodigal was addressing me. He went on:

"Now, look here, kid. I'm giving you a straight line of talk. Ever since the start I've taken a strong notion to you. We've been in tight places together; we've been stacked up against hard times together; and now I'll be got-darned if I'm going to stand by and see you go downhill, while the devil oils the bearings."

"Oh, I'm all right," I protested.

"Yes, you're all right," he echoed grimly. "In an impersonation of an 'all-right' man it's the look for yours. I've seen 'all-right' men like you hitting the berry trail for the boyeyard."

Roman Bridges Excite Wonder of Engineers

Among the notable bridge-building achievements of history are those constructed in the days of the Roman empire, says a writer in the Detroit News. Some of them still are in use, to the amazement of engineers, while others stand in broken majesty, the results of earthquakes or of purposeful human destruction. For the delight and wonder of all beholders.

The two bridges, which lead from the Forum side of Rome to the island in the Tiber and on to the Trajanere, or St. Peter's side, were built in the Second century, B. C. They have been used very much more than the Apollon Way viaduct. They have stood there against frequent floods and constant usage these 2,000 years and they bid fair to keep on standing. The Sea

Term of Obligation

"Recapitulation" is a form of radicalism, which comes from racial, meaning a low, weakling person. Recapitulation means about the same thing, although there is a tendency to use it in an affectionate sense, especially when speaking to a belated boy or a mischievous dog.

before now. You've lost your grip, my boy. You don't care whether school keeps or not. In fact, if it wasn't for your folks, you'd as lief take a short cut across the Great Divide."

"It's all very well for you to preach," I said; "you forget I've been a pretty sick man."

"That's no nursemaid's dream. You almost cashed in. Typhoid's a serious proposition at the best; but when you take a crazy streak on top of it, make a midnight getaway from the sickward and land up on the Slide looking as if you'd been run through a thrashing machine, well, you're sure letting death get a short option on you. And you gave up. You didn't want to fight. You shirked, but your youth and constitution fought for you. They were a great team, and they pulled you through. And you weren't one bit grateful—seemed to think they had no business to butt in."

"My hurts are more than physical."

"Yes, I know; there was that girl. As I camped there by your bedside listening to your ravings, and getting a strange hold on you when you took it into your head to get funny, you blabbed out the whole yarn. Oh, sonny, why didn't you tell your uncle? Why didn't you put me wise? I could have given you the right steer. But you kept mum as a mummy. Wouldn't even tell your old pard. Now you've lost her."

"Yes, I've lost her."

"Did you ever see her after you came out of the hospital?"

"Once, once only. It was the first day. I dragged along wearily, leaning on a stick. I was thinking of her, thinking, thinking always. Then suddenly she was before me. She looked like a ghost, poor little thing."

"Yes, what did she say?"

"Say! she said nothing. She just looked at me. Her face was cold as ice. She looked at me as if she wanted to pity me. Then into her eyes there came a shadow of bitterness, of bitterness and despair such as might gloom the eyes of a lost soul. It unnerved me. Then she drew a great, gasping breath, and turning on her heel she was gone."

"She cut you?"

"Yes, cut me dead, old fellow. And my only thought was of love for her, eternal love. But I'll never forget the look on her face as she turned away. It was as if I had lashed her with a whip. My God!"

"And you've never seen her since?"

"No, never. That was enough, wasn't it? I went back to the ward; then, in a little, I came on here. My body was living, but my heart was dead. It will never live again."

"Oh, rot! You mustn't let the thing down you like that. It's going to kill you in the end. Buck up! Be a man! If you don't care to live for yourself, live for others. Anyway, it's likely all for the best. Maybe love had you locked. Maybe she wasn't really good. See now how she lives, openly with Locasto."

I rose and looked at him, conscious that my face was all twisted with the pain of the thought.

"Look here," I said, "never did God put the breath of life into a better girl. There's been foul play. I know that girl better than anyone in the world, and if every living being were to tell me she wasn't good I would tell them they lied, they lied. I would burn at the stake upholding that girl."

He looked at me thoughtfully.

"I say, old man, do you ever hear from your old lady?"

"Every mail."

"Why not go back? That's your proper play; go back to your mother. She wants you. You're pretty well healed now. You'll be comfortable; you'll devote yourself to the old lady; you'll be happy again. I hate to see you go. I'm really sorry to lose you; but it's your only salvation, so go, go."

Never had I thought of it before. Home! How sweet the word seemed. Mother! yes, mother would comfort me as no one else could. She would understand. Mother and Garry! A sudden craving came over me to see them again. Home! that was the solution of it all. Ah, me! I would go home.

"Yes," I said, "I can't go too soon; I'll start tomorrow."

So I rose and proceeded to gather together my few belongings. In the early morning I would start out.

(TO BE CONTINUED)

South West NEWS ITEMS

Members of the board of education of Tucson discussed the necessity of a new building program at a meeting held in Tucson, and it is expected that a vote on a bond issue in the neighborhood of \$450,000 will be called soon as a result. A junior high school and a grammar school would be added to the present buildings under the plan.

The New Mexico Highway Commission recently sold \$2,000,000 worth of state highway debentures to the John Nuveen Company of Chicago and associates. The debentures will pay 6 per cent interest, with premium of \$1,837. Four other bond houses participated in the combination bid.

Clarence Kent of State College, a son of President Harry L. Kent of New Mexico and M., has been recommended by the scholarship committee of A. and M. as a candidate for the New Mexico Rhoades scholarship. Kent will appear before the state committee on Rhoades scholarships on December 7.

A contract has been awarded for grading and surfacing approximately thirty-five miles of highway on U. S. 66 from Winslow to Canyon Padre.

The City Council of Nogales recently authorized the fire committee to advertise for bids for the purchase of a modern fire engine at a cost of approximately \$10,000.

Contractors for construction of three new armories in Arizona were awarded a few days ago. Elliott Long of Safford was awarded contract for building armory in that city on his bid of \$22,668. T. L. Weatherford of Phoenix was successful bidder for construction of armories at Douglas and Nogales, his bid for both being \$41,532.

Arthur R. Cox, Tulsa, Okla., barber, was freed of first-degree murder charges in Phoenix after the decision of Superior Judge Joseph S. Jencken in ruling that the state had not presented sufficient evidence to hold him for trial. Cox, who was accused of shooting his wealthy Creek Indian wife, Minnie Cox, maintained the shooting was accidental.

Through an agreement between the new Federal Farm Board and the Pima Cotton Growers' Association, the association has secured a loan of \$250,000 for five years at a rate of interest less than 4 per cent, based on stock owned in co-operative associations. A. H. Thompson, manager of the Safford branch of the cotton growers' association, stated in Safford on his return from attending the annual meeting of the association, held in Phoenix.

Work on the erection of a \$100,000 hospital in Safford is to begin soon, and will be completed as rapidly as possible. The hospital is being established by Drs. J. W. Morris and H. W. Squibb, who, with Mrs. Sioux Squibb, have formed a corporation to be known as the Morris and Squibb Hospital, Inc. The company is capitalized at \$100,000, divided into one thousand shares of the par value, of \$100 each. G. A. Todd, Safford, will have charge of the building.

The industrial employment survey report, recently issued by the U. S. employment service of the U. S. Department of Labor, at Denver, states that the volume of industrial activity and employment seasonally increased in New Mexico during September, with the supply of labor equal to demands except for a slight shortage of cotton pickers reported in the southeastern sections of the state. Industrial plants, except saw mills, reported steady operations. Metal mining was normally active and considerable new metal mine construction and development work was under way in many metal mining districts, particularly at Quezota. Metal mine labor supply and demand was fairly well balanced. A seasonal increase in coal mining occurred at Raton and other mining districts, with ample supply of miners available. The report states that there was an upward trend in industrial employment in Arizona during September. The supply of labor equaled the demands in all lines, except agriculture, which reported a demand for several thousand additional cotton pickers, particularly in the Salt River valley. Cultivation of an increased acreage of lettuce in the Salt River valley has given employment to many field workers. Manufacturing plants operated steadily, the cotton gins starting their seasonal run during September. Metal mining was active, although producing copper mines revealed a temporary slight reduction in output and forces. The supply of metal-mine labor equaled demands in most localities.

Statistics just released from the registrar's office at the University of New Mexico on the registration for 1924-25, indicate an increase of 314 students over the matriculation for 1923-24. The total for the current school year is 663 students, the men numbering 497 and the women 166, according to the compilation, just made by Miss Alice Olson, acting registrar.

Desert Petroleum Company of Holbrook, capitalized at \$750,000, was recently granted papers of incorporation.

FOR ECONOMY Buy the family size package

Mexico Growing Tea The common oriental tea of trade is now produced in small but commercial quantities in Mexico, according to the Mexican ministry of industry, commerce of labor, which has some samples of this possibly new agricultural product at Mexico City. This Mexican tea, which is of good quality, is being produced by a private planter who has been experimenting near Culcatica, Oaxaca, for some years. The fact that Mexico can produce this tea may become of great significance, for heretofore all tea-drinking countries have been dependent upon the Orient with its monopoly price.

The Right Way to Redye Fine Silks

Textile makers always use special dyes for silk or wool. They know that is the best way. The makers of Diamond Dyes are the first to enable home dyers to follow this plan.

Next time you want to dye some of your more valuable articles of silk or wool, try the special Diamond Dyes in the Blue Package. They will give these materials clearer, more brilliant colors than any "all-purpose" dye. And they are just as easy to use as ordinary dyes. Like the white package Diamond Dyes, these dyes contain an abundance of the highest quality alkalies. The blue package dyes silk or wool only; the white package dyes, or furs, any material. Either package; 15c, drugstores.

Coxey Good-Roads Advocate When Coxey led his army of the unemployed to Washington, he was worth \$1,000,000 or more. He was particularly interested in good roads, and the "army" had its inception in his belief that the roads should be improved throughout the country as a means of furnishing work for the unemployed. He has lived to see a miraculous change in the highways of the United States.

The Pants She Fasted For The will has just been proved of a man living in a southwest suburb of London who died last November, in which he left to his wife: "One pair of my trousers, free of duty, and carriage paid, as a symbol of what she wanted to wear in my lifetime, but did not."—English Paper.

Considerate Hill—I hear you've quit golf. Gill—Yes, I did it for the wife and caddies.—Judge.

Sympathize with a boy in his troubles if you want to everlastingly win a human heart.

HAD TO WORK TOO HARD

Lydia E. Pinkham's Vegetable Compound Gave Her Strength

Mt. Carmel, Pa.—"After my second baby was born I had to work too hard and be on my feet too soon because my husband was ill. After his death I was in such a weakened and run-down condition that nothing seemed to help me. I am starting the fourth bottle of Lydia E. Pinkham's Vegetable Compound and feel a great deal better. I am much stronger and don't get so tired out when I wash or work hard. I do housework and am getting on my feet. I highly recommend the Vegetable Compound to all women. I am willing to carry my letters I receive about it."—Mrs. Annamaria Stewart, Mt. Carmel, Pa.

WHY WE BEHAVE LIKE HUMAN BEINGS

By GEORGE DORSEY, Ph. D., LL. D.

How and Why Bodies Fossilize

UNLESS well protected, or in rainless Peru or Egypt, or in dry caves, or in the cold storage of Arctic ice, or in oil, wax, or amber, the body soon yields to the bacteria of decay or to the teeth of wolves and hyenas. For bone or other tissue to be replaced by mineral whereby it petrifies or "fossilizes," many conditions must be right. The wiser the animal, the less likelihood of its being caught in quicksands or engulfed by the gravel and silt of floods. Primitive man was a little ennobled as we are of being buried alive.

Fossil remains of the famous Cro-Magnon man have been found in Wales, and especially in France. Possibly earth never saw finer built human beings. His brain was 15 per cent larger than ours, his stature taller than any living race by two inches. He was clean-limbed, lithe, and swift. He had a good chin, thick and strong jaws. His head was long, his face broad. He buried his dead. He was an artist and an artisan. He lived about 25,000 years ago. Did he become an ordinary European, or did he disappear? No one knows.

Beyond Cro-Magnon, our forebears rather run to brutish customs. Grimaldi man was of the Negroid type, Neanderthal man had a huge head, chipped flat, and buried his dead. He is set down at 50,000 B. C. and left no known heirs. He is the first known cave-man.

The jaw of Heidelberg man fits a gorilla, but the teeth are ours. He is possibly 400,000 years old. Pittdown man is possibly a hundred thousand years old. Some think he was an ape. Some say he was the first Englishman. We have reached a point in time where no one knows who's who.

The champion fossil is Pithecanthropus erectus (ape-man erect), discovered by Dubois in Java in 1891. He is certainly a half million years old; some say a million. He is more pithecanthoid than any known human being, more anthropoid than any known ape. He was as erect and almost as tall as the average European. He had a small brain, left the "well-ventilated arched tentacles." He was a low-browed morp— and may be represented in the living flesh. But whether he was of the direct line that led to man, or only of a line that ended with himself, is not yet definitely known. It is enormously significant that, after a debate lasting more than a quarter of a century, the biologists of the world cannot decide whether Pithecanthropus erectus belongs to the first or the second of the earth's First Families. That makes him a pretty good link that is no longer missing.

To import monkeys for their sex glands is a ghastly business, perhaps the lowest that has engaged the cupidity and lust of man, but to shoot down animals as we do mad dogs or boys in uniform is a crime. The four Anthropoid apes are our next-of-kin living; they should be respected as cousins and not exterminated as vermin or Indians.

Man was never a gorilla, a chimpanzee, an orang, or a gibbon. No biologist ever made such a claim. Whether these apes could have developed into human beings is a different story. They have the makings—all the parts. If we know how heredity works and could control variation, we might breed from an ape a being that could dig a ditch, play the piano, talk English, and sing the "Marseilles." We can teach them to smoke cigarettes, chew tobacco, drink beer, wear clothes, and eat with a knife and fork. We do not yet know the limit of their capacity to learn human ways.

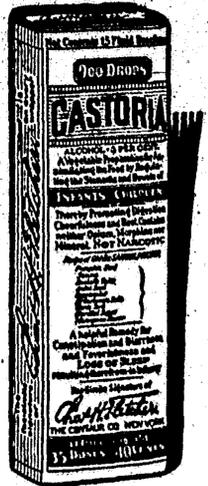

Why do zoologists put these four apes so close behind us that we can feel their breath and they can catch our diseases? Because they are Anthropoid. Nothing has yet surpassed them in the race to become human. Their anatomy, embryology, histology, morphology, paleontology, physiology, and psychology entitle them to second place in the Ancient and Honorable Order of Firsts.

They vary in their man-likeness; no one is in all ways closest to man. The orang looks like an Irishman; the gorilla is built like Jack Dempsey; the chimpanzee is the most angelic; the delicate gibbon has a lady-like skull—of an upright carriage. The first three—the Great Apes—are the extremes of variation from a generalized ancestor. The gibbon varies least, and to that extent is nearest the tree man climbed down when he decided to stand up and talk.

Except in teeth, the young female gorilla is the most human. Her father is a brute in size and appearance. Only five feet high, he may weigh over 400 pounds; mostly neck, chest, and arms. If his legs were of human proportions, he would stand over seven feet high.

The chimpanzee, like the gorilla, lives in jungle Africa. Like the gorilla, he has a shuffle-along gait, swinging his body between his long crutch-like arms. He has the gorilla's proportions, but never the great bulk of chest. And he is more at home in the trees, where he builds his nest, as does the orang. The chimpanzee's skull is not unlike the one ape-man erect tried on when turning into man—and gave up because it had too much jaw for the teeth required and not enough brain-box for ideas.

When BABIES are upset

Baby ill and ailments seem twice as serious at night. A sudden cry may mean colic. Or a sudden attack of diarrhea—a condition it is always important to check quickly. How would you meet this emergency—tonight? Have you a bottle of Castoria ready? There is nothing that can take the place of this harmless but effective remedy for children; nothing that acts quite the same, or has quite the same comforting effect on them.

For the protection of your wee one—for your own peace of mind—keep this old, reliable preparation always on hand. But don't keep it just for emergencies; let it be an everyday aid. Its gentle influence will ease and soothe the infant who cannot sleep. Its mild regulation will help an older child whose tongue is coated because of sluggish bowels. All druggists have Castoria; the genuine bears Chas. H. Fletcher's signature on the wrapper.

Old Town to Change Name
Trondhjem, an ancient Norwegian town, which is known principally in the public mind as the most northerly town of any considerable size will change its name after the first of next year. It will return to the original name by which it was known up to the middle of the Sixteenth century and that is Nidaros. The town is situated but a short distance below the Arctic circle.

Lucky Man!
Will—"Who is that congratulating the bridegroom?" Whap—"The fellow she tried to get but couldn't."

If a man feels superior to the public, he either tries to instruct it or exploit it.

Butterfly 5,000 Feet Up
For the entomologist Mount Washington has long been a favorite collecting ground, says Nature Magazine. Passing through rich Canadian fauna at the base, where the natural conditions have been practically undisturbed, we enter near the timber line the sub-Alpine where in August are found the mountain fritillary and the wingless grasshopper, two of the more striking species of this zone. At an elevation of above 5,000 feet we reach the home of the White Mountain butterfly.

Wealth makes keeptomianlax; poverty makes thieves.

Don't be in a hurry except when you are in danger.

The Mark of Genuine Aspirin..

BAYER ASPIRIN is like an old friend, tried and true. There can never be a satisfactory substitute for either one. Bayer Aspirin is genuine. It is the accepted antidote for pain. Its relief may always be relied on, whether used for the occasional headache, to head-off a cold, or for the more serious aches and pains from neuralgia, neuritis, rheumatism or other ailments. It's easy to identify Bayer Aspirin by the Bayer Cross on every tablet, by the name Bayer on the box and the word "genuine" always printed in red.

Aspirin is the trade mark of Bayer Manufacturing of Monachheim, Germany.

Locates Sunken Treasure
H. P. Douglas, an English naval officer, has, by means of a contrivance known as the sonic depth finder, discovered a way to locate sunken treasure. The instrument, by sending out sound waves and recording the elapsed time before the echo returns, calculates the distance between itself and the reflecting surface on the ocean floor.

Faithful Burglar
Winchester, Va., has a burglar who insists on having only new money. Some of the smaller paper currency and several old notes were displayed in a jeweler's window. The robber of discriminating taste heaved a padded brick through the window and helped himself to the new, leaving the old and also some attractive silverware.

When a White Collar Man "Goes Army"

Perhaps he doesn't learn a few things!

DON'T envy a man who "only has to work a typewriter." So we were told by Mr. Solo E. Bloom, of 3503 Woodbrook Avenue, Baltimore, Md., whose health began to give way because his work gave him no bodily exercise.

"I decided to get away to a military training camp," says Mr. Bloom, "thinking the rough and tumble with the army would do me good for a month. I asked the doctor what to do about my condition. 'I've seen men, I've known men,' he said. 'I know what they eat, drink, and how they live. I know cathartics, physics, and all the ways men try to keep themselves regular—and the only two that go together well are men and Nujol. Nujol soothes and heals the membranes and expels bodily poisons normally, naturally, so that you are regular as clock-work.'"

into the army. If you are like most other people, you too will find that Nujol will make all the difference in the world in the way you feel.

Remember Nujol is not a medicine, for it contains no drugs of any kind. It is simply bodily lubrication that everybody needs.

That was what Mr. Bloom learned when he left his typewriter and went

You can get a bottle of Nujol at any good drug store, in a sealed package, for the price of a couple of good cigars. If you will start today and try it for two weeks you will agree that Nujol is the easy normal way to keep well and make a success out of your life. You will be astonished at the results!

LOCAL AND PERSONAL

Dr. F. H. Johnson made a business trip to El Paso Saturday.
FOR RENT—Three room house. 44 See Mrs. A. H. Harvey.
 Mr. and Mrs. Morgan Lovelace spent the week-end in El Paso.

Mrs. Jane Gallacher has been a sufferer from neuritis the past week.

Bob Sowder shipped out a car of calves for Amarillo, Texas, last Saturday.

Mr. and Mrs. Tom Zumwalt, Nogal, are the happy parents of a baby boy, born Monday night.

A baby boy was born to Mr. and Mrs. L. B. Chapman Thursday of last week. He was named George Washington after his grand father.

J. C., son of Mrs. Barney Ward, is a scarlet fever victim. The case has been quarantined, and little fear is entertained that it will spread.

Mr. and Mrs. Victoriano Lopez, of White Oaks, are rejoicing over the arrival of a baby girl, born Wednesday morning, at their temporary residence, on the south side.

Mayor Byron of Polly came up one morning this week and reported a heavy rain in his vicinity the night before. The mayor, therefore, continues to advocate the paving of Polly's streets.

Charles Littell was down yesterday from White Oaks. Charlie is somewhat improved since his last visit to our office—Mrs. Littell has returned from Arizona and has charge of the cuisine.

Mr. and Mrs. E. H. Walker, of Los Angeles, returning from a visit to their old home at Des Moines, Iowa, stopping over this week for a short visit with the two brothers here, Dan and R. A., and Mrs. Walker.

Mrs. D. R. Stewart returned Wednesday from a three weeks' visit to Texas. She first went to Stamford to look after business interests, and then to Dallas, where she spent the remainder of her time with her daughter, Miss Lucile.

Mr. and Mrs. Seaborn P. Gray and children came down Saturday from Pecos, New Mexico. They later went to Carlsbad Caverns, and were accompanied as far as Roswell by the mother, Mrs. Sarah C. Gray, who will visit with Walter Gray and family. Sebe and his bunch returned last night.

Mrs. Louise H. Coe came down Friday from Albuquerque enroute to her home at Glencoe. She was accompanied by Kivan Tully, of Glencoe; Miss Julia Penfield, of Lincoln, and Miss Ruth Brickley, of Carrizozo. The quartette returned to Albuquerque Monday to continue their work in the State University.

Mrs. George Dixon is teaching this year at Bluewater, and many friends welcome her return to Lincoln county. She has taught several years in this county, and her work always has been high character. The people of the Bluewater community are fortunate to have the services of such an able, valuable and experienced instructor.

Mrs. Pacheco Dies

Mrs. Pacheco, wife of Juan Pacheco, died at the family home on the south side, Sunday night. Mrs. Pacheco had been ill over a lengthy period, and her death, though not unexpected, has created deep sorrow among her many friends. Funeral services were conducted from the Catholic church Monday morning, and interment made that day in the local cemetery. The family has lived here the past ten years. A husband and seven children—five girls and two boys—survive, to whom sympathy is extended.

Force pump—Life history of the fly.
Life history of the mosquito.—How the sun is eclipsed. Cells and how they divide.

Oil paintings by Albert B. Moss, assistant principal of Lincoln schools, were also displayed. The names of those displayed are: 1. Autumn. 2. Spring. 3. Dutch Windmill scene. 4. Love's divine gift. 5. Pairs. 6. Picaninny and watermelon.

The 7th and 8th grade exhibit, Mrs. Alice M. Boyd, teacher. Colored wet paper maps of South America, Leandro Zamora, 8th grade. Wet paper map of the United States, Refugio Romero, 7th grade. Two health posters made from an assortment of vegetables, Felix Zamora, 8th grade, Esaleta Chavez, 7th grade. Two water color pictures—1 ship scene, Juan Luna, 8th grade, 1 sunset scene, Juan Luna, 8th grade.

Spelling book, containing words giving thus far this year, 100 being the grade on each lesson. Back cover was a very difficult water color designed by Eselis Salazar, 8th grade. 1st, 2nd and 3rd grades. Miss Callie Mae Morris, teacher. An Eskimo Tableau made by 3rd grade geography class. Material for project very simple and easily obtained. Background made from blue-grey construction paper, with icebergs cut from white paper and pasted on blue-grey background. Igloo—made from half of a rubber ball covered with flour paste. Sled—made from willow twigs fastened together with glue and small nails. Dogs—sawed from and covered with rabbit fur. Eskimos—small dolls dressed in fur, snow scene covered with artificial snow.

Abraham's log cabin—made from the sand table by two first grade boys. Walls made from willow twigs, fastened together with glue and small nails. Roof made of brown construction paper and glued on. Health poster. On the Road to Health, made by 1st 2nd and 3rd grades. Each child drew a picture of some healthful food to be placed on the poster. By so doing each child had an interest in the poster. Other health posters made by the 1st and 2nd grades. Nature Art Posters, made by second and third grades; booklet, contained pictures of flowers, birds and butterflies, that the children were familiar with. Drawn and colored with crayons.

Third grade spelling pads mostly spelling lessons of three pupils in the third grade.

Arithmetic note book—book contains check ups and time tests of 1st and 2nd grades number work and 3rd grade arithmetic. Samples of writing—3rd grade language class. Poem written from dictation and punctuated correctly. Primary room, Agnes M. Chambers, teacher. The exhibit from the primary room was illustrated material, used in teaching mother goose rhymes, nature and history stories, Flol Lore, health, safety first and citizenship.

Character Dolls—These dolls were made of paper spoons and sacks dressed in crepe paper, representing Martha Washington, Pilgram woman, Spanish girl and Mary quite contrary.

Birds in wings.—Peanuts colored with crayon, with crepe paper wings and tails, wire pipe cleakers for feet and legs. These were used for nature study of robins, blue-birds, wood-peckers and cardinal birds. Bird cages made of soda straws strung on yarn, illustrating the care of birds.

Stand up cut outs, the three bears used in story telling and animal stories.

Language lesson by the high primer class, stencils of animals and birds, with sentences written on them.

Illustrated number lesson; these were lesson sheets of pictures of apples, cats, trees and hats in free hand drawing.

Modelling in soap.—A rabbit and a duck out from cakes of soap. Several health posters were: Wash your hands before eating, eat more vegetables, drink milk, illustrated by a large milk bottle, with pictures of healthy children on it. Safety first posters, showing danger from fire and firecrackers. Mother Goose posters, and another in which Jack and Jill were joined. Dominoes of black construction paper with colored parquetry squares—used for number work.

Some of the boys made cock-horses; these were horses heads and necks cut from brown construction paper and tacked on sticks, with bridles and reins made of tapes. These they rode to the rhyme of, "Ride a Cock horse." A stand up horse in a barn made of construction paper—used in teaching care of animals.

The very small primary children had their share in the exhibit—they cut soda straws in small pieces and strung them with parquetry papers—these were used for counting.

In the High School exhibit, we consider the Commercial and Industrial Map of the United States the outstanding feature. Albert B. Moss.

In the 7th and 8th grades, we consider the Wet Paper Maps of South America and the United States the outstanding features. Alice M. Boyd.

In the 4th, 5th and 6th grades we consider the illustrated booklet of Lincoln and its history the outstanding feature. Nellie Pfingsten.

DO YOU DEMAND STYLE IN YOUR CLOTHES?

YOUR'RE only as up-and-coming as the cut of your clothes for appearance does count in this busy world where first impressions are often the only impression.

COME!

To Ziegler Bros. and let us show you the newest styles in men's wear for fall in brands of men's furnishings that are giving national satisfaction.

Marx Made Suits 27.50 and at

Berlin Leather Coats \$22.50 at 12.50 to

Berlin Lumber Jacks at \$5.85 and up
 Bradley Sweaters at \$4.85 to 10.00
 Coopers Hosiery, Coopers Pajamas, Coopers Union Suits, John B. Stetson and Knox Hats, Florsheim Shoes, Sure-Fit Caps, Phoenix Long-Life Neckwear, Wilson and Arrow Shirts

This is The Good Merchandise you'll find at ZIEGLER BROS.

In the 1st, 2nd and 3rd grades we consider the Eskimo tableau the outstanding feature. Callie Mae Morris.

In the primary, we consider the Character Dolls the outstanding feature. Agnes M. Chambers. Respectfully submitted, J. F. Chambers, Principal.

Carrizozo School Exhibits

The Carrizozo school was awarded the red ribbon for collective exhibits. It is proper to mention some of the particular points observed.

The "wee tots" and the first grade in the Carrizozo school deserve much credit for their work in printing and construction of various articles of paper furniture, free hand silhouettes and drawings and posters.

The second grade crayola pictures, wood candle sticks and paper cut out shades were most pleasing and would have been difficult for more advanced children.

The third grade showed their skill and proper training of muscles in wood construction of carts, box ends, etc. as in art work.

The fourth and fifth grades had an excellent display of carefully kept notebooks in history. In the lighter vein they exemplified an unusual artistic ability.

The outstanding feature of the sixth grade was pictures painted on tin foil and neatly framed making a very attractive display.

The seventh and eighth grades had progressive citizenship by industry chart, keeping up with the time in current events as well as a few pictures in water color and charcoal.

Space does not permit me to go into detail of the work of the Carrizozo school but a visit will tell you more than the exhibit.

(Editor's Note: Two reports are lacking—therefore they won't appear until next week.)

"Red Lips," Junior Class

The Junior Class in the local High School will present a picture at the Crystal Theatre, Monday night, November 4. The title of the feature is "Red Lips," which is quite appropriate, inasmuch as it is sponsored by a boy of beautiful girls.

Snows have Come

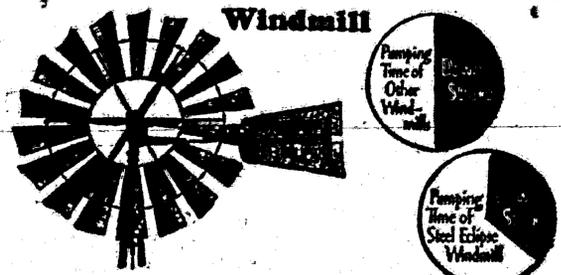

The White Mountains, glistening in the distance with a mantle of the "beautiful", on a characteristic vision, display to the

Entertain Friends

The Stillwell home, at Coyote, was the scene of a pleasant gathering of friends last Friday evening. Mrs. Stillwell served a chili dinner—with all the trimmings—and everybody had a hot time and a delicious feed.

world their title. Snow has fallen night or day on that mighty range, during the week, laying the foundation for next year's water supply, which will become evident about May. In the lowlands the moisture was in the form of rain.

STEEL ECLIPSE

Starts sooner—pumps longer

Two windmills stood just across the road from each other. With the first sign of a breeze one started up smoothly and quietly. When the breeze became a wind, the other started with a great and lumbering creak only so long as the wind raked a dust in the road. Then it stopped as abruptly as it had started, while the other continued pumping for some time—then it finally came to rest with the last trace of the drying breeze.

That is the difference between a copper windmill and just a windmill. It is the difference between accurately machined—3 fitted gears and ordinary cast gears; the difference between turned, ground and polished shafts and ordinary steel shafts.

The difference between machined and polished bearings and ordinary bearings; the difference between running in oil and running with dry gears.

In other words, it is the difference between the Fairbanks-Morse Self-Starting Steel Eclipse Windmill and just a plain windmill.

Come in and see this great advance in windmill construction. See the self-oiling feature—the castor oil feature—the mechanism that makes the Eclipse actually pump water during two-thirds of every revolution of the wind wheel. You will form a new idea of how good a windmill can be.
