Chevrolet Leads

March production of the Chev- rolet Motor Company was 79 603 cars and trucks and brings the number of new 1931 models built up to April 1 to in excess of 326, 000 units, W. S. Knudsen, presi- dent and general manager an- nounced today.

March output was larger than in any month since May, 1930, and final figures for March exceed preliminary reports by more than 4 000 units.

March performance represents a gain of better than 18 per cent over February production of 67, 000 units, and represents an in- crease of 1,000 units over a num- ber originally scheduled for March production.

While production of the com- pany is being conservatively in- creased in line with the upturn of the sales chart, registration figures continue to show that Chevrolet is maintaining leader- ship as the fastest-selling auto- mobile. In December Chevrolet led all other makes of passenger cars in domestic registrations by 2 000 units, in January by 4,000 units, and the 43 states already reported for February show maintenance of last leadership by a comfortable margin.

National Bank Report

Reserve District No. 11, Charter No. 10000.
Reports of the condition of the FIRST NATIONAL BANK, of Carrizozo, in the State of New Mexico, at the close of business on March 25, 1931.

RESOURCES

1. Loans and discounts.....	\$261,361.00
2. Overdrafts.....	
3. United States Government securities owned.....	\$2,046.75
4. Other bonds, stocks, and securities owned.....	7,500.00
5. Customers' liability on account of acceptances executed.....

Notary Public.
My Commission Expires 2-2-32

Correct Attest:
DAVID T. BLAZA
PAUL MAYOR
J. C. BANCROFT,
Director.

New Highway Engineer

The New Mexican of the 6th has the following to say about W. R. Eccles, the new State Highway engineer, and his pre- decessor W. C. Davidson.

W. R. Eccles, recently district highway engineer for the Ros- well district, will relieve W. C. Davidson as state highway en- gineer May 1.

Mr. Eccles was chosen by the state highway commission, fol- lowing a "confab" with Gov. Ar- thur Seligman, Saturday night.

In the meantime Eccles will re- main in Santa Fe most of the time, at least, sitting beside Davidson to get in touch with the progress of the work. Davidson, although said to be anxious to get away, agreed with the com- mission to remain for the rest of the month to help his successor get started.

The highway department right now has under way the biggest job in its history. With the let- ting April 2, there is approxi- mately \$4 1/2 million in projects actually under construction or ready to be started shortly and all of the work has to be com- pleted by September 1 under the terms of the emergency program.

"I consider the commission has made a good appointment in the selection of Mr. Eccles, who suc- ceeds me as state highway en- gineer," said Davidson today. "He is qualified by technical training and practical experience in highway building to assume the duties of chief engineer of the the department.

"I have agreed to stay for a short time, during which I intend to give the commission and Mr. Eccles my full co-operation in ex- pediting the federal emergency program.

"My resignation becomes effec- tive May 1, when I expect to en- gage in private business. July 4 next would have rounded out 15 years of continuous service with the department. It has been a decade and a half of pleasant as- sociation and work.

"I bespeak for my successor the same splendid co-operation that has been given me by the people of this state."

Confusing the Issue

Commenting on a statement of the publicity branch of the Re- publican National Committee di- rected at Mayor Walker and municipal conditions New York Joutett Shouse, Chairman of the Democratic National Executive Committee, said:

"This is, of course, a complete answer to the criticisms of the Hoover administration, the record of which must be the issue in Mr. Hoover's campaign for reelection."

Chairman Shouse expressed the belief that the great grain states of the West and Northwest, sore over the failure of the admini- stration's farm program, will be much impressed and "must im- mediately be converted to enthusiasm by a consideration of the District Attorney in New York City.

"What matters it," he asks, "if wheat prices are at the lowest point of recent years and the market for the winter crop is trembling under the menace of 200 000,000 bushels held over by the Farm Board, so long as the Kansas and Nebraska farmer are cognizant that Tammany Hall is restive over whether Mayor Walker will or will not be in- vited by Governor Roosevelt?"

He then propounds, in sub- stance, the following queries: "Of what consequence is a \$700, 000,000 deficit in the Treasury compared with the question of whether certain minor judges in the Metropolis have been guilty of unjudicial and unethical con- duct?"

Who is going to hold a Federal Administration responsible for a brutal tariff bill when a Demo- cratic Governor either does not undertake the cleaning up a wick- ed municipality?

Campaign prosperity pledges resulting in panic, denial of credit to a Democratic Senator for un- employment relief legislation, Federal scandals in past office leases; the Executive Director of the Republican National Com- mittee, Mr. Hoover's personal representative, secretly fighting a Republican Senatorial nominee with fraudulent documents paid

"Conspicuous Failure"

Under the caption "A Lamen- table Failure," the Brooklyn Daily Eagle, a staunch Republican pa- per, declares:

"The way in which the Hoover Administration has dealt with the unemployment question con- stitutes one of its most conspicu- ous failures. The treatment ac- corded Senator Wagner and his well-developed plan of relief has been stupid. But there will come a reckoning. This issue will not down, and the Senator from New York, who has taken the lead in striving to develop constructive measures of dealing with the problem, will have his day."

The attitude of the President on unemployment, the Eagle says, was indicated by his treatment of Senator Wagner's unemployment measure. "It was not enough to hamstring Wagner program by holding up the proposed legisla- tion. The President vetoed one of the important measures, and Senator Wagner has since been denied the Chairmanship of the Committee to study unem- ployment insurance."

for with borrowed funds guaran- teed by the Republican National Committee itself, and like mat- ters, Chairman Shouse avers "must be dismissed as unpertinent to the question whether the Hoover administration has suffi- ciently justified its direction of national business to warrant another term of the same sort."

It had not occurred to the Democratic National Committee that the handling of Chicago af- fairs by the Big Bill Thompson-Al Capone combination was prof- itable that Mr. Hoover had failed in his Presidency, he said. He was willing to leave that question to the people of Chicago.

"However," Chairman Shouse concluded, "it is easier and safer for the Republicans to point to New York's local complications than to defend the policies of the President or to explain to the country why two years of failure have left every problem he prom- ised to solve in greater confusion than ever."

Lobbying Senator

Washington, April — Senator Barkley (Dem., Ky.), in a public statement referring to the dis- placement of Senator Wagner, of New York, a Democrat, as Chair- man of the Senate select commit- tee to investigate unemployment insurance systems, by Senator Hebert (R. I.), a Republican, supplies some highlights of in- formation concerning Senator Hebert's activities in insurance matters. Under a Rhode Island state law all lobbyists must reg- ister with the Secretary of State, the records of which office show the following:

April 4, 1924, Felix Hebert was employed by Emil G. Pie- per to lobby for the passage of an act incorporating a number of persons as the Guaranty Fire Insurance Company.

January 15, 1925, Felix Hebert registered as an agent for the Rhode Island and Insurance Company to lobby for the pas- sage of an act to amend the charter of that company.

March 6, 1925, Felix Hebert re- gistered as counsel for the Man- ufacturers' Mutual Insurance Company to lobby for passage of a bill amending its charter as Chairman was because Hebert February 16, 1926. Felix was an expert on the subject of Hebert was employed by the insurance.

Union Mutual Fire Insurance Company to lobby for passage of a bill amending its charter.

March 8 1923, Felix Hebert registered as an agent to lobby for an act amending the charter of the Rhode Island Casualty and Insurance Company. He was employed by that concern.

February 15, 1923 Felix Hebert registered as a agent for Frederick T. Moses for passage of an act to incorporate the Textile Manufacturers' Fire Insurance Company.

April 9, 1923, Felix Hebert registered as counsel for Garry C. House to lobby for passage of an act to incorporate "Jesse H. Metcalf and others" as the Anchor Insurance Company.

"A dozen years ago," said Sen- ator Barkley, "Mr. Hebert was a deputy in the Rhode Island Insur- ance Commissioner's office. He retired from that post to become the legal adviser of various in- surance companies. His employ- ment by the insurance companies did not cease with his election to the United States Senate.

"With this background, some- thing is cast on the recent state- ment of Senator Gleason of Illinois the third member of the select committee, that his reason for Company to lobby for passage voting Hebert in and Wagner out of a bill amending its charter as Chairman was because Hebert February 16, 1926. Felix was an expert on the subject of Hebert was employed by the insurance."

Saving Things That Could Be Discarded

By BETSY CALLISTER

THERE is something of the nomad and something of the permanent settler in most of us. The nomad in us bids us discard unnecessary possessions while the permanent settler bids us hoard and save and accumulate.

If there had never been any savers we should have no antiques, no curios, no visible records of the life of our ancestors—or at least only such things as had accidentally managed to escape the general weeding-out process.

One should discard with judgment and save with understanding—and this is precisely what some women never do. They never throw away a receipted bill, a cancelled check or a bank statement and yet never think to save the revealing first letter written by a son or a daughter in college which will prove entertaining in years to come.

Every one in the course of a lifetime receives a score or more of letters that ought to be saved—clever letters, amusing letters, letters that will be priceless records of family life in years to come, and yet letters of

this sort are so seldom saved that they are priceless family treasures when we come across them among old papers.

Silent 30 Years

Samuel Frommer, a business man known as "the silent man," has died at the house of the "miracle rabbi" in Czortkow, Spain. Frommer had not spoken a single word in 30 years, but lived a most retired life and spent much of his time in prayer.

The Bumbled Glipp

By Hugh Hutton. (Author of Nutty Natural History.)

ALTHOUGH the first glimpse of the glipp nearly frightened Livingston, the explorer, to death, it is in reality a very harmless creature and is not bothered by the natives of Uganda. About half the size of an elephant, it wanders through the jungle until it comes in sight of a giant bumblebee nest, whereupon it lies on its back and waves its gaily-colored paws through the air. The bumblebees, attracted by what they think is a new kind of flower, gather on the paws and are speedily kicked into its wide-open mouth. When full of angry bees it becomes thoroughly bumbled.

The head of the glipp is a split walnut, with split bean eyes and clove horns. The body is a silbert, and the legs are toothpicks. Polychrome peanut kernels as a rule will do for the paws.

World's Debt to Camel Until the introduction of the camel in the seventh century A. D., the desert was an insuperable barrier between the countries along the Mediterranean and those south of the desert.

Kisses Are Like Money Everybody wants plenty. The more you get, the more you want. They are payable on demand and good for face value. Some are counterfeit. Some come in small denominations, others in large. Some people are stingy with them, others extravagant. They can't always buy happiness. Kisses are like money, only sweeter.—Exchange.

World's Debt to Camel Until the introduction of the camel in the seventh century A. D., the desert was an insuperable barrier between the countries along the Mediterranean and those south of the desert.

He only is a well-made man who has a good determination.—Emerson.

Aged War Veterans

Daniel C. Dakeman was the last pensioner of the Revolutionary war. He died 83 years after the close of the war at the age of one hundred and nine years, eight months and eight days on April 6, 1890.

The narrowest street in the United States is said to be Treasury street in St. Augustine, Fla. It is 6 feet 1 inch wide. This street was shown as a street on the map of St. Augustine in 1737, and called Treasury street because the old treasury was on the corner of this cross street and St. George street.

Not Much Difference The words fort and fortress are often used interchangeably. In the United States all permanently garrisoned places, whether fortified or not, are termed forts. In fortification fort is usually applied to a work entirely enclosed by defensible parapets.

Famous American's Nickname "Old Man Eloquent" was one of the nicknames of John Quincy Adams during the latter years of his life while he was a member of the house of representatives. Milton applied the phrase to Isocrates, the famous Greek orator, who is said to have died of mental shock and grief when he learned that Philip of Macedonia had defeated the Greek allies at Chaeronea.—Pathfinder Magazine.

Here's Resting Place George Rogers Clark is buried in Cave Hill cemetery in Louisville, Ky. General Clark founded the city of Louisville in 1779 after returning from his military expedition to the Northwest. He spent most of his declining year in Louisville, Ky., and Clarksville, Ind., across the Ohio river from Louisville. This town was also founded by General Clark.

Had Enough of the Sea On account of a shipwreck in his teens when he was emigrating from England to South Africa, Mr. Clark of Boshof, Orange Free State, made his way inland, and vowed that he would never cast eyes on the sea again. He settled at Boshof, where he built up an extensive general dealers' business, and left a large fortune at his death.

Leaving Wife Scene in millinery shop. Wife addresses husband: "You see, my dear, this is the hat I adore most passionately, but since you prefer that other one, I shall take them both, just to please you!"

First Used by Holmes? The expression "mutual admiration society" was probably coined by Oliver Wendell Holmes. The phrase appears in "The Autocrat of the Breakfast Table."

One Point of View He is happiest, be he king or peasant, who finds peace in his home.

This and That

Constant exposure to dangers will breed contempt for them.—Seneca. Don't bank heavily on how much a man says he does or doesn't earn. In the north of Australia there are cattle stations larger than many states of the United States. The great thing in the world is not so much where we stand as in what direction we are moving. Even the dullest railroad ride is lightened a little by picking out the farm house where you'd like to live. The giraffe carries his head high, but many people do the same thing with much shorter necks.—Grand Rapids Press. The recipe for perpetual ignorance is to be satisfied with your opinions and content with your knowledge.—Elbert Hubbard.

Working Girls Who Do Not Need Money

By JEAN NEWTON

DEAR JEAN NEWTON—What do you think of the statement of a woman state industrial commissioner, that girls from prosperous families should not seek employment in offices or trades where they take jobs away from girls who are compelled to earn their own livelihood? So one of our readers begins her letter.

"Now this is what the commissioner said: 'Girls with a purse and an education behind them might better aim to be agricultural experts, engineers, architects, musicians, writers, dancers, dramatic artists. These fields offer them opportunities to build themselves a real place in society. So many of our college girls are unimaginative in not realizing that there are greater opportunities than those to be had in selling ribbon behind a counter.'

"The point is, Jean Newton, that I have a daughter who has been well educated and desires to have a career, and while she wishes to be self-supporting, there is no absolute necessity for her to earn her own living. Now my daughter happens not to be talented in art or music and feels no urge to pursue any of the lines that the woman I have quoted mentions. In fact she feels that she would like a business career, and it is only by taking a position in an office that she can get a start. I would like your opinion as to whether she hasn't a perfect right to do this without twinge of conscience about taking the job away from some one who needs it more."

The question raised by our reader is a big one—one of those which make me wish I had the telephone number of a Solomon. However, my personal reaction is that the problem of unemployment is not to be solved by giving jobs to people who need them most, or keeping out those who can live without them. A sounder way would be to bring even greater opportunities for education and training to those who must be wage-earners, and so fit them on their own to stand up against any competition. I think that any girl who feels that her best opportunity for the kind of career she has planned for herself is a position in an office, has a perfect right to take such position, even though she does not depend upon it for her bread and butter. The most humble start may be the gateway to big things. The position

of stenographer or clerk has been the start of many a big woman executive and there are stores in the country which have squads of educated young people who while "selling ribbon behind a counter" are training for the positions of buyers. Such a rise, however, is usually the story of an excep-

"Poor Dora," says Catty Kattie, "she thinks a stalemate is a cause for divorce." (Copyright)—WNU Service.

tional person. It is the dream of many people who are tied to a grindstone to be able to specialize in some field which they must relinquish because it is not lucrative. Of course if the great majority of girls from substantial homes did this, it would relieve the pressure of applicants for office positions. But I believe that when the commissioner made the statement she had no less in mind the benefit to the girl herself who is able to go in for some work for which she is inclined, rather than just a "job."

About Sandwiches and Fillings

By NELLIE MAXWELL

I think that I shall never see A poem as lovely as a tree. A tree whose hungry mouth is prest Against the earth's sweet flowing breast: A tree that looks at God all day And lifts her leafy arms to pray A tree that may in summer wear A nest of robins in her hair Upon whose bosom snow has lain: Who intimately lives with rain. Poems are made by fools like me, But only God could make a tree. —Joyce Kilmer.

AT ANY season of the year a tasty sandwich is welcome. For those who must pack a lunch box daily, the sandwich is one of the main foods.

Pepper Jam for Sandwichs. Take four large sweet peppers (red), two green peppers, two medium-sized onions, all chopped. Add one-half cupful of vinegar, one cupful of brown sugar, one tablespoonful of salt, one tablespoonful of cinnamon, one tablespoonful of ginger and one teaspoonful of cloves. Simmer until

thick, pour into jelly glasses and seal. Use with mayonnaise on slices of buttered bread.

Graham Orange Sandwich. Mix one cupful of powdered sugar with one tablespoonful of orange juice and a teaspoonful of the grated rind. Mix with more juice, until of spreading consistency. Place on graham crackers. Nice for children. Thinly sliced green onions, radishes and cucumber, laid on buttered bread. Season with mayonnaise and serve as soon as prepared.

Cold Ham and Egg Sandwich. Mash and press through a ricer the

yolks of six hard cooked eggs. Mix with a tablespoonful of french mustard to a smooth paste. Add one and one-half cupfuls of finely chopped ham with some of the fat, moisten with salad dressing. Spread thinly sliced rye or graham bread with mustard butter. Spread half the sandwiches with the ham mixture, put together in pairs, press edges together, trim off crusts and wrap each sandwich in waxed paper. Use the egg whites for potato salad, after chopping them.

He only is a well-made man who has a good determination.—Emerson.

SUPERSTITIOUS SUE

ONE HAS HEARD THAT— If some one in an unguarded moment hangs the dish rag on the kitchen door knob, oh Jinx Buzzer, come quick and protest that house, for it is a sign that the undertaker is headed that way. (By McClure Newspaper Syndicate.) WNU Service.

Why Boys Leave Home

BEING A COG IN THE WHEEL

By Douglas Malleck.

A HUNDRED came might turn and spin, And nothing happens, after all, The waters could rush out and in And whirl the wheel beside the wall, And yet it all might be in vain, The mill not grind a bit of grain.

For cogs must mesh, wheel work with wheel, Before some shaft will turn the stone, Yes, wood touch leather, leather steel, And work together, not alone, These things will very little mean Unless they all are one machine.

Yet maybe you are just a caw Nattering in the empty air, Who think yourself a great I am, And yet not getting anywhere, Because the fact you never found, You need to mesh with those around. (By Douglas Malleck.)—WNU Service.

Mammoth Welland Ship Canal Machine

One of the most interesting and important pieces of equipment in connection with the new Welland ship canal is this mammoth lock gate lifter of 800 tons capacity, capable of lifting the largest gate used in the new canal. It was constructed for the department of railways and canals, Canada. This hoisting crane is a self-contained unit except that it is not self-propelling.

HEADACHE

When you feel a headache coming on, it's time to take Bayer Aspirin. Two tablets will head it off, and you can finish your shopping in comfort. Limbs that ache from over-exertion. Joints sore from the beginnings of a cold. Systemic pain. The remedy is real. But immediate relief is yours for the taking; a pocket tin of Bayer Aspirin is protection from pain wherever you go. Get real aspirin. Look for Bayer on the box. Read the proven directions found inside every genuine Bayer package. They cover headaches, colds, sore throat, toothache, neuralgia, neuralgia, sciatica, lumbago, rheumatism, muscular pains, etc. These tablets do not depress the heart. They do nothing but stop the pain. Every draught has Bayer Aspirin in the pocket size, and on the bottom. It says money, buy the genuine tablets by the hundred. Don't experiment with imitations.

WORLD WAR YARNS

by Lieut. Frank E. Hagan

Such Informality!

Sometimes the American doughboy may have been dazzled by the sartorial splendor and haughty demeanor of German officer prisoners—but was never dismayed. One front in 1918 saw the capture of a sizeable bag of such prisoners.

These were brought to the rear where an intelligence officer questioned them as the doughboys guarded their prisoners zealously. One of the Germans grew restive under the attention he was receiving from the man with the bayonet.

"See here," he demanded snally of the intelligence man, "Don't you require any discipline of your American troops toward officers? This soldier here," and he indicated a watchful infantryman, "is grossly familiar. The pig calls me, an officer, by my first name Helme, whenever he speaks to me!"

Illustrating the point further is the experience of a wounded American who, from his prone position in a wheat field, witnessed the stately approach of a German officer prisoner, resplendent with his medals and wearing a monocle. From time to time the huge man turned his head nervously and appeared to flinch as from ticklish contact with a bayonet.

So he was, for as the little party drew near the wounded American perceived that the German advanced at the will of an American negro, equally as large as his gorgeous prisoner.

"Hi-yi, white folks," was the colored man's salutation. "Ah doesn't rightly know what I've got, but I've a-bringin' it along!"

THE FEATHERHEADS

Felix Needed Those Covers

Wakeful restless CHILD needs Castoria

WE can never be sure just what makes an infant restless, but the remedy can always be the same. Good old Castoria! There's comfort in every drop of this pure vegetable preparation, and not the slightest harm in its frequent use. As often as Baby has a fretful spell, is feverish, or cries and can't sleep, let Castoria soothe and quiet him. Sometimes it's a touch of colic. Other times it's constipation. Or diarrhea—a condition that should always be checked promptly. Just keep Castoria handy, and give it promptly. Relief will follow very promptly; if it doesn't you should call a physician.

All through babyhood, Castoria should be a mother's standby; and a wise mother continues it in more liberal doses as a child grows up.

Readily obtained at any drug-store, the genuine easily identified by the Chas. H. Fletcher signature and the name Castoria on the wrapper like this:

Nothing New in Idea of Power From Ocean

So far as the dispatches indicate, a power machine that has been set up by Prof. Georges Claude at Matanzas, Cuba, with its gigantic pipe for bringing up cold water from the bottom of the sea, does not involve any principles unknown to science. It was shown long ago that water, if confined in a vacuum, will give off steam at temperatures far below its ordinary boiling point, and also that cold water will condense the steam and restore the vacuum. So that when Professor Claude takes advantage of this and uses warm water from the surface to produce the steam and cold water from the bottom to condense it again, he is not exactly an innovator. The main question, then, is whether his invention is commercially important, and on this one would like to have more expert opinion, formed after thorough observation on the spot. According to the dispatches, the apparatus generated enough power to light 40 500-watt bulbs, but whether this power was in excess of the power needed to pump cold water up from the bottom is not stated, and it is a very vital point.

To the layman the whole device looks like a second cousin to a perpetual motion machine, and therefore not very promising; but this objection was raised to the locomotive, the steamboat and the airplane when they were in the experimental stage. That any of these could possibly carry enough fuel to propel itself was held to be a prima facie absurdity; yet they did propel themselves, and at a pretty lively clip. The very least that can be said for Professor Claude is that he has tackled a project that men have often speculated about, and brought it to a point where its possibilities can be definitely determined. It may prove to be as impractical as schemes to utilize the latent power of the tides. But it may eventually be lighting our cities.

FOR COLDS—ALKALINIZE YOUR SYSTEM

Doctors everywhere are prescribing this new treatment for colds: Begin when you feel a cold coming. Take a tablespoonful of Phillips' Milk of Magnesia, morning, noon and night, the first day. Do the same second day. Then only at night. Colds reduce the alkalinity of your system. That's what makes you feel icky, feverish, weak, half-sick. Phillips' Milk of Magnesia is alkali in harmless, palatable form. It checks the symptoms of colds by restoring the alkalinity of your system. Relieves sour stomach, indigestion, gas, over-acidity. All drugstores.

Nine Years of Grain Prices Based on average yields for the last nine years and the average price of grains during the first six months of 1930, the average value of an acre of wheat is \$17.38, of oats, \$14.83, and of rye, \$12.68.

Dr. Pierce's Pleasant Pellets are the original little liver pills put up 40 years ago. They regulate liver and bowels.—Adv.

"All men are born equal," and some are born equal to anything.

Denny, a Dog Hero

He was "only a dog," but he was the hero of five battles on the Western front, he was honorably discharged from the army at Camp Grant, Ill., after 18 months in the thick of fighting in France and Belgium, and when he died last year he was given a military funeral by an American Legion post.

For Denny was a member of the Harry E. Kelley post of the Legion of Ekhorn, Wis. He was born in a dugout of the Thirty-second division in Belgium in 1918. Serg. Tom O'Keefe adopted the puppy. The animal was gassed at Montdidier and sent to a base hospital for treatment as were his doughboy friends. When the dog was cured Sergeant O'Keefe had been transferred to the First division and Denny went along. After his experience with gas at Montdidier his master fashioned a gas mask for him. This mask never left the dog until the armistice.

Denny went with the Army of Occupation into Germany. Perhaps the darkest hours of his whole 13 years came when it seemed inevitable that he must be left behind as his master was about to sail for home. A deluge of rain saved Denny and Sergeant O'Keefe from being separated. Denied the right of taking Denny on shipboard O'Keefe smuggled him on under his raincoat, and brought him back safely to this country.

The National Legion convention at Kansas City in 1921 presented Denny with an O. D. blanket with one wound stripe and a medal testifying to his participation in five major battles.

It Came Just in Time

Take it from the Stars and Stripes, A. E. F. newspaper, the Armistice came just in the nick of time to prevent rabbit skin caps from being inflicted upon the American soldiers! Here's what the paper said about it in its issue of June 6, 1919:

"Regardless of what military experts may claim as to the conditions among the Allied troops on November 11, it is now revealed from Washington that the Armistice was not signed a moment too soon. While there is still no question as to the morale of the overseas troops at that time, this morale could never have held up under the shower of inventions and improvements prepared for the A. E. F. and the climax of this invention shower was reached in the rabbit skin cap. Just what kind of a cap it was going to be has been kept from the A. E. F. so far, but, anyway, it was going to be an authentic issue because Washington had adopted it.

"The rabbit has a gentle face; his private life is a disgrace," the poet has touchingly remarked. And they were going to wind that disgrace around our heads. No one will ever forget the rain-in-the-face atrocity of our merry days in Europe, but we can be thankful that the Armistice saved us from hats on the brain. Other brilliant schemes such as cotton-proof underwear, which not only killed the coolies on a man, but the man, too, and trench shower baths that worked perfectly, if nobody but the shower was in the trench, were mercifully held up until Fritz took the count."

(©, 1921, Western Newspaper Union.)

Careless Old Chap

Evidently the old married man whose wife is able to find his shirt and collar for him and tell him where he left his hat feels she also is able to put on her own gaiters and get into her coat without the help he used to think she needed.—Cincinnati Enquirer.

Frank "Have you come to me to ask my permission to marry my daughter?" asked her dad. "No," replied the merry youth, "I came to find out what kind of a father-in-law you would agree to be if I did decide to marry her."

Kill Rats Without Poison

A New Extremist that Won't Kill Livestock, Poultry, Dogs, Cats, or even Baby Chickens. K.R.O. can be used about the home, barn or poultry yard with absolute safety as it contains no deadly poisons. K.R.O. is made of Squill, as recommended by U.S. Dept. of Agriculture, and is sold under the name of Squill. It is the most powerful rat-killing agent known. It is safe for all domestic animals. It is sold in 100 and 250 lb. bags. All drug stores, 75c, \$1.25, \$2.00. Direct dealer cannot supply you. K.R.O. Co., Springfield, Ohio.

K-R-O KILLS-RATS-ONLY

Campus Chaff "Are you a palmer?" "No." "Then let go my hand."

Specialty "Jones is musical, I understand. What does he play on?" "The neighbors' nerves."

Lose Fat Safely and Quickly

Kruschen Salts—(a perfect combination of the six mineral salts your body should have to function properly) purify your blood of harmful acids, and aid the kidneys and bowels to throw off waste material—the continual formation of which is probably the cause of your fat. In this modern age of living, it's impossible to get these salts from the fancy foods you eat. Don't worry just as long as you have Kruschen Salts.

Take a teaspoon every morning before breakfast in a glass of hot water—little by little that ugly fat disappears, you'll feel better than ever before, you'll be younger, more energetic. You'll soon possess that enviable beauty, clear skin, sparkling eyes, superb figure which only perfect health can impart. An 800 bottle (lasts 4 weeks) at any progressive drugstore in America. Money back if Kruschen doesn't convince you that it is the safest, quickest, easiest way to lose fat. A Hartford woman writes, "I'll tell the world Kruschen Salts is wonderful stuff to reduce." An Ohio woman lost 10 pounds with one bottle.—Adv.

ALFALFA \$10.20

Best quality alfalfa, grown in the best alfalfa fields in the world. It is the most nutritious and palatable alfalfa ever produced. It is sold in 100 and 250 lb. bags. All drug stores, 75c, \$1.25, \$2.00. Direct dealer cannot supply you. K.R.O. Co., Springfield, Ohio.

PARKER'S HAIR BALM. Keeps the hair from falling out. It is the most effective hair restorer ever known. It is sold in 100 and 250 lb. bags. All drug stores, 75c, \$1.25, \$2.00. Direct dealer cannot supply you. K.R.O. Co., Springfield, Ohio.

Something New!! A Shaving Cream that is also a Skin Tonic! Cuticura Shaving Creams fill a long-felt want. Containing the delicately medicated, emollient properties of Cuticura, it produces a rich, creamy lather that remains moist throughout the shave, softens the beard and at the same time soothes the skin. And what a wonderful after-shave feeling! A skin that is cool and refreshed, free from any traces, dry feeling. At your druggist or use Cuticura Soap and Cuticura Shaving Cream. Address: Cuticura Laboratories, Boston, Mass.

Official Deception On Unemployment

Washington, April— Commenting on the latest statement of the Secretary of the Secretary of Commerce Lamont unemployment situation, Senator Connally (Dem., Tex.), in a public statement, said:
"Secretary of Commerce Lamont's report which discloses upwards of 6,000,000 unemployed reveals the deception practiced on the country in the pre-election period of 1930.

"During that time President Hoover and his various cabinet officers issued statement after statement that 2,500,000 represented the maximum of those out of work."

Senator Connally referred to Secretary of Labor Davis' indignant comment, when the figures of his department were challenged, that the criticism was made for strictly political purposes, and quoted the statement of Secretary of Agriculture Hyde last July that "the nation is back at work" and that "we have suffered from little more than seasonal unemployment with relatively little distress."

The Senator also cited President Hoover's reiteration of the misleading figures in his message to Congress on December 2, last. Secretary Lamont says in his report, "the Senator continued, "that the number of jobless in January 1931, would be 149 per cent greater than the total reported in April or 6,050,000 persons."

His estimate of December when the President repeated to Congress the figure of 2,500,000, was that there were close to 5,000,000 unemployed," which would mean that since last April, the number of jobless was multiplied by two or three. "If this is a fact, what is the explanation of President Hoover's statement of March 7, 1930, that the low point of depression is over and that "the worst effects of the stock market crash on employment will be passed in the next sixty days?"

To Bankers Council

E. M. Brickley, Cashier of the First National Bank, leaves tonight for Augusta, Georgia, to attend a meeting of the Executive Council of the American Bankers' Association, of which he is a member. The Council has 137 members, of which New Mexico has 1. The total membership in the National Bankers' Association is about 20,000.

Reports of various committees will be taken up, chief of which are: Report of General Counsel, Agriculture Commission, Bank Management, Commerce and Marine, Economic Policy Commission, Federal and State legislation and Bank Taxation. Just now the council is stressing "Better Bank Management."

Mr. Brickley expects to return April 19th.

FINE!
No; you didn't disturb me. I have an extension telephone next to my bed. Cost much? Not just a few cents a day.
Call our business office.

the Senator asked. Senator Connally also quoted Amos Pinchot that on June 4 1930, the President told a delegation on which Pinchot was a member that unemployment was being shamefully exaggerated, that its peak had been reached and passed and that the tide had turned. "It is hardly credible, Senator Connally concluded, "that the out-of-works increased from two million to over six million in a year and that the administration was so uninformed that it really believed that the trend was in the absolutely opposite direction."

Lincoln County Teachers' Association

HONDO, N. M., APRIL 17-18 1931
J. C. Burkett, Pres. A. M. Freeman, Vice Pres.
Mrs. A. B. Moss, Sec.-Treas.

Study Club Hit

A most unusual program was presented last night at the High School Auditorium by the Study Club, under the direction of Mesdames Ziegler and Blaney. The auditorium was comfortably filled and the audience responded in generous approval at every appearance, from the initial feature, "Those Husbands of Ours," which brought down the house by its local sallies, to the final, as the throng arose, when "The Star Spangled Banner," sung by those on the stage in costume, joined by the throng on the floor, closed the program—a program replete with features, each of which was entitled to and received its due meed of approval from a delighted audience.

There were many specials, each bearing a specific designation and presented in a distinctive manner, appropriate and striking costumes ruling throughout, but, of course, Peggy Farley, the little starlet of Hollywood, Carrizozo born, came in the extra special class. This little tot sang, danced and performed acrobatic feats that were truly marvelous, and in each role was acclaimed and encored time and time again.

"Liberty," by Mrs. Beck, was a beautiful thing, and the contribution by Prof. Crnkovich, "Swiss," "Thou Art Like a Flower," was equally attractive and the costume representative.

Mrs. Lemon shone in "Indian" By the Waters of Minnetonka," while Ernest Prehm, Jr., in a Spanish female impersonation, in dance, etc., did likewise.

Mrs. Elliott, in plaid and kilts, gave, in an inimitable manner, "Roamin' in the Gloamin'," and responded to an encore.

Mrs. McCommon, with little Jane Gallacher, presented "Little Brown Baby" in such a realistic way and stirred the sentiment of those who had an acquaintance with an old negro mammy.

The gay Irish lad was strongly represented by Raymond Lockland, whose golden blended perfectly in Irish melody, and he was called back.

Miss Louise Sweet, recognized as a real artist with the violin, was at her best last night in the "Norwegian" dance, and was called again to the footlights.

Uncle Sam, represented by Prof. Crnkovich, next appeared, the selection being "Columbia, The Gem of the Ocean," with Mrs. Beck representing in emblematic costume, and, final, led by Prof. Crnkovich, troupe and audience struck the stirring strains of the National Anthem.

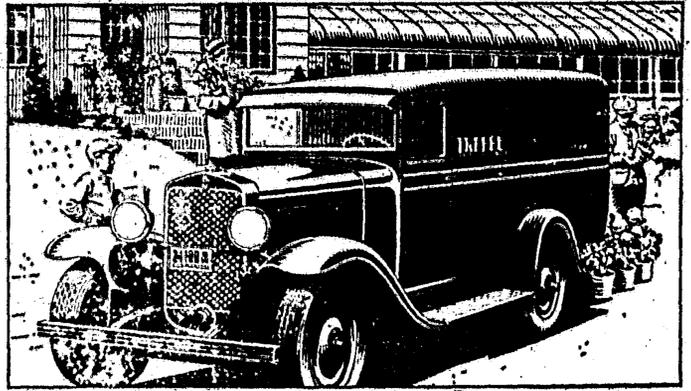

We have made no effort to differentiate between individuals, not only because it's dangerous, but because each was a star, and the group formed a galaxy that would have shone in effulgent radiance in any firmament.

W. H. Broadus—Optical Specialist, will be in Carrizozo, Wednesday April 15, at the office of Dr. Shaver. Eyeglass service the better kind.

Stops Headache in Five Minutes

A Wonderful Formula Ends Aches and Pains Almost Like Magic. Something Better and Safer. Thousands of men and women are now stopping throbbing, stinging, splitting headaches, as well as the excruciating pains of rheumatism, neuritis, toothache, etc., with a marvelous new formula that is said to be far superior to anything heretofore used. It contains no aspirin, acetanilid, etc., and is absolutely safe and harmless. This remarkable formula, called A-VOL, is being prescribed by thousands of doctors, dentists and welfare nurses because of the quick, efficient way it relieves all types of aches and pains without depressing the heart, or causing any other harmful effects. A-Vol quickly stops the most severe pain, leaving the patient refreshed and feeling fine. Especially effective in women's period pains. To quickly prove to yourself that this is truly a remarkable formula, just stop into your nearest drug store and get a package of A-VOL for a few cents. Take a couple of tablets right there. If your pain is not gone in five minutes, the stock will return your money.

Choose Chevrolet six-cylinder trucks for low first-cost and unsurpassed economy

The economy of using Chevrolet six-cylinder trucks is an actual dollars-and-cents economy that shows up, month after month, on the balance sheet. It starts with a purchase price that is one of the lowest in the market for a complete unit. It continues throughout Chevrolet's long life with an operating cost that is unsurpassed!

(1) That no other trucks of equal capacity give any better gasoline, oil or tire mileage than Chevrolet. (2) That the cost of keeping a Chevrolet in satisfactory running order is unusually low. (3) That Chevrolet trucks are exceptionally reliable and long-lived.

Today, Chevrolet's proved economy is available to buyers in every truck-using field. For Chevrolet offers a new line of quality bodies that includes a type for every hauling requirement.

Consider, for example, the cost-records of leading national organizations who use large fleets of Chevrolets. They prove

Chevrolet 1 1/2-ton chassis with 131" wheelbase **\$520**
(Dual wheel option, \$25 extra)
1 1/2-ton chassis with 157" wheelbase, \$590
(Dual wheels standard) Commercial chassis, \$335
All chassis prices f. o. b. Flint, Michigan. All body prices f. o. b. Indianapolis, Indiana. Special equipment extra. Low delivered prices and easy terms.

ALSO DEALERS IN CHEVROLET SIX-CYLINDER PASSENGER CARS, \$475 to \$650, f. o. b. Flint, Michigan

Follows Husband

The body of Mrs. Josephine Russell was brought here Saturday last from El Paso, and after the services at the Methodist church, at which Rev. Jno. L. Lawson officiated, was interred in the local cemetery. A brother, E. V. Thompson, of El Paso, accompanied the remains to this point, and was present at the last sad obsequies.

Mrs. Russell's husband, Everett Russell killed himself at a ranch near here about two months ago, and since that tragic occurrence the widow had resided here. Recently she went to El Paso and, as it developed, registered at the Hilton Hotel under an assumed name. The hotel management, not having seen this particular guest for a period, instituted a search, found her room locked, and receiving no response from a knock, forced the door and found the occupant dead, the body indicating that life had passed therefrom possibly two days previous. An empty strychnine bottle gave mute evidence of the means used to bring about the end.

Mrs. Russell was born in Pennsylvania a little more than 50 years ago, later went to Texas and several years ago married Russell, who was an employee of the Bar W ranch many years ago, and was familiarly known as "Angelo".

The surviving brother has the deep sympathy of a large number of friends here who knew husband and wife, both of whom passed to the Great Beyond by their own hands.

The weather man has sent us a varied assortment of weather this week, in which wind, snow, rain and sun were administered in about equal parts. The sun is doing his darndest this morning although his fear is expressed for the fruit crop because of the low temperature last night.

Lopez-Vega

Florentino Lopez and Miss Petra Vega were married Wednesday morning at the Catholic church, Fr. Mitchell performing the ceremony. In the evening a large crowd gathered at Community Hall and helped the young couple celebrate the event. The parties to this life-long contract are from the best known families of the town—the groom being a graduate of our High School, who during his high school career was the leading athlete of the school, and the bride, a daughter of Mrs. Josefa Vega, and a delightful and pleasant young lady. Best wishes.

Marries in Dallas

Miss Ruth Edmiston was married in Dallas, Texas, Tuesday, April 7, to Royal Ferris. The bride, born in Lincoln county and living here until she reached womanhood, is the charming daughter of Mrs. Ada Edmiston, of Carrizozo. She will be remembered here as one of the prettiest and most attractive young ladies in her set. She has made Dallas her home for several years past.

The groom is engaged in the the machinery and investment business in the thriving city of Dallas, and the couple will make that city their home. The news joins many friends of the bride in wishing her and her choice a long life of pleasure and prosperity.

New Quarters

Having erected a new Service Station on El Paso Avenue, fronting the Depot, I desire to announce that I will handle:

TEXAS and CONTINENTAL GAS and OILS

AND ALSO CLEANING NAPHTHA
WILL CARRY STOCK OF TIRES, TUBES, ETC.

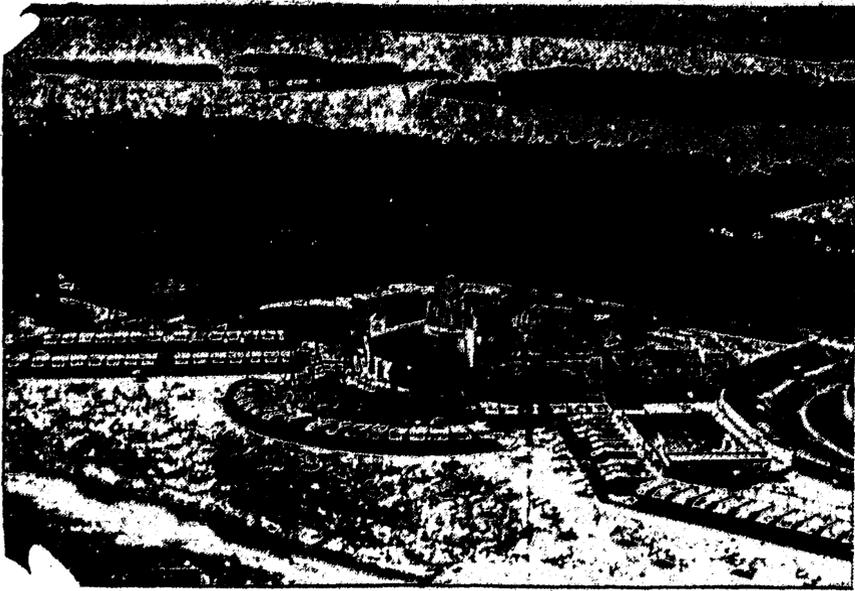

CARS WASHED, POLISHED AND GREASED

For the generous patronage enjoyed in the past I wish to express my appreciation; and respectfully request a continuance of such consideration.

Harry A. Miller, Prop

High Speed Tax On Endurance

Racing Pilots Severely Affected by Strain of High Velocities.

New York.—Capt. Malcolm Campbell racing over Daytona's sands at 245 miles per hour, the Schneider Cup race winner flying a supermarine at 228.63 m. p. h., and another British pilot annihilating space at the rate of 357.80 m. p. h. confound the people who fifteen years ago predicted the death of men who dared exceed sixty miles an hour.

But the thing is done, more to the amazement of scientists than of grandstanders. Before the war, 200 m. p. h. was the arbitrary figure accepted as the maximum limit of human motion. Above that velocity, eminent authorities argued, biological processes would cease. But so far, there is no record of a life lost from the effects of speed alone.

When one considers that the airplane record before the World war stood only at 45.75 m. p. h., and that in the short space of sixteen years it soared 800 per cent, the hazards of 500 and 1,000 m. p. h. seem minimized. Now that rocket ships are projected and an interplanetary society takes itself seriously, it is relevant to ask questions about human biology.

Centrifugal Force Affects Brain.

What the birds do naturally, man does mechanically. He is not fitted for flying, but if he were not adaptable, he could not fly at all. Because he has not learned to speed as he has learned to walk, the strain of high velocities taxes the body severely. Some of the effects are visible, others invisible.

Speed pilots gradually grow accustomed to the effects of high velocity, provided they work up to the maximum gradually. On a straight line of flight, the hazards are much lower than if one turns. The heart beat is accelerated and often blood rushes to the nose. The early racing pilots made wide turns around pylons, but in the competition for speed the modern pilot banks his ship almost at 90 degrees to make a 180 degree turn. The visible effects of this ordeal are shown by black and blue marks over his body.

Even in a padded cockpit one is pounded and pummeled. On rapid turns, the pilot may experience a complete "blackout" and lapse into unconsciousness for an instant. Centrifugal force takes blood from the eyes, but sight returns as soon as the turn is completed. A stinging sensation affects the pit of the stomach, accompanied by dizziness. Blood

rushes from the head to the center of the body, or to the legs.

May Approach Death Point.

The fitness of racing pilots forestalls many fatal ailments. The last Schneider Trophy winner, Flying Officer Waghorn, said that his only unpleasantness came from the heat fumes and oil splashes. In order to avoid noxious effects, Italian pilots tried the climbing turn, but by so doing they lost speed. The maximum speed at which a sharp turn can be taken is still a moot question, but the best flight surgeons hesitate to guarantee anything beyond 300 miles. Safe speed on a straightaway may possibly be as high as 500 miles per hour, but only experience will prove it.

On a steep bank the flyer's body is physically at right angles to his former position. Centrifugal force is away from his head and toward his feet; he is held fast by straps, but the force does act on his body. Blood rushes to the lower extremities, especially to the splanchnic vessels. Anemia of the brain, haziness and unconsciousness result. But recovery is usually prompt because the circulation adjusts itself. It is not rash

YOUTHFUL HERO

W. T. Rowe, Jr., of Boonville, Mo., school boy patrol hero, who will receive an Automobile Club of Missouri gold medal and a citation for bravery above and beyond the call of duty. At the risk of injury to himself, he rescued a younger school mate from being run down by an automobile. A Carnegie hero medal will be asked for young Rowe.

to state that racing pilots are approaching a speed when a sharp turn will press the brain stem to the point of death. Furthermore, the violent concussion would rupture blood vessels in the brain, as well as other parts of the body.

Tingling of the scalp, ballooning of the cheeks and rattling of the teeth are accentuated at high speeds. A pilot's arm would at least be broken if he were to hold it out at a speed of 250 miles per hour, and if he dared to lift his head above the cowling it would be knocked over and his neck probably broken.

Steer on Targets.

Despite these warnings, racing pilots acquit themselves of feats verging on the superhuman. At 300 miles per hour, a plane travels 440 feet per second. Even though nerves and eyesight are perfect the pilot travels ten yards during the time taken by the brain to communicate with the muscles. R. L. Archerly of the royal air force actually looped the loop at 300 miles per hour, and topped off the performance with a perfect barrel roll.

But all are agreed that, so far as the airplane is concerned, maximum speeds are near. At 500 miles per hour, the pilot and designer will have to contend with the heat of air friction, and the engine metals would become red hot. The pilot would have to be encased inside an insulated cockpit.

It is doubtful whether brain, nerves and muscles could co-ordinate on speeds above 400 m. p. h. An automatic piloting device may have to be included in the equipment. Certainly, the eye could not judge a curve if the body is moving 400 m. p. h. Modern auto and airplane pilots are already steering on targets seen through a line of sights.

The limitations of the human frame are not all that must be overcome. There is a maximum pace for internal combustion engines, and at present it is placed around 600 m. p. h., which still allows for new records.

We must go to Jules Verne when speculating about rocket travel. He gave his interplanetary carriage an initial velocity of 24,000 m. p. h. If you want to know how the passengers fared, there is no greater authority than Verne himself.

Undies Stop Bullet

Fired at Maine Sheriff

Houlton, Maine.—Next to himself, Deputy Sheriff Harry Young likes several suits of heavy winter underwear best.

The rigors of this north country town have taught him to always wear not a single union suit but several, from November to April. Recently he had occasion to arrest a young man as an alleged robber. Suddenly the captive drew a revolver, shoved it against Deputy Sheriff Young's stomach and pulled the trigger.

Young, unharmed, found the bullet embedded in the suit of underwear nearest his body, according to his testimony in court.

Radio Cruisers Help Cops to Nab Suspect

Detroit.—Efficiency of radio police scout cruisers has been demonstrated here again by the arrest of Charles Thompson, a holdup suspect.

Two patrolmen had stopped the man and questioned him for loitering on the streets. While the questioning was in progress, the radio in their car broadcast the description of a bandit.

years ago, raised the minimum age to fourteen, sixteen and fourteen, respectively.

The Russell Sage foundation study of 1935 on child marriages estimated 348,000 women and girls then living in the United States began their married life as child brides.

The appointment of W. R. Eccles as district highway engineer at Roswell was announced by Governor Selligman. He will succeed B. F. Kelly, who resigned.

A gain of 109,000 acres in irrigated land was made in Arizona during the last ten years, according to figures just released by the bureau of census. The largest gains were made in Maricopa, Pinal and Yuma counties.

Federal buildings for New Mexico are planned at Las Vegas, Santa Fe, Albuquerque, Clovis and Gallup. The structures will involve an expenditure of over \$1,200,000, and will be put up this year.

W. T. Haldeman, a farmer near Artesia, N. M., gathered seventeen bales of lint cotton of 500 pounds each from a five-acre tract. From one acre, the best in the tract, Haldeman gathered 2,200 pounds.

Thirty-nine hunters during 1,020 working days, killed 227 predatory animals in New Mexico, according to the regular monthly report just released in Santa Fe by the U. S. Department of Agriculture.

Stockholders of the Independence Lead Mines Company, with headquarters in Idaho, met in Phoenix, Ariz., elected directors and ratified an agreement for purchase of controlling interest in the Clayton Mining Company of Idaho.

The Arizona State Teachers' College at Tempe has been fully accredited by the North Central Association of Colleges and Secondary Schools. The announcement was made at the annual convention of the North Central Association in Chicago.

Several hundred members, representing the sixty-eight clubs of the Arizona Federation of Women's Clubs, attended the annual state convention, held in Mesa, March 25, 26 and 27. The Mesa Woman's Club was the hostess organization for the meeting.

Frank Pinkley, custodian of the national monument, announced in Coolidge, Ariz., the white man's rehabilitation of the ancient Casa Grande ruins will be continued during next year through an appropriation of \$55,800 received from the government.

Three men, charged with murder in a Hassayampa river valley ranchers' feud, were acquitted in Phoenix by a Superior Court jury. The defendants, Nelson Killbrew; his son, Louis, and Willard Matthewson, were charged with slaying William Dyer, their neighbor. They pleaded self-defense.

Charles J. Sears of Fort Washington, Wash., and David Lee Houston of Columbus, Ga., were held in Phoenix in connection with the death of John P. Easterday, Detroit, Mich., war veteran, who died of injuries a day after he and Herbert Race of Sioux City, Iowa, were thrown from a speeding train by hoboes.

Dr. N. L. Linebaugh of the Methodist church, south, in New Mexico has announced the purchase of 229 acres in the Sacramento mountains, to be used for the purpose of building a summer encampment. The tract of land was purchased by the Chambers of Commerce of Roswell, Artesia, Carlsbad and Lovington.

Total recovery from the Hobbs pool was increased to 7,503,644 barrels from July 10, 1930, to February 28, 1931, according to a report just compiled by C. G. Staley, field umpire. There are 143 wells in the field capable of producing 1,122,935 barrels daily. Production during February dropped below 1,800,000 barrels and was set at 875,255 barrels.

Leo M. Meeker, president of the Arizona bank, operating company of a chain of banks throughout central and northern Arizona, has just announced the merger of the Bank of Chandler with the Arizona bank. The Bank of Chandler has resources of \$300,000. The merger, Meeker said, will give the Bank of Arizona and its branches total resources of \$4,500,000.

Members of the New Mexico meeting of the Order of Eastern Star elected new officers in Carlsbad. They are: Matron, Mrs. Edythe Neel of Santa Fe; patron, William Adair, Helen; secretary, Mrs. Jessie M. Morgan, Artesia; treasurer, Mrs. Bertha D. Ralph, Rincon; associate matron, Mrs. Fay Parrish, Las Vegas; associate patron, Gordon Allison, Barrio; conductress, Mrs. Iona Jones, Clovis; associate conductress, Mrs. Edith Turner, Silver City.

No arrests will be made in connection with the death of seven or eight men who used a twenty-gallon supply of poisonous alcohol as a beverage at a stag party at Raton, N. M. Fred Stringfellow, district attorney, said the alcohol had not been obtained at a filling station, as was at first believed, but from a drug store. He said he believed the beverage was wood alcohol, and added no blame for the seven fatalities could be attached to any one person.

There will be no early fishing in New Mexico this year—the season will open as usual on May 15, State Game Warden Edgar L. Perry stated in Santa Fe.

Machinery and equipment for five federal aid highway projects in eastern New Mexico has been moved to Resolutions and construction has started. Nearly all of the labor in eastern New Mexico has found employment on the five projects, the contractors said. The work totals approximately \$600,000 and must be completed by Sept. 1.

He Was Searching for Cinderella

By LEETE STONE

(C. 1931, McClure Newspaper Syndicate, Inc. (WNU Service))

IT CAME to pass that one could go hardly anywhere or become a part of any leisurely conversation without the name of Basil Jocelyn cropping up in one way or another. It was, "Basil Jocelyn's a judge of the contest;" "Did you listen to Basil Jocelyn on the radio last night?" or "Have you read Basil Jocelyn's feature story about Borneo in this week's 'Panorama'?" In other words, Basil Jocelyn, American, thirty-six, starting to run his race from the average intelligent home, possessing average intelligent parents; had become, somewhat before middle age, a figure of national importance, discussed more widely and of far greater glamour than the nation's President.

How come? A natural question! No one, of course, ever sees that shadowy flicker from the eyes of Fate that lifts one man to the peak of renown, and consigns another, equally endowed, to the multitudes of mediocrity; but without attempting to solve the riddle of Destiny, it can be truthfully related that the one tangible reason for Basil Jocelyn's great prominence was his overwhelming dread of monotony, of that state of mind called content.

That, coupled with a tremendously vital personality and an alert, keen mind had conducted him up among the feathery clouds that caress the summit of what poets call Parnassus. On his tenth birthday (he was an avid reader) his father had given him one of Richard Harding Davis's most fascinating yarns. That dated Basil's resolve to become a soldier of fortune. At that early age he had no inkling that such a trail might lead to fame; he only knew it was to be his life. He proved it by running away from agonized parents three times before he was seventeen and shipping for long voyages from strange little ports in leaky old freighters.

When the war broke, naturally, he did not wait for America. At the very first he managed, partly because of his fine jagged ability, a commission in the French Legion. He garnered all manner of decorations there, and the finish of the struggle found him an American ace. After the war Basil Jocelyn was to be found in every land from China to Australia, wherever the egg of adventure was about to be hatched. And the world knew about it, because he wrote his experiences for eager newspapers, thus making a modest subsistence which carried him from one arena of action to another.

Then suddenly Fate flickered the well known eyelash and Basil was famous. In 20,000,000 homes the family would glance at the clock about eight, saying one to another, "Come on; let's tune in; it's time for Basil Jocelyn." Basil was so famous he had to wear a grimy cap pulled down over ears and forehead and eyes, and turn up his coat collar, whenever he walked on Broadway, for fear of being pawed about in every block by celebrity hounds.

Basil, after prudently laying away well over a \$1,000,000, grew sick unto death of fame. It was to be expected that he would. One April evening, alone in his regal quarters, he felt a great rush of longing for companionship. Amazedly, Basil realized he wanted to marry. He glanced rather bitterly at a packing case in a corner of the room chock full of the month's love notes from Miss America generally. "A fine chance," Basil murmured whimsically, "of finding a pal and a companion at home." To want was to get with Basil Jocelyn.

Thus, a month later, he was to be found in Paris wearing an old tweed suit that had lived long in the service of adventure, and sporting a mustache and balding vandyke beard that rendered the Basil of countless newspaper photographs practically unrecognizable. And by day and night he frequented the real Paris that lies behind the scenes set for gaping tourists, looking—looking—always looking. He stole along behind the quays where one may often find the stuff of dreams.

It was at Marie's that he finally found her; Marie's, tiny, spic and span and strictly Parisian. Something electric passed between them as she glanced up from her Paris edition of the Herald and their eyes met in a long gaze. Basil invited himself over to her little table. They talked and drank their aperitifs together, and they hungrily devoured Nina's delicious dinner—talking like old friends. It developed that she, like Basil, was lonely, sick of a monotonous life, and craved true companionship.

"I'll see you to your pension," Basil said, as they rose. "Funny, isn't it? I feel as if I'd known you for months; but I don't even know your name!" The young woman hesitated, turned a bit away from him and said, "Oh, names! What do they matter? I'll tell you; but promise to forget it! I'm Rose Veldon!"

For the first time in his life Basil was staggered. Rose Veldon! Why, of course—that celebrated face; one of the truly worshiped queens of Hollywood.

"Well, I'll be . . ." he muttered lamely, "and I was searching for Cinderella. Oh, well! I'll own up now. I'm Jocelyn, Basil Jocelyn." "Let's play we aren't celebs," she softly said, "and please, Basil, share of these delicious whiskers so I'll know you next time."

HEADACHES

Needless pains like headaches are immediately relieved by Bayer Aspirin as millions of people know. And no matter how suddenly a headache may come, one can at all times be prepared. Carry the pocket tin of Bayer Aspirin with you. Keep the larger size at home. Read the proven directions for pain, headaches, neuralgia, etc.

Odd Reason for Haste to Finish That Letter

He was an old man from the country and, seeing his first typewriter in an office in the live stock exchange at Kansas City, he was entranced when Gladys Wilson, a pleasant young employee in the place, volunteered to write a letter for him on the machine if he would dictate to her. He started at a regular, measured pace but, as the end of the page approached, raced to so fast a finish that Miss Wilson barely could keep up with him. "Whew!" she said, breathing hard as she delivered the completed manuscript to him. "What was the grand rush at the end?" "I had to hurry before that contraction ran off the page," he answered simply.

Stomach Troubles Headache and Dizziness

If your stomach is sick, you are sick all over. If you can't digest your food you lose strength, get nervous and feel as tired when you get up as when you went to bed.

For 10 years Tanlac has restored to health and activity many thousands who suffered just as you do.

Mr. Daniel Vinciguerra, of 8200 Stiles St., Philadelphia, Pa., says: "I have not had a dizzy spell or a headache since taking Tanlac. My nerves are in better shape and I can enjoy a good night's sleep."

Let Tanlac help you too. It corrects the most obstinate digestive troubles—relieves gas, pains in the stomach and bowels, restores appetite, vigor and sound sleep.

Tanlac is made of roots, bark and herbs. Costs less than 2 cents a dose. Get a bottle from your druggist today. Your money back if it doesn't help you.

Immense Wistaria Vine A floral spectacle which has taken 37 years to perfect is blooming at Sierra Madre, Calif., at the home of Mrs. T. H. Fennell. It is a wistaria vine, which is more than 600 feet long and believed to be the largest of its kind in the world. It completely circles the Fennell home, and during the last decade has extended its twining branches on neighboring oaks and three large arbors constructed to accommodate its amazing growth.

Locarno Pen Missing It was recently stated that the gold pen, in the form of a goose quill, which was used to sign the Locarno treaty, had disappeared. This pen was lent by the Locarno municipality for The Hague exhibition last February. It was supposed to have been unpacked with a number of other objects lent by the Locarno municipality for the occasion.

Brought Down Her Elk Mrs. William F. Deatley of Lewiston, Idaho, shot a bull elk in the Clearwater National forest. The elk weighed 300 pounds when dressed. She got lost shortly thereafter and wandered twenty miles all night through eight inches of snow before she found her camp the next morning.

Peculiar Stunt One of the stunts at a meeting of the Maryland beekeepers was a bee-catching contest, in which the participants, bareheaded and with no protection for their faces, caught as many bees as possible, one at a time, keeping them in a wide-mouth bottle held in one hand.

Proper Location "That canary you sold me hasn't sung a note yet." "Shut him up in the bathroom."—Animal Life.

HOW YOUR NERVES?

Dinner—"Not so very long ago I was ailing and took some of Dr. Pierce's Favorite Prescription. I found it a wonderful benefit to me. It quieted my nerves and gave me strength and courage. Other medicines failed to be of any benefit to me so I am inclined to believe that 'Favorite Prescription' is the best of all."—Mrs. J. A. Stringfellow, 756 15th St. All druggists, fluid or tablets. Every package of Dr. Pierce's Favorite Prescription contains a bottle of Dr. Pierce's Compound Syrup of Sassafras. Send for it if you would an experienced member of any of Dr. Pierce's family medicines.

ELEVEN STATES SANCTION WEDDING OF GIRLS AT 12

United States Children's Bureau Gives Some Facts About Marriage Laws.

Washington.—Dame Rachel Crowley, British sociologist, recently said seven states in this country permit girls to marry at the age of twelve. The United States Children's bureau is sorry, but she's wrong. She should have said eleven.

This was admitted regretfully by the bureau officials to be the actual state of affairs if the most recent information in their files is accurate.

Dame Crowley, former chief of the social questions section of the League of Nations, in a speech at Philadelphia contrasted the child marriage laws of this country with those of India, Turkey and Japan, which, she said, set a sixteen-year limit.

She said Europeans were somewhat amused at "the moral indignation

Americans exhibit against child marriages sanctioned in the Orient."

"Marriage at young ages is not common with us, and it is to be regretted that it is legal," was the comment on this of Miss Grace Abbott, chief of the children's bureau. "And, as is always true of the United States, in our 48 different jurisdictions, we have examples of some of the best as well as some of the poorest."

From Russell Sage foundation studies and other sources, the roster of states making twelve years the minimum marriage age for girls, follows: Louisiana and Virginia, fixed by statute; Florida, Maine, Rhode Island, Tennessee, fixed by judicial decision under common law; Colorado, Idaho, Maryland, Mississippi and New Jersey, in which it is presumed the common law applies.

Kentucky, Pennsylvania and New York, which were in that same list six

The Plains Of Abraham

By James Oliver Curwood

Illustrations by Edwin Maynard
Copyright by Doubleday, Doran, and Co., Inc.

THE STORY

With his English wife, Catherine, and son, Jeems, Henry Bullain, French settler in Canada in 1749, cultivates a farm adjacent to the Tonteur seigneurie. As the story opens the Bullains are returning from a visit to the Tonteurs. Catherine's wandering brother, Hepsibah, meets them with presents for the family. To Jeems he gives a pistol, bidding him perfect himself in marksmanship. Jeems fights with Paul Tache, cousin of Toinette Tonteur, whom they both adore. Next day Jeems calls at the Tonteur home and apologizes for hawking in front of Toinette. The Tonteurs go to Quebec. Four years pass. War between Britain and France flames. Jeems returns from a hunt to find his home burned and his father and mother slain. He goes to the seigneurie and finds the manor destroyed. Tonteur and his servants dead. Believing him an enemy, Toinette wounds Jeems and denounces him as an Englishman.

CHAPTER VI—Continued

Jeems scarcely knew he spoke the words. They rang back through the years as if a ghost had come to life whose memory they had stayed out of their hearts a long time ago.

"What are you doing here?" she demanded.

She might have asked that same question in those unimportant years when he had dared to visit Tonteur manor with his foolish gifts. Why was he here? He turned in the direction from which he had come and held out his hand, not for her to take, but as a voice. She understood what his burden had been. Tears? Such trivial things could not exist in the after-heat of the holocaust that had consumed them. Pride, defying grief, raised her chin a little as she obeyed Jeems. She knew to what she was going. And when she came to the place which Jeems had prepared, she was like a white angel who had appeared to gaze for a moment or two upon the dead.

With a tool he had found, Jeems had made a grave. It was shallow and made less unbecomingly with a bed of golden grass. Tonteur did not seem unhappy as he lay upon it. The top of his head was covered so Toinette could not see. She knelt and prayed, and Jeems drew back, feeling that to kneel with her, with the marks of her hatred on his face and body, would be sacrilege.

Even now, when it should have known better, the mill wheel continued to whine and scream, and suddenly it occurred to Jeems that it could not have been that way yesterday when Tonteur was alive. A devil must have come to abide at the top of the mill!

He waited, scanning the horizons that were thinning of their smoke. Death had passed and death might return over its own blackened trail. Toinette, beside her father, made him think of that. It seemed a long time before she rose to face him. She was not crying. Her eyes were blue stars in a countenance as pale as marble. The sun shone on her and gave an unearthly radiance to her hair. Her beauty held him stricken just as his own terriblest forced from her a gasp of protest when he drew off the coat borrowed from one of the dead men and spread it over Tonteur. But she did not speak. Only the mill wheel continued its virulent plaint as the loose earth fell on the baron. Toinette looked steadily toward the sky, and when Jeems was done she accompanied him back to the mill. She watched him go for his bow, where he saw that the form he had thought was Toinette was the wife of Peter the Younger.

He came back and spoke to her a second time. The lips she had broken with the musket barrel were swollen, and the brand across his forehead was turning a dark and angry color. The cloth he had twisted about his wounded arm was red. Sickness and pain were forcing their way into his eyes. "I must take you away," he said. "There is not time to care for the others. If they come back—"

"They will not harm you," she said. Jeems made no answer but looked away over the Richelleux toward Champlain and Dieskau.

"And they will not harm your father or your mother or anything that belongs to the Bullains, but will reward them for their loyalty to murder and outrage. Is not that true?"

Still Jeems did not answer, but stood listening for sound to come out of the distance.

She saw the sickness gathering in his face and eyes, but pity for him was a dead in her breast as her desire to live. She knew where he would take her. To his home—a place left despatched by the killers. To his mother, the soft and pretty woman in whom her father had believed so faithfully. To Henri Bullain, the traitor, who had bartered his honor for an

English woman. Over her father's hill, in Forbidden valley, were safety and mercy at the hands of her country's enemies.

Her lips found a way to cut him deeper.

"Your father and mother are waiting for you," she said. "Go, and leave me here. I prefer to wait for the return of your Indian friends. And I am not sorry because I tried to kill you!"

He moved away from her to where Hebert and Juchereau and the simple-minded, Roudot lay on the ground. This time it was the idiot's coat he took, a fine coat made by the idiot's mother. The boy had loved birds and flowers, and on the lapel of the coat was a faded geranium bloom. Jeems took it off and tucked it between the dead lad's fingers.

Then he went back to Toinette and said, "We had better go." After that he added, "I am sorry, but I must go to my mother and father first."

He staggered as he set out, and Tonteur hill dipped and wobbled before his eyes. There was an ache like a splinter twisting in his head, and as she followed him, Toinette could see the effect of her unrealistic blows with the iron gun-barrel. For she did follow, out of the smoke fumes into the clearer air of the meadows and across them to the worn path that led to the Indian trail and the home of Catherine Bullain.

"They're down there," said Jeems, and pointed, speaking to Odd more than to her. He took the hatchet from his belt and carried it in his hand. They entered the greater stillness of the Big forest, and Odd, who had traveled between them, dropped back to Toinette's side and thrust his muzzle against her hand.

She did not snatch it away from him now. They came to the slope, and Jeems forgot that Toinette was behind him. He walked straight down like a tall, thin ghost—and the girl stopped and stood alone, staring at the place where his home should have been, a cry wringing itself at last from her lips.

Jeems did not hear. He saw nothing but the clump of rose bushes and the place where his mother lay. He went to her first, oblivious of other presence, unconscious of the sun, of the ruins still smoldering, his soul stirring once more with the faint mad spark of incredulity. But she was dead. He saw her with clearer eyes, though he was sick with hurt. He knelt beside her calmly for a little while. He touched her face gently with his hand, and then went to his father. Odd trailed at his heels. In the stump field was a shored. Under his mother's big tree he planned to die.

When he returned, his mother was not alone. Toinette was there, on the ground, with the English woman's head in her lap. Her eyes blazed up at Jeems, and something like defiance was in them, something that was possessive and challenging and which hid whatever pity she might have had for him, or pleading for his forgiveness. Her hands were pressing the cold face of the woman she had wanted to hate, and she continued to look at Jeems, so hard, so terribly, so understandingly that she seemed almost to be waiting for him to punish her with a blow.

Then she bowed her head over his mother, and the shining veil of her hair covered death.

Under the big tree he began to dig.

It was late afternoon when they left the valley, a still, slumbering hour when the sun was about to go to its early rest, leaving glows and sunset paintings behind that might have been made of swimming metals. Toinette's hand lay in Jeems' as they went.

They were like a young god and goddess ready to face the hazards of a savage world with a strength wrought out of fire. The sickness had

Roman Historian Wrote of "Noble" Caledonians

Picts is the name by which, for five and a half centuries—206 to 544 A. D.—the people that inhabited eastern Scotland, from the Forth to the Pentland firth, were known. In certain chronicles they are styled Picti, Pictones, Pictores, or Piccardaig—all forms of the same root; but sometimes the native Gaelic name of Cruithnig is applied to them, and their country called Cruithen-both, the equivalent of the Latin Pictavia and Old Norse Petland, which still survives in the name of the Pentland firth. In their wars in Britain the Romans came into collision with the Picti. One Roman or Latin writer of that time speaks of "the Caledonians and other Picti," which implies the inclusion of the former in the latter people. The well-known Roman historian, Tacitus, calls Scottish north

left Jeems. His wounded arm was cared for by fingers as gentle as his mother's had been. Hot tears caressing his flesh from Toinette's dark lashes had cured his physical pain. Words spoken in a voice he had never heard from her lips entreating his forgiveness for years of misunderstanding were like the peace of the day itself about his heart. Out of ruin she had raised his soul to splendid heights of courage and resolution.

They passed his mother's gardens of flowers where choice blooms were nodding, filled to overflowing with ripening seeds; they skirted the turnip field where a purple-breasted crow lay waiting for spicy frosts to give crispness and flavor to its flesh. In a place where fresh dirt was scattered about were tools used yesterday—axes and shovels and hickory prying poles and the big double-bladed grub hoe which Hepsibah had made at Tonteur's forge. On a stump partly dug from the earth was one of Hepsibah's pipes made of half a cornucob with a hollow reed for a stem.

Jeems stopped and looked about, his throat almost tensing for the old familiar call to Hepsibah. But the stillness warned him. Like a friend it was whispering the sacredness of another trust. His eyes turned to the lovely head near his shoulder. In a moment Toinette raised her eyes to meet his, and even with his mother they had not been so deep and gentle.

"They must have caught my uncle out there," he said, keeping his voice steady and gazing over the forest tops of Forbidden valley. "He set the signal fire for us and then was killed. I would go and find him, if it were not for you."

"I will go with you," answered Toinette.

But Jeems turned west and did not look back at his home or betray the choking in his breast. He found himself talking to Toinette as if she were the child of the old days, and he, changed into a man, were explaining things. He described for the first time how the savages had come while he was on his way home from Lussan's place, and gave his reasons for believing they had departed in haste, leaving many things, like the gathered crops of fruit and grain, which they would surely have taken had they not been pressed by circumstance. He was sure they had not gone farther down the Richelleux but had turned back through Forbidden valley to the Mohawk country. Their own hope was to swing westward out of the path of stragglers, then eastward again toward Lussan's. Tomorrow or the day following, he would have her safely at the next seigneurie, and there she would find means to be taken to her friends in Quebec. He would then join Dieskau to fight the English. The important thing was to reach Lussan's tonight. The Indians would not go near there, for they believed all abandoned places to be inhabited by ghosts and evil spirits. If they stumbled upon it by accident they would get away as quickly as possible.

He still held her hand as darkness gathered closer. In this gloom she whispered:

"Does your arm hurt, Jeems?"

"No, I had forgotten it."

"And your face—where I struck you?"

"I had forgotten that, too."

Something touched his shoulder lightly. He could not tell what it was, for they were in a pool of darkness. But whatever it might have been, a falling leaf, a twig, even shadow itself—it filled him with a strange exaltation. Out of the wreck of a world obliterated in a scourge of horror he had a soul beside his own to fight for.

Twice in the next hour Odd halted and gave a growl which warned of danger in the air. Jeems strained his eyes to see and his ears to hear—and once more, when they stopped to listen, he felt the gentle touch against his shoulder.

They struck a deer run and followed it into a plain between two lines of hills where a devastating fire had passed some years before. Here they traveled through a young growth of bushes and trees, reaching scarcely above their heads, with the light of the stars falling on them. It stirred a soft radiance in Toinette's smooth hair and illumined Jeems' face until the wounds made by her hands were plainly revealed. They climbed the northernmost hill after a time, and at the top of it stopped again to rest.

Jeems, like Odd, stood tense and listening, searching the slumberous distances of the wilderness which lay about them. He caught all movement and all sound, the direction of the wind, the shifting play of the shadows, the almost noiseless flutter of an owl's wings over their heads.

(TO BE CONTINUED.)

Small Boy Honored

The little boy buried in Arlington cemetery and called the "Little Corporal" was the son of Sergt. Frank Lanston, General Pershing's orderly during the World war, and was always called Little Corporal by the general. He is buried in the civilian portion of the Fort Myer post section of Arlington.

LIVE STOCK NEWS

LIME NECESSARY IN STOCK RATION

Tests Show Need Is One Per Cent Per Animal.

How much lime is needed in an animal's ration? This is one of the most frequent questions asked about animal feeding.

Hurry Steenbock, and his associates at the University of Wisconsin, have now demonstrated that the greatest amount is 0.5 to 1.0 per cent of the ration, expressed in terms of calcium carbonate.

Of all the vitamins that have been isolated and studied by nutrition workers, vitamin D, the factor responsible for lime assimilation and the deposition of lime in the bones, has attracted the most widespread interest because it is the vitamin most likely to be lacking in the ration of farm animals and in the diet of humans.

For years fundamental studies of the nature of vitamin D and the factors responsible for calcification in the animal body have been under way at the Wisconsin agricultural experiment station.

Recent findings of Steenbock and his co-workers regarding factors in certain foods which interfere with the normal process of lime assimilation in the body add support to theories advanced by the noted English research chemist, Mellanby. That these factors can be much reduced in power by specific treatment of the foods before including them in the animal's ration has been thoroughly demonstrated in the Wisconsin studies carried on this past year.

By subjecting rolled oats, wheat, corn and rice to heat treatment Steenbock found that the calcifying properties are improved.

Great Damage Done by Warble Fly in Summer

The other day a merchant who dealt in long leather things bought a steer hide from a wholesaler. When it reached his shop he started to cut it into the longest strips he could he found out why it was he had been able to get it for 35 cents per pound, as compared to the price of \$1.50 which had been asked for the same quality leather unblemished. Well up on the rump a large brand had been burnt in the hide, burnt almost completely through the skin, while along the back were several tell-tale holes, the work of the warble fly. Branding is no doubt a necessity for ranchers whose stock roam the open range, but why cannot the mark be placed on the neck or other less valuable part of the hide than the rump or side. With regard to the warbles most farmers are by now aware of the trouble which they cause cattle during the summer when on pasture, and the lowered value of warbled hides, and many make half-hearted efforts to eradicate the flies by squeezing the grubs out of their animals' backs.

Experiments in Feeding Beef Calves for Market

Live stock growers and feeders are interested in cutting the cost of production of the market animal. One of these methods is to use as large a portion of roughage as possible to replace the higher priced grain feed. With this thought in mind a number of experiments in feeding beef calves for market have been conducted at the Michigan state college. It has often been said that the production of baby beef is a special project which requires expert knowledge of cattle feeding. This tradition has been upheld repeatedly when these vigorous youngsters have outstripped the older cattle in the feed lot. It is an outstanding fact with any class of live stock that the younger the animal the more pounds he will add to his weight on a given amount of feed.

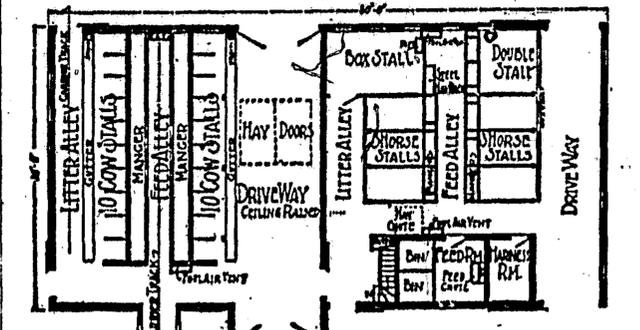

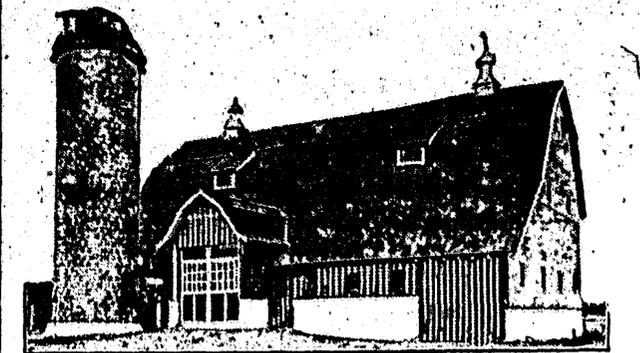

Overworked Horses and Mules Need Treatment

In the spring, when the temperature is 75 to 80 degrees Fahrenheit, soft mules and horses are quite easily overworked and may sweat excessively, give out and sometimes develop very rapid breathing, rapid heart action and show nervous symptoms or become sleepy, drowsy and sluggish. When such cases begin to show signs of exhaustion take them out and rub them down. In the heat of the day, they may be bathed all over with tepid or warm water, then rubbed dry. A little cool water may be applied to the head. Such sick horses or mules should not be fed until they are cooled out and rubbed down. Then give a little feed.

Pure Bred Sheep

Men who breed pure bred sheep must of necessity have at least three flocks at this time of year. Don't leave the ram and ewe lambs together too long. First, because you must not permit these ewe lambs to bring a lamb at one year old. The lamb is seldom of much value and the ewe is stunted for life. Another thing if a lamb resulted how would you register it? The answer is such a lamb is not eligible to registry because you can't be sure of the sire.

Ideal Combination for Average Farm Is Dairy Barn and Silo

COMBINATION HORSE & DAIRY BARN

By W. A. RADFORD
Mr. William A. Radford will answer questions and give advice FREE OF COST on all problems pertaining to the subject of building work on the farm, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on the subject. Address all inquiries to William A. Radford, No. 407 South Dearborn street, Chicago, Ill., and only enclose two-cent stamp for reply.

Farmers at the present time are not liable to be the most cheerful people in the world, but they are always good gamblers. Year after year, in some communities the crop has failed entirely, yet the men have come back the next year and tried it over again. Just because prices are not as high as they might be to give the farmer a fair return on his investment and labor is no sign that the farmer will discontinue operations. In fact, the man who was farighted enough did not depend entirely upon grain crops, but built up a dairy herd that would bring in a regular return summer and winter. Building on the farm will not stop because many farmers will store their crop until a favorable turn in the price trend.

But there is no doubt about the value of a herd to keep up the income in all sorts of weather. And to keep this herd the first consideration outside that actually of selecting the stock is to provide a suitable and efficient building in which the herd can be housed. For contented cows will produce more than those who must practically make their own way and get barely enough shelter to protect them from the elements. Dairy cows are highly geared machines that require care and attention. They require healthful surroundings if expected to yield results.

A barn such as that shown in the illustration is an ideal building from many points of view. It is sturdy in construction, roomy, well arranged and not at all displeasing to look at, although that is the least worry about this type of building. It is built of frame planks placed vertically, with vertical battens insuring an air-tight wall. This is set up on a solid concrete foundation. The roof is gambrel, with a large lean-to on one side providing extra rooms on the lower floor for special workrooms, etc. At one end of the barn is a large 12-foot hollow tile silo, which will hold a vast amount of green feed for the winter. It is connected directly with the various stalls by a carrier track, over which a feed carrier operates.

Directly back of the silo are the cow stalls, 20 in all, facing in toward a central feed alley. A carrier track runs over the litter alley to the outside manure pit. This carrier system greatly lessens the work of the help around the barn and relieves them of the heaviest work of all, wheeling the feed and litter to and from the stalls.

Running through the center of the barn from front to back is a high driveway, with double door entrance in the front of the barn. The ceiling over this driveway is higher than the regular barn ceiling and in the center of the driveway are hay doors, through which the hay from the wagons or trucks can be lifted up into the haymow which covers the entire upper floor of the barn. Because of the gambrel roof this storage room is enormous and will hold a vast amount of hay and feed.

On the other side of the driveway is the horse section of the barn, and some special rooms. There are six regular horse stalls, one box stall and a double stall. These stalls are of the latest type and face a short feed alley, at the end of which is a steel hay rack. In front of this horse section are the feed and harness rooms and several bins for mixing feeds. A feed chute from above empties into the

main feed room and a hay chute is located in the small passageway outside.

This building, while costing a little more than a poor barn, will soon pay for its cost. It will help to stimulate production and, just as important, promote satisfaction among the help. Satisfied help is cheaper than a continually changing personnel. Better farm buildings will do much to cut down the cost of farm operation.

Plaster Cracks Can Be Mended by Home Owner

Cracks in plaster are a bane to every home owner. Fortunately, most of such cracks can be repaired by the home owner himself with no more trouble than is expended on any of the average jobs that he does around the house. Care should be exercised, however, to use a regular patching plaster which has been manufactured specially for such work. This will insure a good job. Such a patching plaster can be purchased in two and one-half and five-pound packages and requires only the addition of water to make it ready for use.

Homes Cooled by Gas Is Engineers' Forecast

A new type of automatic gas refrigerator, which gas engineers believe may lead to house-cooling systems, has been announced by the American Gas association. Experiments have been conducted on the refrigerator for six years, the association states, but only recently has it been feasible to make public the construction of the first commercial units. Differing from all previous gas refrigerators, the new one employs water as the refrigerating fluid, air instead of water for cooling and necessary vapor as the source of energy.

FAMILY WASHING

Laundry called for and Delivered. Phone 50

LOCAL AND PERSONAL

Ike N. Wingfield was a visitor Monday from Ruidoso.

Professor and Mrs. Gillette and Miss Davis spent the week-end in El Paso.

Mr. and Mrs. Joe Went and Joe, Jr., visited relatives in Clouderoff last week-end.

Mr. and Mrs. Dewey Stokes and Dewey, Jr., were week-end visitors in El Paso.

Evelyn Grumbles was home for the Easter season from the Arizona State University at Tucson.

The County Board of Education was in session the first days of the week, all members present.

Mr. and Mrs. A. M. Reily were here with their respective families over the week-end from El Paso.

For Sale O. M. Franklin Black Leg Bacterin; and Black Leaf 40. The Titsworth Company, Inc.

Corona was down in force the first of the week - school interests, taxation and other matters bringing the contingent.

FOR SALE - A Majestic Range in good condition. Inquire at this office.

Miss Alis Keller, school friend of Miss Ruth Brickley, at the University, spent the Easter period with the Brickleys here.

Supt Koogler and a number of patrons of the Capitan School were here Monday, presenting matters to the County Board of Education.

J. V. Tully, B J Bonnell and S. W. Land were here Monday from the Glencoe country, looking into matters connected with county affairs.

Mrs. Louis E. Cummins and children were here Tuesday from Capitan to meet the mother and grandmother, Mrs. W. H. Sellers, who arrived from Los Angeles that day for a visit.

The Bonito dam is now backing up water in the basin above. The work was completed in time to catch the excessive flow of the stream, which, at this season, is flowing freely from the melting snow.

Alto Items

Alto Community gave an Easter picnic and egg hunt Sunday. A large crowd was present; all having a dandy time.

Mr. R. V. Traylor and Miss Juandell Shook our two teachers gave an egg hunt for the school Saturday. The one finding the most eggs was to receive prizes, June Hagee found the most for the larger children. Donald Peebles receiving the prize for finding most for the smaller ones. Both received a basket of candy Easter eggs, that Bunny had just laid.

Alto School has been quite a success this term. We hope to be able to keep Mr. Traylor and Miss Shook, for we believe they are to blame for such success.

Montie Gardenhire was out from Capitan Sunday and joined us in our Easter egg hunt.

Percy Parker was also a visitor with Alto friends, Sunday.

Roads are dry now, permitting the school bus and other traffic to get along but needs quite a bit of repairing.

Mr. Burkhead is doing some bean hauling for Mr. Egger, his father-in-law.

Ray Tipton is still on the job hauling for Mr. Harris.

Mr. Harris says he may come back to the dear old mountains to farm once more; we hope he does.

Mrs. J. S. Bailey is up from Roswell, spending a visit with Mrs. Clifton on Little Creek.

The Capitan play given by the Junior Hi was quite a success. A number of Alto folks attended.

Mr. and Mrs. M. C. West have been in El Paso a few days helping to nurse their daughter, Mrs. Arent who has been ill for some time.

We will all start planting corn and gardens soon now, as Easter has come and gone and greeted us with such warm weather.

Ancho News

Mr. and Mrs. Don Downing of El Centro, Calif. were thru here Saturday enroute to Corona where they will visit relatives.

Leonard Hall, young son of L. P. Hall, is in Albuquerque for medical attention.

R. E. P. Warden was here this week from Santa Fe.

Ralph Hall, student in Carrizozo Hi, spent Easter vacation with his parents, Mr. and Mrs. J. E. Hall.

Mrs. R. E. P. Warden, Misses Maudie and Mary Pickett Warden, Mr. and Mrs. Fred Sweet, Alx Pambrough and others attended a party given at the home of Mr. and Mrs. Willie Gallagher on April 1st.

Mrs. Barney Wilson and Miss Edwina Peters were in Alamogordo last Saturday.

Mrs. T. J. Straley is home after having spent winter months in El Paso.

Mrs. L. L. Peters spent a few days in Carrizozo last week.

The school is preparing an Arbor Day program for the 16th at which trees donated by various friends will be planted.

The Woman's Club met at the home of Mrs. Elbert Brown at Coyote, Saturday, April 4th, with a good attendance. Three new members, Mesdames Curtis Weathersbee, Grover Pruett and Hubbard, were added to the Club. The meeting opened with roll call to which each member responded with a short description of some recent invention. After a somewhat lengthy business discussion, the meeting adjourned to enjoy the elaborate social distractions provided by the hostess, who used the Easter motif in decorations, games and refreshments.

Mrs. L. L. Peters won first prize in the word contest and Mrs. S. J. Pruett, who found the largest number of Easter eggs, was also rewarded with a prize. Mrs. Brown entertained the Club with an interesting account of her recent visit to the Carrizozo Club, which she found both interesting and instructive and from which she brot home several ideas for the inspiration of the Ancho Club. After hilarious game of "Coo-Coo," the members departed assuring the hostess that they had never more thoroly enjoyed a club meeting.

Among the various business matters discussed and voted upon was the examination of the manuscript for the year book which was passed with enthusiastic approval and the committee highly complimented.

By the next meeting, the books, attractively bound in green and white, club colors, will be in hands of the members.

The fence for the school house is now an assured fact. The wire has been ordered, thanks to the liberal donations of Mr. C. M. Harvey, of El Paso; The Charles Ifeld Company, of Santa Rosa and the Titsworth Co. of Capitan, all of whom take a kindly interest in Ancho. The posts are being donated by patrons of the school, and as soon as the wire arrives, a day will be set for the fence building, at which the Club women will supply a good, hot dinner to the workers.

The Woman's Missionary Society of Carrizozo will present its play - "Wanted - A Man" - at Corona Saturday night, April 11 at the High School Gymnasium, sponsored by the Sunday School of Corona.

Od Tuesday, April 14, it will be presented at the High School Gymnasium at Capitan, sponsored by the Woman's Missionary Society of Capitan.

The play met with great success when presented at Carrizozo, netting the Society \$85.00.

"Wanted--A Man"

The Woman's Missionary Society of Carrizozo will present its play - "Wanted - A Man" - at Corona Saturday night, April 11 at the High School Gymnasium, sponsored by the Sunday School of Corona.

Od Tuesday, April 14, it will be presented at the High School Gymnasium at Capitan, sponsored by the Woman's Missionary Society of Capitan.

The play met with great success when presented at Carrizozo, netting the Society \$85.00.

Ziegler Bros.

The Methodist Church

One hundred and seventeen in Sunday School last Sunday morning. This is fine. Let's keep it up. Through the generosity of the Rolland Drug Store each pupil received a generous treat of candy Easter eggs. Mr. Braek Sloan took Mr. J. E. Hall's class of boys across the Mal Pais where they had a campfire dinner; all report a big time. There are more good times in store for them. And it won't be long now until time for the big Sunday School picnic.

There was a large attendance at the combined Rainbow Girls and Easter service Sunday night. Mr. Raymond Lackland sang "The Holy City" accompanied by Miss Louise Sweet with the violin and piano. That was, indeed, a treat, we hope for more soon.

Services next Sunday morning and evening. Mr. Crokovich will sing a solo in the evening service.

The new roof is on the church building, and workmen are busy this week brightening up the interior. Let us have another big day next Sunday. Be at Sunday School and church service in the morning and at church again in the evening.

New Stage Line

George Harkness has established, or extended, a new stage line from here to Tularosa. Mr. Harkness carries mail and passengers on the Carrizozo-Roswell mail route, and he has made the aforesaid extension to accommodate the traveling public at both ends of the line. For arrival and departure of the buses and for fares, see schedule appearing in this issue. The rates are reasonable, the service prompt and secure.

Notice

On the 20th of March, 1931 at the hour of 4:00 p. m., my wife Regujia Arrias, left my home. Therefore I will not be responsible for any debts she may secure, from now on.

Felix Arrias.
