CARRIZOZO, NEW MEXICO, FRIDAY, AUG. 27, 1937

NUMBER 9

FORMER RESIDENT IS SUCCESSFUL ARTIST IN N. M.

Miss Edma Pierce Exhibits Work At Santa Fe

Miss Edma Pierce, daughter of Mr. and Mrs. Jack Pierce of Carrizozo, New Mexico, a former resident of Winters, has become a noted artist and painter of murals in New Mexico according to information reaching this office.

Miss Pierce, active member of the Delta Phi Delta, honorary Art Fraternity of the University of New Mexico, has been attending the University the past nine months and won a scholarship to the Art School at Taos, one of the two most famous art colonies in the United States. Her rating throughout the term was well above the average. She now has pictures on exhibit at the museum at Santa Fe.

In the spring of 1936, Miss Pierce was chosen to paint a representative mural for the A. & M. College of New Mexico to be sent to the Centennial at Dallas, Texas. She has also painted several murals in public buildings in New Mexico.

Miss Pierce resumed her work in Taos on June 14, after a short visit with her parents at Carrizozo.—Winters Texas News.

Lyric Theatre

Friday and Saturday
Rudyard Kipling's
"Elephant Boy"

and Walt Disney's Academy Award Revue of the Best Mickey Mouse Pictures.

Sunday, Monday and Tuesday

Wednesday and Thursday
"MAMA STEPS OUT"
featuring Guy Kibbee and Alice Brady. A gay comedy full of laughs.

"Dancing on the Ceiling" and
"Oriental Paradise"

An Exhibit Of Edma Pierce Paintings

Will be held at Bee's
BEAUTY SHOPPE
the week following Aug. 27

I. O. O. F. Notes

Last Tuesday night only a few members were present at our regular meeting. We would like to have as many as possible out on Tuesday August 31st as we expect to put on the 1st degree.

Mrs. Bill Compton was discharged from the Rathmann hospital last Saturday after two weeks' illness.

Biesemeier-Nickels

On Tuesday evening, August 24 Miss Betty Biesemeier of Chicago, Ill., and Mr. Bill Nickels of Carrizozo were quietly married at the home of the groom's parents, Mr. and Mrs. S. H. Nickels. Rev. J. A. Bell, performed the ceremony.

Members of the family and a few friends were present. The young people became acquainted four years ago at the normal university at Las Vegas, where Mrs. Nickels was instructor of music. She is a noted violinist and has studied under some of the very best European and American teachers of the violin. For some time she has been teaching violin and playing with the Chicago Woman's Symphony Orchestra. Mr. Nickels is well known to the people of Lincoln county, having been born and reared here. He has been elected principal Lincoln school for the coming year. The bride will continue her musical activities there.

Friends join in wishing the young couple every success and hope they will always make Lincoln county their home.

Notice of Pendency of Suit

IN THE THIRD JUDICIAL DISTRICT COURT OF THE STATE OF NEW MEXICO WITHIN AND FOR LINCOLN COUNTY

JOHN E. WRIGHT, Plaintiff

vs.
MARGARET BARNETT LEWIS, Defendant
The following named defendant against whom substituted service is hereby sought to be obtained, to-wit: The unknown heirs at law of Michael R. Barnett, sometimes called M. R. BARNETT, deceased, and all unknown claimants of interests in the hereinafter described premises adverse to the Plaintiff, Defendants

THE STATE OF NEW MEXICO to the above named defendants, GREETING:

Notice is hereby given that John E. Wright as plaintiff has filed his complaint in the above named court and in the above numbered and styled cause of action against you and each of you; that the general objects of said action are to quiet the said plaintiff's title in and to the property described in the complaint in said cause and being described as follows, to-wit: Lots 1, 2, 3, 4, 5, 8, 9, 10, 11, 12, 13, 14, 24, 25, 26 and 27 in block 16 of the original townsite of the Town of Carrizozo, Lincoln County, New Mexico as shown by the official plat thereof on file in the office of the County Clerk and Ex-officio Recorder of Lincoln County, New Mexico,

And to establish plaintiff's estate in said title against any adverse claims of the defendants and each of them and to estop and bar the defendants and each of them from having or claiming any right or title to or interest in or lien upon said property.

You are further notified that unless you enter your appearance in said cause on or before the 9th day of October, 1937, judgment will be rendered in said cause against you by default.

The name of plaintiff's attorney is John E. Hall, and his post office address is Carrizozo, New Mexico. Witness my hand and seal of said court this 25th day of August, 1937.

(D. C.)
(SEAL)
A27—Sept. 17.

Mr. and Mrs. Percy Welch and children have gone to El Paso to live. Mr. and Mrs. Bill Compton are living in the house they vacated.

Former Resident Here

Mrs. Zoe Glasmire and Miss Kathleen Doering of Lawrence, Kansas arrived Saturday and are guests of their sister, Mrs. A. F. Roselle and their father and uncle, Messrs. John and M. Doering. Sunday and Monday they visited Hot Springs, Tuesday and Wednesday they were in Ruidoso. Mrs. Glasmire and Miss Doering are enroute home from a pleasure trip to the Grand Canyon.

Attention Ranchmen

A beef cattle grading demonstration with experts of the New Mexico State College Extension Service and United States Department of Agriculture Cooperating, is to be held at the A. S. McCamant ranch fourteen miles southeast of Corona Monday, September 13. Cooperating ranchers at Corona have laid plans for a barbecue and have donated two muttons and a beef.

This meeting will be one of the eleven scheduled for New Mexico during the present year and should prove of great interest to livestock producers of Lincoln and surrounding counties. Mr. J. K. Wallace, Senior Marketing Specialist of the United States Bureau of Agricultural Economics will attend this meeting and will discuss the livestock outlook for 1937-38. Mr. W. A. Wunsch, Executive Secretary of the AAA in New Mexico, will also be present and will discuss the Range Conservation Program. Mr. W. H. Tolbert, member of a pioneer Lincoln County ranching family who was recently appointed Extension Animal Husbandman by the New Mexico State College, will discuss range carrying capacities and recent experimental findings concerning the proper stocking of New Mexico ranges.

These livestock demonstrations were started in 1923, and have been held annually with the exception of two years, this being the twelfth year of the demonstrations. Mr. Wallace has assisted with these meetings. They have always been very popular and attended with much interest by the livestock men of the state.

Messrs. Ernest Key and Wightman Stewart were Capitan business visitors last Saturday.

Judge H. M. Maes was in town Monday to attend to some business at the court house.

Don't forget the American Legion Labor day dance to be held Monday Sept. 6th.

Richard Dow came home from El Paso last Saturday.

S. A. Pearce

Mr. S. A. Pearce, one of Lincoln county's well known pioneers passed away very suddenly Wednesday, August 18th, 1937 at Alto. Mr. Pearce, whose home is at Lincoln was at Alto, where he farmed this year. When he retired Tuesday night he was apparently in his usual good health, but in the early hours of the morning Wednesday, he was stricken with a heart attack and succumbed without regaining consciousness.

During his long residence in Lincoln county he had acquired many friends who held him in high esteem. He was appreciated by all for his straightforward and honest methods of dealing, for the high regard he held for his friends and the love and devotion he had for his family.

Mr. Pearce was born in Brownwood, Texas, September 5, 1875. He came to New Mexico to make his home in 1902. In 1908 he was married to Miss Pauline Kimbrell of Lincoln. Seven children were born to this union five of whom are living.

Besides his widow, Mrs. Pauline Pearce he is survived by four daughters, Mrs. Dixie Foster of Yuma, Arizona, Misses Gertrude, Alice and Edith Pearce, one son Steve Pearce, Jr., of Lincoln, two grand children Billie Pearce Foster, and Donald Jean Foster of Yuma. Also one brother, Wm. Pearce, and three sisters, Mrs. Jno. Evans, Mrs. Frank Emerson and Miss Lela Pearce, all of Brownwood, Texas.

Funeral services were conducted at Lincoln Thursday morning by Rev. J. A. Bell, followed by interment at Picacho.

Pall bearers were: Messrs. Marshall West, Henry Brady, Ben Lealie, Harry Ramey, Lee Copeland and Lloyd Hulbert.

Friends extend sympathy to the bereaved ones.

Mrs. E. I. Griffin was in town from Adobe last Saturday morning, buying supplies.

Frank Abel Jr., is here from El Paso to visit his aunt and uncle, Mr. and Mrs. S. O. Sproles.

Mr. and Mrs. Walter LaFluer and baby are here from Alamogordo this week, visiting Mr. and Mrs. A. J. Rolland.

Mr. and Mrs. Poe Corn and Miss Helen Rolland were guests at the home of Mr. and Mrs. A. J. Rolland the past week-end.

Mr. and Mrs. Bill Smith of White Oaks have rented the Jeff Herron residence and will live here during school.

Carrizozo Defeats El Paso

The Carrizozo Baseball Club and the El Paso Highway Supply team played a very lively game last Sunday. A good sized crowd attended the game. The score by innings, as follows:

	0	1	2	3	4	5	6	7	8	9
El Paso	0	0	1	2	2	0	2	0	0	0
Carrizozo	1	0	1	2	0	3	1	0	0	0

Batteries, for El Paso: Madrid and Ramon. For Carrizozo: Lueraz and Van Schyock. Another El Paso team will play here next Sunday.

Public Health Column

A recent epidemiological investigation of an epidemic of smallpox revealed some interesting facts which clearly illustrated the great value which must be placed upon vaccination for the prevention of this disease.

The investigation revealed that among 10 families, 37 persons were either actually ill with smallpox or had recently suffered from it.

In one home all of nine children who had not been protected by vaccination developed smallpox; the father and mother who escaped illness had been vaccinated many years ago in Holland. In another home two grandparents and the father who had been vaccinated in childhood remained well; all the children in the family were sick with smallpox and had not been previously vaccinated. In another home the father and one son neither of whom had been previously vaccinated fell ill with smallpox, while the mother who had been recently vaccinated, escaped.

So far as could be learned only one among these 37 smallpox patients showed evidence of vaccination and in this case had been performed approximately 50 years previously.

The laws of the state of New Mexico demand that all children, with certain exceptions, shall be vaccinated prior to their entry into the public schools. It is important that children should be vaccinated early in life in order to protect them during their pre-school period. Parents of children who neglect to have their offspring vaccinated before reaching one year of age would appear to be taking unnecessary chances and to be lacking with respect to their duties to the child.

Vaccination is a safe, sane and virtually certain method of preventing a most serious and often disastrous disease. An ounce of prevention is indeed worth many pounds of cure.

Mr. and Mrs. Roy Kent were here from Oscura Tuesday.

Mr. and Mrs. T. E. Kelley are in receipt of a letter from their daughter and her husband, Mr. and Mrs. Bryson Corbett who moved to Oregon recently to make their home, stating that the country is grand and that the scenic beauty of the mountains reminds them of "our own New Mexico mountains."

Mr. and Mrs. C. Carl and son Alvin left Saturday morning for Sterling, Colorado to visit Mr Carl's brother and to bring Charles home in time to enter school.

Mr. and Mrs. La Vene Snodgrass and baby were in town yesterday. Mr. Snodgrass will drive the Jack's Peak school bus this year.

Carrizozo Public Schools

Plans are made for the opening of school Monday Sept. 6th with the following teachers in charge:

Eastside School, Sister Mary Aurelia

First Grade, Mrs. S. H. Nickels
Second Grade, Nellie Shaver
Third Grade, Dorothy Arnold
Fourth Grade, Evelyn Sprinkle
Fifth Grade, Gerda Smith
Sixth Grade, Virginia Pierce
Seventh Grade, Otis Rogers
Eighth Grade, Phillip Bright

The fifth, sixth, seventh and eighth grades will do departmental work. The specific subjects taught by each teacher will be assigned after their conference with the superintendent. However for this department tentative plans are for Mr. Bright to have charge of athletics, Mr. Rogers have charge of instrumental music Miss Smith have charge of vocal music and Miss Pierce have charge of Dramatics.

High school teachers and their departmental work is tentative planned as follows:

Della M. Ward, Commercial work

Tressie Davis, Economics (Home and General)

Edith Sammons Mathematics and Citizenship

James Pearl Caton, Manual Training, History and Boys Athletics

Clara Snyder, English

Marie Cole, Vocal music and Library

Martiel Chaney, Spanish and Science and Girls Physical Education

James M. Carpenter, Social Science and Superintendent.

In view of the fact that the State Supt. Office and the other accrediting authorities favor supervised study or the sixty minute period for high school classes. Mr. Carpenter has been in conference with the State Supt. office and it is quite probable that the High school will operate on the Supervised study plan. This plan will enable students to study each lesson under the direction of the same teacher who teaches the class. Thus the study hall as a place for preparing lessons would largely give way to student preparation in a class room just before recitation.

Mr and Mrs. Lawrence W. Metzger and daughter of Los Angeles, California spent several days this week with Dr. and Mrs. W. G. Rathmann, Mrs. Metzger and Mrs. Rathmann are sisters.

A baby girl was born to Mr. and Mrs. J. D. Hackett of Carrizozo August 18. The baby was named Iva Dee.

Mrs. R. A. A. Chase is visiting her daughters in Roswell this week.

Carrizozo seems to be pretty much of an industrial center of late. Trucks, oilers, and every kind of road machinery darting in and out. Quite a number of our local young men have secured jobs on the several projects which are going forward.

Mr. M. C. St. John purchased a new V-8 this week.

Mrs. J. B. French has gone to Knoxville, Tennessee to visit relatives for a short time.

Miss Lucille Stewart is here from Dallas spending her vacation with her mother, Mrs. Stewart and her brother Wightman.

YANKS DESERT SHANGHAI

Bombs, Shells Rain Death . . . Sen. Black Nominated For Court Post . . . White House Legislation Snagged

This Shanghai scene of 1932 is being repeated today.

Edward W. Pickard SUMMARIZES THE WORLD'S WEEK

It Still Wasn't War

GEN. SHERMAN was the Yank who is credited with the remarkable observation that "war is hell." Now the 4,000 Yanks in the North China danger zone are agreed that while the current "unpleasantness" may not be official war in the eyes of the Japanese government, it surely is in the other thing.

With airplane raining around their ears, Americans in Shanghai prepared to leave while the leaving was good, and the U. S. S. Augusta, flagship of Uncle Sam's China Squadron, stood by to help them make their getaway.

The gravest situation in the undeclared war to date arose when the Chinese bombing planes attacked the Izumo, Japanese flagship, as it lay in the northern end of the Bund. The bombs missed their mark, but they drew the fire of the Japanese, and it was not long before considerable areas of Shanghai were set afire by the incendiary shells.

Ironically enough, most of the damage and loss of life was caused by the Chinese themselves. Chinese planes zoomed over the city in the direction of the Japanese ships, to the cheers of the populace, still mindful of the fact that the outcome of the 1932 affair might have been different had the Chinese owned military planes at that time.

But the cheers turned suddenly into screams of horror as bombs began dropping not upon the hated enemy, but upon defenseless Chinese civilians who filled the native quarters' streets.

Frightful were the scenes which filled the bombed area, as 1,500 dead and wounded lay about, some of them blown to bits. Explanation for the slaughter, as prepared by Mme. Chiang Kai-shek, wife of the Chinese dictator, was that the men flying the bombers had been wounded by Japanese anti-aircraft and machine guns and their planes had been so crippled that the bombs were released unintentionally before the fliers reached their objective.

Two of the airmen were killed. The planes of destruction had been purchased in the United States. However, the opinion of members of the United States senate committee on foreign affairs was that a statement expected from President Roosevelt would not involve the neutrality act, with its power to outlaw the sale of arms and the extension of credits to belligerent nations.

Japanese authorities continued to insist that they meant no harm to the Chinese people, and that their aim was still for the "co-operation" of China, Manchukuo and Japan. They also revealed that voluntary contributions to the nation's war chest, coming from all over Japan, had reached a total of \$2,500,000.

South Demands Crop Loans CONGRESS regarded adjournment as possibly farther off than ever as the wage-hour bill got all tangled up with surplus agricultural control and cotton loans in what looked like a hopeless mess. With the Department of Agriculture estimating a 15,000,000-bale cotton crop, about 3,000,000 bales more than can be consumed, Southern representatives and senators were demanding surplus crop loans. The Commodity Credit corporation has authority to make such loans.

In a press conference, President Roosevelt indicated that he had no intention of permitting a 10-cent cotton loan until congress passed the agricultural control program and ever-normal granary bill which Secretary of Agriculture Wallace says is necessary before the new season in January. Trouble is the house committee doesn't know how to write such a bill and make it stick, in view of the Supreme court's decision on the AAA.

It clear that it will not push through the President's much-desired wages and hours bill, as dictated by William Green, president of the American Federation of Labor, unless southern farmers get their cotton loans. Furthermore, the Southerners under the capitol dome are now asking for loans as high as 15 cents a pound, and in some cases even 18 cents. The South is not any too well in accord with maximum hours and minimum wages anyway.

The result of the whole affair is a complete stalemate. Somebody will have to give in; somebody probably will, and there will be old-fashioned "hoss-trading" on a wholesale scale. For congress wants to adjourn before the snow flies.

Southerners in the senate were also worried when Senator Robert F. Wagner of New York succeeded in winning recognition to debate an anti-lynching bill, the type of which the South has been successful in blocking since the Civil war. Some were of the opinion that the bill, already passed by the house, might be defeated by filibuster (Senator Bilbo of Mississippi threatened to filibuster until Christmas) but more believed that the Southern members would consent to its passage to put President Roosevelt "on the spot."

They explained that if he did not sign it he would lose the negro vote so essential to the third term that is being whispered about, and that if he did sign it the Democratic South would drop him like a hot potato.

Nominee Draws Robuko

WITH his customary exercise of the dramatic, President Roosevelt nominated Senator Hugo L. Black (Dem., Ala.) to fill the vacancy on the Supreme court bench caused by the retirement of Justice Willis Van Devanter. Senator Black had not even been mentioned for consideration previously, and the appointment was a complete surprise to his colleagues.

For 20 years it has been a custom, when a senator is appointed to high office, for his nomination to be considered in open executive session. But when Senator Ashurst (Dem., Ariz.) proposed this in Senator Black's nomination, objections came forth immediately from Senator Burke (Dem., Neb.) and Senator Johnson (Rep., Calif.). They asked that the nomination be referred to the senate judiciary committee for "careful consideration." This was viewed in the light of a distinct rebuke for the nominee.

Senator Black has been a militant leader in the fight for the President's wages and hours legislation. As a justice he would have the opportunity to pass upon measures regulating public utility holding companies, authorizing federal loans and grants for publicly-owned power plants, and fixing prices in the soft-coal industry. He was, as the chairman of the Black committee to investigate lobbying, the center of a storm of public opinion during the early months of 1936.

Strange Doings at Sea

FOUR insurgent airplanes dropped 25 bombs upon the Danish vessel Edith and sank it in the Mediterranean, came the report from Barcelona. The crew of 20 and a French observer for the non-intervention control were rescued by two fishing boats. The owners of the vessel, in Copenhagen, said it was their twentieth ship to be captured or bombed by the rebels.

The captain of the French freighter Peame reported to authorities that a torpedo had been fired upon his ship by an unidentified submarine which floated beside his ship for several minutes off the Tunisian coast.

When the Spanish tanker Campeador was sunk in the Mediterranean, the rebel command issued a communique taking the full blame. But the captain of the tanker insisted an Italian destroyer sank it.

Rebels Press Santander

REPORTS from the insurgent command said that 35 villages and 1,000 prisoners had been captured by the rebels in their drive on Santander and the tiny remaining slice of the northern Spanish coast held by the government. The government admitted that some advances had been made, but refused to concede that General Franco's forces were threatening the main defenses of the Santander area.

Franco, in his new drive, was using the same tactics which eventually brought about the downfall of Bilbao after a siege of many months. Bombing planes and artillery were pounding the fortifications while other airplanes poured machine gun fire upon trenches and dugouts.

Insurgents planned the Santander advance to require as little manpower as possible, so as to leave enough men at the Madrid front to start a separate offensive there if necessary. They admitted the loyalists had caught them napping with an offensive west of Madrid in July, causing them to abandon the Santander drive temporarily, but declared that "That will not happen this time."

That all might not be going as well as General Franco insisted was indicated when he was forced into the paradoxical act of shelling one of his own cities, Segovia. This was done, it was reported, to quell a rebellion among the insurgent forces. It was also said that the insurrection had been spreading among several provinces.

Rumor Has Farley Quitting

IS "Genial Jim" Farley going to resign as postmaster general to become the executive head of an automobile firm? That's what his friends in Washington say, and Jim has not denied the rumor, as he has promptly denied similar rumors in the past.

Jim Farley

Farley, it is said, seeks to rehabilitate his personal fortunes. As postmaster general he has lost \$10,000 a year over his salary of \$15,000 and is, according to his friends, today in debt. The story went that he would become an executive of the Pierce-Arrow Motor corporation, that 5,000 new shares of stock would be delivered to him, and that he would also be allowed to share in the \$100,000 stock purchase warrants.

Wonder if the Pierce-Arrow sales force is watching the charts for Maine and Vermont?

Shanghai Smells Smoke

FIRST clash of the Chinese central government's army with the Japanese invaders occurred at historic Nankow pass in the Great wall, 30 miles northwest of Peiping, when the Eighty-ninth Division, from the provinces of Suiyuan and Shansi attacked the Japanese garrison.

Through this pass the Japanese have been able to move reinforcements from Manchukuo, its protectorate, and the Chinese wanted to gain control of it. They wiped out a whole battalion of Japanese soldiers in the opening battle.

The Japanese opened up immediately afterward with heavy artillery fire which the Chinese failed to return. Indeed the latter were silently retreating into positions they thought more secure. As shells fell in the city of Nankow, fires were seen to arise from heavily populated areas. The Chinese, however, were said to be well equipped with trench mortars with which to defend the pass once they considered their position satisfactory.

Japanese warned that all of their forces in North China, some 40,000 fighting men, would be loosed upon the Chinese if they made any attempt to return to the old capital in Peiping, now held by the invaders.

Protests Lease of Ships

LA NACION, influential newspaper of Buenos Aires, Argentina, caused some stir by vigorously protesting the proposed leasing of obsolete United States warships to Brazil, declaring that such an act would upset the balance of naval power in South America.

Secretary of State Hull had written a letter to the senate naval committee asking congressional authority for the leasing of over-age war vessels to South American republics. When the Argentinian objections were noted, President Roosevelt pointed out that the vessels in question were obsolete, and were only to be used for training. State department policy, he said, would prohibit their use against any government friendly to the United States.

Purge Toll to Date: 320

SEVENTY-TWO Russians in East Siberia were lined up and shot by the government, bringing the total number of eastern executions in Russia's purge of "Trotskyists" to 320. The 72, described as rightist terrorists, were charged with operating along the Siberian railroad for the Japanese secret service.

It was alleged the accused had wrecked a train, killing 14 persons and injuring 40.

Arrests of officials in charge of various branches of the Soviet economy who had failed to make their production quotas continued.

Smart Coats for Now and Early Fall

By CHERIE NICHOLAS

NOW is the time of year when a midseason coat becomes a wardrobe requisite. Much is demanded of this coat. It not only has to round out the summer season with a perfect touch but it is expected to usher in the new fall season with a proper style flourish. Then, too, it must be not too heavy-weight for immediate wear and not too lightweight for autumn comfort.

It is with cunning awareness of all these "musts" and "must nots" of a midseason coat that versatile designers fell into step, cutting capricious capers with tempting tweeds and featherweight fleeces, also with soft lightweight woolsens.

White and pastel wool coats, always important dots on the summer landscape, are especially good style this year being as popular for wear in town as in the country. The wide variety of weaves and patterns in these lightweight monotone wools has added much to the style interest in these casually correct coats. The white, buttonless, three-quarter length full swinging swagger coat centered in the illustration is the sort you treasure, for, accompanied by a matching skirt, it makes a most practical and stunning costume to wear when weather is fair, be it a midseason or a warmish autumn day. To add to its practicality this coat may be worn over summer dresses and the skirt may double with delightful contrasting lightsome wool sweaters.

A week-end vacation calls for one of the soft, well-tailored wool tweed swaggers coats of three-quarter length. Casual and comfortable it must be. It should be styled with deep, roomy pockets and broad lapels, hang straight in front and have a full swing-into-folds backline. Checks, stripes and monotonies are the gay themes that sing to riotous color tunes. Consciously fashioned for nonchalance, these wool tweeds are indifferent to the hard knocks of traveling and they never know the meaning of wear and tear. The model shown to the left tallies with this description of what a casual, practical travel coat should be. The tweed so expertly tailored with wide rounded lapels, deep patch pockets and wide turnback cuffs in this instance is in brown, rust and white check. It is worn over a beige featherweight knit wool frock with brown hand-knit scarf.

Lustrous fleeces are very good this season, especially in the polo coat style. No camping, jaunt, motor trip or ocean voyage is complete without one of these sturdy old reliables in either white or natural shade. Cut just like those made for the men-folk with deep slash pockets, tab cuffs and vent back, a coat of this type should be included in the wardrobe of every woman who expects to run into damp winds or who will spend any time in a "don't dress for dinner" region. The double-breasted polo coat pictured to the right is a classic. Of lightweight wool fleece, it is styled with raglan shoulders, vent back, tab cuffs, stitched slash pockets, wide notched revers and wide self belt.

GOING HIGH-HAT

By CHERIE NICHOLAS

Watch crowns! The advance fall hat fashions declare that height is the chief aim of designers. The three types that lead the millinery procession for midseason and early fall are berets, toques or turbans and the hat with a brim that takes an abrupt turn up at one side revealing half of the coiffure. There is no doubt that millinery fashions are heading toward the extreme, and they are also very versatile. The three millineries pictured convey an idea as to important millinery gestures. The high draped toque at the top is significant of the future. The beret of velvet is featuring as a smart midseason number, and women who lead in fashion are wearing them with their summer frocks at this time. The dashing high-side-brim hat is something to look forward to since milliners are featuring it in various moods often with rather spectacular feather-trims.

FEATURE VEILS IN MODELS FOR AUTUMN

Veils which not only cover an entire hat but the face and the shoulders are the most striking feature of many advance fall models.

The large mesh veil which is dotted with chenille is the favored type for wear during the daytime, but there are some handsome lace veils to wear for more formal occasions. Most of these veils are circular in shape and are thrown over the high peaked crowns of the new hats so that their draped edges extend well over the shoulders. Sometimes they are placed over the head before the hat is put on so that the part which covers the crown of the head serves as a crown for the hat.

Another type of veil, also circular in shape, has the center cut out so that the veil fits around a crown or edges the brim of a hat. It usually is worn to give a downward sweep at the back, frequently extending halfway to the waistline.

Uneven Skirt Line Latest

Style in Evening Gowns

A Paris fashion house shows a practical evening gown with a short skirt in front and a definite backward dip to a greater length. These full skirts resemble the tarleton skirts worn by ballet dancers. The material is gathered into so many folds that the skirts swing out gracefully in wide sweeps with every movement of the body. These short skirts are far more practical than floor-length ones, which are likely to get trampled underfoot when dancing, and their width and fullness make them graceful as well as practical.

Matching Hats and Heels

Are Popular for Sportswear

Matching neaddresses and heels are providing a gala touch to simple summer outfits worn by attractive young spectators at smart Midwestern country clubs. Dusty pink frocks combined with beige turbans and ostrich skin pumps with beige-colored built-up heels are a popular combination. On many of the smartest white ensembles, effective accents are furnished by paisley print headbands and heels.

What Irvin S. Cobb Thinks about

Japs Killing Chinamen

SANTA-MONICA, CALIF.—The formula still holds good. A Jap kills a Chinaman. That's another dead Chinaman. A Chinaman kills a Jap. That's a war.

But before we get too busy deploping Japan's little way of disregarding pledges so as to gobble more Chinese territory let us look at some records closer home. Since the republic was formed we have deliberately broken 264 separate treaties with the original Red owners of this land. From these violations of our solemn promises border wars frequently ensued.

When the Indians started fighting we called it an uprising. When we sent troops forth to slaughter the Indians it was a punitive expedition to restore law and order. If the white soldiers wiped out the Indians that was a battle. If the Indians wiped out the soldiers that was a massacre.

Those who make history rarely get a square deal from those who write history.

Keeping Undercover.

THIS is the land where, in self-protection, you hide your place of residence and have your telephone privately listed. The result is, if your aged grandmother happens along and doesn't know your address, she can never reach you, but any smart stranger may approach the right party—let us call him a 'phone-legger—and, by payment of a small fee, get the number instantly.

So, in about two calls out of three, you answer the ring to find at the other end of the line somebody with a neat little scheme, because here in movieland neat little schemes grow on every bush and gentlemen promoting them are equally numerous.

Through long suffering, I've become hardened to this, but today over the wire came a winning voice saying the speaker desired to give me, as he put it, "a checking over for white termites."

I admit to a touch of dandruff and there have been times when I suspected fleas—we excel in fleas on this coast—but I resent the idea of also being infested with white termites.

I've about decided that, to modern civilization, telephones are what cooties are to a war—nobody likes 'em, but everybody has 'em.

Camera Sniping.

SNAPSHOTING of famous folks from ambush may be upsetting to the victims of the sniping, but the subscribing public certainly gets an illuminating eye-ful every time one of the photographic magazines appears.

I've just laid aside the current copy of a periodical which could be called either "The Weekly Expose" or "Stop, Look and Laugh." Among other fascinating, not to say illusioning, illustrations, I note the following: A reigning movie queen with her mouth so wide open that her face looked like a "gates ajar" design. If I had tonsils like hers, I'd have 'em right out.

A political idol taken in a brief one-piece bathing suit. Next time they snap him, he would be well advised to wear more than a mere g-string. A Mother Hubbard would be better. Or, anyhow, a toga. A statesman is greatly handicapped when he suggests a barrel of leaf-lard with the staves knocked-out.

A close-up of Mr. John L. Lewis with the lips pouting out and a congested expression. Would not this tend to confirm the impression that lately Mr. Lewis bit off more than he could chew?

This candid camera stuff is translating into the pictorial fact the nightmare all of us have had—that horrid dream of being caught outdoors with practically nothing on.

Field Days for Reds.

UNDER the warming suns of tolerance and indifference and even tacit encouragement in certain quarters, many of our hot-house communists are changing from the pallid, timorous flowerlets of discontent into full-blown advocates of the glad new age when Lenin will take over Lincoln's niche in the gallery of the immortals and government everywhere will be of the Trotskys, but the Trotskys, for the Trotskys!

True; there still remain some wavering souls who are so pink they'd be red if they weren't so yellow!

But these quivering aspens shrink in number as their bolder comrades openly profess the blessed doctrine which is doing so much for the undertaking business in Russia.

BEAUTY'S DAUGHTER

by KATHLEEN NORRIS

CHAPTER IX—Continued

"Why, my God, Vic, he was climbing right to the top in diplomacy when he got hurt! They were to go to Spain; that's one of the fat places! There's lots of money; nothing could have stopped him! She was packing her trunks when he was hurt."

"Well, I don't suppose he especially enjoyed it."

"She told me," Quentin said in a tender undertone, not hearing one word of what Vicky had said—"she told me that just before the smash she had been planning to buy a certain white shawl at the Sea Captain's Shop in Shanghai. She says it was the most gorgeous thing she ever saw and that when their plans all changed, and before she knew whether Morrison's eye was going to be saved or not, she used to go every day and take a look at the shawl. So when it was all over and he'd resigned from the diplomatic staff, she went up there one last time and kissed the white shawl good-bye!"

"Somehow," Quentin said, lost in his own thoughts—"somehow the thought of her going in there and laying her face against that shawl—well, it gets you! I mean she's nothing but a little girl."

"And you're nothing but a little raw blind baby!" Vicky might think hotly. But she never said it aloud. No, he was in the grip of a fever now, and there was no saving him until it went down. He could neither hear nor understand until then.

One day Vic met in the street a woman who stopped her with a smile. A pretty woman, but wearing too much rouge and powder, lipstick and mascara, a woman suggesting a gallant retreat from youth and beauty.

"Marian Pool!" Vicky said. Marian was animated; the beautiful eyes worked with their old fire; she had an "adorable cattle king" in tow. "My dear, he owns half of Brazil!" she said in an aside, introducing a copper-colored stout old person who spoke only a stilted English and used that almost entirely for labored compliments to Marian. Marian was still beautiful, Vicky thought; she was not much more than forty, but ten years ago she would not have wasted any time on Senor de Raas.

Now she was working over him industriously, laughing at his lame jokes, allowing the fat paw to squeeze her own pretty hands.

"Watch me get a present out of him. He shipped his wife and daughters on the last steamer, and he's going wild," said Marian, drawing Vicky with them into Marsh's beautiful shop. She called the attention of the cattle king to the cabinets of jade jewelry. Vicky, who had left Gwen with a dentist for half an hour's straightening of teeth, looked interestedly at one of oriental jewelry and porcelain, the world's finest collections of brocade and teak and ivory, brass and enamel. A middle-aged saleswoman presently drew her aside.

"Excuse me, madam, but did your friend speak of you as 'Mrs. Hardisty'?"

"I'm Mrs. Hardisty," Vic said. "And your husband is Dr. Hardisty? I thought so. There was something I wanted to ask you. This is very unprofessional," the woman broke off in a tone of smiling and eager apology. Vic could only continue to look expectation and surprise. "You see," the saleswoman pursued, "Christmas is very close, and someone was looking at a present for you in here yesterday, and I thought—"

"She had led Victoria into a small adjoining salesroom where there were a teak table and some chairs. "Do sit down," she said, "and I'll explain. Your husband was in here yesterday looking at some of our lovely things, and he picked one out for your Christmas present. Now, often when a gentleman does that," Mrs. Mooreweather went on confidentially, "I like to give the lady just a little hint, when I can, because sometimes, as we all know, tastes do differ, and when a present is very handsome—and this is handsome—it's so easy to give a gentleman just a little hint, and say, 'I think your wife would surely prefer that,' and then she gets what she wants, and we please a customer."

While the amiable endless patter had been streaming on, Victoria had been smiling vaguely, hardly listening. "Now, this must be a secret. Where is that? I thought—oh, yes, I know where it is!" Mrs. Mooreweather was saying, as she drew in and out of their frames great deep black drawers filled with silken beauty. "This must be a little secret between you and me," she ran on.

Victoria did not hear her. Her head was spinning, and her mouth filled with salt water. Her brown hands were lying on the royal folds of a white Chinese shawl.

After a while she was out in the street again, walking in a business-like way toward the White House. The familiar shops and corners went by her; flashing in winter sunlight and cold shadows, moving with forms and sounding with the horns of cars and the chip of feet. Victoria felt dazed and weak; she felt that her knees would give way.

"Oh, my God, my God, my God!" Victoria said, half aloud.

She couldn't stand here like an idiot; passers-by would notice her. She walked irresolutely toward Geary street, turned back. She had had something to do—something to do at three o'clock—oh, yes, Quentin had asked her what she wanted for Christmas, and she had said that he would meet her some afternoon to pick it out, and she had told the children that grown-ups didn't like surprises as much as they liked getting just what they wanted. And then—only yesterday Quentin had suggested that she pick it out herself.

She had said she would go in at three and pick out the electric refrigerator.

Her Christmas gift was to be an electric refrigerator.

Another oriental art shop. Victoria went in.

"You have a beautiful shawl in the window—the red-and-yellow one. What price is a shawl like that?"

"That one, madam? Shall we take it out of the window? That one is \$325."

"It's beautiful. But not today, thank you. It isn't as handsome as the white one," Vicky thought, wandering aimlessly out into the sun-

She Lay Thinking, Her Throat Thick, Her Head Confused.

shine again. "It isn't anything like as handsome. What will he write on the card? But no, I won't bear it. I won't bear it!"

She felt sick, sore, as if every bone of her, mental, moral, and spiritual, had been jarred and hurt. She couldn't even select the refrigerator. Feverishly, in a sudden need to be home and with her children, Victoria picked up Gwen, very chatty and gay, went to the garage, got into her car, and threaded her way through the south-bound traffic toward the Peninsula.

The trees were bare, and the roads looked cold. Smoke went straight up from all the little houses; Christmas wreaths showed in their windows. Victoria shuddered; it would be good to get home.

But when she was in a cotton dress, and fairly smothered by the enthusiastic reception from the nursery, even then the sense of sickness and shock did not heal; even then she sat blankly, Maddy in her lap, the other children circling about her in the glow of the nursery fire, with her eyes staring into space. Quentin loved another woman. Quentin loved another woman. . . . A more beautiful woman than she could ever hope to be. A strange, mysterious, fascinating woman.

"The doctor will not be home for dinner, Mrs. Hardisty. Miss Cone just telephoned. He has an operation at nine."

"Thank you, Anna." And the jealous agony, lulled for a moment, began again, fierce and tearing and irresistible. After a while Victoria was in her own room and idly handling the telephone.

Suddenly, shamed color in her pale face, she called the hospital. Was Dr. Hardisty there? Was he to be there? No operation that evening?

"You can get him at his home. Atherton eight eight eight," a pleasant girl's voice presently said.

Vicky waited awhile, and the cold-bound winter world and the wind whining over the oaks and the blighted gardens seemed to wait, too. Presently she telephoned to Serena.

"What are you two doing to-night?"

"My dear," said Serena, "I've just ordered an early dinner for Spencer—why don't you be a darling and come over and play backgammon with him? I've been called to town. A dear old friend, Mary Catherwood, is at the Fairmont, and she wants me to come in and dine late with her. I'm disgusted—such a frightful night, but what can you do?"

There was more of it. It was very convincing, but not quite con-

vincing enough. When the conversation was ended, there was nothing for Victoria but vigil. Restless, feverish, sleepless, the hours of the night began to go by. It was a still night, the eve of Christmas eve, with the world tightened under a frost, and every outdoor sound echoing like a pistol shot.

Ten. Eleven. Midnight, and no Quentin. At half-past twelve Victoria, drowsing with her reading lamp shining full in her eyes, started up with a frightened sense that everything was all wrong. Fire—accident—calamity. . . .

Then she heard what had waked her; his car on the drive. She knew the sound of the engine and the scrunch of the gravel; her heart, heavy and sad as it was, felt something of reassurance and calm. She snapped off her light, composed herself as if asleep. He mustn't feel himself watched.

She heard him come upstairs; he wasn't going to put his car away? Poor Quentin, perhaps it had really been an operation then, at the City and County hospital, or the emergency; perhaps he was completely blindless, tonight at least. . . .

CHAPTER X

Other sounds, Victoria sat up in bed with her heart pumping. Everything was all wrong, cold, terrifying, shaken again. For Quentin, cautiously coming upstairs, had only put out his porch light, had snapped out the drive light. Now the car lights were up again, and the car itself was slowly wheeling on the drive.

Victoria, not knowing what she did, was on her own upper porch, trembling with cold and fear and despair in her thin wrapper, with her feet bare and her eyes straining after the departing car.

She saw the car turn, saw it leave the gates again, saw it turn toward the Morrisons' house. It stopped at the side door, and presently a house light went up, and then the car lights were put out. Shrubs shut the doorway partially from the window porch where Victoria stood with all her world going to pieces about her, but she could discern two figures silhouetted for an instant against the open door. Then it closed, and presently the downstairs light went out, too, and the cold Christmas countryside and her life and her love and her faith were all plunged into cold darkness.

An iron winter sky was low over the world when morning came without sunrise; Vicky, waking at seven, shivered wearily down again into her warm blankets. It would be good to stay in bed on such a morning, she thought, still caught in dreams—what morning was this, anyway? Good heavens, this was Christmas eve—with everything to do.

Then she remembered, and the gray dark morning seemed darker, and her bones, her head, her whole being seemed to ache with the bitter necessity of coming back to consciousness. Ah, if she could only stay asleep, and go on from sleep to death, beautiful, warm, friendly death.

She lay thinking, her throat thick, her head confused, her heart and mind in confusion. Quentin. Quentin and Serena Morrison.

Victoria suddenly felt that she was suffocating, strangling. She flung off the blankets, reached for her heavy wrapper even while she was groping with her feet for her fur-lined slippers.

"B-r-r-r!" she muttered, going to the opened window, shutting it with one swift gesture. The garden below the window lay bleak and bare under a fine frosting of white; a delicate powdering of frost covered the bricks of the walks and lay like lace on the soaked bronze red of the leaf pile under the oaks.

She splashed her face with cold water, brushed her hair, looked at the ghostly vision in the mirror.

After a while she went downstairs, to sit holding her coffee cup at the level of her mouth, an elbow resting on the table, her eyes far away. She could eat nothing, but she managed a few swallows of coffee; managed a question to the maid:

"Did the doctor have his breakfast, Anna?"

"No, ma'am. He had a cup of coffee standing in the kitchen, he wouldn't sit down. He had an eight o'clock at the Dante."

"Did he say anything about dinner?"

"He said he'd have Miss Cone telephone."

All the Keateses would be coming down tomorrow to have Christmas dinner with all the Hardistys. There would be presents for all the little Keateses upon the little Hardistys' tree. This was Christmas eve. Hateful, unendurable, empty, Christmas eve and Christmas day, Christmashow be endured.

She mounted the two flights of stairs to her mother's room. Magda always stayed in bed in the mornings; this morning she had a fire, and was cozily ensconced in her pillows, with her light burning, and her breakfast tray on her knees. "You look tired," Magda said, with a glance.

'Way Back When

By JEANNE

SCIENTIST WAS BORN IN SLAVERY

HIS master traded a broken-down race horse, worth about \$300, for George Washington Carver when he was a little pickaninny just before the Civil war. Today, he is the pride of the negro race. A worn-out speller was the only education available to him until he was ten years old, when he attended a small school in Neosho, Mo. He slept in a barn there and did odd jobs to earn a living while learning. The young negro boy's thirst for knowledge grew, and he went on to finish his elementary school education in Fort Scott, Kan., where he worked as a hotel cook, a dishwasher, and a housekeeper. Later he bent over wash tubs night after night doing laundry for people, to pay his way through high school. He worked as a hotel clerk for awhile and then entered Simpson college at Indianola, Iowa, where he earned his tuition by doing odd jobs.

Three years later, George Washington Carver went on to Iowa State university, graduating with a degree in agriculture. In two more

years he won his Master of Science degree, and was made a member of the faculty, so impressive were his accomplishments in agricultural chemistry. In 1877, he took charge of the agricultural department at Tuskegee negro university.

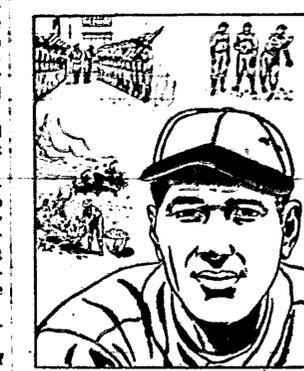

The contributions George Washington Carver has made to agriculture of the South are outstanding. He was among the first to advocate crop rotation for worn-out soil and he has developed hundreds of commercially useful articles from the principal agricultural products of Southern states. From the peanut alone Carver made 225 products and from the sweet potato 110. Thomas A. Edison once invited him to work with him, but he preferred to concentrate on problems of southern agriculture.

In addition to his prominence in science, George Washington Carver is an accomplished musician.

STAR PITCHER WAS A COTTON PICKER

JEROME HERMAN (DIZZY) DEAN was born in Lucas, Ark., in 1911. Son of a poor cotton picker, he was forced to quit school when he reached the fourth grade, because the family was so poor that the 50 cents a day he could earn in the cotton fields was a necessity.

Under-nourished, poorly clothed and uneducated, as he was, Dizzy Dean always had confidence in himself. Perhaps that explains why he was able to develop what small advantages circumstances in life allowed him, and develop them to championship quality. Confidence and a strong right arm hardened in

the cotton fields were Dizzy's equipment for facing life.

He learned to throw a baseball with amazing speed and control. In 1929, he was signed up by Don Curtis, scout for the Cardinals' Texas league. The salary was comparatively small, but it looked like a fortune to the former cotton picker. After training in Houston, he was shipped to St. Joseph, Mo., where his confidence and fast pitching won 17 games. Transferred to Houston, he developed rapidly and soon became star pitcher for the St. Louis Cardinals. Meantime, his brother Paul, or "Daffy," also won a pitching berth on the Cardinals'. Dizzy was always the more spectacular, the higher paid, and the more widely publicized. He has endorsed many advertised products, made a motion picture, appeared in vaudeville, and spoken over the radio. His recent earnings have been \$40,000 of more per year.

Fine Feathers for Three

SEW-YOUR-OWN wouldn't be your weather prophet for the world, but you know, Madam, and so does S-Y-O, that it's always fair weather when good fashions get together. Which brings us to today's three sparkling new frocks—a whole crowd of style for the pretty part of any man's family.

A Fun Frock. Rain, nor gloom, nor a flat tire (either kind), can dampen the spirits of the girl who wears this buoyant, young sports frock (above left) on her daily rounds—be they on the fairway, the campus, behind the counter, or merely from pillar to post. You can easily see why it's a winner: a button-all-the-way front, the matched collar and general shipshape styling make it just that. It's surefire in acetate, or silk crepe.

Here's to Mothers. Sew-Your-Own loves nothing more than catering to mother's wardrobe needs. The frock above (center) is for all mothers old sweet ones, young darling ones, yes, even for mothers-to-be. It is

Household Questions

Improving Canned Grapefruit.—The flavor of canned grapefruit can be improved by aerating it, that is, pouring it from one container into another several times.

For Bathroom Curtains.—Terry cloth or toweling makes excellent bathroom curtains, easy to wash, requiring no ironing.

Removing Hair From Upholstery.—Dog hair is rather difficult to brush off car seats, upholstered furniture, etc., but it can be readily removed by rubbing the surface of the cloth with coarse sandpaper.

For Roly-Poly or Suet Pudding.—When making a roly-poly or suet pudding, instead of using a cloth wrap the pudding in double greaseproof paper and tie with string in the usual way. The pudding will be much lighter and there will be no greasy cloth to wash afterwards.

Hanging Mirrors.—Hang the mirror where it adds to the size as well as attractiveness of the room. A couple of well-hung mirrors can do wonders to the small living room.

WNU Service.

easy to run up, easy to do up, and best of all, easy to look at.

Little Brown Girl. An all-over sultan is her forte, and many sunny days are ahead for young Miss Fortunate whose mommy chooses to interpret the fetching model at the right. A scallop-edged waist front accentuated by frou-frou trim is right down her avenue, and a gored skirt, that's second to none for class, fits into her scheme of things to a T. Mother, why not make one dressy version, as pictured, another finished differently for school? (Perhaps with a simple braid trim) Rayon prints, gingham, or sheer wool, will do nicely as the material.

The Patterns. Pattern 1249 is designed for sizes 14 to 20 (32 to 42 bust). Size 10 requires 4 1/2 yards of 39 inch material.

Pattern 1207 is designed for sizes 34 to 50. Size 38 requires 4 1/2 yards of 35 inch material. With long sleeves 4 1/2 yards of 39 inch material.

Pattern 1366 is designed for sizes 6 to 14 years. Size 8 requires 2 1/2 yards of 39-inch material plus 1 1/2 yards of machine pleating.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coin) each.

CONSTIPATION

Unrelenting Enemy of Health "HOW are your bowels?" The doctor asks this important question because a primary need of good health is for the bowels to regularly pass off the waste of metabolism. Every doctor knows you cannot be well, feel well or look well if you allow constipation to hinder daily evacuation and thus prevent body cleanliness. You should know it! Then why let a bad condition continue? Try Doan's Regulets. They are mild and effective, act as a digestive and hepatic stimulant, increase the flow of bile and relieve temporary congestion of the intestines. Be regular with Regulets. For sale at all drug stores.

FRIDAY, AUG. 27, 1937

Mrs. Eva S. Smith, Editor and Publisher

National Re-employment Service

Las Cruces, New Mexico August 21, 1937

Dear Sir:

We are writing this letter to notify you of the opportunities for working in the Mealla Valley during the fall farming season. There is approximately 46,000 acres planted to cotton in the Mealla Valley. The average yield is about one and one-half bales to the acre - this acreage extends from Anthony, at the southern end of Dona Ana County to Arrey, in the southern end of Sierra County.

During the cotton picking season in 1936, the average person made from \$1.50 to \$2.25 per day.

The fall weather is mild and usually free of rain and snow. The price of groceries is quite reasonable. In some cases, there are farmers in the valley who will furnish houses, wood and water free to large families.

The staff of the National Re-employment service at Las Cruces is very familiar with the opportunities for farm work, since we keep in close touch with the farmers by means of letters and personal visits.

If you are interested in coming to the Mealla Valley for work it would be well to call at the Re-employment Office in Las Cruces as soon as you reach here - we will be very glad to direct you to the farmers requiring labor without any unnecessary driving around.

We expect to receive very heavy demands for cotton pickers about the 15th of September, although some picking will begin as early as the 1st of September. There will be a demand for labor until after the 15th of December.

The Reemployment Office will be open at 5:30 A.M. and will remain open until 4:30 P.M. for the convenience of the worker as well as the farmer.

Very truly yours Jack L. Harper

PROPOSED CONSTITUTIONAL AMENDMENTS TO BE SUBMITTED AT THE SPECIAL ELECTION TO BE HELD SEPTEMBER 21, 1937.

Pursuant to the provisions of a Joint Resolution, Section 1, of Article VII; a Joint Resolution, Article IX, Number 17; Article 2, of Article X; Number 17; Article 2; Section 30 of Article IV; at pages 691 to 695 of the Session Laws of 1937, the following Constitutional Amendments are submitted to the qualified voters at the Special Election to be held September 21, 1937.

MRS. E. F. GONZALES, Secretary of State.

Constitutional Amendment No. 1

A Joint Resolution Proposing to Amend Section 1 of Article VII of the Constitution of the State of New Mexico Relating to the Qualification of Voters, School Elections, Absentee Voting and Registration. Senate Joint Resolution No. 3; Approved March 6, 1937.

Be It Resolved by the Legislature of the State of New Mexico:

Section 1. It is hereby proposed to amend Section 1 of Article VII of the Constitution of the State of New Mexico so as to read as follows: "Section 1. Every citizen of the United States, who is over the age of twenty-one years, and has resided in New Mexico twelve months, in the County ninety days, and in the precinct in which he offers to vote thirty days, next preceding election, except idiots, insane persons, persons convicted of a felonious or infamous crime unless restored to political rights, and Indians not taxed, shall be qualified to vote at all elections for public officers. The Legislature may enact laws providing for the voting of qualified electors absent from their places of residence on the day of any general election. All school elections shall be held at different times from other elections.

The legislature shall have the power to require the registration of the qualified electors as a requisite for voting, and shall regulate the manner, time and place of voting. The legislature shall enact such laws as will secure the secrecy of the ballot, the purity of elections and guard against the abuse of elective franchise. Not more than two members of the board of registration and not more than two judges of election shall belong to the same political party at the time of their appointment."

Section 2. This amendment shall be submitted to the electorate for approval or rejection at any special election held before the next general election. If no such special election is held before the next general election then this amendment shall be submitted at the said next general election.

Constitutional Amendment No. 2

A Joint Resolution Providing for an Amendment to the Constitution of the State of New Mexico by Adding Thereto Another Section to Article IX, the Same to Be Numbered 17, Which New Section Authorizes Incurring "State Institution Building Bonds" Indebtedness of the State of New Mexico Without Submitting the Same to the Electors of the State. Senate Joint Resolution No. 14; Approved March 10, 1937.

Be It Resolved by the Legislature of the State of New Mexico:

Section 1. That the following amendment to Article IX of the Constitution of the State of New Mexico as an additional section to Article IX, to be numbered Section 17, is proposed to be submitted to the electors of the State.

"Section 17. Laws enacted by the Thirtieth Legislature authorizing the issue and sale of "State Institution Building Bonds" for the purpose of providing funds for acquiring, improving, constructing and equipping state-owned and institutional buildings and levying an ad valorem tax to pay said bonds and interest thereon shall take effect without submitting them to the electors of the state, and notwithstanding that the total indebtedness of the State may thereby temporarily exceed one percentum of the assessed valuation of all property subject to taxation in the State. Provided, that the total amount of such state institution building bonds shall not exceed \$1,250,000. The said bonds shall pledge the full faith and credit of the State of New Mexico for the payment thereof and the Legislature shall levy and impose an ad valorem tax each year in an amount sufficient to pay the principal and interest on said bonds as the same become due, which levy shall be obligatory until the entire principal and interest of said bonds shall be paid.

Section 2. This amendment shall be submitted to the electorate for approval or rejection at any special election held before the next general election. If no such special election is held before the next general election, then this amendment shall be submitted at said next general election.

Constitutional Amendment No. 3

A Joint Resolution Proposing to Amend Section Two of Article Ten of the Constitution of the State of New Mexico, Relating to County Officers, Term of Office, Ineligibility. House Joint Resolution No. 24; Approved March 5, 1937.

Be It Resolved by the Legislature of the State of New Mexico:

Section 1. It is hereby proposed to amend Section 2 of Article X of the Constitution of the State of New Mexico so as to read as follows:

"Section 2. All county officers shall be elected for a term of two years." Section 2. This amendment shall be submitted to the electorate for approval or rejection at any special election held before the next general election. If no such special election is held before the next general election then this amendment shall be submitted at said next general election.

Constitutional Amendment No. 4

A Joint Resolution Proposing to Amend Section One of Article Five of the Constitution of the State of New Mexico, Relating to State Officers, Term, Ineligibility, Residence. House Joint Resolution No. 25; Approved March 5, 1937.

Be It Resolved by the Legislature of the State of New Mexico:

Section 1. It is hereby proposed to amend Section 1 of Article V of the Constitution of the State of New Mexico so as to read as follows:

"Section 1. The executive department shall consist of a governor, lieutenant-governor, secretary of state, state auditor, state treasurer, attorney-general, superintendent of public instruction and commissioner of public lands, who shall be elected for a term of two years beginning on the first day of January next after their election.

"The officers of the executive department except the lieutenant-governor, shall during their terms of office, reside and keep the public records, books, papers and seals of office at the seat of government."

Section 2. This amendment shall be submitted to the electorate for approval or rejection at any special election held before the next general election. If no such special election is held before the next general election, then this amendment shall be submitted at said next general election.

Constitutional Amendment No. 6

A Joint Resolution Proposing to Amend Section 10 of Article 4 of the Constitution of the State of New Mexico. House Joint Resolution No. 20; Approved March 15, 1937.

Be It Resolved by the Legislature of the State of New Mexico:

That it is hereby proposed to amend Section 10 of Article IV of the Constitution of the State of New Mexico, said Article being entitled "Compensation of Members of the Legislature" so as to read as follows:

"Section 10. Each member of the Legislature shall receive as compensation for his services the sum of seven dollars for each day's attendance during each session and ten cents for each mile traveled in going to and returning from the seat of government by the usual traveled route, once each session, together with three dollars for each day's attendance during each session for expenses, and he shall receive no other compensation, perquisites or allowance."

This amendment shall be submitted to the electorate for approval or rejection at any special election held before the next general election. If no such special election is held before the next general election, then this amendment shall be submitted at the next general election. Publish Aug. 12, 26, 27, Sept. 3.

Notice of Hearing of Final Report and Account

In the Probate Court of Lincoln County
State of New Mexico
In the Matter of the Estate of Emma J. Angel, Deceased: No. 422

To Callie C. Franks and Jasper J. Thompson and to all unknown heirs of the said decedent, and all unknown persons claiming any lien upon, or right, title, or interest, in or to, the estate of the said decedent, and to whom it may concern: You, and each of you are hereby notified, and notice is hereby given, that Callie C. Franks, administratrix of the Estate of Emma J. Angel, deceased, has filed in the above entitled Court her final report and account as such administratrix, and the Court has appointed Monday, the 21st day of September, 1937, at the hour of 2 o'clock P. M., as the hour and day for hearing of objections, if any there be, to the approval and settlement of said final report and account, and the discharge of the said Callie C. Franks as such administratrix, and at the hour on the day named, the Probate Court will proceed to determine the heirship of said decedent, the ownership of her said estate and the interest of each respective claimant thereto and therein and the persons entitled to the distribution thereof.

The name and post office address of the attorney for the Administratrix is John E. Hall, Carrizozo, New Mexico.

Witness the honorable Marcial C. St. John, Judge of the said Court, and the seal thereof, this 2nd day of August, 1937.

Mr. and Mrs. Harry Norman and two children were in town Sunday from Bisbee, Arizona visiting Mr. and Mrs. Wm. Norman and daughters.

Miss Gertrude Thomas, Professor of Dietetics at the University of Minnesota, who has been visiting her cousin Mrs. Leroy Merchant, has gone to El Paso and Ft. Worth, accompanying Miss Thomas are her mother Mrs. J. B. Thomas of Detroit, and Mrs. Martha M. Anderson of Los Angeles. Mrs. A. E. Smith, mother of Mrs. Merchant will remain at the Merchant Ranch for an extended visit.

Mexico Map Tour

Mexico as a land of mystery--at least where the motorist is concerned--will soon be no more. As a country of glamour and romance, of unsurpassed natural beauty, of inspiring contrast between civilization that was and one that is to be, and of new challenge to the exploring traveler, Mexico as a tourist mecca soon will have new appeal as a result of the mapping of the country's roadways by James D. McClure, American map-maker.

Commissioned by the Mexican government and working in close cooperation with its departments of education, interior, forestry, fish and game, communications and highways, McClure and his bride recently completed a 14-months' tour of the country, an extension of what was to have been a 6-months' honeymoon jaunt.

After covering more than 22,500 miles in their survey of Mexican highway facilities, the McClures returned recently to this country with this report:

"It is absolutely safe to motor in Mexico."

For the first time an American motorist may drive his own car from any part of temperate America directly into the tropics, if he continues south from Mexico

City 300 miles, over good, safe roads, to Acapulco, a city set in tropic surroundings which might have been lifted bodily from some South Seas paradise.

"Picking orchids in the morning and having snowball battles in the afternoon," stated McClure, "are comparisons which show the nature of the country through which we traveled, but they also testify to the diversified conditions under which our Chevrolet was operated."

"From sea level to volcano summit; from the extreme heat and humidity of the lowlands to cold rarefied atmosphere of mountain tops, without carburetor adjustment, our car made an excellent showing, without noticeable depreciation in power or performance."

"One five-week trip of ours can best be visualized by thinking of a continuous--and mighty bad--detour from Seattle to San Diego," said McClure, "and I mean a detour that would have been called bad 50 years ago!"

"It is safe to say," McClure asserted, "that in our travels from sea level in the tropics to an elevation of 15,000 feet, we encountered every conceivable type of road operating condition under which a car could perform. We have nothing but praise for the performance of our Chevrolet. Rugged and dependable, combining thrift and power, that car took the worst Mexico had to offer--and came through with flying colors every mile of the way."

The National Forests of New Mexico

Capitan, N. M., August 26.—The location of the New Mexico National Forests on the watersheds of the most important streams of the State has a marked effect upon the prosperity of its irrigated valleys. Much of the water for the important Elephant Butte, Carlsbad, Rio Hondo, and Eagle Nest projects comes from the National Forests and most irrigated farms on smaller streams are entirely dependent upon waters from these watersheds. Denuding these Forests of their timber and grass would be followed by a rapid run-off of fallen water, and this would result in floods and the silting of the reservoirs used for irrigation. It is the plan of the Government, therefore not only to keep the Forests continually productive and to handle their timber and other resources for the benefit of the people, but also to care for the irrigation interests of the State.

Flu May Follow Common Cold

By DR. JAMES W. BARTON
© Bell Syndicate.—WNU Service.

AS MEDICAL students were were taught that influenza or flu was due to a certain little organism or bacillus called the bacillus of Pfeiffer, after its discoverer.

During the flu epidemic of 1918, it was found that a number of individuals who did not suffer with flu had this bacillus or organism in their throats. Today many physicians believe that more than one organism may cause the common cold and give rise to the usual symptoms of sneezing, running nose, increased pulse and temperature and a feeling of tiredness.

However, when a case goes on to extreme prostration and greatly increased temperature, it is believed due to the organisms of another ailment entering in, such as that of flu, pneumonia, bronchopneumonia or others.

Cold Leaves the Door Open.
Thus someone has said that the common cold when it enters the system leaves the door open which so interferes with the defenses of the nose and throat that they can't stop these other organisms from entering. It would seem that very often the first ailment to follow a simple or common cold is the flu, and the flu so prostrates the individual during the first few days that these other organisms, often already present in the body, are able to fight off the natural defenses and manufacture the poisons which cause the serious symptoms that follow.

During the 1918 epidemic it was my privilege to be senior medical officer of a military base hospital of 200 beds. At the end of the first week of the epidemic we had to install extra beds in wards and in the corridors to accommodate the large number of flu patients.

Fortunately most of the patients came to us directly from their units, remained a few days, and made a good recovery. But many patients who remained on their feet for the first two or three days of the flu, then reported sick to their own medical officer and were then sent on to us, had or developed serious complications during their stay with pneumonia and bronchopneumonia.

One must get off his feet and to bed immediately when attacked by a severe cold or the flu.

Safe Method of Reducing.
There are a great many individuals who, while not really fat, know that they are carrying ten to fifteen more pounds than they should to have comfort and proper working ability. They naturally dislike the idea of going on any one of the special diets, but would be willing to follow in a general way a system that would take off the surplus weight over a period of six months to a year.

Sometimes it is enough for them to know what classes of foods to avoid and what classes to eat. Thus cutting down on highly nutritious or high calorie foods—sugar, potatoes, bread, butter, cream, egg yolks—and increasing the less nutritious or low calorie foods—cabbage, cauliflower, skimmed milk, fresh fruits, and green vegetables is all that is needed to bring about the required reduction in weight.

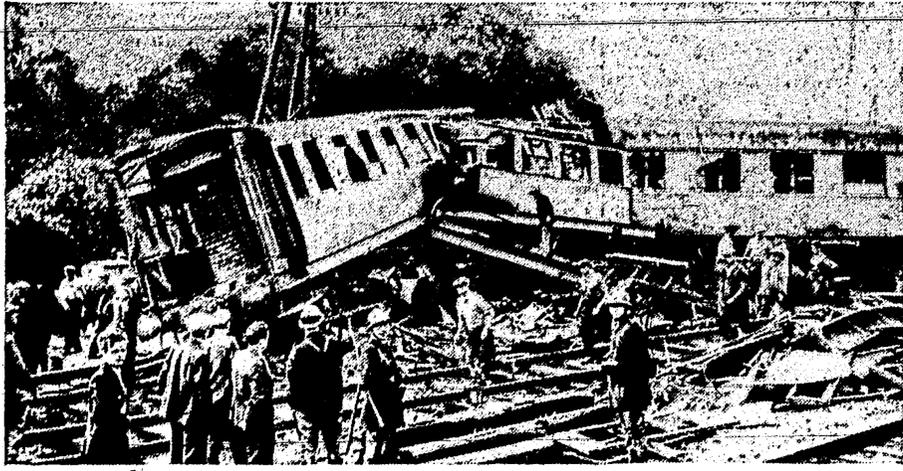

As far as meat, fish, eggs (protein) are concerned at least one helping of meat or fish should be eaten daily to maintain the "structure" of the body. Thus the reducing diet should include lean meat, eggs and soft cheeses (which supply protein and are at the same time not too high in fuel value) and small amounts of a few carbohydrate or starch foods such as bread, potatoes and very simple desserts.

Fats should be almost entirely avoided because their fuel or food value is more than twice that of protein or starch foods. However, even if fats and starches are cut down and fruits and leafy vegetables increased, the proteins (meat, eggs, fish) must be increased not only for their "staying" power, and for maintaining body structure but also because protein foods make a "fast burning" fire in the system, greatly increasing the heat, and burning up surplus tissue such as fat. Hence a person would lose weight faster on a diet containing an insufficient amount of food but with a greater amount of proteins in proportion to fats and starches because the meat and eggs "burn" more fiercely.

This doesn't mean that a "great" amount of extra meat or eggs should be eaten because many overweight persons may have the early symptoms of high blood pressure or kidney conditions.

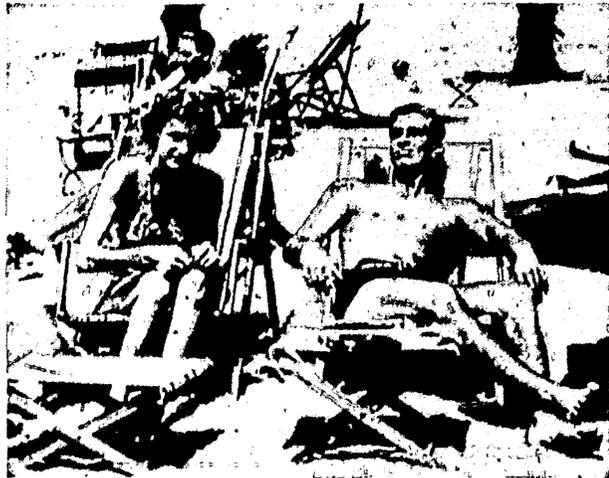

Research physicians doing special work on obesity or overweight, while advising almost a complete avoidance of fat foods, advise that "some" starch foods be eaten every day.

French Express Train Wreck Costs 27 Lives

Made shortly after the tragic accident, this photo shows the telescoped carriages of the French passenger express in which 27 persons were killed when the train jumped the rails near Villeneuve St. Georges. Railroad officials attributed the accident to faulty setting of a switch.

Roosevelt Newlyweds Like the Sun

Franklin D. Roosevelt, Jr., and his bride, the former Ethel Du Pont, pictured as they enjoyed the sun on the Italian Riviera as they honeymooned in Europe. The young couple expect to return to the United States in the fall. When the newlyweds take up housekeeping, young Roosevelt is expected to complete a law course that will fit him for his business career later on. The honeymooners have traveled extensively in Europe since they sailed from America some weeks ago following their wedding at Ows Nest, the DuPont estate in Delaware. The wedding was attended by President and Mrs. Roosevelt.

Zionist Opposes Palestine Split-Up

An outstanding opponent of the British plan to partition Palestine, Menachem M. Ussishkin (above), world president of the Jewish National fund, was elected chairman of

the World Zionist congress at Geneva, Switzerland recently. Election of Ussishkin foreshadows an adverse vote on the partition plan, observers believe.

50,000 HOURS ALOFT

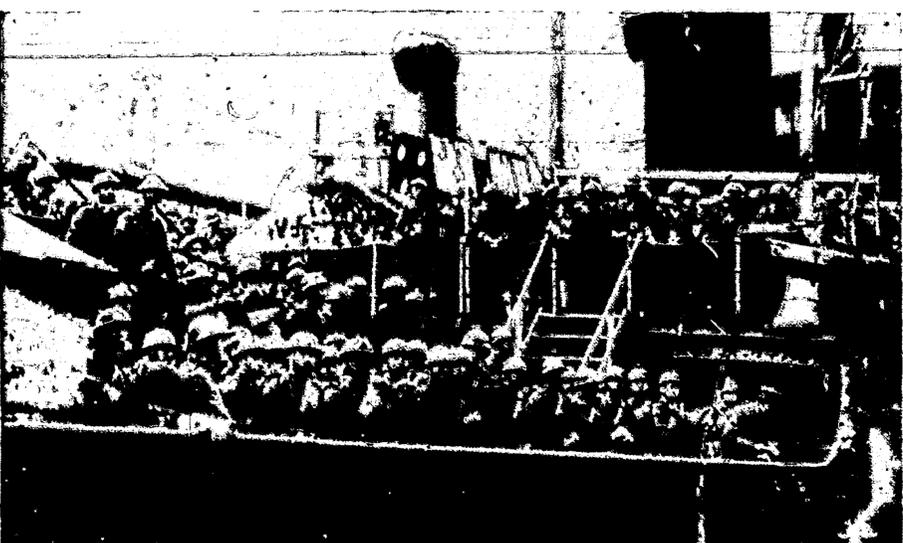

Captain Robert H. Fatt, the new chief pilot of Pan American Airways' eastern division of Miami, Fla. Captain Fatt has spent more than five years of working days at the controls of a clipper ship, or 50,000 hours in the air. He has flown more than a million and a half miles since he started, in 1916. Captain Fatt who learned aviation in the world war has a flying record unusually free of accidents.

Seeks Bride on 121st Birthday

Cutting a birthday cake decorated with 121 candles, Abraham Wishkovsky is pictured, as he began his one hundred twenty-second year of life, at the home of the Daughters of Jacob in the Bronx, New York. In a birthday interview, Patriarch Wishkovsky, who is Polish by birth, announced that he is ready to marry again—for the sixth time—stipulating, however, that his bride must be "young and pretty."

Even This Didn't Make the Chinese War Official

When this photograph, showing a transport loaded with steel-helmeted Japanese soldiers arriving at Tsingtau was made, Japan and China were technically at peace. Many of these men and many Chinese soldiers died, slain by each other, but still there was no "war." The undeclared war endangered the safety of Americans in Shanghai and other leading cities in the war-ridden area and caused the creation of an American emergency committee on evacuation.

FARM TOPICS

BOARDER HEN NOT WORTH FEED; CULL

Non-Producers Will Bring No Profit From Eggs

By Dr. W. C. Thompson, Poultry Husbandman, Rutgers University.—WNU Service.

Don't feed boarders if it is the aim to maintain high egg production during the summer months. Egg prices will probably begin to advance soon, but in view of present grain prices, the hope of profit in egg farming lies chiefly in keeping egg production at relatively high levels.

Cull the laying flocks carefully, removing birds which have stopped production. Such birds are early moulters with yellow pigmentation on shanks and beaks and with withered, dry combs.

Carry on the same feeding program as in winter and provide an ample water supply. There should be no let-down in feeding, for it requires lots of good food to produce eggs no matter what the season. Do not change rations in summer.

Keep the nests clean, sparsely littered, well ventilated and sufficient in number to furnish one nest for every five hens.

Gather eggs at noon and in late afternoon, preferably using wire baskets which permit a circulation of air and rapid cooling. Store eggs in a cool, somewhat moist room and market them frequently during hot weather.

Remove any male birds—except when eggs for hatching may be still desired—and produce only infertile eggs for table use.

Good quality stock is necessary to get the best results in summer egg production regardless of fine management. If present stock is questionable as to breeding, perhaps the coming fall will offer a good opportunity to change.

Shipping Inspection for Fruit and Vegetables

This is the fifteenth year of the federal shipping point inspection service on fresh fruits and vegetables, administered by the bureau of agricultural economics. Nearly five times as many carloads of these commodities were inspected at shipping points in 1930 as during 1923, the first full year this service was available.

During the first years the service was available in only a few states and only during the harvesting season of certain products. Today it is available during the entire year, under co-operative agreements with the state, in California, Colorado, Florida, Idaho, Louisiana, Oregon, Texas, Utah, and Washington.

In other states, with the exception of New Mexico, Kentucky, and Vermont, where no co-operative agreements are in effect, the service is offered during the movement of the major fruits and vegetables if the volume for inspection is sufficient to prevent prohibitive costs to users.

In nearly all parts of the country the service is self-sustaining. A few states have small appropriations which are used to supplement the fees collected.

The United States Department of Agriculture receives from the inspection fees only enough to cover the cost of supervision and general overhead expenses.

Don't Wash Eggs

Eggs have a natural bloom to them when fresh. When stale they become slick, or shiny. This bloom seems to be made up of tiny pores in the shell, which may be seen upon close examination. When a hen sets on the egg a few days, when the egg becomes old, or when it is washed, these tiny pores become stopped up and the egg cannot "breathe" with a consequent deterioration in quality. For that reason, says the Missouri Farmer, eggs should never be washed if they are to be sold on the market. A better way is to wipe them off with a dry cloth, or sandpaper the spot of dirt off with a piece of sandpaper on emery cloth.

Farm Notes

Apples, pears, and peaches are produced in three-fourths of the states.

A daily loss of nine ounces per 100 eggs during the incubator period indicates that the proper humidity is being maintained.

Milk or cream cooled quickly after milking time keeps much better in hot weather than that which is allowed to cool slowly.

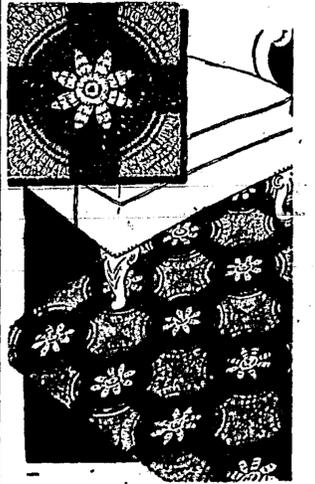

Agricultural authorities say a single barberry bush can harbor 64,000,000,000 spores of grain-destroying, black-stem rust.

It is estimated that in the United States 12,000 dozens of eggs are laid every three minutes, day and night, throughout the year.

South Dakota's duck crop for 1937, in 58 of 69 counties, not including four United States refuges, is estimated at more than 725,000 birds.

A Crocheted Rug Is a Lifetime Joy

This rug that you can so easily crochet yourself will be a lifetime joy. See if it isn't! Do the stunning medallions separately—they're just 8 1/4 inch squares—and keep joining them till you've a rug the desired size. If you like, make

Pattern 5855

each flower center a different color, keeping the background uniform. Rug wool or candlewicking make for a sturdy durable rug, or otherwise useless rags will also serve the purpose. In pattern 5855 you will find instructions for making the rug shown; an illustration of it and of all stitches used; material requirements; color suggestions, a photograph of the actual square.

Send 15 cents in stamps or coins (coins preferred) for this pattern to The Sewing Circle Household Arts Dept., 259 W. Fourteenth St., New York, N. Y.

Please write your name, address and pattern number plainly.

Without the Power

He was one of those men, moreover, who possess almost every gift except the gift of the power to use them.—Kingoloy.

HELP KIDNEYS

To Get Rid of Acid and Poisonous Waste
Your kidneys help to keep you well by constantly filtering waste matter from the blood. If your kidneys get functionally disordered and fail to remove excess impurities, there may be poisoning of the whole system and body-wide distress. Burning, stony or too frequent urination may be a warning of some kidney or bladder disturbance. You may suffer nagging backache, persistent headaches, attacks of dizziness, getting up eight, swelling, puffiness under the eyes—feet weak, nervous, all played out. In such cases it is better to rely on a medicine that has won country-wide acclaim than on something less favorably known. **Doan's Pills**. A multitude of grateful people recommend Doan's. All your ailments!

Maybe Mediums Do Hear 'Voices,' After All, Says Science

Delusions Are Hangovers From Childhood Phantasies

Lewisburg, Pa.—Those mediums who are not frauds, but genuinely believe that they hear the voices of spirits, may be the victims of the common childish phantasy of an imaginary companion, Dr. Philip L. Harriman, of Bucknell university, here, suggests in a report to the American Journal of Orthopsychiatry.

About a third of the children between three and eight or nine years of age enjoy the company of such imaginary companions, excellent descriptions of which appear in the novel "Anthony Adverse" and Milne's "Blinker," Dr. Harriman says. More older persons indulge in this phantasy than has hitherto been suspected.

Real playmates usually cause the gradual disappearance of these phantoms, but occasionally they go with the child through high school and even into adult life.

Student's Romantic "Companion."
Among college students who reported long continuation of the phantomy companion, some had created an individual of the hero type with whom they competed in athletic sports or in class or extra-curricular activity.

"Another man student reports that his imaginary companion came into existence when he was twelve or thirteen," said Dr. Harriman. "The companion was a beautiful girl with a romantic name of Marie Van Arsdale. At fourteen years of age he saw Sari Maritza in the motion pictures and then forsook Marie for her. He made believe that he rescued Sari from savages, and then he built a stone fortress for her. This edifice still stands on a wooded knoll behind his home, a monument to an adolescent phantasy."

May Indicate Creative Ability.
"Somewhat concerned by teachers' reports of inattention in high school, his parents presented him with an automobile. This new possession opened up interests in the world of reality, and he ceased to divert himself with an imaginary loved one."

Since the students who reported clinging to such imaginary companions were all superior in college English, it is tempting to conjecture a relationship between such imaginative play and creative ability in writing, Dr. Harriman suggests.

Smoke Two at Once If You Would Cut Cigarette Nicotine!

Washington.—For people who still worry about the amount of nicotine present in the smoke of the cigarettes they use, science suggests that they use two at once. One to smoke and the other to filter the smoke from the first.

Smoking cigarettes in tandem with special holders removes 54 per cent of the nicotine when a small puff is drawn, states a report to the American Chemical society here.

The report does not come from cigarette companies, as one might suspect at first, but from Scientists K. B. Derr, A. H. Reismeyer and R. E. Unangst of the research laboratory of an aluminum company.

The cigarette holders used in the study need not be excessively long, state the scientists.

Extra mildness is imparted to the smoke by the cigarette filter, it was found. Yet the characteristic taste blends of the tobacco remain distinguishable. The test was also made with pipe where the cigarette filtering system worked even better.

Meteorite on Ice Served to Smithsonian Institution

Washington.—A stone from the sky, found on the ice near Great Bear lake in northern Canada, has been added to the Smithsonian institution collection of meteorites. An Indian picked it up, wondering at its peculiar form and the fact that it was lying there on top of the ice, and brought it to the nearest mission.

The meteorite is about the size of a walnut, and aside from the peculiar circumstances of its discovery is not remarkable. It is thought to be a fragment of a much larger celestial projectile now probably at the bottom of the water. Search for the parent body will be made next summer.

Men! Doctors Give Rules for Smooth, Scientific Shave

Use Sharp Blades, Reduce Angle, Lather Twice

Chicago.—Does shaving make your face sore, sir?

Here are some tips for men with sensitive skins, as enumerated in the Journal of the American Medical Association:

1. Use sharper razor blades.
2. Reduce the shaving angle, that is, the angle formed between the central plane of the blade near its edge and a plane that passes through the edge and is tangent to the guard bar on the safety razor.
3. After washing and lathering the face with soap and hot water—operations that should consume from two and one-half to three minutes to be effective—use cold water for the final lathering procedure.
4. Employ a shaving soap or cream in which menthol is incorporated.

Operate Shaving Clinic.
The doctors of the land are being given a lesson in shaving in the leading article of their official journal.

At a shaving clinic that has been in operation at Mellon institute since 1931, 31 men—20 of them blonds and 11 brunettes—are being studied before, during and after their daily shave.

Preparation, it seems, is more than half the secret of a successful shave. The procedure for the average male, as outlined in the medical journal, is as follows:

Wash the face first with soap and water, using hot water and some toilet soap that has been found not to irritate the skin.

Three Minutes of Scrubbing.
Carry on this operation for about one-half minute and then rinse the face thoroughly. This removes the grit from the face, which might damage the blade, and also removes the external layer of sweat and sebum from the skin and hair, as well as other extraneous material.

After the soap has been thoroughly rinsed off with hot water, a second layer of soap should be applied. This may be one's favorite shaving soap. It is to be thoroughly rubbed into the surface of the skin with the hand, copious amounts of water being used. These two operations should be made to consume from two and one-half to three minutes.

Shaving should be begun by wetting the razor with hot water and keeping the face well lathered; both the razor and the face should be kept wet during the entire operation. It is good practice to shave the less difficult portions of the face first, in order that the more difficult portions shall have the benefit of a still longer contact with water.

Now Doctors Can Measure the Scope of Your 'Jitters'

Denver.—The nervous patient, unduly tense and excited when his physician begins an examination, can now have the exact state of his nervousness measured by a new instrument, the neurovoltmeter, described by Dr. Edmund Jacobson of the Chicago Laboratory for Clinical Physiology, before the meeting here of the American Association for the Advancement of Science.

The neurovoltmeter is a simple instrument using a string galvanometer and fine, sharpened wire electrodes that are inserted into nerve or muscle tissue without undue discomfort. It will measure variations in electrical nervousness amounting to fractions of millivolts of a volt.

The new instrument will permit the physician to keep track of effects of even the most delicate treatment upon the nervous and muscular system, Dr. Jacobson predicted.

Evolution in man, other animals, and plants was laid to changes in the chromosomes, the larger units of heredity within the cell nuclei, instead of mutations or changes in the smaller genes usually credited with the major role in passing on the characteristics of life from one generation to another. This new idea in evolution was presented by Prof. E. B. Babcock of the University of California.

"Schmidt, North Pole" Is Address for Scientist

Washington.—"Schmidt, North Pole."

That was all the address there was, on one letter in the small mountain of fan mail addressed to Academician O. J. Schmidt, leader of the Soviet Polar expedition, Tass has informed Science Service.

Uncountable letters have been mailed by American children to Santa Claus at the same address, but this is the first time one has been mailed to the North Pole for a mortal man.
Doctor Schmidt's mail is being held in Moscow, pending his return.

LOVE APPLE NOW DESIRABLE FOOD

Once the Tomato Was Put Aside as Dangerous.

By EDITH M. BARBER
IT WAS an old-fashioned custom to cultivate the tomato plant merely for the color which it gave to the garden. The "love apples" were valued for their decorative qualities rather than for their contribution to the table. It was only the brave who dared eat the fruit which for some unknown reason was considered not only indigestible, but actually dangerous. It was blamed for causing rheumatism, cancer and all sorts of ills.

Today the cycle has turned. Not only is the tomato esteemed highly as a staple food, but it might almost be called a remedy in certain cases where an extra vitamin supply is desired.

Perhaps its most important asset, however, is the fact that almost everyone likes both the flavor and the texture, whether raw or cooked. We eat tomatoes because we are fond of them and incidentally they are "good for us." Many of us could eat them every day in salad form, and in their local season when they are not only at their best, but at their lowest price we do.

And, of course, there is nothing better than fried tomatoes unless it is baked tomatoes. Like most other vegetables they should have a short cooking. The length of time depends upon the ripeness. For frying, they should be dipped in seasoned flour after they are sliced and then cooked with a very little fat until they are golden brown on each side.

For baking, the tomatoes may be halved and very well seasoned. They need only about ten minutes in a hot oven.

Fresh tomatoes may, of course, be stewed or scalloped. They may be combined with other vegetables such as corn, onion, green pepper and squash. This mixture of vegetables fried in olive oil or bacon fat makes a good luncheon dish for home or picnic.

Fried Tomatoes Michael
8-10 tomatoes
Flour, salt, pepper
1 tablespoon butter or bacon fat
1/4 teaspoon soda
1 tablespoon sugar
1/2 cup cream

Scald and skin tomatoes, slice and dip into flour which has been seasoned with salt and pepper. Saute in butter or bacon fat and when browned on both sides, break up with a spoon and add soda, sugar and cream. Season with more salt and pepper if necessary. Reheat and serve.

Vegetable Goulash.
2 onions
2 green peppers
3 tomatoes
1 marrow squash
3 ears of corn
1/2 cup salad oil
Salt, pepper

Slice the onions and green peppers. Scald, skin and slice tomatoes. Pare and cut squash and remove kernels from ears of corn. Heat the salad oil, add onions, green peppers, corn and squash and cook five minutes. Add tomatoes and cook until they are soft. Season to taste with salt and pepper.

Stuffed Tomatoes.
6 tomatoes
2 tablespoons butter
1 tablespoon minced onion
1/2 cup leftover meat or fish
1/2 cup soft bread crumbs
Salt, pepper
1 egg, slightly beaten
Browned bread crumbs

Wipe and remove thin slice from the stem end of the tomatoes. Remove seeds and pulp and drain off most of the liquid. Cook onion in butter, add meat or fish, bread crumbs and salt and pepper to taste. Cook five minutes. Remove from fire, add egg and tomato to pulp and stuff tomatoes. Place in buttered pan, sprinkle with buttered bread crumbs and bake fifteen minutes in a hot oven, 400 degrees Fahrenheit.

Macaroni and Tomatoes.
2 tablespoons butter
2 tablespoons flour
Pepper
Salt
1/2 teaspoon celery salt
1 tablespoon minced onion
2 cups hot strained tomatoes
Grated cheese
1 cup boiled macaroni pieces

Melt butter, add flour and seasonings, and when blended add minced onion and strained tomatoes. Cook until smooth and add macaroni. Pour into greased baking dish, sprinkle with grated cheese and bake in a moderate oven, 375 degrees Fahrenheit, fifteen to twenty minutes.

Tomatoes Anchovy.
1 package cream cheese
2 teaspoons anchovy paste
1 teaspoon lemon juice
3 tomatoes
Watercress

Cream cheese, anchovy paste and lemon juice, together. Peel tomatoes, cut in half, spread with cheese mixture. Serve on bed of watercress as a first course or as a salad. French dressing may be passed.

Ask Me? Another? A Quiz With Answers Offering Information on Various Subjects

1. What is the largest liner that has gone through the Panama canal?
2. How many of our Presidents owned slaves?
3. Who first discovered the principles of magnetism?
4. What are the elevations above sea level of the Great Lakes?
5. How much space does a ton of gold occupy?
6. Roman senators were appointed for a term of what duration?
7. Are all eyes of the same size?
8. How is salt secured?

Favorite Recipe of the Week

Apple Scallop.
6 apples (medium size)
3/4 cupful brown sugar
Juice of 1 lemon
1/2 cupful butter, melted
1 1/2 cupfuls crushed ginger-snaps
1/2 teaspoonful cinnamon

Pare, core, quarter and slice the apples in thin sections and sprinkle with lemon juice. Blend together the sugar, cinnamon, melted butter and ginger-snap crumbs. Fill a baking dish with alternate layers of sliced apples and the crumb mixture. Cover and bake for 1 1/2 hours in a moderate oven (350 degrees F.) A top-of-the-stove oven will do admirably for baking this dessert. Serve hot with ice cream or cold with plain cream.
Yield: 6 servings.

Man of Honesty
The more honesty a man has, the less he affects the air of a saint. The affectation of sanctity is a blotch on the face of piety.—Layater.

Smiles

Cruelty
"Madam, your confounded dog has torn my trousers!"
"Naughty, naughty Fido! I shall punish him severely. I shall take his pink ribbon away from him for a whole week."

Another Gal
"I can't understand why I didn't accept you the first time you proposed."
"That's easy. You weren't there."

Oh, Him!
Lady (to tramp)—Now go away or I'll call my husband.
Tramp—I know him. He's the little feller who told me yesterday to go away or he'd call his wife!

ALL FOR 'EM

Stonehammer—Don't you think these scanty clothes the women wear are outrageous?
Bonechisel—No. My wife makes a party dress out of a couple of squirrel pelts and leaves my bear skins alone.

Beyond Him
She did not understand the thermometer, but she took her husband's temperature with it and then held a match under it to read it properly. She sent a frantic message to the doctor: "Come at once: temperature 150 degrees."
To which the doctor replied: "I can do nothing. Send for the fire brigade!"

TESTED AND PROVED ON THE FARM

THE AMAZING New Firestone GROUND GRIP TIRE

PROVIDES GREATER DRAWBAR PULL, GREATER TRACTION AND SAVES MORE TIME AND FUEL

NEWS of the amazing performance of the NEW Firestone Ground Grip Tire is sweeping rural America. Farmers everywhere who have seen this new tire are so enthusiastic about it that sales have been climbing steadily upward and production has been greatly increased to meet the demand.

Why all this enthusiasm? Those of you who have seen the new Firestone Ground Grip Tire in action know the answer. Tests show that it will pull a three-bottom plow under soil conditions where other makes of tires can pull only a two-bottom plow. The re-designed tread gives greater traction and better self-cleaning action. It will not pack the soil—in fact, it leaves a mulch on the surface of the tread track that prevents rapid evaporation of moisture in the soil. These tests also show up to 30% more available drawbar pull on dry sod, up to 40% more on dry plowed ground, up to 50% more on wet plowed ground than with any other tire tested.

Only in Firestone Tires do you get so many patented extra-quality features. The Ground Grip Tread is patented and is made of specially compounded rubber which resists the action of sun, rain and snow. Gum-Dipping is a patented Firestone Process, by which every fiber of every cord in every ply is saturated with liquid rubber which gives added strength to resist the strain of heavy pulling. The Two Extra Layers of Gum-Dipped Cords under the tread are patented. This Firestone construction feature binds the tread and cord body into one inseparable unit.

You want and need ALL these features. Only Firestone has them! See this new tire at your nearest Firestone Implement Dealer, Tire Dealer or Auto Supply & Service Store today.

GREATER DRAWBAR PULL
Increased height of the new Ground Grip tread and the improved design and spacing of the heavy traction lugs result in much greater drawbar pull.

GREATER TRACTION
The increased penetration of the improved Ground Grip tread gives a deeper "bite" resulting in greater traction.

GREATER FUEL SAVINGS
Tests show savings of as much as 50% in fuel as compared with steel-lugged wheels.

GREATER TIME SAVINGS
The increased traction enables you to cover much greater acreage in a day.

WEATHER-PROOFED
The Ground Grip Tread is made of special weather-resisting rubber which is unaffected by hot sun, rain or snow.

Congressional Reflections

Office of Senator Chavez, Aug.
21, 1937— With adjournment
fever in its veins Congress rushes
to finish its business before the
expected adjournment Saturday,
August 21st.

Senator Chavez this week
hurriedly made arrangements to
leave Washington for New Mexico
immediately following the end of
the session. However, advice
from New Mexico in connection
with the Middle Rio Grande
Conservancy District situation
will require that the Senator stay
in Washington until the arrival of
Bill Oestreich, the engineer of the
District.

Senator Chavez anxiously looks
for House action on his Rio
Grande & Pecos Flood Control
Survey Bill. Congressman Demp-
sey introduced a similar bill
Friday and there will be an
attempt to get a report of accept-
ance of the Senate Bill by the
House before adjournment. The
delegation is also striving desper-
ately to pass the new Coronado
Cuarto Centennial Bill which
provides for Federal Participation
in celebrating the anniversary.
The Senate Foreign Relations
Committee favorably reported
the bill yesterday. They will
attempt to obtain House and
Senate approval today.

Another Conchas Dam is on its
way. The survey of the Dry
Cimarron Dam project in Union
County which was authorized by
the 74th Congress last year is
soon to commence Senator Chavez
was advised by army engineers
from the district office of Little
Rock, Arkansas. Announcements
will soon be made and Senator
Chavez is anxious that all those
who are interested communicate
with him in order that he can
submit their names to the engi-
neers for notification.

The response of Senators and
Congressmen to the invitation of
Senator Chavez to vacation in
New Mexico has been gratifying.
Senator Alben W. Barkley, the
newly elected leader of the
Senate Democrats advised Sen-
ator Chavez that it would be
impossible for him to visit New
Mexico this year. He wrote,
"However, I shall take the liberty
of taking a rain check on your
invitation in the hope that I may
be able to consummate it in the
near future."

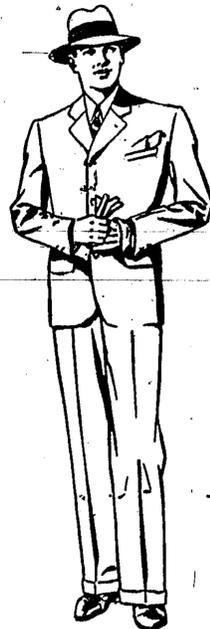

Fred Healy, WPA Administra-
tor for New Mexico, arrived in
Washington. He is to confer with
heads of the WPA on the Arch
Hurley Conservancy District
Matter. Senator Chavez is tak-
ing up with him and the officials
the question of the Albuquerque
Airport. He was advised by
Jack Frye, President of the TWA,
that it might be necessary to
remove the division stopping
point from Albuquerque since the
present field used by the TWA is
inadequate for purposes required
by the newly purchased equip-
ment they are using on their
line. The new large planes being
used by TWA cannot be cared
for by the present airport and the
work on the new airport is pro-
gressing so slowly that there will
be no chance of completion by
spring. Senator Chavez wants to
push the work as rapidly as
possible. The loss of the division
point for New Mexico would
mean a transfer of equipment and
personnel from the State. This
naturally is not very desirable.

Roy Kimball, of Amarillo, Tex-
as, head of the Dust Bowl Auth-
ority was in Washington. Senator
Chavez had the pleasure of visit-
ing him several times this
week. They discussed the problem
of the Authority and of Resettle-
ment in New Mexico. Howard
Bains of Roswell was a recent
visitor. Hilario Rubio, Las Vegas
Attorney, and wife and child
visited Senator Chavez.
They were accompanied by Miss
Alicia C. De Baca. Dorothy
Whitcraft of Albuquerque also
dropped in the office this week.

News office. 3t.

Mr. Joe Sanchez and daughters
were here this week from Califor-
nia visiting relatives and friends.

The Business Men's Club had
their usual Wednesday social
gathering and dinner at the Car-
rizozo Eating house. Mr. Car-
penter, the new superintendent of
the city schools addressed the
members and made a very favor-
able impression. The business
men's club received notice that
after January 1st the road work
on Picacho hill would be a federal
aid project.

Mr. Lewis Nalda is driving a
new Ford V-8 bought yesterday.

Rep. L. P. Hall was in town
yesterday. He was accompanied
by his daughter Edith.

R. Ewing Carter and R. H.
Hedgecock of Ruidoso, vacation-
ing in the east, dropped in to see
the Senator Saturday. They were
very anxious to see Congress in
action on its closing day. The
gallery was very crowded. For-
tunately the Senator was able to
take them in. Dick Beuvans of
Las Cruces was also a recent
visitor.
