Successor to Carrizozo News

VOLUME VII—[Carrizozo News, Vol. 25]

CARRIZOZO, NEW MEXICO, FRIDAY, APRIL 29, 1932

NUMBER 11

White Oaks News

One of the saddest and most touching events of the year was the passing of Miss Ida Gertrude Leslie. She died of pneumonia Sunday, April 24.

Gertrude has lived all her life in White Oaks and has endeared herself to everyone. She has always taken an active part in the Sunday School work here and was an Assistant Librarian of the Friday Night Club.

She leaves to mourn her loss, a father and mother, Mr. and Mrs. Robert Leslie; four brothers, Ben, Jim, Zane and Bobbie; two sisters, Flora and Dorothy, besides many other relatives and a host of friends.

The funeral was held from the White Oaks church Tuesday, April 26th, with Rev. L. D. Jordan officiating. The Junior Class of the Carrizozo Hi School, of which Gertrude was a member, had charge of the services. The Junior girls were flower girls and the Junior boys were pall bearers.

Music was furnished by Misses Eyrard and Herringa, with Miss Mejias at the organ. "Does Jesus Care," "Beautiful Isle of Somewhere" and "Safe in the Arms of Jesus" were sung.

Interment was in Cedarvale cemetery.

The storm which hit White Oaks last week prevented the regular meeting of the Friday Night Club. Due to the death of Miss Gertrude Leslie, the social H. B. Hamilton El Paso

scheduled for next Friday has been cancelled.

Miss Minnie Schale has returned to El Paso after a visit with her sister, Mrs. Wayne Van Schoyck.

Tommy Cook attended the I. O. O. F. lodge meeting in Carrizozo Tuesday night.

Mr. and Mrs. Walter Gage have returned from Corona where they were visiting Mrs. Gage's mother, Mrs. Downing.

Court Items

Judge Harry P. Owen of Las Lunas, arrived last Sunday and is conducting district court this week. A number of cases have been handled and they hope to clear the docket at this session of court.

The State vs. Jose Analla charged with assault, jury brought in a verdict of acquittal.

In the case of State vs. Heck Johnson, for giving fraudulent check, the prosecuting witness failed to appear in court. The case was dismissed.

Poz Otero pleaded guilty to the charge of larceny of meat cattle. Sentence of not more than one year in the penitentiary and a fine of five hundred dollars.

Following is a list of some who are attending court: J. V. Tully, of Glencoe; Jas. Stacy, north of Capitan; Robert C. Dow of Carlsbad; Ino Lawson of Alamogordo; H. B. Hamilton, El Paso

Alsop-Awe

We read in Tuesday's El Paso paper that Miss Cleone (Peggy) Alsop became the bride of Dr. Chester D. Awe, April 26th in El Paso.

Miss Alsop is quite well known here, having nursed at the Johnson hospital for several months. She also nursed Mr. Haley during his last illness and has a great many friends here who extend good wishes and congratulations.

She is a graduate of the nurses' training school of the Masonic hospital in El Paso. Dr. Awe is a graduate of the University of Iowa, and has been a practicing physician in El Paso the past four years.

The Woman's Club of Carrizozo

The District meeting of Women's Clubs was held in Alamogordo last Saturday. Those who attended from here were Mesdames Clouse, Branum, Stimmet, O. J. Snow, Lemon and Baughner.

Mrs. C. A. McCommon requests all ladies who volunteered to sell chances on the Afghan to please report to her at once.

The County School Board was in session last Monday with all members present, and Mr. McQuillan presiding. Many educational matters were discussed and a number of teachers hired.

Rolland--Corn

News was received here last Saturday by Mr. and Mrs. A. J. Rolland, of the marriage of their daughter, Miss Margie to Mr. Poe W. Corn of Roswell. The marriage was solemnized at Bernalillo, New Mexico, September 15th 1931.

The young people are both students of the University of New Mexico at Albuquerque. Miss Margie is in her second year, while Mr. Corn will graduate this summer, with an A. B. degree.

The bride was born and reared here and is one of our most accomplished and attractive young girls. She was an honor graduate from the local High School two years ago, being Valedictorian of her class. She was also an excellent basketball player and was captain of the team. She is a member of the Alpha Chi Omega sorority.

Mr. Corn is a graduate of the Military Institute of Roswell; is not only an excellent student, but is a young man of high standing and character. He also majored in athletics; plays football and has starred in basketball the past two years.

Miss Margie's many friends extend congratulations and good wishes for the best of everything.

Democratic County Convention

A Democratic County Convention is hereby called to convene in the High School Gymnasium, at Capitan, New Mexico, Saturday, May 7th, at 1:30 p. m.

The purpose of said meeting is to elect 12 delegates, from Lincoln county, to the State Democratic Convention, which will meet in Clovis, New Mexico, May 16th; to elect a National Committeeman for New Mexico. One delegate is allowed for each ten votes or major fraction thereof cast for Governor Seligman in 1930.

The said County Convention will be composed of 112 delegates based on the vote cast for governor in the last general election, and is apportioned to the respective precincts as follows:

Precinct	Name	No. of Deles.
1	Lincoln	14
2	Hondo	10
3	Arabela	2
4	Picacho	4
5	Rabenton	1
6	Encinosa	1
7	Jicarilla	1
8	White Oaks	6
9	Capitan	12
10	Ruidoso	9
11	Nogal	6
12	Bonito	4
13	Corona	11
14	Carrizozo	32
15	Oscura	2
16	Ancho	4
17	Spindle	1
18	Joneta	1
19	White Mt'n	1

Total 112
Herman E. Kelf,
Chairman.

Mr. and Mrs. Allan Johnson and Mr. and Mrs. Wayne Hamilton and Miss Aileen Haley visited relatives here Saturday and Sunday.

Depression Party

Last Saturday evening Mr. and Mrs. J. V. Taylor entertained the preachers and teachers of Carrizozo and Oscura at a very hilarious "Depression" party at their ranch home. All guests were met at the gate and handed a plate, cup, napkin and other eating implements done up in a bandanna handkerchief, which they carried over their shoulders on a stick. Everybody had to do a stunt to pay for their supper. Rev. Lawson won first prize for the best stunt. This prize was a jar of peaches tied with ribbon. Mrs. George Dixon won first prize for being the tackiest dressed lady present. Her prize was a box of apples. The bandannas were retained as party favors.

Mrs. J. M. Beck spent Thursday in El Paso.

Miss Helen Rolland spent part of last week in El Paso nursing. She returned home the last of the week.

Those in need of building materials will do well to read the Western Lumber Company's ad in this issue.

Ray Hobbs of Ancho was in town this morning, then went on to El Paso to enter William Beaumont hospital.

Mrs. Nellie Branum, daughter, Mrs. Clouse, son Clinton and wife and baby are spending the week end in El Paso.

Mrs. Rentfrow entertained in Contract Bridge club at her ranch home Wednesday evening. Mrs. Claude Branum won high score; Mrs. Harry Miller was presented with a lovely guano prize.

This is the time of year to paint up and make things attractive. Read the Carrizozo Hardware Company's economy prices—page 8.

Mr. and Mrs. Poe W. Corn, (nee Miss Margie Rolland), and Jane Spencer were here from the State University the past week-end visiting their parents.

MEMORIES PICTURES

Will lessen a little of the loneliness for you when your children, now small, have grown and flown the old nest. Thirty years from now, the pictures taken today will refresh your memory and you will appreciate the little things you are too busy to notice now :: :: ::

CHAPTER XIII—Continued

"What did you do to Turner down in the jungle?" the lieutenant asked. "Double-crossed him," said Ashley. "What do you want—details—for?" Double-crossed him. What else makes a man mad for ever? We were all crazy. What do you think we were doing? Keep on guessing. We were hunting for Inca gold. Beat that! I don't want even to think of it. You've got a general idea of the story. Guess at the rest of it.

"We didn't do much to him, considering who we were and where we were. Just stole his map—he had a map—all these things start with maps—and left him to die. He didn't have a chance; fever. The trouble was the tough old devil didn't die. I'll say for Blair that he did want to shoot Turner or knock him on the head, but that would have been murder, and, Lieutenant, you know how we feel about murder.

"We restrained Blair. He always was too downright. He said we'd go to get help for Turner. His map was no good. No map ever is. We just barely got out alive. And we couldn't have found our way back to him if we had wanted to. We didn't want to. I don't know how Turner ever found his way out. I never asked him, and he never mentioned it. All in a lifetime, both ways. You can always laugh it off or fight it out."

"You say you stole his map? What map?" "The Inca gold map; where it was buried. There's always a map with buried treasure. That's the whole story. Turner was a man to do extraordinary things, crazy things. He liked them. He wanted his money hard, and he didn't object to making it hard. Generalized detail, but he liked gold. I guess he liked the look and feel of it. He liked to hear the ring of one of his own double eagles on a bar. He liked to feel the weight of a money belt around his waist, and if he was carrying it in a gambling town or oil field or mining camp he was happier. A great guy. He was the fellow who was born to hunt the pot of gold at the end of the rainbow and probably find it. Free handed fellow, and square."

"The square fellow you double-crossed," the lieutenant said. "You make murder seem like a public duty."

"Isn't it the truth? Too bad you can't always pick the fellow for your dirt. You have to take them as they come. Spanish gold, that was what Turner was headed for. Some fellow had sold him a map. He wasn't the only one who ever went for buried treasure. They're at it yet. There are some fools hunting for that Inca gold right now. They'll keep at it, couldn't you get a little excited by a map showing Spanish gold, Inca gold? Turner picked up a gang and went for it. Most of us were broke. He got Blair and me off a cattle boat at New Orleans. Roberts had been trying to stake himself for another whirl of the gambling joints. Clayton he had found looking in St. Louis. Clayton wasn't broke. He had been with Turner before, on some Alaskan prospecting that didn't turn out. I think he found Tremble and Brown in Memphis contemplating some way of filling their pockets from some other fellow's pockets. There wasn't much to it. All of us took Spanish gold on the brain. Turner got sick in the jungle. We stole his map because he wouldn't give it up, and left him dying because he was dying and helpless. Clayton had some idea of trying to get help to him when we wouldn't and couldn't carry him out. We wouldn't, because it was no use. The map wasn't any use, either. We were in luck to get out alive, and we weren't much alive. The trouble was Turner didn't die, and he did get out. Well, the boys have been paying for it. Turner got out. That was a break for him. Let's turn around now and look at Mr. Blair. Malsie, about how long did you find Mr. Blair a dependable citizen?"

"Please don't, Howard," the woman said. "Excuse me, Malsie. Sorry, but you'll not mind if I say it was about a month. No reflection on you. It's just Acton. Where is the old devil sitting? Oh, there he is, see, over there. Never mind looking at Acton. We've seen him before. Give his lady a look. Beauty? You don't know the half of it. I do. I introduced Mr. Blair to that lady. When less than a month from now Acton tells that lady he thinks he'll be on his way, he will be but he won't know where. Nemesia, Malsie, Acton is on his way to the coroner. There you are, Lieutenant, murder as plain as day. Poor Acton, no chance. Do you want to take me in charge? Mr. Blair hasn't a chance. He hasn't half the chance of Clayton in the Dutch Mill, of Brown against the hunting knife, of Tremble with the red lights out, or of Roberts with the open window. What he's up against is temperament, his own and the lady's. I know the lady, and he doesn't. The sucker never gets an even break. And why should he? Maybe you think you ought to warn him. Why not? You're a policeman.

Here's a crime shaping up under your nose. He'd laugh at you. I don't know what the lady would do, but I think that just at this moment she'd laugh at you. I think they'd have you sit down and amuse them. She might swear at you in three or four languages. She is adept. Funny thing! The first time I saw that lady she still had the knife in her hand. I don't want to elaborate, but it was red. There was a drop which was slowly growing big enough at the point to fall. Fascinating sort of thing to watch. The gentleman in error was on the floor. That was in Supatra. The verdict in effect was that the gentleman was not only a d—n scoundrel but a d—n fool. Coming back from Hawaii who was on the boat but this tiger! They're going to dance. Watch them."

"Do you know the lady?" Stanton asked Malsie. "I never saw her. I've never heard of her."

"Is Ashley kidding us?" the lieutenant asked. "How should I know? Do you mean did Howard see her with the knife and a drop forming on it? Maybe." "There's your exhibit, Lieutenant," said Ashley, turning half around. "You're a remarkable detective, don't you know. You're the only one who ever started with the solution of a series of murders before they were committed and knew just what to expect before it happened, and then couldn't do anything about it after it had. There's Delliah for you, out stepping with Samson."

CHAPTER XIV

The Turner Will Be Administered "It might interest you," was about the last thing Ashley said to Stanton, "to know that I'm going to take care of Malsie. That girl has always fixed her clock so she never had even a good chance at a breach-of-promise suit, and of course she's never been within miles of alimony or a dowry. She's been a fine girl, but prudence hasn't been her partner, and she won't have much she can take to the bank. So Malsie and I will regard ourselves as the surviving veterans of this war. What would you think of us settled down in an Italian garden by an Italian lake, with poplars and cypress? An Italian moon and Malsie playing Chopin. Home from the wars."

April 17 the lieutenant had a letter from Mr. Darling. After greetings, he wrote: "You may or may not know that Blair and Ashley are dead. If you know that, you have all the information regarding it that I have. A cablegram from Juan les Pines, Alpes Maritimes, France, signed Malsie and received yesterday, tells me that Blair and Ashley have been shot and killed. I recall that you inquired of a woman named Malsie when you met Roberts, Ashley and Blair here with me, and it is my recollection that one of them told you she was Mrs. Arthur Tremble. It must be she who has cabled me. I am inclined to accept it as true. It was respectable. It is credible. It might confirm by inquiry of the Surete General, which would be a reasonable inquiry if there were more reason for it, whatever that may mean, but so far as my function as trustee is concerned I have only to wait until I hear or do not hear from them in proper form and time.

"Nevertheless I am curious, albeit I am also convinced; but here is another thought. I have seen nothing of this in the news. I read the papers with the fidelity of an old man who keeps contact with the world by reading. It seems odd that Blair and Ashley could kill each other or be killed without a paragraph of news escaping to this country. I doubt that they have been inconspicuous with their considerable income and their flashy temperaments.

"Even if our intriguing little story of vengeance is not known abroad I'd think the murder of two Americans of wealth would have produced a line or two on this side. Possibly it was printed and I overlooked it. Possibly you could have some channel of information strictly and wonderfully secret. You see how I am impressed by the potency of the police. That impression is derived from admiration of you. Justify me by letting me know if you have any information as to this liquidation of my old friend Tom Turner's passion for getting even, and believe me your servant to command and your friend.

"Most cordially, "Ash Darling." The news was not astonishing to Stanton, but it was news. He found he was sorry that Ashley had not survived, an odd regret, but one which was the fate of the cheerful assassin somehow could evoke. The lieutenant telegraphed Mr. Darling that he had no information, and his inquiries at headquarters found that none had been given the Chicago department by the French police.

The next morning, April 18, he read in the Tribune a short story from Paris, which gave the outlines of the

event. The relation of Blair and Ashley to the Turner will had been forgotten or was unknown, and the police intelligence as to the deaths of the two Americans was delayed in reaching the news-distributing centers. Stanton read that an American named Blair had shot a fellow countryman named Ashley in a quarrel over a woman who had shot and killed the murderer. The woman was thought to be an Eurasian. She was hysterical, almost maniacal, in the custody of the police.

An odd reversal of all expectations, Stanton thought—Ashley killed by Blair, Blair killed by the woman. The outraged gold-hunter had accomplished his full purpose. He could rest easy. The men who had injured him had been extinguished by his purpose arising out of his grave. He had had fun.

April 25 Stanton had a letter from France. It was post-marked Juan les Pines. The envelope was addressed in a feminine hand, but the letter enclosed was from Ashley, who had written:

"I have a sort of affection for you, Look. You've been so d—n square in a situation which could drive a copper either nutty or crooked or both. I came to like you, you old fathead. Thank me for nothing, you say. So say I. But the thing has become so

"Delliah for You, Out Stepping With Samson."

comic that I must tell you about it. I am your boy friend who didn't have any idea how deep the water was. Acton has broken all precedents. He remains infatuated. His goal has had a million names. Let's call her now Marcelle. Laugh this off. Acton is faithful, and she is trifling with me. Malsie urges me to get away. I can't. The girl is poison to me, but the plot interests me. The whole thing is going against law, order and predestination. How can anyone live in so crazy a world? You're a nice copper. I want you to get this. Never trust logic or experience or even probability or plausibility. Good crimes always deny everything. But then you know that. You're a good copper or I wouldn't be writing you. Watch your step. What do you think of me as the victim of Marcelle's affection? Malsie says go away. So it may be. But not just now. Good old Blair is just a fathead. Once a fathead always a fathead. He hasn't got a chance. He's a nice old brute, but he'll do for himself some way, even if it isn't going just as I expected it to be and as it should have been, and I can't tear myself away until it happens. You know the world's big enough only for one of us."

In the following mail a letter came from Malsie herself. She explained that Ashley had written the day he was killed and had laid the letter aside intending to address an envelope later. Ashley had been genuinely kindly, she said. It was hard to say whether he was the most twisted or the least twisted of the oblique characters involved in the will. On one occasion you took one view, on another occasion another view. But whatever else he might be he had a vein of kindness. She continued:

"I had tried to persuade him to go away. He would agree but delay. Even before we left the United States anyone could see that Blair was out of form. They will all fall once. Acton had his experience coming and long overdue. This girl was something he for once seemed to want to keep. She looked like a reptile to me, and I think Howard was truthful when he said she was poison to him but she was beautiful. That doesn't quite seem the word. And it wouldn't be lovely. It had to be something poisonous, and she did not try to disguise it. Probably that is why Blair was infatuated. He may have fallen really in love with the little brute because she was vile and dangerous.

"I do not know whether she really was attracted to Howard or just wanted to make trouble. Maybe he was

the type of man who could fascinate her just as Acton was the type of man who could be fascinated by her.

"If he'd been interested in the girl Malsie would have pulled her own freight, but I was sure he wasn't and I am sure now. It was just his wild contrariness. The night it happened, which, come to think of it, was right before last, we were at dinner separately, that is Howard and I, and Blair and the poison. Blair left her for a moment, and she motioned to Howard to come to her table. He did, and as he was talking to her he did not see Blair behind him. Blair shot him. She got up, went to Blair's side, took his gun from him as if she thought of hiding it and shot him. He fell on top of Howard and there you were. Then she began to shriek. That seems to be the end of the Turner will as a police case. There's a boy, isn't there, who inherits? It was wicked to keep him from his father's money, but then it was the father who did, and he knew what he wanted. I suppose the police will make it more or less uncomfortable for me for a while, but when I am permitted to I am returning. I have some money. Ashley was generous to me, but he was extravagant in everything, he did and there never was much to lay aside. I'm retiring to scratch up a respectable living. As a careerist I'm quite plainly through, but a fellow continues to live. When I can I'll see you if you have an interest for more details. The police here will think funny I'm writing to a lieutenant of Chicago police and when you take another look at it, isn't it funny? Adios, Malsie."

The lady was right as to the French police. Commissioner Russell had a cablegram of inquiry which Stanton answered by letter giving an outline of the Turner will crimes and making plain Malsie's lack of complicity. That, he thought, might help her.

Another letter brought young Mr. Turner back to mind, being from him. He inquired if any of the men involved in his father's will had dependents who might be suffering from what had been caused by it. He wrote: "You know I would not have interfered, if I could, to prevent my father and these men having it out to his satisfaction, but as to other people, that is an entirely different matter. We are to have so much money that it will be almost disturbing, and I know that if my father thought that in having it out with these men he had hurt a canary bird or kitten belonging to one of them he would have been hurt himself. So let me know, Lieutenant, if you know of any canaries. We think we'll add another half-acre to the garden and maybe buy a Vermont farm. Drop in on us some time. Mr. Darling sends you his regards and expresses his hope to see you again."

Stanton sent the young man the home and story of Malsie and had to return a telegram reading, "Good. Get me her address." Later in the year, in July, the lieutenant was back in the East, on leave from the Chicago department and on a duty which contained more personal distress than he had experienced in any other police case. Young Turner had implored him to come. Mr. Darling and his servant Pompey had been found dead in the Newburgh home.

It was the opinion of Mr. Darling's physician that his patient had died of a heart attack as he sat in his chair. Pompey had fallen in the hall, his head resting on a chair. An injury at the base of his skull could indicate a blow. It could also be explained as a consequence of his fall. It seemed fairly incredible that Mr. Darling and his servant had died hand-in-hand, as it were, of natural causes, but it would have been accepted as the fact if it had not been found beyond question that the house had been entered. On Mr. Darling's table—and this was the wholly inexplicable thing—was a hunting knife which opened a blade at each end, four-inch blades in a silver-mounted teakwood handle with a silver shield inset and carved in exquisite and minute lettering with the words: "Espana! a sangre, a carne, a fango, a sacro"—the cry of the Spanish troops in the Fury of Antwerp. For whatever might be the implications of its being on the table of Mr. Darling's room when he and Pompey were found dead, it was the knife on which Preston Brown had been killed in the hunting lodge of Little Buttes des Morts in northern Wisconsin on the rise of the Lac Wisconsin river. [THE END.]

Valuable, but Hard to Get The Indian rhinoceros is now a comparatively rare animal and is found only in the plains region of Assam, the northeastern India. It lives in marshy grass jungles, where it is fond of wallowing in the mud. Its chief foods are canes and shrubs. The reasons for the great expense involved in bringing a specimen to this country for exhibition are its rare occurrence, the fact that it can be hunted only with elephants and the difficulty of capturing and shipping safely so large an animal.

Southwest News Items

Three new qualifications have been drafted and approved for Chavez County teachers by the county board of education. The new rules go into effect with the beginning of the 1932-1933 school year. Governor Hunt today denied extradition of Lawrence Altman from Arizona to Los Angeles, where he is wanted on a charge of asserted violation of the California motor vehicle act and grand theft.

The Chavez bill to authorize payment to New Mexico Pueblos of funds due on lands settled by whites was ruled out of order in the house Wednesday and sent back to the Indian committee because it was not in proper form. The plant of the Yuma County Farmer and Somerton Tribune, weekly newspaper, has been destroyed by fire. D. M. and George K. Knapp, publisher and editor, reported they narrowly escaped with their lives. They had lived in the same building.

A site for a proposed Indian school for Navajos and Hopis is being surveyed five miles east of Flagstaff by Herbert J. Hagerman, special commissioner of the Indian bureau, and Mark W. Radcliffe, under instructions from Charles J. Rhoads, Commissioner of Indian Affairs.

One hundred and fifty thousand dollars worth of free water has flowed over farm lands of the Verde river valley in the last four months, officials estimated. They said more than double the previous record quantity of free water has been made available since last November.

Bids for construction work on 19.5 miles of the Winslow-Holbrook highway have been called for. The proposals will be opened April 21. The work begins approximately eleven miles east of Winslow and extends easterly toward Holbrook. It consists of grading, draining and placing of subgrade stabilizer. The project is to be completed by December 31.

Twenty-four hunters of the U. S. Biological Survey killed 215 predatory animals in March, according to a monthly report just released by the bureau. Of this number, 163 were coyotes, twenty-nine bobcats, five foxes, one wolf and twenty-eight porcupines and miscellaneous animals. J. W. Rutledge was high man for the month with eighteen coyotes and one bobcat to his credit.

President Hoover was urged to take the initiative in advocating legislation that would impose a tariff on copper in a petition, signed by governors of twelve states, mailed to him by Gov. George W. P. Hunt of Arizona. The petition was drafted by the Arizona tariff commission and sent to various governors by the Arizona executive. Those signing it included Governor Sellman of New Mexico.

If House Resolution No. 1, introduced in a speech before congress by Wright Patman of Texas on Feb. 18 becomes a law veterans of the World War in Gila county will receive \$527,582.16, according to a copy of a Congressional record received. If all the adjusted service certificates were paid in cash, it was pointed out by Mr. Patman, it would mean \$2,000,000,000 would be necessary.

The Welfare Division of Phoenix, Ariz., which operates on funds supplied by the Community Chest, cares for an average of one hundred and fifty needy families, or about 500 persons, a month. During December the office handled 369 cases. Each month, it supplies 225 quarts of milk to undernourished children. It has also been instrumental in offering free meals to the children of St. Mary's school.

The attorney general of Arizona has ruled that minors (or those under 16 years of age) do not have to have a fishing license, and that if they accompany their fathers to San Carlos lake, each can legally catch ten fish. The law was first interpreted that the father and the son could only catch ten fish on the one license, but now, according to the latest interpretation, they can catch twenty fish between them.

The "Shamrock," student publication of the St. Patrick academy, was ranked third among high school papers of the state at the recent meeting of the Intercollegiate Press in Santa Fe. The "Tiger's Claw," published by students of the journalism class of the Raton high school, was ranked fourth in the state. "La Seralpha," Clovis high school paper, took first place and the "Record," Albuquerque high school, was named second.

Navajo Indians want tractors instead of horses to till their fields because tractors do not eat when working. Indian officials were told that the Navajos, long known as the cowboys of the southwest, want to adopt "steel mules" in place of the calico colored ponies with which the Navajos have been identified since the time of the Conquistadors. The Indians also pointed to heavy losses of their ponies during the winter blizzards.

Mrs. Edith L. Henderson, county school superintendent, announced that the annual county scholarship examinations will be held in Holbrook on April 22 and 23.

Senator W. B. Kelly of Graham county, chairman of the joint legislative committee appointed to investigate governmental costs, said that "a concrete plan for saving" public monies will be ready for presentation to a special or regular session of the legislature soon. If it is adopted, Kelly said, "an appreciable saving should be effected."

DAIRY

PROFIT SHOWN IN "SELLING" TO COWS

Good Method of Disposal of Surplus Forage.

Fourteen dollars worth of farm-grown feed fed to good average cows will produce \$28 worth of butterfat at present prices and will leave \$5.00 worth of skim milk on the farm, to say nothing of manure.

At the present prices for butterfat, the man who has produced a surplus of forage and other dairy food can sell this feed through cows for a fairly good return for his labor," says A. C. Kimrey, dairy extension specialist at North Carolina State college. "The relation between the farm price of dairy feeds and butterfat is favorable now and bids fair to remain so. Records kept on present market conditions show that at \$14 worth of feed is fed to good average cows, it will produce 100 pounds of butterfat. When sold for buttermaking purposes, this fat is worth \$28. In addition, there will be left on the farm about 1,000 pounds of skim milk worth 85 cents a hundred pounds. This is excellent for feeding the poultry or hogs and when so fed has a value of \$5.00."

In addition to these values, 75 percent of the plant food in the feedstuffs go back to the farm in the form of manure, and thus cut down the fertilizer bill, says Mr. Kimrey.

The return from selling feedstuffs through cows does not suggest that anyone will get rich from the project, cautions Mr. Kimrey, but he does suggest that a better price will be received for the grains and hay than if the same material is sold in the raw state. In addition, there is the advantage of a steady income each month from the sale of cream.

Wheat Has Proved Value in Dairy Cow's Ration

The boost in wheat prices may result in corn proving a more economical grain in the dairy ration than wheat, on some farms, according to C. L. Blackman, specialist in dairying in the department of animal husbandry at the Ohio State university.

If the price of wheat should go much higher than that of corn, he asserts, it will be good business to sell wheat and buy corn and save the balance. This, he believes, is a good time to watch prices of all kinds and vary the rations according to the largest possible returns per dollar's worth of feed.

It has been found that when wheat displaces 300 pounds of corn and makes up 50 percent of the dairy ration, about the same results are obtained from the wheat as are obtained from the corn, if both rations are fed with alfalfa hay and corn silage. The cows gain a little more in body weight on the corn ration but produce a little more butterfat on the wheat ration.

Feeding Skim Milk

Increased use of the cream separator on the farms of this state should do much to increase the income from pigs, chickens and calves to which the skim milk is fed. Recent months have seen the price of milk powder, casein and other skim milk products so unsatisfactory that it has become desirable in so far as possible to keep the skim milk at home for utilization as feed. Co-operative creameries and others have been recommending this practice to their members and patrons. The doubly desirable result of increased profit from poultry and livestock and gradual reduction of the surplus of skim milk products should be noted.—Idaho Farmer.

Approved by Testing

Producing an average of 451.03 pounds of butterfat, 8544 pounds of milk in a year, the cows in the purebred Jersey herd owned by A. H. Scribner, Mt. Kisco, N. Y., have recently completed a year of official testing through the herd improvement registry of the American Jersey Cattle club. During the year of test Mr. Scribner's herd averaged seven cows in milk. The yield of these cows is equivalent to 563 pounds of butter and 3,974 quarts of milk per cow for the year.—Rural New Yorker.

DAIRY NOTES

Ground soy beans as a feed for growing dairy calves gave nearly identical results with linseed meal in experiments at Purdue university.

Most bacteria in milk come from dirty cows and dirty utensils, but dirty stables, had air and dirty surroundings all add their share of germs.

Turnips are somewhat better for dairy cows than carrots, though the latter may be used.

Cattle will live to the age of fifteen years if not slaughtered before that time. Unless special circumstances exist, a cow will have outlived her usefulness by the age of ten years.

Bad flavors in butter in winter often come from keeping the cream too long before churning. It is a nuisance to churn a small amount, but may pay.

Novelty, Message of Smart Cottons

By **CHERIE NICHOLAS**

SMART cottons go galloping through the fashion picture at high speed this season. Keep us guessing, too, as to their real identity, being silky looking one moment, dull-lustrated and woolly the next, sheer, heavy, spongy, lacy, sporty, dressy, formal or informal as occasion may demand. When it comes to novelty, the new cotton weaves have it written all over them and that is why in all fashion reports they are getting front-page notices these days.

The material which fashions the attractive frock centered in the picture is a fair example of a cotton which conceals its identity. It is one of the new durenne crepes—a knitted crepe which is extremely sheer and cool. It might be tweed from the looks of it, which goes to show the extraordinary tricks quality-kind cottons are playing in the game of fashion at the present moment. The fact that this handsome durenne cotton weaves is dotted adds to its prestige, for it's dots and dots according to what "they say" in Paris.

Speaking of novelty, the new mesh cottons "say it" with emphasis. The latest member of the lacy mesh-cotton family to announce its debut is eyelet durenne. The last-minute frock which you see illustrated to the left in this trio of swaggy spring and summer gowns is made of the very new and interesting eyelet durenne cotton. Those who wear a gown fashioned of it to a golf tournament, or while watching the horses at the first big meet, will discover that this material is even cooler than chiffon because of the "air-holes"—not a classic term, but informative—for the fabric is unusually absorbent.

This very modern frock, worn by a

very young woman, is designed to accentuate the wider shoulder line. It also has a smart-looking diagonal cut to its seamings.

Take notice, please, that this same Miss Modern is wearing a beret, for she has heard all about their continued vogue in Paris. The simplest of berets or the rather dressy sort, the beret which harmonizes or the beret which provides a color contrast to one's costume, they each and all qualify as perfectly good style. And her gloves! Have you sensed the open-mesh gloves, which this lady of fashion is wearing? To sport the new cotton lacy mesh gloves such as those pictured is proof-positive, that the wearer is correctly style-informed.

Speaking of novelty as expressed in this season's ultra-chic cotton weaves, the fabric employed for the up-to-the-moment gown to the right in this group, has "it" in no uncertain terms. It is a faggoted cotton which is "out" said to those who keep pace with fashion's stride. All the best designers are choosing faggoted materials for their latest spring and summer gowns. The one shown is a particularly lovely durenne openwork fabric, faggoted to stress the importance of diagonal lines. The trim little belt—bells may be almost any width—indicates a fairly high waistline. The fanciful lacy quality of the durenne fabric provides all the needed decoration, hence the simplicity of its treatment. A plump, little, rough straw beret is worn.

Another outstanding movement of smart cottons is in the direction of embroidered effects. This applies to sheer materials for party wear as well as sturdier types for sports. (© 1932, Walters Newspaper Union.)

WOOL PIQUE LAST WHISPER IN CHIC

We've had cotton pique and we've had silk pique. Now may we introduce the newest member of the family, wool pique, which is the last whisper in spring-time chic.

For instance, one of our more alert shops along the avenue is showing a suit of white wool pique, with a trick yoke effect which makes your shoulders look like those of a West Point cadet. The yoke of the jacket is cut straight across the sleeves, about midway between shoulder and elbow, giving effective shoulder breadth as well as a new dash and a last-minute air. The jacket is short and fitted as to waistline. The skirt is straight, with a front pleat concealing the fact that it is divided. It is worn with a knitted blouse of white wool yarn with an ascot scarf banded in red and green.

If you'd care for a sailor of rough white straw, with a tri-color band of green, red and white, you'd find it added quite the finishing touch.

Simplicity Is Theme of Smartest Dresses

Lines still point the way to smartness. Not only the lines of the model, but the diagonal lines of the various woolsens and the lines formed by the ever-smart plaid tucking that is seen so much just now.

Simplicity is the theme of most of the frocks. Life is much less complex and exciting than it used to be and clothes are paced in the same gait. Novelties are conspicuous by their absence, so are freak clothes.

Instead we have smart little suits, attractive and wearable, and charming frocks that have a fine dressmaker air about them, but are careful not to flaunt it. This is the type of frock that will be worn for the present, during the day, anyway.

Raffia Little Hats

They are jaunty and cute and raffish, these new hats of woven vicia straw, with a low, rounded crown, a brim pointed a bit over the left eye and with two quills in contrasting colors standing straight up on the left side. They are slipped through the crown.

PLAY OVERALLS

By **CHERIE NICHOLAS**

Spring has come and it's time for children to play out of doors. What more befitting for your little girl to wear than this clever overall costume? Make it of jeans or cotton broadcloth or any preferred sturdy weave. The original model photographed is in marine blue and red, with bright red ocean pearl buttons. Be sure to add the gay pearl buttons for they give this cunning suit the touch that tells.

Raffia Necklaces Are

New Spring Accessory Raffia necklaces are fashion's newest accessory novelty to wear, with that spring wool frock. They are made of fine raffia braided in choker design and finished with a long tassel which falls to the waist. With necklaces are worn with black wool frocks and emerald green with light green.

Boy, 10, Beat Her

Maid Asks \$35,000

New York.—A chambermaid in a ritzy hotel has sued for \$35,000 damages, here, charging that for five months she suffered under the beatings of a ten-year-old boy.

Ruth Weldman, the plaintiff, charges that from February to June, 1931, ten-year-old Kenneth Klee used to use her for a punching bag, aiming most of his blows at her chest.

Mr. and Mrs. Walter Klee, the boy's parents, who live at the hotel, are named defendants.

JILTING LEADS TO SUICIDE OF TUTOR

Leaves Party to End Life After Return of Ring.

Fayetteville, Ark.—A note directing the return of an engagement ring to a Jewell told of a failure in love which caused Roland B. Schaefer, young University of Arkansas instructor, to slip away from a party at his home and kill himself.

He had taken a young woman to the party as his guest. It was said that his hopes of becoming engaged to her ended when she left with another escort.

Before leaving with Kinney Holt, former star football and baseball player at the university, the girl and Holt chatted with Schaefer for several minutes.

Authorities here have refused to make public the name of the young woman, but it has been learned that she was a stenographer in the business office of the university.

A note and poem to his sweetheart was withheld by the authorities.

Schaefer, who was only twenty-five years old, had been instructor in English and German at the university for two years.

Friends of Schaefer and the young woman said that she had rejected his proposals of marriage and he had threatened suicide for several days.

It was learned that he had carried a revolver with him for a week.

The girl was quoted as saying she accompanied him to the party because of a desire to cheer him up.

Felon Risks Cremation in Attempt to Escape

San Francisco.—For more than eight hours a San Quentin convict risked cremation in what prison officials said was a foolhardy and hopeless attempt to escape.

Delbert Prettymann, twenty-three, serving five years to life, climbed into the firebox of a furnace a few hours after midnight and lay in the cramped position until discovered by guards at noon.

On duty as night fireman in the boiler room of the jail mill, Prettymann allowed the firebox to go out, waited until the firebox cooled and then crawled into the perilous hiding place. With him he took a lunch box, filled with remnants from recent meals.

He was found missing at the breakfast checkup, and a prison-wide search was started. When discovered by George Mantlo, Prettymann declined to talk, further than to admit that he "suffered agony."

Guards declare that had fires been lighted under the boilers he would have burned to death.

Fatigue Is Blamed for Evening Auto Accidents

Harrisburg, Pa.—Fatigue is responsible for a majority of the automobile crashes in the evening, according to the safety division of the Pennsylvania motor vehicle bureau.

"Driving home from work in the evening may be relaxation for some of us, but for the big majority it is an addition to the day's mental and physical strain," said Walter W. Matthews, director of the safety division.

Matthews said motorists should govern their driving by their mental and physical condition. They should drive sanely and carefully at all times, but more so when fatigued, he said.

String Lets Thugs Keep Tab on Three Victims

New York.—Three gunmen, who robbed officers of the Waterproof Novelty company's store at 130 West Twenty-third street of \$80 and several dozen hats, used a unique device to insure their uninterrupted flight.

They tied Joseph Goodman, the proprietor; his brother, Meyer, and Meyer's son, Max, in a back room with a ball of cord from the store's supply. Instead of cutting off the cord they unwound the ball as they backed to the outer door. By holding the cord fast they could determine whether their victims were moving.

C Use Pullman

Kansas City, Mo.—A circus giant, Jack Earle, of Texas, who measured eight feet six inches from head to toe, can't jam himself into a pullman berth. He sleeps on cots placed in the train aisle.

Wire Kills Child

Stamford, Conn.—Nancy King, two, was electrocuted when she touched a wire leading from an electric heater while she was seated in a bathtub. The insulation on the wire was worn.

Good Results From Changing Hog Lots

Colorado Farmer Found It Saved the Pigs.

Frank Austin, Colorado farmer, has found that it pays to change his hog lots frequently, if large litters of healthy pigs are to be grown successfully.

Two years ago he was almost discouraged with hog raising, he told George Henderson, county extension agent at large for the Colorado Agricultural college. For years he had been producing hogs, but of late his returns were very small.

He got rid of most of his sows, but one of the few he kept he decided to move across the road to some new ground. There she farrowed a litter of ten pigs and saved all of them.

"That's the way I used to raise them when I first started," Austin said. "Changing lots for pigs certainly worked that time."

Last year he took all his sows across the road and put them in clean pens to farrow. It worked again!

Now Austin has about 80 healthy, fat 200-pound porkers ready to sell. He raised these from only 12 sows.

That was no accident, for 31 other eastern Colorado farmers owning a total of 635 sows saved 4,125 pigs, an average of six and one-half pigs per litter. Every one of these 31 farmers changed their hog lots at least every two years!

Clover Yield Increased by Cutting First Crop

The yield of red clover seed can be increased by cutting the first crop when the plants are coming into bloom, rather than later, according to the Ohio experiment station. Cutting the hay crop early, so as to give the second or seed crop a good chance, is the one important factor in increasing yield which is within the grower's control. Important factors beyond his control are favorable weather and plenty of humblebees or other pollinating insects. Early cut hay is more difficult to cure and the yield is somewhat less than later cut hay, but the feeding value per ton is greater than that of more mature hay.

Proper Calf Meals

A four-month-old calf can be made to thrive on calf meal as a part of its ration without milk if the meal is properly balanced, says the Idaho Farmer. It should receive whole milk from its mother for two to four days, at which time skim milk may be gradually substituted for the whole. It should receive the skim milk thereafter at least until four weeks old. During the second two weeks the meal may be substituted gradually for the skim milk, so that by the end of four weeks it is taking a pound and a half a day. This should be gradually increased to two pounds at two months old.

Weeds on Rough Land

One of the difficult questions asked is: "How are weeds to be controlled on rough land which cannot be cultivated?" The hawkweeds, daisy and blue weed are gradually getting worse and land that used to make good pasture is hopeless today. In some cases, hand-picking, spading out, applying salt, waste oil or chemicals to small patches, close pasturing and planting back to trees are recommended. One man who had a rough, badly-infested piece of land claims that by applying manure he was able to stimulate the growth of grass so that it gradually killed off the weeds.

Beef Cattle Statistics

Washington has 250,000 beef cattle, or one beef cattle to every five and two-fifths persons.

Oregon has 510,000 beef cattle, or one beef cattle to every one and nine-tenths persons.

California has 1,205,000 beef cattle, or one beef cattle to every four and seven-tenths persons.

The twenty central states hold their dominating position in agriculture in the matter of beef cattle, having 24,633,000 beef cattle, or 63 1/2 per cent of all the beef cattle in the country.

Agricultural Hints

The feeding value of barley is higher than that of oats, pound for pound.

Leaving machinery standing outdoors increases farm expense and cuts down profit.

All beds for new planting should be prepared as soon as possible. The soil should be spaded deep and left in a well pulverized condition.

Wisconsin's wool clip of 1931 was 3,102,000 pounds, or 3 1/2 per cent less than in 1930. There were 425,000 sheep shorn last season, 5,000 less than the year before.

During the past 14 years the number of horses in the United States fell from 21,555,000 in 1918 to 12,670,000 in 1932.

If temperature and other factors are the same, a plant grows faster at night than in the daytime; the difference may be considerable.

With fertile soil at least 20 bushels of potato seed may be used profitably to the acre, using one and one-half ounce pieces spaced 10 to 11 inches in the row.

Red Fox Destroys Many Farm Pests

Cats may get the glory, but the red fox is the mouser par excellence, his capacity for field mice and other noxious rodents apparently knows no limits, according to Prof. W. J. Hamilton, Jr., of Cornell university, who has studied the contents of the stomachs of nearly 1,000 fur-bearing animals to learn their feeding habits. It is not unusual, he says, to find as many as five mice in a fox's stomach.

The fox is fond of fruits, and eats many berries during the summer and fall months. As winter approaches, his diet is restricted largely to mice and rabbits, both of which are serious farm pests. Woodchucks become prey for foxes when they emerge from their winter's sleep. Reynard plays havoc with the young woodchucks, and the baby foxes grow fast on such a diet. Small game is brought to the den alive, where the young foxes are given their first lessons in hunting. Debris about a fox den shows insects, mice, small birds, and often some chicken feathers which give further clues to his diet.

Professor Hamilton says protective measures will be necessary if the red fox is to survive for future generations. It would seem only fair to protect the fox when the mother is with young. The fox is one of the finest game animals and furnishes many citizens sport and profit yearly. He more than atones for the few birds he kills by his year-round destruction of mice and other rodents.

"I understand you and your wife never exchange a cross word," remarked the observant friend. "That's right," answered Mr. Meekton. "The crossword puzzle is sufficiently interesting the way it is without trying to reduce it to home conversation."

"What went wrong with your car, girl?" "A lamp post ran into it."

"I must tell you that my daughter can bring a husband only her beauty and her intellect."

"I don't mind—many young couples have started in a very small way."

Mercolized Wax Keeps Skin Young

Get an ounce and use as directed. Five particles of gold that peel off with all dirt such as pimples, freckles, tan and itching skin. It is also used for wrinkles. Your face looks years younger. Mercolized Wax brings out the hidden beauty of your skin. To remove wrinkles use one ounce Mercolized Wax dissolved in one-half pint white kerosene. At drug stores.

PATENTS

Steam Ore Process. The discovery of a new process of extracting valuable minerals from worthless rock without the labor and expense of first pulverizing the entire ore is announced by Chief Engineer R. S. Denn of the metallurgical division of the bureau of mines, and his co-worker, John Gross. They separate the minerals from the worthless rock by steam explosive shattering. While the process is still in the experimental stage bureau of mines officials believe it may have commercial feasibility.—Pathfinder Magazine.

Pigeon's Nest Blew In

A citizen of Lewiston, Maine, keeps the window of his bedroom open all the time. Going up to bed one night he was astonished to see a heap of what appeared to be rubbish on the smooth counterpane of his bed. Looking more closely he saw that the mass of straw and sticks was really a nest, a pigeon's nest. But there was more to it than that. There was an egg in the nest.

"I must tell you that my daughter can bring a husband only her beauty and her intellect."

"I don't mind—many young couples have started in a very small way."

Where Does She Get Her "Pep?"

SHE doesn't look seventy. Nor feel that old. The woman who stimulates her organs can have energy that women half her age will envy!

At middle-age your vital organs begin to slow down. You may not be sick, simply sluggish. But why endure a condition of half-health when there's a stimulant that will stir a stagnant system to new life and energy in a week's time?

This remarkable stimulant is perfectly harmless. It is, in fact, a family doctor's prescription. So, if you're tired of trying every patent medicine that comes along, tell the druggist you want a bottle of Dr. Caldwell's syrup pepsin. Take a bit of this delicious syrup every day or so, until you know by the

Lifelong Warfare

on Insect Pests

Award of the Copper gold medal "for distinguished service to agriculture," carrying an honorarium of \$5,000, has been made to Dr. L. O. Howard, a government bug expert who, on a small official salary, has waged a lifelong battle against insect pests.

"He has made a great contribution to the present and future happiness of the American people," says the Women's Home Companion in its announcement of the award. "He has for years been fighting the greatest of all wars—the war against insects. Insects, as he has shown, steal two billion dollars a year from us. They nullify the labor of a million men. They reached their development a millions of years ago. We are the newcomers on earth and our foot-

hold is not yet sure. Doctor Howard believes that it is still possible that in some distant future the last living thing on the expiring earth may be a bug feeding on the last bit of plant life. Thus far, indeed, the insects have held their own against us. But we cannot doubt that mankind will eventually win."

Skillful Railroading

A thrilling race between the fore and hind quarters of a freight train took place on a steep gradient near London, England, after the train broke in two. The engineer, fearing that the last half would crash into the front part and derail it, immediately put on speed, and for four miles there followed a breath-taking race to prevent a crash. Finally, the derelict cars came to a standstill on a level part of the track and the engine backed and hooked them on again.

For 100% Health

There is something vibrant and magnetic about the truly healthy man or woman, who is satisfied and contented with life. That "something" at once people wins confidence, arouses and holds affection. This vitality and enthusiasm of youth are priceless. Guard them with Fellows' Syrup, the fine old tonic which doctors recommend. It restores and strengthens. Improves appetite. You sleep better and feel better. Your vigor and endurance return. For just one week, try genuine Fellows' Syrup, which you can get at your druggist's. The results will amaze and delight you.

JNO. A. HALEY FOUNDER

FRIDAY, APRIL 29, 1932

The biggest luxury for some folks would be to be able to employ some one to whom they might tell their aches and pains and miseries. The thought suggests a new vocation. That of sympathetic listener to the daily recital of rheumatic twinges and kindred pains.

The depression is going to strip many of all their earthly possessions, but it will not rob any man of his chief asset, his ability and his knowledge. No depression can affect this. Most of the men who have built big enterprises, if they were deprived of them by the depression would have them back in a few years.

There is a tendency, because of the depression, to reduce school cost. In some sections the reduction is a radical one even to the point of impairing the efficiency of the school. It is well to remember that the old days are passing and the man who makes a success and a living in the future is going to need all of the preparation he can get.

William Wrigley, who died recently in Chicago, left to his family a fortune of twenty million dollars. This was all made out of chewing gum and is a monument to the power of advertising. When Wrigley appeared on the scene the market was already supplied with gum. As far as the public was concerned, the gum was good enough to meet all requirements, yet Wrigley, with no especial claim to merit, by advertising alone, built a volume of business ten times greater than that enjoyed by all the gum manufacturers previous to his time. Wrigley's achievement stands out as a monument to the power of advertising. It demonstrates again that advertising soils. Wrigley offered no new proposition and no new flavor, no new product. Yet by sheer force of advertising, he was able to build a fortune out of a product that everyone already knew about and for which an adequate source of supply already existed.

Every Age is Wild

---at the Time

"Women are turning of one accord these days to cut-out sandals, ventilated dune shoe fabrics, and in some more extreme cases even to slippers without toes which exhibit the polished toe nails of their wearers. There may be some people who will hold their hands aloft and say: 'What is the world coming to?'"

We hasten to divulge the dark secret that as long ago as 1874 American women were discussing advisability of wearing sandals as a change from the clumsy footwear of the period, and that they met in conclave in Boston that year to consider this and important innovations in underwear and hostery.

The Underwear and Hostery Review, a trade paper, reproduces in a current issue a cartoon from the "Daily Graphic" report, June 24, 1874, of the Boston "Clothes Reform Meeting." Mr. Howard B. Collins, a collector of old and rare books and papers, supplied the old illustrated paper.

There is no greater happiness to be found than one finds in congenial work. We may think that we will find greater happiness in retirement and ease and leisure, but no one does. Man is so constituted that to be happy, he must be busy at some useful task and the individual who attempts to upset nature's plan in this respect is doomed to disappointment. Many times the secret of content and happiness is merely a question of attitude. Perhaps the real task of the discontented individual is to get a different attitude.

Power in the Elections

As election time draws near, there is a certain amount of agitation, in certain political groups, to make power the foremost issue of the campaign.

Support for this comes from two sources. One consists of those who honestly believe in government ownership of the electric industry, in spite of the remarkable record of development and progress which this industry has made, because of a socialistic or "progressive" political-economic philosophy. The other, which is undoubtedly the larger group, consists of those who lean toward power because it seems a safe issue. The politicians who dodge prohibition, because they are afraid of alienating both drys and wets, who who dodge unemployment and taxation, because these things are "hot" at present, are the ones who are whipping it up for power.

Power may be a safe issue, but as an issue it vanishes when balanced against these great national problems. People who want work, who are worrying about their futures, aren't much interested in attacks on an industry whose service is of inestimable value and yet costs a very small part of the family budget; an industry which has maintained employment and wage scales at a high point during depression; an industry which has led the way in developments which have brought employment and new taxable property in many communities.

The public wants real issues, honestly discussed—and the greatest spellbinder who ever lived cannot make more than a secondary, local issue out of power.

Steel Business Moves Up

Cleveland, O., Apr. 25—Ford has started steel purchases for volume production, the Magazine Steel said Sunday, with the bulk of the business going to mills at Youngstown, Pittsburgh, Detroit and Cleveland. A schedule of about 42,000 tons has been adopted for May by Ford, the magazine said, and sheets, strips, fender stock and practically all the required steel products except those rolled in the Ford steel works were ordered. The amount was believed to have been about 25,000 tons.

Throughout the week's steel news there is a liberal sprinkling of specific inquiry of an encouraging nature.

Transport for the Farmer

Perhaps the most pronounced progress of our time has been made in the direction of improved transportation. Good roads and better and cheaper cars to use them, have caused miraculous changes in the business and social lives of the American people. Of all classes of citizens, the farmer has been the least benefited in this. Most farmers have cars and trucks. But few farmers have access to roads that are usable at all times of the year, or that permit the greatest possible efficiency in transport at any season. The rough road, the road that becomes one long series of mudholes in winter, the road that goes to pieces under snow or a good hard rain—these are still

Balanced Farming Would Help Farmers, Says Chicago Banker

Melvin A. Traylor Would Make Modern Farm More Self-Contained

Speaks From Own Experience

Speaking before the International Chamber of Commerce at Washington, Melvin A. Traylor, President of the First National Bank of Chicago, said in part:

Like all of us, in every line of activity, the farmer was deceived by high values in the time of his prosperity. In a well-intentioned, but what now seems at least an unfortunate venture, the Government provided abundant credit facilities for the farmer's use. These facilities were supplemented by other large and liberal lending agencies which, likewise, were misled by land values. The result was that millions of farmers assumed obligations out of all proportion to any possible normal farm income.

All of us interested in farm activity and farm finance must assume our share of responsibility for this situation. We are learning our lesson and will have to take our medicine with the farmer himself. For this mistake, time and hard work seem to be the only remedy. Certainly, more credit will not solve the problem.

Agricultural Industry Relief
I wish I possessed some prophetic vision that I might suggest an easy way by which the agricultural industry could be relieved of its distress and started on a course of well-being and profit. God has not given me that power, but I think there is at least a partial remedy which the farmer himself can apply. That remedy will start him on the only course which, experience and observation convince me, any of us can hopefully anticipate—the making of a comfortable livelihood.

When we find that on approximately 20 per cent of the farms in the United States there is not a milk cow nor a chicken, and that on more than 30 per

cent there is not a hog, and on approximately 90 per cent not a sheep; when we know, further, that of many farms in our large agricultural states, no gardens are kept and almost every article of food is purchased at the store, we are forced to the conclusion that the farmer, by and large, is not farming as he should. I know that there are certain sections where some, or all, of these means of increasing farm income cannot be applied, but so far as possible, every farmer should produce his own milk and dairy products, his own meat, and his own poultry, raise his own garden truck, and can the fruit and vegetables he requires for winter use.

Pigs and Chickens Help

Until he obtains from his farm every item for personal consumption which it is humanly possible for him to produce, he has not done his job properly. Pigs and chickens and cows are worth more to the individual farmer than all the government relief programs that may possibly be conceived.

Once the farmer lives at home, then I believe that whatever kind of money crop he may produce, whether it be large or small, the price high or low, his major difficulty will be solved and his margin of income for the necessities and luxuries he so much deserves will be greatly increased.

There is no romance about farming. If it is successfully done, I know it means hard work day in and day out. But so does any other business successfully performed. I know the privations of farm life. They are much less now than they were thirty years ago. I should like to see every farm home equipped with the modern conveniences of urban life. I would like to see every farmer with an automobile, a radio, and all other modern inventions which have contributed so much to social welfare.

No one is more entitled to these advantages than the farmer; but the farmer, like everyone else, should have them only when he can pay for them. The income for such purposes will be largely determined by the extent to which the farmer exhausts every possible means of supplying his necessities from the farm itself.

The way out for the farmer is not an easy one. Neither is the course smooth for industry, finance or government, and the problem in one sphere is little less difficult than in any other.

characteristic, speaking generally, of rural America.

A few states—New York, California, and others—have done fine work in building good farm-to-market roads. They have realized that the best main highway in the world is of no use to the farmer if his home is five or ten miles away on an impassable dirt road. They have, consequently, done much in recent years to provide secondary roads, suitable for all types of travel, and passable at all times, which connect the small village and the farm with the outside world.

These roads cost little, in comparison to the cost of high-type highways. Five thousand dollars a mile or less will provide asphalt-type surfaces which will withstand all but the heaviest traffic.

A few hundred dollars a year will ordinarily keep them in first-class condition. The benefits they bring farmers and small town business men are inestimably greater than their cost. No state can afford to let its farmers languish in the mud nowadays—every state can, by careful road planning, build good secondary arteries without inflating the tax bill.

"More Sales,"

says Klingler

Chevrolet dealers sold 17,452 new and 26,573 used cars during the first ten days of April, H. J. Klingler, vice-president and general sales manager, announced.

The performance was the best for any ten-day period this year and exceeded sales during the first full ten-day period following the announcement of the present line of cars on December 5, Mr. Klingler said.

He reported that the April sales mark was 4,000 new cars higher than for the previous ten days, and 88.7 per cent above the corresponding period for March.

Improvement was a general throughout the country, many zones more than doubling their sales performance over the first ten days of March, and a number of dealers reported selling more cars in the first ten days of April

Our New Serial

We have provided a real treat for every reader by securing the publication rights on that really wonderful story, entitled:

UNDER FROZEN STARS

By GEORGE MARSH

It is a tale of the wilds and wastes of northern Canada. Jim Stuart is sent by the Hudson's Bay Company to a desolate post to re-establish its fur trade with the Indians. He finds there a French Canadian fur trader who, by working on their superstitious fears, has secured the confidence of the natives. Bad blood ensues on both sides and the trader's daughter is finally abducted, but by one of his own men. After a merciless race over trackless snow wastes, Jim rescues the girl and secures the confidence and cooperation of the Frenchman. A story jammed with action and one which breathes the icy atmosphere of the frozen North.

Read the opening chapter and you will read it all.

that during the entire month of March, Mr. Klingler said.

In the month just ended, Chevrolet dealers conducted a used car campaign which resulted in the sale of 85,298 cars to retail buyers.

Rev. John L. Lawson, Pastor.

One hundred and twenty three in Sunday School last Sunday. About thirty attended Epworth League in the evening. Regular preaching service at Capitan next Sunday morning. Children's Music Hour under the direction of Mrs. O. J. Snow in Carrizozo at eight in the evening. In other words the evening service will be in charge of the children. They have something worthwhile for us. Let us all, parents, brothers and sisters, and friends of the children, be present. Let us show them that we appreciate their efforts. Epworth League at seven.

Ida Gertrude Leslie

On Sunday evening, April 24, 1932, a pall of dark, impenetrable sadness settled over the home of Mr. and Mrs. Robert Leslie, of White Oaks, when the grim hand of the Angel of Death was stretched forth to snatch from their fond embrace the life of their beloved daughter, Ida Gertrude. Ida Gertrude was blooming into young womanhood, being only one month and four days past sixteen years of age at the time of her death. She was a student in Carrizozo High School, a member of the Junior Class, and was very popular with her classmates, as well as all who knew her. It is indeed, sad for one so much in love with life, and for whom it seemed to hold such bright promise, to be taken from life she loved so passionately. But, we are reminded that "In the midst of life we are in death", and that "Now we see in a mirror, darkly; but then face to face."

Ida Gertrude was born March 29, 1916, died April 24, 1932. She leaves to mourn her departure her father, mother and four brothers and two sisters: Ben, Jim, Flora, Dorothy, Zane and Bobbie, and a host of friends. Funeral services were held in White Oaks Church on Tuesday afternoon, conducted by Rev. L. D. Jordan. Interment was in White Oaks Cemetery.

Farmers Loan

Members of County Loan Committees, County Agricultural Agents and Field Inspectors of the Federal Crop Production Loan Organization as well as members of the New Mexico Contract and Advisory Commission, recently appointed by Governor Arthur Seligman to advise and cooperate with the Western Headquarters office in Albuquerque together with service clubs, Chambers of Commerce and bankers of ARIZONA and New Mexico have been urged by Carl Gallagher, Federal Crop Loan Supervisor for New Mexico and Arizona to cooperate in urging the farmers in both states to take advantage of the farmers' seed loans from the reconstruction finance corporation before the closing date for receiving applications on April 30th, provided they are eligible and need funds with which to start their farming operations.

It is absolutely necessary that all agencies including newspapers, service clubs, Chamber of Commerce and other civic organizations unite their efforts for the proper distribution of a sufficient amount of money before April 30 to take care of deserving farmers, says Gallagher. No effort is being made to create undeserving loans but it is desired that each and every farmer who is eligible and so desires shall receive a Government crop production loan.

Colonel Albert T. Woods of Artesia, Chairman of the New Mexico Contract and Advisory Commission has appealed to members of his committee in each of the twelve districts of the states urging quick action of the farmers in applying for loans if needed to finance crop planting and production.

We welcome loans to farmers who need financial help. We are not making loans to sideline farmers or to an underserving person who might try to secure money to buy seed on the pretense that he is a farmer. The real purpose of the seed loan is to help the legitimate farmer stay on his farm and produce a crop rather than give up his farming operations and become a burden on his community.

In addition to the usual allowances for seed, feed and fertilizer a recent ruling provides that money may be borrowed to pay water charges in irrigation districts. This ruling has caused an increase in the number of New Mexico and Arizona farmers applying for feder aid. However,

Bicentennial Flower Gardens

While it has always been necessary to make certain gardens useful, it is possible to allow the space and time for gardens which contribute chiefly beauty in this land of great open spaces and uncrowded areas. Fragrance has always been a deciding factor in the choice of flowers for the home gardens. The sternest and most austere have softened before the incense-poured from a rose or carnation. Indeed it is often wondered that flower fragrance had not power equal with the sweet sounds to soothe the savage breast. Surely it is to flowers very like the voice, man wherefore, mayhap it is the garden choral. It is in the charm of the old garden, as well as its form and plants, which we are seeking to recall when we make a new one like it; and this charm lies in the ancient estimate of homely, simple things at their true worth. Old fashioned gardening is not summed up in the planting of a flower garden wherein the walks and beds conform to the lines laid down in some old design.

Many gardens, according to the Division of Information of the United States George Washington Bicentennial Commission, will suggest the Colonial influence by planting flowers included in the following list:

- Anemone coronaria; in many colors and mixtures of red, blue, and white.
- Anemone hortensis; Spanish and marigold; red, rose-purple, whitish.
- Anemone fulgens; Scarlet and John, Robin-hood, vivid scarlet, black stamens.
- Anthemis cotula; dog fennel; mayweed, white.
- Anthemis tinctoria; yellow statwort, yellow, brown center.
- Anthemis nobilis; double chamille; white.
- Athericum Lillago; St. Bernard's lily.
- Savoy spiderwort; white.
- Centaurea cyannus; Cyanus, doreflower, bachelor's buttons; blue, purple, blush, red, white or mixed.
- Bentaurea moschata; Sultana flower, sweet sultan; white, blush to purple, yellow.
- Centaurea nigra; great cyanus, Spanish sea knapweed; blue-purple.
- Centaurea splendens; Spanish cornflower; pale purple,

- Hepatica angulosa; white, blue, red.
- Hesperis matronalis; rockets, double queen's gillflower, dame's rocket, damask violet; white to lilac, pink and purple; single and double.
- Hyacinthus; hyacinths.
- Impatiens Balsamina; "female balsam apple"; three shades of purple; single or very little doubled.
- Lilium pomponium; Pyrenaicum; yellow.
- Lilium pomponium, aureum; yellow.
- Lilium pomponium; red, spotted.
- Lilium monodelphum; yellow, tinged at the base and tip with purple.
- Lilium bulbiferum; dark reddish orange, spotted.
- Lilium crocicum; bright orange; common.
- Potianthes tuberosa; tuberosa; white.
- Primula auricula; bear's ears; white, buff, yellow, scarlet red.
- Primula vulgaris; primrose; pale yellow.
- Scilla Italica; Italian squill; pale blue.

Beauty Talks

By

MARJORIE DUNCAN Famous Beauty Expert

Your Beauty Assets

YOU are urged to take an inventory of your assets and liabilities. List each item in the beauty ensemble. What are you satisfied to preserve and what do you wish to improve. Then tell yourself truthfully what you are doing for your beauty.

Your figure, for instance. Do you wish to gain or reduce? Or are you, fortunately, just right? Check up on your posture as poor standing, sitting or walking positions can destroy even the most perfectly molded figure.

Now check up on your hair. Is it an asset or a liability? Are you faithful in brushing it properly night and morning for ten minutes? Can you boast a glowing, healthy, lustrous crop or is it stringy, dry as a heap of straw or oozing too much oil?

Start at once to set things right and turn the liability to a beauty asset.

Now for your skin. Anything wrong here? Dryness, oiliness, blackheads, eruptions, lines and wrinkles, sagging muscles? Or happily a clear, flawless, firm complexion? And remember that the normal skin needs only a good cleansing cream, skin tonic and nourishing cream to keep it young and lovely through the years.

Your eyes, are they clear and bright? Are you kind to them or do you strain them? Do you read or sew or work in a good light, does the light come from behind the left shoulder? Do you squint? Squinting indicates something wrong with the eyes and tells you in plain terms that there will soon be crow's-feet and frown lines around the eyes.

When you present arms in an evening gown, is the skin white and clear, matching your face and neck? Are your hands soft, smooth, white, well-groomed to the fingertips?

Lastly are you particular about the details of good-grooming, so small in themselves, but what a big part they play in destroying the perfect picture if they are not just right.

KILLER SERVES ON JURY THAT DOOMED ONE MAN TO DEATH

Fugitive 29 Years, Once Justice of Peace, Faces Trial as Slayer.

Columbia, Mo.—Wanted for a murder committed 29 years ago, he served on juries which sentenced one man to be hanged and another to 25 years in prison. While other officers sought him, he served as a justice of the peace before whom men were tried for murder and lesser crimes.

That is the story disclosed by the arrest of George Presnell, fifty-nine, alias George Miller, for the murder of Lewis Buchanan at Bakersville, N. C., in 1903.

North Carolina authorities have come here to take Presnell back to Bakersville to face the murder charges. Presnell will not fight extradition.

"I believe that I will be acquitted," Presnell said; "that's the reason I'm returning."

Fled From the State. The fatal stabbing of Buchanan occurred after he had made several insulting remarks to Mrs. Presnell.

Shortly after the killing, Presnell, son of a prosperous farmer, fled from North Carolina on foot. He took the name of Miller in his ramblings, always a short pace ahead of the law.

Years of drifting took him to McAlester, Okla., home of the Oklahoma state penitentiary. Hinton, Mo.; Atlanta, Ga., and Moberly, Mo. Finally about 25 years ago he went to Centerville, Iowa, where he became a prosperous farmer and politician. He married a second time.

At Centerville, he was called to serve on juries 13 times. In 1907 he was one of the jurors sitting on the case of John Junkin of Ottumwa, Iowa, and concurred in a verdict which sent Junkin to the gallows for murdering a young woman.

His Case Different. About eight years at Centerville he was called on a jury that sent "Peggy" Smith, a one-legged man, to prison for 25 years for the murder of Alice Burlich, who had "squealed" on Smith for burning a building.

Presnell said he did not believe that his case was in any way similar to those of the two convicted men.

"What I am charged with was done in defense of a woman's honor," he said. "Junkin killed a girl after carrying her to the basement to attack her. I was called as a good citizen, and that is the way I served."

At Centerville in 1912, Presnell was a justice of the peace. "It struck me peculiar I should be in such a position, and that is one of the reasons why I resigned soon after taking the office. Also I didn't have enough education for the job," he said.

Presnell, although admitting the North Carolina killing, said he would not plead guilty of murder.

Funeral of Gas Works' Pet Dog Attended by 70

Richmond, Va.—A little dog died here recently, and 70 mourners attended the funeral services.

He was "Mascot Jim," pet of the gas works for eight years. The mourners were the gas works employees, who built a coffin for Jim and buried him in the plant yard.

Eight years ago a gas worker found a puppy outside the gates. The man was fond of dogs, and he saved Jim from the dog pound.

"Mascot Jim" became as much a part of the gas works as the coal used in producing gas. The men returned the dog's affection. Each year they took up a collection to buy a license and medal for "Mascot Jim."

Jim's death was attributed to his passion for rats. Several months ago he chased a rodent and both fell into a tar well. Jim was rescued, but he was never strong again.

Italy's Criminal Poet Is Pronounced Cured

Rome.—Italy's "criminal poet," Riccardo Testa, dog thief, thief and genius, has just left the Collegno lunatic asylum, pronounced as cured.

Testa was arrested in the editorial offices of the literary review, "Comedia," at Milan, three years ago for stealing a gold watch and chain from a friend.

His lawyer's plea that he was the victim of heredity and the drug habit convinced the court, and he was sent to a criminal asylum instead of to prison.

During his stay in the Collegno asylum, where he was employed as a clerk, he wrote a book of lyric poems and a drama, "The Great Evil," dealing with drugs, poverty and the underworld.

Testa jumped into fame when his play, "The Shell," won first prize in a literary competition and was successfully produced in a Milan theater.

Bandits Use Old Burial Vault for Rendezvous

Philadelphia.—An ancient burial vault more than a century old has been uncovered by detectives here as the rendezvous for boy bandits.

WILL BE ISOLATED IN CANADIAN NORTH

Lonely Year Scheduled for Scientific Party.

Great Britain's share in next year's celebration of the jubilee of the Polar year will mean the isolation of a small party of scientific observers for about a year at a station in the north of Canada. During those winter months they will have no contact with the outside world. They are unlikely even to be in wireless communication. Their only transport will be dog sledges and their only chance of getting fresh food will depend on the success with which they can use the snow and ice for the purpose of refrigeration.

The party will go to their lonely post on the most northerly arm of the Great Slave lake as soon as the ice breaks up at the end of June. They will reach the settlement of Fort Rae in time to make preparations and do some bartering with the Indians before the winter settles down again on this wild country and the Indians go off once more on the trail for the pelts by which they make a living. Some of them may drift back to the settlement again toward Christmas time and may have moose and caribou flesh to barter for flour or implements. If that can be kept fresh by burying it in the snow the party's rations will be the more varied and nutritious, but if the cold storage is unsatisfactory they will have to content themselves with tinned goods. They will be living in an Indian reserve and will therefore not be at liberty to shoot the only animals which might serve as food.

This settlement is little farther north than the Shetlands, yet it is one of the coldest places in the world. In the winter it is not unusual to find from 100 to 110 degrees of frost. Fort Rae is a very primitive settlement. It consists of a Hudson's Bay trader, one rival trader who is an Assyrian and another who is a Russian, one Canadian mounted policeman, and a Roman Catholic missionary. It is open to the rest of the world for about six weeks from the beginning of July, and even then it cannot be reached by any regular transport service.

Just the Scallops. The B-family was enjoying a turkey dinner with all the "trimmings" and, of course, scalloped oysters were included. When they were passed to Kathleen, she was asked whether she would like to have some scalloped oysters. She replied:

"Well, I don't care for the oysters, but I will have some of the scallops."

A man who has enough work to do, so that every day there is some left over, ought to be happy, but he seldom knows it.

Marine Band to Play Our Favorite Songs

Eight numbers, favorites that have been harmonized by song lovers all over America, have been chosen by the United States Marine band for the broadcast over an NBC-WJZ network during the National 4-H club program Saturday, May 7. Grouped together under the title of "America's Favorite Songs," the numbers will be played by the famous musical organization, and the story of each will be told by R. A. Turner, central states 4-H club leader.

Topping the list, there's that favorite of many years and many states, "Carry Me Back to Old Virginia." Its melodic tones by the Marine band will indicate the beginning of the sixth program of the series on "Learning to Know America's Music."

The happy homes and charms of another state, Kentucky, are depicted in the second number, "My Old Kentucky Home," which will be followed with "I'll Take You Home, Kathleen."

Two famous classics, "O Promise Me" and "The Rosary," are next included in the list of America's favorites. Following these, the Marine band will play the sweet harmonious melody of "Silver Threads Among the Gold."

"A Perfect Day" and "On the Road to Mandalay" complete the numbers which will be played for the enjoyment of National Farm and Home Hour followers and for the purpose of acquainting more thoroughly the 900,000 4-H club members of the nation with our best-known and favorite songs.

The program will be interspersed with brief talks by outstanding 4-H club members and leaders who will tell of the achievements of club work in their respective states and communities.

There is an undefined "restfulness" in the company of a friend that is the basis of friendship.

About the only point in which government comes in contact with everybody is in taxation.

Franklin "Wonder Man" of Eighteenth Century

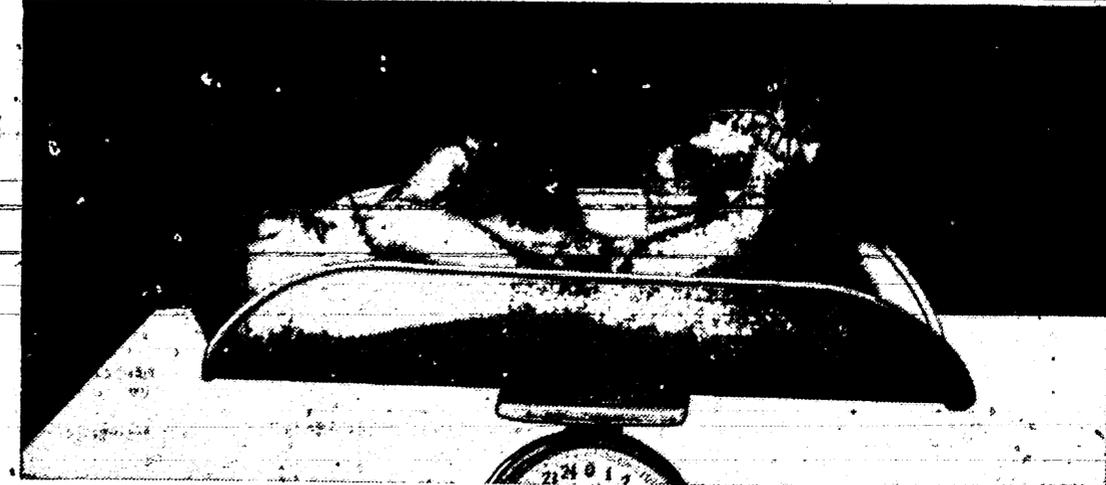

Biographers have written about Franklin an American. Professor Fay presents not only the American but also the man of the world—the first bourgeois in the world. Search the annals of the eighteenth century from beginning to end in every corner of the world; nowhere will you find such a figure. Franklin's accomplishments are simply astounding. He did not live in an age of special-

ization. He was a master of many trades.

He was at once the leading journalist in America, printer and publisher of a far-famed almanac, internationally known scientist, inventor of the first wood-burning stove and a dozen other comfort-giving and useful appliances, the best swimmer in America, founder of the first public library in America, founder of the University of Pennsylvania and various learned societies; diplomat par excellence, master propagandist and

pamphleteer, early advocate of world peace, Constitution maker, politician, philosopher—and a man among men.—Baltimore Sun.

Mammoth Turnip. A turnip almost the size of a watermelon and taken from a regular crop, was raised on the Lee farm at Irvington in the northern neck of Virginia, and taken to Richmond and exhibited. The vegetable measured exactly nine and one-half inches in length.

To every mother who can't nurse her baby... NEWS!

When a mother's milk fails, nothing is more important than this—to be sure that the food that goes into her baby's bottle gives him just what he needs to make him rosy and healthy now, and build him a firm foundation for future health.

Test made with fifty babies. Recently, two physicians—specialists in baby diet—conducted a test with fifty average babies, to throw new light on this subject.

This food tested is one unique in infant feeding history. Next to mother's milk, it has raised more babies than any other food in the world. Over a period of 75 years, it has given millions their start in life. Throughout America, there are healthy babies, children, grown-ups, to prove the value of this amazingly digestible food.

Yet never before had scientists put this famous food—Eagle Brand Milk—

to such a thorough, controlled, scientific test. What would such a test reveal?

Simple diet proves builder of 100% babies.

For months, the two physicians fed those fifty babies on Eagle Brand—checking with closest care every detail of their health and growth. Bone structure was studied with the X-ray. Tooth development was watched. Weight and height were periodically recorded. Blood tests were made.

And those fifty Eagle Brand babies, judged by every known test, proved themselves splendidly nourished. This simple diet—Eagle Brand, with merely the usual supplementary foods—had proved equal to the building of a 100% baby.

Now, science joins the millions of mothers who say, "We have our proof that Eagle Brand Milk is a truly val-

uable and effective food for a baby."

If you cannot nurse your baby, try Eagle Brand. Easy to prepare—merely add boiled water. Always pure, safe, free from dangerous germs. Keeps indefinitely in any climate. Simple feeding directions are on the label.

The usual supplementary foods, of course, are orange or tomato juice, and cod-liver oil or other source of the anti-rachitic Vitamin D.

Baptist Church

Rev. L. D. Jordan, Pastor
Sunday School 10:00 A. M. A hearty welcome for you at this friendly church.
Regular preaching services at: Carrizozo at 11: A. M. and 8:00 P. M. on third Sunday in each month, and at 8:00 P. M. every Sunday.
At Ocuca: 11:00 A. M. every First Sunday.
At Ancho: 11:00 A. M. every Second Sunday.
At Capitan: 11:00 A. M. every Fourth Sunday.
Christ alone can save the world; but Christ cannot save the world alone. For we are God's fellow

workers" - 1 Cor. 3:9.

If you have already read it, read it again this week. If you have not read the Sermon on the Mount, now is a good time to read it. If you have already read it read it again this week.
The earnest, prayerful study of this matchless Sermon will be profitable in many ways. It will not only hold up to your vision higher ideals of living, but will bring to you deeper spiritual truths concerning the more important matter of building a life that's worth living. The sermon study next Sunday evening will be a study of "The Beatitudes". Services at Ocuca next Sunday morning, and at Carrizozo in the evening.

Carrizozo Hi School Notes

(By H. S. Reporter)

And don't forget the big benefit dance at the Community Hall Saturday night, April 30. This dance is to be given to try to raise money to clear up the deficit in the Athletic Department. The Athletic Association is sponsoring this dance, and if you want to help the Association out, come and enjoy yourself. Admission for dancers, 75c; admission for spectators 25c. Coffee and doughnuts will also be served. Come one, come all, and lend a helping hand!

Miss Stover decorated her track team the other day, and Georgia Peckham and Katherine Kelt each got enough ribbons to make a good sized dress. Mary Lewis and Willie Kelt also took down some second and third places.

The following boys received their letters in football and basketball last Monday in Assembly.

Football: L. Hicks, F. Mirelez, B. Lewis, R. Leslie, J. Leslie, E. Swell, A. Brady, W. Chapman, F. Eaglob, E. Aguayo, E. Catt, B. Crenshaw, L. Baca.

Candido Martinez, one of the stars of the team, was to have received one also, had his career not been arrested by his untimely death.

Basketball: B. Crenshaw, E. Catt, E. Aguayo, S. Chavez, L. Baca, A. Brady, W. McMillan, F. Mirelez.

Girls who lettered in Basketball were as follows: Dorothy Dozier, Georgia Peckham, Katherine Kelt, Ruby Johnson, Andrea Kundreal, Mary Lewis, Willie Kelt, Frances Charles.

Mr. Groce received a telephone call Tuesday morning that Ruby Johnson, one of our Seniors, was operated on for appendicitis in the early hours of the morning and had stood the operation in fine shape. Miss Louise Sweet accompanied Ruby to El Paso Monday night, and was thus absent from her music room Tuesday.

Once again, Death has stalked among us, in all his grimness and sorrow. This time, he has picked from the Juniors one of the most diligent members of the student body. We the remaining, were all greatly shocked and grieved on learning Monday morning that Gertrude Leslie had passed to the Great Unknown sometime Sunday night.

Gertrude gained many true and loyal friends through her untiring efforts, her attitude of friendliness for the whole world, and her entire willingness to help in anything for the school. A sad, but striking example of her undying interest in her school work is that among her last words she requested her brother to speak to Mr. Groce regarding the time she had missed, and request him to be lenient with her in her make-up work, for it seems she anticipated a prolonged illness.

We are all extremely sorry to lose one of such sterling character as Gertrude, and extend the sympathy of the whole school to the bereaved family.

LOCAL AND PERSONAL

The local baseball team will play Tularosa here Sunday at 2:30 p. m. Admission 10 and 25c.

The date of the Senior class play has been postponed until May 10.

For Rent—Two room apartment, partly furnished—See Mrs. T. E. Kelley.

Burnett's Cash Grocery is offering an excellent line of everything for the table. Their ad will be found on Page 1.

H. B. Jordan and Fred Thornton, of Albuquerque, are spending a few days in this city, guests of Rev. and Mrs. L. D. Jordan.

Just received car of Plaster and Sheet Rock. Prices are lower. The Tittsworth Co., Inc., at Capitan, N. Mex. tf.

Frank Lesnet is in receipt of a clipping from the Wichita, Kansas, paper, stating that his daughter, Georgia, who is a Senior in the High School there, has made such perfect grades that she was selected as a member of the National Honor Society. We are always glad when success crowns the efforts of a young student, but especially so, in this case as we consider her one of our home town girls.

In The Probate Court

County of Lincoln, State of New Mexico.

In the Matter of the Estate of Susan E. Barber, Deceased (No 311 To Jimmie S. Zimmerman, Walter Shields, and Edgar P. Shields, and to all unknown heirs and claimants of the Estate of Susan E. Barber, Deceased)

NOTE: For heretofore given that the report and final account of the Administratrix, Mrs. Sallie Sweet, in the above named Estate was filed in the above named Court on the 19th day of April, 1932 and that on the 20th day of June, 1932, at the hearing of objections to said report; at the court house of said County at the hour of 2 P. M. and that on said day, the Court will determine the heirship of the deceased, Susan E. Barber, the ownership of said Estate, and interest of respective claimants thereto, or therein, and the persons entitled to the distribution thereof.

The name of the attorney of the said Administratrix is Geo. W. Pritchard, Santa Fe, New Mexico.

Dated April 28th, 1932.
S. E. Greisen
Clerk of the Probate Court.

Deputy.

Ancho Notes

Mrs. Bryan Hightower entertained with a unique bridge party, Friday April 15. As soon as the members arrived they were told the deuces were running wild. The fun was on and every one was busy looking for the deuces, each deuce found being counted 100 points on the bridge score. After a few hands were played, the hostess announced an earthquake was about to take place, and all players were told to exchange score cards. The playing proceeded until a second shock when the cards were returned to original owners. A delicious salad course with cake and cocoa were served. After a most pleasant evening, the guests departed at a late hour.

Mr. and Mrs. Price Miller are the proud parents of an eight pound baby boy, born April 23rd. The Nick family left last week for Oklahoma, where they will make their home.

Charles Goss returned Sunday from El Paso, where he went in the interest of the wood yard now being established there by

The Goss Brothers

Mr. and Mrs. Jess Lynn returned overland to Dill, Oklahoma last week.

The Ellis boys gave a dance Saturday night at the school house. Pie and coffee were served.

Mrs. S. J. Pruett entertained a few ladies at Bridge Wednesday afternoon. Mrs. Pruett will be hostess to the Ancho Bridge Club, Friday evening, May 6.

The Ancho Woman's Club has failed to have a meeting for a couple of months, due to inclement weather and sickness among the members. For the same reasons, no delegates attended the District meeting at Alamogordo, although several had planned on making the trip. The next meeting will be with Mrs. S. J. Pruett, Saturday, May 7th.

Mr. and Mrs. R. M. Jones and Mr. P. M. Bailey of El Paso were guests of the Warden and

Hightower families last week, and attended the dance at the school house, Friday night.

Mrs. Warden and Hightower made a trip to Carrizozo, Monday the 25th. Mrs. Warden attended to school matters before the meeting of the County Board.

A letter received from Mrs. J. M. Frame, now in San Francisco, announces that she expects to return to Ancho for a prolonged stay about July 1st. Mr. Frame, who is now in San Francisco on vacation, will return to Ancho about May 10th, after spending a few days at Monahans visiting his mother and at Odesa where his son Paul is railroad agent for the T & P.

Mr. and Mrs. S. J. Pruett and Grover Pruett, who have claims in the Jicarilla district, attended a meeting of the miner's at the Jicarilla school house last Friday night. Mr. L. P. Hall and daughter Miss Louise were also present.
