NUMBER 353

The Money is not Lost

It is true of every community in this country that many times more capital goes out of the community for investment in foreign enterprises than is invested in local enterprises.

The reason is that foreign enterprises send out high pressure salesmen to sell the stock who make representations so local man would think of making to another.

If a foreign enterprise fails, as many of them do, the community loses every dollar it has invested. On the other hand if a local enterprise fails the money has practically all been spent in the community and is still circulating among the channels of trade while the investors have in turn a fund of experience that will prove valuable in the next venture.

We have no sympathy with the individual who proposes, because one local enterprise has failed another venture should not be made.

In everything else the rule "if at first you don't succeed try, try again" works and there is no reason why the same should not hold true in community development.

A Glance Backward

A standard Chevrolet passenger car listing at \$2,500!

That message, if heralded from billboards or the advertising pages of newspapers today, would cause considerable wonderment and speculation among the millions of present Chevrolet owners. Yet it was a more or less familiar sight back in 1913, when the company was getting into its second year of operation, and actually priced one model at that figure, the highest at which a standard Chevrolet has ever sold.

This 1913 car, an ancient prospectus says, had an average road weight of 3,700 pounds less passengers, and a wheelbase of 120 inches. With its gleaming brass headlamps and its tourist type

Smuts sees Conditions Worse than During War

Southampton, England, Aug. 24.—General Jan C. Smuts, former premier of South Africa, said on arriving today from Capetown that the existing political and financial crisis was in some ways as "dangerous as the great war" and should call for the same spirit of national and personal sacrifice.

"Many people seem oppressed by the thought of war," he said, "but I for one feel more impressed with the danger of the great financial and economic breakdown which may endanger the whole structure of European civilization."

"I think, however, there is no reason yet to despair of the future, but rather there is a call for resolute action. A new chapter in the peace of the world must be written. The time is rapidly coming when any action, even if not the wisest, will be better than continual drifting."

General Smuts is in England to attend the coming centennial meeting of the British Association for the Advancement of Science.

The man who doesn't get any pleasure out of work is face to face with a hard row in the world. The scheme of things requires that every man earn his way by his labor and it is up to everyone to create a liking for it.

body mounted high above the wheels, it bore little resemblance either in size or appearance to the modern output of the company. Although in 1912, the first full year of production, the car then being built was listed above \$2000, no Chevrolet since that date has ever sold for so high a figure. Since 1922 none has ever listed as high as \$1000. Today, the range of from \$475 to \$675 is considerably below any period in the past, despite the fact that the 1931 car is larger than any Chevrolet since 1922 when four different models listing above \$1,000 were built on a 110-wheelbase.

When Justice Fails

The various Wickersham reports on the state of criminal justice in the United States must have startled many of our citizens.

Police brutality, political-criminal alliances, obsolete methods of handling criminals, corrupt lower courts—such elements as these stand in the way of fair application of justice. We have built up a gigantic legal machinery, based on thousands of laws and bound with red tape, and it has failed.

If we are to have respect for law, we must clean house. We must separate politics and crime. We must completely overhaul our law books, retaining fundamental laws, and throwing out the unenforceable and fanatical. We must go back to the old idea of law-making which protected both the rights of society and individual liberties.

We cannot make the nation law-abiding by passing more laws. We must give the crime problem the logical attention it deserves or surrender to the lawless element which thrives on liberty-restricting legislation.—Industrial News Bureau.

This Week in History

August 24—British capture and burn Washington, 1814; Battle of Wodensburg, 1814; collapse and explosion of dirigible balloon over Hull, England, 42 were killed, 1921.

August 25—Germans retreat from American front in France, 1918; A British fleet arrives in Chesapeake Bay, 1777; Austria declares war on Japan, 1914.

August 26—Woman suffrage proclaimed in U. S., 1920; Graf Zeppelin lands at Los Angeles Calif., 1929; Matthias Erzberger, ex-German vice chancellor, assassinated, 1921.

August 27—Italy declares war on Germany, 1916; Battle of Long Island, 1776; Ft. Frontenac captured by the English, 1759.

August 28—Rumania declares war on Austria-Hungary, 1916; St. Augustine Bay, Florida, discovered and named, 1565; Passenger steamboat Buryvestnik smashed into a river pier near Cronstadt, Russia, and sunk, 360 lost, 1926.

August 29—Oliver Wendell Holmes, poet, physician, born, 1809; Battle of Quaker Hill, Rhode Island, 1778; Capture of the ferts at Hatteras Inlet, North Carolina, 1861.

August 30—Union defeat at Richmond, Ky., 1862; Steamer Teuton wrecked off the Cape of Good Hope, 200 lost, 1881; Battle of Beaumont, France, 1870.

No new theory or ism that has been discovered since the beginning of time has caused one dent to appear in the theory that honesty is the best policy.

Liquor Clouds Real Issue

We must be willing to follow a leadership that will help us realize that the problem of prohibition has now got beyond the traditional slogans and tricky strategies alike of the wets and the dries. Here is the issue that we dare not leave longer to a duel between competing fanaticisms.

For as long as this problem is left to a warfare between the extreme wets and the extreme dries, prohibition will continue to be the smokescreen behind which timid politicians hide their reluctance to deal realistically and courageously with those basic economic issues upon which the future of our industrial order depends.

The problem has become more than just a question of liquor or no liquor. The problem is nothing less than the moral sanitation of our national life and the clearing of the track for national concentration on critical economic issues. In the face of gang-ruled cities, gin-soaked youth, and a national orgy of dishonesty and evasion, in which even the most respectable tend to share, it behooves us to do something other than huddle defensively about the simple catchwords coined in the early battles between the wets and the dries.

Until we broaden this issue and deal with its wider aspects, prohibition will continue to make American politics a high carnival of hypocrisy. We must be willing to follow the policy that will make for the moral stabilization of our national life and clear the stage for economic considerations, whether this policy fits our wet or dry preconceptions or not.

Just as Lincoln took the issue of slavery out of the hands of competing fanaticisms by emphasizing the need of national union rather than the evils of slavery, so the nation waits for a leadership that will rescue prohibition from competing fanaticisms by emphasizing the need for a moral sanitation of our national life and for concentration on economic issues rather than indulging in a mere shouting of the war cries of wets and dries.—Glenn Frank in Wisconsin Alumni Magazine.

How Much do you Know?

QUESTIONS

- 1 Of what country is Ghandi a native?
- 2 For what was Al Capone notorious?
- 3 At what temperature does water freeze?
- 4 At what temperature does water boil at sea level?
- 5 Of what is glass made?
- 6 What is meant by shatter-proof glass used in automobiles?
- 7 What is lightning?
- 8 In connection with what agricultural implement is the term snath used?
- 9 What were the gleaners?
- 10 What is meant by the term biennial as applied to crops?

ANSWERS

- 1 India.
- 2 As a Chicago gangster, 32 degrees Fahrenheit.
- 3 212 degrees Fahrenheit.
- 4 Glass is made of sand.
- 5 Shatter-proof glass is prepared by enclosing between two panes of glass a thin sheet of celluloid. The purpose of which is to prevent glass when broken, from shattering.
- 6 Lightning is the discharge of electricity from a charged cloud to the earth or to another cloud.
- 7 The scythe.
- 8 Gleaners were the poorer

Baptist Church

Rev. I. D. Jordan, Pastor
10:00 A. M.—Bible Study.
Come, and bring your Bible.
11:00 A. M.—Sermon by the Pastor.
7:45 P. M.—Prayer and Praise Service
8:00 P. M.—Sermon.

The Watchman Examiner quotes a writer who says: "Going to church is like going a-shopping. You generally get what you go for, nor more no less. You may go into a store where shelves are loaded with thousands and thousands of dollars worth of goods and buy only a paper of pins. So you may go into God's storehouse of grace and take nothing away but the impression that the leading soloist makes on you. But even poor preaching and meager services furnish rich rewards to the really hungry and thirsty after righteousness." The writer might have said that the shopper's ability to buy determines the amount of goods he carries away. So it is in the kingdom of God, the church-goer's ability to receive spiritual impressions determines the value of worship.

cases of people who were admitted into the wheat fields after harvest to gather up the stray heads of wheat.
10 A biennial is a crop that is planted one year and harvested the next.

Satin by Day and Satin by Night

By **CHERIE NICHOLAS**

AS TO the fabric which is outstanding at the present moment, it is satin by day and satin by night, which reigns supreme in the mode. The style-wise woman who is seeking to replenish her midseason wardrobe or planning her fall costumes will, if she has not already done so, discover that there is simply no getting away from satin either for sports wear or the formal evening gown or for the popular pajama fashions.

Notwithstanding its aspect of luxury, satin, whether it be white or in pastel colors, owing to the fact that it tubs perfectly, has proven conclusively that it is as practical as it is chic for the making of the sports costume. Which accounts for the enthusiasm with which fashion's followers are turning satinward this season.

Just now it is the sleeveless white or pastel satin tailleur which is making definite appeal. The model to the right in the illustration is typical. Details which intrigue in the styling of this attractive sports suit are square revers, big buttons and a belted waistline for the blouse with a generous pleating giving a proper flare to the skirt.

In many instances the mode is varied with a cunning cape arrangement to take the place of sleeves. The very latest satin sports frocks are intricately seamed after the manner which has so successfully entered into the designing of the evening satin frock.

Later on, and now for that matter, the suit or afternoon frock of black satin will become the theme paramount. If not black then brown satin

will be first choice, for fashion reports are already placing emphasis on brown for fall. Softly tailored effects distinguish the very smart and very wearable costume pictured to the left. This five o'clock ensemble which is of black crepe satin endorses the jacket-suit styling, with draped collar of self-satin. The blouse is of pale pink triple chiffon.

As to satin for the evening frock word from Paris, as in fact from all style centers, reassures us to a continuance of its triumphs. We are showing in the miniature panel at the top a lovely formal gown made of rose-ivory satin. The neckline of this charming dress subscribes to the vogue which calls for softly tied bows. These bows which are so casually tied are made a feature throughout the styling of satin modes whether they be "sporty" or ultra formal.

After you have indulged in a satin sports frock, a satin afternoon dress and a satin for formal, you will be liking satin so well by that time the urge for a satin pajama ensemble will likely follow. The vogue of pajamas for formal evening wear is interpreted in slubbed crepe satin as shown in the other tiny panel. Curved seamings suggest an empire silhouette in the bodice. Shaped inserts in the wide trousers contribute a graceful fallness below the molded hipline. The giraffe tied about the modish jacket foretells a trend to short-waist empire lines which seem imminent for fall and winter.

(©, 1931, Western Newspaper Union.)

BRIDGE LONG PART OF "LONDON TOWN"

Structure Across Thames in Use for More Than a Century.

That bridge across the Thames at London which is borne upon five granite arches and known as London bridge has completed 100 years of history. But its name is much older than a century. At or near the point at which this modern structure spans the river there has been a crossing from time immemorial. The Saxons had a bridge there (or successive bridges) made of wood and barred by a fortified gate—a gate to the city. It was swept away by a storm.

Then, in 1180, only a little more than a century after the Conqueror had come, was commenced that stone structure which served river-crossing Londoners for nearly 650 years. Until the middle of the eighteenth century it alone drew together the two banks of the Thames at London.

In its picturesqueness it vied with the Rialto of Venice and the Ponte Vecchio of Florence, which, in some part, it resembled. On each side of its roadway it had shops and stately houses, some with gardens on their roofs. There was a Twelfth-century chapel on a wider pier at about the middle.

The structure, however, was silted better to the ideals and customs of the Middle Ages than to modern notions about bridges. Within the 600 feet of the river's width it had 18 solid stone piers varying from 23 to 34 feet in thickness, so that, in effect, it sent the waters of the Thames through a greatly narrowed channel. The piers supported buildings four stories in height, which in turn narrowed the passage for vehicles and pedestrians, and darkened it to almost tunnel blackness. The buildings were cleared away in the middle of the eighteenth century, but the obstruction to navigation still remained, and, in 1823, after

bitter debate, it was decreed that a new bridge must be built. Two years later the duke of York laid the foundation stones; and then, after six years more, the new structure, only a few yards higher up the river, was opened with flags, music, oratory and parades. In the following year old London bridge went the way of the centuries.

But London bridge is still London bridge. It still divides the Thames into "above" and "below" and, though there are other bridges now—Tower and Victoria, Waterloo and Westminster and the rest—it still carries Londoners from one bank to the other, just as its predecessors carried Saxon and conqueror, knight and cleric. And though the pace is swifter now, what with motor cars speeding along the deck widened in the beginning of the motor age, the bridge has not broken with Britain's past. Its lamp posts are cast of the cannon Britons captured in the War of the Peninsula.

Ceiling of the World

"What is the ceiling today?" This is a common question around airports, because a flying "ceiling" varies with the atmospheric density. To determine accurately the fluctuating ceiling clouds, haze and fog around airports and weather bureaus, an experiment is being conducted in Cleveland with a light beam that is virtually a tape measure.

To determine the ceiling height with this new electric tape measure, it is only necessary to focus the light beam from a light projector upon the clouds and to sight, through a special gauging instrument, the light spot thus thrown on the clouds. The optical system employed in the projector produces a phenomenon beam intensity of 1,840,000 candlepower.

Too Speedy

Hanks—Is your dentist a fast worker?
Shanks—I'll say so—he sends his bill in the next mail.

Women are naturally foolish, because they were made to match the men.

Proof That Trout Preys on Newly Planted Fry

The spectacle of large fish gobbling up newly planted fry in Tenaya lake in Yosemite National park recently proved to the rangers in charge of the fish planting that trout are cannibals—and also proved too much for the disposition of the rangers, who promptly disposed of the offenders. Oscar Irwin, park ranger, was in charge of the planting of a supply of steelhead fry in the upper end of the lake. After releasing the young fish the planting party noticed a large fish swimming around in the shallow water chasing four of the small fish just released from the can. Ranger Irwin waded out after the attacker with a shovel, hit it over the back, scooped it up and brought it to dry land. It proved to be a 14-inch German brown trout. A few minutes later another fish appeared in search of food, and again Irwin and his trusty shovel went to the defense of the fry. This time he brought out a 10-inch trout of the same species.

No "After Bite" When Shaving with Cuticura Shaving Cream

Here Are the Reasons Firestone CAN GIVE YOU EXTRA VALUES

6 PLIES UNDER THE TREAD

ONLY by comparing manufacturing, construction, and distribution can you determine what is behind the price tag on the tires you are asked to buy. Price alone is never an index to value unless you know the reputation and ability of the manufacturer and what advantages he has in purchasing of raw materials, manufacturing efficiency, and distributing economies. These are the factors that determine tire value.

Read the facts at the right—then go to the Firestone Service Dealer in your community and make your own comparisons with cross sections of Firestone Tires and special brand mail order tires. See the Extra Values you get by equipping your car with Firestone Tires.

Manufacturing Efficiency

Firestone control every step in the manufacture of their products—own their own rubber preparation factory in Singapore—their own cotton fabric mills—and their own huge tire factories—the most efficient in the world. With these great advantages Firestone save millions of dollars annually, which are passed on to car owners in Extra Values.

Mail Order houses have their tires built as a part of a miscellaneous assortment of production by some manufacturer who is unknown to the public. Mail Order houses are dependent upon others for their tires.

Distributing Economy

Firestone have the most efficient and economical distributing system through Service Dealers and Service Stores. Firestone know tires must carry with them the necessary service for the economy, safety, and satisfaction of car owners. Special brand mail order tires are usually made just to sell, with limited or no facilities for servicing the car owner after the sale.

*A "Special Brand" tire is made by a manufacturer for distributors such as mail order houses, oil companies, and others, under a name that does not identify the tire manufacturer to the public, usually because he builds his "best quality" tires under his own name. Firestone puts his name on every tire he makes.

Double Guarantee—Every tire manufactured by Firestone bears the name "FIRESTONE" and carries Firestone's unlimited guarantee and that of over 25,000 Service Dealers and Service Stores. You are doubly protected.

SLEEVES ACQUIRE SOME IMPORTANCE

Sleeves are interesting and important enough to write volumes about these days. Every couturier not only has his, or her, own idea about them but the word idea is in the plural where all of them are concerned, says an authority.

They have no one length or type this summer—that is certain. The long and the short of it, according to Faton, goes something like this: Printed silk or crepe from the elbow to the cuffs, fitting the arm rather snugly. The fullness in the tucking is released after an inch and the ruffle falls to midway between the elbow and the wrist.

This short sleeve is simplicity itself. It strikes the arm when finished halfway between the shoulder and the elbow and has only a three-inch cuff put on very much like a man's shirt cuff, but instead of cuff links the ends that come together are made into tiny pleats.

Maggy Rouff has made a "dancing" sleeve that is delightful. It has a run of six parallel tucks just above the elbow and from there on the under side it falls in cascades almost to the wrist. At the inside of the elbow it is short and lined with white. The white extends further than the outer layer and when the arms are lifted in dancing the effect is everything to be desired.

Cottons Hold Their Own With Silks and Satins

If you ever had an idea that cotton materials were in any way inferior to silks and satins, you will have to revise your opinion this summer. Sheer fabrics such as organdie, plain or embroidered batiste, and dotted swiss are used not only for informal evening dresses but for those of the more formal sort. June bridesmaids will wear pastel-toned organdie dresses, and brides will wear fine embroidered batiste. Usually these lighter, sheer cotton materials are worn over taffeta or silk crepe slips, taffeta being the smartest choice for evening; but you may prefer a slip or petticoat of tulle or batiste trimmed with lace edging and bows.

New Fall Millinery

A remarkable change in millinery is the message which the first autumn hats carry. The initial chapter of the story has to do with little felt or velvet shapes which are almost too quaint to seem possible in this age and day. They are worn at a tilt which is tantalizing, over one eye and showing one side of the coiffure. Feathers on them, too, either perky little colorful novelties or sweeping ostrich of the most picturesque sort. Speaking in general it is the hat fashions of the second Empire period which is the inspiration for 1931 millinery. Just at present the theme paramount in the mind of designers is the Empress Eugenie silhouette. Worn at the recent Paris races were any number of cunning chapeaux of the type as shown in the sketches herewith. The little felt in the circle is one of the smart new devices.

Red and White and Browns
This is a new alliance of colors which appears again and again in smart costumes. In one instance a frock of brown and white printed silk was accompanied by a red hat and red accessories. In another a brown suit had a red and white scarf and was complemented by a red bag.

FIRESTONE SERVICE DEALERS & SERVICE STORES SAVE YOU MONEY AND SERVE YOU BETTER

Capitan Schools

The Capitan Schools will open Monday, Sept. 7th, at 9:00 A. M. with a general assembly in the gymnasium; parents and friends are cordially invited. At this time the new teachers will be introduced and announcements will be made concerning registration. Immediately following this assembly the pupils will pass to their class rooms for registration and assignments.

Superintendent C. V. Koogler says that the prospects for a large and efficient school at Capitan are better than ever, as many new homes have been erected in Capitan, the ranches in the surrounding country are all occupied, the faculty is experienced and efficient, the program of studies is carefully planned according to the pupil needs. Many improvements have been made to the grounds and building, and the long coveted foot-ball team is to be a reality.

Cent-A-Mile Rate

A record-breaking holiday traffic movement for New Mexico during the first two weeks of September was virtually assured today with announcement by Southern Pacific Company of plans for the holding of a late-season "Dollar Day" sale of cent-a-mile transportation, September 3, 4 and 5 the Labor Day week-end.

Plans for the sale were made public by C. P. Huppertz, agent for the railroad here.

Pointing out that the bargain offering of rail transportation will just precede the Labor Day weekend, Mr. Huppertz expressed the belief that the low fares will stimulate the heaviest September traffic in the history of the state.

With sale dates Thursday, Friday and Saturday, September 3, 4 and 5, the tickets sold under the plan will have a return limit of 12 days from the first date of sale, or midnight of September 14, Mr. Huppertz said.

This is expected to prove of unusual interest to New Mexico residents planning to attend the Fiesta de Los Angeles in Los Angeles from September 4 to 13, as well as for late vacationers throughout the Southwest.

The forthcoming excursions, first of their kind since last May, have been authorized over the entire Pacific Lines of Southern Pacific, serving six western states. As in previous instances, tickets under the plan will be good on all trains, both coach and Pullman, operated by the company between El Paso and Portland and between San Francisco and Ogden.

Based on three-fifths of the usual one-way fare, the round-trip "Dollar Day" transportation represents one of the most aggressive steps taken by the railroad in its fight to win passenger traffic back to the rails, Mr. Huppertz said. Previous experiments with the plan met with widespread success.

Learn what a difference six cylinders make

Step out of any other low-priced car into a Chevrolet, and learn the difference six cylinders make.

"Idle" the engine—and the whole car remains steady. Open the throttle—the power flows evenly. Accelerate—throttle down—go fifteen or fifty—and this smoothness stays with you whatever you do. It's actually built into the motor—and objectionable vibration never even starts!

Yet smoothness is only one of many six-cylinder advantages. There's greater quietness, because noisy vibration is gone. There's greater comfort, because built-in smoothness doesn't tire you out. There's greater flexibility, because the power impulses of a six overlap. And a six is much easier to handle!

If you raise the hood of a Chevrolet and watch the engine running so smoothly, you'll realize that six cylinders also mean greater dependability.

And remember when you do—that no other car is so economical to operate as the Chevrolet Six.

*in smoothness
 quietness
 flexibility
 handling ease
 riding comfort
 dependability
 economy
 long life*

Oh Boy! School bells will ring again next Monday!

William J. Humphrey came up this week from El Paso.

Mr. and Mrs. Garrard visited Las Cruces Saturday, returning late the same evening.

MAL PAI ROOMING HOUSE—Board and room by week or month. Managed by Mrs. R. L. Childress

M. Doering, who left two weeks ago for a vacation to California cities, returned on No. 4 today.

FOR SALE CHEAP—Two good three year old unbroken mules. See Hunt Hobbs. Capitan. N. M.

Mr. and Mrs. F. E. Hedrick and son Raymond went to El Paso Sunday and will make that their home for a period.

Mrs. Russell Reed and her aunt, Mrs. H. C. Adams drove to El Paso Wednesday to remain over the week-end.

Mr. and Mrs. R. P. Hickey, of the Oh—Oh ranch left last week for Chicago. We wish them a pleasant visit and a safe and early return.

Johnson, son of Mr. and Mrs. Orsa Stearns, returned Friday from Los Angeles where he had spent two months with Mr. and Mrs. Robert Poage.

Mrs. George Dingwall left Tuesday on No 12 for Dawson, to be with her husband a few days. George was recently transferred to Dawson.

Mrs. C. P. Huppertz and daughter Miss Helen returned yesterday from Cedar Falls, Iowa, where they had been vacationing and visiting the old home the past six weeks.

Mr. and Mrs. C. T. Gardner, who had been visiting their daughter, Mrs. E. M. Barber, left Sunday morning, their objective being Hollinger, Texas, where they will spend the winter.

Mack Shaver leaves today for Albuquerque to take up some field work with the engineering corps of the State University, before the opening of the fall term of that institution, which he will again attend.

The Ice Cream Social given by the Missionary Society at the home of Mrs. Davis last Friday evening netted quite a neat sum. The quilt which the members had made was captured by Mrs. A. E. Lesnet.

Mr. and Mrs. S. H. Nickels and children returned Saturday from Las Vegas. Mrs. Nickels had been attending the summer session of the Normal University, while Nick has been doing some romancing, as a glance at some popular magazines indicates.

Dr. G. W. Griswold, of Roswell, in pursuance to his announcement, conducted an ear, nose and throat clinic at the Paden Hospital, Thursday, Friday and Saturday of last week. More tonsils were removed than anything else, and many were nursing sore throats this week.

The Gallacher, McClintock, Barber, Beck families and John A. Haley motored to Alamogordo Sunday, the ladies for an outing, the boys to play golf. The day passed very delightfully, and its pleasure was enhanced by the courtesies extended by the Alamogordo boys.

Mrs. O. S. Stearns returned Tuesday from Tucumcari, where she had visited with friends.

For Sale—O. M. Franklin Black Leg Bacterin; and Black Leaf 40. The Titsworth Company, Inc.

L. T. Bacot was here over the week-end from Tucumcari, to see his daughters who are visiting the Will Gallacher family.

Mrs. Alicia Fernandez left Monday for her home at Dawson, after an extended visit with the St. John family.

Dave Garcia and family came in this week from Bisbee, Arizona, for a visit with parents and other members of the Garcia family.

Special canned milk reduced. Pet milk, large size—\$1.00 per doz cans. Pet milk, small size—50c per doz. cans.—Ziegler Bros.

A. H. Kudner arrived last Saturday from the east by plane. He had guests to come with him, Abie Winters, Hal Stephens and Mrs. Connie Herrington. The Oh—Oh ranch is thus enlivened by the Easterners who are being royally entertained.

Mr. and Mrs. Walter Wingfield were here the latter part of last week, enroute from Amarillo, Texas, to Los Angeles. The Wingfields are related to the Joe R. Adams family and visited them and saw many friends whom they knew here twenty years ago, when Mr. Wingfield was in the grocery business.

Mrs. Sallie Sweet, of the Carrizozo Eating House, left Tuesday for Knoxville, Tennessee, to meet her daughter, Miss Louise. Mother and daughter will return home the coming week. Miss Louise has been in Cincinnati, Ohio, all summer, attending the celebrated Conservatory of Music in that city, and has made the violin a special study.

A. R. Dean and son were in town a short time Saturday on their return to San Simon, Ariz. Mr. Dean, who had lived in the Baca ranch country, this county, for a number of years, and was counted among our best citizens, moved a year ago to San Simon, where he had acquired a ranch. It was a distinct pleasure to greet our old friend again and to note that his health was greatly improved.

Grocery and Market

Groceries
 Vegetables
 Meats

Our groceries are fresh and palatable, because new goods—and the best—constantly replenish our stock. And, while we are "bucking" no one, we know we're selling groceries on a very close margin, and if you'll come in and investigate we are sure you'll be convinced.

Our vegetables are fresh and kept crisp by our cooling system. We invite you to inspect them and price them.

MEATS—We handle only the best—Baby Beef, at figures that you can afford to pay—properly iced and kept in perfect condition for your table. And we have the choicest packing house products in the way of hams, bacon, lard and compounds.

Stops Headache in Five Minutes

A Wonderful Formula Ends Aches and Pains Almost Like Magic. Something Better and Safer. Thousands of men and women are now stopping throbbing, aching, dizzy, splitting headaches, as well as the excruciating pains of rheumatism, neuritis, toothache, etc., with a marvelous new formula that is said to be far superior to anything heretofore used.

It contains no aspirin, acetanilid, etc., and is absolutely safe and harmless. This remarkable formula, called A-VOL, is being prescribed by thousands of doctors, dentists and welfare nurses because of the quick, efficient way it relieves all types of aches and pains without depressing the heart, or causing any other harmful effects. A-Vol quickly stops the most severe pain, leaving the patient refreshed and feeling fine. Especially effective in women's period pains. To quickly prove to yourself that this is truly a remarkable formula, just step into your nearest drug store and get a package of A-VOL for a few cents. Take a couple of tablets right there. If your pain is not gone in five minutes, the clerk will return your money.

WORLD WAR YARNS

by Lieut. Frank E. Hagan

The Battle That Was Never Fought

The "Battle of Pas de Calais" was a naval battle that was never fought. If it had been the outcome of the World War might have been different. The French were ready to fight it but the Germans weren't and thereby hangs the tale of a lost opportunity. At midnight on August 3, 1914, Rear Admiral Rouyer of the French navy was at Cherbourg and there received a wireless order to take what vessels he had and steam for the Calais pass. Arriving there he was to attack and fight it out to the end with the German High Seas fleet. The order was equivalent to telling a mouse to attack a bulldog. The French were sure that Germany would strike at her by a combined land and sea movement—an invasion of Belgium by the army and of the English channel by the navy to assure herself of naval bases from which she might hold or defeat England. The authorities knew that they were sending Rouyer to his death but he might be able to hold up for a few precious hours the German battleships and the great transports, filled with soldiers, which they would be conveying. England wasn't yet in the war so no help could be hoped for from "the Mistress of the Seas." Rouyer had three small armored cruisers of his peace-time fleet and three other vessels of the navy school division which joined him at Brest. He left Cherbourg at 3:30 in the morning and by 4 o'clock that afternoon he was in his battle position. About 6 o'clock some British torpedo boats steamed past one of the cruisers and the British crews gave the French a cheer—not a cheer for allies but a cheer for brave men who were going to certain death. Rouyer waited all that day for the appearance of the German fleet. And nothing happened! At 11 o'clock that night Great Britain declared war. Next day British warships were helping him guard the Pas de Calais. Why didn't the German fleet appear? No one knows. Some historians declare that the German high command blundered there and threw away a chance to crush France.

Baseballs and Battlefields

Besides Color Sergeant Hank Gowdy, noted for his inspiring influence on morale of the A. E. F. other professional ball players served their country overseas in 1918. From them it would have been possible to select a formidable club, entirely capable of offering stern battle on the diamond to any of the present major league outfits. The club mentioned would have included the following lineup, all of the members then in France, under colors: Catchers, Gowdy or Regan, a former Cincinnati player; pitchers, Grover Cleveland Alexander, Sherrod Smith, Leon Cadore, Noyes of the Athletics and Lambeth of Brooklyn; first base, Dots Miller of the Pirates; second base, Johnny Evers, the old Cub star with the Knights of Columbus; shortstop, Chuck Ward of Brooklyn; third base, Cy Bates, Athletics, and outfielders Melenky and Sam Rice of Washington and Miller of Cleveland. Two lieutenants were mentioned as utility men. They were Moose McCormick, a noted pinch hitter for the old Giants, and Eddie Grant, a shortstop who also played under McGraw. Grant became a captain before anything was done about forming the club, commanding H company, Three Hundred and Seventh Infantry. He was killed during the Argonne fighting at the head of his battalion.

The Greatest Spy Achievement

What is said to have been the greatest spy achievement of the whole war was a coup pulled by the Germans which resulted in the crushing defeat of the Russians at the Battle of the Masurian Lakes. General Samsonov, commander of the Russian central army, had received reports that he was being encircled by Hindenburg's forces so he prepared to halt his advance into East Prussia.

Just as he was about to issue the necessary orders, an airplane landed close to his headquarters and when the aviator was brought to him he was handed a letter from Grand Duke Nicholas, the Russian commander in chief, complaining of his slow advance and declaring that the rumors of the German encircling movement were mostly fiction. He then ordered Samsonov to push forward as rapidly as possible and break through the German lines. The Russian general reluctantly obeyed and the result was the crushing disaster of the Masurian Lakes. A stormy scene followed at the grand duke's headquarters. The unlucky Samsonov produced the letter which the aviator had given him and the grand duke immediately informed him that he had written no such letter. The aviator had been a German spy and the coup had been planned by the Germans. Soon there was another casualty added to the thousands of Russians who had died in that battle. It was the death of General Samsonov—by suicide.

Chance for Breeders of Horses and Mules

Shortage of Animals Means Advanced Prices.

There is a shortage of good young horses and mules, due to the fact that the production of colts has been greatly curtailed. During the ten years 1910 to 1919 inclusive, we produced and reared to January 1 following foaling 16,142,495 horse and 3,690,512 mule colts; during the next ten years, 1920 to 1929 inclusive, we produced and reared to January 1 following foaling only 9,375,000 horse and 1,832,271 mule colts. In other words, out of the 13,854,000 horses on farms January 1, 1930, less than 6,375,000—under one-half—can be under ten years of age. Most of the others living were foaled between 1914 and 1919 inclusive, during which six years 9,057,470 horse colts were foaled that lived to January 1 following. In mules, we produced in 1910 to 1919 inclusive, 3,690,512 mule colts; from 1920 to 1929 inclusive only 1,832,271—so that out of 5,279,000 mules on farms January 1, 1930, more than three-fifths were over ten years old. Such conclusive evidence of a real shortage cannot be ignored. Prices, already rising, will go substantially higher within the next five years. Mares bred now will furnish colts that if well grown out will be fit for work in 1935. Better act now than to pay long prices then. The colts that pull the load (of financial success) are the ones you raise yourself.

Bull Calf Must Have

Roughage in Rations

Alfalfa hay is just as important in feeding the bull calf as in the feeding of dairy cows in milk. The quality of the roughage determines the cost of the calf ration. A good mixture for the six months' old bull calf that has plenty of good quality alfalfa hay is equal parts of barley or corn, oats, and bran. When the price of bran gets too high, the home-grown grains alone will suffice. For a poorer quality of alfalfa hay or for some carbonaceous roughage, we would emphasize the need of from 50 to 100 pounds of linseed meal in the above mixture. While the calf is being supplied skim milk, four or five pounds of grain a day will suffice. This should be increased at weaning time. A fresh supply of salt and water must always be on hand so that they may be taken at will.—Exchange.

Quail Natural Enemy of the Boll Weevil

A great deal is being written on the boll weevil and many remedies are being advanced as to how to exterminate them. Now, there is but one known remedy: If all states infested with boll weevils will pass laws making it a penitentiary offense of five years for killing quail and other birds for 21 years, and if the states so affected with weevils will go into other states where there is plenty of quail and buy 1,000 for each state and distribute them in the counties infested with weevils, I guarantee that the weevil will soon be exterminated. But pass this law first, for the sports in towns and cities can kill all the quail in the state in 10 days if allowed to do so. One quail will destroy more weevils in one day than a man can with all his bait.—J. A. Robbins in the Oklahoma Farmer-Stockman.

Inoculation of Prime

Importance to Crops

It has been shown that in the case of alfalfa, sweet clover, peas or other legumes that are being grown on the land for the first time, that inoculation is really necessary. Cultures for the inoculation may be secured through your farm bureau office or a commercial culture may be obtained from your local dealer. In applying the inoculant to the seed, the general practice is to mix a small quantity of the seed thoroughly with the inoculating material, then mix this treated seed thoroughly with the entire amount to be treated. Increased returns from legumes will more than pay for the small cost of inoculating.

Find Cost of Milk and Butterfat Production

By periodically weighing the milk of a dairy cow and testing it for fat and by keeping records of the kind and the amount of feed consumed by her it is an easy matter, at the close of a year, to determine the cost of milk and butterfat production in terms of feed consumed. Armed with such records the breeder of dairy cattle is prepared to select the most efficient producers for breeding purposes and thereby make comparatively rapid strides in developing outstanding producing strains. The poultry breeder has no greater difficulties to overcome in building high egg producing flocks.

Agricultural Hints

The principal object of summer fallow is to store moisture for future crop production. It is cheaper to prevent a disease among chickens than to try a cure after it has appeared. Flaxseed acreage reductions in the United States, Argentina, India, and minor producing countries are in prospect this year, says the bureau of agricultural economics.

GIRL IS INSPIRED BY LOVE TO PLAY ROLE OF "VICTIM"

She Confesses Planning Hoax to Hold Affection of Boy Friend.

Milo, Maine.—Fear that she might lose her boy friend caused Ono Rogers, twenty-three, to play a hoax of a death threat on police authorities. The girl confessed to Investigator Frank J. Rogan of Bangor, who had been working on the case with County Attorney Jerome Clark. Miss Rogers, who had been working for Dr. A. M. Carde for four years, was friendly with Murray Littlefield. One night she showed Doctor Carde a letter she said she had picked up the night before when she answered the doorbell, but found nobody there. Together they read the letter threatening her with death. The doctor became suspicious. That evening he went out and left Littlefield looking after the girl, since the letter said that only in the boy's company would she be safe. Groaning on Floor. About 10:45 Miss Rogers remarked she was tired and sent Littlefield home. In a few minutes Doctor Clark returned with County Attorney Clarke and Policeman Aaron Day to find the girl groaning on the vestibule floor. They placed her in bed and after some effort quieted her sufficiently to get the story of the alleged assault. She showed them marks on her throat and scratches indicating a struggle, and explained that when Littlefield left her she went up stairs to retire and the doorbell rang. She went down and as she stepped into the vestibule a tall masked man seized her, choked her, she said, and threatened to shoot her if she screamed. The ringing of the telephone frightened him away, just before the doctor came, but she didn't have the strength to get to the telephone, she explained. Deputy Sheriff Walter Blake and State Trooper Sheppard, a fingerprint expert, went to work. A checkup was made on every person who had access to Doctor Carde's office. Machine Traced. It was learned the machine upon which the letter was written was similar to one in the doctor's office. The paper used was from a pad, apparently the same as one on his desk. The marks on the girl's throat were made by a girl's fingers. Under questioning by Investigator Rogan, Miss Rogers broke down and confessed the whole story was false. She said she wrote the note to herself and inflicted the scratches on her face and throat to make it look more realistic. She had loved Littlefield for a long time, she asserted, and thought the letter would make him jealous of the man who "loved her so much he was going to kill her to get her out of Murray's reach."

Girl Admits Blame for Crime to Save Youth Sacramento, Calif.—Attempting to save her sweetheart, Ray West, from the gallows, Mrs. Ann Marie Federolf, star witness in his recent murder trial here, made a spectacular confession of responsibility for the youth's crime. It was at her solicitation, she said, that West, son of the treasurer of Placer county, undertook a series of Sacramento holdups which culminated in the shooting of Jean Bert, laundry proprietor. West is now awaiting execution at San Quentin prison. Upon Mrs. Federolf's voluntary confession of participating with West in two holdups, Deputy District Attorney Chris Johnson charged her with two counts of robbery. The young woman's story to the district attorney included the claim that she sat in an automobile as a lookout while West entered Bert's laundry and shot the proprietor to death during an attempted robbery. During West's trial, prosecutors pointed out, Mrs. Federolf said she was unaware of West's purpose.

Boy Tells Thrilling Kidnap Tale as Alibi

Seattle.—Several hours after his father had reported him "mysteriously missing," fifteen-year-old Chester Madlem, 4023 Fremont avenue, walked into police headquarters. "I've been kidnaped," he said, and proceeded to unfold a tale that had his hearers gasping before he finished. Two men, he said, picked him up on the street, bundled him roughly into their car and sped away into the night. For several hours they held him prisoner in a Rainier valley shack, he related. But the police were skeptical. And after two hours of grilling the youthful adventurer admitted he had attended an all-night show, and felt he needed a suitable alibi before returning home. Fish Buy Ontario Boy St. Catharines, Ont.—Hard times have hit school attendance here. A truant officer, reporting before a recent school board meeting, told of a boy who had no trousers suitable for school wear. The boy's father suggested he go fishing instead, and his luck was so good that he sold his catch for enough to buy a pair of trousers. The next day the boy was at school.

Miss Morrison Becomes Bride of B. M. French

In a wedding Saturday evening that came as a total surprise to her many friends Miss Mildred Morrison, daughter of Mr. and Mrs. Morrison, of this city, became the bride of Mr. Baird Miller French. The ceremony was performed by Dean C. E. Rice, of the Holy Trinity Episcopal Cathedral.

Mr. and Mrs. French have taken one of the McKinnon apartments and will make their home here.

Mrs. French has resided here for many years and is one of Juneau's most popular young ladies. She is a graduate of Juneau High School and attended Oregon State University, where she is a member of the Gamma Phi Beta Sorority.

Mr. French is an engineer of the United States Bureau of Public Roads, attached to the Alaska district. He is a graduate of the University of New Mexico, and his parents, Mr. and Mrs. J. B. French, reside in that State. He has made his headquarters in this city for the past year.—Alaska Daily Empire.

Ancho News

Honoring the birthday of Mrs. Allen Kile, Mrs. C. C. Belknap entertained at Bridge at her home Thursday evening, the 20th. Mrs. Kile received a number of gifts, chief of which was the latest model Crosley radio from her husband. After the card game, Mrs. Kile cut the birthday cake, and other refreshment of sandwiches and iced tea were served, the guests departed at a late hour.

Several members of the Ancho Woman's Club accepted the invitation of the Glencoe Woman's Club to a barbecue dinner at the Bunnell ranch at Glencoe, Saturday the 22nd. Two cars left Ancho at an early hour and the occupants enjoyed the delightful ride over the mountains and through Devil's Canyon. The great bed of petunias and other flowers in the foreground of the Bunnell Inn was like a gorgeous banner of welcome to the scene of the festivities where the guests were graciously met by the reception committee of Mesdames Louise Coe, Ora Tully, and Ola Casey Jones.

The barbecued meat, prepared by the husbands of the Club members, and the salads, cakes and coffee furnished by the ladies, made a répast long to be remembered by those present. The loth to leave the lovely creek and its overhanging trees and vines, the guests finally repaired to the big dining room of the Inn where a program of addresses and music was enjoyed, after which a small rodeo was presented on the Mesa above the Inn. Representatives from the Woman's Clubs of Roswell, Hagerman, Dexter, Alamogordo, Tularosa, Carrizozo, and Ancho were present. Those going from Ancho were Mesdames Belknap, Frame, Kile, S. J. Pruett (president), G. Pruett and Wilson. On their return trip these ladies were delightfully entertained at the home of Mrs. George Titworth at Capitan with sandwiches, iced tea and watermelon, putting an exclamation point of pleasure to the end of a happy day.

Mesdames J. E. Frame and Belknap were guests of Mrs. Bert Penix in Corona at a Bridge party Saturday the 15th.

The members of the Bridge Club enjoyed a delightful evening at the home of Mrs. S. J. Pruett on Aug. 25th. After games, dainty refreshments were served. Mr. and Mrs. Clyde Tillery were special guests.

Mr. and Mrs. Bryan Hightower arrived home Monday after a month's stay in Ohio where they visited relatives.

Mr. and Mrs. Brack Sloan and their adorable young daughters were in Ancho Sunday.

An immense crowd was present at a dance given last Saturday night by Mr. and Mrs. Robert Storey. Music was furnished by Messrs. Alex Hubbard and W. L. Hall.

Filling Station on 566

E. I. Griffin was over Tuesday, from his homestead west of the mul pais. Mr. Griffin came here with his family recently from Victoria, Texas, and located on Highway No. 566, 31 miles west of Carrizozo, and put in a filling station. He is now putting in a cistern to provide water for domestic purposes, and will soon begin work on a ground tank in which water will be impounded for all other purposes. Mr. Griffin has the distinction of operating the only filling station on Highway 566 between Carrizozo and the Rio Grande.

FOR TRADE OR SALE

HOTEL Four stories, 120 rooms, Modern fire proof building, elevator, hot and cold water in every room. Ground floor, Barber shop, paying five hundred dollars per month. Want ranch with or without stock. Answer from owner preferred.
J. E. STEPHENS,
MIDLAND, TEXAS.

LOCAL AND PERSONAL

"Shorty" Dawson was down Monday from the Stearns place in Nogal Canyon.

Mr. and Mrs. Garrard visited Las Cruces Saturday, returning late that evening.

Mr. and Mrs. A. E. Rohde were here this week from Tucuman for a short visit with relatives.

Mrs. T. E. Armstrong left Tuesday for San Diego, California for a visit with members of her family.

Mrs. O. J. Snow and Mrs. John E. Hall and little Joyce went to Lubbock, Texas, for a visit with relatives.

Paul C. Raines, local cleaner and presser at the Snow Barber Shop, visited Lubbock, his old home, last week.

Matt Gilmore, Jr., came up Saturday and visited his uncle and aunt, Mr. and Mrs. Paul Mayer, until Wednesday.

Mr. and Mrs. Dewey Stokes and Dewey, Jr., spent the week-end in El Paso. They were accompanied by Master Allen Beck.

Fraser Charles of Wichita Falls, Texas, came in the past week and took his two daughters, Frances and Virginia, to Ruidoso for the week end.

Allen Johnson drove up Saturday evening from El Paso. He returned the following day, accompanied by Mrs. Johnson, who had spent the week here with relatives.

Mr. and Mrs. Rio Bogle were here Saturday night, having come up from Newman where they are temporarily located. As soon as Mr. Bogle is relieved at Newman they will go to Lordsburg.

David Finley drove in from Midland, Texas, Friday evening and remained over till Sunday. Dave is associated with one of the big oil companies, and gives most of his time to scouting and looking up titles.

Dr. F. H. Johnson left Tuesday for Yosemite, California, to attend the annual convention of Southern Pacific Surgeons. Before returning, Dr. Johnson will go to El Paso and see the Chief Surgeon of the Company.

Dr. and Mrs. J. B. Tidwell, who had been vacationing on the Dosa, were over Wednesday, and made this office a pleasant call. Dr. Tidwell is head of the Bible Study Department in Baylor University, Waco, and has been associated with that well known institute for twenty-two years. They were greatly charmed with our mountains and we shall expect to see them next year, accompanied by friends from that section of the Lone Star State.

Parker J. Walker, of the well-known cleaning firm of the same name, Roswell, was here this week in the interest of his establishment. Mr. Walker will make Carrizozo twice a week, and the local manager is Paul Raines, at the Snow Barber Shop.

Mrs. John L. Bryan, accompanied by her two younger boys, Jobie and Johnny V., came through Saturday enroute to Roswell to meet George, the elder son. Mrs. Bryan brought a world of good wishes to friends here from her husband, and says John has a very good position at Lordsburg.
