CARRIZOZO, NEW MEXICO, FRIDAY, FEB. 26, 1937

NUMBER 35

Measure Tabled By Committee

Such Legislation Should be Killed, Says Chairman of Lincoln Co. Board

Indications that the state legislature will do nothing toward aiding the appeal of Hollis Martin, Altus, Okla., slayer of three persons, came today in a meeting of the senate affairs committee.

HB-165, an 11th hour measure introduced Saturday to authorize transcript of appeal of district court records in cases involving indigent defendants, has been tabled indefinitely by the committee.

The measure was introduced especially in behalf of Martin. The supreme court postponed from Saturday until today the hearing on the attorney general's motion to affirm the sentence of death by Judge Numa C. Frenger.

No attorneys appeared in behalf of Martin this morning and the supreme court took the motion to affirm under advisement.

When Dewey Stokes, chairman of the Lincoln county board of commissioners, appeared to plead with the committee to kill the bill, Sen. J. Q. Thaxton reminded the group, when a question arose over its number and status, that it had been decided to table the measure indefinitely.

It will stay there, committee men said unless the senate should force it out.

"There are a hundred reasons why you should kill this bill," Stokes told the committee.

A telegram and a letter from Judge Frenger, urging against passage of the bill, have been received by Sen. Robert Harrison of Dona Ana. Judge Frenger pointed out that if passed, it would result in many indigent persons delaying the process of law and putting heavy drains on court funds by making their appeals with money provided from those funds.

He said the aim of helping Martin could be accomplished, if necessary, by other means than passing the bill, although he contended the man had been given a fair trial, with capable counsel, in district court. He said he was informing the supreme court that the court stenographer could come to Santa Fe, read the record, and, if the supreme court decided the case should be reviewed, could then order the transcript copied. Santa Fe New Mexican.

Methodist Church

CCC Camp string band will play special songs at Methodist Church Sunday evening at the regular service from 7 to 8 o'clock. We'll also have Dr. George Shearer one of the great preachers of the southwest to preach for us.

Come early to get a seat every one in Carrizozo is invited. Song service will be a specialty. This string band will be led by our home orchestra. Come for you will not find greater music anywhere. At the close of the service they will play Southern melodies from the church porch. Services Sunday at 11 a. m.

Rev. J. A. Bell

Mrs. Ola C. Jones and Mrs. Irene Hart will arrive home from New Orleans next Monday or Tuesday.

Farm Debt Adjustment Committee Meets

The County Farm Adjustment Committee met at the Lutz Building in the office of the District and County Supervisors on Thursday, February, 25, at 10:00 a. m.

James A. Wilson, State Farm Debt Adjustment Supervisor, met with the Committee, on his regular monthly itinerary.

The Federal Farm Debt Adjustment Service is available to all farmers regardless of whether or not they are Rural Rehabilitation clients. It was provided primarily for the benefit of low income farm families, who, through no fault of their own, found themselves unable to secure credit from the private money loaning agencies or credit merchants.

The Committee, whose names and addresses appear below, are public-spirited citizens who freely give of their time and talent to effect debt conciliations as between debtors and creditors who meet with the individual members or with the Committee as a whole in the office of the County Rehabilitation Supervisor, Lincoln County is under the direction of James W. J. Evans and Mrs. Marie Bishop, home supervisor, who made a fine record and enjoy the confidence and gratitude of the entire County.

Debt Adjustment is frequently made by the local Supervisors and extension agents, assisted by the District Supervisors, which makes it possible to secure short time operating and substance loans and grants from the Federal Treasury which otherwise would not be approved. The farm and home plans must show a balance that will make repayment reasonably sure.

The Committee is composed of the following:
Otis B. Shook Alto, N. M.
Vassar Thompson Capitan, N. M.
John E. Hall, Sr. Ancho, N. M.
Mrs. Ola C. Jones Carrizozo, N. M.
Larry Dow Carrizozo, N. M.

Lyric Theater

Thursday, Friday and Saturday
Freddie Bartholomew, Jackie Cooper and Mickey Rooney in

"THE DEVIL IS A Sissy"

Each playing as he has never played before. A picture suitable for all ages and classes.

"Sunkist Starts at Palm Springs"

Sun.-Mon.-Tue.

"SING, BABY SING"

With Alice Faye, Adolphe Menjou, Gregory Ratoff, Ted Healy, Patsy Kelly, Micheal Whalen, Ritz Brothers. Laughs, Tunes, Stars, Sparkle, Nit Wits Extraordinary, Something new in Cuts. Knockouts from every angle.

"Scouring the Skies" and "Honey Bears"

Sunday matinee at 2:30 p. m.

Night show at 8:00

LOOK OUT FOR "GENERAL SPANKY" along about Wednesday, March 3rd.

District Court

The March term of District Court will be in session March 1st. A well filled docket, of both civil and criminal cases will keep Judge Frenger, District Attorney Threet, and other court officials quite busy for some days.

Benefit Program

The following is the program which was presented by the P. T. A. at the High School, Monday night for the County Dental Clinic. Piano Solo, Ruth Brickley; "Yucca, or the Prairie Flower" by Mr. R. A. A. Chase, assisted by Velma Knippelmier, Wilma Snow, Jane Norman, Bill Kelt, Truman Spencer, Charles Dow, Aubrey Hines, Charles Carl, Dance, Virginia Grumbles. Vocal Solo, Leut. Speary; Song and dance, Jane Gallacher, Marion Joyce and Betty Beck. Physical Education Demonstration, Miss Stover in charge.

Cattle Growers Association

Albuquerque, New Mexico. -Everything is in readiness for the dinner to be given to the members of the Executive Board of the New Mexico Cattle Growers' Association at the Sankita Hotel in Raton, by the "town folks" the evening of March 23 preceding the opening of the twenty-third annual convention of the Association which will be held at the Shuler Auditorium in the City Hall.

The Executive Board will go into session immediately after the dinner.

The convention proper will open the next morning, March 26, at 10:00 a. m. and continue through March 27. The cattle men will be welcomed by the Hon. O. E. Maulsby, Mayor of Raton, Mr. E. G. Hayward, representing the cattlemen of Lincoln County, and a representative of the Raton Chamber of Commerce. Governor Clyde Tingley will address the cattlemen and A. J. Brownfield will follow with his annual address as President of the New Mexico Cattle Growers' Association. The program for the rest of the convention is not yet completed, but you are assured of an interesting and instructive one.

The entertainment committee of Raton is arranging for dinners, luncheons, dances, etc., which will keep the visiting delegates busy when not in convention.

From the reservations which are being made this early it looks like there would be a large attendance.

All cattlemen of the state are urged to attend both meetings.

Red Cross Notes

A revision of statistics, made on the basis of last minute figures from the flood zone, showed persons whose homes were flooded numbered 1,205,256. Of these persons, 748,229 were under care of the American Red Cross, either in concentration camps or elsewhere. Many families were being fed in their homes, or while being sheltered by neighbors and friends.

The Red Cross was operating 838 concentration camps and 270 field hospitals. Persons sick in hospitals numbered 4,288, and nurses on duty numbered 1,506.

The high waters affected families in 177 counties in eleven states. The Red Cross had moved refugees into 114 additional counties, which were not flooded by the rising rivers, and housed them there temporarily, until their own homes could be made habitable again.

Attorney John E. Hall, chairman of the Lincoln County Chapter states that Lincoln County oversubscribed her quota ten times in the recent appeal for funds for the flood sufferers.

Basketball

Don't forget about the basketball games and dance Friday February 26. This will be your last chance to see action on the local court this year. If you haven't been coming to the games this year you don't know what you have missed. Every game has been full of pep and thrills from start to finish. This promises to be one of the best games of the season as the local teams are a good match for the Corona teams.

After the games you can dance to the music of Cleve Jolly's orchestra from Corora. There will be a prize waltz contest sometime during the dance. The winner will receive a five pound box of candy. A lunch stand will be in operation serving coffee, pie sandwiches.

045596

Notice for Publication

Department Of The Interior
General Land Office at Las Cruces, New Mexico, February 19, 1937.

NOTICE is hereby given that Andrew J. Cate, of Adobe, N. Mex., who, on March 25, 1932, made homestead entry, No. 045-596, for SW1/4, NW1/4, SW1/4, NW1/4, Section 28, Township 6S., Range 6E., N.M.P. Meridian, has filed notice of intention to make 3 year Proof, to establish claim to the land above described, before Frank J. Singer, U. S. Commissioner, at Carrizozo, N. Mex., on the 9th day of April, 1937.

Claimant names as witnesses:

Wiley Edwards
E. I. Griffin
Mrs. Lois Moore all of Adobe, N. Mex.,
Damon F. Sawyer of Carrizozo, N. Mex.

Paul A. Roach
Register.

F26-M26

NOTICE FOR PUBLICATION
STATE LAND SALE
LINCOLN COUNTY
OFFICE OF COMMISSIONER OF
PUBLIC LANDS
SANTA FE NEW MEXICO

Notice is hereby given that pursuant to the provisions of the Act of Congress approved June 20, 1906, the laws of the State of New Mexico and the rules and regulations of the State Land Office, the Commissioner of Public Lands will offer at public sale to the highest and best bidder at 2:00 o'clock P. M., on May 24th, 1937, at the front door of the Court House in the town of Carrizozo county seat of Lincoln County, New Mexico, the following described tract of land, to-wit:

NALR NO. 2644

NE1/4, NW1/4 Sec. 15, Twp. 10 N., R. 19 E., and Lots 1, 2, 3, and 4, ec. 7, Twp. 10 S. R. 20 E., N. M. P. M. containing 204.09 acres.

No bid will be accepted on the above described lands for less than five and no 100.... Dollars (\$5.00) per acre and successful bidder will be required to pay at the time of sale five per cent (5 per cent) of the amount of his bid, the value of the improvements and the costs of sale. The balance of the price offered will be payable in thirty years with interest on all deferred payments at the rate of four per cent (4 per cent) per annum, in accordance with the terms of the contract to be entered into by the successful bidder, form of which will be furnished on request.

All minerals on the said lands are reserved to the State and the Commissioner reserves the right to reject any and all bids.

Dated at Santa Fe, New Mexico, this 19th day of February, 1937.
Frank Worden,
Commissioner of Public Lands.
Feb. 26, 1937.

Chevrolet 1936 Registration Totals

Chevrolet's position in the automobile industry is revealed in its announcement of complete figures for new car registrations in the United States in 1936, showing a total of 930,250 new Chevrolet passenger cars licensed in the country.

As compared with 1935, Chevrolet showed a gain in passenger car registrations of 275,552, or 41.7 per cent, over the 1935 total of 656,698, says the statement issued from the office of W. E. Holler, vice president and general sales manager.

A comparison with the industry as a whole shows that of the 3,404,497 new cars registered in the United States, 27.3 per cent were Chevrolets. The Chevrolet gain of 273,552 over the previous year was more than double that of any other manufacturer, and exceeds the combined gains of the seven makers ranking from second to eighth place in registrations.

In truck registrations also, Chevrolet held first place by 204,344 units, as compared with 167,129 for 1935. Chevrolet's line of trucks over the next highest manufacturer was 27,100 units. Total registrations for all makes of trucks were 611,644; Chevrolet representing more than one-third of all the new units licensed. Chevrolet's total of new units, both passenger and commercial vehicles, registered in 1936 was 1,144,694.

Application for Emergency Crop and Feed Loans

Applications for emergency crop and feed loans for 1937 are now in the office of the Lincoln County Assessor being received at Carrizozo, N. M. by John W. March field supervisor of the Emergency Crop and Feed Loan Section of the Farm Credit Administration.

These loans will be made only to farmers who cannot obtain credit from any other source, as provided by regulations issued by the Governor of the Farm Credit Administration. The money loaned will be limited to the farmer's immediate and actual cash needs for growing his 1937 crops or for the purchase of feed for livestock and in no instance may exceed \$400.

Farmers are not eligible for these loans if they can borrow from an individual, production credit association, bank, or other concern. Emergency crop and feed loans will not be made by the Farm Credit Administration to standard rehabilitation clients of the Resettlement Administration whose current needs are provided for by Resettlement.

As in the past, the security for these loans will consist of a first lien on the crop financed if the loan is for the production of crops, and if for the purchase of feed for livestock, than a first lien on the livestock to be fed. Landlords, or others having an interest in the crops or the livestock to be fed, will be required to waive their claims in favor of the lien to the Governor of the Farm Credit Administration until the loan is repaid.

Checks in payment of the approved loans will be issued by the Regional Emergency Crop and Feed Loan Office at Wichita, Kansas.

Vacant Public Lands

Subject To Lease Under The Taylor Grazing Act, Dist. 4

The United States Land Office at Las Cruces, New Mexico, has been officially notified that the following lands were on January 13, 1937, eliminated from New Mexico Grazing District No. 4. The vacant public lands in these townships are now subject to lease under Sec. 15 of the Taylor Grazing Act: T. 4S., R. 11E. T. 5 S., R. 11E. T. 6S., R. 11E., Secs. 8 to 16, 9 to 21 and 25 to 36 inclusive. T. 7S., R. 11E., Secs. 1 to 11 14 to 23, and 26 to 36, inclusive. T. 8S., R. 11E., Secs. 1 to 82, inclusive, N 1/2 Secs. 33 to 36, inclusive. T. 9 S., R. 11E., Secs. 5, 6, 7 and 18. T. 6S., R. 12 E., Secs. 25 to 36. T. 7S., R. 12 E., Sec. 36. T. 8 S., R. 12E. T. 9S., R. 12 E., Secs 1 and 2.

Paul A. Roach, Register
U. S. Land Office.

BINGHAM BREVITIES

Mr. C. O. Hayes, R. E. I. Griffin and son Alvin were in Socorro Friday.

Mr. and Mrs. W. E. Weatherbee spent Sunday in this community.

Mrs. June Ratts was in Carrizozo Saturday.

Mrs. B. M. Glover and children spent Sunday in the C. O. Hayes home.

We have had good rains the rest part of this week.

We were unable to have school Tuesday on account of the bad roads.

Webb Weatherbee and Boss Dean transacted business in Socorro Saturday.

Mr. and Mrs. Wayne Withers, Mr. and Mrs. Clyde Fisher and baby spent Sunday in the J. P. Glover home.

Mrs. June Ratts and son Jimmy are sick with the flu this week.

Mr. June Ratts returned from Carrizozo Saturday where he has been employed.

Mr. J. P. Patrick, Webb Weatherbee and Boss Dean were in Socorro on business Thursday.

Don't be afraid of wasting time by learning something you aren't required to know.

Deep in every human breast is the instinct to do worthwhile work.

The Cobras

Mr. Ben Sanchez called a meeting Wednesday for the purpose of organizing the Cobra ball team for the coming season. Another meeting will be held next Sunday. We are informed that Mr. Wm. Zamora, popular Ft. Stanton player and a pitcher from Las Cruces may join the Cobras.

Miss Leslye Cooper was a guest of friends in Alamogordo yesterday.

Mrs. Eva Emerson and son Amos, were business visitors Wednesday from Baca canyon.

Mr. Sam Bigger of Capitan, was a business visitor here Thursday.

Current Events in Review

By Edward W. Pickard

Clark, Wheeler Attack President's Court Plan

THOUGH President Roosevelt persisted in his intention to force through congress his measure to "reform" the federal judiciary, law-makers who have been his warm supporters are coming out one by one in hot opposition to his plan to pack the Supreme court. Among them are Senator Bennett C. Clark of Missouri and Senator Burton K. Wheeler of Montana, both leading Democrats. They studied the scheme carefully before issuing their statements. The announcements of these men were scarcely offset by a radio address by Attorney General Homer S. Cummings, dutifully defending the President's plan.

Senator Clark said he was entirely in accord with the minor proposals in Mr. Roosevelt's scheme, but was totally unable to agree with the provisions for packing the Supreme court. He continued: "The conclusion is unescapable that to increase the court at one time by the increase of an additional two-thirds of its present membership is to pack the court with reference to a particular situation and particular litigation now pending or to be immediately pending before it."

"To me it seems a radical and unnecessary change in our whole system of government, without the submission to the people in the proper form of an amendment to the Constitution. Therefore I shall vote against that portion of the President's proposal."

Then came Senator Wheeler, stalwart radical, with a statement which it was reported he made public over the protests of the White House. He said in part:

"I am, always have been, and will continue to be opposed to the usurpation of legislative functions by the courts. I am, have been, and will be opposed to usurpation of legislative and judicial functions by the executive branch of the government."

"The issue is 'How are we going to prevent in the future this usurpation of the legislative power by the courts?' Shall we attempt to coerce them by packing the court with six new men? If we do add six new men to the court does it correct the evil? Or is it merely a temporary expedient?"

"Every labor leader, every farmer, and every progressive-minded citizen in the United States would have been shocked and protested from the house tops if President Harding, President Coolidge, or President Hoover had even intimated that they wanted to increase the Supreme court so as to make it subservient to their wishes."

"If this administration can increase the Supreme court to make it subservient to its wishes, another Harding administration can do the same thing."

"There is nothing democratic, progressive, or fundamentally sound in the proposal advanced by the administration."

Attorney General Cummings advanced these two reasons for supporting the President's proposal:

New blood should be injected into the judiciary in order that the Constitution shall be construed in keeping with the changing needs produced by new complexities of national life.

The congestion of dockets in the federal courts is largely due to the inability of aged and infirm judges to perform their share of the work.

Investigation has shown, however, that the second reason is unsound. Commenting on Mr. Cummings' speech, Senator Glass of Virginia said: "I think it indicates that the country is in infinitely greater need of an attorney general than of additional judges on the Supreme court or of judicial wet nurses for six of the present members of the court."

Senator Minton of Indiana defended the plan in a radio address but probably did it more harm than good, for he frankly admitted the purpose of the administration is to change the personnel and views of the Supreme court, in order that President Roosevelt's New Deal program will be held constitutional.

World is Preparing for Another War

ACCORDING to a survey made by the Foreign Policy Association, the world expenditure on arms and armaments in preparation for war has more than doubled in the last two years, reaching a record height of \$11,000,000,000 in 1936 alone. The

cost of armaments in 1934 was \$5,000,000,000.

Soviet Russia in both years is accredited with the lead in the spending for military purposes, its military budget for 1936 reaching almost \$3,000,000,000. But the greatest increase in the course of the two years was recorded by Germany whose tremendous rearmament program has raised the German military budget to seven times its 1934 level. It is estimated as spending \$2,600,000,000 in 1936.

In Germany, Japan and Italy the proportion of the national income going to unproductive military purposes has reached "alarming figures" and many other countries have "strained their financial resources," the report declares.

Indiana Auto Workers Appeal to President

MEMBERS of the United Automobile Workers stirred up a riot in Anderson, Ind., that resulted in the injury of several men, and Governor Townsend responded to an appeal from the sheriff of Madison county by sending National Guardsmen to maintain order and keep outsiders from entering the county to aggravate the trouble. Thereupon Victor Reuther, a leader of the U. A. W., sent a telegram to President Roosevelt calling for "direct intervention" and demanding the lifting of the military restrictions "so that union members can become free men again." Information from Anderson indicated the union men were directly responsible for the disorder.

Hayashi Urges Russia and China to Be Peaceful

GEN. SENJURO HAYASHI, premier and foreign minister of Japan, in a formal statement of policy to the parliament, said his government would "pay special attention" to the adjustment of the empire's relations with Soviet Russia and China, and urged those nations to cease their quarrels with Japan and try to comprehend Japan's position and aims in East Asia. He called attention to the fact that Japan no longer is bound by any naval limitations treaty but declared "there shall be no change in our policy of strict adherence to the principle of nonmenace and non-aggression."

Hayashi's cabinet decided on a budget reduction of approximately 0 1/2 per cent. Lieut. Gen. Hajime Sugiyama, the new war minister, objected to any cut in the huge army budget, but it was reduced slightly.

British Destroyers Fire on Spanish Rebel Plane

SIX bombs were dropped by a plane, supposedly a Spanish insurgent craft, close to two British destroyers off the coast of Algeria. The warships, which were not damaged, drove away the plane with gunfire. The British government at once lodged protests with the Fascist authorities.

Valencia, the temporary capital of the loyalist government, was shelled by an insurgent warship and many persons, most of them women and children, were reported killed and injured. The city is packed with refugees and the civil population was panic-stricken by the bombardment.

A few days previously a Fascist warship shelled Barcelona, capital of the autonomous state of Catalonia.

Schuschnigg Favors Return of Hapsburg Dynasty

RESTORATION of the Hapsburg dynasty in Austria was openly advocated by Chancellor Kurt Schuschnigg, who committed his government party to that proposition. He intimated that a plebiscite would be held to decide the question.

The chancellor asserted that increasing official support would be given to the campaign to place Archduke Otto of Hapsburg again on the throne which his father, the Emperor Karl, "temporarily renounced" November 11, 1918. The archduke is twenty-four years old.

Jim Farley Banqueted by 1,600 Democrats

HEADED by President Roosevelt and Vice President Garner, 1,600 Democratic government officials, state committeemen and prominent figures in the worlds of business and sports honored James A. Farley with a banquet in Washington. Mr. Garner was master of ceremonies and called the roll of distinguished guests by states. Mr. Roosevelt made a speech, which was carried to the country by radio.

General Motors Strike Is Settled by Compromise

BOTH sides making concessions, the General Motors strike came to an end in what Governor Murphy of Michigan called "an enduring peace." Operations of the great corporation had been paralyzed for 43 days, and the losses to it in business and to workers in wages have been immense. Partly through the skillful efforts of James F. Dewey, veteran federal labor conciliator, John L. Lewis, head of the C. I. O., and other union leaders, and the officials of General Motors were persuaded to modify the defendant stands they had maintained through eight days of negotiations in Detroit, and the governor was enabled to announce the settlement.

Under the terms of the agreement: 1-The corporation recognized the union as the collective bargaining agency for those employees belonging to the union. 2-The corporation and the union agreed to commence collective bargaining negotiations on February 16. 3-The union agreed to end the strike and evacuate all plants occupied by strikers. 4-The corporation promised to resume operations in all strike-bound or idle plants "as rapidly as possible."

5-All employees are to return to work without discrimination against strikers. 6-The union agreed that pending negotiations there will be no other strikes or interference with production. 7-During existence of the collective bargaining agreement contemplated, all opportunities to negotiate shall be exhausted before any other strike or production interference is attempted by the union. 8-After evacuation of plants the corporation agreed to dismiss the injunction proceedings started by the corporation against the union or any members in Flint, Mich.

Production of really germ-free animals is a matter of very great practical importance.

Animals Kept Germ-Free

The problem is two-fold: the animals must be brought into the world germ-free, and they must be kept in a germ-free world once they have been born.

The first step is partly taken care of by the nature of pre-birth existence itself. The unborn young of any mammal, wrapped in their fetal membranes, are normally germ-free. During and after the process of birth they receive their first inoculations.

Professor Reyniers therefore taken the prospective mothers of his experimental animals (usually guinea pigs), shaves them, bathes them in antiseptic fluid, covers them with a sterilized envelope. Then he puts the animals into a closed horizontal cylinder that looks like a small steam boiler, known as the operating cage. Its interior has been rendered absolutely sterile, and only germ-free air is admitted.

Rubber Gloves Used

A pair of long rubber gloves are sealed into two openings in the side of the cylinder. A third, glassed, opening serves as an observing window.

In this operating cylinder he opens the body of the mother animal by standard caesarean surgery, and removes the young through a connecting tube into a second cylinder, the rearing cage, which is also rigidly sterilized.

To test for possible contaminations, an animal from each group is instantaneously killed and its whole body ground to hamburger in a meat-grinder operating under sterile conditions in a third cylinder. Parts of the ground-up guinea pig are transferred to tubes containing a large number of different culture fluids for the encouragement of bacterial growth of any kind that may be present. If no growth occurs, and if microscopic tests are negative, it is considered reasonably well assured that the young animals are really germ-free.

Wallace's Solution of the Farm Problem

SOLUTION of the farm problem, as devised by agricultural leaders who have been in conference with Secretary Wallace, is based on Mr. Wallace's ever-normal granary plan. It would operate on these four stages:

1. Soil conservation payments would be continued until production balances demand. 2. When a surplus in any commodity is grown, the government would offer farmers loans at market prices for storage of the commodity in bins. 3. If the surplus continued, soil benefit payments for removal of acreage from cultivation would be increased. 4. Should surpluses increase to 10 or 15 per cent above demand the government would impose taxes on excess production to force acreage reduction.

Officials said no definite plan of taxation has been worked out.

Navy Cannot Get Bids for Steel It Needs

DOMESTIC manufacturers persistently refuse to offer bids on the steel that the navy needs for its warship building program. President Roosevelt wants to know why this is, and so far he has found out that the Walsh-Healy government contract law is to blame. That act requires that all manufacturers filling government orders in excess of \$10,000 shall comply with minimum wage and maximum hour standards.

Since the act became effective last year, the navy has advertised for bids off 25,000,000 pounds of steel but has been able to place orders for only 7,000,000 pounds.

Spokesmen for the Navy department indicated no further bids would be asked until the industry has recorded its position or unless the Labor department moves to relax the labor standard provisions of the law.

President's Trade Treaty Power Is Extended

THE house passed and sent to the senate a resolution extending for three years the President's power to negotiate trade treaties with foreign nations irrespective of congressional approval. Some Democrats voted against the measure and were applauded by the little "body of Republicans." The revolvers were led by W. P. Connery of Massachusetts, who hails from a textile city, and J. Mark Wilcox of Florida, whose district is noted for its vegetables. Both said the opposition was based on complaints from their constituents.

Amnesty for Political Offenders in Mexico

SEEMINGLY confident that his government is now safely established, President Lazaro Cardenas of Mexico issued a decree granting amnesty to all political offenders, under arrest for or accused of rebellion, sedition or other subversive activities. Under special powers given him by congress he squashed 3,841 court proceedings against more than 10,000 persons accused of antigovernment plots.

Keeping Up With Science

By Science Service

Germ-Free Animals Will Be Big Aid to the Scientist

How They Are Reared by Notre Dame Biologist

Notre Dame, Ind.—Animals that never have a germ in their bodies, from birth to death, are being produced at Notre Dame university, in the laboratories of Prof. J. A. Reyniers of the biology department. This is something really new under the sun; for every animal body that walks, from that of man himself down to the lowliest amoeba, is the unwitting, often unwilling host to swarms of bacteria and other micro-organisms.

Production of really germ-free animals is a matter of very great practical importance.

Animals Kept Germ-Free

The problem is two-fold: the animals must be brought into the world germ-free, and they must be kept in a germ-free world once they have been born.

The first step is partly taken care of by the nature of pre-birth existence itself. The unborn young of any mammal, wrapped in their fetal membranes, are normally germ-free. During and after the process of birth they receive their first inoculations.

Professor Reyniers therefore taken the prospective mothers of his experimental animals (usually guinea pigs), shaves them, bathes them in antiseptic fluid, covers them with a sterilized envelope. Then he puts the animals into a closed horizontal cylinder that looks like a small steam boiler, known as the operating cage. Its interior has been rendered absolutely sterile, and only germ-free air is admitted.

Rubber Gloves Used

A pair of long rubber gloves are sealed into two openings in the side of the cylinder. A third, glassed, opening serves as an observing window.

In this operating cylinder he opens the body of the mother animal by standard caesarean surgery, and removes the young through a connecting tube into a second cylinder, the rearing cage, which is also rigidly sterilized.

To test for possible contaminations, an animal from each group is instantaneously killed and its whole body ground to hamburger in a meat-grinder operating under sterile conditions in a third cylinder. Parts of the ground-up guinea pig are transferred to tubes containing a large number of different culture fluids for the encouragement of bacterial growth of any kind that may be present. If no growth occurs, and if microscopic tests are negative, it is considered reasonably well assured that the young animals are really germ-free.

Lots of Hemoglobin Is Necessary for Mountain Climbing

Washington.—It takes red-blooded men—and some animals—to stand high altitudes without getting mountainsick or experiencing other unpleasant symptoms when they first reach the heights, it appears from studies carried out as part of the program of the International High Altitude expedition.

Lack of oxygen in the atmosphere on a mountain top is responsible for most of the unpleasant symptoms. Persons who can enjoy their meals and be in a cheerful frame of mind when first climbing to oxygen-rare high altitudes owe this ability to the stuff which gives the red color to their blood, hemoglobin.

Hemoglobin Carries Oxygen

Hemoglobin besides coloring blood red plays the vital role of oxygen carrier between lungs and the rest of the body. Everyone has hemoglobin in his blood, but apparently some kinds of hemoglobin are more efficient at grasping oxygen from the air as it is breathed into the lungs.

Evidence for this was obtained in studies of mountain animals; such as the vicacha, the llama and the vicuna of the Andean highlands, and reported by Drs. F. G. Hall of Duke university, D. B. Dill of Harvard university, and E. S. Guzman Barron of the University of Chicago to the Journal of Cellular and Comparative Physiology. These animals all had hemoglobin which was more avid for oxygen, and also had more hemoglobin in each red blood cell, than did animals that live at sea level.

Woman Auto Driver Good as the Man in the Essentials

Results of Tests Made in Towns of Iowa

SCIENCE has come to the defense of the woman driver. If she is not so efficient as are the men, it is not because of her sex or innate abilities but merely because she lacks the driving experience necessary for greatest skill.

This is shown by tests of more than 2,000 persons on vision, reaction time and other essential abilities for the automobile driver, made by Dr. A. R. Lauer, associate professor of psychology at Iowa State college.

Only in strength of grip was there any difference between the sexes. Among the younger persons tested, the men were somewhat better than the women in judging distance. Women were somewhat inferior in tests of performance of skills resembling auto driving, due to lack of experience of those tested.

Best Drivers at 22

Best drivers are those twenty-two years old, Dr. Lauer reported to the American Association for the Advancement of Science. This is true of both men and women. In complex mechanical skills, boys and girls are about equal up to the age of fifteen. After that boys are superior, but this difference disappears again in later age.

Keeness of vision drops off rather sharply for both sexes after the age of forty to forty-five, and after fifty-five the loss is still greater.

Ability to stand glare begins to lessen at the age of twenty, and the drop is much sharper after forty.

In making these tests, Dr. Lauer transported his driving clinic about like a circus making two-day stands in each town and inviting the public to come and be measured.

Women Are Warned of Health Hazard in Eye Shading

London.—The woman who turns to exotic shades for her eyelids in the quest for additional beauty and glamor may wake up some morning to find herself with a distinctly undesired and non-glamorous reddening and swelling of her lids.

The danger of inflammation of the eyelids, with reports of actual cases, is pointed out by Dr. Henry C. Semon, physician to the dermatological departments of the Royal Northern, Hampstead and King George General hospitals, London.

In the old days, eye shading was confined to actors and actresses and the only cosmetics used were black or varying degrees of it, made from lampblack, vegetable and animal charcoal and other sources of carbon. In these there was probably no harm, Dr. Semon says in his report to The Lancet.

Risk in Aniline Dyes

Modern vogue for green, blue, silver and other shades of eye shadow cosmetics to match costumes and for various occasions brings a new hazard—that of the aniline dyes which must be used to achieve these desired shades for the eyelids.

Nothing the chemist can do in the way of treating these dyes for use in eyeshades will entirely obviate the risk of their producing inflammation, Dr. Semon says. Changes in the perspiration and skin secretions and the effects of sunlight, temperature changes and the sulphur in city air cannot be taken into account in the chemist's calculations, and these may alter even the most carefully prepared compound.

The skin of the eyelid is perhaps the most delicate of all the skin on the body, Dr. Semon points out, which increases the chance of its being irritated.

Diatomite Deposit Is Found in Nevada

Carson City, Nev.—Diatomite, a useful earthy mineral, has been found in a large deposit in Nevada. The bed is nearly 100 acres in extent and in some places more than 50 feet thick. Hundreds of thousands, perhaps millions, of tons are in sight.

Formerly much used as a "carrier" for nitroglycerine in making dynamite, this mineral has yielded place to other materials in the explosives industry, and has itself found a number of other employments.

Diatomite comes in two varieties: a coarse-grained yellow form good also for filters and for heat insulation, and a fine-grained white form used in making toilet preparations, jewelry polishes, and as an inert "carrier" in salves, ointments, etc. The Nevada bed is an exceptionally fine-grade of the white form.

Ask Me Another

A General Quiz

- 1. Who was Alaric?
- 2. Members of what race are sometimes called "Huskies"?
- 3. Which is the larger unit, a brigade or a regiment?
- 4. Who was father of Queen Anne of England?
- 5. Who wrote "The Vision of Sir Launfal"?
- 6. What is the significance of a "hall-mark"?
- 7. How many "Fates" were there in classical mythology?
- 8. What is a brogan?
- 9. Was the lute a stringed instrument?
- 10. What is a coulomb?
- 11. What is dross?
- 12. What English slang word corresponds to the French "Chauvinist"?

- ### Answers
- 1. A Visigoth leader who sacked Rome.
 - 2. Eskimo.
 - 3. A brigade.
 - 4. James II.
 - 5. James Russell Lowell.
 - 6. It is a mark of genuineness.
 - 7. Three.
 - 8. A "heavy shoe."
 - 9. Yes.
 - 10. An electrical unit (the amount conveyed by one ampere in one second).
 - 11. Refuse of melted metal.
 - 12. Jingolst.

U. S. Railroad Mileage

The railroad mileage of the United States as compared with that of other countries is by far the greatest, with 249,433 miles. The Soviet Union is second, with 48,467; India is third, with 41,724; Canada is fourth, with 41,409, and France is fifth, with 39,467.

Life's Blessings

NOTHING raises the price of a blessing like its removal; whereas it was its continuance which should have taught us its value. There are three requisitions to the proper enjoyment of earthly blessings—a thankful reflection on the goodness of the Giver, a deep sense of our unworthiness, a recollection of the uncertainty of long possessing them. The first would make us grateful; the second, humble; and the third, moderate. — Hannah More.

A critic is seldom constructive.

Constipated 30 Years

"For thirty years I had stubborn constipation. Sometimes I did not go for four or five days. I also had awful gas bloating, headaches and pains in the back. Adierika helped right away. Now I eat usual, normal food, anything I want and never feel better, I sleep soundly all night and enjoy life!"

—Mrs. Mabel Schott.

If you are suffering from constipation, sleeplessness, sour stomach, and gas bloating, there is quick relief for you in Adierika. Many report action in thirty minutes after taking just one dose. Adierika gives complete relief, cleaning your bowels tract where ordinary laxatives reach only the rectum.

Dr. H. L. Shook, New York, reports: "In addition to intestinal cleansing, Adierika checks the growth of intestinal bacteria and restores health."

Give your bowels a real cleansing with Adierika and see how good you feel. Just one spoonful relieves GAS and stubborn constipation. At all Leading Druggists.

WOMEN WHO HOLD THEIR MEN NEVER LET THEM KNOW

NO matter how much your back aches and your nerves scream, your husband, because he is only a man, can never understand why you are so hard to live with one week in every month.

Too often the honeymoon experience is wrecked by the nagging tongue of a three-quarter wife. The wise woman never lets her husband know by outward sign that she is a victim of period pain.

For three generations women have told another how to go "smiling through" with Lydia E. Pinkham's Vegetable Compound. It helps Nature tune up the system, thus keeping the discomforts from the functional disorders which women must endure in the three ordeals of life: 1. Turning from girlhood to womanhood. 2. Preparing for motherhood. 3. Approaching "middle age."

Don't be a three-quarter wife. Take LYDIA E. PINKHAM'S VEGETABLE COMPOUND and Go "Smiling Through."

THE CHEERFUL CHERUB

Through life's mad rush there comes to me At times a little peaceful stop Like standing in a crowded street Right by a nice big traffic cop.

GUNLOCK RANCH

by Frank H. Spearman

Copyright Frank H. Spearman
WNU Service

SYNOPSIS

Sleepy Cat, desert town of the Southwest, is celebrating the Fourth of July. Jane Van Tassel, beautiful daughter of Gus Van Tassel, who owns Gunlock ranch, has arrived from the East for the first time. She watches the Fourth Day celebration in company with Doctor Carpy, crusty, tender-hearted friend of the community. Henry Sawdy of the Circle Dot ranch, tricked in a fake horse race the day before by Dave McCrossen, foreman at Gunlock, plans revenge. He enters Bill Denison, a handsome young Texas wrangler, in the rodeo which McCrossen is favored to win, and lays heavy bets on him. Unknown to the crowd, Denison is a champion horseman. McCrossen and the young stranger tie in the various events. Denison then drops a cigarette carelessly. Racing down the track full tilt, he picks up the cigarette. The verdict goes to Denison when McCrossen refuses to attempt the stunt. Entranced by the crowd, Denison agrees to perform another trick. Jane Van Tassel is asked for her bracelet and throws it on the track. Just as Denison rides to pick it up a yell from Barney Ribcock, a McCrossen henchman, scares the pony, nearly costing the rider his life. Gun play is prevented by the intervention of Doctor Carpy. Back on Gunlock ranch, after two years in Chicago, because of her father's illness, Jane gets lost riding in the hills and meets Denison, now a neighbor, who guides her home. Not knowing her identity, he speaks bitterly of Van Tassel. She tells McCrossen who brought her home and he denounces Denison as a cattle thief. Later she asks Doctor Carpy why her father is unpopular and he tells her it is because of Van Tassel's ruthless and unscrupulous character. McCrossen tries to woo Jane, but is sharply rebuffed. Once again she loses her way in the hills and meets Ribcock. On impulse he tells her that he has been guiding her home. Their interest in each other grows, and she reveals her identity to him. Jane is distressed to learn from Carpy that her father had wronged Denison. The Texan had worked at Gunlock as foreman and been promised a share in the profits. When Van Tassel refused to let Denison have his share, he has been running cattle off Gunlock ranch. Shamed and humiliated, Jane avoids Denison, but longs to see him. When at length they meet, he confesses his love.

CHAPTER V—Continued

"How is McCrossen coming on, doctor?" asked Jane.

"He'll be up in a few days now. The infection is disappearing. How are you? You're the one I'm interested in."

"Following orders like a lamb, doctor. Don't you see how brown I'm getting?"

"Yes, outside. But what about inside? That's where I want you to get brown. By the way, your friend Bill Denison was in to see me the other day. He's been up north with the fire fighters—way up on the Crazy Woman at Jim Karamia's ranch. Look here, girl," he continued, "what are you doing tomorrow? We are going to have a moose dinner. Ever eat moose? Come in and try it."

Jane hesitated. "Oh, I don't know—"

"Come along. There'll be nobody else there, if that's what you're afraid of."

Sleepy Cat looked deserted when Jane rode in next day. Jane asked McAlpin at the barn where all the men were.

"Up north, fire fighting."

"Is it as bad as that?"

"I never saw it so bad in the twenty years I've lived here and at Calabasas! They brought in a wagonload yesterday of the worst burnt men I ever seen in my life. The hospital's pretty near full. Doc Carpy was there all night."

Jane was for going home. She walked up to the hotel and talked with Puss, the housekeeper. "Don't you go," counseled Puss. "If the doctor's expecting to see you, he'll be all upset if you don't stay."

"But with all these men in the hospital? I'd rather wait till he has a free day," suggested Jane.

The housekeeper laughed. "If you wait for a free day for the doctor, you'll wait till Judgment day. And he might be busier then than he is now. There's a preacher in town this week, baptizing folks down in the river. 'Cording to what he says, there'll be a lot more Sleepy Cat fire fighters needing help Judgment day than his needin' it now. Come in here and take off your things."

When Jane sat down with the doctor in his private dining room for the moose dinner, he made light of the fire situation as well as of his labors.

"All in the day's work. Puss is an alarmist. She's always telling me I'm working too hard."

Jane repeated the anecdote of the preacher and Puss' application of it to the doctor himself on Judgment day.

Carpy laughed. "That's Panama she's talking about. Puss is powerful afraid of him. Who is he? Why, a pretty good fellow—used to be an auctioneer and all-around gambler—got converted—preaches up and down the line from Medicine Bend to Sleepy Cat. But he volunteered for fire fighting. He's one of the men got burnt yesterday, and he's up with the rest of 'em at the hospital."

The ex-sheriff, Bill Pardloe, rode out to Gunlock two days later and conscripted the men to fight fire coming down the Crazy Woman and threatening Sleepy Cat.

The quiet of that day and the next was like a calm before a storm. After supper Jane ordered her pony saddled and rode clear up to the summit of Gunlock Knob, where she could see the northern country for many miles.

When she reached the top she was sorry she had attempted the climb. The spectacle was awe-inspiring, but terrifying.

Far beyond the hills and all along the northern horizon she saw patches of dull, silent red, slowly rising and falling, at moments increasing, and again subsiding.

She fell asleep early, but after midnight she woke. The sky was fairly clear, and she could hear the wind whining in the pines about the ranch

house. She was roused from her thoughts by the approaching clatter of galloping hoofs. Raising herself to support her head on her elbow, she listened. The clatter came nearer, the galloping faster. In a moment she heard a man pull his horse sharply up and spring from the saddle under her window. "Miss Jane!" he called.

"Wake up, please!"

She knew the voice. "I'm awake, Bull. What is it?"

"The boys are ridin' in behind me."

"All of them?"

"Everybody. They'll be here inside twenty minutes."

"What time is it, Bull?"

"From the moon, about two o'clock. The boys'll want somethin' to eat. They're ridin' right out again. I'll call Quong."

"What's the matter, Bull—what are they ridin' out again for?"

"The fire has crossed the river."

CHAPTER VI

Bull-Page, the messenger of alarm, turned in with Quong and Jane to make ready a hasty supper for the hungry, weary men.

McCrossen was in command of the fire fighters and, at the head of the table, looked his part. As he rose from the supper table, his eyes were never brighter as he walked, smoky and covered with the marks of the day's hard fight, but smiling and fresh, over to where Jane was standing.

While Jane asked questions, McCrossen lighted a cigarette. "Not a bit of danger, Jane, to Gunlock—not while I can get out on the fire line, anyway. I've fought these infernal blazes all my life, and I don't figure this one's goin' to beat me. The only thing that worries me, Jane, is to think of your bein' here alone at home while we're fire-fightin'."

"Of course, I can't help some worry now, with the ranch threatened," she returned thoughtfully.

"Jane," he said impressively, "you needn't worry. I like to fight for a girl like you. While I'm able to raise an arm, Jane, I'll be out there thinkin' of you." His hands closed firmly on her shoulders.

She shrugged them and edged un-pleasantly away. "Saddles, boys!" shouted McCrossen in his rich, hearty voice. "Look alive, there, everybody! Come over to where my horse is, Jane. I want you to say good-bye to us! Give the boys a word of cheer."

"Where are you going?" she asked.

"Over the Divide. I want to do some backfirin' north of the pastures. Come along, girl." He insisted, taking her arm firmly.

All at once he caught her in a viselike grip of his arms and kissed her twice before she could escape. She slapped him indignantly and pushed him violently away.

McCrossen laughed. "Slap me again, Jane; that was worth a string of slaps, girl. But why not take a little practice? You'd get to like it, same as I do!"

Toward the night of the second day, the fire crew struggled back to the ranch house, McCrossen at their head. The store of beer prudently laid in from town was rapidly depleted—circumstances seeming to forbid the restrictions that Jane usually imposed.

Next morning, the sun rose hot and in an atmosphere without a breath of wind. Faces were brighter.

But after breakfast, the mail carrier, Ignace, from the Reservation, on his way to town, brought disquieting news. A fire had broken out in the timber along the eastern boundary, and every buck had been called out to fight it.

McCrossen listened carefully. "Which way was the wind, Ignace, when you left?"

"From the east."

"Hell's bells," exclaimed McCrossen, "just where we don't want it." He questioned the carrier closely. The big ranch was now threatened on the southeast, and McCrossen started with the freshest of his men for the new danger point.

In the afternoon Jane rode into town to order some supplies sent out. While she was in Ribdock's store, a white man from the Reservation came in. The clerk who waited on him asked him about the fire down his way.

"Not so good," said the man. "A new one broke out this morning between the Reservation timber and Bill Denison's ranch. Bill's in getting men together now."

Jane, in another aisle and unobserved, walked quietly outdoors and down the street for McAlpin's livery barn.

"Mose," she said to the hostler on duty, "is Bill Denison in town?"

"He is. His horse, Music, is here—Bill rode in pretty fast, an' I been rubbin' Music down. Bill says—"

"Mose, I want to see Bill. Go up the street and see if you can find him. Tell him I want to see him and I'll be up at the hotel."

Half an hour later Jane, sitting with the door open in Doctor Carpy's office, off the hotel lobby, heard footsteps approaching and, turning, saw Denison. She rose quickly, extended her hand, took his without a greeting, and spoke rapidly and nervously. "I heard you were in town," she said, "and that you were in danger at the ranch—I suppose, for that matter, we all are. But they said you were taking out men, and I wanted to see you, Bill, and ask what we could do to help. You won't take that amiss, I'm sure."

"How could I take anything amiss from you?"

"In a common danger," she said, flushing in some confusion and interrupting him to hide it, "we ought to help one another in the hills. What is there I can do? What is the situation, Bill?"

"Well, I suppose I might say, it's like the situation of a man with a loaded pistol pointed at his head," he answered. "I'm all right as long as the gun doesn't go off. The wind's got its finger on the trigger, and you know how these hill winds are—blamed uncertain when they get going—"

"But what can we do at the ranch to help make you safe? Is there anything, Bill? Anything to help?"

Both were conscious of slight strain. Denison shuffled awkwardly. "Why, Miss Jane—"

"Since when Miss Jane?" she asked with asperity. "I didn't know—" he began.

"Neither did I know, Bill. Now answer my question. If you're in danger, tell me what I can do."

"Have the boys keep a close eye on the two Reservation fires. If either of 'em get around Gunlock Knob, it'll be kind of bad for both ranches."

"Yes, but, Bill, how am I to know when or whether they do get around the Knob? How am I going to know whether you yourself need help?" She was beginning to realize that it was impossible to get anything but evasive generalities out of him. "Tell me this: if you need help from us, will you send me word? Right away?"

He thought for a moment. "I'll send word over to you at the ranch house, Jane."

She could not escape the significance of his tone in uttering her name. But she kept her balance and spoke steadily:

"Keep your promise, Bill; I shall be waiting for the word when it comes."

Along the hill trail as Jane rode home the air was heavy with smoke drifting slowly up from the south. It was laden with the pungent smell of brush fire and acrid with the creosote of burned slashings from cut-over lands on the Reservation.

Reaching home, she was not surprised to find everything there abnormally quiet. McCrossen, with most of the men, was up in the hills. The sole exception to the general atmospheric gloom was Quong. Nothing had yet daunted the busy China boy.

When Jane dressed at daybreak and looked out, the wind had shifted and was blowing fresh from the south.

McCrossen and his men were up betimes. He reported to Jane that they had checked the fire up toward the pass. He was in good spirits. Jane went to her breakfast feeling reassured. She was finishing her coffee when Quong stuck his head through the kitchen door into the dining room and said: "Man to see!"

Jane walked to the front door and found a man on horseback.

"What can I do for you?"

"I've just come from Bill Denison's. He says if you can spare a dozen men quick, he can, maybe, save his ranch buildings."

"Tell him I'll do everything I can to get them over right away. your name?"

"Scott, ma'am."

Jane ran over to the corral, where McCrossen was closing the wire gate. "Bill Denison has sent a messenger over—"

"I saw him," interjected McCrossen curtly.

"—asking for help," Jane went on rapidly. "If we can get a dozen men over to him quick, he can save his ranch buildings—"

"A lot of gull, ain't it, Bill Denison lookin' to Gunlock for help?"

"No matter what differences there have been," insisted Jane firmly, "in the hills we're all going to stand together in a time like this. Get the men together, Dave, and get over quick and do what you can."

McCrossen, drawing from his pocket a plug of tobacco, bit off a chunk. "I don't approve of that."

"It's not a question of your approving, Dave. I want you to go. Right off, now!"

McCrossen was in no hurry. "Who's goin' to look after Gunlock if I go over to Bill Denison's?" he asked, regarding Jane sullenly.

Jane was nobody's fool on the danger of the situation.

"Dave," she exclaimed, impatiently, "you know the worst threat to us, with this wind, is from the south. If the Denison ranch burns we're in danger ourselves. Will you saddle up quick and get over there with the boys?" she demanded.

McCrossen made no move to go. "I'll tell you right now I've had a damned sight more experience in these forest fires than you have. And I say my place's right here!" He spoke loudly and angrily.

Jane grew white. "I want you to know I'm boss of this ranch. My father has told you so—and this order is going to be obeyed or I'll know why."

McCrossen faced her with as much animosity as he dared show. "Well, if you want to know one reason why your order won't be obeyed, just look at me—I'm a reason. I know where my place is when Gunlock's in danger," he thundered.

"Stop your talk!" exclaimed Jane. "Will you do as I tell you or not?"

"I will not."

"Then you're discharged as foreman of this ranch. Take your things and get off of it tomorrow morning."

"Like hell I will!"

Newest Silk Prints Go Pictorial

By CHERIE NICHOLAS

AS A sure antidote to winter gloom, as a reviver of crest-fallen spirits, as an unfailing means of buoying one up with that grand and glorious feeling that spring is nigh we recommend that you go stepping in a brand new silk print frock, the gayest, the brightest, the most animated in its patterning and coloring you can find to wear under your somber fur coat.

Hurry up if you want to secure the choicest, the most distinctive and outstanding from among the hundreds and thousands of prints now on display. Seriously in this word of advice offered for it is a fact the new silk prints are that intriguing and alluring we have known it to be a fact that certain particularly attractive patterns are unpacked, priced and displayed in the morning and by nightfall they are sold, not even a remnant left to tell the tale.

The new silks look new—distinctively new! Those that unmistakably bear a new-this-season stamp follow along unique lines of thought. They are more than mere dress media in that they have gone pictorial, illustrative, interpretative. They portray ideas, they entertain, they amuse. Some of the better high-class silk prints even go by name as an artist would entitle a picture which makes them all the more interesting. There is, for example, a clever looking new silk print called "film modes." The French love of American films inspired Schiaparelli to design this amusing print with the names of famous stars printed on colorful scrolls simulating cinema film. The attractive daytime frock centered in the illustration herewith is made of this star-encircled silk print, the color scheme being peacock blue and coral on black. The beret topping this costume, is worn far back on the head in latest approved manner, so as to show a perfectly groomed hair-dress with latest style-correct off-face movement.

The silk for the dress shown to the left by the same artist designer

registers as "subway of Paris," and its motif carries out the idea quite realistically. This silk tunes perfectly to the gay young dress picture to the left in the trio. The dashing cavalier hat is a resort fashion such as bespeaks a coming springtime vogue. The turn-up-at-side silhouette is exploited in several Paris collections.

Strawberries, fresh strawberries! At any leading silk department where smartest silk prints are flaunting their fascinating colors and breathtaking patternings ask for "fresh strawberries," and the knowing salesperson will bring out a perfectly charming silk crepe print such as is used for the making of the winsome dress shown to the right in the group. Appliques of the strawberries on net introduce an ornate accent in the bodice. The strawberry corsage is dyed to match the color of the berries in the print.

Others among the new and novel pictured prints now so fashionable are enlivened with animated figures, such as golf players teeing off, or "doggie" silks with frolicsome Scotch terriers performing tricks, galloping horses, quaint undersea fish, butterflies on the wing and other motifs too numerous to itemize. Most unusual and of high-style importance are the new landscape prints; marine scenes, too, grace these silks. It is indeed a versatile story of romance, history, music and what not that the smartest prints of the season are telling.

First-choice silks for immediate wear play up vivid splashes of striking florals in breathtaking colors against black or some other preferred dark background. The wide-spaced flower motifs look newest, these in huge single flowers or in wide-set bouquets. A new and lovely silk print has artful bowknots in gay colors. In Paris black and white prints are acclaimed.

EASY-MADE DRESS

By CHERIE NICHOLAS

If you are feeling that make-it-yourself urge when the displays of lovely, crisp, fresh-looking spring materials always bring to the woman who can sew, here is just the type dress that will start the home-sewing program off with a flourish. Almost boyish in its neat, trim lines this make-it-yourself dress of duobord fabric with no hidden tendency to shrink, since it has been sanforized-shrunk in the finishing of the cloth, offers plenty of reward in chic to the home dress-maker. It has a zipper neck closing and inverted pleats in sleeves, center back and pockets. A smooth black leather belt adds to the effect of tailored smartness.

VEILS CONTINUE TO BE IMPORTANT NEWS

By CHERIE NICHOLAS

Veils continue to be news in Paris. With the flood of holiday parties, women seem always to wear little hats, oftentimes of felt, with double veils floating over their faces. And that is the preferred position for the filmy things for lunch time, too.

Cocktail parties give a divided allegiance to veils, some of them over the face, but many draped over the back of the hat, making a frame for the face. Particularly amusing is one of Therese Peter's new creations. The tiny pointed skull cap for it is actually that—is of hand-knitted gold thread. Two tiny feather nightgales ornament it at either side of the front, and hold the veil which is also embroidered in nightingales and sweeps back over the entire hat, hanging almost to the shoulders.

Violette Marsan, who is definitely a partisan of the small hat dipping a bit over the forehead, prefers her veils to be quite stiffened so that they may be turned back from the face or extended out from the face. These are shorter, not extending beyond the nose.

Co-Eds Bring Ear Muffs

Back Into Fashion Again

When you hear a girl talking about getting out her ear muffs, don't think that this is the key line of a joke. For ear muffs are in vogue once more and before many weeks the chances are that most college girls and many others will be wearing them.

The bare-headed fad on college campuses has started the trend, but no one knows where it may lead to.

New Type Heels Out

Among the new covered heels, soon to make their appearance on smart dress shoes, are two models which owe their chic to sharp projections which jut out from the top of the inner surface and fasten under the instep.

Uncle Phil Says:

Determination Gets Results

A man who wishes anything for it, but he doesn't wish long if he is determined. He gets busy.

If virtue is its own reward why shouldn't the lack of it be its own punishment?

Everyone knows what he ought to do—quite often, it is the disagreeable alternative.

Don't worry about what the world is coming to. The world has always been coming to something and "coming to."

Helping Genius

If we can't have genius ourselves we should be kind or glad to hold the ladder for another.

It would be a wonder if wonders ceased.

Indignation over the sins of others gets no man into heaven.

People we like can bother us all they please; in fact, they don't bother us.

It is just as well to be aggressive. Any man would rather stand up for himself than take a back seat.

His Hope

THE night is mother of the day
The winter of the spring,
And ever upon old decay
The greenest mosses cling.

Behind the cloud the starlight lurks;
Through showers the sunbeams fall;
For God, who loveth, all His works,
Has left His hope for all.

—Whittier.

Time is as the body, and eternity the spirit of existence.—Barley.

BEING NOBLE

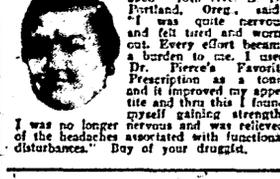

There is a great deal of self-satisfaction in being noble. Maybe that's its essence.

Beware Coughs That Hang On

No matter how many medicines you have tried for your cough, chest cold or bronchial irritation, you can get relief now with Creomulsion. Serious trouble may be brewing; and you cannot afford to take a chance with anything less than Creomulsion, which goes right to the seat of the trouble to aid nature to soothe and heal the inflamed membranes and the germ-laden phlegm is loosened and expelled.

Even if other remedies have failed, don't be discouraged, your doctor is authorized to guarantee Creomulsion and to refund your money if you are not satisfied with results from the very first bottle. Get Creomulsion right now. (ADV)

ARE YOU NERVOUS?

Mrs. Joe Homer of 2226 - 10th Ave. S. E., Portland, Ore., said: "I was quite nervous and felt tired and worn out. Every effort became fruitless. I was cured by Dr. Pierce's Favorite Remedy with a tonic and it improved my appetite and gave me functional disturbances. Day of your drug."

DEAF or HARD OF HEARING?

By all means send for a free booklet called "EARS" which will cover both interesting and instructive facts about the ears. It is also added to the hearing by means of the special Acousticium, through which new joy and pleasure can be brought into your life. Write Marion Ware, Association, 590 5th Ave., New York City, and the booklet will be mailed to you without any obligation whatever.

WNU-M 8-37

HELP KIDNEYS

To Get Rid of Acid and Poisonous Waste

Your kidneys help to keep you well by constantly filtering waste matter from the blood. If your kidneys get functionally deranged, the waste matter removes excess impurities, there may be poisoning of the whole system and body-aching distress.

Burning, acidity or too frequent urination may be a warning of some kidney or bladder disturbance.

You may suffer nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—feet weak, nervous; all falling out.

In such cases it is better to rely on a medicine that has won country-wide acclaim than to take the more costly, usually known, Doan's Pills. A multitude of grateful people recommend Doan's. Ask your druggist.

Washington News
Special To The News

Washington, Feb., 1937.—The highlight of the past week's news continues to be the discussion and argument on the President's Supreme Court proposal. In New Mexico the people are expressing themselves by wire and letter. Senator Chavez is open-minded on the matter. He has announced publicly that in a matter so grave as this he cannot conscientiously decide without careful consideration.

New Mexico is interested in legislation reducing a part of the carrying charges within Federal Reclamation Districts. The matter is receiving the attention of the Senate and House Committees on Irrigation and Reclamation. N. B. Phillips, Secretary and Manager of the New Mexico Elipant Butte Irrigation District, together with Roland Harwell, Manager of the Texas District, are in Washington for the purpose of consulting with New Mexico representatives in Congress and the Department of the Interior to see what can be done in behalf of the irrigation districts of the country. The last Congress passed legislation calling for a survey of these charges. After the survey a recommendation was to be made in regard to these matters. Unfortunately, sufficient money was not appropriated and the commission has not functioned as yet. As a consequence, no survey was made and the irrigation districts find themselves in the same position as last year. It is hoped that the survey can be postponed until the survey is made.

Secretary Wallace submitted an adverse report on Senator Chavez' Experimental Station Bill. The bill provides for the establishment of a Federal Experimental Station in the Middle Rio Grande District. It is hoped that Secretary Wallace will reconsider his report when the acute condition in the Rio Grande Valley and the peculiar needs of that district are brought to his attention. Among the visitors to the office the past week has been Marcelino Gutierrez of Santa Fe. Marcelino has recently been appointed Assistant Secretary of State in the place occupied by his mother, Mary Gutierrez. Marcelino carries with him the best wishes of the New Mexico people in Washington. They hope and trust that he will acquit himself with distinction. There is nothing that his mother would have liked better than to see her son occupy the place of love and esteem that she held in the eyes of the people of New Mexico.

Dave Grant, a prominent former New Mexico, was also a visitor to the office. Mr. Grant came from New York to attend the testimonial dinner for Postmaster General James A. Farley. It is to be remembered that during the campaign Mr. Grant was sent to New Mexico by the Democratic National Committee. He made speeches throughout the State on behalf of the National and State Democratic Ticket. He is a brother of Joe Grant, President of the El Rito Normal School.

Miss Ardeane McCammon of El Paso visited Miss Helen Huppertz Tuesday. George Boicourt painted a new ornamental sign on the Kandy Shop building for Mr. Todd last Tuesday.

Notice of Hearing of Final Report and Account

In the Probate Court of Lincoln County State of New Mexico

In the Matter of the Estate of Joe W. Sandfer, Deceased.

No. 355

To C. G. Sandfer and M. E. Sandfer, and to all unknown heirs of the said decedent, and all unknown persons claiming any lien upon, or right, title, or interest, in or to, the estate of the said decedent, and to whom it may concern:

You, and each of you are hereby notified, and notice is hereby given, that W. B. Rose, administrator, of the estate of Joe W. Sandfer deceased, has filed in the above entitled Court his final report and account as such administrator, and the Court has appointed Monday, the 3rd day of May, 1937, at the hour of 10:00 o'clock a. m., as the hour and day for hearing of objections, if any there be, to the approval and settlement of said final report and account, and the discharge of the said W. B. Rose as such administrator, and at the hour on the day named, the Probate Court will proceed to determine the heirship of said decedent, the ownership of his said estate and the interest of each respective claimant thereto and therein and the persons entitled to the distribution thereof.

The name and Post office address of the attorney for the administrator is E. M. Barber, Tucuman, N. M.

Witness the honorable Marcial C. St. John, Judge of the said Court, and the seal thereof, this 11th day of Feb., 1937.

Edward Penfield, Clerk.
(Seal) F12 M 5.

Notice of Hearing of Final Report and Account

IN THE PROBATE COURT OF LINCOLN COUNTY, STATE OF NEW MEXICO

In the Matter of the Last Will and Testament of Yginio Salazar, Deceased.

To Margarita Salazar, Jose Salazar and to all unknown heirs of the said decedent, and all unknown persons claiming any lien upon, or right, title, or interest, in or to, the estate of the said decedent, and to whom it may concern:

You, and each of you are hereby notified, and notice is hereby given, that Bernardo Salazar Executor of the Estate of Yginio Salazar deceased, has filed in the above entitled Court his final report and account as such Executor, and the Court has appointed Monday, the 22nd day of March, 1937, at the hour of 11:00 o'clock a. m., as the hour and day for hearing of objections, if any there be to the approval and settlement of said final report and account, and the discharge of the said Bernardo Salazar as such Executor, and at the hour on the day named, the Probate Court will proceed to determine the heirship of said decedent, the ownership of his said estate and the interest of each respective claimant thereto and therein and the persons entitled to the distribution thereof.

The name and post office address of the attorney for the Executor is John E. Hall, Carrizozo, N. Mex.

Witness the honorable Marcial C. St. John, Judge of the said Court, and the seal thereof, this 12th day of Feb. 1937.

Edward Penfield, Clerk.

New Household Refrigerator
Advanced in Home Service

Designed to provide all the basic refrigeration services to the American housewife, the 1937 super-duty Refrigerator with the motor-mixer makes its bow here. Engineered and manufactured by the household refrigeration division of General Motors, the new refrigerator has greater ice-ability, greater storage-ability, greater protect-ability, greater depend-ability and greater save-ability, according to its dealer. Judith Palmer is shown here demonstrating a few of the many features, chief of which is the seasonally new instant cube release which ends ice-cube struggle and makes cubes instantly available without effort on the part of the user.

Phelps-Dodge Corporation, Plaintiff, VS. Ancho Brick Company, Defendant

Notice

To all creditors, claimants and persons interested, under the receivership in the above entitled cause, and to whom it may concern:

Notice is hereby given and you are hereby notified that a due order, dated January 26th, 1937, has been made and filed by the court in the above entitled cause, being in part in wording and form as follows:

"This cause coming on to be heard on Report of J. H. Vandervort, the Receiver heretofore appointed herein, said report having been filed in this cause on October 7th, 1936, and it appearing herefrom that steps should now be taken for the purpose of winding up his Receivership, and that, for such purpose, the remaining assets in the hands of said Receiver should be sold, etc.

"NOW, THEREFORE, IT IS HEREBY ORDERED that Wednesday, the 3rd day of March, 1937, at 10 o'clock in the forenoon of said day, at the Court House of Lincoln County, in Carrizozo, New Mexico, be and is hereby fixed and set as the time and place for hearing on, and approval of said report, and of all prior reports made by said Receiver, and of any further reports which may be made and filed on or before said date, and for the purpose of hearing objections thereto, and for the purpose of taking further steps to wind up said Receivership; AND IT IS FURTHER ORDERED that said time and place be and is hereby fixed and set for the filing, presenting and approval or rejection of any and all claims against said Receiver, and which may be due under said Receivership, not heretofore allowed, authorized or approved; AND IT IS FURTHER ORDERED that any such claims, last above mentioned, not so presented and filed at the time and place aforesaid shall be forever barred, and that claimants thereof shall be estopped from later presenting same, or from participating under said Receivership;"

And in accord with said order, NOTICE is hereby given, and you are hereby notified that any and all claims against the Receiver under said cause, and which may be due under said Receivership, not heretofore allowed, authorized or approved, shall be filed and presented at the time and place specified in said order, and that, as to any such claims not so presented and filed the same shall thenceforth be barred, and claimants thereof shall be estopped from later presenting the same, or from participating under said Receivership.

And in accord with said order, NOTICE is hereby given, and you are hereby notified that any objections to said Receiver's report, or to the winding up of the Receivership under this cause, shall be presented at the time and place specified in said order.

Dated this 4th day of February, 1937.
J. H. Vandervort, Receiver under the above entitled cause.

Notice of Sale Under Execution

BY VIRTUE OF AN EXECUTION issued out of the Justice of the Peace Court of Precinct No. Four, Lincoln County, New Mexico, by Fred P. Bowser, Justice of the Peace on the 9th day of February, 1937, in a certain action wherein J. L. Sheppard and D. Sheppard, as plaintiffs recovered judgment against Wm. J. Sandfer, defendant for the sum of \$95.00 and costs of suit amounting to \$4.00 on the 6th day of January, 1937, and all accruing costs. I have levied upon the following described property, to-wit:

1 Hay Baler, 1 Cultivator (Riding), 2 Walking Cultivators, 1 Screw Vise, Culverts 30 feet (3 pieces), Culverts 40 feet, Wolf Proof wiring (1 Roll), 1 Meal Grinder, 1 Water Tank 300 gal. Lister (Riding), 1 Hay Rake, 1 Hay Stack about 2 tons, Corn 1000 lbs., 1 Wheelbarrow, 1 Gun Pistol, 3 Hand Saws, 1 Wood Truck, 1 Hand Sprayer, 15 Bales Hay, 1 Tudor Sedan Ford 1928, 1 Man Rip Saw, 1 Grind Stone, 1 Roan Work Horse branded J left shoulder, 2 Hogs, 1 Filing Cabinet, 1 Remington Typewriter, 1 Wood Tool Box, 1 Stillard Scales, One light Yellow Cow, branded on left shoulder.

That on Tuesday March 9, 1937, at 10 o'clock A. M. of that day at the Old Garner Farm, former residence of defendant, approximately one-half mile West of the Town of Picacho, New Mexico, I will sell all the right, title and interest of said Wm. J. Sandfer defendant, in and to the above described property at public auction for cash to the highest and best bidder to satisfy said execution and all costs.

S. E. Greisen,
Sheriff of Lincoln County
By George Romero, Deputy.

Mrs. Ada Gray has recovered sufficiently from her recent operation to return home.

Mr. Wm. Yates was admitted to the hospital Friday.

Miss Stella Vaughn and Miss Manning of Las Vegas visited Mr. and Mrs. Chas. Young for Washington's birthday.

Saves Farmer's Credit

How the Resettlement Administration came to the aid of a despairing farmer and saved him and his family is the inspiring story told recently by a county supervisor who helped the farmer and his family to plan their economic program.

On January 1, 1936, this farmer had absolutely nothing to begin a crop with. He had rented a good farm and bought livestock and implements providing he could get financing to pay for them. But he was unable to obtain credit from any regular private agency.

The farmer was accepted by the Resettlement Administration for a loan of \$800 which enabled him to pay for his livestock and live through the year. His wife cooperated with him, and from their garden, which was irrigated by a well, they canned 148 quarts of vegetables and fruits. From a half acre planted in watermelons, the farmer sold enough to take care of the family living expenses.

Because his health failed the farmer was forced to move from the country where he was living. He sold his teams, tools and equipment and received a check for \$900. He left five bales of cotton, his chickens and five fat hogs.

The farmer, at the end of a year's work, came in and finished paying his \$800 loan plus interest. He had some money left from the sale of his crop, and \$600 from the sale of his equipment.

The farmer's statement at the end of the year was, "The Resettlement Administration has saved my life."

Renewals last week were Mr. Chas. Meeks, Chino, California and Messrs. Dudley and Karr of Carrizozo and Mrs. Scharf.

UNCOMMON AMERICANS

By Elmo Scott Watson
© Western Newspaper Union

He Gave Us "Craps"

WHEN Bernard Xavier Philippe de Marigny de Mandeville was sixteen years old, his father, who was Louisiana's richest Creole planter, died and left his entire fortune to the wild and headstrong son whose every whim had been granted by the indulgent father. Within two years Bernard's guardian, finding him uncontrollable, shipped him off to England in the hope that life abroad might improve his behavior.

But it didn't. For young Marigny became even more dissipated in London than he had been in New Orleans and finally his guardian ordered him to return home. The boy came back, bringing with him a new dice game, called hazard, which was then all the rage in England and France.

This was at the beginning of the Nineteenth century and hordes of Americans were swarming into the capital of their newly-acquired Louisiana territory. The pleasure-loving Creoles looked upon these energetic and unmannerly visitors with disgust and their dislike was fully reciprocated by the Americans. They regarded the Creoles as an effete, alien race and spoke of them pluringly as "Johnny Crapauds" (frogs). When they saw them huddle around a table playing Marigny's new game of hazard, they called it "Johnny Crapaud's game."

But these Yankees soon found themselves fascinated by the game and taking part in it with the Creoles. Gradually they shortened the name to "Crapauds" and eventually it became "craps," the name it bears to this day. Meanwhile the man who had introduced it to this country was steadily losing his great fortune, little by little. Part of it went because these despised Yankees were better with the "galloping dominoes" than he was. Part of it went because he was given to making grand gestures—such as lighting his cigar with five and ten dollar bills twisted into "opills."

Eventually his fortune was all gone and this grand seigneur of the New World was reduced to the bare necessities of life in a tiny cottage, attended only by one loyal old negress. In 1868, then a feeble old man of eighty-three, he tripped over his own doorstep and died as the result of the fall. Thus practically ended the life of the last great Creole gentleman. It had spanned the whole history of his state and city. Over it he had seen floating the flags of five nations—Spain, France, the United States and the Confederacy—an experience given to few, if any, of his fellow-Americans.

First "Father of Democracy"

EARLY historians wrote him down as a "scurrilous young journalist who yapped at the Father of his country" because when George Washington retired from the Presidency he printed in his paper a bitter attack on that chief executive, even going to the lengths of declaring that "if ever a nation was debauched by a man, the American nation has been by Washington." But modern scholarship has revised that opinion and has shown that he and his grandfather, rather than Thomas Jefferson and Andrew Jackson, were the real "Fathers of American Democracy."

His name was Benjamin Franklin Bache and his grandfather was Benjamin Franklin. At his grandfather's knee, in both America and in France, where he lived from 1770 to 1785, he learned the meaning of real "democracy." The elder Ben may have preached the lessons, but it was young Benny who put them into practice.

He founded the Philadelphia General Advertiser, later the Aurora, and in it he attacked Washington because Washington was the symbol of the Federalist faith, which, he was convinced, was standing in the way of the development of the democratic ideal in the new republic. He also attacked John Adams and that led directly to the passage of the Alien and Sedition laws under which statutes Benny Bache was arrested for libel but never prosecuted.

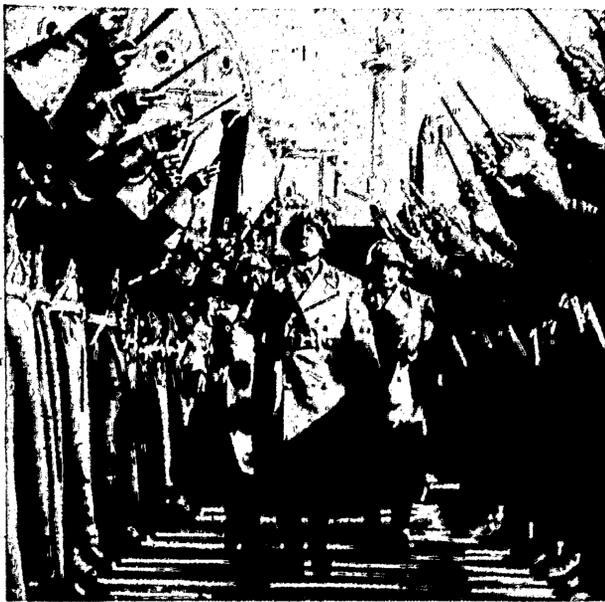

He was still fighting when Death, in the form of the yellow fever, ended his tempestuous career on September 23, 1798. He was only twenty-nine years old but he had labored greatly and accomplished much. For, in what modern historians called "the second American Revolution," Bache and his crusading newspaper had broken the power of the Federalists and snapped the link between them and England. Thereby he freed the new nation from the English idea of a semi-monarchical form of government. He made certain the victory of the new Republican-Democratic party which with the election of Thomas Jefferson began a real democratic rule in this country. For this he should be remembered rather than as a "scurrilous young journalist."

Auto Industry Ready for Peak Year as Strike Ends

—William S. Knudsen, vice president of General Motors, who signed the agreement for his company which ended the costly motor strike. 2—Last vigil of the "sit-down" strikers before they marched out of the plant in Flint, Mich. 3—Gov. Frank Murphy of Michigan, who conducted negotiations that led to solution of strike difficulties.

Salute of Daggers for Il Duce

With drawn daggers, his personal bodyguard salutes Mussolini during the celebration of the fifteenth anniversary of the founding of the Blackshirts. This dagger-salute, incidentally, is supposed to date back to the arrogant emperors.

TO WED ERIN'S ENVOY

Mrs. Nicholas F. Brady of New York, widow of the utilities magnate, whose forthcoming marriage in Rome after Easter to William J. Bobington Macaulay, Irish Free State minister to the Vatican, was revealed by friends recently. It was also reported that the ceremony probably will be performed by Cardinal Pacelli, Papal secretary of state, who was a guest at the Brady mansion at Manhasset, L. I., during his recent visit to this country.

RESCUED FROM MINE

Peter Robert Johnson, thirty-six-year-old coal mine operator, who was rescued alive from the Pittsvelt mine at Flemington, W. Va., after he had been buried by a cave-in for a week. CCC workers and other volunteers, aided by the entombed man's dog, worked 18 hour shifts, 24 hours a day to save Johnson. The mine operator's rescue was regarded as one of the most amazing feats on record.

Snow Queen Statue Wins College Cup

Florence Allen, of Birmingham, Ala., Queen of the Snows, presents a cup to Joseph Fogarty, of Newburg, N. Y., representing Delta Tau Delta fraternity, which made the best snow statue, picked by judges at the annual winter carnival here. The statue shows the founder of Dartmouth greeting the carnival queen.

U. S. Army Demonstrates Its Landing Efficiency

First equipment brought ashore by the U. S. army, taking over Cabrillo beach, near San Pedro, Calif., in preliminary landing exercises, included tractors, trucks, field and machine guns. Photograph shows a tractor and trucks being put on the beach to demonstrate with what efficiency the army can disembark its troops and gear in the event of hostile attack upon our shores.

what Irvin S. Cobb thinks about:

Reducing Auto Fatalities.

SANTA MONICA, CALIF.— Being revolted by our hideous record of mortality resulting from mad automobiling—as what decent citizen is not?—a gentleman writes in some pertinent recommendations.

He suggests laws providing, in addition to such other penalties as may follow a conviction for drunk driving or criminally reckless driving, or hit-and-run driving, that the convicted party shall lose his license for five years and that his automobile be sold and the proceeds used for the victim's heirs, as the case may be.

Irvin S. Cobb

Whilst we're on the subject of the disgrace which costs America more lives every month than are being destroyed in the Spanish civil war in any month, here's another little notion:

That a flagrant offender or a chronic offender shall be given a jail sentence, without the option of paying a fine, the only alternative from jail being his or her willingness to be handcuffed and chained before the public gaze through a period of hours or days at the scene of the accident for which he or she was responsible.

That ought to make some converts to the crusade for prudent driving, don't you think?

Windsor's Musical Proclivities.

LATEST word is that the duke of Windsor has taken up accordion playing in a serious way after first toying with the deadly saxophone and then doing some intensive bagpipe toodling. Obviously the duke is in a fair way to estrange those who, until now, have faithfully supported him through his recent harrowing experiences. Even loyalty can be pushed just so far.

Or maybe he has a lot of close friends who are deaf.

Or maybe Mrs. Simpson is practicing wearing earmuffs.

Or maybe she can wear him on a mouth organ—a comparatively inoffensive instrument.

Or he may just up and reform of his own accord.

Or something. Let's not be too hasty in our judgments.

Jefferson and Ickes.

SECRETARY ICKES is sort of opposed to naming the projected great national auditorium in Washington after Thomas Jefferson, because it is proposed to hold sporting events there when the building is not being used for public gatherings. He invites us to imagine the feelings of Jefferson upon looking down on boxing matches or such-like goings-on under that roof.

Well, let's carry the thing further: Can anybody imagine Jefferson imagining a Secretary Ickes?

Madame Perkins' Ambitions.

MAYBE it's not wise to add those new departments to the Presidential cabinet right now. True, Madame Perkins shows a patriotic willingness—or shall we say determination?—not only to look after her own portfolio, but to snatch up such responsibilities as her fellow-secretaries are so careless as to leave out of nights.

Still, it's expecting an awful lot of one weak woman that she should relieve two more members of their responsibilities, duties and authority when the task of trying to take over the other nine present jobs besides her own already has taxed her strength severely. And besides, there's annoying talk that congress may actually oppose the madame's latest little suggestion that she be made practically the supreme power in all labor disputes.

But she needn't worry about that. Whoever heard of guinea pigs defying a lady lion-tamer?

The Flood's Aftermath.

WITH the slackening of the torments, the peak of drama out of the scene, but the tragedy, less spectacular but nevertheless desperate, lingers on—the tragedy of destitution and ruin and sickness. For the rebuilding of wrecked homes, the rehabilitation of morale, it is necessary that through the Red Cross we give and keep on giving—and I reckon we will. We always have.

But there are certain things we need not give the victims, for these be things they never lose and never will—their courage and their sense of humor. We can still laugh at our personal misfortunes even while the world at large weeps for them. I guess, for our race, that's the main saving grace.

A Chain of Ants

A species of ant joins distant leaves to make its nest, first establishing between them a chain of ants several inches long, gradually shortening the chain by removing individuals without disturbing the connection, and finally cementing the leaves where they touch with glutinous matter exuded by young larvae.

Charming Way to Use Cross Stitch

Even amateurs will have no difficulty in turning out this finished looking chair or buffet set—with this easy-to-do pattern. And what compliments they'll get on this

Pattern 5740

cross-stitched peacock done in all the glory of its natural coloring or in two shades of a color for a more subdued effect. The crosses are 10 to the inch—the colors are clearly given in a color chart. With two patterns a handsome scarf could be made. In pattern 5740 you will find a transfer pattern of a large motif 13 by 18 inches, and two smaller ones 4 1/2 by 6 inches; material requirements; color chart and key; illustrations of all stitches used.

To obtain this pattern, send 15 cents in stamps or coins (coins preferred) to The Sewing Circle Household Arts Dept. 259 W. Fourteenth St., New York, N. Y. Write plainly your name, address and pattern number.

My Favorite Recipe

By Madame Louise Homer

Cheese Toast

Butter nicely brown toast. Slice over it hard-boiled eggs, boiled at least ten minutes. Pour over this cheese sauce and serve very hot. Make the cheese sauce by putting 1 tablespoonful of butter in a pan; add 1 tablespoonful of flour, then 1 cupful of milk, pepper and salt. Beat well and add 1 cupful grated American cheese.

Owl Dumb, But Useful

The owl's reputation for great wisdom is quite unmerited. Scientists have known for a long time that the owl is one of the "dumbest" of all things in feathers; though a recent announcement of that commonplace fact got considerable press notice. But though he isn't wise, Old Hooty is nevertheless very useful. He feeds mostly on mice and other small rodents, and helps to keep their numbers below the proportions of an absolute pest.—Science Service.

Dr. Pierce's Pleasant Pellets made of May Apple are effective in removing accumulated body waste.—Adv.

Bellitting Is Useless
The foolish thing is to bellittle genius. Genius IS.

CONSTIPATION

Unrelenting Enemy of Health
"HOW are your bowels?" The doctor asks this important question because a primary need of good health is for the bowels to regularly pass off the waste of metabolism. Every doctor knows you cannot be well, feel well or look well if you allow constipation to hinder daily evacuation and thus prevent body cleanliness. You should know it! Then why let a bad condition continue? Try Doan's Regulets. They are mild and effective; act as a digestive and hepatic stimulant, increase the flow of bile and relieve temporary congestion of the intestines. Be regular with Regulets. For sale at all drug stores.

DOAN'S REGULETS

AFTER YOU EAT?

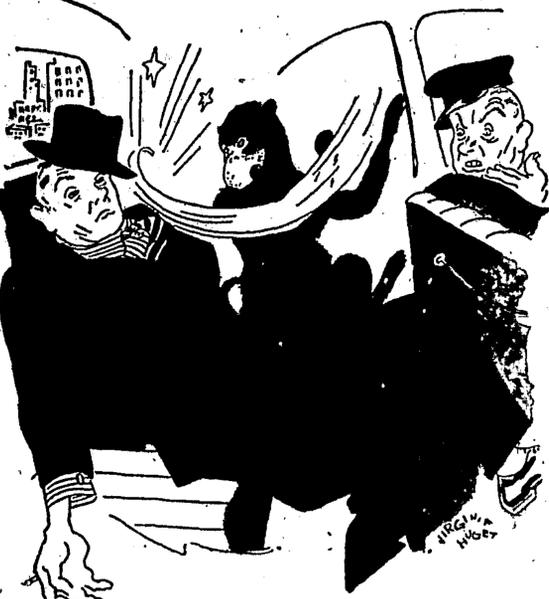

After you finish a meal can you be sure of regular, successful elimination? Get rid of waste material that causes gas, acidity, headaches. Take Miltexia Wafers for quick, pleasant elimination. Each wafer equals 4 teaspoonfuls of milk of magnesia. 20c, 35c & 60c at drug stores.

JOHN LARDNER
On Working With Apes

He landed a right hook to my face on the way home, necessitating the removal of two teeth.

By JOHN LARDNER

WE STUDENTS of anthropoid culture—we scientists who dabble with the ape and his relation to man and his whole whimsical slant on life—dwell in a little world of our own. At least, nobody else seems to hear the things we hear, or read the things we read in the newspapers, or follow the developments in our racket.

For instance, the other day I ran into Dr. Pete Bohnesack, the weasel-skinner, and said to him, full of enthusiasm:

"Bohnesack, old man, what do you think about the statement that Dr. Yerkes made in the paper? Ain't that sump'n?"

To my surprise, the great scientist (there is not a bigger man in the entire field of weasel-skinning) gave me a blank look:

"What Yerkes are you talking about?" he said. "What does he do? Does he dissect stoats? Is he a ferret-tanner? What Yerkes do you mean? I never heard of him."

So I sped home to the laboratory and gave a piano lesson to O'Gung III, my chimpanzee.

Apes Are Getting Lower.

Now, what I was getting at in my conversation with the great weasel-skinner was simply this. Dr. Robert M. Yerkes, the comparative psycho-biologist who runs the Yale scientific ape plant, had made a squawk in a magazine story and also in the newspapers. He said that the study of apes in this country was going to the dogs. He said it in a more scientific way, but that was the gist.

According to the doctor, not one captive ape in twenty is put to the proper use. The wastage is terrific. A scientist gets hold of an ape and experiments to see how long the animal can stay alive under water. When the experiment is over, and the ape is dead, he has to get a new ape for his next experiment. You can see how that would play hob with the ape supply.

Well, I agree with Dr. Yerkes that an ape should be made to last a long time, for his own sake and for the benefit of science. I believe that this theory applies equally to gorillas and chimpanzees.

Now, in the case of my chimpanzee, O'Gung III, I think I have acted absolutely for the best.

O'Gung III, as his name indicates, is the third O'Gung. His father, son of the original O'Gung, was born in Africa in affluent circumstances, the old man being one of the biggest shots of the neighborhood. But the younger O'Gung married below his station, and was cut off without a shilling, as they say in England. This preyed on his mind so much that he and his wife were easy victims for the first trapper that came along.

Superiority of Man.

They were brought to this country and assigned to a research worker in New Jersey, where O'Gung III first saw the light of day. I bought him at the age of three months. It was love at first sight. He landed a right hook to my face on the way home, necessitating the removal of two teeth.

"Ape, that was a dirty trick," I said. In an instant he had repeated, after me "Asequajhik," which is the closest a chimpanzee has come to expressing himself in English since 1907. And O'Gung III was only three months old—well, three and a half months. I'll give or take a week.

I had a son of the same age at that time, a bright and healthy tot, but precocious. This gave me a beautiful opportunity for research into the comparative development of man and ape. I let the two little fellows grow up together, dressing them in the same clothes, feeding them the same food, and making

them play the same games. But after about five months the study was interrupted by an unfortunate incident. I quote from my notes of that date:

"June 7—Johnny is outdrinking O'Gung at rate of two bourbons to one. Found O'Gung under table last night. Johnny still conscious and singing loudly. Have to get rid of Johnny."

So I farmed Johnny out to some people who were interested in children, and I concentrated on O'Gung III. A couple of bicarbonate of sodas and he was ready for fresh work.

It is the dream of every scientist—barring weasel-skinners—to find out whether a chimpanzee is capable of distinguishing and recognizing different colors, such as red, blue, yellow, fuchsia, and maroon. With this in mind I gave O'Gung III several strips of colored cloth and told him to show me some action.

Groomed for Yale.

The result far exceeded my expectations. In fact, it wrote a new chapter in anthropoid history. Without a second's hesitation the manly little fellow matched up the blue cloth, waved it over his head, whistled a few bars of "Boola, Boola," and asked for the score of the Yale-Georgia game. He asked in sign language, but there was no mistaking his meaning.

I had planned to send O'Gung III to Harvard when he grew up. Naturally, the color experiment changed my mind. I promptly entered him for Yale and made a tentative note that chimpanzees have a leaning in that direction.

O'Gung III showed marked interest in sports from his second birthday on. He hated to participate in any game more strenuous than dime-limit stud, but he loved to watch football or baseball provided his seat was on the fifty-yard line or back of third base.

At the age of five the astute chimpanzee had sharpened his powers of mimicry to a razor's edge. For example, I marked out a stretch of level ground ten yards in length and proceeded to traverse it with a hop, a step, and a jump. O'Gung III, after watching my every move with almost human attention and understanding, fell asleep where he sat—a perfect imitation of something I had done a couple of nights previous.

He's Learning "Prisoner's Song."

It would be too great a task to describe all the experiments I have tried with O'Gung III in the last few years. I have tested his reaction to fire, smoke, beer, Greek literature, skiing, threats, kindness, capital punishment, light wines, union labor and parachute-jumping.

A few weeks ago I was playing a medley of old tunes on my banjo. O'Gung III suddenly jumped up on the piano stool, gave me a look of almost subhuman intelligence, and struck the first note of "Keep the Home Fires Burning." There was no mistake about it.

So now I am giving him piano lessons.

This is my one hundred and twelfth experiment on O'Gung III, with no repeating and with never a dull moment. I don't think I can be accused of wasting this chimpanzee. He has been with me eight years, and he will remain with me for another eight if I can just break him of his new (but scientifically valuable) habit of setting fire to my house.

But, as I started out to remark, all this is probably news to you scientists who have given your lives to skinning weasels and measuring snail tracks. I have written it for the benefit of fellow ape experts all over the world, and if any of them happens to have the price of a chimpanzee's tail I wish he would get in touch with me. O'Gung III is too delicate for life in prison, where he now awaits trial on an arson rap.

HOT SAUCES ARE EASY TO MIX UP

Use Proper Recipes and Follow Them Strictly.

By EDITH M. BARBER.

ONE of the most popular of the fine hot sauces with—almost every one is the well-known Hollandaise. It is one of the easiest sauces to make if the proper recipe is followed. Too often, however, it is made unsuccessfully, although more pains than are necessary are taken in its production. Many recipes for Hollandaise call for washing the butter. Contrary to general opinion, this has no effect on the texture of the sauce. These directions originally were put into American recipes for this French sauce in the interest of flavor. Unsalted butter is commonly used in Europe and produces a sauce with a delicate bland flavor. In this country, however, a little salt in the sauce is generally liked. Why take salt out and then put it back?

The egg yolks, lemon juice and half the butter should be put into a small saucepan, which should be held over hot water while the butter is melting and the sauce thickening and while you stir vigorously. The rest of the butter should then be stirred in and the sauce beaten until it again thickens. Warning! Do not use a double boiler for this sauce unless you are very careful not to allow the water to boil in the lower part. Warning number two! When the sauce has thickened, set it aside if you are not ready to use it at once, and reheat it, stirring constantly, just before serving.

There are many variations of this type of sauce. You will find them under various names in different cook books. Most authorities agree that tarragon vinegar, in which herbs have been cooked, is used instead of lemon juice for Bearnaise. For a Mouseline sauce, heavy cream is beaten into Hollandaise. For a Trionon, sherry, instead of all or part of the lemon juice, is used.

A very delicate sauce, not unlike a Hollandaise, is made by combining egg yolks, sour cream and tarragon vinegar. This sauce may be cooked in a small double boiler until it thickens after a vigorous beating. For the lack of a better name I call this special sauce. It may be used with fish or vegetables.

The boiled salad dressings which may be served hot or cold do not belong exactly in any classification. They are thickened with a little flour but also demand egg yolks. The recipe for Bavarian sauce which I obtained in Germany is suitable to be used as a sauce for fish or veal or as a dressing for greens, over which it should be poured while it is hot.

Hollandaise Sauce.

- 1/2 cup butter
- 2 egg yolks
- 1 tablespoon lemon juice
- 1/4 teaspoon salt
- Few grains cayenne

Divide the butter into two pieces, put one piece in a saucepan with the yolks of eggs and lemon juice, place the saucepan in a larger one containing hot water, stir constantly until the butter is melted, then add the second piece of butter and stir until it thickens. Remove from the fire, season with salt and cayenne and serve at once. If the mixture curdles from overcooking add two tablespoons of heavy cream and beat well.

Bearnaise Sauce.

Make foundation recipe for Hollandaise sauce, but substitute tarragon vinegar for lemon juice and add two teaspoons chopped parsley just before serving.

Mouseline Sauce.

Make foundation recipe for Hollandaise sauce and beat in gradually one-half cup heavy cream.

Special Sauce.

- 2 egg yolks
- 1/2 cup sour cream
- 1 tablespoon tarragon vinegar
- Salt
- Paprika

Beat egg yolks slightly; add other ingredients and stir over hot water until sauce begins to thicken. This sauce is delicious with cauliflower, asparagus, broccoli or with fish.

Mint Sauce.

- 1/2 cup vinegar
 - 1 tablespoon sugar
 - 1/2 cup chopped mint leaves
- Heat vinegar, remove from the fire, add the sugar and stir until dissolved. Add the mint leaves and stand in a warm place for one hour. More sugar may be used.

Maitre d'Hotel Butter.

- 1/2 cup butter
 - 1 tablespoon minced parsley
 - 1 tablespoon lemon juice
- Cream butter and add parsley and lemon juice and beat well. Serve with broiled meats or fish.

German Dressing.

- 2 strips bacon
- 1 tablespoon flour
- 2 egg yolks
- 1/2 cup water
- 1/4 cup vinegar
- Pepper, salt, paprika

Cut bacon in small pieces, fry lightly and remove from fire. Add flour and blend well with bacon fat. Stir in beaten egg yolks, add water and vinegar and stir over a low fire a few minutes until smooth. Season to taste with pepper, salt, and paprika.

Worthy of Your Pride!

MOTHER, between you and me Sis is getting to be a little show-off. Last night when Dick called, there she sat, big as life, right in the middle of things chirping about the new dress you made her: how you used a remnant left over from one of your dresses, and got it finished in one afternoon—she even had Dick feel the material.

Well, Elsie, you can't blame the child's appreciating herself in a new dress. How about ourselves? Didn't you say your jumper was the talk of the Tennis Club meeting yesterday? And haven't I been spending more time before the mirror since I made my new "Stylish Stout" model? It actually feel like a new person in it—imagine me being vain at my age!

Flatters Stout Figure.

Oh, Mother, you're not vain and you're as young as any of us. You just were lucky to find a particularly flattering style for your figure. That soft jabot makes you look lovely and the whole thing is so slenderizing. But only an expert like you could make such a dress.

It isn't being expert, Elsie. It is choosing a pattern that is deftly designed and giving full step-by-step instructions on how to proceed.

Several Blouses.

I'm going to make another blouse for my jumper soon, Mother. I always admired that white

plique shirt of Dick's, so I think I'll try it for my blouse, since the pattern is a lot like a man's shirt in design.

The Patterns.

Pattern 1229 comes in sizes 14 to 20; 32 to 42 bust. Size 16 requires 3 1/2 yards of 39-inch material for the jumper and 1 1/2 yards for the blouse. Pattern 1847 is available in sizes 30 to 52. Size 38 requires 4 1/2 yards of 39-inch material.

Pattern 1882 is designed for sizes 2 to 10 years. Size 4 years requires 1 1/2 yards of 39-inch material.

New Pattern Book.

Send for the Barbara Bell Spring-and-Summer Pattern Book. Make yourself attractive, practical and becoming clothes, selecting designs from the Barbara Bell well-planned, easy-to-make patterns. Interesting and exclusive fashions for little children and the difficult junior age; slenderizing, well-cut patterns for the mature figure; afternoon-dresses for the most particular young women and matrons and other patterns for special occasions are all to be found in the Barbara Bell Pattern Book. Send 15 cents (in coins) today for your copy.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Patterns 15 cents (in coins) each. © Bell Syndicate.—WNU Service.

Household Questions

Winter Salad—Mix one cup of celery with one cup of tart apples and half cup of walnuts. Cut the celery and apples into very small dice and combine with mayonnaise or cream dressing. Add walnuts just before serving. Garnish with celery tips.

Potatoes that are to be French fried should stand in cold water at least an hour before cooking.

Sometimes ink stains can be removed from the hands by rubbing them with the inside of a banana peel.

Carrots can be made crisp before cooking by scraping and leaving in cold water for half an hour.

You can produce your own sour milk for use in sour-milk recipes by simply adding a teaspoon of vinegar to each cup of fresh sweet milk.

Cane-bottomed chairs should be brushed to remove all dust and then washed with salt and water and placed in the open air to dry. This treatment tightens up the cane.

If you want to make bread crumbs in a hurry and have not a sieve or a large grater, put the bread in the oven or under the grill a few minutes to dry, but not to get brown. Then rub the two pieces together, and you will have quite good crumbs for eggs and bread crumbling or for stuffing.

Kidney Rolls—Mix one-half cup stale bread crumbs, one-half small onion, finely chopped, and one-half tablespoon finely chopped parsley. Season with salt and pepper and moisten with beaten egg. Spread mixture on thin slices of bacon, fasten around pieces of lamb's kidney, using skewers. Bake in hot oven 20 minutes.

A good cleaner for glassware having a deposit of lime from hard water, consists of a mixture of one cup vinegar in one quart of warm water into which six or eight slices of raw Irish potatoes have been cut.

If the roof should leak and stain your ceiling, cover the stain with block magnesia. Rub the block over the spot until the stain is covered, then smooth over with the tips of your fingers. It works like magic.
