"Begging for Bread"

An old friend writes, "Looking over your paper today, I saw Senator Norris' verse he liked so well. Decided to write a few verses to add to it"

Here they are:

Physically fit—begging for bread.
 Rarin, to go—begging for bread.
 Spent my money—begging for bread.

The world sho do move, spinnin' on its axis—
 Begging for bread.
 And for work me 'a askin'—begging for bread.
 Choppin' wood to beat the devil with the ax—
 Begging for bread.
 What for? To keep warm, nothin' to cook—
 Begging for bread,
 The grocer hasn't my name on his credit book—
 Begging for bread.
 Oh, Mr Hoover, just take a look—
 Begging for bread
 To Wall Street, Henry Ford and the rest, jab your hook—
 Begging for bread
 Now wake up, do your best—
 'cause we're begging for bread.
 When you lay down to rest, remember—
 We're begging for bread.
 Hoover get busy—
 We're begging for bread.
 Now, darn it, don't get dizzy—
 'cause we're begging for bread.
 To captains of industry, you head for,
 Give 'em the signal to step on the gas—
 I mean your ol' Lizzie—
 We're begging for bread.
 If you will, maybe so we'll be singin'
 Your praises in bass.

Profitable Garden Suggestion

Recently W. R. Beattie, Senior Horticulturist of the Bureau of Plant Industry, United States Department of Agriculture, in a nationally broadcasting radio talk on the farm garden, stated that in every economic crisis through which the agriculture of any section of the country has passed the home garden and other sources of home food supply have saved the day.

When the boll weevil struck the cotton growing section, Mr. Beattie pointed out, one of the first steps taken was to start a campaign for vegetable gardens, poultry, pigs and cows on every farm so that the land would at least provide a means of livelihood. Things haven't changed much and the same principles apply today. The farmer, however hard times may be for him, who plants and cultivates his own garden has a form of insurance against privation that is denied the city worker. In this respect he is far better off than the thousands of unemployed in the cities, many of whom left the farm at the time of industrial prosperity and are now looking wistfully back at the land.

"If everybody engaged in farming," Mr. Beattie said in his address, "will produce plenty of fruit, vegetables, milk and butter, poultry and eggs, home grown and cured pork, also fresh meats to some extent, they can at least have a good living at home and that is more than a lot of people who are out of employment have today. 'But,' says the pessimist, 'that will only increase the difficulty and reduce the market for foods that are grown in a large way for sale.' Perhaps, provided the farmer has the money with

C. M. T. C. Applicants

Applications for attendance at Citizens Military Training Camps will now be received. Following information is furnished.

Applicant must be at least 17 and not over 31, good moral character and in good health.

Camp Dates

Ft. Bliss June 5th to July 4th
 Camp Bullis, San Antonio, June 19th to July 18th.

Ft. Logan, Denver, June 19th to July 18th.

Ft. Sill, Oklahoma, July 2nd to July 31.

Camp S. D. Little, Nogales, July 24th to Aug. 22nd.

See or write

E. M. Brickley, 1st Lt. QMC-Res, Carrizozo, N. M.

which to buy the food, but suppose he does not have the money, what-then? As a matter of fact, it is good business and economy to produce most of the living for the farm family and the hired help right on the farm."

In all parts of the country there are farsighted agricultural leaders who are in agreement with Mr. Beattie in preaching the advantages of making the farm as much as possible a self-sufficing unit; not only in these times of agriculture and economic depression, but as a permanent agricultural policy. In South Carolina, Virginia, Arkansas and other states, statewide campaigns to bring about the planting of farm gardens are being pushed. In these campaigns the agricultural colleges and the states' home demonstration agents are taking a leading part.

A well planted and cared for half-acre garden will produce more vegetables than the average family can eat; during the period when the crops are maturing. Carrots, late cabbage, beets, onions, parsnips, potatoes and turnips can be grown and stored for use during the winter, thus cutting the winter food bills. One acre of garden was worth as much as 65 acres of cotton on a farm in Texas last year whose owner figured that the acre yielded a profit of \$400.

It is not only from the point of view of cutting the family food bills, however, that the vegetable garden deserves a place on every farm. So much has been said and written about vitamins during the last few years that practically everyone knows they are essential to good health. Fresh, green vegetables are among the best sources of these invaluable vitamins, but entirely too frequently the farmer, busy with his money crops, feels that he has no time to bother with a garden even though his wife and the older children may easily be able to take care of it once it is ploughed.

The result is that in many instances the farm diet is too much restricted to meat, potatoes and bread. Green vegetables, one of nature's best preventive medicines, have little place on the menu. The various deficiency diseases have a chance to creep in, breaking down health and stamina. Investigators have found that a large proportion of ill health in rural districts is traceable to the absence of a well balanced diet. No diet can be called well balanced that lacks an abundance of fresh, green vegetables.

A vegetable garden planted this spring will return ample dividends in health and in helping to make the farm family self-sufficing, able to weather any economic storm.

Hoover's Muscle Shoals Veto Contrasted with Federal Farm Board Policy and Tariff Figures

Washington, March—In its comments upon the President's veto of the Muscle Shoals bill, the Baltimore Sun takes exception to some phases of Mr. Hoover's logic and makes reservations concerning his figures as to the financial aspect.

"It must be conceded even by Mr. Hoover's most ardent admirers that he has a very peculiar mind," says the Sun. The paper quotes from the veto message as follows:

I hesitate to contemplate the future of our institutions, of our government and of our country if the preoccupation of its officials is to be no longer the promotion of justice and equal opportunity, but is to be devoted to barter in the markets. It is not liberalism, it is degeneration.

"And yet the man who penned those passionate words" the Sun continues, "is reported by his physicians to be sleeping well and in good health, although there is constantly before him the spectacle of the Federal Farm Board of his own design and creation, which is embarked with his blessing upon colossal 'barter in the markets.' And barter of a type whose successful negotiation certainly calls for quite as high a type of business skill as that involved in the power industry. In the face of that record of devotion to the great principle that the government shall not compete with private enterprise, the President's uncommonly oratorical flight on this subject must be dismissed by most thoughtful people as a piece of special pleading."

Nor is the Sun impressed by the figures presented by the President. It says:

"On Mr. Hoover's detailed figures on the financial aspects of the proposed Muscle Shoals legislation one must reserve judgment. If the President proves no sounder on these figures than he has been on many others—for example, his statistics when he defended the signing of the Smoot-Hawley tariff law—a reasonable reserve will have been abundantly warranted."

This Week in History

March 16—Madison born 1751; attack of the Little Belt on the President. 1811; U S Military Academy established at West Point, 1802

March 17—British evacuate Boston 1776; Red Republican insurrection break out in Paris, 1871; Steamer Utopia, sunk by collision off Gibraltar, 594 lost, 1891.

March 18—Cleveland born, 1837, March 19—William J. Bryan born, 1860; British Steamship Bernice left port and was never heard from 1879

March 20—Woman suffrage granted in China, 1912; Bandits in the Mexican Sierras kidnapped J. E. Barstow, an American, 1930.

March 21—Pete Marquette at Starved Rock, 1675; Battle of Goldsborough, N. C. 1865, Germany begins Kaiser's battle 1918

March 22—American bombardment of Vera Cruz, Mexico, 1847; Russian capture Przenysl, 1915; Stamp Act enacted by Parliament, 1765.

Ruidoso Highway Contract

Santa Fe, March 16—The state highway department Monday awarded the last of the ten contracts in the recent emergency highway letting. The project, No. 120, between Hondo and Ruidoso, was awarded to Tom L. Green, Oklahoma City, for \$230,670 30.

Cotton Exports Hit Hard

Washington, D. C.—Cotton was hit the hardest of all exportable commodities in the loss of American foreign exports for January this year. The total loss of exports for the month, compared with December, 1930, was \$25,193,000. About \$16,000,000 of this decrease was in cotton. The January shipments of 593,000 bales were valued at \$89,911,000, compared with December shipments

Carrizozo H. S. Basketball Girls

The Carrizozo girls lost to Corona by a score of 18 to 28 Saturday night March 14. Even so the game was a good one and will do next year in basketball.

The Carrizozo girls all did their best but none seemed to be playing very well enough to match the game Corona girls gave them. The Corona girls showed they could win as graciously as they could take the defeat handed out to them on three different occasions before this year by the Carrizozo girls. Carrizozo girls were not in good condition for this game as they had been under somewhat of a strain in working up a play the previous week and had also neglected their practice. Marguerite English, guard, was ill with tonsillitis and unable to make the trip. She was badly needed. These combinations with probably a grain of over-confidence lost the game for them, but they were very cheerful and showed the usual good sportsmanship they have always shown to win all their games next year.

Good Things for the Family Menu

By NELLIE MAXWELL

It is well to teach your boy to wash his hands, to be polite, to learn his lessons, but there is nothing you can teach him that will have more to do with making a man of him than to keep his word, even if it takes a leg.—W. C. Dunlap.

WHEN there seems to be nothing for a vegetable that appeals, cook some pork chops and serve with them:

Onions and Apples.

Slice three or four onions and cook them in a little bacon fat until transparent, then add twice as many sliced apples, two tablespoonfuls of sugar, salt and a few dashes of white pepper. Stir during the cooking and season again before serving. A sour or tart apple is best for this dish.

Salmon Macaroni.

Melt two tablespoonfuls of butter and stir in two tablespoonfuls of flour;

when well mixed add two cupfuls of tomato soup and cook two minutes. Add a large can of flaked salmon, one chopped onion and salt and pepper to season; simmer five minutes. Make a border of three cupfuls of cooked macaroni on a hot platter, pour inside the salmon mixture and sprinkle the top with one-half cupful of grated cheese and garnish with two sliced hard-cooked eggs. Serve hot.

Chicken Vegetable Loaf.

Beat two eggs, add one cupful of milk, three cupfuls of cooked chicken, one and one-half cupfuls of small peas, one cupful of diced carrots, one small onion, one teaspoonful of mustard, two teaspoonfuls of salt, pepper to taste and one teaspoonful of minced parsley and two teaspoonfuls of chili sauce. Mix and make into a loaf and bake fifty minutes. Serve with: Mushroom Sauce.

add four tablespoonfuls of flour; after cooking a teaspoonful of onion in the fat simmer with one and one-half cupfuls of milk, one can of mushrooms, salt, pepper and minced parsley, to taste. Cook five minutes.

CHIVALRY IN THE ELEVATOR

By DOUGLAS MALLOCH

WHAT kind of chivalry is that That in the lift will doff its hat To women that you never knew, But not the one you're married to?

What kind of chivalry, my men, Is that that doffs its derby then, When other ladies present are, Except the one who runs the car?

What kind of chivalry is this That not a painted maid will miss, And yet whose chivalry will fall The woman with a scrubbing-pail?

What kind of chivalry is not For women with a harder lot, But to the idle doffs its hat— What kind of chivalry is that? (©, 1931, Douglas Malloch.)—WNU Service.

FARMERETTE HELPS ON AN ALLIGATOR RANCH

Elinor Link of Los Angeles is America's new kind of farmerette. She is "hired man" to her father, Carl Link, of the Los Angeles Alligator farm. Elinor is well acquainted with the 'gators comprising her father's collection and to show her lack of fear of the huge reptiles, takes a walk with a mature one.

WOMEN SHOULD LEARN USES OF MAGNESIA

To women who suffer from nausea, or so-called "morning sickness," this is a blessing. Most nurses know it. It is advised by leading specialists: Over a small quantity of finely cracked-ice pour a teaspoonful of Phillips' Milk of Magnesia. Sip slowly until you are relieved. It ends sick stomach or inclination to vomit. Its anti-acid properties make Phillips' Milk of Magnesia quick reliver in heartburn, sour stomach, gas. Its mild laxative action assures regular bowel movement. Used as a mouth-wash it helps prevent tooth decay during expectancy.

Kidneys Disordered? Act Promptly When Warned By Kidney Irregularities.

When bladder irritations, getting up at night and constant backache keep you miserable, don't take chances. Help your kidneys at the first sign of disorder. Use Doan's Pills. Successful for more than 50 years. Endorsed by hundreds of thousands of grateful users. Sold by dealers everywhere.

Average man who is granted a two weeks' vacation is satisfied if he can make it three.

Was a Problem

"Mary Jane caused me many anxious moments," says Mrs. G. G. McDowell, 4085 Westworth Ave., So., Minneapolis, Minn. "She was listless, weak, had no appetite. "She suffered a lot from colds until I began giving her California Fig Syrup. It made her strong, able to avoid colds; gave her a good appetite and digestion. She is the picture of health now." For over 50 years, California Fig Syrup has been helping bilious, weak, headachy, constipated babies and children. Doctors by the thousands recommend this pure vegetable product. Children love its flavor. It acts gently to open the bowels in colds or children's diseases. Bowels become regular with its use and remain that way. Emphasize the name California or you may get an imitation.

CALIFORNIA FIG SYRUP LAXATIVE-TONIC FOR CHILDREN

We know precisely the proper food to make cattle, swine and poultry healthy and neglect our own.

Cold in Head, Chest or Throat?

RUB Mucsterole well into your chest and throat—almost instantly you feel easier. Repeat the Mucsterole rub once an hour for five hours... what a glorious relief! These good old-fashioned cold remedies—oil of mustard, menthol, camphor—are mixed with other valuable ingredients in Mucsterole to make it what doctors call a "counter-irritant" because it gets action and is not just a salve. It penetrates and stimulates blood circulation and helps to draw out infection and pain. Used by millions for 20 years. Recommended by many doctors and nurses. Keep Mucsterole handy—jars, tubes, all droppers. The Mothers—Mucsterole is also made in smaller forms for babies and small children. Ask for Children's Mucsterole.

Why Boys Leave Home

(WNU Service.)

The Ridge-Pole Yammerkat

By Hugh Hutton.

(Author of Nutty Natural History.)

THIS pestiferous creature is found in some of the smaller Holland villages, where it perches in large numbers on the house tops and yammers all night long. In the olden days when storks were plentiful, they would not stand for the racket, and the roofs were cleared of the pests every night by ridding storks. The beast is very hard to exterminate, as it has around sixteen lives, although a direct hit

from a Dutchman's shoe will knock out seven or eight of them. The yammerkat never eats, so it cannot be starved out. The creature, as the picture shows, is as thin as a rail, having a match-

stick for a body and a spaghetti tail. The head is a single peanut, with split navy bean ears and popcorn nose. Toothpicks answer for the legs and split lima beans for the feet. The different parts are fastened together with chewing gum. (© Metropolitan Newspaper Service.) WNU Service.

Macaroni Chinese Dish Macaroni appears to have been the invention of the Chinese. It was introduced into Europe by the Germans, from whom the Italians learned of it. By the Fourteenth century they were the only people enjoying it. The method of manufacturing it was held a great secret. Later, however, this secret leaked out to a cook in France, and it is recorded that Louis XIII was induced to order it in an inn in Tours. He was so favorably impressed that he had his own cook study the method of preparation.

Menarche's "Cold Cure" This prescription for a cold was advised by Queen Elizabeth: Take a quart of new milk, put into it 2 spoonfuls of honey, 4 ounces of linseed, and as it boyles put in pieces of scarlett or red cloth and lay one peeces on your stomach and one opposite to that on the back, and see you to bed; sweat and you shall well.

Care of Cyclopes Cyclopes should be kept in a cool room. They thrive best where there is not too much heat.

The Value of a Good Life Partner

By JEAN NEWTON

ALL aboard for the Balkans! For that's where the millennium has arrived.

Believe it or not, in the Balkans there are more men than women—far more. That means more eligible young men and more husbands than girls who are looking for them!

Not only is there no competition for husbands, but the young men actually pay to get wives. Yes, we have it from absolutely authentic sources in Belgrade that an old Balkan custom still in force under the present conditions of supply and demand is the paying of a "bride-price" by the suitor

to the father of the girl whom he wishes to marry.

If news from England about the preponderance of women since the war, and hence the dearth of eligible young men, has been discouraging, let us concentrate on the good news from the Balkans!

And let those young men beware who have the feeling of a rarity and are inclined to be "high hat!" For a girl can always board ship for the Balkans, where she will be properly appreciated!

How interesting it would be to observe the effect of this situation on married life in the Balkans, to see if the value of a wife, as a precious stone, rises in the eyes of her husband in proportion to her rarity. In a situation where for every wife there are

three or four wifeless men who are proud to admit, "If you don't want her, I want her," it is quite conceivable that every husband would be a good husband!

The situation is interesting, to say the least. All aboard for the Balkans. (©, 1931, Nell Newton.)—WNU Service.

Some Neighbory Hints

TO WASH a flannel skirt soak it in cold water overnight, so it will not shrink. Then wash it in warm water and put in a very little borax. Rinse in cold water and dry in a good wind. When almost dry, iron on the wrong side.

Left-over bacon, end pieces, etc., are all precious adjuncts in flavoring other food combinations. A plain bread stuffing is much improved by the addition of chopped bacon. Add one-half cup of the bacon to two cups of bread crumbs. Lessen the amount of salt called for in the recipe.

To clean light colored felt hats rub the extra surface with fine sandpaper and dust lightly with a white powder.

When it is necessary to iron a rough-dry garment at once, try this method: Dampen it, roll tight, wrap it in a cloth and then in paper, and put into the oven while the irons are heating. Evaporation will cause it to be thoroughly dampened in a very few minutes. But care must be taken that the oven is not hot enough to scorch the garment. (Copyright.)—WNU Service.

SUPERSTITIOUS SUE

IF you buy a new pair of "Kieks" and the first place you are about to put them on is a table—when, back up girls, don't do it, because it's an invitation for the undertaker to come to your house. (© McClure Newspaper Syndicate.) (WNU Service.)

Stationary Little Dee had a cold, and his mother came in to his bed to see how he was getting along. "Is your nose running, dear?" she inquired. "No, mamma," said a serious voice, "it's just standing still!"

Kitchen Equipment as Presents

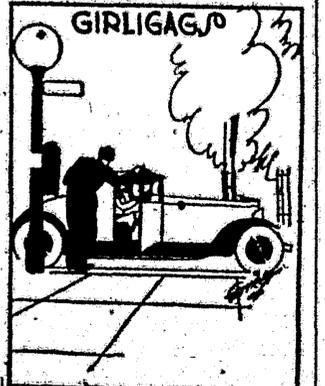

By BETSY CALLISTER

THE most useful clock in the house is the kitchen clock and interestingly enough it is the clock that usually keeps the best time. Probably because kitchen clocks are chosen for service anyway and are not kept around merely for ornament when they no longer tell the truth, as is often the case with more ornamental living-room clocks.

There are electric clocks made for the kitchen—very smart and simple and in various colors to go with possible kitchen color schemes—blue, green or yellow. Fastened on the wall in a prominent position in the kitchen a clock of this sort is well worth while, keeping correct time all of its own accord. A practical, useful sort of wedding present one of these clocks would make for any bride.

Once it would have been considered rather absurd to select any sort of kitchen equipment for a wedding present, but young women today are so generally interested in having attrac-

tive, well-equipped kitchens and kitchen things are so attractive that the old prejudice has ceased to exist. For the young couple who are planning to go to housekeeping in their own little bungalow, what news would be better than the fact that Uncle Bill was planning to give them a really fine electric or gas stove, and that Aunt Nellie was going to spend her wedding present quota for kitchen utensils to match—colored enamel or aluminum with colored handles? (© by McClure Newspaper Syndicate.) WNU Service.

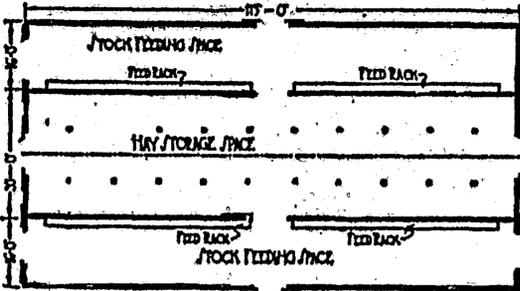

"Jonah given a long time before automobiles were invented," says Flivvering Flo. "But he knew what it was to be a parking place and have to give it up." (Copyright.)—WNU Service.

Farm Investment That Will Pay Is Good Open Stable for Cattle

Floor Plan.

By W. A. RADFORD

Mr. William A. Radford will answer questions and give advice FREE OF COST on all problems pertaining to the subject of building work on the farm, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on the subject. Address all inquiries to William A. Radford, No. 407 South Dearborn street, Chicago, Ill., and only inclose two-cent stamp for reply.

Comparatively high prices for meat animals and low prices for grain and feed have made breeding and feeding live stock a profitable business. At least, farmers are getting a great deal higher price for the grain they produce by "marketing it on the hoof" than by selling it as grain.

Of course, during the summer the cattle or hogs are allowed to run in the feed lots, where forage is plentiful and the self-feeders supply the fat-making rations that the animals require in addition to the grass they get from the pasture. But in winter a weather-proof stable is necessary to protect the animals from the cold winds, which take their vitality and force them to use up much of the food they consume for bodily warmth. That is why successful cattle breeders and farmers have such a barn as is shown in the illustration.

As will be seen by the floor plan that accompanies the exterior view of the barn the first floor is open—that is, there are no stalls or managers in the stable. Instead, ranged along the sides are self-feeders, in which there is a constant supply of hay or other roughage, and feed boxes underneath to hold the grain rations. Double doors at both ends on each side permit the cattle to come and go at will, or

they may be closed to keep them indoors during the worst weather.

Overhead is the mow floor wherein the roughage, such as alfalfa or timothy hay, or chopped cornstalks are stored. Also there is plenty of space for grain bins, so located that the supply needed for each feeding may be secured by gravity through chutes running to the stable floor.

The barn illustrated is 62 feet wide and 115 feet long, which provides ample space for a rather large herd of steers. The monitor roof adds height to the building and gives a larger storage space in the mow.

The building may be set on either a concrete or stone foundation, and the floor may be either of concrete or of cinders. In either event it should be so constructed that there will be good drainage, as the floor should be kept dry. The self-feeders are not secured to the floor, but are loose so that they may be moved at will. Removable partitions also can be included so that a part of the stable may be partitioned off if the owners deem it necessary.

The building is of frame construction, the lumber used being of the first class so that the barn will be weather-tight.

Such a barn as this will be a good investment for those farmers who want to make the most from their cattle feeding operations. Before deciding on such a building, however, it is best to consult the local contractor and material dealer, either or both of whom can give a good idea of what this building will cost. Prices of materials and labor vary in different sections, and much depends on local conditions.

Final Interior Finish

Makes or Mars the Home

Nothing about the home counts more in making or marring appearance than the finish employed, and few items of expense exceed those involved in refinishing, especially if finishing materials are not selected wisely.

Take floors, for example. They receive the hardest wear of any surface. In most cases, yet often they are finished with the least durable material in common use.

How much more sensible to use a high-grade varnish, varnish-stain, or if the grain of the wood is to be hidden, an enamel, which is varnish containing a finely ground pigment, available in almost any color.

These varnish finishes possess exceptional wear-resisting qualities and are long lived. The best grades are unharmed even by the boiling water splashed from bathtubs, leaky radiators, etc.

Home owners and home builders should remember, however, that there are great differences among varnishes. Inferior grades are lacking in durability. Like so many other things about a real home, it pays to use the best. Varnishes vary greatly in price, but the labor of application is by far the largest item in cost, and, of course, is the same whether the varnish wears well or quickly goes to pieces.

The difference between using the best and the cheapest finishing material seldom amounts to more than 10 per cent of the total cost, but the best material will outlast the cheaper one many times over and, in the end, is far less expensive.

Another item to be considered is convenience. Refinishing upsets the house two or three times as often when an inferior finish is employed. The painter must be paid that much more frequently and periods in which the finish looks shabby recur again and again. Everything points, in fact, to the advantage of doing once a first-class job with the best materials, rather than to put up with the expense and annoyance of frequent "doing over" with an inferior finish.

In short, it pays to use a varnish finish with a nation-wide reputation for durability and waterproof qualities rather than take chances with some substitute.

A few years of intensive study and

research, trained chemists have succeeded in taking the guesswork out of varnish making, have learned the secret of making varnish which even boiling water will not injure or turn white.

Isn't it a folly, then, to cast to the winds, as it were, the experience of others, and take chances with some unknown finish in which the probability of trouble is as certain as the ingredients are uncertain?

Outdoor exposure quickly ruins many finishes, including all but the best of the varnish type. The latter, however, withstand long weathering, are absolutely waterproof and are used extensively even in marine work. Hence, they are well suited for such uses about the home, as finishing porch floors, entrance doors, window sash and the like.

Indoors the life of the best varnishes is even longer and they withstand washing with soap and water almost indefinitely. Consequently they are ideal for use in kitchen, bathrooms, laundries and nurseries as well as on floors, trim, walls and furnishings in every room in the house.

Fireplace Lends an Air

of Cheer, Charm to Room

A wood fire in the broad open fireplace, the smoke swirling up the chimney to the roar of the wintry winds outside, the flames rising and falling in constantly changing colors, glowing embers that trickle through the basket bars to fade away into disintegrating white ashes while the corn in the popper explodes into snowy whiteness, these are the things that make the open grate on a biting winter night assert itself more than ever as the heart of the home. For the crackle of a wood fire inspires good cheer.

Since pioneer days in Virginia and New England the brick fireplace has been the ideal in construction. Rich in color, tones that brighten in the sunlight and in the chimney throat, dull softly and sleekly under the smoke's caresses, you find them still in many of the old manor houses of the lower colonial section, veritable gems that breathe of an era of romance and adventure when the nation was young and daring.

No other type is more appealing, more beautiful from the indignant touch of time.

WORLD WAR YARNS

by Lieut. Frank E. Hagan

The Original "Doughnut Girl"

Today she is known as Mrs. Robert E. Valbridge, wife of a Waterbury, N. H. business man who served as a lieutenant in the One Hundred and Third Machine Gun battalion, and in 1928, when she and her husband went to the American Legion convention in Paris, she was known as the president of the American Legion Auxiliary. But back in 1918 thousands of American soldiers who enjoyed the doughnuts, pies and coffee which she handed out to them knew her as Miss Irene McIntyre, one of the "Salles." For she was the original "doughnut girl" of the A. E. F.

As one of the two daughters of Colonel McIntyre, once a Salvation Army commander in New England, she and her sister, Gladys, were among the first contingent of "Salles" to join the American army in France. In March, 1918, the girls set up their field kitchen back of Ansoville in an old mill that the doughboys helped them repair and there day after day they made and served coffee by the gallon, pies by the hundred and doughnuts by the thousand. In June their canteen was at Roulecourt and at the end of that month they were moved to the Chateau Thierry sector and later toward the Swiss frontier.

They saw service with the Thirty-seventh, Forty-second and Seventy-seventh divisions. They were in the Argonne and at Thiacourt when that village was destroyed by shell fire. A shell wrecked their canteen hut and for days they lived in a cellar.

As a result of their service on every front that saw an American division, they were cited in army orders and recommended for the D. S. C. by General Pershing himself. Returning to America in 1919 they marched in the place of honor just behind Gen. Clarence B. Edwards in the parade of the Yankee division and in a ceremony on Boston common the general cited them for bravery in continuing their work under fire at the front.

Irony of War

Four stalwart sons of an elderly French couple who lived in a province of France adjacent to both Belgium and Luxemburg, were called to the colors by French authorities at the outbreak of the World war. For four years not a word was heard of any son by the parents. Their property had been occupied by the Germans after the first big push. They came the Armistice.

Two of the sons, survivors of four years of fighting, were granted immediate leave by the French because their parents were in territory that had been occupied. They started at once for home. At the same time the other two sons, who had been made prisoner in their first battle, were liberated from a German prison camp and began the journey to northern France.

The four boys arrived home the same day for a joyful reunion with their aged parents. Two of the boys had been through four years of almost continual battle; the other pair had survived the lack of nourishment inevitable to prison life. Yet, despite the vicissitudes they had borne, each of the four was square of shoulder, clear of eye. Each appeared fit to resume his life where he had laid it down in 1914.

And it is one of the horrible ironies of war that on the same day her four boys returned, scorched but whole from their adventures, the old mother was taken away. For suddenly, with the renouf at its height, she had gone raving mad.

Compensation

His experiences under shell fire transformed Fred R. Weiss of Chicago from a \$2.50 per week waiter to an influential inventor and manufacturer.

Weiss left a hash-slinging job and little else to enlist in the Twenty-first Field artillery. His brother, back in Germany, served as an officer in the German army. But that didn't prevent Weiss from winning a D. S. C. for devotion to duty and bravery under fire.

Boxes of burning powder were shooting skyward from the dump when Weiss' captain, W. C. Dunkel, attracted his attention to a pile of TNT high explosive toward which the flames were spreading. His arm had been injured. But Weiss dragged the remaining powder boxes, one by one, from the vicinity of the TNT. Then he fainted.

When the war ended, Weiss was given vocational training. He chose a four-year electrical engineering course at Lewis institute, Chicago.

Shortly after graduation, the former \$2.50 per week waiter invented a device for detecting defective wiring. A company of which he, himself, is the head, markets this product—and Weiss has definitely emerged from the \$2.50 class of wage earners.

To Cement Broken China
A housewife says: "Dissolve a little gum arabic in a little water so that it is rather thick, put enough plaster of paris into this to make a thick paste. Cement broken pieces of china together and in half an hour they cannot be broken in the same place. Hot water seems to make it more firm."

English Women Rising

to Mental Superiority

Europe now has 18,000,000 more women than men, which will result in a superior feminine sex over there, Dr. Julian Huxley, famous English biologist, predicts. With this shortage of men many women know they must remain single. Huxley, visiting in this country, tells us, and when women don't have to take care of husbands and babies they can direct all their ability and genius toward the betterment of their sex and race as a whole. "Women in England realize they are doing outstanding things now," Huxley is quoted as saying, "and they let men know they feel on an equal footing with them. To me it is astonishing the way the average American girl expects and gets presents from men. The fact that a woman is willing to receive gifts all the time indicates she feels she is inferior."—Capper's Weekly.

Dr. Pierce's Favorite Prescription makes weak women strong. No alcohol. Sold by druggists in tablets or liquid.—Adv.

War on Insects

Brazil plans to use thousands of parasites to fight the insect plague which infests a third of the country's coffee plantations.

Sore THROAT

The daily press tells of increasing numbers of cases of sore throat. A sore throat is a menace to the person who has it, and to those around him. Don't neglect the condition. Check the soreness and the infection with Bayer Aspirin! Crush three tablets in 1/2 tumblerful of water and gargle well. You can feel the immediate relief. The soreness will be relieved at once. The infection will be reduced. Take Bayer tablets for your cold; and for relieving the aches and pains common to colds. Bayer Aspirin brings quick comfort in neuralgia, neuritis, rheumatism, etc. Get the genuine, with the Bayer cross on each tablet:

BAYER ASPIRIN

Blending makes it better

In the test kitchen of a great soup maker, the gifted master-chef creates the blend of ingredients to produce the perfect soup. In a scent-laden room in a corner of France an expert blender of perfume invokes his highest genius that our sense of smell may be gratified. In a work-room fragrant with the aroma of many types of coffee beans, a highly-paid specialist concentrates his energies that we may be provided with a coffee blend to please our palates. Whether it's soup or soap, tobacco or tea, music or mustard... blending is vital to the production of the best of each. Equally as vital, if not first in importance, is the knowledge and genius of the blender. He must know how.

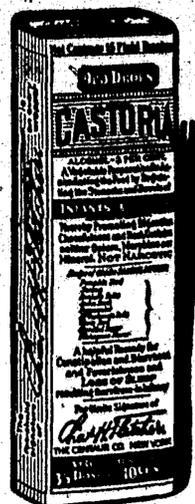

The best gasoline, too, is blended. In the processes of a modern refinery three types of gasoline are produced. They are, Natural Gasoline, Straight-run Gasoline, and Cracked Gasoline. Each possesses certain desirable qualities necessary for perfect motor operation... but... no one of them possesses all these wanted characteristics.

So CONOCO Gasoline is a blend of the three. There is Natural Gasoline, to give quick starting. There is Straight-run Gasoline, to give power and long mileage. There is Cracked Gasoline, with its desirable anti-knock quality. Just as carefully as the perfume blender at his delicate task, CONOCO refiners have developed their balanced blend of these three ingredients. There is the gift of knowing how to merge the qualities of the three gasolines to create a balanced, triple-test fuel. One brand of coffee outsells all others because of the expertise of its blender. And so, with CONOCO Balanced-Blend Gasoline, the skill of the blender accounts for the popularity of the product. Stop today at the sign of the CONOCO Red Triangle and have your gas tank filled with this better motor fuel.

CONOCO

THE BALANCED - BLEND GASOLINE

Castoria corrects CHILDREN'S ailments

WHAT a relief and satisfaction it is for mothers to know that there is always Castoria to depend on when babies get fretful and uncomfortable! Whether it's teething, colic or other little upset, Castoria always brings quick comfort; and, with relief from pain, restful sleep.

And when older, fast-growing children get out of sorts and out of condition, you have only to give a more liberal dose of this pure vegetable preparation to right the disturbed condition quickly.

Because Castoria is made expressly for children, it has just the needed mildness of action. Yet you can always depend on it to be

effective. It is almost certain to clear up any minor ailment and cannot possibly do the youngest child the slightest harm. So it's the first thing to think of when a child has a coated tongue, is fretful and out of sorts. Be sure to get the genuine; with Chas. H. Fletcher's signature on the package.

"First Aid—Home Remedy Week" Coming

Chicago.—First Aid-Home Remedy Week, Sterling Products' "better merchandising and greater advertising baby," celebrates its tenth anniversary March 15-21. Druggists everywhere will co-operate. "Fill That Medicine Chest Now!" is the slogan of action. The National Association of Retail Druggists sponsored the event in 1922, and with the National Wholesale Druggists' Association and National Association of Retail Drug Clerks have, with other organizations, massed their energies for success in this movement for the abolition of much needless suffering and often the salvage of life.

Dr. W. E. Weiss was first to okay the idea as a splendid aid to preparedness for unexpected illness or accident. This is stressed as sensible insurance for immediate relief.

The every-spring festival of sales is a fixture of housecleaning time. Sterling Products is giving a tenth anniversary surprise party to every druggist in America—for the Dominion as well as the States endorse this idea of a more intensive advertising effort in drugdom. Replacing the old streamers there has been adopted a colorful poster representing a filled medicine chest displaying the slogan of each past success: "Fill That Medicine Chest Now!"

And Mind Your Blushes

The honeymoon-couple were about to alight from their taxi. "I feel so nervous, George," she whispered. "They are sure to know." But George was resourceful. "Here," he said, "you carry the bag!" —Denver Post.

"Home Market" a Myth

Washington, Mar.—An echo of the recent tariff controversy over an increased duty on manganese ore is found in a recent decision by Secretary Mellon against the American Manganese Producers who contended that shipment of Russian ore to the United States was paralyzing the American industry and that the ore was being sold here at unfair prices. The Secretary ruled that there is no "dumping" of Russian manganese here, and permits continuation of imports from Soviet Russia as sought by the steel industry.

The American producers of manganese have contended at the hearings that with the Russian product excluded they would be able to operate profitably at favorable prices.

The Iron and Steel Institute which represented the steel industry declared that there was not a sufficient supply of the domestic product to meet the demand and that the Soviet ore was of superior quality. The American producers deny that there is lack of domestic supply.

The ruling against the American producers was based on the statement that the exporters' price here is greater than the foreign market value and therefore did not violate the anti-dumping act.

Despite the more satisfactory tariff rates granted the American producers in the Hawley-Smoot Act, they are still denied the Republican boon of "the home market."

President Hoover vetoes Muscle Shoals bill and one of his 1928 campaign speeches. —George Rothwell Brown

Andrew Mellon says that the treasury department over which he presides faces a deficit this year. There is, it seems, one feeling that we can share in common this year with the Secretary of the Treasury.

Foreign Trade at Low Ebb

Washington, D. C.—American foreign trade in January this year reached a new low level for the entire period of the "Hoover panic." Exports and imports both were the lowest in nine years, according to the monthly statement of the Department of Commerce.

Total exports for the month were \$250,000,000, the lowest in any month since February, 1922. Compared with December, 1930, they show a loss of \$25,193,000. Compared with January, 1930, they show a loss of \$160,849,000.

Total imports for January last were \$183,000,000, the lowest in any month since September, 1921. Compared with December, 1930, they show a loss of \$25,650,000. Compared with January, 1930, the decline in imports for the month was \$127,968,000.

Total American foreign trade, exports and imports, last month was \$50,843,000 below December last, and \$288,817,000 below January, 1930.

For the seven months ending January, 1931 compared with the seven months ending January, 1930, exports declined \$1,010,956,000 and imports fell of \$916,045,000 making a total loss of \$1,927,001,000.

With a loss of nearly two billion dollars in seven months, and taking into account the increasing percentage of decline, these figures indicate a loss for the entire fiscal year, ending June 30, 1931, of approximately four billion dollars, or nearly as much as the total amount of foreign trade two decades ago.

Stops Headache in Five Minutes

A Wonderful Formula Ends Aches and Pains Almost Like Magic.

Something Better and Safer Than Aspirin. Thousands of men and women are now stopping throbbing, aching, dizzy, splitting headaches, as well as the excruciating pains of rheumatism, neuritis, toothache, etc., with a marvelous new formula that is said to be far superior to anything ever before used.

It contains no opium, acetanilid, etc., and is absolutely safe and harmless. This remarkable formula, called AVOL, is being prescribed by thousands of doctors, dentists and welfare nurses because of the quick, efficient way it relieves all types of aches and pains without depressing the heart, or causing any other harmful effects. AVOL quickly stops the most severe pain, leaving the patient refreshed and feeling fine. Especially effective in women's period pains.

To quickly prove to yourself that this is truly a remarkable formula, just stop into your nearest drug store and get a package of AVOL for a few cents. Take a couple of tablets right there. If your pain is not gone in five minutes, the clerk will return your money.

Standard Uses Airplanes

Something of the spirit of Paul Revere—or the Pony Express riders—was brought up to date recently by the Standard Oil Company of California, whose private airplanes rode the skies by moonlight, to announce the company's new "Standard Gasoline to north-west motorists."

Taking off from Seattle at 7:15 p. m., Standard Oil Pilot H. W. Loeff, settled down three hours and five minutes later at Medford, Oregon, where advertising announcement material was taken over from Pilot Shirley E. Burch arriving from San Francisco.

Loeff then took off at 8:40 a. m. for a circuit of Portland, Tacoma, Seattle, Walla Walla and Spokane, completing his race with time at 5:33 p. m. the same day.

By commissioning its own pilots to carry advertising to newspapers, service station posters, labels and other material for towns in the Northwest, the company was able to time its announcement concurrently with deliveries of the new fuel to motorists elsewhere throughout the West.

"We consider the simultaneous announcement of the new "Standard" Gasoline of sufficient importance to warrant pressing the company's airplanes into service. "Particularly over mountainous country and where time is at stake, the use of our private air fleet proved of incalculable value," it was stated.

The Standard Oil Company of California operates the largest privately owned fleet of commercial airplanes in the United States not used in regular transport service.

F. O. ALEXANDER

Nobody Loves a Policeman!

That's an old saying but it isn't true any more. At least, it hasn't been true since F. O. Alexander added "Finney of the Force" to the list of famous comic strip characters. For "Finney," with his twinkling humor and his shrewd comment on people and the common everyday events of life, is a lovable character, as thousands of newspaper readers who have followed him through his various adventures will testify.

In The District Court of the Third Judicial District of the State of New Mexico, in and for the County of Lincoln.

Marshall C. St. John, Plaintiff, vs. Flora St. John, Defendant. No. 2902 Civ.

NOTICE OF SUIT

To The Defendant Flora St. John: You are hereby notified that a suit has been commenced and is now pending against you in the above entitled cause and court, and that the object and general nature of said suit is to obtain a divorce from the bonds of matrimony now existing between you and the plaintiff. Unless you, the said defendant, enter your appearance in said suit on or before April 28th, 1931, judgment and decree will be rendered against you by default.

The name and address of Plaintiff's attorney is: E. M. Barber, Carrizozo, New Mexico. Witness my hand and seal of said Court this 2nd day of March, 1931. (Seal) S. E. Greisen, County Clerk and Ex-Officio Clerk of the District Court.

Iowa Brothers Set New World's Record in Ford

Governor John Hammill of Iowa (left) and Walter Ferrell, executive secretary of the Iowa chapter of the American Automobile Association (extreme right), congratulating the Davis brothers on the establishment of a new world's non-motor, non-wheel stop automobile endurance record.

IOWA state officials and civic leaders witnessed the establishment of a new world's non-motor, non-wheel stop automobile endurance record recently, when Ralph and Roland Davis, brothers, brought their Model A Ford to a halt at the east entrance of the state capitol in Des Moines after 2,775 hours and 46 minutes of continuous driving.

When Governor Hammill, standing with Walter Ferrell, executive secretary of the Iowa Chapter of the American Automobile Association, gave the signal to stop, the Ford had traveled a total of 47,138.3 miles over all sorts of roads in all sorts of weather and had exceeded by 33,980 miles

and more than 2,395 hours the American non-stop endurance record which, theretofore officially recognized, was made by a much heavier car under almost ideal conditions on the Indianapolis speedway last year. In the course of the endurance run, the car, known as "The City of Des Moines," covered practically the entire state of Iowa.

Engineers who examined the Ford at the conclusion of the run asserted that neither engine nor chassis showed evidence of the grueling strains to which they were subjected during the 116-days of continuous driving. Both apparently, according to the engineers, would have been good for another 50,000 miles or more.

New 5-Passenger Coupe

A new body style, the 5-passenger coupe, has been added to the 1931 line of Chevrolet Sixes, W. S. Knudsen, president and general manager, announced this week.

The new model is Chevrolet's latest addition to its deluxe line, another of which, the convertible cabriolet, was brought out early in January. The new type, which

St. Rita Catholic Church

Rev. Fr. J. Francis Mitchell, Pastor First Mass, 8 a. m. Second Mass, 9:15 a. m. 7:15 p. m., Vespers.

brings the number of passenger models in the Chevrolet line to eleven, is priced at \$595 f. o. b. Flint Mich.

The 5-passenger coupe is of the 2-door, close-coupled type with the sport treatment carried throughout. Body by Fisher; Interior arrangement is practically the same as that of the 2-door sedan, affording abundant leg room for all passengers. The front seats are separate, the driver's being adjustable.

The interior appointments are of the deluxe type throughout. The upholstery is optional in Bedford cord or mohair. Exterior treatment is in keeping with the interior. A package compartment in the rear deck has a large capacity and is easily accessible. The regular Fisher VV windshield is used. Five wire wheels are standard equipment with the spare carried in the rear. The new model is now in production and dealers throughout the country are being stocked for immediate delivery.

"THEY STOP ON A DIME!"

No tread has ever equaled the Goodyear All-weather for quick, safe stops, for grip on curves and traction in mud. And its protection last... the rubber is the toughest and longest-wearing used.

You pay no more, BUT YOU GET MORE in a Goodyear, because of economical huge-scale production, largest in the world.

CITY GARAGE Carrizozo, N. M.

ADDITIONAL LOCAL

Next Sunday, March 22, is National Go To Church Day.

Frank A. English goes to El Paso today on a business mission.

H. A. Miller is erecting a filling station near the City Service Station, on El Paso avenue.

W. H. Broadus, eye specialist, was here Wednesday from Santa Fe, on his regular monthly visit to Carrizozo.

Mr. and Mrs. S. S. Gillespie and aunt, Mrs. L. H. Rupert, returned Sunday from a week end trip to Santa Fe.

T. E. Kelley is the latest claimant for Pat Dolan's crown. He shot a 40 flat on the golf course one day this week.

Vegetation is beginning to peep up here and there, and a few days of mild weather will make the emerald sheen quite noticeable.

The town Marshal has been checking up on dog owners who are delinquent on their dog tax, and has turned to other delinquents.

This section was treated to a fine shower yesterday morning—Much to the surprise of many—for march is not considered one of our moist months.

Mr. and Mrs. Purfiro Castillo and Julio Sanchez of the Milagro country, were here this week visiting at the home of Mr. and Mrs. Reyeselle St. John.

Mr. and Mrs. Jack Mansfield and children, and the governess, Miss Bertha Wright, have been guests of the Taylors at the I-X ranch home the past week.

Farmers are busy, both in the irrigated and non-irrigated districts, getting land ready for spring planting. Moisture conditions are good for starting crops.

Mrs. J. E. Farley is here from Alamogordo, in attendance upon her little granddaughter Ginger Charles, who has been quite ill but who is now considerably improved.

Mrs. Brannum went to El Paso Saturday and visited Mrs. Baggett, an old friend. Later in the week she was joined by her daughter, Mrs. Clouse, and the two returned yesterday.

The Corona road has been put in good dry weather condition by the road force. But, without surfacing, it does not stand up during wet weather. However, if it is kept well drained it will be a great help.

Mr. and Mrs. Fred Braun were here this week from Tucumcari. Mr. Braun has made this territory for the Ifield Company for many years, except the winter just past when the route was discontinued, due to dull business.

One of Ours

The El Paso Times of Sunday, March 15, has this to say about one of our girls, now a resident of El Paso, and in a recital that day:

Miss Mildred McCall will give the following piano program in a recital at Hotel Paso del Norte, in room 200, at 4 o'clock this afternoon:

Traumeri, by Shumann; Sabbath Chimes, by E. H. Kitchman, and La Zarine, by Louis Ganne, played by Miss McCall; a reading, "Selecting Wallpaper," by Miss Mary Magruder, who is assisting with the program; Sweet By and By, by M. W. Butler, and Minuet a l'Antique, by Paderewski, by Miss McCall; reading, James Whitcomb Riley's "That old sweetheart of mine," by Miss Magruder; Ripples of the Pacific, by M. T. Hays, and Via Wireless, by Porter, by Miss McCall.

LINCOLN ABSTRACT and TITLE COMPANY

ABSTRACTS, BONDS, INSURANCE GRACE M. JONES, Pres. Carrizozo, New Mexico

In Honor of Saint Patrick

Mrs. Jimmie Lee and Miss Louise Sweet entertained three tables at contract Tuesday, the 17th, at the Eating House, in commemoration of Ireland's early but thorough snake exterminator. Of course, Pat knew nothing about contract; neither do we, but the nearest we can describe it is that it is auction bridge that has undergone treatment in a plastic surgery hospital. Anyhow, everything was green, as befitting the occasion; the guests were attired in green; the rooms and tables gave off an emerald hue, and the color scheme was evident in the refreshments, even unto the dessert—all gentle reminders of the greatest snake-killer known to history. In the contest for points, Mrs. Lee took first, Mrs. Gillespie second and Mrs. Stokes low. The spirit of Ireland's patron Saint, who banished snakes from the Green Island more than fifteen centuries ago, hovered over the assemblage and, as always on the 17th of Ireland, such presence lent joy to all.

Alto Items

Warney West, wife and sister were called to Texas Tuesday to attend the bedside of Mrs. West's grandmother.

Conie Humphrey and wife and Lois Lackey visited the Hagees Saturday and Sunday.

Mrs. Van Pelt and mother came in recently from Dallas, Texas. The mother has been sick in bed for several months and Mrs. Van Pelt has been with her for three months. Her condition improved sufficiently, however, for her to make the trip to New Mexico.

Mr. and Mrs. James Howard visited the Howard ranch Sunday and had a birthday dinner in honor of Mrs. Jim Howard.

Red Cross Fund Short

The call of the National Red Cross for \$200 from the Lincoln County Chapter has not been fully met. There was a generous and quick response to the call for drought relief when first made, but it did not last, and we are still short \$28 75.

The response by communities follows:

Carrizozo	\$53.00
Corona	31.50
Capitan	30.75
Glencoe	19.00
Fort Stanton	15.00
Lincoln	12.50
Nogal	5.00
Ancho	4.50

Total received \$171 25
Bal. unsubscribed 28 75
\$200 00

To Grand Chapter

Comet Chapter No. 29, O. E. S., will be well represented at the Grand Chapter of that order, which will hold its session the latter part of this week at Carlsbad. Those attending are: Mesdames Paul and C. D. Mayer, R. E. Lemon, B. L. Stimmel, F. A. English, Elizabeth Gallacher, G. A. Titsworth, Westhaver, and Misses Charlotte Rice and Ella Brickley.

To Masonic Grand Lodge

E. M. Brickley and Fred L. Boughner went to Carlsbad this week to attend the Masonic Grand Lodge, in session at the Cavern City. Mr. Boughner has returned but Mr. Brickley does not expect to be home until Sunday.

For Sale—Ford Sedan, 1930 Model; good rubber—ready-to-go. Cash or terms. See Jesse May, Nogal, N. M.

Childhood and Youth Week

(Rev. Jno. L. Lawson)

The Sunday Schools of Carrizozo are sponsoring Childhood and Youth Week. The week of March 22 to 29, inclusive, has been designated for that purpose. All Sunday School pupils, their parents, and all interested in Sunday School, are, not only cordially invited, but also urged to take part. We want all of Carrizozo and community to be Sunday School minded.

Beginning with the Sunday School period at 9:45 Sunday morning, March 22, let all Sunday School pupils and teachers to be in their respective Sunday School and classes. Following the class period all are invited to the preaching service at the Methodist Church. The pastor will have a special sermon for young people. Young people of all ages from a day to a century are welcome. Surely you are not too young or too old for that classification.

Monday night, March 23, at 7:30, the various music teachers of Carrizozo will sponsor a musical recital and reception for the parents at the Methodist Church. This is for the Sunday School pupils and their parents, but every one is invited. We can look forward to a treat that night.

On Wednesday night, at 7:30, Mr. P. A. Small, Supt. of New Mexico School for the Blind at Alamogordo, will deliver an illustrated lecture in the High school auditorium, showing nature study pictures. The Carrizozo Woman's Club saw these pictures at Alamogordo, some time ago and all praise them very highly. This is something worthwhile for all and every one ought to enjoy it. No charge, except a free-will offering to defray expenses.

On Saturday night, 7:30, the Sunday Schools will give a big party for the pupils in Community Hall. We want all Sunday School children present. If your children cannot come, please bring them.

The Sunday School children will have charge of the morning worship at the Methodist Church, Sunday morning, March 29. And the Reverend J. O. Cox of Albuquerque will preach a special young peoples sermon.

Mattress Makers and Rug Cleaners

We are still the best mattress makers in the valley and our rug cleaning can't be beat—let us prove it to you: a phone call or postal card will bring us to your home and we guarantee satisfaction and prices right.

Roswell Mattress & Rug Co. Roswell New Mexico.

State of New Mexico No. 278
County of Lincoln In the Probate Court

IN RE: Last Will of Edward J. Payton, Deceased. NOTICE OF HEARING

To Henry Payton, Frank Payton, Mrs. E. L. Nials, Gertrude Payton Hale, Myrtle Payton Britt, Elmer Payton, O. L. Nials, Jesse Holland, Alie Nials, and TO ALL WHOM IT MAY CONCERN:

You are hereby notified that Susan Alice Payton, Executrix of the will of Edward J. Payton, deceased, has filed in this Court her Final Report and that a hearing on the said Report has been fixed for Monday, the 4th day of May, 1931, at the hour of 11:00 o'clock A. M., at the Court House at Carrizozo, New Mexico, at which time the Court will determine the heirship of the said deceased, the ownership of the estate and the interest of each claimant, and also the correctness of the said Report.

That J. L. Lawson of Alamogordo; New Mexico, is the Attorney for Susan Alice Payton, Executrix.

More than 73,000 miles in a New Ford

THE substantial worth of the new Ford is reflected in its good performance, economy and reliability. Its stamina and endurance are particularly apparent in sections where bad roads and severe weather put a heavy extra burden on the automobile.

In less than a year a new Ford Tudor Sedan was driven more than seventy-three thousand miles over a difficult route. The operating cost per mile was very low and practically the only expense for repairs was for new piston rings and a new bearing for the generator.

The car carried an average load of 1200 pounds of mail and was driven 250 miles daily. "The Ford has never failed to go when I was ready," writes one of the three mail carriers operating the car. "The starter did the trick last winter even at 34 degrees below zero. The gas runs about 20 miles per gallon. At times I pull a trailer whenever I have a bulky load."

Many other Ford owners report the same satisfactory performance. Every part has been made to endure—to serve you faithfully and well for many thousands of miles.

LOW PRICES OF FORD CARS
\$430 TO \$630

F. O. B. Detroit, plus freight and delivery. Bumpers and spare tire extra at small cost. You can buy a Ford for a small down payment on a convenient financing plan. See your Ford dealer for details.

FEATURES OF THE NEW FORD

Attractive lines and colors, rich, long-wearing upholstery, sturdy steel body construction, Triplex shatter-proof glass windshield, silent, fully enclosed four-wheel brakes, four Houdaille double-acting hydraulic shock absorbers, aluminum pistons, chrome silicon alloy valves, torque-tube drive, three-quarter floating rear axle, more than twenty ball and roller bearings, and bright, enduring Rustless Steel for many exterior metal parts. In addition, you save many dollars because of the low first cost of the Ford, low cost of operation and up-keep and low yearly depreciation.

STEEL ECLIPSE

Starts sooner—pumps longer

Two windmills stood just across the road from each other. With the first sign of a breeze one started up smoothly and quietly. When the breeze became a wind, the other started with a groan and lumbered away only as long as the wind raised a dust in the road. Then it stopped as abruptly as it had started, while the other continued pumping for some time—then it finally came smoothly to rest with the last trace of the dying breeze.

That is the difference between a Super Windmill and just a windmill. It is the difference between accurately machined—fitted gears and ordinary cast gears; the difference between turned, ground and polished shafts and ordinary steel shafts; the difference between machined and polished bearings and ordinary bearings; the difference between running in oil and running with dry gears.

In other words, it is the difference between the Fairbanks-Morse Steel Eclipse Windmill and just a plain windmill.

Come in and see this great advance in windmill construction. See the self-cleaning feature—the motor lift feature—the mechanism that enables the Eclipse to actually pump water during the thick of every revolution of the wind wheel. You will form a new idea of how good a windmill can be.

The Plains of Abraham

By James Oliver Curwood

THE STORY

With his English wife, Catherine, and son, James, Henry Bultin, French settler in Canada in 1749, cultivated a farm adjacent to the Tontour seigneurie. As the story opens the Bultins are returning from a visit to the Tontours. Catherine's wandering brother, Hepsibah, meets them with presents for the family. To James he gives a pistol, bidding him perfect himself in marksmanship. Hepsibah fears for the safety of the Bultins in their isolated position. James fights with Paul Tache, cousin of Toinette Tontour, whom they both adore. Next day James calls at the Tontour home and apologizes for drawing in front of Toinette. The Tontours go to Quebec. Four years pass. War between Britain and France rages.

CHAPTER IV—Continued

This recalled an important matter to his mind. Toinette had entrusted him with a letter for James. Boiling over with his own selfish exultations, he had forgotten it. He hoped it was an invitation for James to come to the seigneurie. He had often told his girl she should be more friendly with the lad.

James took the letter and went off by himself. It was the first recognition from Toinette since the day of the levee. He had not seen her and had tried not to think of her. Alone, he read the words she had written him.

With pitiless coldness and brevity, they called him a renegade and a coward.

On a September morning some days later, James stood watching his uncle as he disappeared into the frost-tinted woods of Forbidden valley. It seemed to him that Hepsibah's suspicions and guardianship of the valley had become greater with the growing news of French triumphs in the south which so positively assured their safety. Only yesterday Tontour had brought the latest word from Diekau. The German had been on the eve of smashing Sir William Johnson and his mob of Colonials and Indians when his messenger had left. By this time the event had probably happened. James thought. Yet his uncle was going into Forbidden valley with a look in his face which puzzled him.

Restlessness possessed Odd after Hepsibah had gone. Passing years were beginning to leave their mark on the dog. He was growing content to watch life with James instead of ceaselessly pursuing it. He was not old, and yet he was no longer young. There remained one thing which did not fall to him in his tense fierceness of his youth. This was the Indian smell. He always told James when one of their wilderness visitors was near, sometimes many minutes before the savage appeared from the woods. And he never tired of watching Forbidden valley. In the dawn he faced it. At midday he dozed with his half-closed eyes turned toward it. In the evening he sniffed its scents. Yet he did not go down into the valley unless James or Henri was with him.

During the morning, Odd's uneasiness began to reflect itself in James. Soon after noon, he left his work and told his mother he was going in the direction of Lussan's place. Catherine walked with him through the young orchard and up the slope. Never had she seemed more beautiful to James. His father was right—this mother of his would always be a girl. From above the orchard, standing on a little plateau that overlooked the Bultin farm, they called to Henri, who was in his turnip field, and waved at him. James stood for a few moments with his arm about his mother. Then he kissed her, and Catherine watched him until he was lost to her sight in the big forest.

James did not have the desire to hunt, nor did Odd. Unexplainable impulses were pulling at them both. Odd's restlessness was unlike his master's. Whenever James paused, the dog turned and sniffed the air of their trail, facing Forbidden valley in an attitude of suspicion and doubt. James observed his companion's enigmatic actions. Odd was not giving the Indian signal. It was as if something without form or substance, a thing bewildering and unattainable, lay behind them.

They came to Lussan's, nine miles from their home. Since Lussan's departure, the place had been abandoned, and in those five years the wilderness had largely reclaimed what man had taken from it. James stood where he had fought Paul Tache, and ghostly whispers crept about him in the stillness. Then came a feeling of dread, almost of fear. He turned back to the house and to the open, where long ago he had stood with Toinette and all her loveliness so near to him.

The sun had set and dusk was gathering over the land before he drew himself away from the ghosts which haunted Lussan's place. Night could add nothing more to his gloom. Odd whined frequently in his eagerness to reach home. Sometimes he showed impatience at his master's slowness by running ahead. James did not hurry. He unloosed his bow, which was the only weapon he had brought, and carried it ready in his hand. Yet if Odd had hinted of danger he would have paid no attention to the warning. Danger was not away on the other side of Diekau and his man. It would come so near and he would never have a chance to

© by Doubleday Doran Co., Inc. WNU Service.

meet it. In Toinette's eyes he would always remain a renegade and a coward.

Night thickened. The stars came out. Deepening shadows lay about them as they climbed the tallest of the hills, from which they could look over the ridges and woods between them and Forbidden valley. Because from this hill it was possible to see over the Big forest which sheltered their farm from the north winds, James and his father called it Home mountain.

Odd whined as he climbed it tonight. He went ahead of James, and when he gained the crest his whining changed to a howl, so low that one would scarcely have heard it at the foot of the hill.

James came to him and stopped. For a space, there was no beating of a heart in his breast—nothing but a stillness that was like death, a shock that was like death, a horror that could come only at the sight and the feeling of death.

Rising from the far side of the forest into which Hepsibah had gone that morning was a distant glow of fire. Near, over the rim of Forbidden valley, the sky was a red illumination of flame. And this illumination was

James stood for a few moments with his arm about his mother.

not of a burning forest. It was not a scorch of burning stumps. It was not a conflagration of dry swamp grass reflecting itself against a moonless heaven. It was a tower of blazing light, mushrooming as it rose, fluting itself in a slender scarlet radiance under the clouds, dripping at its edges into colors of silver and gold and blood.

His home was burning! With the cry that came from his lips, there leapt madly into his mind the words that Hepsibah had spoken to him a last time that morning: "If ever I'm off there and you see a fire lighting up the sky by night, or smoke darkening it by day, hurry to the seigneurie with your father and mother as fast as you can, for it will mean my hand has set the heavens talking to you and that the peril of death is near."

CHAPTER V

For a space James could not move as he gazed at the crimson sky. His home was in flames. This alone would not have daunted him with horror. His father was there to care for his mother, a new home could be built, the world did not end because a house burned. But there were two fires—and the other, farther on, reflecting itself dimly and yet more somberly, was the one that terrified him. It was Hepsibah's fire talking to him through the night!

Then the choking thing in him gave way, and as the power to act returned, he saw Odd facing the lighted heavens—and in every muscle and line of the dog's rigid frame the Indian sign was clearly written.

He set off at a run down hill, and as he ran bushes whipped at his face and shadows gathered under his feet and long arms of gloom reached out from among the trees to hold him back. He could not come up with Odd. Like two shadows in a playful night, one closely pursuing the other, they ran until James' breath began to break

Electrical Treatment of Soil of Little Value

There is a great difference of opinion among agricultural scientists as to the value of electricity in the cultivation of various food crops. Many English authorities claim that grain and some garden produce is quite materially speeded up so far as growth is concerned and the quality improved, by a current of electricity passing between the ground and a network of wires suspended above the growing crops. A Russian farmer reports an increase of 50 per cent in the amount of produce and grain grown in this manner. The United States Agricultural department has been experimenting with the subject for years and the final conclusion is that no benefit or at least very little has resulted from the electrical treatment of the soil. In fact it was noticed that a slightly

from his lips in gasps, and at the end of a mile he fell back to a walk. Odd lessened his pace to his master's. They climbed a lower hill, and once more James could see the glow of fire. In the upper vault of the sky it was fading to a ghostly pallor against the sweeping arc of the Milky Way.

They ran on, and the spirit of hope began to fight for a place in James' brain. This ray of light gave life and force to the arguments with which he now made an effort to hold back the grimmer thing. His home was burning. But it must be an accident, nothing that should fill him with fright. The other fire—off in Forbidden valley—was no more than a coincidence, probably a conflagration started by a careless Indian or a white man's pipe.

He paused again to get his breath, and Odd stopped with him. His shaggy body was trembling with the pent-up emotions of suspense and passion which possessed him when he caught in the air the deadly poison to his nostrils—the Indian smell. James struggled not to believe the evidence which he saw, and told himself that if by any chance there were Indians at his home they were friends helping to save what they could from the tragedy of the fire.

Out of the silence James heard a sound which rose above the pounding of his heart. It was so far away, so indistinct, that the stirring of the leaves had kept it from his ears. But James had heard.

He had heard the firing of guns. Over the hills and forests the sound had come to him from the direction of the Tontour seigneurie. He did not wait for the oaks to droop again. Odd led him in their last heart-breaking race into the Big forest. Lenden weights seemed to be dragging at his feet before they were through it. He had run too hard. He stopped and sagged against a tree, with Odd growling in a low and terrible way close to his knees. He was not trying to prove or disprove matters now. A catastrophe had happened to his thoughts with the firing of the guns. Taking the place of hope, even of his fears, was the one great desire to reach his father and mother as quickly as he could.

His exertions had beaten him when they came to the edge of the forest and he could have run no farther without falling. Before them was the slope, a silvery carpet of the starlight. At the foot of it was what had been his home. That it was a red-hot mass without form or stability, a pile out of which flame rose lazily, its recesses gone, added nothing more to his shock. He had unconsciously looked for this. The barn was also a heap of blazing embers. Everything was gone. Even this fact was not the one which began to break down his reason, which he had struggled so hard to keep. It was the stillness, the lifelessness, the lack of movement and sound that appalled him at first and then closed in about him, a crushing, deadening force. The fire lit up the bottom land. He could see the big rock at the spring. The paths between the gardens. The bird houses in the nearest oaks. The mill. But he could see nothing that had been saved from the burning house. He could not see his father or his mother or Hepsibah Adams.

Even Odd's heart seemed to break in these moments. A sound came from him that was like a sob. He was half crouching, no longer savage or vengeful. But James did not see. He was trying to find some force in him that could cry out his mother's name. His lips were as dry as sticks, his throat failed to respond. The silence was terrific. In it he heard the snapping of an exploding ember, like a pistol going off. He could hear no one talking, no voices calling. Fear, the repulsion of flesh and nerves to danger, was utterly gone from him. He was impelled only by thought of his father and mother, the mystery of their silence, his desire to call out to them and to hear their voices in answer. He did not fit an arrow to his bow as he walked down through the starlight, his feet traveling a little unsteadily. What was there or was not there could not be changed by an arrow.

Unexpectedly, he came upon his father. Henri was on the ground near one of Catherine's rose bushes, as if asleep. But he was dead. He lay with his face turned to the sky. Firelight played upon him gently, now increasing, now fading, as the embers sizzled or died, like ritual notes in a strain of soundless music.

James Ceema, 70, and William Weems, 58, his brother, were each fined \$200, or an alternative of serving time in jail, when they entered a plea of guilty before Judge Frank Harrison at Flagstaff, Ariz., on a charge of killing antelope.

Validity of the Berde River Irrigation and Power District \$28,000,000 bond issue has been upheld by the Arizona state supreme court. Officials of the district announced \$18,500,000 in securities to finance work of developing 85,000 acres will be sold immediately.

From a village of two stores, a dance hall and a boxcar which served as a railroad station, the little city of Hatch, N. M., can now boast of a population of approximately 1,200; fifty business houses, a modern school building, and several churches. All of this has taken place in a period of twelve years.

"Build Quay County Roads With Quay County Labor," is the slogan adopted by the civic organizations of Tucuman, N. M., who are making a united effort to place Quay county men at work on the federal emergency road program in this county, which will entail an expenditure of approximately one-half million dollars.

A gridiron dinner featured the eighth annual meeting of the Arizona Press Club, staged in Phoenix, with members of the Arizona legislature as guests. Newspaper men from all parts of the state gathered in the new department of the Phoenix Republic-Gazette for discussion of the club's program for 1931 and election of officers.

Blinding his wife to him with a blanket and dragging her to a desolate spot on the Navajo Reservation, near Gallup, Frank Livingston, Navajo Indian, clubbed her to death and then shot himself. The bodies were found near Hogback ranch on the reservation by another Indian. A coroner's jury returned a verdict of murder and suicide.

Mrs. Will Ashby, 50 years old, credited her pet dog, Bob, with saving her life when she became lost on a mountain peak during a blinding snow storm near Globe, Ariz. "Nothing but the warmth of his body kept me alive," she said. Searchers, on another peak two miles away, heard the dog's bark and were directed by it to where Mrs. Ashby lay.

A new method of reading the earth's age by counting certain peculiar layers in her crust, just as tree rings are read, is in preparation in Phoenix. The geological name for the layers are "varves," thin annual earth deposits laid down many thousand years ago by the glaciers. The reader is Prof. A. E. Douglass, director of Steward Observatory at the University of Arizona.

The lax administration of the certificate of title law was held responsible for existence of excessive rates on fire and other insurance premiums on motor vehicles, in the Linder Burke and Stevenson audit of the New Mexico motor vehicle department. The report from January 1, 1927, to June 30, 1930, also said that the larger finance companies are being replaced by "pawn broker" finance companies.

Operating costs over a three-year period, 1927 to 1930, in the New Mexico state motor vehicle department totaled \$192,889.44, according to the department audit just completed by Linder, Burke and Stephenson, accountants. Of this amount \$35,244.80 was spent in 1928, \$35,854.30 in 1929 and \$85,089.74 in 1930. During the three-year period the department spent \$12,741.04 for office equipments, autos and audit expenses.

Settlement of the Santa Fe Railroad \$300,000 tax suit by compromise between the railroad and the state of New Mexico and twenty counties affected was announced in Santa Fe by Attorney General E. K. Neumann. The compromise figure is \$54,567,933 valuation for 1930, which represents the 1929 valuation plus \$1,369,000. Dona Ana county did not come in on the compromise and that case will go to trial in federal court.

Death came to the second of six bandits who were frustrated by gunfire in their attempt to hold up the Bond-Sargent Co. store at Grants, N. M., when Manuel Valencia, of Gallup, died at an Albuquerque hospital, the result of bullet wounds. "Silver" Rucker, said-by-officers to have been the bandit leader, was killed at the time the robbers entered the store, ambushed by officers who had been tipped off to the robbery.

Cactus cultivation employs over a million acres in Arizona. The cactus plant is the basis of a new and rapidly growing industry. More than one million acres of Arizona sand waste are under cultivation, supplying a wide range of products important in manufacturing. These include drugs, soaps, cleaners, candy, boiler compound and water softener. Manufacture of boiler compound is the latest commercial application of the cactus plant.

The Arizona Tax Commission granted the Gila county board of supervisors permission to incur emergency liabilities totaling \$33,000 to aid the unemployment situation in the Globe-Miami region and finance several other projects.

Prof. Albert Huestels, famous German scientist, is now an Indian chief. It was revealed in Albuquerque, where he passed thru en route east. At the Grand Canyon he was made a chief of the Hopi Indian tribe. The Indian council assigned the name "Great Relative" to the scientist.

FAMOUS Doctor's Way to move the Bowels

Do your bowels fail you occasionally? Are you a chronic sufferer from constipation and its ills? Then you will be interested to know of this method which makes the bowels help themselves.

Dr. Caldwell specialized on bowel ills. He treated thousands for constipation. The prescription he wrote so many times—which has been tested by 47 years' practice—can be had of any druggist today. Its pleasant taste and the way it acts have made it the world's largest selling laxative.

"Dr. Caldwell's Syrup Pepsin," as it is called, is a skillful compound of laxative herbs, pure pepsin and other mild ingredients. Nothing in it to harm even a baby. Children like its taste. It acts gently, without griping or discomfort. So it is ideal for women or older people. But even the most robust man will find its action thorough, satisfying. The quick, certain benefits millions are securing from Syrup Pepsin proves a doctor knows what is best for the bowels.

Next time you feel bilious, head-achy, bloated, gassy, or constipated take some Dr. Caldwell's Syrup Pepsin and see how fine you feel the next day—and for days to come!

Instantaneous Love Affair

By RUBY DOUGLAS

(Copyright)

BOB MARVIN stood at the window of the big living room of his sister's house and looked out into the drizzling rain. Two half-grown lads were attempting, more or less futilely, to set out some lilac bushes in the lot next door. Bob had been watching them for some time.

"I say, Helen," he called out to his sister in the other room. "I have more than a notion to go out and help those boys."

"What boys?" asked his sister.

"Oh, a couple of lads who have tackled a job too big for them in the new place next door. I'd love to give them a hand and I need the exercise."

"But—Bob, it's raining and you must remember you are not well yet," protested his sister.

Bob had spent the last two weeks out on Long Island at the advice of his physician who thought a rest after a severe attack of "flu" would put him in good shape. His sister's home had been more than warmly offered to him, but now he was beginning to chafe under the inactivity.

After an argument in which the convalescent won, he found himself arrayed in borrowed raincoat and galoshes cutting across the wet grass to where the boys were still struggling with the unwieldy bushes.

"Tackled a tough job, boys, didn't you?" he asked.

"You said it," spoke up one.

"Let me give you a lift," said Bob, taking the shovel from the other.

In a short time he was chumming with the boys as if he had been their contemporary and the work was progressing splendidly. And, more than that, Bob Marvin found himself feeling the thrill of life as he had not felt it in weeks.

The three were setting out the last of the lilac bushes when a lovely girl came upon them.

"She—of all things," exclaimed one boy.

"Good night!" said the other with brotherly appreciation.

"Another told me that you boys were trying to set out my lilac bushes—that Tony had not come to do it—and I was worried for fear you would make a mess of it," she said, flashing a brilliant smile at the stranger.

"They were having a rather tough time of it until I came out to get some fresh air and have some fun with them," volunteered Bob.

"This is our sister, Joy," began the elder of the lads with a genuine, if belated, attempt at the courtesier.

"And I am Bob Marvin—my sister lives right there," said Bob.

After a few rather inane remarks the quartette became almost as friendly as the trio had been and Joy explained that these bushes were some very cherished lilacs known as Lucy's lilacs. Lucy had been the old colored woman who had lived below them when they were tiny tots and had done day's work and helped to bring them all up. She had grown such large and lovely lilacs year after year about her little cottage garden that Joy told her when they got into their new house the first thing they were going to plant was some of those lilacs.

When Bob's sister could stand no longer the worry over Bob being out so long in the drizzle she called him out of an upper window.

Bob replied to her cheerily and turned to his new friends. "Come along in and we'll have a cup of hot tea. My sister will probably pour hot toddy into me and wrap me up in a blanket."

Joy stepped back. "Oh, we couldn't think of intruding."

"Intruding, nothing! My sister would love to have you," he said, looking straight into Joy's lovely eyes.

Bob's sister was delighted. She had been wondering what the new neighbor boys would be like.

But there were two at the tea party to whom it was a never-to-be-forgotten occasion. Bob knew that after having met girls up and down the world he had come out to Long Island to look into the eyes of the only girl in the world. He tried to be patient and he succeeded rather well.

Each day found them together on the new lot and Bob's sister gave them many opportunities to be together.

One June night Bob wandered with Joy to the shadow cast by the tallest of Lucy's lilac bushes.

"Do you remember the day we snipped all the buds on these lilac bushes, the day after we planted them?" asked Bob.

"Yes—and I said it didn't matter if we missed one year's bloom because there would be flowers and fragrance forever if the plants were cared for—then? Of course—I remember, Bob Silly."

"And do you remember that I told you something else would be wonderful—and fragrant, forever, Joy?" he asked.

She did not answer.

"It was our romance, dear. Our love. For you do—you did love me then as I did you? Tell me, Joy? It was instantaneous—our recognition of each other?"

"It was, Bob," Joy whispered.

Jiggs, desiring to become up-to-date, has purchased a suit of pajamas, and timidly asks the lady behind the counter—"Pardon me, lady, do you wear these over or under the night shirt?"—Reverend.

LIVE STOCK

GROW SOY BEANS FOR STOCK FEED

Inadvisable to Rely on Them as Whole Protein Source.

For a number of years the acreage of soy beans, grown both for grain and hay, has been increasing. As a result more of the beans have also been fed to live stock as a source of home-grown protein. It is, of course, desirable for the farmer to produce as much protein as possible and thereby reduce the need for the purchase of this constituent to a minimum.

While one can secure economical gains on hogs fed a ration of corn and soy beans or barley and soy beans, yet such rations are not satisfactory because they produce soft pork, which is discriminated against by the packers. That being the case, soy beans should not be employed as a protein supplement for pork production, at any rate not as the sole source of the amount needed for balancing the ration.

Fortunately, however, soy beans may be used as a source of protein in the feeding of brood sows, both during the gestation and the suckling periods, as a test conducted at the Illinois experiment station has clearly shown. Thus two lots of eleven sows each were fed for a period of 95 days between the breeding and farrowing dates—Lot 1 on corn and a protein supplement composed of two parts by weight of tankage and one part by weight of linseed meal, and Lot 2, on corn and whole soy beans containing the same amount of protein as the tankage and linseed meal, supplied Lot 1.

The daily average consumption of feed by Lot 1 was 4.1 pounds corn and .51 of a pound of tankage and linseed meal on which they made a daily gain of .85 of a pound per head. Lot 2 consumed an average of 3.7 pounds corn and .73 of a pound of soy beans per head per day. The average weight of both lots of sows at the beginning of the feeding or gestation period was 440 pounds per head.

Docility Is Neglected When Ewes Are Roughed

The person who has roughed his ewes through from fall until lambing day will find that he has neglected one very important feature, and that is docility, for with the roughing of live stock generally goes negligence. It is a very easy matter to open the yard gates and with a shout turn the sheep in and out pell-mell. But if the owner or herdsman would take about half an hour night and morning prior to turning out and letting in, to walk about and examine his flock carefully, sometimes with a pall of grain, handing out a mouthful to a few ewes among the flock, he would soon gain the confidence of his whole flock and instead of their running away from him they are glad to hear their master's voice, and will follow him readily into the yard or out to the field without crowding and becoming panicky.

Hogs Relish Rape

Neither soy beans nor rutabagas are likely to do much in corn. About the best green feed is dwarf Essex rape. This belongs to the turnip family but it grows leaves instead of roots. Hogs are fond of it and seem to do well on it. It will grow and make feed in about six weeks if moisture conditions are favorable. It would be just as well to sow the seed just before the first cultivation, early in the season, working it in the land with the cultivator.

Live Stock Hints

Beef from young animals is lighter in color than that from older animals.

Beef from older animals will ripen more satisfactorily than beef from calves.

Never neglect times of feeding for regularly in feeding is most important, and its effects are far-reaching.

Approved methods in swine raising pay. These include sanitation, proper housing, good ventilation, good breeding stock, and balanced rations.

Brood sows should receive approximately one-half a pound of grain a day during the gestation period. About ten days or two weeks before farrowing time corn should be replaced by bran and oil meal.

Plenty of exercise and a variety of good feed will put the brood sow in good condition for her work in producing the spring litter.

The local butcher has always provided an important outlet for cattle. His nearness to the producer gives him certain advantages.

While many horses run outside during the winter season, a good shed should be provided to afford them protection from snow and wind in the coldest weather.

"SCIENCE rescues the DEAFENED" by Floyd Gibbons
Noted Journalist describes his visit to a leading electro-acoustic laboratory. Everyone who is hard of hearing should read it. Reprinted from the Review of Reviews. Send 3¢ stamps to Dept. C-38.

19 West 44th St. New York City

It was the usual gang looting on the benches in the Plaza and the nation with conversation. The high cost of living and of dying inevitably get into these arguments and it was at this point that a quaint young man spoke up.
"It's not like that in Russia," he declared. "Things are cheap in Russia. Why, at the present time, you can get a divorce in Russia for a dime!"
"Yeah? But I bet it's from a Russian!" snorted a skeptical bystander.

Immense Post Office
The new Chicago post office will be the largest in the world. It will cover about 50 acres, be 800 feet long, 350 feet wide and 200 feet high. It will have nine stories in the rear and twelve stories in front. It will extend from Van Buren street to Harrison street and from (ann) street to a private driveway adjoining the river.

How you feel in the morning tells the real story
THAT'S the time you should feel like whistling and singing. Your muscles should itch to tackle the day's work. Your mind should quickly solve the problem that baffled you the afternoon before. Don't let your health slip away so that a night's rest fails in its natural recuperative powers. When you awaken with a "dragged out" physical or mental feeling, heed those bad symptoms. That's the time you need a dependable tonic to help restore your old time energy. Try a bottle of Dr. Pierce's Golden Medical Discovery, which is sold by druggists.

Europe Raising Much Wheat
Europe raises much more wheat than does the United States. In 1920 according to the preliminary report, excluding Russia, Europe raised 1,415,000,000 bushels, while the United States raised 807,000,000 bushels.

Garfield Tea
Was Your Grandmother's Remedy
For every stomach and intestinal ailment. This good old-fashioned herb home remedy for constipation, stomachic illness and other derangements of the system is even greater today as a family medicine than in your grandmother's day.

LOCAL AND PERSONAL

Miss Mildred Arnold, one of Corona's charming daughters, was a Monday visitor.

Mrs. Ernest Dingwall, deputy county treasurer, spent the week end in El Paso.

The Finleys are again home, after a visit with their children and grandchildren in Roswell and Clovis.

George Simpson, J. M. Jolly, P. H. Arnold and W. C. Monk were here from Corona Monday on business.

M. Pratt, of the Pratt Bros. & Haskins Coal Company, of White Oaks, was a business visitor Monday of this week.

Mr. and Mrs. Sam Bethea were guests of Mr. and Mrs. Jimmie Lee this week, stopping over here en route to El Paso.

Hiram Garrard is suffering from a sprained ankle—so he says; but some of his friends say it's the gout. What say, Hiram?

Saint Patrick's Day was quietly observed here Tuesday by the Sons of Old Erin—the Shamrock being displayed on many lapels.

Rev. John H. Skinner, with his grandson, Gordon, at the wheel, motored to Las Vegas Tuesday afternoon, on business and pleasure combined.

Mr. and Mrs. Will Gallacher and little daughter Jane, and Mrs. Elsie Paden drove to El Paso Tuesday and returned the day following.

Master Frank Abel has gone to El Paso for the week-end to be present at the birthday of his little cousin, Lassie Ellen Ayres. Frank, Jr., also had a birthday this week.

A. S. McCamant was down Saturday from Corona. Eck says cattle have come through the winter in fine shape and that little feeding was necessary, due to the excellent range condition.

Mrs. A. W. Adams left Sunday for Amarillo, Texas, to see her son, G. B. Mrs. Adams' home is now Warren, Arizona, and she has been the guest of Mr. and Mrs. Phipps during her visit here.

Ancho News

Mr. J. C. Brickley is in Santa Fe this week on court matters. He is being relieved as pumper at Luna Pump Station by Tommy Zumwalt.

Miss June Caldwell is home from Cincinnati, Ohio, where she spent several weeks visiting relatives.

Mrs. H. M. Belknap was a recent visitor in Alamogordo, being guest of the Dahlke and Green families.

Mr. and Mrs. S. J. Pruett and Grover Pruett were called to Pastura last Saturday on account of illness of Mrs. S. J. Pruett Sr.

Miss Ethel Johnson spent the week end at her home in Carrizozo.

Mr. and Mrs. T. C. Key of Capitan had as their week end guest their daughter, Miss Hilda Key, who is teacher in local school.

Mr. and Mrs. J. E. Frame and J. M. Frame attended the ball games in Corona Saturday night.

Mr. John Dale and his son, Fred, were home Sunday from Glencoe.

Miss Lucille Martin of Duran is spending a few days with her father, H. L. Martin.

Mrs. Bryan Hightower entertained Mesdames Belknap, Pruett and Peters, of the Womens Club, Monday afternoon. After busy hours of work to finish the quilt, the winner of which will be announced at the Box social Saturday night, the 21st, the hostess refreshed the workers with eight rolls hot from the oven, sweet butter tresh from the churn, home made preserves followed by luscious cream pie and fragrant coffee.

One of the most enthusiastic meetings in the history of Ancho Woman's Club was held at home of Mrs. Belknap on Saturday, Mar. 14th with almost full attendance of Club members and Mesdames Mayer, Young, G. F. Pruett, Marion Pruett, Hubbard, Long and Straley as special guests. There was a bevy of eighteen children "partying" in another room. It was a pleasure indeed to have Mrs. Mayer and her secretary, Mrs. Young, present. A very gracious address was made by Mrs. Mayer who kindly praised the little club and its work. It was decided to meet at the cemetery Friday, March 20th, for purpose of setting out hedge. Mesdames Wilson and Kile were chosen as captains of sides to save pennies, who in turn chase their helpers. The losing side will entertain the winning side. After business meeting, a social hour was enjoyed. Mrs. S. J. Pruett, whose birthday fell on that date, was recipient of a very prettily decorated cake. In contests, Mesdames Wilson, Hightower, Hubbard and Kile won prizes. A St. Patrick motif was featured in decoration and refreshments. Molded "Killarney" salad was served.

Ancho Woman's Club is small in numbers but strong in unity, each member individually and collectively proud of her club, ardent in its work and eager to promote the welfare of the community in every possible way and all feel that the visit of President, Mrs. Mayer, and Secretary, Mrs. Young, of the Carrizozo Club was a source of inspiration and encouragement.

Mr. and Mrs. H. A. Ward, of El Paso, and Mrs. Ward's mother, Mrs. Guenther, are guests at Ryan ranch this week.

Mr. and Mrs. Robert Storey had as their guests recently Mr. and Mrs. Arthur Wood, of Mesquitepair.

Play A Marked Success

The play—"Wanted: A Man"—given by the Woman's Missionary Society at the High School Auditorium Tuesday night, was a decided success. The presentation showed that much attention had been given its preparation and each individual in the cast met every expectation. A large crowd was in attendance and derived much pleasant entertainment from the production. The receipts were liberal and will aid the society quite materially in carrying on its activities.

Announcement

Having just disposed of our stock of hardware and furniture, to Mr. F. A. English, we wish at this time to express our appreciation for your generous patronage during the past eight years. We are sure that the Carrizozo Hardware will extend every courtesy in supplying your requirements

The Woman's Club

The March meeting has been postponed from March 20th, to March 27th. The meeting will be held at the home of Mrs. T. A. Spence Friday, March 27th.
