CARRIZOZO, NEW MEXICO, FRIDAY, JUNE 4, 1937

NUMBER 49

University Received Grant

The University of New Mexico has received a grant from Mr. and Mrs. Cyrus McCormick, Nambé, Santa Fe county, to establish and operate a demonstration school at Nambé it was announced at the university today.

The demonstration school will be for the advancement of Spanish speaking students.

The gift of the McCormicks will be paid in a term of five years. The project will be started in September and will be in charge of Dr. L. S. Tireman, head of the elementary department, college of education of the university.

The new project will be operated with the cooperation of the Santa Fe county school board.

Village Report

Minutes of regular meeting of Board of Trustees held at City Hall June 1, 1937, at 7:30 P. M. Members present: F. E. Richard, Mayor; Andy Padilla, John W. Harkey and A. J. Rolland, members; Roley Ward, Marshal; Morgan Lovelace, Clerk.

Members absent: Tennis Bigelow. The minutes of the last meeting were read and approved.

Motion by John W. Harkey and seconded by Andy Padilla that the Village grant John W. Miller the sum of \$20.00 in appreciation of services rendered in the Village Park. Motion carried.

The following bills were approved and ordered paid.

Jess Willard Met Dep Ref	2.50
May Phillips Met Dep Ref	2.50
Elerdo Chavez J. P. costs	2.50
S. E. Greisen Boarding prisoner	1.00

There being no further business presented the meeting adjourned. Attest: Morgan Lovelace Clerk.

F. E. Richard, Mayor

Mr. and Mrs. W. S. Norman went to Albuquerque Monday and returned accompanied by their daughter, Edith and Misses Marie Shaver and Rhoda Freeman who have been attending the State University.

Margaret May Wylie

The saddest occurrence which Carrizozo has witnessed for several years, was the death of Miss Margaret May Wylie, age 17, daughter of Mr. and Mrs. J. M. Wylie, who was a member of this year's High school graduating class. A week before commencement she became ill of typhoid fever. She was taken to a local hospital where everything possible was done, but to no avail. She passed away Sunday morning at 8 o'clock two days after her diploma had been awarded. It has been said that the good die young. Margaret had been a Christian for six years, a member of the Christian church in Albuquerque where she had completed three years of high school work before coming here. She is survived by her parents, Mr. and Mrs. J. M. Wylie, by two sisters, Mrs. S. G. McClintock, and Miss Bertha Lee Wylie; four brothers, Messrs. Lem, Marshall, Ralph, and Claud Wylie.

Funeral services were held at the Baptist church Monday morning at 9 o'clock, by Mr. A. F. Roselle of Jicarilla, who read some comforting passages of scripture and made a short talk. The choir sang, "Beautiful Isle of Somewhere" and "God's Children are Gathering Home". Pall bearers were young men who had been school mates, Messrs. Fred English, Charles Carl, Billie Beck, Charles Dow, Walter Fulmer, Jr., and C. O. Davis.

Members of the Senior and Junior Classes attended in a body and brought beautiful floral offerings. After the dismissal prayer by Mr. Roselle, the remains were taken to Albuquerque for interment in the family plot.

Loans Increased

The Mutual Building and Loan Association, Santa Fe, N. M. reported an increase of 9 per cent in its volume of home loans accepted for insurance by the Federal Housing Administration during the first quarter of 1937, it was announced here today by Ralph Davy, Acting State Director of the New Mexico office of the Federal Housing Administration.

"As of April 1, this association made 22 loans in the amount of \$85,600 that were accepted for insurance by the Federal Housing Administration," said Mr. Davy. Of this amount, it is interesting to note that 7 loans amounting to \$31,800 were advanced for the construction of new homes.

"In employing the insured mortgage plan," said Mr. Davy, "this thrift and home loan association presents an appealing picture to the borrower on the basis that his obligation is being reduced by single monthly payments which ultimately result in a debt-free home."

Mr. and Mrs. F. A. English returned from the commencement exercises at N. M. M. I. in Roswell Wednesday where their son Frank was graduated.

About 200 were killed in traffic and highway accidents Memorial day. Texas alone had 23 fatal accidents; California 12; and Arizona 1.

Mr. and Mrs. Preciliano Padilla of Los Angeles were here Wednesday and visited at the homes of Messrs. Andy Padilla and Abe Sanchez.

Rural Electrification Administration

Rural Electrification Administrator John M. Carmody today announced allotments totalling \$369,000 for projects in Arkansas, New Mexico and Ohio. A loan contract was executed with the sponsors of an REA-financed project in Wyoming, and construction contracts were signed in Delaware, Ohio, Minnesota, Virginia and West Virginia.

ALLOTMENTS: New Mexico 4 and 4G Eddy. A partial allotment of \$164,000 has been made to the Central Valley Rural Cooperative Electric Company, Lake Arthur, New Mexico. Of these funds, \$60,000 will be used to build a generating plant to supply wholesale energy and \$104,000 to build 84 miles of line to serve 184 farm homes in Eddy and Chaves Counties.

Rathmann Hospital News

Born to Mr. and Mrs. Howard Simpson of Three Rivers a boy, May 30. Mother and son are getting along nicely.

Mr. C. D. Mayer's condition is slightly better.

Mrs. Julia Harcrow is showing gradual improvement.

Conway Collins Killed

Mrs. Armstrong of El Paso passed through Carrizozo, Monday enroute to Tucumcari on account of the death of her son-in-law, Conway Collins, age 29 which occurred last Saturday in an automobile accident, when his car plunged off a bridge into an arroyo. Mr. Collins was an engineer in the Highway department. The machine got out of control and plunged off the bridge killing him instantly. Mrs. Collins was the former Ethel Armstrong who lived here with her parents about six or seven years. She is a sister to Mrs. Roy E. Reeder, who formerly was chief operator here for the Mountain States Telephone Company.

Announcement

June 12 has been decided upon to work the graveyard at Angus. Everyone invited to come prepared to work. Ladies please bring well filled basket lunches. Work begins promptly at eight o'clock a. m.

Committee.

Mr. and Mrs. Walter Riggs were shopping in Carrizozo yesterday.

Thomas J. Straley

Mr. Thomas J. Straley of Ancho passed away Sunday afternoon May 30 after an illness of less than two weeks. Mr. Straley's wife preceded him in death just two weeks, having passed away Sunday, May 16th. Mr. and Mrs. Straley were married in Upshur County, Texas, Dec. 4, 1884. They moved to Ancho in May 1912 and had resided there continuously. Mr. Straley had been postmaster at Ancho for 19 years and was well liked. Deep sympathy is felt for the eight surviving children who have suffered this double bereavement. A large concourse of sorrowing neighbors and friends followed the remains to their last resting place in the Ancho cemetery last Monday afternoon.

ANCHO NEWS

The entire community is deeply grieved and in sympathy with the Straley family in the loss of their dear father, who passed away at the Robinson hospital, last Sunday and of their mother's passing two weeks last Sunday in El Paso, Texas.

Mr. and Mrs. Tom Straley, Mrs. W. L. Silvers and Mrs. Joe Roscoe returned to their homes in El Paso Tuesday having attended the funeral of their father Mr. Thomas J. Straley Monday.

Mrs. Bob McArthur and son of El Paso have returned home having attended Mr. Straley's funeral.

Mr. and Mrs. R. A. Walker of Carrizozo, Mr. and Mrs. Jack Pruitt and family of Duran, Mr. and Mrs. Sam Pruitt of Coyote, Mrs. J. E. Hall and Mrs. Shirley Phipps of Carrizozo, Mr. T. E. Kelley and Mr. Todd of Carrizozo were in Ancho Monday for Mr. Straley's funeral.

Mr. C. A. Stillwell and his men, Messrs. Dale, Brown, and Buis had two holidays in one Sunday and Monday, Lucky "fellars".

Mr. Jim Dale is employed at the Ford Garage in Carrizozo at the present time.

A number of Jicarilla friends were down to pay their respects to our beloved friend, Mr. Straley, Monday.

Mr. and Mrs. H. T. Porter, Mrs. Slim Buis and little daughter, Shirley were Carrizozo visitors Wednesday.

Mrs. Jim Brown and daughter of Tucumcari spent the week with her husband and father, Mr. Brown, with the S. P. Water service at Luna.

Mr. and Mrs. J. M. Frame have returned from their cabin at Ruidoso where they spent part of Mr. Frame's vacation. They also visited Tucumcari and El Paso.

Mr. and Mrs. Carl Craig left last weekend. Mrs. Craig to enter a hospital in Albuquerque, and Mr. Craig to Las Vegas to attend school for the summer. We hope for Mrs. Craig's speedy recovery.

Mr. and Mrs. Barney Wilson and family have moved back to the ranch for the summer.

Mr. Clyde Collier of White Oaks, has been working for Messrs. Cosart and Peck the last few days.

Mr. and Mrs. Henry McFadden of Gran Quivira were in town Tuesday.

Mr. and Mrs. Cathay of Ancho were in town yesterday.

Sacramento Summer School

With the selection of J. Cloyd Miller, Superintendent of Public Schools of Lordsburg, as Assistant Dean of the Sacramento Summer School of McMurry College, the faculty is practically complete. The Sacramento project received approval from the New Mexico Department of Education back on June 11, 1935, when the first complete plans were presented to the State Board of Education. The Texas Association of Colleges gave its unqualified approval at its last meeting in Lubbock, and, thereby, for the first time accredited work before it was actually done. It went even a step further in accrediting the Sacramento School as "residence work" and every course will receive credit just as if taken on the Abilene Campus.

The McMurry office announces registrations now coming in rapidly from both Texas and New Mexico and the anticipation is for an excellent registration.

Dr. C. W. Hall, Director of the Wesley Bible Chair of the University of Texas, will teach his course on "Courtship and Marriage". This course has grown in popularity each year on the campus at Austin and much interest has been evidenced for the work at Sacramento.

Dean R. G. Boger of McMurry says emphatically that personality can be developed and will teach such a course in the Mountains. This he has taught on the Abilene campus both semesters of the first year.

Baseball Notes

The Carrizozo baseball team after being idle for two weeks crossed bats with the Alamogordo colored team here last Sunday and trounced the darkies by a very close margin, 18 to 12.

They will play a return game at Alamogordo next Sunday.

The boys have been practicing hard every day in preparation for their encounter with the Tucumcari team in that city on June 20.

Mr. and Mrs. C. H. Thornton were here yesterday from Oscura.

MASS MEETING

TONIGHT

At

COMMUNITY HALL

Concerning Light Rates

Paid Advertisement.

BINGHAM BREVITIES

With smiles a little broader and voices more cheerful, members of the community gathered at the store Friday and discussed the rain. Every one had a good one, but the rain was not over, more fell Friday night and Saturday. Every one's tank filled and their crops look good.

Mr. George Porter left Tuesday for the hospital at El Paso where he will receive treatment.

Mr. Ike Drago and Buster from San Antonio were in the community Friday.

Several people from here went to San Antonio Sunday afternoon to see the overflowing river and the washed out roads.

Mr. Griffin and Mr. Withers visited in the J. P. Glover home Friday.

I. O. O. F. Notes

Last Tuesday evening the Odd Fellows conferred the 1st degree on candidates J. Click, L. Barnes, H. Barnes and Manson Hicks.

Mrs. Julia C. Shearer has had as recent guests, Mr. and Mrs. Roy Shearer of Los Angeles, and Mr. and Mrs. Walter Ingraham of Sioux City, Iowa. Mr. Shearer is brother, and Mrs. Ingraham is sister of her husband, the late Mr. Marshall Shearer who died recently in a Los Angeles hospital.

Bernie Glover is still suffering from his hand which has become infected.

Lois Hayes left for El Paso Tuesday.

Fancy Now Turns to Exotic Cottons

By **CHERIE NICHOLAS**

Oh, OH, OH! Did you ever see anything in the way of fabric so dazzling to the eye, so daintily designful, so altogether fascinating as the new cotton weaves that are dancing so madly, so merrily, so fashionably into the current style picture?

How perfectly they tune into the costume needs of carefree summertime activities! It is no wild statement to say that an entire wardrobe can be successfully fashioned of cotton materials that will carry smartly through active sports and morning dress hours, that will answer to the call for voguish afternoon costumes, climaxing the around-the-clock program with evening formals that are just too lovely for words.

Cottons for formal wear? Yes, indeed! The next time you go to a dance or nighttime society event, count for your own satisfaction, the dresses fashioned of one type of cotton or another. You will see glamorous printed piques, the flattering and filmy cotton voiles so in demand at the present moment, dotted swisses, shadow printed organdies, superfine seersucker sheers and other entrancing cotton weaves too numerous to mention.

Perhaps after all has been said and done it is the amazing cotton prints that are of outstanding style significance. For excitement at high pitch, watch the procession of exotics in cotton that are that authentically oriental and superbly colorful you feel that they must have hailed direct from ports in far Persia, or East India, perhaps Java or China, or from Hungary or some other central-European country, or just as likely the print that holds you spellbound may be of South

American origin, for the latter rank high in style prestige this season.

Do these foreign-looking American-made prints make up effectively in dance frocks? Find the answer in the charming dress pictured to the right in the illustration. This sleeveless evening gown with graceful skirt and with halter-type bodice is made of one of the new Hungarian cotton prints which reproduce old-world textiles. The colors are rich and glowing and there is a gypsy flavor about them and the beads and the bracelets worn are in definite keeping with the trend in the summer mode. Needless to say that the colors of the print are fast to both sun and washing.

Take the thought of the perfectly gorgeous new cotton prints and the thought of the stunning new house coats, such as are proving the big sensation in fashion realms, put the two together and the duo-theme is enough to tempt any home-sewing woman into action. Which is exactly what is happening.

She who loves to go nautical will enjoy making up the beach coat to the left in the picture, which may be smartly used later on as an evening coat or as a house coat. The material, patterned with anchors and other seafaring themes, being properly pre-shrunk will not lose its perfect lines or fit from laundering, neither will the colors lose out in tubbing.

A cool competent play outfit of colorful early American print centers the trio. Being dependably pre-shrunk it is able to take its tubbing cheerfully without tendency to lose shape. The shirt and shorts are in one. The skirt whisks on and off at will.

WITH LACE JACKET

By **CHERIE NICHOLAS**

This lovely lace gown has a matching jacket, which it should have according to all the laws of fashion. The idea of topping each dress with a related cape or jacket runs throughout the entire style program until now it has become a widespread accepted fact. Norman Hartnell, especially prominent for his coronation gowns, designed this very lovely evening ensemble. Both in London and Paris the flair for lace is at a high point of enthusiasm.

Renaissance Jewelry
Mammye bracelets and clips set with "sentimental stones" such as turquoise, coral, garnets, topazes and seed pearls are going to be worn this summer.

SEPARATE BOLERO IN LACE IS SMART

By **CHERIE NICHOLAS**

One of the many reasons for the great popularity of the becoming bolero is its ability to dress up a costume, or to vary it for you. You have only to slip one on over a simple crepe dress to achieve the effect that is especially attractive this year. Boleros are particularly prominent in starched cotton lace, in pastel shades and white. Several of these, in different colors, will enable you to get different effects with a single frock.

The simple, brief bolero would probably be most practical, for the lace pattern gives a dressy effect in itself, and the tailored pattern of the bolero makes it adaptable to all types of costumes. One very attractive design has short puff sleeves, and wide revers, with the short jacket slightly flared. If you can sew at all, it is the easiest thing to make, of little more than a yard of lace. Such a bolero shows off to best advantage over a dress that is fairly simple, whether it be an afternoon frock, or a gown for evening.

Renaissance of Interest in the "Polka Dot" Theme

There is a renaissance of interest in the polka dot theme. There are enormous platter-sized dots with smaller dots scattered around them, all sprinkled with tiny confetti dots in contrasting colors. There are zig-zag polka dot arrangements, irregular spacings. The classic polka dot takes on a new look in strange and "dizzy" color combinations for sportswear, such as queer reds combined with strong blues. Silk crepes, silk sheers and silk taffetas are favorite grounds for dot patterns, the companion idea often being carried out in a silk crepe with a silk sheer.

Tassels for Access
Lavin is successful with a white suit with a swing jacket featuring square box pockets. The armholes are outlined in gay woolen tassels.

FARM TOPICS

GRASS FLAVOR IN MILK UNNECESSARY

Keep Cows From Any Greens Few Hours Is Advised.

By **Dr. O. F. Garrett**, Instructor in Dairy Manufacture, New Jersey College of Agriculture.—WNU Service.

Nothing puts that desirable "June" flavor in milk quite so successfully as tender green grass, but in order to avoid the undesirable odor and flavor which nearly always occurs when cows are first turned on pasture, it is necessary to observe caution in the pasturing practice.

Research workers at the California and Oklahoma Agricultural Experiment stations have shown that if cows are kept away from roughages, especially green roughages, at least five hours before milking very little of the "feedy" flavor will be evident in the milk. This same procedure can be applied to pasturing practices. The cows can be turned on pasture immediately after the morning milking—but they should be removed to a dry lot or barn at least five hours before the next milking.

If this practice is followed for the first two or three weeks in the spring, there will be very little of the undesirable grass odor and flavor in the milk. This practice will even eliminate most of the wild garlic or onion flavor if these plants are found in the pasture. At the same time the cows will have enough time to consume the necessary quantity of grass to supply their needs.

To get the very finest flavor in milk during the pasture season, it is suggested that this procedure be followed throughout the entire time.

Forcing Breeding Hens

By **Increasing Protein**

Forcing breeding hens by increasing the amount of protein in the ration may be done with no ill effects if an abundance of green feed is supplied. Recent experiments conducted at the Oklahoma Agricultural Experiment station show that the mortality of the breeders fed green feed was not increased by forcing, observes a writer in *Successful Farming*. Green feed protects the hatching qualities of eggs produced by forced breeders. Rations with a protein content as high as 28 per cent may be fed without injury to the hatchability of eggs if sprouted oats, alfalfa meal, or some other green feed is fed each day. Where forcing is done by increasing the protein in the feed and using lights, the use of green feed is especially important to maintain good advances in the total egg production.

Clean Water for Ponds

A location that will allow drainage from only clean pasture or meadow should be chosen for the farm pond, says Marion Clark of the Missouri College of Agriculture. Water from barnyards and lots should never be allowed to drain into stock ponds. Where it is desirable to construct a pond where water from lots would normally drain into it, terraces should be used to intercept the contaminated water and carry it to another watershed where it will not pollute the pond water.

Grain Mixture for Poultry

There are several grains or combinations of grains that give satisfactory results, but the one most commonly used in all sections of this state, says a North Carolina State college poultryman, is composed of 60 per cent yellow corn and 40 per cent wheat. However, this ration should be largely governed by what is grown on the farm, and the cost of the grain which must be purchased. Where there is an abundance of heavy barley (43 pounds to the bushel) or heavy oats (38 pounds to the bushel) these may be substituted for a part of the corn and wheat, but should never exceed 30 per cent of the grain mixture.

Agricultural Notes

Hogs yield a greater proportion of edible meat than any other meat animals.

It is found that seven out of every 100 farm fires start when sparks land on a roof.

Among spring-seeded pastures, oats give the greatest pasturage in the shortest time and at the least cost.

Milk cows require from 100 to 300 pounds of water daily, it is stated by the Missouri experiment station.

More than 40 kinds of fruits and vegetables are of commercial importance in the United States.

For the past ten years the tobacco crop in the United States has averaged about 1,350,000,000 pounds, grown on 1,740,000 acres and having an estimated farm value of \$214,000,000.

The Rogues' Gallery

FRANK CONDON

In a Meaty Dissertation

They simply stroll into one of the new chain sawdust shops, drop a dime in the slot.

By **FRANK CONDON**

PEOPLE who are forced to wrestle with the weekly or monthly grocer's bill—and that means everybody—will be amazed and delighted to know about the news that has come from Harvard university, which is located in Cambridge, Mass. That news is what I call real news. It concerns the latest scientific advance, as explained by the celebrated German professor to the other admiring professors. The applause was deafening when the German ceased speaking.

Briefly, it is this. They have finally, after many years of laboratory struggle, succeeded in making sawdust edible. In a very short time, we shall be able to feed our families, using nothing but the lowly and despised offspring of the whirling saw and the unresisting tree, and naturally that is a matter of jubilation for the entire human race, as many persons have been going hungry in recent years and have been fed by their governments.

We don't have to understand how they do it, as long as they can do it, so the best way is to accept the word of the renowned German professor and be happy, for sawdust is just about our cheapest commodity and always will be. There are too many trees for sawdust ever to get expensive.

May Balance Budget.

Over in Germany, they are already feeding sawdust in edible forms to the farm animals and with elegant results. Horses so fed pull far heavier loads, cows give more milk, pigs squeal with greater gusto, goats butt harder and the ducks honk in two tones.

The effects of this new deal in human diet will spread over the world and all classes will share. It means genuine economy and a settlement of economic problems, for if we don't have to pay so much for our meals, then perhaps we can balance our national budget and perhaps Europe can pay off her war debts.

Consider the father of a family of 12, now struggling hopelessly on small pay to keep his little flock full of beans, potatoes, milk and bread. On the way home from his factory job, he will be able to stop in at the carpenter's shop and pick up a bag of sawdust from Joe, and then go cheerily on home with enough sustenance to feed the family for five days. If the carpenter happens to be out of sawdust at the moment, the old man simply borrows a saw and a two-by-four and saws himself a small heap of good, solid meals.

Sawdust Meals From Slot.

Or take the case of the young city clerk, who would like to escort his sweetheart to dinner and the theater. He cannot do it, not under our present food regime, as the double bill is too much for his delicate purse. He can pay for the theater tickets, but the restaurant charge overwhelms him, especially if his girl is healthy and likes steaks, salads, desserts and the trimmings. In a nice restaurant, this is about seven dollars, not counting the tip.

But under the coming sawdust system—and mind you, science will be able to produce any form, any kind of food from soup to nuts—they simply stroll into one of the new chain sawdust shops, drop a dime in the slot, a mere cover charge, and fill up on the rarest sort of viands, delicacies, fruits and

assorted vittles, topping the meal off with a steaming beaker of sawdust coffee and sawdust ice cream.

The new discovery is indubitably one of the most important in the last hundred years, and may change the course of empires. As it stands today, we cannot grow coffee, but Brazil can; and Brazil cannot grow wheat, but we can. So we are forced as nations to swap products, using hundreds of ocean freighters and thus wasting coal and man-hours.

Dishes of Every Country.

France ships us Napoleon brandy and in return, we send France California peaches. Turkey ships us tobacco and we ship Turkey Oregon apples; Russia sends over caviar and we send back potato chips and the whole process is expensive, but when the new sawdust era dawns, all this foolishness will come to an end, for then we can walk over to the nearest lumber dealer, buy a barrel of fresh sawdust and sit down presently to a table groaning with the rarest and most delectable dishes.

It certainly is a cheery prospect and proves what many people have often said—that civilization would never have advanced thus far without the helping hand of science, without the aid of those noble and self-effacing men who toil silently in laboratories for the betterment of mankind.

Of course, man being the imperfect creature he is, the future may not be all skittles and beer. It may be that grasping and greedy capitalists will step in and corner the sawdust, buy up all the forests and woodland down to the last quivering aspen tree, and then go ahead boosting prices and making us pay through the nose.

Graft in Sawdust Industry.

Selfish politicians may side with the speculators and the day may come when a citizen will not even be allowed to walk into a shady woods. Then we shall have sawdust boot-leggers and sawdust speakeasies, with possibly a grim repetition of the whole unhappy-prohibition scandal. You may not be able to buy a saw without a police permit, or carry one on your person, even a little jigsaw. You can even imagine a courtroom scene on the day after Christmas, with a respectable but downtrodden citizen facing the judge and trembling.

"What were you doing with the Christmas tree?"

"Your honor, I was just taking it home, so's to hang up a few toys for the children, a few glass balls and some imitation snow."

"They found a saw in your house, didn't they?"

"Yes, your honor, but—"

"Just another sawdust-thief. Sixty days. Next case."

Diet Has Hazards.

Some second rate saloons like to have sawdust on the floor, but this market is comparatively small and is growing smaller, since ladies took to sitting in bars. It seems ladies do not like sawdust on the floor. The other use is to pour sawdust into ice-houses to keep the ice from melting and that also was a trifling market. All is changed. Families that own forests in this country will do well to hang on for a rising market, for one single pine tree may contain the makings of 5,000 hot dogs, 4 barbecues and a dozen New England clam bakes.

Heavy eaters and plain gluttons who overstuff at the table had better watch their steps and go easy, as it is rather embarrassing for a glutton to be walking down the street full of sawdust and chasing off the wood-peckers.

Ask Me Another

A General Quiz

© Bill Sydicate—WNU Service.

1. How many different recognized religious sects or denominations are there in this country?
2. Has Russia a dictator in the sense that Hitler and Mussolini rule?
3. What was the first steel vessel?
4. What did the World war cost the United States in dead, wounded, and dollars?
5. How many motion picture theaters in the world are equipped for sound pictures?
6. In what manner may foreign debts to this country be paid?

Answers

1. This country has 213.
2. The situation is not the same. Russia is not governed by a one-man dictatorship. When the chairman of the political bureau dies or resigns another is carefully chosen. The stress is on the party machine rather than on the man.
3. A Cunarder, the Servia, built in 1881.
4. In dead, 126,000; in wounded, 234,000; and in money, \$51,000,000,000.
5. Of the 60,000, more than 41,000 are so equipped, and 19,000 of them are in the United States.
6. In only three ways—in gold, goods, or services.

Household Questions

Season Lightly—Be careful when doubling a recipe not to double the seasoning. Use it sparingly at first, then add more if needed.

Eliminating Food Odors—A small quantity of charcoal in a container on the top shelf will help eliminate food odors from the refrigerator.

Eggs in Potatoes—Bake potatoes. Cut off tops, scoop out centers and season with butter, salt and a little pepper, mashing thoroughly. Half fill shells with potato mixture and drop a raw egg, salt, pepper, a little grated cheese and one teaspoon butter in each. Put back in hot oven for four minutes to set egg.

Unwrap Food—Food should not be stored in the refrigerator while wrapped in paper because the paper prevents the cold air from circulating freely over it.

Glazing Liquid for Cookies—A mixture of two tablespoons of sugar and one-fourth cup of milk makes a good glazing liquid for cookies. Apply on the surface of the dough with a pastry brush before baking the cookies.

To Keep Frosting From Running—A half teaspoonful of baking soda added to boiling frosting will keep it from running.

Keeping Up With Science

By Science Service

Pagan Temple Found in Transjordan Is of Christ's Time

Place of Worship of the Nabataeans

New Haven—An "amazing" pagan temple in the Holy Land, reflecting light on the Bible drama of John the Baptist, Herodias, and Salome, has been unearthed by joint efforts of American and British archeologists.

Most of the ruins, which crown a high hill in Transjordan, southeast of the River Jordan, now stand revealed. The work is being done by the American Schools of Oriental Research at Jerusalem, led by Dr. Nelson Glueck, and the Transjordan Department of Antiquities, led by Lankester Harding. The president of the American Schools of Oriental Research, Prof. Millar Burrows of Yale, announced the find, here.

The temple is of great interest because it stood in the time of John the Baptist and of Christ, and because it was a place of worship of the Nabataeans. The spark which touched off conflict between Herod and John the Baptist was Herod's divorce of a Nabataean princess in order to marry his brother's wife Herodias, whom he preferred.

Little Known About Nabataeans. Very little has been known about the Nabataeans who figure in Bible history, except that they were Arabs who possessed a strong kingdom in Transjordan and northeastern Arabia. Gods worshiped by these people are revealed in the temple ruins. Sculptures have been found of the powerful god Zeus-Hadad, armed with his thunderbolt, and of his consort, the goddess Atargatis, wearing leaf-like decorations on her forehead and shoulders. The Nabataeans also had a goddess of fortune, Tyche, who is portrayed with staring eyes and a crown on her head, and encircled by the figure of the zodiac.

A sculptured eagle and snake entwined suggest to the archeologists that these Arab people borrowed Roman ideas in their religion, and the other gods show that they borrowed from Syria, Greece, and Egypt also.

Fierce Worms Kill Their Prey With Hollow Spears

Honolulu.—"Dog eat dog" is realized in the world of blind life underground, in fierce attack of worm on worm. One group of predatory worm kills its kindred prey with hollow spears that they carry in their mouths, and then suck their victim's body contents through the hollow of the deadly weapon, like a kid absorbing a malted milk.

Scenes from these small but sanguinary dramas are described in Science by Drs. M. B. Linford and J. M. Oliveira of the Pineapple Experiment station. These worms, belonging to the great group known as nematodes, were found in colls in Hawaii and other Pacific islands.

Victim Has No Chance. One group of these spear-bearing worms has big, heavy weapons with large hollows. So quickly do they suck in the flesh and blood of their victims that the speared worm has no time to struggle.

A second group has slender spears. Their victims might conceivably squirm around violently. This, however, is prevented by the paralyzing action of the slender spear's thrust, apparently due to the saliva of the attacker injected through the hollow shaft.

These strange hunter worms have a certain amount of economic importance, because some of the species that become their prey are feeders on the roots of crop and ornamental plants.

Biggest Oyster Shell Is Found in Texas

Alpine, Texas.—Biggest oyster shell in the world, is the distinction claimed for an enormous fossil, four feet long and three feet wide, dug up by geologists of the national park service in the proposed Big Bend National Park area in western Texas. Dr. Charles N. Gould, who has been working in the rich fossil deposits of the region, thinks there may even be bigger shells waiting to be excavated.

Auto Trailer Real Jekyll and Hyde, Says Science Writer

It Can Bring the User Benefit or Disaster

By JANE STAFFORD
AUTO trailers now luring city people out for a summer's gypsying on the highways of the nation give to the casual observer no hint of sinister deeds; but they have a Jekyll-and-Hyde personality. As they travel the highways they can roll up benefit or disaster to health.

Acting as veritable Dr. Jekylls, the trailers can increase the physical well being of a large part of the population by getting these people outdoors and in sunshine much more than would otherwise be possible. Acting as Mr. Hyde, they can jeopardize the health not only of those who ride and live in them but of whole communities through which the trailers pass. Here is the picture of Mr. Hyde in a trailer as worried health officers see him:

Communicable diseases—typhoid fever, smallpox, influenza and all the rest—are spread fastest by travel. With thousands of persons traveling constantly, many of whom never traveled before, the spread of disease may be greatly accelerated.

Milk and Water Problems. Trailer tourists cannot depend on the milkman or the city water works to supply them with safe milk and drinking water. They must find these for themselves. Penalty for not using a safe supply may be a serious case of typhoid fever or some other ailment that can come from contaminated water or milk.

Gravest danger of all is the trailer tourist's garbage and other waste. If this is not properly disposed of, it will scatter disease along the highways and in tourist camps, villages, farms and cities.

A recent conference of health officers suggested many ways to meet this danger. Among them was the radical step of requiring health department approval of every trailer's sanitary arrangements before a license is issued by the highway authorities.

Birth-Ring Found in Human Teeth by Chicago Dentist

Chicago.—Discovery of a birth-ring in human teeth, something like the growth-ring of a tree, was announced by Dr. Isaac Schour of the University of Illinois College of Dentistry here.

The birth-ring is said to be a "definite biological landmark in the history of the individual." Its discovery, Dr. Schour believes, opens the way for other new discoveries in the history of the teeth and the individual.

The birth-ring, or neo-natal ring, to give it its scientific name, is found in the first or baby teeth. It appears in both the dentin and enamel and makes it possible to compare the amount and quality of each of these substances in the teeth before and after birth.

Marked by Biologic Changes. The teeth start to grow about four months before the baby is born and the last tooth has not completed its growth until the age of twenty years is reached. During this time several important biologic changes take place, the most important of which is birth. One effect of this experience, in which the change from dependent to independent life is made, is a loss of weight which it takes the baby 10 days or more to regain.

Reflected Light Used in Matching Colors

Durham, N. C.—Housewives with a piece of silk or skein of yarn to "match," hold the sample against the piece they are shopping for, and decide whether or not the colors agree. In the very much larger shopping jobs that industry has to take care of, much more exact matching processes are necessary, and these are taken care of by a scientific light-analyzing and measuring device, the spectrograph. How this operates was told before the meeting of the American Physical Society of Duke university, by Prof. Arthur C. Hardy of the Massachusetts Institute of Technology.

With the spectrograph, light reflected from the sample or standard is split into its component spectral parts, and the exact wavelength of each of these portions is determined, as well as a measure of its intensity. The result is a numerical formula exactly describing all the parts of the light and telling how it is put together.

Household Hints

By BETTY WELLS

GIVE us a glimpse of your linen closet, and we'll tell you more about yourself than even you have suspected. Oh, we're a regular Sherlock Holmes when it comes to towels and sheets. We'll know how fastidious a housekeeper you are, how foresighted and forearmed you are, how economical, how meticulous, how good a manager, not to mention what you consider is important.

Speaking of sheets, here are the things we think are important to know about them:

Short sheets are a constant nuisance. Get 108-inch length sheets in order to have the right amount of tuck-in. And about length, "torn" size means the length without shrinkage or hemming. Actually a 108-inch torn size means about a 98-inch length. This applies to the average sheet. One mill now offers

Your Linen Closet Tells Tales on You

a "true size" line of sheets. They are marked with the size the sheet actually is for use. Then you don't have to allow for this and that.

Another improvement is a so-called "anchor line" on sheets. This is a guide for getting the sheet straightwise of the bed the first shake.

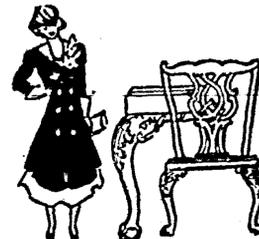

We used to feel pretty feminine toward the technical terms in sheet-dome, but now that we know why they're important we make a point about them in buying sheets. The thread count means the number of threads per square inch, both lengthwise or crosswise. Unless there are approximately the same number both ways, the sheet may tear more easily. The tensile strength is the number of pounds strain it can stand lengthwise and crosswise.

Sizing is the starch or filling in the fabric. Firm, extra woven salvages are important for reinforcing the edges of the sheet.

It's fun to get initialed or monogrammed sheets now at little or no extra cost. And reinforced-hem-stitching is also available in moderately priced sheets. Tinted sheets are still an improved company touch.

Portrait of a Squire

We have been digging around a lot lately for choice tidbits about that remarkable gentleman and cabinet maker of Eighteenth century England, Thomas Chippendale. And we ran across this paragraph in one of Sarah Lockwood's books: "Chippendale was apparently born to give expression to the inarticulate soul of the country gentleman of his time. In that day of portraits there was no more perfect portrait of the English squire than one of Chippendale's chairs; handsome, upstanding, stout in the legs, broad in the seat, straight in the back and square in the shoulders." Chippendale was certainly the most versatile and prolific of furniture makers, and his designs have a distinguishing individuality about them that survives generations of copying. The first important worker in mahogany, a new wood when he came first to London, he

Learn About Chippendale Chairs

took his inspiration where he found it—from the Queen Anne period, from the continentals, from the heathen Chinese. But always his hand upon it shaped it to his own originality. Sometimes he used a straight squared leg; sometimes he used a carved cabriole leg ending in the ball and claw foot. He used ladder backs, the ribbon back, vase shaped backs intricately carved and interlaced, fretwork backs with a Chinese accent, all decisively different yet all just as decisively Chippendale. He ranged from extreme simplicity to utmost elaboration in his work. Not quite always but nearly always the Chippendale chair has a cupid's bow top line of the back. When it doesn't, then it is straight across. It's very rare to see a Chippendale chair with a down curve at the top. But learn about Chippendale chairs by studying those in your favorite stores where you'll find excellent reproductions. And when you know the chairs, you'll also recognize other pieces of Chippendale furniture.

AVOCADO IS ONE OF KING FRUITS

It Contains Many Important Nutritive Qualities.

By EDITH M. BARBER

THE avocado, one of our native American fruits, has comparatively recently made itself widely known. In its original form in our southern tropics, it has always been an important food and deservedly so, as it outranks all other members of the fruit family in some of the most important nutritive qualities. It contains even more fat than the olive and unlike other fruits also contributes a certain amount of protein.

It is grown today for our markets in Florida, the West Indies and in the Southwest, particularly California, where the fine grades have been given the name "calavo." Now that packing and shipping facilities have been perfected, it has been made possible for many parts of the country to become acquainted with this delicious fruit, which is sometimes called the alligator pear. Because of the distance which it must travel and because it must be used as soon as it is really ripe, the price in our markets is never low enough for us to use it as a staple food. The price, however, has dropped enormously. At the height of the season it may be found at real bargain prices. Both its flavor and texture have made it a popular addition to our table, where we generally use it as a salad.

In my opinion it is at its best when dressed with lime juice as it is in the tropics, with lemon juice, or with chili sauce, an idea, by the way, which came to me from Honolulu. If French dressing is used, the proportion of vinegar to oil should be larger than usual. The avocado combines well with tomatoes, grapefruit and oranges, which contrast with it both in flavor and texture. Alternate slices of the fruit may be arranged on a bed of romaine or lettuce, or avocado halves may be filled with mixed fruits.

Avocado and Crabmeat.

- 3 avocados
 - 1 cup picked crabmeat
 - 1/4 cup finely minced celery
 - 1 teaspoon onion juice
 - 1/4 cup catsup or chili sauce
- Cut avocados in halves and remove pits. Mix crabmeat with celery, onion and catsup or chili sauce and fill fruit with this mixture. Serve as a first course or as a luncheon salad.

Sweet-Sour Dressing.

- 1/2 cup sugar
 - 1/4 cup vinegar
 - 2 tablespoons salad oil
 - 1 tablespoon minced onion
 - 1 tablespoon minced celery
 - 1 tablespoon minced pepper
 - 1 teaspoon salt
 - 1/2 teaspoon paprika
 - 1/2 teaspoon Worcestershire sauce
- Mix ingredients, add a small piece of ice and beat one minute until thick.

Caramel Custard

- 1 cup sugar
 - 3 eggs
 - Salt
 - 1 teaspoon vanilla
- Put half the sugar into a small frying pan and stir over a low fire until a syrup is formed. Stir in another one-fourth cup of sugar and continue stirring until it is melted. Pour this mixture into six greased custard cups. Beat eggs slightly, add remaining sugar, salt, milk and vanilla. Mix well and pour into custard cups. Bake in a pan of hot water in a moderate oven, 375 degrees Fahrenheit, until custard is set.

Baked Prunes.

- 1 pound of prunes
 - Water to cover
- Pick over the prunes and place in a baking dish, cover with water and cook several hours. Cover and bake in a slow oven an hour or more. The long, slow cooking will bring out the natural sugar and no sweetening will be needed. Other dried fruits may be cooked in the same way, but a small amount of sugar is desirable with the more acid fruits.

Jellied Tomato Ring.

- 3 tablespoons gelatin
 - 1/2 cup cold water
 - 2 cans tomato soup
 - 2 cups water
 - Salt
 - Pepper
 - 5 or 6 cloves
 - Bay leaf
 - Stuffed olives
- Soak gelatin in water. Heat soup with water and add seasoning. Add soaked gelatin and stir until dissolved. Arrange stuffed olives in a ring mold (quart size) and pour over a thin layer of hot mixture. Chill in refrigerator until set. Add rest mixture. Chill in refrigerator two hours until set. Turn out of mold on cold platter, fill center with vegetable salad and garnish with lettuce.

Cooked Salad Dressing.

- 2 teaspoons salt
 - 1 1/2 teaspoons mustard (dry)
 - 4 teaspoons sugar
 - Cayenne
 - 2 tablespoons flour
 - 2 eggs or 4 egg yolks
 - 1 cup hot milk
 - 1/2 cup vinegar
 - 1 cup sour cream
- Mix the dry ingredients and add to the eggs. Add the milk and vinegar and cook over hot water until mixture thickens. Cool quickly and add sour cream. Store in refrigerator in a covered jar.

Dressed for the Occasion

"HI THERE, Mrs. Astorbilt, where are you going in that lovely summer gown?"

"Not very far, Miss Junior Deb, just down to the store to buy material for a play suit like yours."

"Well, Ma-mah, if you must copy my style, you couldn't find a better model because these shorts really fit, and the whole thing is a tailored job."

A Stylist Speaks.

"May I as Susie Sew-Your-Own interrupt you two with the latest word from my class in dress design? You, Sis, are a pre-vue of Miss America in proper sports wear while Ma-mah is modern to the minute with her raised waistline and full bodice. I, in this morning frock, have what the book calls classic simplicity. Be that as it may, I couldn't get along without it, because it's so cool and comfortable."

Everybody's Happy.

"Thanks for the approval, Susie. Your clever dress would be a bright spot in anybody's kitchen, and now that you've got the owing of this sewing business there will be no stopping you. But even so, I must admit I'm a proud mother. You can go just as far as you like with this new hobby."

"Gee, Ma-mah, isn't it swell to be on such friendly terms with Fashion? I think good old Sew-Your-Own deserves most of the credit for arranging the introduction. Spring means so much more when one's clothes look the part."

"You're quite right, dear, but now let's run along. We have work to do."

The Patterns.
Pattern 1270 comes in sizes 14 to 20 (32 to 42 bust.) Size 16 re-

quires 5 1/2 yards of 39 inch material.

Pattern 1272 is designed for sizes 14 to 20 (32 to 42 bust.) Size 16 requires 4 1/2 yards of 39 inch material. 2 1/2 yards of ribbon are required for the tie belt.

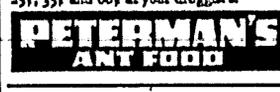

Pattern 1304 is for sizes 34 to 40. Size 36 requires 3 1/2 yards of 35 inch material plus 1/2 yard contrasting.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coin) each.

Dedication of Carrie Tingley Hospital Postponed

The Dedication exercises for the Carrie Tingley hospital at Hot Springs had to be postponed on account of floods and washouts which were general all over the state.

The Rio Grande was out of its banks and water was running over the bridge at San Antonio about 1 1/2 feet deep. The highway each side of the bridge was washed out. Walter Grumbles, Jr; who drives the mail had to go by Vaughn.

The Roswell-Clovis highway was blocked when the Pecos river overflowed the bridge, so Rev. J. A. Bell had to take a round-about route to return from Abilene where he had been to bring his son, Sterling home from school.

Mr. and Mrs. Monroe Howard of Capitan left last Friday for a trip to Richmond, Virginia. They got as far as Roswell and had to stay there two days. The water had not subsided Sunday, so they returned to Capitan and went through here that afternoon enroute to Vaughn, where they hoped to find the highways passable.

Mr. Sidney Goldston, driver of the Roswell-Carrizozo Truck line

068877 Notice for Publication

Department Of The Interior General Land Office at Santa Fe, N. M. May 28, 1937.

Notice is hereby given that Patrick Garvey Coor, of Capitan, N. M., who, on April 27, 1934, made Stockraising Homestead entry, No. 068877, for S 1/2, NW 1/4, S 1/2 NE 1/4 Section 23; S 1/2 NW 1/4, Section 24, Township 5 S, Range 16 E., N. M. P. Meridian, has filed notice of intention to make three year Proof, to establish claim to the land above described, before U. S. Commissioner, at Capitan, N. M., on the 14th day of July, 1937.

completely stalled for an hour in the hail storm near Lincoln Monday. The large hail stones made dents in the hood on his engine. Reports say the Lincoln orchards are all ruined. The road which was blocked at Tinnie by a wash out Thursday of last week was reopened Saturday night, but another washout on the Hondo delayed traffic last Tuesday. Havoc was wrought by the rain and hail in the Hondo, Pecos and Rio Grande valleys. Reports say that farmers, orchardists and stockmen in the Hondo valley suffered heaviest losses. The Roswell business district was badly damaged. Several firms lost all the goods which was stored in their basements.

045083 Notice for Publication

Department Of The Interior General Land Office at Las Cruces, New Mexico, May 7, 1937.

TOP-NOTCH PLACE to spend the summer

BUICK PRICES? YOU'VE GOT WHAT IT TAKES!

If you're looking for the pleasantest place in the world to spend your summer—just put yourself behind the wheel of this sparkling new Buick and you're there!

You sit in a seat that seems tailored to your frame. Your hand's on a wheel that feels more at home than your machine. Your toe's on a treadle that unleashes the surging power of the ablest engine of its size in the world—Buick's valve-in-head straight-eight engine!

You've brakes to halt you quick and easy—lullaby springs to cradle you softly over bad spots—you've got the bellwether car of the year!

Maybe the big, sleek, rich look of Buick makes you think it's a little beyond your means.

But the price on the Buick SPECIAL is not only the lowest in all Buick history but lower even than on some sizes.

So before you buy any car, get the figures on a Buick. The place for you this summer is in the leader's seat—got your order in now and be sure of a wonderful time.

Local Dealers Now Operate All Conoco Service Stations

Recent abandonment of direct operation of service stations by Continental Oil Company, in favor of selling its products through local independent dealers, has been a development of major importance both to the consumer and the company, it was said here today by Dan Moran, Continental's president.

"In line with this new policy," said Mr. Moran, "all Conoco gasolines, oils and greases are now sold only through independent dealers and jobbers, in business for themselves, who operate their stations under ownership or lease."

"Under this plan the place of the former service station salesman has been taken by men engaged in a business they own and control, of the same standing as the local jeweler, hardware merchant or furniture dealer. He becomes a permanent resident of the community, takes his place among other merchants, and will give him a profit above that he earned as a company employee."

"Major operators who were somewhat skeptical about the outcome of this policy that wiped out the company-owned and operated stations are fast becoming convinced of its value in good will and public approval," concluded Mr. Moran. "Our experience indicates that the industry will find it has lost the administrative headaches of roadside retailing, and has gained the support of thousands of new 'mileage merchants' who will take care of the oil company's interests in taking care of their own."

Methodist Church

There will be a union service of the Carrizozo and Capitan Methodist churches Sunday morning and afternoon. A basket dinner at the church at Capitan will be served at noon. Everybody come and bring your family. Rev. George W. Shearer will preach Sunday morning at 11:00 A. M. and again in the afternoon at 2:30. Prepare for a good time. We not only want all the officials and the members of the two churches present, but all of any other denomination are welcome.
J. A. Bell.

Clickety-Click Of Rail Joints May Be Doomed

The "clickety-click" that has been a traditional part of train travel since the laying of the first steel rail, may be doomed to eventual extinction in the march of scientific research.

It was revealed today that Southern Pacific for the past two years has been testing a two-mile stretch of track near Tucson, Arizona, over which the train wheels roll almost noiselessly. The track lies between Neviska and Avra on the main line of the Sunset Route.

The special track has mitered joints between the lengths of rail instead of the usual square-cut butt joints. As a result, train wheels roll onto the tip of each successive length of rail before they leave the tip of the last, and the click is practically eliminated.

Southern Pacific officials pointed out that in addition to providing a quieter ride, the new rail design is expected to minimize the usual wear on the ends of rail lengths, caused by the wheels jolting over the square joints.

Birthday Party

Mrs. Lena Devine entertained last Friday in honor of her little son's birthday. The little people had a fine time. Refreshments were served and Joe Boy received many nice gifts.

Local and Personal

Jobie McPherson visited relatives and friends in Roswell from Saturday until Monday. He returned home Monday during the rain and hail storm at Lincoln.

Mr. and Mrs. Marvin Roberts and mother, Mrs. Willingham, returned last Monday from a trip to Minnesota, where they visited Mrs. Willingham's sister.

Found—1 pair of keys. Owner may have same by describing and paying for this ad.

Miss Dorothy Phillips of Roswell passed through here Monday enroute to Alamoso, Colorado to spend a month with her sister.

Mrs. J. J. Hoffman spent Monday with her son, Mr. Henry Hoffman and family.

For sale—Large Tarpaulin. Inquire at City garage, Carrizozo, N. M. June 4th.

Mrs. Chas. T. Russell and little granddaughter, Margaret Jean from Washington, D. C. visited Mrs. Charles Joyce last week. They had been visiting Honolulu. Margaret Jean danced at Joe Boy's birthday party which was held last Friday.

Monday, May 31st, the bank, postoffice and court house were closed.

Sunday, being Memorial day, Memorial services were held at almost every cemetery in the county.

Mr. and Mrs. Roy Kent of Ocura have as visitors their daughter and her children.

Mr. and Mrs. Walter La Fleur and baby were here from Alamogordo last week. While here they renewed their subscription to the News.

For Rent

2-room, partly furnished house with garden and fruit trees. Inquire at News office. June 4th.

Mrs. Ellison and daughter Evelyn will leave for Hobbs tomorrow.

Think This Over

The habit of saving is a good habit, and wealth is a result of habit. All banks are ever willing to assist in the cultivation of this habit. A depositor once said he felt reluctant about coming in and "bothering us" with a small deposit. It is not the occasional big thing that makes success, rather it is the repeated habit. We welcome deposits of any amount and are always glad to have you come in.

New Mexican Sold

Jesus M. Baca announced the transfer today of control, management and operation of the Santa Fe New Mexican, "The Southwest's Oldest Daily," and Santa Fe New Mexican Publishing Corporation to Oscar S. Stauffer of Arkansas City, Kans. Mr. Baca retains a part interest in the business.

The deal, Mr. Baca said, was closed last Tuesday night. It is effective June 7. The purchase price was not announced.

Mr. Stauffer is a well-known Kansas newspaper man, publisher of the Arkansas City Traveler, the Pittsburg Headlight, the Independence Reporter, the Shawnee News and Star, Shawnee, Okla., and the Maryville, Mo., Forum.

The New Mexican, Mr. Stauffer said, will be operated separately from these papers.

Senator Cutting owned the New Mexican, until his death. The paper was established in 1849.

Announcement

To those who may need my services in the Justice of the Peace and Probate Courts: You are hereby advised that I now reside at Capitan, N. M.

Hilario Maes.

MAN WITH CAR

To take over profitable Watkins Route in nearby locality. Established customers. Must be under 50 and satisfied with earnings of \$30.00 a week at start. Give your age and type of car. Write The J. R. Watkins Company, Rural Dept., 306 Liberty Street, Winona, Minnesota. M-28-2t

You'd think my living depends on your getting mileage
IT DOES

I'm no big company myself, just because I sell a good big company's oil, etc. This business is mine, and their oil has to show my customers a heap longer mileage and cool smooth operation, or I wouldn't make near as safe a living. I'd rather have my good trade on Conoco Germ Processed oil, than just getting people to change here once, and always be worried about new ones showing up. A lot of my trade comes from clear out around, because nothing but my Germ Processed oil will Oil-Plate their engines. You see, the patent Germ Process gets this oil to form a strong slippery Plating on every working surface. Mind you, Oil-Plating can't

drain down while your car is parked. So it can't let your engine start up "dry," which engineers say is the greatest danger. And the way it's Plated on, Conoco Germ Processed oil isn't using up in a hurry. Then that's getting more mileage out of both your oil and engine—coming here to me for Oil-Plating.

CONOCO GERM PROCESSED OIL

Social Security Act Is Declared Valid

THE social security act, which President Roosevelt considers the soul of the New Deal, is constitutional, in the opinion of a majority of the Supreme court. The unemployment insurance provisions of the law were upheld by five of the justices, Van Devanter, Butler, McReynolds and Sutherland dissenting. The old age pension provisions were declared constitutional by all the justices except Sutherland and Van Devanter.

Justice Cardozo wrote the two majority opinions, and, as it chanced, delivered them on his sixty-seventh birthday. Administration leaders declared they completely justified the President's broad interpretation of the general welfare clause of the Constitution and his policy of extending federal power, and it would seem that this is true. Justice Cardozo's opinion on the unemployment insurance said:

"It is too late today for the argument to be heard with tolerance that in a crisis no extreme use of moneys of the nation to relieve the unemployed and their dependents is a use for any purpose narrower than the promotion of general welfare."

"At times taxpayers have contended that the congress is without power to lay an excise on the enjoyment of a privilege created by state law. The contention has been put aside as baseless."

"The power to tax the activities and relations that constitute a calling considered as a unit is the power to tax any of them."

Concerning the old age pension provisions he said the scheme of benefits created by them is not in contravention to the limitations of the tenth amendment, and: "Nor is the concept of the general welfare static. Needs that were narrow or parochial a century ago may be interwoven in our day with the well-being of the nation. What is critical or urgent changes with the times."

In another 6 to 4 decision the court upheld the Alabama state unemployment insurance act, declaring the relief of unemployment a valid state function.

Yet another opinion was handed down by five of the justices, upholding Wisconsin's law prohibiting injunctions against peaceful picketing in labor disputes.

The general view of neutrals in Washington was that the day's opinions effectually put an end to the chances of passage of the President's bill to enlarge the Supreme court.

Wage and Hour Measure Offered in Congress

PRESIDENT ROOSEVELT in a special message asked congress to enact a new law for the benefit of workers in interstate industries, regulating the hours of work, the wages and the employment of children. Immediately after it was read, Chairman Hugo L. Black of the senate labor committee and Chairman William H. Connery of the house labor committee introduced identical bills designed

to carry out the proposals of the President. The measure had been agreed upon in conferences at the White House and was promptly referred to committees with prospect of quick action. It had been approved by John L. Lewis, head of the C. I. O., but since laws setting minimum wages for men have always been opposed by leaders of the American Federation of Labor, it was considered probable that organization would not like the bill.

The twin bills originally had proposed a forty hour maximum week and a 40 cents an hour minimum wage. But, at the last moment, these limits were eliminated and spaces in the measures left blank for congress to fill.

By its main provisions the measure will:

Apply to all strictly interstate industries, thus excluding such enterprises as the service trades, hotel business and other purely intrastate fields.

Establish a five-man administrative board.

Supplement the administrative board by advisory boards in industries where thought necessary.

Provide that the work week cannot be reduced below 35 hours in any industry but that employers in certain businesses affected by seasonal variations may work their labor more than 40 hours, paying time and a half for overtime.

Establish \$1,200 a year as the

wage above which a board regulating wages and hours would have no control; set 80 cents an hour—or double time—as the largest minimum wage.

Provide a series of gradations in apprenticeships.

Prohibit industrial homework, a new feature.

Exclude employers of less than 15 workers from the bill's provisions.

Bar from transportation or sale in interstate commerce goods manufactured in violation of these standards or by workers less than sixteen years old.

John D. Rockefeller, Sr., Dies in His Florida Home

"I AM very tired," said John D. Rockefeller, Sr., to his secretary as he sat in the garden of his Florida winter home at Ormond Beach. Then he went to bed, soon fell into a coma, and a few hours later passed away, peacefully and painlessly. His wish to live to be one hundred years old was not fulfilled, but he would have been ninety-eight on July 8 next.

Thus died the man who, starting with a

\$4.50 a week job, fought his way to the very top of the financial world, created the vast Standard Oil trust and built up one of the biggest private fortunes ever recorded. At the age of twenty-six he was beginning to be prominent in the then young petroleum industry, and in 1870 was formed the Standard Oil company which, by methods that were considered ruthless, gained control of three-fourths of the country's oil output. For 40 years Rockefeller and his associates were bitterly attacked through the courts and in every other way possible, and finally, in 1902, the Standard Oil trust was ordered by the Supreme court dissolved into its component parts.

But its business went on and the Rockefeller millions continued to increase until the family fortune was estimated at about two and a half billions. At the height of his career John D.'s income was between \$9 and \$10 million dollars.

Disturbed by ill health, John D. retired from active business in 1911. Some time before that he had switched from accumulating wealth to giving it away. The giving was done systematically, and representatives of the family interests estimate that his own benefactions between the years 1925 and 1934, both inclusive, totaled \$530,633,632. At the top of the long list of gifts are the Rockefeller Foundation, which received \$102,631,400, and the General Education board, which was given \$129,293,107. For years the University of Chicago was a pet of his, and he gave it in all \$78,440,407. Numerous educational and religious institutions and organizations were given large sums, and in times of great disasters Mr. Rockefeller donated generously to the relief funds.

Mr. Rockefeller's body was taken from Ormond Beach to his estate at Pocantico Hills, Tarrytown, N. Y., and there the funeral rites were conducted by Dr. Harry Emerson Fosdick of New York city. Next day the oil king was laid to rest in Lake View cemetery, Cleveland, beside his wife who died 23 years ago.

Only two of Mr. Rockefeller's children survive him. They are John D. Rockefeller, Jr., head of the business since the father retired, and Alta, wife of E. Parmelee Prentice. There are eight grandsons and five granddaughters.

Third Son Born to the Lindberghs

COL CHARLES A. LINDBERGH telephoned to the American embassy that a third son had been born to Mrs. Lindbergh on May 12, coronation day. The news had been kept secret for nearly two weeks. Mrs. Dwight Morrow wrote to relatives in Cleveland that her daughter and the infant were both "doing nicely."

Russia Will Have Air Base Close to North Pole

SOVIET Russia is planning to establish regular airplane connections with the United States by way of the Arctic ocean, and in pursuance of the plan is building an air base on the ice within a few miles of the North pole. Four scientists have been landed there from a plane which first flew over the pole, and they will remain on the ice for a year, keeping in connection with the world by a powerful radio. They have named the floating ice field "Comrade Stalin's Land." The contemplated air route will be from Moscow to San Francisco.

Though Admiral Peary presumably planted the United States flag at the North pole, neither this nor any other nation has claimed sovereignty over the region.

Justice Van Devanter Quits the Supreme Court.

ASSOCIATE JUSTICE WILLIS VAN DEVANTER notified President Roosevelt that he would retire from the Supreme court bench immediately after the summer adjournment of the court on June 1, and there were rumors in Washington that his example would be followed by Chief Justice Hughes and associate Justices Sutherland and Brandeis when the contest over the President's court enlargement program is settled.

Senator Robinson

Speculation as to Justice Van Devanter's successor began at once and it was generally agreed that Joseph Robinson, Democratic leader of the senate, had the best chance for the appointment. It was believed he had been promised the place at the first opportunity some time ago, and his many friends in both parties were quick to extend their best wishes. Of course there was talk of his ineligibility because of the recently enacted statute permitting Supreme court justices to retire on full pay for life. The Constitution provides that "no senator or representative shall, during the time for which he was elected, be appointed to any civil office under the authority of the United States which shall have been created or the emoluments whereof shall have been increased during such time." But several authorities declared this would not apply in the present case.

President Roosevelt was reported to be desirous of being relieved from his promise to name Robinson, who is sixty-five years old and also in reality a conservative. But the senator's Democratic friends in congress were said to have let it be known that if he were not given the place they certainly would defeat the President's court enlargement bill.

Paris Exposition Opened by President Lebrun

WITH considerable ceremony the Paris exposition of 1937 was opened to the public, more than three weeks late because of labor troubles. President Albert Lebrun led a long procession of government members, diplomats of all nations and distinguished guests on a tour of the grounds, which lie along the Seine, a mile wide and two miles long.

The fair was said to be about 60 per cent complete on the opening day, but many of the buildings were still in process of erection. These included the pavilions of the United States and Great Britain. France expects many hundreds of thousands of visitors during the summer, and those fortunate enough to go there will see a wonderful display of the science, industries and art of nearly all nations.

Windsor-Warfield Wedding Takes Place June 3

WALLIS WARFIELD will become the duchess of Windsor when she is married to Edward, the duke, on June 3 at the Chateau de Candé, near Monto, France. But whether she will be "her royal highness" is at this writing still a disputed question. Edward, through his American friend Herman L. Rogers, has virtually told the world that she will, the New Yorker saying to correspondents: "I think she automatically would be called that." It was taken for granted that Mr. Rogers would not have said that without the approval of the duke.

This widens the breach between Edward on one side and the British cabinet and Anglican churchmen on the other. The duke's friends assert that Prime Minister Baldwin and his associates have broken a pre-abdication promise concerning the marriage.

Sumner Welles Is Made Undersecretary of State

PRESIDENT ROOSEVELT sent to the senate a number of State department appointments. Assistant Secretary of State Sumner Welles was nominated for the post of undersecretary of state. Assistant Secretary R. Walton Moore, who vied with Welles for the post of undersecretary, was nominated for the newly created office of counselor of the Department of State.

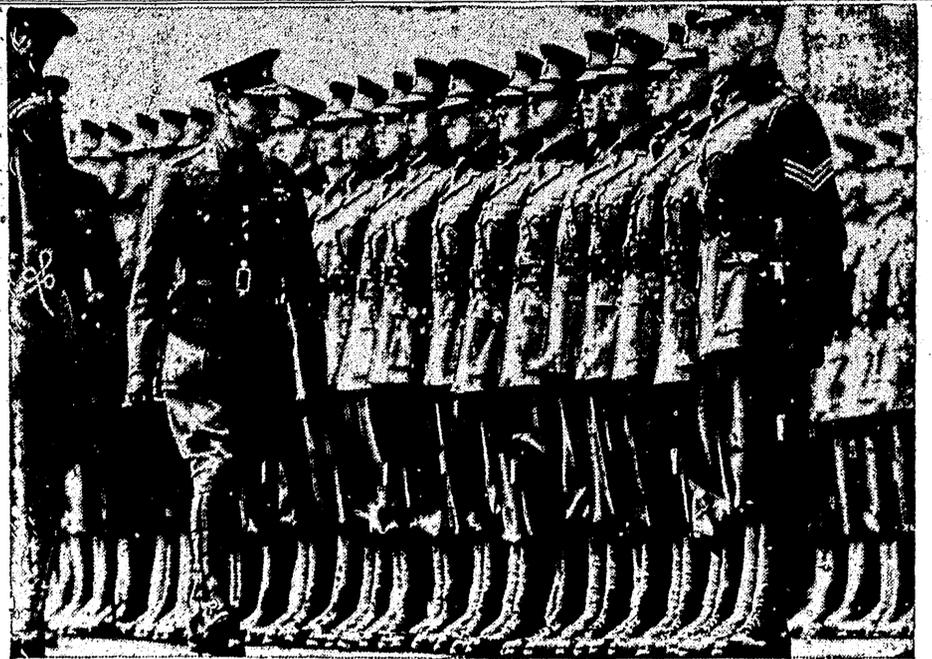

John Cudahy, former ambassador to Poland, was nominated as minister to the Irish Free State; Alvin Mansfield Owsley of Texas as minister to Norway, and Edwin L. Nevills of Ohio as minister to Siam.

Gotham Fair Appropriation Vetted by President

NEW YORK asked and obtained from congress an appropriation of \$5,000,000 for its world's fair, with the provision that the money was to be spent by the fair commission. But President Roosevelt vetoed the measure; and in his message he rebuked congress for "an unconstitutional invasion of the province of the executive" in setting up a commission to direct the expenditure.

When the message was read in the house the Republicans reared with laughter and the Democrats, or some of them, faged.

King George VI Reviews His Guard of Honor

King George VI is shown inspecting the troops forming his guard of honor during ceremonies at the Royal Military college at Sandhurst, England, when the memorial chapel was dedicated recently. Queen Elizabeth accompanied the king on his visit to Sandhurst.

Plan 18,000-Mile Yacht Voyage

Capt. Balty Sawyer and Mrs. Sawyer shown sitting out their 60-foot two-masted schooner, Henrietta, for an 18,000-mile voyage to Melbourne, Australia. Mrs. Sawyer, who learned navigation on a previous trip, will serve as navigation officer.

JOHN D. ROCKEFELLER

John D. Rockefeller, who died at his winter home at Ormond Beach, Fla., at the age of ninety-seven, after making more than a billion dollars and giving away three-fourths of it for philanthropic, educational and medical research activities. The patriarch was buried at Cleveland, Ohio, where 80 years ago he began work as a penniless youth. Mr. Rockefeller, whose ambition was to live to one hundred, left 30 descendants. Had he lived another month he would have been ninety-eight.

YOUNG COLLEGE HEAD

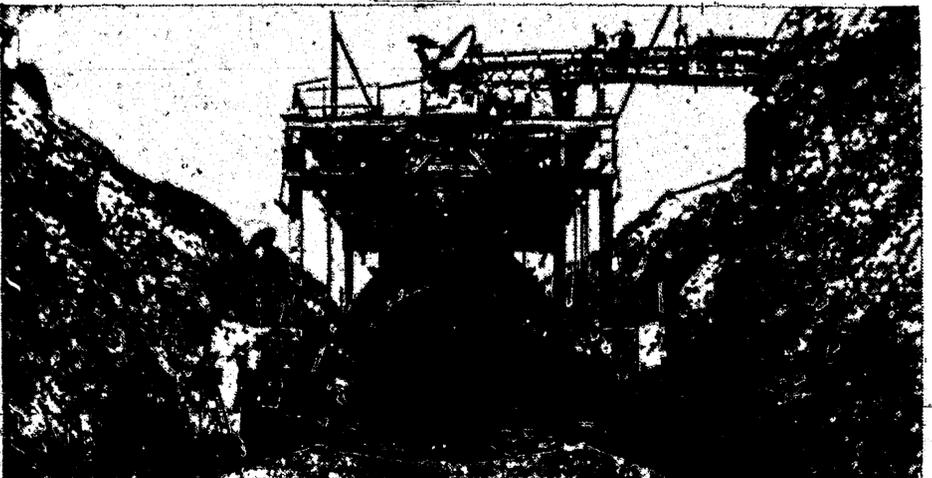

Dr. Paul Swain Havens, Princeton graduate, Rhodes scholar, professor and author who was inaugurated as president of Wilson college at Chambersburg, Pa., recently. He is only thirty-three.

Golf Champions of the Big Ten

Here are Northwestern university's champion golfers, who won the Big Ten conference title played at the Kildeer course near Chicago. Left to right: James Marek, Bill Kostecky, Coach Ted Payseur, Sid Richardson, individual champ, and Frank Ferpich.

Gigantic Aqueduct Approaches Completion

The 302-mile aqueduct which will bring water to Los Angeles and surrounding communities from Parker Dam on the Colorado river was recently reported 62 per cent complete. This view shows a construction scene on one of the concrete covered tunnels. These sections are built in deep trenches carved out of the mountain sides or desert floor they traverse.

CAPITAN, NEW MEXICO

**Notice
State Engineers' Office**

Number of application Misc. 1 Santa Fe, N. M., May 30 1927
Notice is hereby given that on the 19th day of May 1927 in accordance with Chapter 181 of the Session Laws of 1921 National Gold Prospectors of Denver, County of Denver State of Colorado made application to the State Engineer of New Mexico for the permit to appropriate the underground percolating waters in Lincoln County, New Mexico, to the extent of 3000 gallons per minute by the construction of a shaft 8 ft. in length, 8 ft. in width and approximately 300 feet in depth, located in the SE1/4NW1/4, Sec. 27, T. 3 S., R. 12 E., N.M.P.M., for the purpose of mining, milling and domestic use within sections 9, 10, 11, 14, 15, 16, 21, 22, 23, 26, 27, 28, 29, 34 and 35, T. 3 S., R. 12 E.
Any person, association or corporation desiring that the granting of the above application will be truly detrimental to their rights in the waters of said underground source may file a complete sworn statement of their objections substantiated by affidavits with the State Engineer and file proof of service of a copy thereof upon the applicant with the State Engineer within ten days after the date of last publication of this notice. The date set for the State Engineer to take this application up for final consideration unless protested to the 20th day of June, 1927.
Thomas M. McClure,
State Engineer,
June 4 1927

Delegates to the western regional farm bureau convention held in Las Cruces June 10 and 12 have been invited to Ruidoso by members of the forest service.

**NMMI Poloists
Play Cornell**

Ithaca, N. Y., May 29. Clear skies and cool weather greeted polo squads of New Mexico Military Institute and Cornell today as they prepared to meet on a field somewhat soft from recent rains in a feature of Cornell's spring day program this afternoon. It will be a battle of champions with the Institute representing the Southwest. Cornell is the eastern intercollegiate indoor polo champion.

Flood Damages

Teams and highway machinery aided traffic to get through on highway 85 last Monday. Gov. Tingley who passed through this area while the water was still above the running boards stated that the highway department night consider re-routing this road. Estimates of flood damage are at a million dollars, or more. One ranchman said the swirling waters dashed through a canyon where his sheep were and that possibly 550 were lost. Monday's severe rain and hail storm near the Bonnell ranch resulted in the death of a sheepherder and his wife. A coronor's jury said they lost their lives in a hail and windstorm of tornado proportions.

Sterling Bell is assisting at Harry Miller's service station.

Lyric Theatre

Thursday, Friday and Saturday
"Come and Get It"
Featuring Edward G. Arnold, Frances Farmer, Mady Christians, Walter Brennan, Andrea Leeds and Mary Nash. Taken from the novel of Edna Ferber. As big as Cimarron, So Big and Show Boat. A thrilling chapter, torn from the heroic chronicle of our nation's rise to greatness.

CAPITAN ITEMS

Joe Otero and his brother Cruz were here from their ranch Wednesday. They are very happy with the rains.

Mr. Geo. Titaworth was a business visitor at Fort Stanton Tuesday.

Mr. Miller, who works for the City Garage left Tuesday for Oklahoma; where his mother is very ill.

Mr. Hilario Maca, was in Carrizozo Monday of this week.

Card Of Thanks

Again with deep gratitude, we extend thanks to the friends who rendered assistance in our recent bereavement. Every act of kindness was appreciated to the fullest extent.

The Strelays, Kiles, Silvers and Roscoes.

Mrs. Chas. T. Russell and granddaughter Margaret Jean, and Mrs. C. I. Joyce, Misses Lena and Mary Devine and son, Jo, will leave tomorrow morning for a trip to the Grand canyon. Roy Clark will go also, to act as driver.

Local and Personal

Mr. and Mrs. Roy Skinner and children left for Bisbee, Arizona where they will spend the summer. They will be back this fall in time for the opening of school.

Mr. and Mrs. Roy E. Reeder have moved from El Paso to Corpus Christi, Texas.

Mrs. T. J. Grafton and son Hugh of Angus were shopping here Wednesday.

Mr. and Mrs. S. H. Nickels received a message Tuesday, that their daughter, Mrs. Dick Willis, is ill in an El Paso hospital. Mrs. Nickels left Tuesday night for El Paso.

Mrs. Carl Jones of Van Nuys, California arrived last Monday for a visit with relatives and friends, and to attend to business matters. She left yesterday for Van Nuys.

Mr. T. A. Spencer is in Lordsburg this week attending the convention of cattlemen.

Mrs. T. A. Spencer, who has been ill for several weeks is very much improved.

Governor Tingley passed through Carrizozo and Capitan last Monday enroute to Roswell where he presented the graduating class at the Military Institute diplomas Tuesday morning.

Mr. Luis Nalda of the Red Canyon Sheep Company was in town Wednesday.

Mrs. Brack Sloan and children returned this week from Alamogordo where the children have been attending school. They will spend the summer at their ranch home.

Mr. and Mrs. Vaughn Hobbie left today for Portland, Oregon to attend the graduation exercises at St. Helen's Hall, where their daughter, Eliza has just completed her high school course.

Born-to Mr. and Mrs. Elmer Eaker, Wednesday, a son.

Mrs. Bruce Groves is visiting here from Oklahoma a guest of her grandmother, Mrs. A. E. Lenett for the next two weeks.

Kelley- Bryson

Miss Ruth Kelley and Mr. Corbett Bryson of Albuquerque are to be married this afternoon at the Kelley summer home at Eagle Creek. Only the family and very close friends will attend. Immediately following the ceremony, Mr. and Mrs. Bryson will leave for Colorado points for a wedding trip, after which they will reside in Albuquerque where the groom is in business. Miss Kelley is the daughter of Mr. and Mrs. T. E. Kelley, she was born and reared in Carrizozo. After her graduation she attended school in El Paso, and for more than a year has been employed in Albuquerque. Miss Kelley is an accomplished musician, and is greatly admired. Friends extend congratulations and wish for her and her husband-to-be the best of everything.
