CARRIZOZO, NEW MEXICO, FRIDAY, MAY 23 1930

NUMBER 21

## "She" Spends 25-Year Salary for a Nomination

Washington, May.—Campaign expenditures by and behalf of "Lady Beautiful," otherwise Representative Ruth Hanna McCormick of Illinois, Republican nominee for Senator, were again brought into the glare of the limelight when the Illinois Democratic state convention adopted a resolution calling upon voters to consider former Senator James Hamilton Lewis, the Democratic nominee, as the only legal candidate based upon report that about \$750,000 had been expended in behalf of Mrs. McCormick in addition to her own expenditures, or a total of a million dollars.

When Mrs. McCormick testified before the Nye Senatorial Committee investigating campaign expenditures that she had expended \$252,000 in the primary, the Illinois and Pennsylvania primaries of 1926, in which the expenditures by and in behalf of Frank L. Smith and William S. Vare respectively, resulted in investigations which barred them from the Senate, were brought to mind, and also the case of Truman H. Newberry of Michigan, in the 1918 primary campaign when the expenditure of \$195,000 was condemned by the Senate in a resolution which read:

"The expenditure of such excessive sums in behalf of a candidate either with or without his knowledge and consent, being contrary to sound public policy, harmful to the honor and dignity of the Senate, and dangerous to the perpetuity of a free government, such excessive expenditures are hereby severely condemned and disapproved."

The debate on this resolution made it clear that the declaration of policy was intended as a warning that the Senate would not thereafter seat Senators elect who violated it, and so far the Senate has not done so.

The salary of a Senator for the entire term of six years is \$60,000; the amount expended by Mrs. McCormick to obtain a nomination to the office is equal to the salary of a Senator for 25 years.

Mrs. McCormick challenges the statement that enough money was spent in her behalf to cover the salary of a Senator for 100 years.

A few days after a farmer had placed his two children in school, a book agent called on him and said: "Now that your children go to school you ought to buy them an encyclopedia."

"Buy them an encyclopedia? I'll be hanged if I do!" was his reply: "Let them walk as I did!"

## Ft. Stanton News

The last week of school is being observed rather quietly owing to sickness among the children; most of the examinations are over and the children know who has been promoted and who has failed. Most of the children have accomplished more than the work required in the study course prescribed by the state. Thursday an all day picnic for the children and their parents will be held. These affairs are always well attended and much enjoyed.

The two ball games Saturday and Sunday were well attended and enjoyed. Ft. Stanton won both games by a good margin. Lupe Flores came over from Tularosa for Saturday's game and hurled the boys to victory, having almost perfect support. Bunny Hemphill has been elected field captain and will be given the support of the team and management. Moody pitched for the boys Sunday, and with Cox on second and Shipman playing center field the plays were nearly perfect.

We have had several car salesmen here for several days. The result is several new cars on the post. Chas Ferris, Mrs Gensler, Miss Converse owners of new Plymouths, while Mr Fagan has been seen driving a Graham-Paige, but says it isn't his yet.

Mrs Ernest Ludlow, of Raton, accompanied by her two children, will arrive the last of the week for a month's visit with her sister, Mrs. Tom Burleson.

Little Gene Merrel and Maxine Fogel are much improved at this writing.

We were very glad to see Mrs. Bob Ferris far enough along in her convalescence to attend church Sunday. She has been very ill with a serious infection for the last two months, and her many friends are glad to see her out again.

Dr. Faget returned Monday to a two week trip to New Orleans, Cleveland, Ohio, and other points. We were glad to see him with us again and hope the Department will decide to leave him as commanding officer.

We are indebted to Mrs Bob Boyce, of the Navaj Lodge, who Sunday evening after the ball game brought the orchestra, which is playing at the Lodge for the summer, to Ft. Stanton for an hour's music. The amusement hall was crowded and the music much enjoyed in the wards.

Maquet Mifer and family spent the week-end in Roswell, with relatives of both Mr. and Mrs. Mifer.

Mr. Perry Humphrey, an old resident of Lincoln county, was shaking hands with old friends at the ball game Sunday. He is now located in Capitan.

## Tariff Opposed by Nation's Economists

Washington.—The following is a summary of the indictment drawn against the pending tariff bill by 1,028 economists, and teachers of economics, identified with 179 colleges in 40 states, urging President Hoover to veto the bill if it passes Congress:

It would increase prices to the domestic consumer, with no possibility of benefiting many classes of workers and all professional people, whose products enjoy no tariff favor.

It is of no benefit to the vast majority of farmers, whose products have no important competition in the home market, compelling them to pay higher prices for what they buy and restricting the sale of their products abroad.

It would injure American export trade by restricting imports, affecting not only foodstuffs, but the products of exporting industries such as copper, automobiles, agricultural machinery, typewriters and the like.

It would provoke other countries to levy retaliatory tariffs against American products, of which there are already evidences.

By erecting further barriers to our foreign trade it militates against American manufacturers, already highly prosperous, who supply 96 per cent of manufactured goods consumed in this country and are looking to foreign markets to absorb their increasing output.

It weakens the security of American investment abroad—amounting to between twelve and a half and fourteen and a half billion of dollars—by making it more difficult for the foreign debtors to pay the interest thereon, as well as on the war debts due this government.

It will not relieve unemployment, as claimed, because employment cannot be increased by restricting trade.

It will inject a bitterness into our international relations.

It violates the spirit of the World Economic Conference, at which this country was represented, and which declared that "the time has come to put an end to an increase in tariffs and to move in the opposite direction."

It endangers world peace by sowing the seeds of a tariff war.

Concerning the protest against the pending tariff bill by more than the thousand economists connected with the principal colleges and universities in forty-six states, the New York Times, under the above caption, editorially says:

"Let us suppose that Mr. Hoover, when the tariff question was thrust upon him toward the end of his Presidential campaign in 1928, had announced that he would refer it to a commission of the greatest experts in the country. If he could have added that one thousand of the leading political economists of the United States would serve on it, people might have felt that he had put the matter in the way of being settled scientifically and permanently.

"Yet the experts, though not officially appointed, voluntarily undertook to examine the effects of a high tariff. They have just brought in their verdict. It is decidedly adverse. This spontaneous commission is, in fact, more harmonious and more effective than any which the President has selected to recommend action about prohibition or wheat farming. It is highly representative and unusually skilled in the subject on which it pronounces judgment. The findings are in the President's hands, just as if he had asked for them. He might send them on to Congress in a special message, calling attention to the fact that they are the work of the biggest fact-finding body which even he ever heard of."

## Methodist Church Services

Sunday School and regular services next Sunday morning. We will not have services in the evening because of the meeting in the Baptist church. All are urged to attend these services in our sister church. Rev. Keating is doing some good preaching, and the singing under the direction of Bro. Frazier is inspiring. If you are not attending these services you are missing much. Attend and bring your children. "How shall I go up to my father and the lad be not with me?"

## Local Census Figures

The government has made public the population figures for Carrizozo and the precinct. The total population for the district is given at 1243; that for Carrizozo proper, 1171. The figures of the last census gave the precinct as a whole, not separating the city from the rural; so that it is difficult to tell whether the city has gained or lost. The precinct, as a whole, dropped some, and inasmuch as only 72 have been enumerated outside of Carrizozo, it would appear that the loss is entirely rural. Something like 150 to 200 have removed from rural portion of the district the past few years, which would leave Carrizozo with a population about as it was in 1920.

Teacher: "What is a caterpillar?"  
Biology Student: "An upholstered worm."

Wise: "I wonder what we'll wear in heaven?"  
Otherwise: "If your's there we'll all wear surprised looks."

## Woman's Club Banquet

The final meeting for the current year of the Carrizozo Woman's Club was held at Community Hall last Saturday night, and as the husbands were permitted to share in the festivities and in the program, as well, the hall was comfortably filled.

The banquet, spread on a long line of tables, was neatly arranged and deftly served by Mrs. Elizabeth Gallacher, Mrs. Cardwell and Mrs. Allen, and the way the good things vanished from the ken of man was sufficient evidence of their merit.

During the disappearance of the food, Mrs. Lemon, retiring president of the club, called upon the chairmen of the various committees for report, and all present responded. The president also called attention to the Junior Woman's Club and outlined some of the achievements of the minor association, under the capable direction of Mr. F. L. Elliott. The officers for the coming year were installed, Mrs. Lemon introducing Mrs. Paul Mayer as her successor, and Mrs. Blaney then installed Mrs. Mayer as president and Madamae Clouse and Gassmire as vice president and second vice president, respectively.

Mrs. Gumm gave a toast to the men and Mrs. Mayer told something or other about "The Old Back Hen," and how she kept scratching.

The meeting was then turned over to Roy Lemon and when he got the gavel the fur began to fly. First, secretary McClintock was called on for a report, and he passed the cigarettes. Then Dr. Blaney, as treasurer, made a most illuminating report on finances, which showed the club finances were in good shape—and the money in hand—either 24 cents or 4 cents, the balance.

Ed Kelley responded for the music department and his report indicated a very close acquaintance with his duties; in fact he had it on the tip of his tongue if not on his finger tips. Haler made the report for the art department and his announcement of a future exhibition of celebrated pictures published by the Police Gazette, and in the wonderful collection of a certain patron of art, was received with great agitation and a little pleasure. Beck, on Civic Improvements, made a splendid report, and asked for an appropriation to light the golf course. French, reporting on Public Welfare, made some pertinent suggestions, and caused our charming hostesses to eye one another in an endeavor to locate the guilty parties. Responding for the Legislative Committee, Spencer was as full of suggestions and criticisms as an egg is of meat. The manner in which these were received showed the sentiment to be badly divided.

Dr. Freeman had Literature, and named a number of local characters who were cultivating the gentle muses, and incidentally closed by mentioning a celebrated character, who made his home for many years at Salt Lake City, and who gained eminence in the literary world as a teller of "bedtime stories." The doctor's report was received vociferously. Burkett made a short report on membership and recommended E. M. Brickley as a candidate. Finley spoke on the qualifications of members and took issue with the report of the Membership Chairman, because he believed the applicant who had been recommended, he argued, had served too long in

## The Baptist Revival

Revival services began at the Baptist church Sunday night; nightly meetings have been conducted throughout the week, and they will probably continue all next week. Rev. Earl Keating, pastor of the Baptist church, Alamo, is giving the local pastor, Rev. F. C. Rolland, substantial aid in the meetings, in fact, the chief speaker, taking much of the load from the local pastor's shoulder. The visiting minister is a very interesting speaker, enthusiastic in the cause he advocates and forceful in his presentations. The singing is directed by Mr. F. C. Frazier who, it will be remembered, two years ago entertained our people, during a similar meeting, with his splendid voice. Mr. Frazier is shaping up his booster band, and expects to have it well organized by Sunday. The congregations are not as large as had been hoped for, though not disappointing, and the growing interest is expected to increase the attendance very materially the coming week.

## Expresses Appreciation

I wish to express my appreciation to many friends for their generous response upon the graduation of my son Preciliano Pino, Jr. The substantial remembrances and kind words of encouragement makes me most grateful and I shall look back to the occasion with much pleasure.

Respectfully  
Gregorio Pino.

the New Mexico legislature and had also gazed too long and too fondly upon young lady school teachers. These sentiments, apparently, met with instant approval, and it seems the applicant will have difficulty in making connections. Hupperts represented the American Home and submitted a menu that had considerable merit, but removed much of its flavor by recommending an excessive supply of can-openers.

This part of the program was prepared by Mrs. McDonald and Mrs. Spencer, and it was a most novel and interesting feature.

The next and last portion of the program was musical and was presided over by Paul Mayer. Some beautiful selections, instrumental and vocal, were given, and concluded a delightful evening's entertainment.

**Make School Work Easy via Parker Pressureless Touch**

For the new school term get a Parker Duofold—the pen that clears the track for thinking. Its feather-light weight is sufficient to start and keep it writing. No pressure needed. No effort. No fatigue. Non-erasable barrels—Maximum Ink Capacity—Jewel-Smooth Points. We have all sizes and colors. Price \$3 to \$10. Pen #23 to #28.

The Children's Corner Edited by DOROTHY EDMONDS

THE WRIGHT BROTHERS

Two boys were sitting together near a big window watching for their father who would soon come home from work. Their names were Wilbur and Orville Wright.

When at last Mr. Wright came in sight, the boys ran out joyfully to meet him. They noticed that he held one hand behind him.

"What is it?" they cried together. For answer Mr. Wright brought out a queer little object that looked something like a tiny box, kite. "Here's a helicopter," he said.

"Look I will throw it on the ground," and he tossed it way from him. Wilbur held out his hands to catch the little object, but it did not fall! Instead it rose up into the air!

The boys had never seen such a thing.

"Daddy," said Orville, "if birds and a helicopter can fly, why can't we?" "Because we have no wings," Mr. Wright answered.

"But why don't we make some?" Orville wanted to know. "Well," said Mr. Wright, "some day when you grow to be a man perhaps you can make some wings big enough to use yourself."

"I will," said Orville. "I will build a kite big enough to ride on when I am a man," said Wilbur.

This happened way back in 1878. The year 1900 came, and Wilbur and Orville Wright were now young men. "Well, Wilbur," said Orville one day, "you never made that kite big enough to take a ride on."

"No," answered Wilbur, "and you never made your wings to fly with." "I still think," Orville said, "that we ought to be able to fly. Just think of those big eagles that fly so easily. Some of them are most as heavy as we are."

"Well, let's watch the birds and see if we can find out how they do it," suggested Wilbur.

To help them carry out their plan,

the two brothers began to build a "glider." This glider looked something like a very large kite, and it also looked in some ways like the little helicopter that Mr. Wright had brought home to Wilbur and Orville so many years before.

When the glider was finished there was no place for them to try it. They lived in the crowded city of Dayton, Ohio, and they were afraid it might fall and injure somebody, or else be smashed on the corners of buildings or get tangled up in the telephone wires.

So they packed it up and started out for the little town of Kitty Hawk by the sea. Around on all sides were great sand dunes and thousands of birds soared in the sky.

The Wright brothers spent long hours lying in the sand watching these birds, and they learned that they could fly long distances without flapping their wings. That showed that

the birds were floating on currents of air just as a swimmer can float in the water. They saw how the birds tipped their wings this way and that in order to balance and steer. One of the things they noticed was that the birds flew mostly in groups where the air currents were strongest. Sometimes a lone bird would try to fly and have some trouble getting up. He would see a group of other birds soaring in another spot and would quickly go over with them because he knew the air currents over there were stronger and would help him to fly better.

THE COASTING PARTY

On Scientific Authority

By JEAN NEWTON

"ONE is just as likely to have dyspepsia from the nagging of a wife or husband as from gastric ulcer."

That was given among the findings of eminent British physicians recently. "Often it is not real malformation which disturbs the health, but the trifling nothings, the petty annoyances, the pin pricks of life which cause emotional reactions and by their constant repetition produce nervous exhaustion."

"Anxiety emaciates its victims; faith, hope, and courage assist in strengthening the body."

"The man of violent temper gives himself a dose of poison just as if he had swallowed one."

"The toxin produced by fear, acting on the brain and sympathetic system, is one of the most powerful poisons introduced into the blood."

Of course, this merely gives scientific authority to facts which observers of people and life have been preaching to us for years.

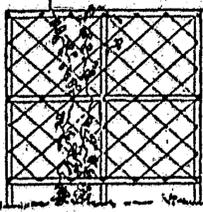

Some of us who won't listen to anything else will listen to scientific authority.

SUPERSTITIOUS SUE

ONE HAS HEARD THAT— Whenever you chance to see a speckled horse, be sure to make a wish for old Robin brings good luck. (A. 1924, Western Newspaper Syndicate.)

SOMETHING TO MAKE

Thin strips of wood make the frame, and string interwoven crosswise and secured by staples to the sides, furnishes the lattice work upon which vines and plants may grow. It is fun to make this useful and simple thing. —G. Isoshoff.

"Now that we have seen how they do it," said Wilbur, "let us try it, too, with our glider."

Out, on the dunes they took the glider fastened to the end of a strong rope. They tugged it to the top of Little Hill and balanced it on the edge of the slope. Finally, they gave it a gentle push out over the cliff. Down the slope it went—slowly at first, and then more and more quickly, until it was fairly racing. The brothers held their breaths. Suddenly, a rising air current caught the wings. The glider swept off the slope, and flew!

The brothers were very happy about this, but their work was not done yet. They knew now that the glider would fly—but could they ride on it? Could they steer it?

Again they brought the glider to the top of Little Hill. This time Wilbur fastened himself into the place they had made for the passenger and Orville pushed the glider off the hill just as before. Again it was caught up and again it flew. Wilbur was riding in the air!

"Now," said Wilbur after he had returned to the ground, "we must learn to steer the glider and to balance it so that it will stay in the air a long time."

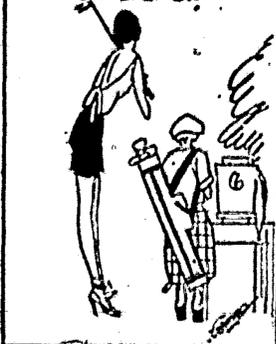

Day after day they practiced until both could steer and balance quite well.

"Now," said Orville, "I think we ought to put a motor in our glider so that it will start by itself as an automobile does, and so we will not have to push it off a hill to start it."

They began at once to build their motor, and when it was finished, they fastened it to the glider, and although the motor was very, very heavy, still the glider rose up into the air and carried a passenger in it.

The Wright brothers' glider became known the world over. Its name was changed to airplane. —Ruth M. Miller.

GIRLIGAGS

"Diet and exercise may improve a figure," says Corporal Cora, "but it takes brains to farm an opinion." (Copyright.)

Some Helpful Suggestions

By NELLIE MAXWELL

"Suppose that this here vessel," said the skipper with a groan, "should lose her bearings, run away, and bump upon a stone. Suppose she'd shiver and go down. — When save ourselves we couldn't. The mate replied: 'Oh, blow me eyes! Suppose again, she shouldn't.'" —Wallace Irwin.

WITH the daily sandwich question always present, here are suggestions for a few that are different. When making these sandwiches for small children omit the mustard, Worcestershire sauce and tobacco sauce.

Chesse and Olive Sandwich. Add three tablespoons of quick cooking tapioca, one teaspoonful of salt, a dash of pepper and paprika to one cupful of milk. Cook in a double boiler, stirring often until the tapioca is clear. Add two and one-half cupfuls of grated chesse, one-half teaspoonful of mustard, one teaspoonful of Worcestershire sauce and three-fourths of a cupful of chopped stuffed olives. This makes two cupfuls of filling.

Ginger Punch. Chop one-half pound of candied ginger, add one quart of cold water, one cupful of sugar. Boil fifteen minutes, strain, add one-half cupful of orange juice, one-half cupful of lemon juice and serve poured over crushed ice. Try cooking the old-fashioned way which our grandmothers used to make with peon and lye, with a large dash of ginger.

Color graded account? It takes a reasonable color study. Just try the account to be used in a solution of the

coloring; stir until it takes the color desired. Use to decorate cakes, salads, cocktails or candy. It is quite the fad to add spices of various kinds to ice cream, for those who like such highly flavored dishes. (A. 1924, Western Newspaper Union.)

Marriage isn't necessarily a failure. There is always a fighting chance.

Airport Watchman Takes Family for Sunday Spin

The man seen here walking on his day off has nothing on George J. Harwig, night watchman at the St. Louis airport for seven years, who takes his wife, eleven children and one grandchild each Sunday in a Daimler-Benz motor car. Mr. Harwig's unusual operations manager is seen collecting their

DEMONSTRATING NEW MACHINE GUN

Robert F. Hudson, Jr., of Richmond, Va., firing the new machine gun which has been invented by his father. Twenty persons witnessed the demonstration and proclaimed it the most deadly weapon ever invented. It is capable of firing 50-caliber bullets nine miles, at the rate of 800 a minute. The United States navy has contracted for manufacture of the guns in this country.

Why People Are Grouchy

By M. K. THOMSON, Ph. D.

WE ALL prize cheerfulness, yet there are times when we feel sulky, morose, obstinate, sour, cross, ill-humored, gruff, austere, harsh, spiteful. The slang word that covers all these very unpleasant moods is grouchy.

We are sometimes grouchy because our liver is out of order or the glands of internal secretion are not performing properly, or we have had some mental shock in the form of a disappointment or disillusionment.

We are grouchy for lack of self control. The grouchy person has let some disappointment get the better of him. He is like the spoiled child who refuses to play because the other children do not let him win every time.

We are grouchy because we do not care to participate in social activities. We want to be let alone. And of course the grouchy is the best means of keeping people away. It is like the smallpox sign.

Not infrequently we are grouchy for the purpose of terrorizing people. We want them to feel bad for having made us feel bad. It is a form of spite and revenge. If you can't get your way by being pleasant you are sometimes more successful by getting angry and morose. People feel so sorry for you

that they are willing to do anything to get rid of you.

In so far as grouchiness has the element of obstinacy and gruffness it is motivated by the desire to defend one's self against attack. We do not poke fun at a grouchy person. If you are planning on getting off some prize joke of yours you are careful to select a person who is likely to "take" it good naturedly.

We are sometimes grouchy as a means of getting what we want, of being let alone, of buying freedom from troublesome plesantries, of inspiring fear and aloofness, and possibly for the purpose of terrorizing others.

This sort of practice, like all others, is likely to become habitual. It often does. Hence the perpetual grouch.

(A. 1924, McClure Newspaper Syndicate.)

CHINESE CHOPPERSNOP

By Hugh Hutton. (Author of Kinky Natural History.)

THE choppersnop is a great enemy of the Mongolian Wart Hound, and is strongly protected by game laws because of the wart hound's raids on the chow mein fields. Most of the wart hound catching is done by the choppersnop when quite young—for when it becomes mature it hides itself in a rat's nest and immediately

lays about 600 eggs. But as it has to cackle over each one, it soon loses its voice. The eggs of the choppersnop are manufactured into egg foyong at Canton.

An acorn with its cap makes an admirable Chinese head to go with the peanut body, and the popcorn loops add to the effect. Neck and tail are cloves, and the split almond feet are fastened to toothpick legs. No nut, however, will do for the Cantonese dialect the choppersnop uses.

### Dame Fashion Smiles

By Grace Jewett Austin

Did you ever study a Greek statue of a woman and notice how the beautiful folds of the skirt go rippling down to her feet?

The Greeks gained those folds by using plenty of material and giving it very little restraint so that the folds fell in natural fashion. The sculptors caught the spirit of this artistic drapery.

Now that the clouds of discussion and questioning are clearing away a bit from the new styles, Dame Fashion wonders if many are not noticing that often and again there are dresses that have the true beauty of the classic Greek. Soft is the word for materials, even when they are of the substance of tweed for rough service. Those who shrieked a few months ago, that hoops and bustles and all sorts of monstrosities were scheduled to return, mistook the spirit of the time. Probably never since the days of the Greeks were there so many genuine worshippers of beauty, and so many who have given it a life's ardent study as at the present day, and these can be trusted not to make distortions out of women and girls.

If there is one characteristic more notable than another this season, it is rippling folds. One may see them on the front of pretty blouses to be worn with tailored suits; capes fall in folds by the very nature of their form. Even the hats get a touch of the draped effects, with their down-dropping sides, or the fluttering little black veils that soften some of the brims.

And as for the hair-modes—well, staccato is the only word. There may be a place aboard a yacht for breeze-blown locks—although Dame Fashion almost doubts even that. But if you have a classic marble bust in your home or in some collection convenient for you to examine, just go and study it and then do likewise, and you will be a modern of the modern!

These light little hats with their lacelike fragility in appearance, and yet often with astonishingly good wearing qualities, are proving becoming to their wearers. A young woman entered a room the other evening wearing such a hat, and for the moment, Dame Fashion took her for a college girl. Then she realized that this was really the mother of a husky, six-foot son. The careening quality of these down-dropping side hats still impresses one with the feeling that they are warm-hearted, affectionate hats in spite of their fairylike lightness.

It was only recently that Dame Fashion ran across a lengthy story of the way queens and their ladies in waiting of centuries gone by used to toil upon the elaborate embroidery for the gowns and other articles of wearing apparel. Indeed, a shawl brought from Norway, was lately shown to her that was rich and brilliant with hand-embroidered flowers.

But the Twentieth century is too busy for such toil; there is too much to read, too many wonderful places to visit, altogether too much to be seen and heard. Yet the century is so clever that the happy, cheerful effects of embroidered work are gained with great swiftness. A pretty woman wearing one of the gay printed silks, aglow with flowers, is just as lovely as though she had spent a thousand hours in embroidering.

(The Western Newspaper Union)

### Patou Print in Black, Yellow Crepe de Chine

Patou goes to print with this charming outfit in black and yellow crepe de chine. Attractive details are the floppy yellow straw hat and the large bag of the same material as the dress and coat.

Striped Sportswear  
The striped sports suit is the smart new one. They come in striped with white, in striped jersey and other fabrics, and important colors are light blue, yellow and brown.

### Simple Crepe Ensemble for Little Girls' Wear

Showing a child's frock of crepe. The tie, belt and shoulder facings are of blue madon lane. The hat and coat to match complete the costume. The ensemble is simple all the way through, and shows no relation to the smartly tailored clothes of her older sister.

### Hints for Women Who Do Their Own Sewing

Remember—To wet all cotton goods thoroughly and dry and press before using in order to shrink them. Then there will be less shrinking after the goods are made up.

To buy your patterns before you buy your materials, and look them over carefully so that you will be sure to buy the right amount, and so not waste expensive material or run short of needed goods.

To soak cotton goods that might run as to color in turpentine before washing or in strong salt water.

To dry all colored goods in the shade, not in the bright sunshine.

To make children's clothes out of substantial material that will wear and so make the work you put into them worth while.

To make children's everyday clothes out of material which will not only be durable, but which will not easily show the soil, so that you need not constantly be reminding them not to get their clothes soiled.

To think twice before buying anything. Some women waste money each year in buying material they never make up. Buy only what you are sure you will make up into good, useful clothes.

To eat a sensible, nourishing and refreshing lunch on sewing days and to get a little outdoor exercise each day that you spend sewing.—Washington Star.

### Jewelry Should Match the Colors and Styles

Particular attention must be paid nowadays to every detail of the costume. It is most important in the present-day mode, asserts a fashion writer in the Detroit News, that jewelry should be chosen with an eye to the colors and styles of frocks with which it is to be worn. The following suggestions will help one to choose correctly.

For an afternoon frock of black chiffon, or dull crepe that is dressy but not fussy in character, the right jewelry is: Seed pearls, triple strands of larger pearls, clear crystals, onyx and marcasite, colored stone or flower jewelry in simulated jade and coral.

For a frock of printed silk crepe, nylon or chiffon wear colored stone jewelry emphasizing an important color in the print—or crystal with onyx or onyx with marcasite if there is a note of black in the print.

The sports-going frock of, tweed or basket weave is completed by necklaces and bracelets of leather, stone, tweed, nutmegs, etc.

For a black wool frock with white plique or silk crepe trim, pearls of very simple variety should be worn. The crepe satin frock on severely simple, regal lines requires little jewelry—perhaps no more than a glittering shoulder pin.

### Yokes Claim Attention as Decorative Features

Yokes are a prominent decorative feature introduced in contrasting fabric or color or suggested by intricate seaming from which a back cape treatment often emanates. Lace yokes are embellished with appliques of the dress print and plain color yokes sometimes repeat the dress print in embroidery or beads and silk. Beavercams and bead embroideries are delicately applied, one attractive use of the latter forming a large bowknot at the yoke side in white chalk heads. Ombre empereuses denote other yoke contours.

Ribbed Weaves  
The ribbed silks are the epitome of style and practicality this spring. A navy blue or black frock in one of the ribbed silks, with lingerie touches at neck and wrists, should be a first thought for office wear.

### Why We Behave Like Human Beings

By GEORGE DORSEY, Ph. D., LL. D.

#### Mate-Hunger of the Sexes

UNTIL recently, it was a woman-made world we live in. The mere male had to go outside that world to work off his surplus energy. The wife-mother was the center of the home, and it was to her interest to make it a real center. It became a hive of industry and a swarm of children. Whatever glorified it magnified her importance. Within, she was supreme. In this woman-made world men passed half their lives; the other half was spent in bringing home the bacon.

Women generally married for love, as they do now if their mate-hunger is unimpaired and they are free to marry the "man of their choice." There were three categories of women; married, old maids, and "fallen." Thousands of American communities had no "fallen" and next to no old maids.

Now women have their "rights." In obtaining "rights" she abdicated a throne; she no longer rules by divine right. The children that "bless the home" are turned over to the nurse while mother presides at bridge, over conventions for the proper care of children, over committees to cleanse the stumps. Result: males no longer naively accept matrimony or implicitly trust their wives; females turn to matrimony if they have nowhere else to turn.

All this, of course, makes for "progress." But in our social progress we have acquired special schools where boys and girls may learn horrible vice, and slums which in squalor, vermin, filth, and disease, and in the number of their dope fiends, pickpockets, paupers, degenerates, bags, and harlots, are quite as "advanced" as those of Paris or London. It is no longer necessary to go abroad to see "life"; Babylon has moved to Main street.

Social conditions are changing, but the average American girl still approaches her majority fitted for no economically independent career. For that no special preparation is deemed necessary. She is a girl what more can one ask? Few men ask more. Some do not get a whole woman. More rarely does the woman get a whole man. But sauce for the goose is not sauce for the gander in these days of holeproof socks, built-in beds, meals out, and no babies allowed; the gander may feel that as a meal ticket he is entitled to a different brand of sauce.

To say that the mate-hunger is greater in one sex than in the other is nonsense. It takes different forms in the two sexes because of training and the situation. Nor are men less fond of children than are women. Having wider interests, they are bored sooner.

"Mamie, don't be a tomboy!" Many a mother these days neatly "dies of shame" when Mamie bobs her hair and marches off in the garb of a girl scout. "Girls didn't do such outlandish things in my day!" They did not. We have to learn anew what our stone-age ancestors knew: girls can be as "outlandish" as boys! The girls themselves are just beginning to discover it. Marriage behavior is in for further conditioning. The sex complex may become simple again.

A psychosis is a morbid mental state. We all have our little psychoses. That so few have big psychoses, that so few asylums are required to house the mentally unbalanced, is a tribute to our sound inheritance and our capacity to preserve our balance in increasingly complex situations and an environment which changes faster than man can change his mind.

My chief psychosis is, let us say, a morbid love for dogs. I "shudder with horror" at the sight of a dog fight. I loathe the dog pound and am the deadly enemy of the dog catcher. I defy the muzzle law—openly when I dare. I endow hospitals for unadjusted dogs and cemeteries for dead ones. In short, I am "crazy" about dogs. But as I am not a menace to society, I am tolerated, even encouraged by "sympathizers."

There are as many kinds and degrees of psychoses as there are of indigestion. There are few perennially sound minds in perennially sound bodies; few of us that are not off our balance or off our feed now and then. Sometimes it is serious. When we are off our balance, society suffers; when we are off our feed, we suffer. Society expects us to behave. And properly locks us up when our behavior is dangerous. But if we die of indigestion, society is not interested.

There are those who cry when they hear a dog howling, smile when it wags its tail; the wall or gurgle of an infant means nothing to them. Some cower from lightning, and when the thunder roars overhead shut themselves up in a closet. I dodge an imaginary pump handle as I go by a certain spot. Few women would touch a snake for "worlds"; some love and make pets of them. Some go miles to see a prize fight and are disappointed if no blood flows. Whole nations go to bull fights, knowing they will see streams of blood. Some women faint at the mere sight of blood; an English woman is insulted at the mention of it.

Psychoses? In a way. Each form of behavior are not "natural"; they are so part of our inheritance. Every peculiarity or abnormality of behavior and every psychosis can be described in terms of individual experience.

### Moslem Faith Kept by Tatars in Lithuania

More than 500 years ago when Vytautas the Great was ruling over the grand principality of Lithuania, then at the height of its power and prosperity, he brought back as prisoners from one of his campaigns in the southeast several hundred Tatars. They remained in Lithuania, intermarried with the native women, but did not give up their Moslem faith and customs.

United with the remnants of the Tatar troops lent by the grand khan to the Lithuanian grand duke, most of whom fell in the wars with the Teutonic knights, these faithful followers of Mahomet planted the banner of the crescent in these northern regions and their descendants have kept it flying right down to today.

In connection with the solemn celebration this year in all Lithuania of the 500th anniversary of the death of Vytautas the Great, the League of Lithuanian Tatars recently held a meeting in Kovno (Kaunas) and decided to build a central mosque in the capital city.

#### The Alaskan Flag

Alaska has recently adopted an official flag. It has a blue field, bordered on three sides with a narrow band of gold. In the upper right-hand corner appears Polaris and below it the constellation Ursa Major, with its two "pointers" indicating the North star. The field of blue is held to symbolize the evening sky, the sea, mountain lakes and the wild flowers of Alaska; and the gold border, the wealth in Alaskan hills and streams. Polaris is the ever-constant guide of the explorer, woodsman, prospector and surveyor. And Alaskans hope that the northernmost star may some day take its place as the forty-ninth of our national emblem.

For your daughter's sake, use Red Cross Ball Blue in laundry. She will then have that dainty, well-groomed appearance that girls admire.—Adv.

#### Earthquake's Vagaries

An earthquake irrigated a cantaloupe field at Brawley, Calif., recently when a tremor caused small geysers to spout five inches high over the 100-acre field owned by the S. A. Gerard company. The water irrigated the entire field and then flooded adjacent areas before subsiding. Small sand piles were left in the wake of unusual inundation, and a beet field nearby was completely covered by new sand.

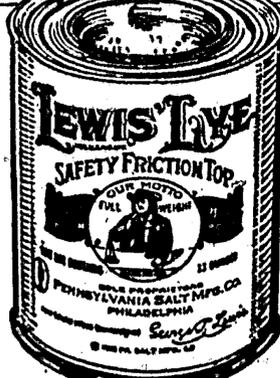

#### The Old and the New

Mother (to extravagant daughter)—My grandmother was very frugal. She saved and kept her money in old wool socks.

Daughter—Yes, ma. And I put mine in silk hose. There really isn't so much difference, is there?

When you're at the end of your string, keep going. Then it will become a sport.

# SOFTENS WATER

**GENUINE Lewis' High-Test Lye makes the hardest water soft and clear. Soft water saves soap . . . clothes . . . and hands. Order genuine Lewis' Lye from your grocer . . . and follow the simple directions as do thrifty housewives everywhere.**

All must be earnest in a world like ours.—Horatius Bonar. Weeds that attack crops cost California \$25,000,000 a year. A man of means seldom gives himself away.

## TEST OF CONOCO'S GERM-PROCESSED TENACIOUS FILM . . .

### ... Compared with Popular Oils at Pike's Peak . . . Reveals 76.4% Less Motor Wear! . . .

We sincerely believe that this disclosure alone will cause you to begin using CONOCO Germ-Processed Motor Oil . . . such decided reduction in motor wear . . . such triumph over the savage attack of friction and heat . . . such positive supremacy over the oil you have been using, all have a definite appeal to your pocketbook and judgment.

Charts prepared from the Pike's Peak Test records indicate a longer life for your motor by lubricating it with Germ-Processed oil. Too, you will save substantially on your gasoline cost, and in oil expense, by using this oil. And the fact that Germ-Processed oil penetrates metal surfaces means, that after starting your car on a cold morning you can safely drive at top speed with less likelihood of damage . . . for CONOCO's film is already on the job.

Less Carbon—Less Cost—More Mileage and Less Heating—More Compression. All these things mean a better all-around motor. It is truly unusual for a motor oil to so excel competition as CONOCO did in the Pike's Peak Test. Tested out on the Pike's Peak Highway, scene of many famous automobile tests, was a memorable struggle for supremacy. . . . On the one side, three of America's representative and popular oils—on the other, Germ-Processed oil, and CONOCO Germ-Processed Motor Oil won, by all tests applied.

Only CONOCO can make Germ-Processed oils. CONOCO can give you these new motor oil merits, including penetrative lubricity. We hope to serve you soon, at stations displaying the Red Triangle.

SEND NOW for the new Free Booklet which describes in detail the story of the Pike's Peak Tests. Illustrated with photographs and charts. Address: Continental Oil Company, Ponca City, Okla., or at the station with the Red Triangle.

## Important Water Suit Filed in District Court, Lincoln County

Suit has been filed for adjudication of water rights in the Bonito River, in the District Court of Lincoln County, by the El Paso and Rock Island Railway Company and Southern Pacific Company against the Bloom Land and Cattle Company, and a large number of other defendants.

The complaint sets forth a description of the water rights of the railroad, admits that many defendants have water rights in the Bonito River, and states that other defendants make claims to the use of water which are without any right, and seeks to have priorities and rights adjudicated.

Harry H. McElroy, of San Francisco attorney for the Southern Pacific Company, here on business for that company in connection with this suit, authorizes the following statement:

"The suit which the railroad company has filed was not brought for the purpose of setting up any claims against anyone, but rather to afford the opportunity to any persons, who are making claims to water rights adverse to the rights of the company, to come into court and set up such claims and have them settled.

"The railroad has been using the waters of the Bonito River, diverted above the site where it is now constructing its new dam, for more than twenty years. The dam is being constructed to provide storage of the quantity of water from the Bonito which it has been authorized to divert for more than twenty years. This new storage will enable it to drain the reservoir now being used and repair the same, and thereby avoid the large losses of water which have been unavoidably wasted because of leakage through the old reservoir.

"The Southern Pacific Company, now the operating company, wishes to have settled any controversy concerning the railroad water rights. The water supplied for railroad uses is indispensable for the conduct of transportation over transcontinental lines.

"All water rights acquired have been purchased. Not in a single instance has a water right been condemned. It has paid prices for lands and water in excess of their values at the time purchase for agricultural uses along the stream, and prices paid have in every instance been satisfactory to those selling; but, on the other hand, incomparably greater values have been created in the new use of this water supply.

"When the railroad, originally built from El Paso to Capitán, was extended from Carrizozo to a connection with the Rock Island at Santa Rosa, and heavy traffic commenced to move over the line, the road broke down under failure of water supply. The water was used for engine use. Engines failed, boilers even exploded, men lost their lives, there was no certainty in train movements, and it seemed that the heavier the business coming over the line the greater were the losses until the road was being operated at a heavy loss. The Bonito was the only available supply of water for engine use. The diversion of Bonito water for engine use was authorized by the Territory of New Mexico after the passage, in which various persons may injury or adverse right had

an opportunity to be heard. The railroad has used this water supply since 1908.

"The rights acquired by the railroad and the permit given by the Territory of New Mexico for diversion of Bonito waters covered domestic use, as well as railroad use, and the small quantities of water which the railroad has been able to supply to the little towns along its line for domestic purposes is of incomparably greater benefit than an equal amount applied to farming on the Bonito, and the railroad use of the water is of direct benefit to every town on the line.

"The reservoir, which the railroad is now constructing, has been duly authorized by the state, after public notice and hearing. The quantity of water, which the railroad intends to store therein, will not exceed the amount which it was authorized to divert from the Bonito and use for railroad and domestic purposes more than twenty years ago.

"Some objection to this diversion by the railroad has been urged on the technical grounds that water should not be taken out of a natural watershed. That idea is founded on the old riparian doctrine of water rights, which obtains in some of the eastern states, but is not the law in the west and in New Mexico. If such were the water policy of our state, it would undoubtedly retard our highest development. Water for cities and industries must in many instances be carried from mountain streams and out of natural watersheds for long distances. It would be a backward policy for a state to require the continued use of water on lands along a stream when commerce, industry and domestic necessity and comfort have created a new demand for a higher purpose, which can only be satisfied by such a diversion.

"The waters of Eagle Creek are not involved in this suit. The small amount of water available from that stream under the railroad's permit to divert and use for railroad purposes was described in published statement made a few days ago by Mr. A. E. Sweet, Assistant General Manager."

### June Church Services

Rev. Frank L. Cox, of Mineral Wells, Texas, will be in Carrizozo June 1st, to begin a series of sermons at the Community Hall. First service June first, at 11 a. m., and 8 p. m. services will continue through the following week. All are invited to attend these services.

Oklahoma City furnishes the information that 300 of its people were suddenly attacked with paralysis as a result of drinking "Jake." It seems that when the supply of corn liquor became exhausted the populace turned to "Jake," and it must be, from the nature of its effects, a cross between sheep dip and corrosive sublimate.

The Farm Board has become the great American puzzle. No one now can tell you what it is for.

### Card of Thanks

We wish to express our thanks to the friends and their many kindnesses shown us during the death of our beloved husband, father and grandfather.

- Mrs. Ellen F. Gravlee.
- Mr. John B. Gravlee and family.
- Mr. Thomas Francis Gravlee and family.
- Mrs. Mattie Stewart and family.
- Mr. and Mrs. George Lutz and family.
- Mr. and Mrs. Clide Fargier and family.
- Mr. and Mrs. Thos. J. Shields and family.
- Mr. and Mrs. J. F. Rhoades and family.

### Henry Ford Condemns

If high tariff advocates, and particularly those sponsoring the monstrosity before congress, can derive any pleasure from Henry Ford's strictures on the proposed measure, they must be optimistic ones. They may not have too much respect for Mr. Ford's political sagacity, neither may they be in accord with his ideas of political economy, but they cannot discount the fact that he has built up the biggest single business known to the world, and that when he talks business he will not be denied an audience. Henry says the passage of the pending bill will not restore prosperity but will increase unemployment and accentuate and prolong the present depression.

**ADDITIONAL LOCAL**

Mrs. John H. Skinner and her grandchildren, left for El Paso today for a week's visit with the Roy Skinner family.

Mrs. A. C. Snow and children left yesterday morning for California for a visit with her sister, Mrs. Carl Hartley, and family.

The fishing season opens May 30. Get out your old fishing tackle—or buy new—and be prepared for opening day.

The entire community deeply sympathize with Mr. and Mrs. Claude Braum in the loss of their three-day old infant, which died last night.

Tranquillo and Martin Vega drove to Bisbee, Arizona, Friday, and returned Sunday, bringing the wife and children of the former back with them.

Mrs. J. M. Beauchamp and two daughters Miss Wilma and Norma, of Alamogordo, were here over the week-end, guests of the Hoppertz family.

Job McPherson is moving his family and household effects from Roswell to his mal pais ranch. The children had been attending school at Roswell.

Mrs. Mary Flores is in the Johnson hospital, having under gone an operation for gall stones. Her condition is fair, and chances for her recovery are considered good.

Asby F. Roselle was here last Friday and took his little nephew, Haven Glasspire, to his Glencoe home for the summer. Haven will have a big time with his grand dad.

Mr. and Mrs. Sam G. Allen and son Bill left Tuesday for Portland, Oregon. A message was received stating that Mr. Allen's sister was dangerously ill.

Mr. and Mrs. C. I. Joyce and little daughter Marian returned Tuesday from Atchison, Kansas, to which point they had been called by the death of Mr. Joyce's father.

Last call for Baby Chicks. See Pecos Valley Trading Co. announcement this week. Have your orders in or before June 2nd. Quick transportation; safe delivery.

Earl Harkey, S. P. fireman was a sufferer the past week from ptomaine poisoning. Mrs. Harkey came down from Tucumcari for a few days and upon Earl's improvement the family, Tuesday, returned to Tucumcari.

Mrs. Amanda Moore Foreman went to Las Cruces Tuesday afternoon to attend the funeral of Mrs. J. D. Isaacks, who had died there. Mr. and Mrs. Garrard drove Mrs. Foreman to Cruces and they returned the same night.

Mr. and Mrs. J. C. Burkett, and Cecil E. Moore and Mrs. Elsa Charles, drove to Roswell Saturday evening. Next day Mrs. Charles bade her friends good-bye, returned to Carrizozo, while the others went Texasward—the Burkett to Abilene and Mr. Moore to Yantis, Texas.

Mrs. M. J. Barnett has been very ill in an El Paso hospital, and her husband and mother were called to her side last Friday. Mrs. Barnett's condition has since improved to such an extent that Mr. Barnett and Mrs. Johnson have returned home, but a longer stay in the hospital will be necessary to insure her recovery.

Mr. and Mrs. A. R. Turner came in Monday from Wilmington, California, and remained until Wednesday with the father, G. T. McQuillen. While here, they with the father took a trip around the loop, going to Tularosa, up through the Agency, over to the Dan and Eagle Creek, through Fort Stanton and Capitan and home. Clarite has grown from a tiny bit of femininity, as we remember her here, to charming and vivacious womanhood. She married a year ago. The Turners were enroute to Wisconsin, the home of Mr. Turner's parents.

**Crystal Theatre**

Friday and Saturday. "The Climax" with all star cast.  
Sunday and Monday. "Speedy" with Harold Loyd.

Tuesday and Wednesday. "Applause" with Helen Morgan.  
Thursday and Friday. "Not so Dumb" with Marion Davies.

Next week's paper will carry an announcement of the opening date with the "Talkies." Equipment is being installed at this time.

Teacher: "I have went. Is that sentence wrong, Johnnie?"  
Johnny: "Yes, ma'am."  
Teacher: "Why is it wrong?"  
Johnny: "Because, you ain't went yet."

## THE STORY

Floyd Unwin and Howard Oldington take dinner with an old college chum, Alfred Gibbons, financial magnate. Unwin produces a written pledge taken by the three at college to help each other in adversity, explaining that he needs financial assistance to educate his son Bob and daughter Mary. Gibbons scoffs at the "legality" of the pledge, but agrees to make a place for the daughter in his organization. Mary Unwin is stenographer to a wealthy debauchee, Elgar Radway. Calling at Gibbons' office, as arranged, Mary is asked to betray her employer's secrets and refuses. Radway plans an ocean voyage to recover from the effects of dissipation. Mary is to go as secretary, her brother to accompany her. Bettington, painting on the Maine coast, is kidnapped, and taken aboard a vessel. His clothes are found by Gibbons, a fugitive from justice.

## CHAPTER IV—Continued

Bob sauntered off feeling that he had come face to face with men more evil than he had ever known before. On the deck above his sister was; he had been told he must not venture there. Above that deck was the wireless house, in which he was deeply interested. He had seen a cheery young man in uniform, who had been pointed out as the wireless operator. But between the two was a great gulf fixed. "Sparks" was an officer. Perhaps Bob had entered upon his new task with too great an enthusiasm. He found himself called upon to do certain greasy and oily offices usually performed by engine room help. Metzger, the chief engineer, swore at him viciously when he began to ask questions about the engines. On the whole, he found himself, for the first time in his life, distinctly unpopular.

Harnegat Light was in sight when Sam, at midnight, came into Bettington's cabin.

"The Boss says you can see him now," he growled.

Bettington followed him along a dim passage to the extreme stern of the vessel. Here he unlocked a door leading to a companion way which brought him to a quarter deck at the after part of the yacht. There were two big wicker chairs and a table. Sam motioned him to sit down. Then he knocked at a stateroom door and was bidden to enter.

"You're to go in," Sam said a few moments later. "I'll wait here."

It was not surprising that a certain emotion of excitement and, perhaps, apprehension seized upon the painter as he moved toward the door. What manner of ruffian was he to confront? And what was it that he had been predestined for? A man who could hold a turbulent and ferocious brute like Sam in thrall, would probably be one of greater power and violence than he.

Never, Bettington confessed, as he entered the stateroom, had his judgments been more at fault. This was no towering bully, no disciple of the strong arm school of underworld aristocracy who looked at him. Apparently the man was of the same social class as himself.

The Boss was a little, slender man, delicate of feature and limb. His face had that ivory pallor one associates with extreme old age. And yet, he did not seem to be an old man. He was smiling as Bettington entered; he smiled while he talked.

"I am afraid," said the Boss, after waving his guest to a seat, "that you have not enjoyed your voyage."

"I have not," Bettington returned. "I may tell you at once, that I resent the whole occurrence. It has been one outrage added to another. That they had their origin in a mistake I know very well, but the effect is just the same and I demand to be put ashore at once."

"We are provisioned for a year," said the Boss calmly, "and most likely shall not touch any port for one month."

"I shall," snapped the painter. "I think not," the other corrected gently. "I expected you to make these protests. Sam has told me of your attitude and I admit it. The wise man differs from a fool in knowing just when to try to make terms. We are here to talk business."

"Look here," Bettington began, "I explained to your first murderer out there, that there had been some mistake of identity. My name is Bettington; I am a painter of seascapes and my studio is on East Thirty-fourth street."

The Boss took from a small table a New York paper. "Did you have a pleasant funeral?" he asked suavely. He passed the paper over the table and pointed out an obituary notice tucked away in an obscure spot. "Read it," the Boss commanded.

The paragraph was headed: "Wall-Known Marine Painter Killed. Falls From Fire Escape in Dark."

Bettington read an amazing description of his death, burial and life's work. The chief witness at the inquest was Floyd Unwin. Unwin had been amused to see his friend, whom he thought to be out of town, and climbed to his studio to call upon him. The room was seemingly in darkness and some answered the knock. In the morning the janitor had discovered the mutilated body in the yard. Floyd Unwin said he had identified the man as a lawyer.

Boss, "but I, too, read the paper. In the idiom of poker, I have called your bluff. In almost every case I have had to do that to get my crew. Take Sam, for example. Sam, under another name, was doing rather well bootlegging across the Canadian line. In Rangely he was on the way to become respected. It was necessary to remind him that he had broken from Dannemora. I was compelled to build up his real past. I hold it over him." The Boss waved his delicate hand airily. "It is a truism that knowledge is power. I have just told you by what method I have the whip-hand of what you call my 'first murderer.'"

"But why put me in possession of it?" Bettington demanded. "That strikes me as a very unwise step."

"Because, my dear Andrew Orme, I have just as strong a hold over you."

Bettington made a gesture of despair. The Boss had not the look of a crazed man; but this sort of talk pointed to an egocentricity not far from megalomania. He had the delusion of power.

"Andrew Orme," said Bettington. "Who is he?"

"I'll tell you. The Boss passed a box of cigars to the other. 'Andrew Orme did very well at Yale. He was on his way to become a great surgeon. Then he found within himself the curse of gaming. He needed money. He found he possessed the dangerous gift of copying signatures. So he forged. And when he was discovered he killed the man who threatened to give him up to justice. He had committed his murder in San Francisco and was sent to San Quentin as a life prisoner. He escaped and was absolutely lost from view. That was almost ten years ago. I found him by accident. I was automobiling in New England and needed water for a boiling motor. I went to a fisherman's shack. There I found one Jonathan Gibbs, disguised with a beard and clad in the rough garb of a fisherman. Much the same picturesque costume as you wear now. I did not tell him that I knew him. At that time I had no possible use for him. It was not until three years later that I made use of my knowledge.'

One thing was cleared up, at all events. Bettington had been shanghaied because he was thought to be the fisherman whose clothes he wore. He saw now how strangely fortune had deserted him. Out here at sea, he could not prove himself to be the man he was. And the mysterious death of a man like enough to himself to be identified by Unwin all added to the difficulty of setting himself straight.

He remembered how Gibbs had feared he had entered his rick shack for some inimical purpose. And Sam had let fall that Gibbs had been shadowed. And Bettington recalled that Gibbs had been much more fearful in manner than any honest fisherman had the need to be. Undoubtedly Gibbs was Andrew Orme, surgeon and forger. . . . And Howard Bettington was dead and buried. The anxiety that his face betrayed, led the Boss to think he had come to a saner way of thinking.

"I am offering you a far better way of living than ever you had in Maine. When we are through with this trip you will have money—plenty of it—and can spend it, and your life, in some southern port."

"And if I don't accept?"

The smile of the other man grew irritating.

"None knows of your being aboard but my men. There are only three of the men who are not for me: Hallett, the captain, his nephew who is the wireless operator, and a lad named Unwin. They can be eliminated."

Unwin. So that was why he had seen his old friend come aboard. It was his mechanically-minded son who was among those of the crew presently to be eliminated. A mood of unusual caution took hold of Bettington. As skilfully as possible he must learn what was required of him and to what perils those on the ship were to be put.

"But if you eliminated me," he said easily, "you would put yourself to some inconvenience. You've put my cards on the table without any aid of mine. What about your own cards?"

"The sensible man," said the Boss, "is the adaptable one. I am glad you are seeing the wisdom of readjustment. Here are my cards, Andrew Orme. This boat was chartered, through my advice, by Elgar Radway, the multi-millionaire. He is aboard now with his wife, a noted beauty, and a girl secretary. This boy Unwin, of whom I spoke, is the secretary's brother."

Bettington hoped the other did not see the slight start he gave when he realized that Mary Unwin was here. He remembered now that she was Radway's private stenographer. He thought of Sam, of Metzger and those other ill-omened men who would be likely to make up such a crew as this. Something of the horror he could not conceal betrayed itself.

"Do not be alarmed," said the Boss; "this is an expedition planned only for the possession of money. The women will be safe as long as I rule the roost of that."

"What is the scheme? Blackmail?"

arduous tasks before him. I know—and he realizes it now—that he has come aboard to fill himself with the rich food and alcohol his physicians have forbidden him for a year.

"Every year I find, he has spent a month in this manner. At the end of these trips he goes back to his office and works like ten men. But this year he has had hardening arteries and planned to be temperate. That was why he brought his wife and the girl. . . . That was why he sent me this telegram." The Boss showed Bettington the wire Mary Unwin had sent to "Clements," Bar Harbor. "He honestly intended to stay sober or moderately so."

"And won't he?"

"At dinner tonight he was offensively drunk. I heard his wife whisper, 'After what you promised me, Elgar.'"

"Then you are a guest here?" It explained the luxurious stateroom in which the Boss sat.

"I am not," said the Boss. "I occupy an anomalous position; in a sense a derogatory one. It so suits me, for our purposes, to play the part of the steward."

Bettington wondered why he felt a disinclination to ask this man who and what he was. He realized that he was in the presence of one from whom emanations of evil and unusual

"I'll Tell You." The Boss Passed a Box of Cigars to the Other.

powers were given out. He was annoyed to admit it. With Sam or the rest of the crew it was different. They feared that the knowledge might bring them, if they forced him through disobedience to use it, to death or imprisonment. But no man had such a hold over Howard Bettington. And yet he experienced uneasiness in the presence of this small, eternally smiling man whose neck he could wring with his powerful grasp as easily as one might choke the life out of a fowl.

"What part am I to play?" Bettington asked. For a time, at any rate, he must seem to fall in with the other's plans.

"It may be very little," the Boss said. "This is how the matter stands. Radway can afford to be away from his office for a month. He has so arranged things that he is safeguarded for that time. But to stay away longer would ruin him. Another financier, Gibbons, is a dangerous antagonist. When the time comes, Radway will be offered the choice of ruin or a ransom of one million dollars. He will bluster, threaten and fight. In the end he will do as I have arranged."

"But the captain and the others?"

"Will be eliminated. I have taken every precaution. I shall seize the ship and dictate terms."

Bettington thought a moment. "That's all very well," he cried, "but you can't carry off into captivity an international figure like Radway. Why, man, they'll send gunboats out and every ship we pass will be looking for us. There's no disguising a craft like this."

"There will be no alarm. Letters will be prepared written in Radway's hand, explaining that his health is benedicting slowly and that he will remain away for a few weeks longer. Mrs. Radway will write to her father, the senator, and the girl secretary will send postals to her parents. They will disarm all suspicion."

"How?" Bettington demanded bluntly. "You'll threaten them with violence unless they write? The women won't do it, nor Radway either!"

"Nevertheless they will be written. For what purpose do you suppose Andrew Orme, master forger, was dragged from Blackport, Maine?"

The Boss took some papers from a drawer. These he passed to Bettington.

"Here are letters written by Mrs. Radway and her husband. Study them closely. You are to berth in the next stateroom."

He led Bettington into an adjoining cabin. From it another room was seen.

"That," said the Boss, "is the doctor's office." He pointed to a parchment on which the name John Waite was inscribed. Bettington saw that Waite had taken his degree of doctor of medicine in the University of Pennsylvania fifteen years before.

was fortunate that Radway required a physician. Otherwise you would have had to become a member of my crew. The real Doctor Waite, over whom I have some slight hold, lent me this and some implements of the trade, drugs and the rest of it. You will probably have to prescribe some sedatives for Radway."

Bettington knew nothing of medicine; he quailed at the idea of having to look after a really sick person.

"Your position as an officer will give you entry to the main saloon," the Boss went on. "You will be able to gain the confidence of the women and report to me what happens. In the role I have assumed I hear much, but not enough."

Bettington was glad to know that he would be in a position to watch over Unwin's girl. It is true she would not yet know his name. He supposed, until he had decided what best to do in the face of dangers, he had better keep up the masquerade.

The Boss took his acquiescence as a matter of course. It was not conceivably to that arrogant spirit that there should be insubordination.

"You will understand," he said, "that as a ship's doctor you will have little in common with the ship's steward. Of me you know nothing, except that I serve Elgar Radway."

"But I should like to know more," said Bettington. "To the best of my knowledge I have never seen you before. How is it you know me? They call you the 'Boss.' What does Radway call you?"

"I am William Clements to him," said the other. "I am William Clements to you. There is a stone over what the world thinks is my body, in a prison graveyard. I have exploded in the world's eyes all my faults." He leaned forward and his thin hands clenched, again. "And yet, Andrew Orme, I shall make such a name for myself, that it will eclipse what the world knew of me ere it thought I died."

"Mad," thought Bettington. "Crazed with the delusion of power." Aloud he remarked: "I see you don't wish to tell me anything. Very well; I am not curious."

"You will find Hallett, the captain, a disagreeable and suspicious man. He resents my presence. Remember, that you came aboard just before we sailed. He will be annoyed that you did not report to him. In your stateroom you will find all the clothes you need. If you take my advice you will turn in now."

The advice was in the nature of a command; but as it suited his own convenience to get rid of Gibbs' clothes he bowed to it.

Bettington was glad to be in his new quarters. He could not sleep for a long time. By what blundering ways he was to save Unwin's children from harm he did not know. There must be, at least, a dozen men aboard, all under the domination of the Boss. The ship could no doubt be worked easily enough with Hallett, his nephew and Bob Unwin out of the way. Assuredly his defiance of the Boss would aid none of them. There was a helplessness about the situation comparable with nothing on land.

## CHAPTER V

### A Millionaire's Holiday

Bettington was awakened in the morning by a small boy who was the bearer of coffee and rolls. He announced that breakfast would be served in the main saloon within the hour.

"This is all I need," said Bettington.

"What's your name?"

"They call me 'Silvers,'" said the boy, "but my real name is Augustus."

When he had dressed and shaved Bettington experienced the satisfaction of a fastidious man in finding himself once more in clean apparel.

On the quarter deck he found the Boss, who smiled the even, ungraduated smile of the night before. Today he was in a neat blue and gold uniform.

"I had better introduce you," he said, "to Hallett and then to the rest. It is most important that the women trust you. Hallett has already infected them with some distrust of me."

## Truth or Heroics About Story of Joan of Arc?

Although investigators have fairly well proven that Joan of Arc was never burned at the stake, but was told to take off her male attire, go home and never fight again, there are many people who want the world to stick to her story because it is heroic and inspirational, declares the Woman's Home Companion. The magazine adds, editorially, that it is far better to accept the findings of thorough research.

According to the article, investigators found records of Joan's visit to Metz in 1488, five years after her death was believed to have taken place, and subsequent papers recording her marriage and a costly gift to her.

**Facts About Sponges**  
Sponges are very irregular in form, symmetrical ones being rare, and their color is as variable as their shape. Deep-sea sponges, like other animals that live in the dark, are generally light in color; but those that live in shallow water are very bright, and the color assumed by the sponge is generally for purposes of defense, or to frighten away other animals.

Sponges are very abundant in the Australian seas; especially in the Gulf of Carpentaria, where they are used with the local highest form of sponges.

He led the way to the upper deck, which was also the boat deck and that on which the wireless room was. Hallett was a square built man and a capable sailor. He was embittered at having no higher command than this pleasure craft when his former companions were masters of ocean-going liners. He was perpetually in a state of annoyance at the curious position occupied by Clements the steward. Actually Radway, on whose favor he was dependent, had decided in several instances that Clements must be obeyed. It was bitter to a man who had decided ideas on the importance of his office.

"Well?" he snapped, turning to the steward. "What is it?"

"This is Doctor Waite, Captain," he answered.

Hallett from the beginning set himself to be hostile.

"When did you come aboard?" Bettington said what he had been told. Hallett spoke bitterly about shipboard etiquette and modern ways. Then he turned abruptly away as his nephew came up. This was a pleasant-faced man of three-and-twenty, who obviously shared his uncle's opinion of Clements. The boy seemed excited and worried.

"What do you think of the skipper?" Clements asked.

"A hard man to handle," Bettington returned, "as all obstinate men are."

"He's of no importance," Clements said idly. "Did you notice how 'Sparks' seemed to be upset? Something has happened to his wireless. He finds he can't adjust it and has to call in the electrician, who is one of my men, to help him. I shall let it work for a few days."

Again that calm assumption of absolute power from the little, slender man in his absurd livery.

"When I decide that no messages may be sent or received, Graumann will get busy. Look, that's Radway."

Radway had come on deck to walk himself into a condition which would permit him to enjoy an unnecessary luncheon.

"Cocktails," he commanded, as he caught sight of Clements. He stopped short when he saw the stranger.

"Who's this?"

"Doctor Waite," Clements answered. "You wired me to ship a physician aboard."

"I remember now," Radway answered. "Why haven't I seen you before this?"

His manner was abrupt and hard. He looked doubtfully at this tall, self-possessed man who returned his glare tranquilly.

"The doctor doesn't like to confess to being a bit seasick," Clements answered readily.

"Then a cocktail will do him good," Radway decided. "Bring four. You know my kind; just a dash of absolute in them."

When Clements had gone—and there seemed something strangely out of place in sending such a man on such an errand—Radway turned to Bettington.

"I eat too much and I drink too much and my arteries are made up of calcium, they tell me. Like the rest of them, you will preach temperance. You are not here for that. You are here to patch me up if the need occurs."

"Patching won't help you much," Bettington remarked.

"If you're not up to the job, I'll tell Clements to ship some one who is."

Abruptly Radway turned on his heel. He did not in the least mind if he had left his physician angry. The anger of fools—and a poor man was a fool, in his opinion—had no weight. The sea air was beginning to make him hungry. This would mean a rich luncheon served as that artist, the fat chef, alone knew how. A feeling of well-being pervaded him at the sight of the cocktails. He told Clements to pass one to the doctor.

"We can't wait for the ladies," said Radway, and threw his drink down with a single movement. "I wish I could sip like you," he said to Bettington. "When I want a thing I want all of it, instantly. As the ladies don't seem to be coming up, why let their cocktails go to waste?"

**Tired When SHE GOT UP**

Strengthened by Lydia E. Pinkham's Vegetable Compound

St. Paul, Minn.—"I used to be so tired when I got up in the morning so I went to bed. I had fainting spells and palpitation. Of course it was my age. I read a Lydia E. Pinkham booklet and started taking the Vegetable Compound three times a day. I am now a well woman. There is my picture in the booklet. I know what it did for me so my neighbors know it. I will write you if you want it. Lydia E. Pinkham's Vegetable Compound will help you. I feel like I have a new lease on life now. I thank you. Write to me at 1200 First Ave., St. Paul, Minn."

LIFE'S LITTLE JESTS

ALL SQUARE

An old negro had been discovered stealing chickens. The owner decided to speak kindly to him. "You see," he said, "it isn't the loss of the chickens that worries me. You could always have had one if you'd asked for it. What worries me is that an old fellow like you should be so stupid. Whatever will you do on judgment day when those birds are mentioned in evidence against you?"

HER PREFERENCE

"Madam, do you like the Cinema?" "Well, yes I do, but I believe I like the peppermint better."

With Feeling

Every life has some great sorrow. Every heart some pang of pain. And I have a date tomorrow With my dentist once again.

Not Allowed

A man who had made a reputation as an explorer was asked to talk to a gathering of the gentler sex. He murmured:

"I have never talked to women, you know." "None?" his friend replied. "You interest the men, why not the women?" "Because," he answered, "I can't use more than half my vocabulary when I talk to women."

Almost a Fortune

Dreary Dan—Why all the close calculation, Weary? Weary Rhodes—I'm just figuring how much money I would have if I got a nickel for every railroad tie I've stepped on.

SHE WOULD MARRY

"So you intend to marry my son without my consent?" "Yes—and without his if necessary."

State of Uncertainty

I motor in a reckless way And carefully contrive To read the paper every day To see if I'm alive!

Remarkable Personality

Mrs. Diggs—Mrs. Slinger is a woman with a wonderful personality, don't you think, my dear? Mrs. Jabba—Goodness gracious, yes! Why, that woman has buried three husbands in the last two years.

The Whole Show

The First-Nighter—Sally Skirtzoff appears to be the most popular member of your "Bathing Beauty" ballet. The Manager—Yes, she outstrips them all.

Genuine

"That wool stock I bought must have been the real thing." "Why? Didn't it drop during the slump?" "Certainly. It ran true to form and shrank on the first wash."—Boston Transcript.

An Unappreciated Genius

The Welfare Worker—Your husband tells me he is an inventor. What has he invented? The Good Wife—He invents excuses for not working.

LIVE STOCK

HIGHER QUALITY IN LAMBS NEEDED

Campaign Being Launched in Ohio for Improvement.

With prospects of lower prices for fat lambs this summer, quality in the lambs marketed will become increasingly important, says L. A. Kauffman, extension specialist in sheep husbandry for the Ohio State university. "Many lambs are now being contracted for on a basis of 8 or 9 cents a pound for fall delivery," says Kauffman. "The best lambs will be none too high from the producer's standpoint."

In the effort to improve the quality of the lamb crop, by reducing the number of bucky and undocked lambs marketed for from \$1 to \$3 below the top of the market, a statewide native lamb improvement campaign is being launched in Ohio, backed by the Institute of American Meat Packers, the National Live Stock and Meat board, the agricultural departments of the railroads, the United States Department of Agriculture and the National Live Stock Producers' association.

Prizes are offered by these agencies for the counties which show the greatest improvement in the quality of their lambs. The extension agricultural agents in each of the 89 counties of the state are being asked by Kauffman to enroll their counties in the lamb improvement project.

Importance of the sheep industry in Ohio is indicated by the fact which Kauffman cites, that this state has more sheep than any other state east of the Mississippi river.

Get Spring Lambs to Market Early in Year

The secret of lamb profits (and it really isn't a secret) is this: Get spring lambs to market early in summer. This requires docking and castrating, liberal feeding, control of parasites.

Liberal feeding helps the lambs to withstand stomach-worm infestation. It cannot be relied on as a preventive, however. The same observation is true in connection with roundworms of swine. Liberal feeding should be the rule always, and if the animals don't put on weight as a result, it's time to suspect worms and to get rid of them.

Lambs are inclined to be independent about eating grain when they have milk from the ewes. For that reason, the feed placed in the creep must be a palatable, complete ration. Grain alone won't coax all the lambs into the creep.

Some of the western sheepmen use a canvas strip instead of a trough for feeding sheep. The strip of canvas is about fifty feet long and has eyelets and rope at the end so it can be staked down. There is an iron rib every few feet to keep the canvas spread full width. The canvas can be taken up and shaken when dirty.

Let Pigs Harvest Corn and Different Pastures

"Pigs will be pigs and might as well be hogs; so turn them loose in the pasture," says R. B. Hinman of the New York State College of Agriculture. An acre of pasture may be worth 50 bushels of corn—to a pig. Another good thing about turning pigs into pasture is that they do the harvesting themselves.

Rape is the best annual crop for pigs, and on good ground will suffice for more than twenty to the acre. On alfalfa and clover pastures, which fit well into crop rotations and tend to improve the soil, about seventeen pigs can be fed. In early spring and late fall sows with suckling pigs can pasture on blue grass.

A combination of clover and timothy also serves as a good pasture for pigs and if farmers use a mixture of clover and timothy in their annual crop rotations, hogs may be pastured on this crop without the necessity of planting special pastures.

Corn Gluten Feed Good as Protein Supplement

Corn gluten feed is a good protein supplement for fattening steers if it is mixed with some other protein feed such as linseed or cottonseed meal. It is not advisable to use corn gluten feed alone to supplement corn grain. All the corn gluten feed in equal parts with linseed or cottonseed meal or both and you will have a good supplement whether you are feeding steers on corn or ground barley. Yearling steers need about two pounds of this supplement per head daily when on fall feed.

Feed Grain in Creeps

Early spring lambs to be fattened for market should be given grain when three or four weeks old. A creep should be built where the lambs may go to get their grain at any time. If the ewes are giving plenty of milk, the lambs will not eat much grain at first, but as they become larger they will eat enough grain to make considerable difference in their gain and health. By following the plan of creep feeding, lambs may be marketed earlier at a higher price.

South West NEWS ITEMS

Herbert Young, a taxicab driver of Tucson, Ariz., is under sentence to hang July 15 for the murder of John E. Dye, a fellow worker. Dye was found beaten and stabbed to death about two months ago. Robbery was believed to have been the motive.

Robert H. Smith, 18 years old, son of Dr. H. M. Smith of Las Vegas, was chosen by the State Board of Education as New Mexico's representative in the Edison scholarship contest. The board's vote was unanimous. Ernest M. Beahm, Albuquerque, is his alternate.

Importance of dates as an Arizona product has induced the University of Arizona to establish a special date expert in the Salt River valley, where an intensive study of dates will be made. Prof. D. W. Albert, assistant horticulturist at the College of Agriculture, will have charge of the work.

Arizona will spend approximately \$21,000,000 on its highways during the next sixteen years through a plan adopted by the State Highway Commission. The plan submitted by W. V. Lane, state highway engineer, calls for allocation of this amount of money on the primary system of roads in this state until 1940.

Any residents of New Mexico contemplating the purchase of shares of stock, are requested by State Bank Examiner Lawrence Tammo, if they entertain any doubts, to make inquiry of his office in Santa Fe as to the desirability of the stock. His staff, he said, would be glad to give prospective purchasers the benefit of its investigation.

Convinced that W. H. Archer of Chino valley, Ariz., and Frank Ward of Los Angeles were unjustly charged by Juno Aruold, District Attorney Jack Kenney of Santa Fe released the men from the Santa Fe county jail. The girl, whose intermittent hemorrhages in her head have Santa Fe physicians puzzled, remains in the hospital in Santa Fe.

Dr. J. J. Walker, a practicing physician of Roswell for fifteen years, has been charged jointly with Dr. Milton Grissom, 71-year-old Roswell dentist, for second degree murder in connection with the death of Lillian Morris of Elida, N. M. The girl is alleged to have died at the summer home of Dr. Grissom on the Ruloboro, following an operation performed by the two men.

Death revealed that the life of William De Leggant, interior decorator, known familiarly in St. Louis, Mo.; Maakins, Ohio, and in Phoenix as "Billy the Painter" for half a century, was a masquerade, when De Leggant died in Phoenix, 68 years old, it was discovered she was a woman. She had posed as a man since coming to New York from France as a girl in her teens.

New Mexico Normal University's first semi-annual extemporaneous speaking contest was held recently in the college assembly in Las Vegas. Theodore Carpenter, Normal freshman from Clayton, N. M., took the honors for first place in the contest, with Arvel Branscum, freshman from Muleshoe, Texas, and F. O. Bishop, senior from Clovis, N. M., taking second and third places respectively.

Copper companies throughout Arizona recently reduced the wages of employees 5 per cent because of the recent reduction in the price of copper. The decrease will cut approximately \$4,000 per day from the mine payrolls. Approximately 15,000 men were affected. The payrolls being reduced include those of eleven major producing companies and numerous small operators. The chief sections affected were Bisbee, Miami, Globe, Jerome, Ajo, Clifton and Morenci.

State Land Commissioner Austin D. Crile recently announced in Santa Fe that minimum rentals in the restricted oil area of Lea county, including the Hobbs field, will be raised from fifty cents to \$10 an acre. The increase becomes effective May 15. Dr. Crile said the minimum rentals were revised to "avoid any possibility of a charge of favoritism against the land office." A colored map of the oil area has been prepared and hung in the land commissioner's office.

Net operating revenue of \$11,947, \$41.58 earned within New Mexico, is reported by the Santa Fe railroad in its 1929 statement to the State Corporation Commission. For the most part, the revenue was derived from business which merely passed across the state. The State Tax Commission in Santa Fe fixed the Santa Fe's valuation for this year at \$72,053,456, raising it \$19,552,291 over the 1929 assessment. The Southern Pacific, whose valuation was raised \$2,122,293 to \$25,780,867, shows \$5,295,244 net operating revenue for its New Mexico lines.

The gasoline tax in New Mexico totaled more than \$200,000 last month, Mrs. Mary Bartolino, assistant state comptroller, has announced in Santa Fe. The figure was \$261,112.19. The increase was \$48,766.69 over April, 1929. Not a month has passed in the past three and one-half years that the tax has not shown an increase over the corresponding month of the previous year. The five-cent gasoline tax said the state of New Mexico during April, 1921, 1922, and started November, 1922, at \$100.00.

Analyzing YOU... With the New Science of Syllables By C. J. COFFMAN Dean of All the Enumerators

Marie

Considered by many to be the most beautiful name, especially favored by the artistic French, you do start off well indeed, Marie.

It is possible that you do not have any idea of your own real abilities. This may be due to the fact that your first syllable, Strong and Gentle Hand, really indicates "mark" or "disfigure," to "hold back or retard." But this need only occur when you yourself fail to observe your chances to go ahead.

There is more strength in your gentle hands than people imagine. As a matter of fact a very ancient syllable found in your name, ARI, means "the lion."

So call upon the stronger part of yourself, Marie, even though you may feel doubtful about the outcome. To make yourself go on to success all you need to do is to imagine the enjoyments of living in success.

If you can start this imagination into a direct doing right now you will soon graduate from the day dreamer class into something permanent.

Your mind has a way of radiating that which seems to water and encourage other minds. This is indicated by the syllable RI in your name, adapted from a very ancient rendering in the Hebrew.

Even the I itself means fruitful country.

It is easily possible for you to join the ranks of the famous, even if it is not so easily accomplished. The main attribute here is the ability to keep on keeping on.

Thus did one Marie gain the heights. Just a plain little woman with one tremendous talent—the ability to be everlastingly and painstakingly exact. This is Madame Marie Curie of France, one of the world's greatest scientists.

In lighter fields, but requiring no less of strength and determination, you are the namesake of such as Marie Perrot, Marie Dressler and Marie Tempest, so well known in the dramatic and cinema world. Come now, Marie, another step, another push and who knows the greatness to which you may attain?

Margaret

Margaret, you will need the strength of will so beautifully displayed in yourself, to overcome the currents which you have selected as your problem.

The first syllable of your name, MAI, means just what the word means in the dictionary, that is to spoil or mark with a blemish. To resist this you must use your strength and fighting ability. This strength is shown in your finely chiseled but wide-bridged nose.

In the science of syllables the meaning of GAIA, representing the middle syllable in Margaret, is to diminish or restrain.

If you will direct your activities between those restraints you will shoot out into prominence in a most amazing fashion. You can become successful beyond the dreams of your friends or the envy of your enemies.

The last syllable of your name, ET, based upon the Hebrew word ETS, is the substance, the very foundation, of your strength. For this syllable has a general meaning of timber or tree. It shows not only the root formation of your growth but of what stuff you are made, the "timber" in you.

When you do set your mind on fame and success nothing can stop you. A wonderful example of this is shown in the career of Margaret Anglin who overcame almost insurmountable difficulties to arrive at her success.

So do not be discouraged, Margaret. If the grain of the timber in you is straight and true you will go through to your mark. (© 1929, Western Newspaper Union.)

Far-Off Yet Near

Referring to the Andromeda nebula, a galaxy of stars so distant that 1,000,000 years are required for its light to come to us; "The astonishing fact," says Dr. Forest Ray Moulton, distinguished astronomer, "is not that these exterior galaxies are so far away, but that they are so near that their distances can be approximately measured."

Expensive Costumes

It is said that the costumes worn by actors in the Passion play at Oberammergau are made without regard for expense. One worn by Pontius Pilate was reported to have been made of material especially woven in Constantinople which cost 600-marks a yard.

Don't Gosh

If you are real friends you tell each other so in a hundred ways and you never leave the matter in doubt.—Women's Home Companion.

Doctor's PRESCRIPTION when system is sluggish; costs nothing to try. Includes image of a bottle of Syrup Pepsin and text describing its benefits for constipation and general health.

Free from pimples! What a relief it is to know that you can be free of pimples. Includes image of a woman's face and text describing Cuticura's effectiveness.

Happy Woman Tells How She Lost 19 Pounds of Fat in 27 Days. Includes text of a testimonial and an image of a woman.

Red Cross Ball Blue should be used in every home. Includes text describing its uses for cleaning and whitening.

Nerves Bad—Nausea—Weak During Motherhood. Includes text of a testimonial and an image of a woman.

Boys used to whisper sweet nothings into a girl's ear, but now they croon them into a megaphone. Includes text of a testimonial and an image of a megaphone.

If Baby has COLIC. Includes large text and an image of a bottle of Castoria.
