CARRIZOZO, NEW MEXICO, FRIDAY, DEC. 3, 1937

NUMBER 28

## Bankhead Jones Farm Tenant Purchase Program

Counties in which the Bankhead-Jones Farm Tenant Purchase program will be administered in its first year will be selected at a meeting of the four-state advisory committee to be held at Amarillo, Texas, on December 3, according to word received here by James W. J. Evans, rural rehabilitation supervisor for the Farm Security Administration.

Immediately after the committee selects the counties in Kansas, Oklahoma, Colorado and Texas in which the farm purchase loans will be made to tenant farmers, county committees will be appointed and the program inaugurated with the least possible delay.

The four-state committee is composed of John E. Hill, Amarillo, Texas, chairman; Geo. Drum, Sharon Springs, Kansas; John Hiatt, Meade, Kansas; Adolph Hansen, Granada, Colorado; Marshall Deal, Las Animas, Colorado; Ed C. Morrison, Godwell, Oklahoma; and the following members from Texas, C. H. Day, Plainview; C. L. Thomas, Pampa; and A. B. Crump, Wheeler.

## Lyric Theatre

Friday and Saturday  
Wheeler & Woolly in

### "On Again Off Again"

A typical Wheeler and Woolly comedy made for laughing purposes only.

ALSO ::

"Toonerville Trolley" and  
"Pardon My Spray"

Sunday, Monday & Tuesday  
Shirley Temple and Victor Mc  
Laglen in

### "Wee Willie Winkie"

The land of the Bengal Lancers and adventure as only Kipling could write it. Thrill to the ever threatening dangers where the Himalayas rear up sheer and vast.

ALSO ::

Comedy—"Amuse Yourself"  
Sunday matinee 2:30 p. m.  
Night Show at 8:00

Wednesday and Thursday  
John Beal & Armadia in

### "Border Cafe"

An adventure of the Texas and Mexican border, taken from a story in *Cosmopolitan Magazine*.

ALSO ::

"One Live Ghost" and "Wash-  
ington in Virginia"

Rep. L. P. Hall was in Carrizo-  
zo from his Ancho ranch Thurs-  
day.

Mr. W. W. Smith was here  
from White Oaks yesterday.

Corn, Cake, Meal,  
Shorts, Bran, Lay-  
ing Mash, Wheat  
Kaffir, Ground Feed

## Refugio Torres

Mr. Refugio Torres, well known citizen of Hondo passed away on the night of Nov. 27, after a short illness. Funeral services were held at San Patricio on Monday, November 29.

Mr. Torres is survived by his widow, Mrs. Pelegrina Torres, and two daughters.

## In District No. 4

Under Dr. C. W. Gerber, much time has been devoted to rabies investigation and control, typhoid investigation and control, tuberculosis home visits, and malaria investigations and control and parasitical and entomological investigation. Good pre and post natal attention is afforded by the department, and child hygiene clinics are being held regularly in Dona Ana and Sierra counties and conferences in Lincoln and Otero counties. Classes are held in suitable locations in home nursing and care of the sick. Much of the time of the District Sanitarian has been devoted to the inspection and control of food handling establishments in all four counties comprising the district, and meats and other products are being regularly inspected. Constant check is being made on all water supplies and also on the correct operation of all district sewage disposal plants. Hot Springs has already adopted the Standard Milk Ordinance and Carrizozo is in line to do so. A good midwife educational program has been developed. — N. Mex. Health Officer.

## You Can't Legislate Brains

There is growing realization on the part of merchandising groups, that those merchants who back laws to penalize their competitors are courting disaster. This point of view dominates some remarks recently made by Hector Lazo, Executive Vice President of the Cooperative Food Distributors of America, who said: "Merchants who prefer to place their reliance on discriminatory or class legislation will find themselves left behind by the parade. There is no law that can legislate brains for the man who fails to use his own, nor inject ambition and self-reliance into the heart of the lazy."

Under a process of free competition, with equitable laws and tax and labor policies applying to all, the merchandising system which gives the public the most for its money will make the fastest progress. Brains and energy and ideas — not restrictive laws — are what make for merchandising development, and for better service to the consumer.

Mrs. Jones honored her little daughter, Barbara Jack with a party on her fifth birthday, Sunday afternoon, from 2 until 4. Refreshments were served and the children enjoyed themselves very much.

Mr. and Mrs. Frank Richard gave a birthday party Saturday afternoon for their little grandson Gerald Cooper, honoring his eighth birthday.

Mrs. Louis Adams spent last Monday and Tuesday in Tucumcari visiting her husband, who is now running on the Dawson branch.

## BENEFIT DANCE

Dancing \$1.00 Spectators 25c

## Pacheco-Chavez

Mr. Tony Chavez and Miss Refugia Pacheco of La Luz were united in marriage last Saturday at Santa Rita Catholic church, with Rev. Father Salvatore officiating.

Mr. Juan Martinez was best man and Mrs. Juan Martinez was matron of honor.

The bride is a daughter of Mr. Juan Pacheco of La Luz and the groom is a son of Judge Elerdo Chavez of Carrizozo. Both are well and favorably known and many friends congratulate them.

A wedding dance was held at community hall Saturday night, with three hundred guests in attendance.

The Sat Chavez orchestra furnished the music.

## Keep Your Family Clear Of This Toll

The safest way to burn trash is in an incinerator. But even then, constant care must be taken.

In one instance, a man who had lighted some papers in an incinerator, attempted to push them down and put more in. The flames ignited the sleeve of his shirt and burned him seriously. In another case, a woman was watching trash burn in an incinerator which was too full. The wind veered, the flames ignited her clothing. She was so badly burned that she died in agony.

The National Board of Fire Underwriters advises against burning trash, even in an incinerator, if any wind at all is blowing.

Much clothing worn today is made partly of compositions that ignite easily and burn furiously. Accordingly, greater care must be taken to avoid the danger of setting clothing on fire. Load your incinerator, but don't stuff it. Once the fire is started, let it burn down before adding more. Stay well out of reach of the flames and keep children at a distance.

Fire claims thousands of lives and hundreds of millions of dollars annually in America. Keep your family clear of this toll! — Industrial News.

## Thanks From the Pastor of the Methodist Church

I am taking this means of thanking those who had a part in giving me the most generous poundings I have had since the flood, not Noah's, but San Marcial. It was a complete surprise and much appreciated for its value, but most of all for the kind hearts that prompted it and the spirit in which it was given. I trust I can show my appreciation by serving you.

Rev. R. A. Crawford.

## Hunting Deer

Washington, Dec. 1— Senator Carl A. Hatch of New Mexico was deer hunting today in the mountains of El county Pennsylvania, as one of the party that included Vice President Garner and Count Potocki, the Polish ambassador. Their headquarters were at the camp of Col. William Kaul near St. Marys, Pa.

## Winter Sports

Santa Fe, Dec. 2.— Winter sports activities will be conducted on a minor scale in Hyde Park this year, as the result of additional facilities provided by the Civilian Conservation Corps, working under supervision of the National Park Service and the New Mexico State Park Board. The ski area in Little Tesuque Canyon has been widened and lengthened, to provide space both for beginners and those with experience.

Additional picnicking areas have been provided, equipped with grills for cooking, and combination table and bench units. Five large shelters, constructed of logs, contain fireplaces and cooking grills. Free fuel is available. Completion of additional clearing in the upper regions of the park, provides a ski area of about four acres.

Visitors without their own equipment will be able to rent skis at a concession in the park, where light lunches also will be available.

The Winter sports season in Hyde Park is expected to commence early in November. An activity use study will be made by the National Park Service to secure information upon which to base plans for future development.

## Irrigation and Stock Problem To Be Studied

The New Mexico University conference on business and government will take up problems of stockmen and irrigation districts during the twoday sessions opening Friday.

J. V. Taylor, state soil conservation co-ordinator, and Dr. D. Shevky, research director, will take up irrigation problems, Shevky dealing particularly with the Middle Rio Grande situation.

Stockgrowers problems will be discussed by A. D. Brownfield, president of the New Mexico Cattle Growers association, who will talk on government regulations as they affect the New Mexico livestock industry.

Mr. Tom Moray of Gallup spent the Thanksgiving holidays with his sisters, Mrs. A. Lantz and Elizabeth Kelsner.

## Sales Tax Collections

Santa Fe, Dec. 1.— State sales tax collections for November totaled \$306,618, an increase of \$61,375 or 25 per cent over the same month in 1936. R. B. Wagonman, deputy revenue commissioner, announced today. Collections in November, 1936, were \$245,243. Last month's total however, was below the total collections for October of \$324,144.

## Club Officials Find Reasons For Driv- ing Customs

Turning the pages of history back into the dusty past, John Huntington president of Rocky Mountain Motorists, the AAA Club, finds an explanation as to why Americans drive on the right side and Englishmen on the left.

"The English custom of driving to the left originated back in the days when the lone horseman rode about armed to the teeth," Mr. Huntington explained. "In those days, every stranger was a potential enemy and the rider would jidle over to the left in order to keep his sword or pistol arm next to the stranger."

Later, drivers of coaches and wagons sat on the right side in order to have the right arm free for wielding the whip, and accordingly passed to the left of approaching vehicles as it was easier to avoid wheel entanglements on the narrow roads and streets.

However, on the Continent, in France, Germany and Italy, the postilion system was used for both coaches and wagons and the driver rode on the left wheel horse. Accordingly, vehicles passed to the right. Today, there is differing practices in different nations and occasionally on crossing a national border it is necessary to cross from one side of the highway to the other.

In America, drivers of the old Conestoga wagons rode the left wheel horse postilion-style and consequently drove to the right. Eventually the deep ruts made by the covered wagons were followed by the first horseless carriages. When they appeared on the scene they infuriated farmers, caused runaways and sent billows of smoke across the countryside.

Driving to the left, oddly enough, is a custom in one United States possession—the Canal Zone. This resulted because the first chauffeurs coming into Panama were from Jamaica, where the British method of passing prevails.

## 1938 License Tags To Be Unfading

Santa Fe, Dec. 1.— Hard baked paint on the automobile license tags of 1938 will prevent fading that made some numbers almost unreadable this year, Diego Salazar, commissioner of the motor vehicle department, said Monday. Salazar said the numbers faded from many of the plates this year because the enamel was insufficiently heated.

## An Invitation

Mrs. Phillip Gensler, Sr., invites members of the Carrizozo Woman's Club to an exhibition of water colors and prints from the Southern States Art League, today and tomorrow, Dec. 4th and 5th from 1 to 6 p. m. at the Community House in Ft. Stanton.

## ANCHO NEWS

Mr. and Mrs. Halley Hall of Luna are the proud parents of a baby girl, born last Saturday night. Congratulations.

Mr. and Mrs. E. M. Brickley of Carlsbad visited their brother Mr. J. C. Brickley last week end.

Mr. and Mrs. Bert Peniox and daughter Mary Catherine spent Thanksgiving with the home folks Mr. and Mrs. J. M. Frame.

Mrs. Berry of Fort Stanton was a guest of her daughter and husband Mr. and Mrs. Carl Craig for Thanksgiving.

A nice crowd attended the Thanksgiving program at the School House Wednesday night put on by teachers and school. Our teachers Mr. and Mrs. Carl Craig and Mrs. Barney Wilson are due a lot of credit for the nice entertainments they have.

The little son of Mr. and Mrs. Geo. Straley who has been quite ill for some time is reported better at this time.

A good crowd gathered at Fairview last Sunday for Sunday School and church. Services were conducted by Rev. R. A. Crawford of Carrizozo.

Mr. and Mrs. Howard Bullard Mr. and Mrs. V. Hefker of Coyote visited Ancho and Luna friends last Friday.

Mr. and Mrs. John Dale Sr. are driving a new '38 Oldsmobile purchased at the City Garage of Carrizozo.

The Straley Bros. Mr. Chas. Peters and Mr. Elwood Bond were shipping cows and calves last week.

Mr. and Mrs. John Dale Jr. were guests of the Dale and Drake families over the week end.

Mr. and Mrs. J. E. Hall went to Carrizozo Wednesday to see the new granddaughter Mr. and Mrs. Halley Hall's baby girl.

Mr. and Mrs. L. P. Hall were Carrizozo visitors this week.

## New Beauty Shop

Another beauty shop opened up in Carrizozo this week, located in the Carrizozo Hardware building. Mrs. Gladys Hicks is the operator. Mrs. Hicks recently moved here, with her husband from Bakersfield, California. She has had a wide experience in beauty culture.

## Basket Ball Season Opens

After a successful football season, Coach Caton started basket Ball practice last Monday night. There seems to be plenty of material to build up a successful team again this year. The high school students are counting on your support to help make it so.

Born:—To Mr. and Mrs. Halley Hall of Ancho an 8 pound baby girl.

Attorney John E. Hall returned today from a business trip to Albuquerque and Gallup.

# Is Your Mind Allergic?

By  
**DR. JAMES W. BARTON**  
© Bell Syndicate.—WNU Service.

IT HAS been known for a long time that certain pollen, particularly ragweed, is the definite cause of hay fever in those who are "sensitive" or "allergic" to ragweed pollen. Similarly it has been proven that certain substances can cause attacks of asthma and of eczema.

Later it was found that certain foods could cause head colds, asthma and eczema, and also abdominal symptoms such as vomiting, diarrhoea, pain, belching of gas, and other symptoms. Cream, eggs, wheat, bread and chocolate are considered the most frequent offenders, in this respect.

It will not cause much surprise, therefore, when we are told that just as many of us are sensitive to pollen, food, dander from horses and cats, substances used in industry, so can we be "sensitive" or "allergic" to words, ideas, materials or things which are symbols of emotional patterns and we become mentally or emotionally upset.

An editorial in the American Journal of Psychiatry tells us that in many cases these reactions we receive from words, ideas or situations include physical or body symptoms that we can actually observe or measure—increased pulse rate, blood pressure and temperature, but also psychic or mental symptoms out of all proportion to the stimulus or cause.

While this idea that words, ideas, or situations may cause mental or emotional flareups, just as a red rag is supposed to do to a bull, is somewhat startling, nevertheless it is possible that many cases of emotional or mental upsets may be traced to the individual being sensitive or "allergic" to words, ideas, or situations about him.

**Reducing Needs Strong Will.**  
A physician doing special work on metabolism (rate at which the body processes work) tells his patients that very few overweights need any drug or gland extract, that the overweight is simply the result of over-eating, and there is no use making any attempt to reduce weight unless they are willing to cut down to a large extent on the daily intake of food. If they are unwilling to cut down on the food intake for the sake of their appearance, he then warns them of the danger of overweight.

Thus at the obesity or overweight clinic at the Mount Sinai hospital, Dr. Charles Markson gives every patient full information in printed form as follows:  
"Overweight increases the strain on the heart and kidneys. This extra strain often results in diseases of the heart, bloodvessels and kidneys. Overweight, aside from causing fatigue and bodily discomfort, is also known to be an important factor in causing diabetes.

These complications generally appear after the age of forty. To lessen these dangers and so increase your chances of health and long life, you must begin early and make a serious and constant effort to keep your weight at a normal level.

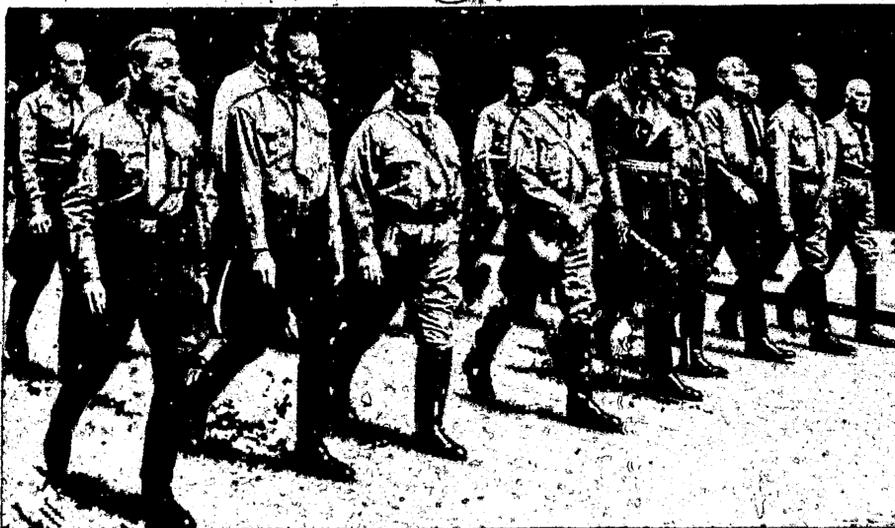

"A strong will is the first essential in the reduction treatment of overweight. You must learn to use or exercise this strong will, otherwise the result is bound to be disappointing."

**How Jewish People Count Year.**  
Hebrew chronology begins with the Creation, which was considered to have taken place 3,760 years and three months before the beginning of the Christian era. The calendar is both solar and lunar, as the years are reckoned by the sun and the months by the moon. The lunar year consists of 12 months, or 354 days, eight hours, 876 parts and is shorter by 10 days, 21 hours, 204 parts than the solar year. In order to adjust the two systems, a thirteenth month is added in the third, sixth, eighth, eleventh, fourteenth, seventeenth and nineteenth years of each 19-year cycle. The months include either 29 or 30 days, and the first appearance of the new moon begins each month. The weeks are made up of seven days each. The days are reckoned from evening to evening, in accordance with the order observed in the Biblical account of the Creation, "And there was evening and there was morning, one day" (Gen. 1, 5), and the calendar day of 24 hours begins at 6 p. m. The hours are divided into 1,000 parts.

**Schubert Born in Austria.**  
Franz Peter Schubert, German composer, was born in 1797 in a small suburb of Vienna, Austria.

**Changes From Liquid to Gas.**  
When water boils away it changes from liquid to a gas, which floats away in the atmosphere.

## Mark Anniversary of Nazi "Beer Putsch"

Flanked by pillars of the Nazi party, Reichleader Adolf Hitler is pictured as he took part in the annual celebration at Munich, Germany, that marks the anniversary of the famous "beer cellar putsch" in 1923 that was the beginning of Hitler's rise to power.

### TELLS ABOUT RELIEF

Harry L. Hopkins, WPA administrator, as he addressed the recent mayors' conference at Boston, Mass. His subject was "The National Program." Mayors from leading cities throughout the United States were in attendance. Their verdict was that the relief burden in big cities would be increased rather than lowered this winter.

### It's Popular at Northwestern

Martha Towle (left), and Helen Sethness, Northwestern university coeds, battle in the crisp winter air. Field hockey is one of the most popular feminine sports on the Evanston campus. Miss Towle has just hit the puck from under the stick of Miss Sethness during an intramural contest.

### Here's Safe Way to Jaywalk

Jaywalkers on the public square in Cleveland were politely reminded by police that using a red flag placed there for their convenience "might" help them in darting across the streets when the traffic lights were against them. It was all part of a traffic safety campaign to reduce the number of motor fatalities that have been mounting rapidly.

### Now They're Putting Specs on Chickens

Hen spectacles are really for chickens and they make the fowls as wise as they look. This educated hen is wearing the new specs which are made of metal and instead of improving the chicken's eyesight, they provide a blind spot, which prevents bullies in the flock from picking feathers from the more timid.

### Cow and Quadruplet Calves Visit the Big City

"Mrs. Cow" and her quadruplet calves which were brought to Chicago by Miram W. Long (left) of Avery, Okla., were greeted by Dr. Hermann Bauschman (second from left), president of the board of health, and Alderman Thomas J. Ferral. This unusual barnyard family was a feature of the celebration of National Milk week.

## Historic Hoaxes

By **ELMO SCOTT WATSON**  
© Western Newspaper Union.

### Clan War

ONE day a Scotchman of the Clan MacLean dropped in to the office of the Toronto Mail and Empire, as was his custom, to see his friend, Charles Langton Clarke. On the newspaper man's desk he noticed a clipping of an article which quoted "the noted Scottish historian, Strangway," as saying that the MacLeans had been the first to flee from the Battle of Culloden, thus shattering the hopes of Bonnie Prince Charlie for regaining the British throne. That clipping had been "planted" there deliberately by Clarke, who expected his friend to find it and immediately "blow up."

Instead, the victim of Clarke's hoax rushed from the office and sat himself down to write an indignant letter to another Toronto newspaper. Immediately other Scots in Ontario took up the matter. To the MacLeans, proudest of all the proud Highlanders and numerous in Canada, such a reflection upon the courage of their ancestors was an insufferable insult and they were loud in their denunciation of this historian, Strangway.

Members of other clans—and these included men who were supposed to be authorities on Scottish history—declared that they were quite familiar with the works of this historian and had always found him accurate. For days the battle of Culloden was fought over and over again in the columns of the newspapers. So bitter grew the feeling that Clarke began to wonder how he could still the tempest that he had raised, before there was bloodshed. Then almost as suddenly as it had begun, the controversy died down. But it wasn't until years later that Clarke dared confess that he was the author of the hoax which had so aroused the Scottish clansmen.

### "The Animals Are Loose!"

ON SUNDAY morning, November 9, 1874, a shiver of fear ran through New York City. Headlines in the New York Herald proclaimed that all of the animals in the Central Park zoo had escaped. The story, which ran to five full columns, said that 49 persons were dead, of whom 27 were identified, (their names were printed) and 200 were injured, 60 of them seriously.

The mayor had issued a warning for everybody to stay at home while brave citizens, including Chester A. Arthur, Samuel J. Tilden and other notables, who had killed most of the ravenous beasts, rounded up the 12 animals still at large. James Gordon Bennett, owner of the Herald, collapsed in his bed while reading the story and stayed there all day. Other citizens also stayed at home, thereby cutting down church attendance. Those who did venture out went heavily armed.

For several hours the city was in an uproar. Then somebody happened to read the last paragraph of the story. It was headed "The Moral of the Whole" and revealed that this was a gigantic hoax, the story of what MIGHT happen if better and stronger cages weren't provided for the animals in the zoo. In fact, that was what Thomas B. Connery, the managing editor of the Herald, who ordered the story written, had hoped to accomplish with it. But he overshot the mark badly. He gave the whole city the jitters but the zoo didn't get stronger cages for its animals, at least, not until long after the excitement over his hoax had died down.

### "Christ's Letter"

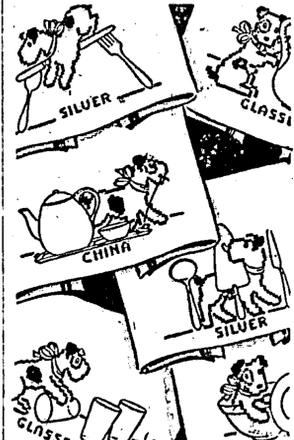

THE next time you receive a copy of a letter, which is said to have been written by Jesus Christ just before the Crucifixion, don't be afraid to disregard the warning that "misfortune and ill luck will follow you" unless you pass it on to somebody else. For this is one of the most famous of all hoaxes. So far as it is possible to determine, this letter was written by some unknown person—perhaps a religious fanatic—around 1691 and it has been industriously circulated ever since. "The whole thing is a stupid, clumsy hoax or a modern frame-up" says an authority on the subject. "It is even inconsistent with the teachings of the Bible and is expressed in modern English—sure proof that it is a fake."

The instructions for passing along this letter vary. Sometimes you are requested to make four copies and send them to four of your friends who will send copies to four of their friends and so on. Sometimes the number is seven and sometimes nine. But in any case the receiver is solemnly warned not to "break the chain."

A more modern variation on this hoax is a letter which, it is asserted, was "written by a dying soldier in France." In either case, refusal to do as requested will "bring you bad luck" and willingness to do it will "bring you good luck." Perhaps it will—and it also helps the United States post office department. It will sell just that many more stamps!

## Foxy Little Terrier For Tea Towels

Terry, the Terrier, will dry your dishes with the same "punch" he displays when rolling glasses and hurdling silver. It will make your dish-drying a joy just to see his jolly self on the towels you use. These motifs require so few

stitches, so little floss, they're economical and ideal pick-up work. Single, outline and cross stitch make this splendid embroidery for a gift. In pattern 5746 you will find a transfer pattern of six motifs averaging 5 by 8 1/2 inches; material requirements; color suggestions; illustrations of all stitches used.

To obtain this pattern, send 15 cents in stamps or coins (coins preferred) to the Sewing Circle, Household Arts Dept., 259 W. Fourteenth St., New York, N. Y. Please write your name, address and pattern number plainly.

### Good Deed Is Never Lost

He who sows courtesy, reaps friendship; and he who plants kindness, gathers love.

An absorbing "survey" should be a survey of one's own faults. Make a list.

If one hasn't much to lose, one can contemplate his misfortune with quite complacent philosophy.

The man whose faults are the kind everyone can talk openly about—and does—is generally beloved.

Human nature doesn't change and ought not to; else we wouldn't know how to handle it.

Rockefeller had the genius for making money, but he could not impart the secret to anyone else, though he tried to in maxims and precept.

# Keeping Up With Science

By Science Service

## Earth Shaft Ten Miles Deep Needed to Solve Problems

### Scientists Think Such a Project Is Possible

Rochester, N. Y.—Scientific triumphs of the future—production of super-men to the conquest of cosmic rays—were forecast here at the annual dinner of the National Academy of Sciences.

When mankind has banished wars, science may hope for so ambitious a project as an international earth shaft 10 or 12 miles deep, said Dr. Arthur C. Parker, director of the Rochester Museum of Arts and Sciences. Such a shaft, far beyond present depth to which the earth has been probed, will enable scientists to study earth structure down where the mysterious cosmic rays have no influence. There, man can find out what it is like to avoid these cosmic bullets that bombard the earth from space.

When we get under the earth's skin, said Dr. Parker, we may possibly find that the cosmic ray is "the sperm of life."

**Romance in the Research.**  
Calling the study of hormones, secreted within the body, a challenge, Dr. Parker said:

"There is practical romance in this research for it means that the biologist of the future will have controls within his grasp that can produce the super-man or the super-woman, but, whether man or woman will depend upon what derivative of cholesterol the bio-builder uses. One can imagine also what effect the use of this substance will have upon the writer of fiction. He will analyze the love between the man and the maid. 'She was filled with C<sub>27</sub>H<sub>45</sub>OH,' the writer will say, 'and he was energized by liberal amounts of C<sub>19</sub>H<sub>30</sub>O<sub>2</sub>, which, my dear readers, is so powerful that it sprouts combs on capons, so you can see what it did to our hero.'"

Fuller understanding of how the mind works, as master of the body, was also forecast by Dr. Parker, who said:

"We must look ahead for the true answer, though I am well aware that some psychologists will say they can answer now. Still, I am skeptical enough to believe that the real answer to this question will be one of the most startling achievements of this century."

### Scalped Woman Is Given Fine New Scalp and Ear

Chicago.—The case of a young matron who, after being scalped and losing her right ear, was given a new scalp and ear made from skin off her back and a piece of cartilage from her rib, was reported by Dr. James A. Cahill of Washington, D. C., at the meeting here of the American College of Surgeons.

The woman was scalped because her hair caught in the flywheel of a power machine when she stepped to pick up something that had fallen beneath it. More than eight operations, spread over 19 months, were necessary to give the young woman her new scalp and ear. The results are entirely satisfactory to her now and the slight deformity remaining scarcely shows after her headdress is in place.

### Egg Yolks Colored as the Customer Likes Them

Ithaca, N. Y.—The scientific chicken breeder and egg farmer can now supply eggs whose yolks are colored to suit the customer's fancy, if he follows the advice of Prof. H. E. Botsford of the New York State College of Agriculture at Cornell university.

Control of the hen's diet to let her eat more or less of a certain dye, xanthophyll, found in a number of plants and grains, is the method Professor Botsford recommends.

Customers generally prefer eggs of a medium yellow yolk, he reports. Extremely deep orange and very pale yolks are not desired by the average restaurant eater who orders his ham and eggs each morning.

### Big Losses Due to Smoke

Washington.—Anywhere from 10 to 30 dollars is the annual loss sustained by each person in the United States because of the atmosphere, according to estimates made by the public health service. The smoke bill can be attributed to clothes cleaning, disfigurement of buildings, damaged merchandise, injuries to grass and plants, and the loss of light and ultraviolet light.

# "Plant Engineering" Would Produce More Satisfactory Crops

## Botanist Proposes Use of Growth Hormones

Los Angeles.—"Plant engineering" as an important aid to enterprising horticulturists was forecast by Dr. Frits W. Went, botanist of the California Institute of Technology, in an address here.

The speaker's play on words does not refer to mechanical engineering in the common sense, however. The distinguished plant physiologist really meant literally what he said, viz., the constructive engineering of living plants, with the aim of producing more satisfactory crops. Nominally this may mean the making of big plants where only little ones have hitherto grown; but actually by indirect reaction the plan may bring improvement in quality as well.

The time-honored methods of improving on Nature's forms of vegetation, such as seed selection and hybridization, have well-known limitations. The plant breeder often produces trees with superb quality of fruit, but with poor yield, poor resistance to pests, disease or harsh climate, and worst of all, dwarf growth habits.

### Would Use Growth Hormones.

At this point Dr. Went proposes to use growth hormones, which are potent organic chemical compounds that may happen to be missing in the case at hand. He considers it not impossible that a vegetable dwarf of choice quality may be led to develop to unprecedented size. If hormone treatment can be made to solve the problem of size and rate of growth, then much greater freedom is allowed to the expert in pollination and hybridization.

The hormone may be administered in the manner of either soluble chemical fertilizer or spray, or by soaking parts of plants or seeds. Unlike fertilizers, the hormones are applied only in extremely dilute form. For example, the rare chemical indoleacetic acid, which has exhibited high hormone potency, may be mixed with as much as 10,000 parts of water for use in soaking cuttings which one wishes to root rapidly and vigorously.

Hormone application has reference to certain cases where it is not practical to propagate a plant from seed. Such varieties are of course commonly grafted or budded upon robust seedling plants. Unfortunately the graft junction often seems to constitute at least a partial barrier to growth hormones which should be passing regularly from root to tree-top. As a result many grafted plants are somewhat dwarfed. Artificial application of hormones thus provides the remedy, assuring adequate growth.

## "Loose" Protoplasm Has Rhythmic Flow of Higher Life Tissue

Philadelphia.—Protoplasm, the material basis of life, shows even in a "loose" state something of the same kind of rhythmic action that is found in heart tissue and other muscles with nervous systems to guide and co-ordinate their contractions, so states Prof. William Seifriz of the University of Pennsylvania, in Science.

Professor Seifriz has for years made a special study of one of the most familiar forms of "loose" protoplasm, the slime-molds or myxomycetes. These are close to the very bottom of the scale of living things, and consist simply of masses of naked protoplasm without cell walls or any other visible organization.

In this "loose" protoplasmic mass there are constant streaming currents, as indeed there are currents in all protoplasm within living cells of higher life forms. In time-lapse motion pictures taken by two French colleagues, Drs. J. Comandon and P. de Fonbrune of the Pasteur institute at Garches, Professor Seifriz has seen how the flow in a myxomycete sets evenly in one direction for 40 or 45 seconds, then reverses and sets in the other direction for an equal period. When the protoplasmic flow is outward, the slime-mold mass contracts, when the flow is inward, it expands.

This, among other observed properties and phenomena, is taken by Professor Seifriz as evidence that protoplasm even in its simplest, least "organized" state, is no less truly alive than are some of its more complex forms.

### Slow Lightning Found

Pittsfield, Mass.—K. B. McEachron, General Electric engineer here, reports that he has found "slow" lightning that produces no thunder when its leisurely bolts traverse the sky.

### Gas From Prickly Pear

Waltair, India.—The prickly pear, considered a public nuisance in India because of its prevalence, is now being used to create a combustible gas having a heating value nearly half as great as ordinary coal gas.

# Household Hints

By BETTY WELLS

WE'VE seen a good many model houses in our day, some good, some bad, but too many of them either dull with usualness or spectacular beyond the point of comfort and livability. So we found the interiors of one pleasant little house we visited the other day more than satisfying because they had style and yet seemed thoroughly compatible with the practical routine of life.

The entrance hall maintained an air of tranquility—an unharried, quiet poise this small room had with a medallion wall paper in white with gray motifs. The carpet here was one of the new misty patterns in a dusty greenish-gray, and the small settee was upholstered in a striped fabric with yellowed effect. A spinet piano was the main piece of furniture in the entry. Opening off of this room was a powder room that the ladies would flatter over—silver and aqua were the colors that

Model Houses Should Be Dream Houses.

stand out, with a suggestion of pink. In the living room that same green-gray misty toned carpet was continued; while dado and woodwork were painted a similar muted green. Above the dado the walls were papered in a sprawling last century floral on a ground in this same powdery green and a design in off-white and gray.

The curtains were a sheer white net and draperies in a two-tone beige fabric made to hang from poles painted white. The sofa in a wide-strip material with coral, pale yellow and green was complemented by the two chairs flanking the fireplace repeating the deep rust-coral note. Another pair of chairs in a more brilliant shade of jade or peacock green gave the room a delicious lift, and incidental chairs were in pale beige. Furniture was mostly Eighteenth century of English and colonial heritage and accessories were of Chinese and Nineteenth century influence.

By Betty Wells—WNU Service.

**Fragrant and Dignified.**  
Portrait of a gracious lady—that would be our name for the pleasant little home we saw the other day. It achieves a fragrant spaciousness and a sense of leisure and offers many suggestions on how to coordinate dignity and tranquility.

This is the home of our new neighbor, and it is indeed becoming to her. A Regency note in the furniture detail and a rather modern treatment of color distinguish it from the usual home furnished in traditional period style. Combining pickled finishes in furniture with mahogany Regency, the effect is both refreshing and feminine.

Very pale gray walls and a slightly deeper gray carpet are perfect in the living room which is flooded with sunlight a good part of the day. The draperies are a clear canary yellow finished at the top

She Selected a Lovely Chintz.

with a valance of chintz in rather unexpected colorings—soft coral ground splashed with shaggy yellow chrysanthemums and their dull green leaves. This same chintz is repeated on the two wing chairs that flank the fireplace, the mantel of which is painted white like the rest of the woodwork while the bricks, usually the bane of contemporary decorators, were painted in a gunmetal tone. This gunmetal appears again on the sofa in a silk faille or rep. The occasional chairs are in white leather and also in a yellow and white leafy patterned fabric that is used again on the small cushions on the sofa. Above the mantel there is a pastel portrait of the little grandson of the family.

A pair of tall pedestals in pickle finish hold pots of luxuriant ivy—this same dull green turns up again on huckleberry leaves on the mantel and in the leather top of the desk. A bowl of gladioli in coral pinks and yellows emphasizes further the dependence of the design of the room on flowers and greenery.

**Color for Sun Room**  
Any sun room decorated in cool tones and greens is delightful both summer and winter.

# ILLNESS DUE TO DEFICIENT DIET

## Nobel Prize Winner Gives His Views on Subject.

By EDITH M. BARBER  
"NUTRITION intimately concerns the welfare of man, and his place in future history will depend in no small part upon what he decides to eat." This statement was made by Dr. George R. Minot, professor of medicine at Harvard university and winner of the Nobel prize for medicine in 1934.

According to Dr. Minot, an adequate diet throughout life will often prevent illness. In the long time studies that he has made of the condition of anemia, he has found that its cause is usually defective or deficient nutrition. It may arise from a lack or non-absorption of iron or of vitamin C or of a mysterious substance found in the liver. The condition of simple anemia may be prevented by including a liberal amount of iron and vitamin C.

The condition of pernicious anemia, which is much more serious and for which no remedy had been found until recently, is apparently related to the ability to utilize vitamin B<sub>12</sub>. Vitamin B<sub>12</sub> is found in muscle meat, eggs, rice polishings and yeast, which need an unknown gastric digestive factor to make them ready for the body. When this factor is lacking, there is danger of pernicious anemia. It may be supplied, however, by liver, kidneys and other organs. At present, this disease is being treated not only by an increase of these foods in the diet, but by liver extract taken by the mouth or through hypodermics.

According to Dr. Minot, the first cause of any type of anemia is a deficient diet.

### SELECTED RECIPES

**Liver Dumplings.**  
½ pound calves' liver  
½ cup soft bread crumbs  
1 tablespoon minced onion  
1 tablespoon melted fat  
1 teaspoon parsley  
½ teaspoon salt  
Pepper  
1 egg, slightly beaten  
5 cups stock

Grind the liver fine and mix with the bread crumbs. Sauté the onion in the fat in a skillet until delicately browned. Add the liver mixture, parsley, salt and pepper. Add the egg and mix well. Drop the mixture by teaspoonfuls into the hot, but not boiling, meat stock. Cook slowly ten to fifteen minutes and then serve with the soup. To make dumplings which may be shaped in balls, add one-half cup additional bread crumbs.

**Baked Eggs.**  
2 tablespoons butter  
½ cup milk  
3 cups mashed potatoes  
Salt  
Pepper  
2 tablespoons chopped chives or onion  
5 eggs  
Paprika

Add the butter and milk to the hot mashed potatoes and season to taste. Beat well, add the chives and spread in a shallow greased baking dish. Make five hollows, and in each place a raw egg. Sprinkle with paprika and bake in a moderate oven (375 degrees Fahrenheit) until the eggs are firm.

**Spinach Nests.**  
2 cups cooked or canned spinach  
½ cup mayonnaise  
½ cup grated cheese  
6 bread cases  
Melted butter

Make bread cases by cutting bread into three inch squares and cutting out the center. Roll each case in melted butter. Chop the spinach, mix with mayonnaise and fill the bread cases. Sprinkle with the cheese and bake in a hot oven (425 degrees F.) until bread is light brown and the cheese is melted.

**Johnny Cake.**  
1 cup cornmeal  
¼ cup flour  
1½ teaspoons baking powder  
½ teaspoon salt  
2 eggs, well beaten  
½ cup milk  
4 tablespoons butter, melted

Mix and sift dry ingredients. Combine eggs and milk and stir into dry mixture. Stir in shortening and pour batter into well-greased baking pan, spreading about three-fourths of an inch in thickness. Bake in oven, 425 degrees Fahrenheit, for about twenty-five minutes.

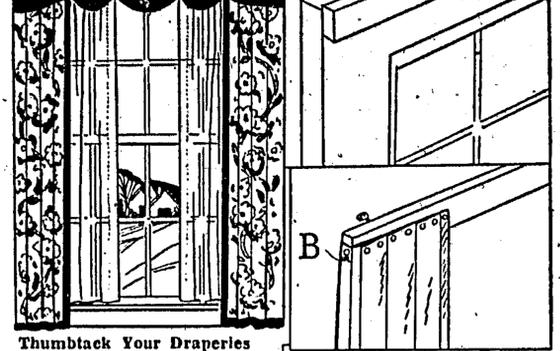

**Barbecued Chicken.**  
2 two-pound chickens  
Salt, pepper  
½ pound sweet butter  
1½ cups chicken broth  
1½ tablespoons tomato catsup  
3 tablespoons Worcestershire sauce  
½ teaspoon finely chopped onion

Disjoint chicken as for frying. Season with salt and pepper. Melt butter and fry chicken in it until golden brown. Mix other ingredients and cook together six minutes. Pour sauce over chicken and cook slowly about twenty minutes.

By Betty Wells—WNU Service.

# HOW TO SEW

by Ruth Wyeth Spears

Thumbtack Your Draperies to a Board.

To GIVE draperies the smartly tailored effect obtained by the professional decorator, a valance board must be used. A straight one by two inch board will be needed. A small finishing nail in the top of the window casing near each end and screw eyes placed near the top of the back of the valance board will hold it in place as shown at A. Both side drapes and valance may be thumbtacked to the board and then be quickly hung all at once by hooking the screw eyes over the finishing nails. Think of the advantage on cleaning day! Just lift board and all off the nails and take outside for dusting.

Tack the side drapes to the board first as at B, arranging fullness in flat pleats. In making the valance, allow enough material to fold around the ends of the board as at C; then tack it along the top, stretching it just enough so that it is perfectly smooth.

The valance shown here is made of glazed chintz and matches the glazed chintz border that faces the edges of the side drapes. The glass curtains may be hung just inside the window frame or to the bottom of the valance board.

Every Homemaker should have a copy of Mrs. Spears' new book, SEWING. Forty-eight pages of step-by-step directions for making slipcovers and dressing tables; restoring and upholstering chairs, couches; making curtains for every type of room and purpose. Making lampshades, rugs, ottomans and other useful articles for the home. Readers wishing a copy should send name and address, enclosing 25 cents, to Mrs. Spears, 210 South Desplaines St., Chicago, Illinois.

## Home Heating Hints

By John Barclay Heating Expert

IT DOESN'T pay to neglect your heating plant when you know you have a good fire but the heat is below par. You run up fuel bills and make for yourself a lot of trouble and worry which could be avoided.

There are literally dozens of things that make a "nick" furnace refuse to deliver sufficient heat, and unless you are familiar with heating plants, it will pay you to call in a competent furnace man. For instance, the check damper may be placed wrong; the turn damper may be out of position; the regulator may need adjustment; there may be caked soot in the smoke-pipe or on the heating surfaces; radiators may be wrongly pitched; draft may be partially choked; a loose bolt or a rusty joint may be wasting heat.

Those are just a few of the common things that can keep a furnace from delivering enough heat. If you cannot locate the cause quickly and easily, don't take a chance on wasting fuel money. A service man will "spot" the trouble promptly and soon put your heating plant in comfortable, healthful, economical working order. Send for him immediately. WNU Service

## Beware Coughs That Hang On

No matter how many medicines you have tried for your cough, chest cold, or bronchial irritation, you can get relief now with Creomulsion. Your druggist is authorized to refund your money if you are not thoroughly satisfied with the benefits obtained from the very first bottle. Creomulsion is one word—not two, and it has no hyphen in it. Ask for it plainly, see that the name on the bottle is Creomulsion, and you'll get the genuine product and the relief you want. (Adv.)

**Office of Senator Chavez**

Washington, D. C., Nov. 27, 1937.—Little publicized in the State but of primary importance is the hearing to be held on Nov. 29th, before the Interstate Commerce Commission to go into the application of the carriers for a 15 per cent hike in freight rates. Feeling that New Mexico has been discriminated against in the past, Senator Chavez has addressed a strong appeal to Carroll Miller, the Chairman of the Interstate Commerce Commission, to give the shippers and farmers of New Mexico and the southwest an opportunity to be heard on the question. He asked Chairman Miller to conduct further and extended hearings in some centrally located city in the southwest. He suggested that Albuquerque be selected.

The Farm Bill displaced Anti-Lynching in the deliberations of Congress. The Senate occupied with discussions of the Anti-Lynching Bill during the early part of the week turned to the Farm Bill introduced by the Senate Agriculture Committee, a measure hastily reported in order to divert attention from the Anti-Lynching discussion. New Mexico's Legislators will be occupied principally in an attempt to protect the cotton producing area in the application of any bill which is passed by Congress. Cotton as grown in the irrigation districts, argued the New Mexico representatives, does not compete in the domestic market with cotton grown in the rain belt areas. It is principally an exportable product. Control is automatically assured since it is limited by the water supply. Representatives of New Mexico's cotton producing areas have been in Washington consulting with the congressional delegation.

Silver, one of the main items in New Mexico's money producing resources, has occupied the attention of the New Mexico Delegation. The present silver policy expires on December 31st. Unless the policy is continued, a considerable portion of New Mexico's mineral activities will dry up. Senator Chavez has conferred with other silver Senators of the west including Wheeler, Pittman and Thomas and will join them in urging a continuation of the program.

RFC directors and officials of said agency were visited the early part of this week. The conference was concerned with the precarious plight of the farmers of the Middle Rio Grande Conservancy District. The RFC is the principal holder of the bonds of the district. The directors including Chairman Jesse Jones were found to be fully aware of the situation in the district and extremely sympathetic. Though nothing officially was assured, the delegation has every reason to believe that should a concrete proposal be presented to RFC for alleviation of the district it would find a most sympathetic audience.

The New Mexico delegation visited the White House on Wednesday of this week to urge the approval of the request of the Bureau of Reclamation for \$100,000.00 for administrative purposes in the setting up of the Arch Hurley Conservancy District at the Conchas Dam.

New Mexico will have a direct connection with Mexico City by air in the near future. The ap-

**Winter Driving Tips**

The proper technique of safe winter driving rests primarily upon the avoidance of quick, sudden moves of any kind, according to a bulletin issued by Chevrolet this week in the interest of traffic safety under hazardous road and weather conditions.

Modern motor cars are engineered for year-round operation, the bulletin states, and the driver who takes full advantages of their engineering refinements can reduce driving hazards to a minimum. The principal source of such hazards lies in poor tire traction on icy pavements where safe driving depends on the avoidance of any abrupt application of either the power or the brake.

Some of the points stressed in the bulletin are:

"A good driver uses second speed extensively in stopping, in approaching intersections, and in turning corners. With the synchromesh transmission, it is simple and easy to shift to a lower speed and maintain control of the car at all times. Another important point is to leave the car in gear when slowing down so that the engine may act as a brake.

"Cultivate the habit of giving other drivers ample notice of your intention to stop, turn, or slow down," the bulletin continues. "Even though you may have your own car under perfect control, the driver behind you may not be so fortunate. Never permit the wheels of your car to spin if it can be avoided. Spinning wheels may cause dangerous skids, and if they come into contact with a spot of dry pavement and thus gain sudden traction, a heavy strain is placed upon the propeller shaft and rear axle.

"Good visibility, always of the utmost importance, is assured in winter driving by the use of defrosting units which are available in several forms at moderate cost. Chains add traction in snow, but they should not be relied upon to take the place of sensible driving as a guard against skidding.

"Besides making for greater highway safety, these suggestions will prolong the life of any car if they are followed the year round. Proper care of the car in cold weather adds immeasurably to driving pleasure. The engine should never be raced, because lubricants flow more slowly when the engine is cold and the stress on engine parts is increased."

**Notice To Trespassers**

The land northwest of town known as the Ray Lemon ranch is posted against all hunting and trespassing. Violators will be punished according to law.

**Her Insurance Claim**

Clerk (to local manager of fire insurance office)—One claim has come in this morning, sir—from that newly married couple we insured last week. She's burned a whole baking of cakes. —Passing Show.

application of the Mexican Government for a permit to land at El Paso was temporarily allowed by the Bureau of Air Commerce in the Department of Commerce. The request was made through the Mexican Embassy and the State Department. It is expected that as soon as complete information is filed by the Department of Commerce, the final approval will be granted.

Many prominent New Mexicans have visited Washington lately. They include: Hon. H. M. Dow of Roswell, Lt. Governor of the State of New Mexico; Dr. Ray Fife, President of the New Mexico State College at Las Cruces; N. B. Phillips, Secretary of the Elephant Butte Irrigation District; J. A. Sweet of Las Cruces; D. F. Stahman of Las Cruces; Dr. Fabian Garcia of the State College; Mr. and Mrs. R. H. Rodgers. Mr. Rodgers is the State Superintendent of Public Instruction.

**Sculpture Placed at New York Fair**

NEW YORK (Special).—This 27-foot figure in decorative relief has not been unveiled in position on the facade of the New York World's Fair Administration Building. The sculptor, Albert Stewart, explains that she is not realism but the expression of the idea behind the \$125,000,000 exposition. As she rises above the cubist skyscrapers of Manhattan she carries with her the veil shrouding the World of Tomorrow. Her uplifted arms are interpreted as a gesture of welcome to visitors. The Administration Building is completed, even to landscaping, and in service as Fair headquarters.

Mrs. Alice Roberts was quite ill last week with tonsillitis but is much improved.

#### East Indian Languages

The term "Prarilit languages" is applied to the vernacular languages of India as opposed to the literary Sanskrit.

Mr. and Mrs. J. E. Farley of Alamogordo spent Thanksgiving day with Dr. and Mrs. R. E. Blaney.

Mr. Pete Johnson left last Sunday for Liberal, Kansas to have the plaster casts removed from his lower limbs which were broken in a wreck at Liberal several weeks ago. Upon removal of the casts it was found that one of his legs has not healed as it should and he may have to remain at Liberal for some time.

### A Germ Today . . .

## A SCOURGE TOMORROW!

Only the skill of a trained scientist can control such things. Modern research has made unnecessary the great plagues which swept Europe in medieval times . . . simply because men have learned how microscopic germs can be checked in their horrible path of destruction.

But bacteriology is only one of the studies which keep scientists busy today. They study the stars and their influence on our world . . . they split the atom to see what gives it energy . . . they discover new methods of making our lives easier and happier.

Yes, their work DOES hold an interest for you, because without the aid of science many of your pleasures, safeguards and comforts would be impossible. Science recognizes its obligation in acquainting the public with its work, hence the world's leading research men contribute regularly to "Keeping Up With Science," a popular feature of this newspaper. It is written in layman's language that you can understand, not in the technical style of the scientist himself. You'll find it one of the most fascinating features of this publication.

**Keeping Up With Science**  
Read It Regularly in This Paper!

### State College To Play Last Football Game

State College, N. Mex., Dec. 1.—With second place in the Border Conference football race tucked under its belt, New Mexico State College is making elaborate preparations for the last game of the season on Saturday, Dec. 4, when the Aggies play Santa Barbara State College on Quesenberry Field at 2:15 p. m.

For color and pageantry, the Santa Barbara game will be the highlight of the year. Governor Clyde Tingley of New Mexico has accepted an invitation to attend the game, and possibly Governor Frank A. Merriam of California will also be present.

The Santa Barbara special train will arrive at State College at 10:00 a. m. Saturday bringing 40 team members, a band of 50 pieces, and several hundred boosters.

All high school students and teachers in New Mexico and El Paso have been invited to attend the game as Aggie guests. One thousand or more fans from El Paso are expected here to see the Aggies battle a team that the Miners tied in a Pacific coast game.

The Alumni Association of State College is sponsoring a free lunch for high school seniors at noon Saturday. Prominent school and civic officials will greet the visitors in Hadley Hall at 1 p. m.

Five to six thousand spectators will jam the football field when the teams line up for the opening whistle.

In the Tempe game, played here on Thanksgiving, the Aggies forged through to a victory of 14 to 0, with Eddie Miller of Clovis and Mert Gillis running wild in the backfield. Of the five Conference games this year, the Aggies have won four to rank just below Texas Tech on the final score card.

### Does Bladder Irregularity GET YOU UP?

Make This Quick Test. Your 25c back in four days if not pleased. Flush the kidneys with juniper oil, buchu leaves, etc., made into green tablets. Help nature drive out waste and excess acids which may cause the irritation that wakes you up, causes scanty flow, burning or backache. Just say Bukets (25c) to any druggist. Locally at Rolland's Drug Store. N 26-D 31

Mrs. C. E. Freeman and daughter, Mary May visited Carl and Rhoda Freeman at State College last Saturday and Sunday.

Mrs. Tommy Thompson, a teacher in the Anthony school enjoyed Thanksgiving with her parents, Mr. and Mrs. W. W. Smith returning to Las Cruces Friday.

### Local and Personal

Messrs. R. D. Kingston and Paul Kingston were Carrizozo business visitors from Capitan last Tuesday.

Mr. and Mrs. George Goodson were shopping in Carrizozo Monday.

Miss Barbara Smith who is attending school in El Paso came home last Wednesday for the Thanksgiving holidays. She returned to school Monday.

Mrs. W. W. Smith and little daughter Helen spent Monday in Alamogordo.

Mr. W. G. Duggar was in town on business last Monday.

Miss Mary Lou Phillips entertained several couples at cards last Friday night.

Tonight, Dec. 3, a big pie supper will be held at Angus. Everybody who can is invited to attend.

Born—To Mr. and Mrs. Ted Purcey on the evening of Nov. 23th a 6½ lb baby boy. He has been named Russell Monroe Purcey, Jr.

A record crowd attended the pie supper and dance at Nopal last Saturday night. Thirty dollars were cleared.

Jobie McPherson and Miss Dorothy Phillips of Roswell spent last Saturday here with friends.

Mrs. J. V. Hobbie, Eliza, Theodore, Wm. Hagee and Bradley Smith spent last Sunday at the Lee Robinson ranch on the Bonito.

County Clerk Edward Penfield spent Monday in El Paso.

Mrs. Chas. Jordan visited relatives in Hobbs from Wednesday of last week until Sunday.

Mr. and Mrs. Johnson Stearns of Tucumanri visited their parents in Carrizozo Thanksgiving. Mrs. Pearl Stearns accompanied them home to spend a few days.

### Stomach Gas

One dose of ADLERIKA quickly relieves gas, flatulence, cleans out bowels and gives you a good appetite. It is safe and entirely gentle and safe.

**ADLERIKA**

Rolland's Drug Store.

### I. O. O. F. Notes

Last Tuesday night the initiatory degree was conferred on Mr. Fred R. Hendrix of Ancho. After initiation, election of officers for the ensuing term was held.

Next Tuesday night the First degree is to be put on. All Odd Fellows are urged to come out and assist in this degree work.

The Carrizozo Woman's Club will hold a Bazaar and baked goods sale Saturday afternoon December 11th at the Carrizozo Hardware Store.

## W. & K. Grocery

Handles Feed, Flour, Potatoes, and a variety of canned goods.

### Special Bargain:

2 packages Swans Down cake flour, and a hand-ome cake plate all for 60c.

Carnation flour contains coupons for many nice prizes.

## 124 DAYS FROM FOUNDATION LINE TO OCCUPANCY AND LAWN MOWING

NEW YORK (Special).—The \$900,000 Administration Building of the New York World's Fair of 1939, already occupied by the headquarters staff, is known as a 124-day wonder. In just so many days, two under schedule, it stood forth completed, with air-cooling system, cafeteria and all facilities in operation. The four-acre plot in which it stands, outside

the barriers of the Central Exhibit Zone, had been thoroughly landscaped. Five architectural firms united in designing the structure which is said to incorporate the most advanced provisions for comfort, efficiency and safety. As the "nerve centre" of the \$125,000,000 exposition, it is today the hub of multiple activities over the 1,216½-acre site.

## EARLY POSITIONS . . .

Hundreds of young people who looked ahead only a few months ago and enrolled for the Draughon Training are now happy in positions of trust and responsibility with broad opportunities for advancement.

How we can help you prepare for similar opportunities, in short time and at small expense -- and then help you secure a good position, will be fully explained if you will mail the Coupon now for Special Information.

U. S.-BRITISH TRADE PACT

Treaty Planned That May Affect International Relations  
... Insistent Demand for Modification of Tax Laws

Representative J. R. Mitchell of Tennessee (left), and Representative Marvin Jones of Texas, chairman of the house agriculture committee, discussing farm problems at a meeting of the committee to draft the new farm bill.

Edward W. Pickard

SUMMARIZES THE WORLD'S WEEK

© Western Newspaper Union

Trade Treaty with Britain

IN WASHINGTON and London it was officially announced that the United States and Great Britain had agreed to negotiate a reciprocal trade treaty, which has been sought by Secretary of State Hull ever since he started his reciprocal program in 1934. The negotiations are expected to begin before the close of the year.

American administration officials believe such a pact may lead to a commercial union of all English-speaking peoples and will be a powerful influence in preserving world peace. London looks upon it as an instrument to form a front which all nations may enter later on conditions of most favored nations reciprocity, and therefore as an indirect reply to the new German-Italian Japanese alliance.

Principles said to be already agreed upon provide that Great Britain would receive reduced American tariffs on textiles and coal.

In return she would grant the United States lower tariffs on foodstuffs, certain raw materials, iron and steel and other essentials of a rearmament program.

Immediate opposition to the proposed pact developed among the statesmen in Washington. Senator James Hamilton Lewis of Illinois, Democratic whip, protested against any British accord until the English pay off their defaulted war debt to the United States. He called the proposed pact "trade treason."

Senator Henry Cabot Lodge, Massachusetts Republican, served notice he would sponsor a resolution halting negotiation of all new trade treaties until congress can determine whether they are responsible for the current business recession.

Representative Allen Treadway, Massachusetts Republican, denounced the proposed treaty as certain to prove disastrous to American business. He warned it would throw more Americans out of their jobs.

Governors Ask Tax Repeal

GOVERNORS of the six New England states, in conference in Boston, adopted resolutions severely criticizing the tax and tariff policies of the administration. They demanded repeal of the capital gains tax and the tax on undistributed corporate profits, and denounced the pending reciprocal trade agreement with Czechoslovakia as imperiling the jobs of thousands of American citizens.

The governors who took this action were Lewis O. Barrows, Republican, Maine; F. P. Murphy, Republican, New Hampshire; George D. Aiken, Republican, Vermont; Charles F. Hurley, Democrat, Massachusetts; Wilbur L. Cross, Democrat, Connecticut; and Robert E. Quinn, Democrat, Rhode Island.

Plotters Alarm Franco

FRANCE was in a great dither over an alleged plot of the Cagouards or "hooded ones," and other rightist groups to overthrow the republican government. The secret police have been making many arrests and have uncovered secret arsenals and depots of the conspirators. Among the men they seized was Jean de la Meuse, wealthy textile manufacturer of Paris. In their pursuit of the plotters the police went as far as Switzerland, persuading the government of that country to oust the count of Paris, who would be heir apparent of the throne of France if there were any longer such an institution. He had been holding conferences with royalists.

After Labor Racketeers

FOR four months Eliot Ness, the young safety director of Cleveland, Ohio, has been investigating labor racketeering in Cleveland, especially in the building trades, and then he made a report of his findings that resulted in a special session of the Cuyahoga county grand jury to hear the stories of scores of business men who allegedly have been terrorized by labor union officials. Ness said these men were prompted to volunteer their information because of the security offered them and the knowledge that many others were prepared to testify.

In addition to protests from business men that they were being shaken down, Ness also had numerous complaints from rank and file union men that their leaders had obtained dictatorial control of the unions and had used it for racketeering purposes.

This resulted in hundreds of men being thrown out of work, impeding legitimate business, and kept hundreds of thousands of dollars in new industries out of the city, the Ness report was said to have stated.

At a meeting of the Cleveland Federation of Labor, Don A. Campbell, president of the Painters' District council, who had been mentioned in connection with the investigation, called the entire case "a lot of newspaper propaganda which has been passed around since the labor movement began," and added that "it's high time this stuff was stopped."

Harrison Backs Water

PREVENTED from considering the pending government reorganization measure by a filibuster against the anti-lynching bill, the senate engaged in a lot of talk about tax revision. Pat Harrison, chairman of the senate finance committee, after conferring with Secretary Morgenthau, declared that additional revenue to compensate for modification of the undistributed profits tax could be raised only by broadening the income tax base or by a general manufacturers' sales tax.

Mention of a sales tax aroused Senator Borah and others, and the Idahoan prodded Harrison until he backed down and said he did not quite mean what he had said.

"If, in the revision of the tax laws, we should lose some revenue, I do not believe, with the spending program that is now going on, that we would help business," Harrison told the senate. "I think the goal should be to try to balance the budget at the first opportunity. I believe the wise way to do it is to curtail some of the emergency expenditures."

Harrison proposed a return to the old normal income tax on corporations and, if necessary, to increase the rate to 18 or 20 per cent instead of the former maximum of 15 1/2 per cent.

Bullet Kills Howard Coffin

HOWARD E. COFFIN, who was chairman of the World War aircraft production board and sponsored the development of the Liberty airplane engine, was found shot to death at his winter home in Sea Island, Ga. Beside his body was a hunting rifle from which one shot had been fired. It was assumed his death was accidental.

Crop Control Opposed

IN ITS annual convention in Harrisburg, Pa., the National Grange voiced opposition to crop control legislation, but named cotton and tobacco as possible exceptions.

"Drastic curtailment of production or destruction of large quantities of food products in the United States," said a resolution adopted by the delegates, "eventually will result in bringing about a condition detrimental to the whole people."

"We believe the problem now facing American agriculture cannot be brought to a satisfactory conclusion by either of these means, but lies in bringing about better distribution systems and increasing the purchasing power of the whole people."

Senators Smith and Byrnes of South Carolina have declared themselves against Secretary Wallace's proposal for processing taxes for cotton and wheat, considering them in reality sales taxes.

Rand Is Acquitted

JAMES H. RAND, JR., president of Remington Rand, Inc., and Pearl L. Bergoff of New York were found not guilty of violation of the Byrnes act by a jury in the United States District court in New Haven, Conn.

The verdict was a blow at the government's first attempt to enforce the act, which forbids the transportation of strikebreakers across state lines with the intent of interfering with peaceful picketing.

Another Judge Wanted

SENATOR MINTURN of Indiana introduced a bill authorizing the President to appoint an additional judge to the United States Circuit Court of Appeals at Chicago. That court has jurisdiction over the seventh circuit, Wisconsin, Illinois and Indiana, and has had one vacancy since the retirement of Judge Samuel Alschuler last year.

Both Senators Lewis and Dieterich of Illinois said they had no candidate for the place.

Now Land Speed Record

CAPT. GEORGE EYSTON of England set a new world record for speed on land when he drove his 24-cylinder automobile, Thunderbolt, two miles on the salt bed speedway in Utah at an average speed of 311.42 miles per hour. This is the fastest man has ever traveled in a motor car.

Chinose Floe from Capital

NANKING, capital of China, was abandoned as the seat of the government because of the rapid advance westward of the Japanese forces. Officials were being scattered in several cities, the central point being Hankow, on the Yangtze 200 miles west of Nanking. One army of the invaders was moving from Shanghai on Nanking, and another was about to attack Tsinan, capital of Shantung province in North China.

China, however, was far from giving up the fight. It was reported in Shanghai that Generalissimo Chiang Kai-Shek had resigned as president of the executive council in order to lead his troops in a final effort to stop the Japanese and win the war. H. H. Kung, it was said, would succeed Chiang in the presidency. He is finance minister.

Thousands of civilians and foreigners were fleeing from Nanking. But military authorities remained there and declared the city would not be surrendered to the Japanese without a desperate fight.

Peace Prize for Cecil

VISCOUNT CECIL of Chelwood has been awarded the Nobel peace prize for 1937. It is worth \$40,000. Lord Cecil was selected because of his work in behalf of the League of Nations, of which he was one of the founders. When informed of the honor he was in New York city receiving an honorary degree of doctor of laws from Columbia university. He had just attended a conference of the World Alliance for International Friendship Through Churches in Washington and was a week-end guest of President Roosevelt. Twelve years ago Lord Cecil, who is seventy-three years old, won the Woodrow Wilson peace prize.

Britain Woos Hitler

VISCOUNT HALIFAX, lord president of the council in the British cabinet, was in Germany ostensibly for the purpose of visiting a hunting exhibition but actually to negotiate with Hitler and other Nazi chiefs for the establishment of more friendly relations between Great Britain and Germany. Public belief was that he was authorized to hint to Hitler that there was hope Germany might regain some of its lost colonies if Germany would abandon its economic isolation and co-operate with other European powers in a revised League of Nations.

The British want to detach Germany, and Italy, too, if possible, from their alliance with Japan. Halifax was a fitting messenger to send to Berlin, for he is an outstanding friend of Germany among British officials.

Juvenile Togs Styled to a Nicety

By CHERIE NICHOLAS

NEVER, no never, have children's winter outfits been so cleverly styled as they are this season. It is not only that each is a "picture" in its bright colors and cunning details, but when it comes to being practical and protective from the elements and snugly "comfy" at all times, as fond mothers insist must be, designers have so painstakingly equipped outfits for the younger generation with "all modern improvements," cruel winds, wet-wet rain, dancing snow flurries, not even Jack Frost himself have even a ghost of a chance to get in.

As pictures speak more eloquently than all the adjectives that might be penned, let's look to our illustration for enlightenment as to what leading designers are turning out in way of children's cold-weather suits for now and the winter to be. Here we see three cunning, and as thoroughly practical as they are attractive, ensembles that all but "stole the show" as the little girls who modeled them came stepping down the runway at a children's style clinic which was held in the Merchandise Mart of Chicago a short time ago, before a vast audience of visiting merchants.

To the fond mother who delights in seeing little daughter look as if she had just stepped out of a fashion plate, the clever ballerina-back legging suit pictured to the left will prove a real find. It is one of the newest models and forecasts what the fashionable little miss will wear through the winter. Of handsome Copenhagen blue sturdy woolen coating it is styled in a novel manner of seeming to achieve a clever ballet flare. The suit has a beaver collar which, of course, will make a hit with any little girl, and crowning glory over all, it has a matching hat with fur trim. The zipped leggings offer every protection from wind and cold.

Dewberry (a new shade this sea-

son, is the color featured in the gorgeous fitted coachman-style coat to the right. Here is a type that will make best-dressed little girls look even better dressed for it carries an air of distinction in its every detail. Has a cape too, and when little daughter's friends see that cape they will be imploring mother to buy them one.

An adorable outfit made of a maize-colored wool of caressing softness costumes the little snow queen centered in the group. She looks just that, what with the fluffy snow-white angora edgings that trim bonnet, coat and muff. Yes, there's a little matching muff as you can see and with what pride and glee the fortunate wearer will call her admirers' attention to this precious possession. And to fill the cup of joy full to overflowing there are dainty little sprays of flowers hand-embroidered in the sweetest colors on the yoke and on the wee muff and on the very flattering matching bonnet.

And, by the way, since cunning winter ensembles for little folks is our theme, if there be a doting relative that longs to bestow upon your child a grand Christmas gift why not just throw a gentle hint to him or her in regard to the fur coat, muff and hat ensembles that are so pridefully shown in this season's juvenile apparel shops and departments. Or if you are thinking in terms of practical school or play-time clothes why not one of the pretty sweaters and suede jerkin sets that come in such attractive colorings? Or a dressier three-piece consisting of velveteen hat, coat and legging set, for legging sets are the big idea this season.

SHIRRED VELVET

By CHERIE NICHOLAS

Not too much or too little, but just right, is this charming frock of velvet. It is in the new "don't dress for dinner" length, correct for bridge club wear or matinee date and then on in to the evening. Soft baby doeskin gloves in plaster pink blend beautifully with the warm winey tones of the velvet. The styling of the gown typifies a leading trend, in that the velvet is snugly shirred and a corselet waistline is accented. Brilliant clips add the glittering note which fashion deems imperative this season.

For Afternoon  
Afternoon blouses for winter are apt to have band or draped collars and back closings. Sleeves are long, and most of them are of the plain, tight variety.

NEW BAGS ARE GAY IN CARVED HANDLES

By CHERIE NICHOLAS  
Suede antelope "mam'selle" handbag trimmed with catalin. Like other items in the fashion category such as apparel, jewelry, hats and even shoes, handbags now have acquired distinctive names indicative of the types they are designed to please. Mam'selle bags, which are now being shown in many shops in black, brown, burgundy and other colors, with carved catalin handles or decorations, are generally jaunty in type but not gaudy and as their names indicate, made especially for mam'selle.

Chic Little Fur Jackets Popular for Street Wear

The cool late autumn days are bringing out by the scores on avenue and boulevard stunning little fur jackets of every fur almost from leopard to aristocratic Persian lamb. The boxy types prevail but there are any number of youthful bolero and waist-depth types. Gray ensembles especially are worked out with gray woollens and brief gray astrakhan jackets. Short fur capes are also very fashionable. Many women are having their coats that have served their time as such made over either into the shorter jacket or a cape.

Lace Veils Now Popular for Evening Headdress

Society women who attend formal affairs are taking enthusiastically to the unique fashion of wearing a charming lace veil thrown picturesquely over the head, secured with a flower spray or feathered ornament or handsome jewel pin. The effect is enchanting. The veils are sometimes edged with sequins, and then again a delicate tracery of embroidery adds to their allure.

Matching Sets  
Leather belts and matching buttons are shown on woolen sports frocks for winter.

What Irvin S. Cobb Thinks about

Sports Broadcasters.

SANTA MONICA, CALIF.—  
Somebody said that there were always two big sporting events—the one Graham McNamee saw and the one that actually took place.

But, alongside the present sports broadcasters, Graham's wildest flight would sound like the dulcet twitters of a timid love bird as compared with the last ravings of John McCullough.

Coaches brag of the lowered percentage of serious football accidents this fall. But oh, think of the radio descriptionists who'll wind up the season suffering from nervous exhaustion, wrecked vocal chords, violent rush of loud words to the mouth, complete collapse, even madness.

You'll be passing the rest cure sanitarium, and, as the windows burst outward, you'll hear pouring forth something like this:

"Oh boy, boy! with one tremendous burst, Irish Goldberg is jamming his way from the red back line right through the black interference! Nothing can stop him!"  
But don't get worked up. What you hear is merely a convalescent microphone orator mentioning a checker game between two fellow-inmates and reverting to form.

Virtues in Snakes.  
SOMETHING I said recently about the folly of killing every snake on sight, without investigating the snake's character, brought a flock of letters from readers who don't like snakes.

Even a so-called venomous snake may have his better side. In Kansas, in the old local option days, you could get a drink only on a doctor's prescription, excepting in case of dire emergency, such as a snake bite. So every properly run drug store kept a rattlesnake on the premises to serve the citizenry. And the only time a drug store rattler ever refused to bite a thirsty stranger was when he was all worn out from accommodating the regular local trade.

And what though it was a snake that led Eve astray in the garden of Eden? He may have brought sin into the world, but wouldn't we have missed a lot of epic reading matter in newspapers if he hadn't?

Yep, I plead guilty to thinking an occasional charitable thought for any decimated and vanishing group. I feel that way about old line Republicans and mustache cups and red woolen pulse-warmers.

Political Predictions.  
WE TAKE the opportunity to announce that the Literary Digest, or rather its journalistic successor, will not conduct a poll on next year's congressional and state elections. The burnt child dreads the poll.

Let others go around taking straw votes, but the way the Digest folks feel now and, in fact, have felt ever since last November, they wouldn't start a canvass to prove that two and two make four. Because, look here—what if it should turn out that two and two merely make some more Marx brothers or a double set of Siamese twins?

Anyhow, the business of basing cocksure predictions on half-baked estimates doesn't seem to be flourishing these days. Figures don't lie, but the citizens who furnish the figures may do so, either unintentionally or just for the sake of a laugh. The rise of candid camerazoning—say, we just thought up that word—proves that a photograph of things as they are is mightier than a lot of loose statistics predicated on what the voters may or may not do—and probably won't, when the time comes.

Forgotten Stars.  
ONCE interviewers clamored for a hearing and her face was on half the magazine covers and her name in letters of flaming light above all the marquees. Once impressive tycoons catered to her temperamental whims; press agents waited upon her, courtiers attending a queen. Autograph seekers besieged her then, while now only bill collectors desire her signature—and they'd like to have it on a check. Speak of her to the newer generation, and somebody will say, "Who? Spell it, please."

She is all through, all washed up. But, like the deaf husband whose wife has slipped, will be the last person in town to hear the news. Having traveled a road which issues mighty few round-trip tickets, she still dreams of a come-back. She is the most tragic and the most pitiable figure—and one of the commonest—to be found in the place called Hollywood. She is, by one of the host, men and women, who, ten years ago, or even five, were glittering stars in movieland.

# CATTLE KINGDOM

By ALAN LEMAY

© Alan LeMay  
WNU Service

SYNOPSIS

Billy Wheeler, wealthy young cattleman, arrives at the 94 ranch, summoned by his friend Horse Dunn, its elderly and quick-tempered owner, because of a mysterious murder. Billy is in love with Dunn's niece Marian, whom he has not seen for two years. She had rejected his suit and is still aloof. Dunn's ranch is surrounded by enemies, including Link Bender, Pinto Halliday and Sam Caldwell, whom he has defeated in his efforts to build a cattle kingdom. Dunn directs his cowhands, Val Douglas, Tulare Callahan and others to search for the killer's horse. He explains to Billy that the morning before he had come upon bloodstained ground at Short Creek and found the trail of a shed and used horse. The shed horse's rider had been killed. The body had disappeared. Link Bender had arrived at the scene and read the signs the way he had. Dunn reveals that because of a financial crisis the ranch may be in jeopardy; his enemies may make trouble, since Sheriff Walt Amos is friendly with them. He says he has asked Old Man Coffee, the country's best trailer, to join them. Dunn and Billy meet Amos, Link Bender, his son "the Kid" and Cayuse Cayetano, an Indian trailer, at Short Creek. Bender has found the slaver's horse, but the saddle is missing. Almost supernaturally, cattle attracted to the scene by the blood-stained ground stamp out all the traces. Dunn is angered when Amos tells him not to leave the county. Following an argument, Bender draws his gun, but Dunn wounds him in the arm. Back at the ranch Old Man Coffee arrives with a pack of bounds. Coffee goes in search of the dead man's saddle. Dunn tells Billy that Marian is incensed at him for trying to settle disputes by bloodshed. He reveals that the ranch is really hers, also that he recently sold his own ranch in Arizona and that his partner, Bob Flagg, is en route with the money. Billy accompanies Marian on a ride to Short Creek. "the Kid" Bender now a deputy, rides up. They have an argument, and by a trick Bender tries to shoot him. Billy saves himself by plunging against Bender's pony and "the Kid" is injured. Coffee enters the ranch with the saddle and reveals that Cayuse Cayetano is on the trail for Sheriff Amos. The saddle belonged to Lon Magoon, a small-time cattle thief. Billy learns he is to be arrested for assaulting "the Kid" Bender.

CHAPTER IV—Continued

"I am looking at it. Seems like to me, Horse, the game is a little different from that. He may be laying off of you because his crowd has a little different plan for you. I'll say right here, this cure makes it look to me like they must have a case against you on the murder of Lon Magoon—a case we maybe can begin worrying about."

"Then why do they turn and jump on Billy Wheeler?"

"It might be because Billy Wheeler is kind of strong as a cattleman. I'm speaking of bank strength. I don't know anything about how Billy Wheeler stands in this mess. But it may be they think he might work out as an ace card in patching up the finances of the 94. That being the case, naturally they'd like nothing better than to set him aside to cool for 30 days. A man can't read his facts unless he looks a little into the people situation. It cure begins to look," said Old Man Coffee, "as if I'm going to have to go to Inspiration for this trial."

"No," said Horse Dunn. "Because there isn't going to be any trial."

Marian Dunn said sharply. "What do you mean?"

For once Horse Dunn failed to wilt before the stare-up of his niece. "I won't stand for it," he declared. "I've stood enough! They'll take Billy Wheeler no place."

"I think," Marian Dunn said "you must be mad!"

"Mad, is it? Mad or no mad, the coyote pack will never take Billy Wheeler in."

"There's this about it, Mr. Dunn, Val Douglas drawled. "We're coming up against bigger things here than an open fight over whether or not this Wheeler will stand up and take his medicine for busting the Kid's leg. After all, there's something in what your niece says. Tulare says that tonight or tomorrow Amos can raise up a posse of a hundred. We'd look good trying to bronc-stomp a hundred men."

Horse Dunn bellowed, "You stand there and tell me—"

Billy Wheeler cut in. "He's right, Horse."

"What?"

Billy Wheeler looked Val Douglas over coolly. "Val doesn't strike me like a feller that would be right very often," he said at last. "But this ought to raise his percentage, I guess. I'm going to leave 'em take me, Horse."

"You'd do nothing of the kind," Horse Dunn told him. "I'm boss here!"

Billy Wheeler sprawled relaxed, as if he were resting, and met Dunn's glare evenly. If the other's there did not understand why the Old Man of the 94 turned to this youngster more readily than to any one else in time of need, they could have learned something about that by looking at them now.

"I don't know as you can stop me, Horse," Wheeler said.

The day was hardly breaking when Sheriff Walt Amos came hammering at the door.

CHAPTER V

The sheriff came alone, without show of force. Wheeler's surrender he outwardly took as a matter of course; though a close observer might have detected a certain pleased relief.

It was nearly six in the morning as they rolled down the dusty rut-

toward the first test of strength since the killing at Short Creek. Three cars drove to Inspiration, for Billy Wheeler had reserved certain privileges of free action; and the sheriff returned to Inspiration alone in his own car, as he had come. A second car was driven by Horse Dunn, who took with him Gil Baker, Steve Hurley, and Tulare Callahan; and—what seemed more important—Marian Dunn, between Val Douglas and her huge uncle in the front seat. The Old Man of the 94 was possessed by a vague persistent hope that somewhere, some time, Marian would see something which would change her opinions as to the balance of force and justice in the Red Hills range.

Old Man Coffee rode with Billy Wheeler, who drove his own roadster. "There in that one car," said Coffee, watching Horse Dunn's tower of dust, "goes all that's left of the 94 outfit; except for you and me, who don't really belong here."

Billy Wheeler nodded. "I couldn't hardly believe," he said, "that Horse was trying to run 20,000 head of cattle, even through the quiet months, with only four men and himself."

"He's got 20,000 head, has he?" "The book count shows 20,000 head. Allowing for death losses, he supposes he's got 14 to 16 thousand. Short-handed as he is, he can't be right sure."

"I've seen the day," Old Man Coffee said, "two, three years ago,

'For One Thing—Magoon Wasn't Killed by No Man on a Horse!'

when the 94 bunkhouse never held less than 12 or 15 hands. And in roundup times I've seen better than 50 riders follow the 94 wagons. But I guess those days are gone."

Coffee suggested that Horse Dunn was getting old. "It's hard for us old fellows to bend to new ways of handling cows—or men. But Horse Dunn might just as well get ready to realize he has to. He's forced his way for a long time; but comes a time when he can't force it no more."

"And that," Wheeler said, "is what we've got to save him from. For God knows he'll never bow his head! It's up to you, more's any body."

"Don't count on me."

That was Old Man Coffee's attitude. Because of his uncommon sixth sense in handling a trail and because of his widely heard-of luck in making shrewd deductions, Old Man Coffee had been called in on many a mystery killing in the intermountain country. But though he worked hard without cost to any one, he stubbornly avoided an official responsibility. "I got nothing to do with it." That was the Coffee theme song on a murder case.

But now he added, "Something's wrong. When I first looked at this case I thought it was open and shut. But something's the matter with this case. Somebody knows something they're not telling me."

Billy Wheeler waited, but the information which silence would have brought from most men was long in coming.

"People in this country is going to the dogs," Coffee complained. "Take you. Your old father had a pair of eyes that could find out the devil through the smoke of hell. But you—you ain't got any eyes. I not only got to do your thinking for you. I also got to see for you and hear for you and ride for you. I'll give you just a sample."

An ironic amusement faintly altered Old Man Coffee's gaunt face. "Answer me one question," he said now. "What weapon killed Lon Magoon?"

Billy Wheeler looked at Coffee sidelong, and for a moment he hesitated. "Lon Magoon," he said, "was killed by a shotgun. Is that what you wanted to know?"

"Part. What else?"

"It was fired from in front of him, a little to his right-hand side, by a man on a horse."

"What else?"

"The shell was home-loaded. And that's all I know, yet."

Old Man Coffee was regarding Wheeler with a peculiar fixed expression. "Son," he said at last, "I back down; I'm free to admit I had you wrong. You're further along the trail than most of 'em. You got the shotgun right, at least. I suppose you see that one shot pellet bogged into the seam of the leather on Lon Magoon's saddle horn?"

"Yes; I saw it."

"That little pellet is pretty well hid. I guess nobody saw it but you and me. But the rest of your dope's wrong. For one thing—Magoon wasn't killed by no man on a horse!"

"How do you know that?"

"How did you know the shell was home-loaded?"

"Because the charge was weak. The sign showed the horses was close together when the shot was fired. If the charge hadn't been weak that pellet of lead would have plowed a whole lot deeper than it did."

Old Man Coffee nodded approval. "A good catch," he said. "But I think you got it wrong. If the charge had been fired from close like you say, the killer could have rammed the long shotgun barrel plumb against Magoon—there wouldn't have been no shot in the saddle horn. It was distance slowed that pellet. Lon Magoon was shot by a third man, from up on the flat ground above the cut!"

"Seems like," Wheeler objected, "the trail of the third man should have showed up, somewhere about."

"Maybe; if it had been read proper before the cattle paved out the sign. But—there's one man mixed into this that knows too much about trails to have left one himself—even if he'd been there." They fell silent, while the hard-working engine threw the rack of the road behind them in big spasms and gouts of dust; and far ahead presently showed the faint disturbance on the plain which was Inspiration.

Inspiration consisted principally of a main street, backed by a few score houses, some of them neatly painted, with a tree or two; many simply unpainted shacks.

To a stranger the town would not have seemed so full of people as Tulare Callahan's report perhaps suggested. But Billy Wheeler at once recognized a dozen or more cars which would not ordinarily have been there, and about an equal number of dozing cow ponies. And—as the 94 cars pulled up in front of the little frame building that housed the county office—Wheeler noticed a small inconspicuous stir in doorways, a too casual moving together of spur-heeled loungers at two or three places along the street.

Billy Wheeler caught Horse Dunn's signal as he slid his roadster to a stop. He stepped down from the wheel and walked forward to Dunn's car.

"We want to all kind of keep together, here, as we move into this," Horse Dunn said casually. "I don't think there's going to be any trouble of any kind. Still—I wish Bob Flagg had got here. There aren't so many of us as there has been some years."

The sheriff pulled up and stepped to the sidewalk.

"Court won't open yet for a little bit," he said. "You, Wheeler, park yourself around here close. You're lucky not to be in the lock-up, by God! You, Dunn, I'll speak to you inside. I've got a couple of questions I figure to ask."

"All right," Horse Dunn said. "Come on, folks."

"The rest of you stay outside," Sheriff Amos said. "You're the one I aim to talk to, Dunn."

Horse Dunn looked up and down the street, noting how the groups of booted loungers had grown. Hardly a doorway in that street was empty now. Wheeler saw Dunn run a quick glance along the second story windows across the street. Dunn turned to his car, relaxed, casual.

"Marian, take this here car around the corner, and park it; then wait there, until someone brings word."

Marian glanced once, questioning, at her uncle, then once more, almost despairingly, at Billy Wheeler. Then the car lumbered away in the dust as she obeyed.

Horse Dunn turned with a curious mildness to the sheriff. "I don't figure to give any answers, Amos, that I wouldn't just as leave my outfit would hear."

"The Old Man of the 94 stood square-planted—smiling a little, almost bland; but the confidence of a lifelong dominance was in the easy set of his enormous shoulders, so that he seemed then bigger than the town, bigger than the range."

The sheriff hesitated; he knew what he was up against. Abruptly he burst out, "I decide these things here!"

The mild mask fell away. "Then give your orders to people you can boss," Dunn snarled at him.

Walt Amos sized up the situation, then stood for a moment with a blank face. Then—the young sheriff grinned, not sheepishly, and not irritably, but with the interested humor of a man who plays his own game against another's.

"Oh, all right, Dunn," he said; "I don't set any great store on that point. I haven't got any of my fellows with me—I don't need 'em; but maybe you need some. Bring 'em on!"

In effect, Horse Dunn had backed Sheriff Walt Amos down; but Horse admitted afterward that it was here, in the backdown, that the young sheriff had first commanded his respect. He granted an assent. "Billy Wheeler, Coffee—come on."

The others moved forward, but he waved them back; and Dunn, with Wheeler and Coffee, followed Amos into the little old adobe that held the sheriff's office.

"Dunn," said Sheriff Amos, "you were the first man found out there'd been a killing at Short Creek. That was Tuesday—three days ago. Right off you sent Tulare Callahan here to wire Old Man Coffee, clear around at McTarnahan. Dunn, why did you send for Old Man Coffee?"

"I sent for Old Man Coffee," said Dunn, "to find out who was making free on my range. To tell you the truth, I didn't figure you numbskulls was equal to handling it."

"Then it wasn't your idea," said the sheriff, "to get him here to seize and suppress evidence?"

"When I want to seize something," Horse Dunn told him, "I won't be sending for some old guy the other side of two ranges of mountains. I'll just seize it."

"Where were you riding Monday Dunn?"

"Monday I was riding Red Sleat Ridge."

"And when," the sheriff shot at him, "did you first learn that Lon Magoon was camping on 94 range?"

Horse Dunn did not hesitate for a fraction of a second. "Yesterday—when Old Man Coffee found Magoon's saddle."

The sheriff's smooth, cornerless face tightened a little, but Billy Wheeler saw that the man was not surprised. Instantly Wheeler knew two things. First, that one of the inspiration crowd—perhaps with field glasses—must have seen Coffee pick the saddle up. And second that was equally important, that the sheriff must have succeeded in tracing out the dead man's horse—and had identified it as belonging to the little cow thief, Magoon.

(TO BE CONTINUED)

## Fish, Not Monkey, Man's Ancestor, Is Claim of Professor of Neuro-Anatomy

This may come as something of a disappointment to monkeys, but it now appears that the human race did not descend from an ape, but from a fish, writes a New York United Press correspondent.

And if all goes well, man's own descendants will not be man as he is today, but gnome-like creatures with undershot jaws, probably spindly legs and an enormous dome-like head.

This information was conveyed to a gathering of 150 learned men at Columbia university, by Dr. Frederick Tilney, professor of neuro-anatomy and an expert on the evolution of the shape of a man's head.

It all goes back to a "crossopterigian"—a kind of fish that did its thinking—with its feet. If the crossopterigian had not come along, man might still be a fish, according to the professor.

"Fish," he explained, "possess a limited power to withhold their reactions. They are highly impulsive. One day millions of years ago an-

impulsive fish—the crossopterigian—"managed to crawl out of the water," and that was the beginning of brain structure, and ultimately of the human race.

Dr. Tilney advised evolutionary students to study the brain as the real organ of evolution, and he said this would lead back to the "walking fish."

"No scientist today believes that any living monkeys or apes are ancestral to man," he said. "These animals belong to families totally divergent from the human family. Whatever interest there is in evolution therefore should not center in the ape."

"The true line of our ancestry reaches millions of years farther back. Evolution of the human race leads—from fish to man."

John Marshall's Training  
John Marshall, who became Chief Justice of the United States, had no college training except a few lectures on law and natural philosophy at William and Mary in 1773 or 1780.

## In Step With Santa Claus

### KEEPING up with the Joneses

is easy—it's keeping up with Santa Claus that has Sew-Your-Own in stitches currently. We got a peek at his wares, though, and frankly we copied some of his artistry. (You can see for yourself there's a "Christmasy look" about today's trio of fashions.) And happily you can do more than look and wish—you can make them realities the easy way: just sew, Sew-Your-Own!

Cute and Cozy.  
Look your prettiest in leisure or on the job in the lusciously feminine house coat above, to the left. Made in handsome silk crepe or very lightweight corduroy it is as cozy as a love seat before an open fire. Make it either in the short length (see inset) or regular dress length.

Feminine Flattery.  
Polish yourself off in a brilliantly styled new frock for the holidays just ahead. Sew-Your-Own's newest success (above center) will be your success once you wear it in the public eye. It is

most gifted in its distinctive design, below-waist slimmness, and all-of-a-piece simplicity. Make your version the very essence of chic in sheer wool or satin, in your most flattering color.

A Blouse or Two.  
Tops in the fashion picture just now is that friendly little item—the blouse. A completely engaging one is shown here for women who sew. Wear it tucked in or peplum style. And here's a practical idea: you have a choice in sleeve lengths. For variety's sake, why not make the long sleeved model in silk crepe for dress; the short sleeved one in jersey for sports and all occasion wear?

The Patterns.  
Pattern 1412 is designed for sizes 32 to 42. Size 34 requires 4 1/2 yards of 39-inch material and 1/2 yard for contrast. Short length requires 4 1/2 yards.

Pattern 1394 is designed for sizes 14 to 20 (32 to 42 bust). Size 16 requires 2 1/2 yards of 54 inch fabric.

Pattern 1417 is designed for sizes 34 to 44. Size 36 requires 2 1/2 yards of 39-inch material, with short sleeves, 1 1/2 yards.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in cents) each.

New Pattern Book.  
Send 15 cents for the Barbara Bell Fall and Winter Pattern Book. Make yourself attractive, practical and becoming clothes, selecting designs from the Barbara Bell well-planned, easy-to-make patterns.

6 Bell Syndicate WNU Service.

### HOUSEHOLD QUESTIONS

Concerning Mirrors.—Never hang a mirror where it faces a glare of light. The back of the mirror should be protected so that no light or water could possibly enter.

Ripening Bananas.—Green bananas can be ripened by placing them in a paper bag and keeping them in a dark closet for a day or two.

Cleaning Brassware.—Brass ornaments should be put into hot soapy water to which soda has been added and scrubbed with a soft brush to remove any polish that may have stuck in previous cleanings. Finish off by rinsing with clean hot water and dry with a soft cloth.

Improving Vegetables.—Sugar, added in the proportion of a fourth of a teaspoon to two cups of vegetables, will improve the flavor of cooked corn, beets, peas and lima beans.

When Mending Gloves.—Slip a thumb on your finger when mending gloves and the darn can be made very easily.

### Increased by Advertising

In 1869 the per unit of population value of manufactured products in America amounted to \$89.60. For the year 1929 the per unit of population value of manufactured products had increased to a total of \$579.70. Advertising created the demand that called for the employment of three to four times the number of workers and reduced the cost of products to consumers.

For three generations one woman has told another how to go "smiling through" with Lydia E. Pinkham's Vegetable Compound. It helps Nature tone up the system, thus lessening the discomforts from the menstrual disorders which women must endure in the three decades of life: 1. Tending from girlhood to womanhood. 2. Preparing for motherhood. 3. Approaching "middle age."

Don't be a three-quarter wife, take LYDIA E. PINKHAM'S VEGETABLE COMPOUND and "Go Smiling Through."

### YOU CAN THROW CARDS

IN HIS FACE ONCE TOO OFTEN

WHEN you have those awful cramps, when your nerves are all on edge—don't take it out on the man you love.

Your husband can't possibly know how you feel for the simple reason that he is a man.

A three-quarter wife may be no wife at all if she nags her husband seven days out of every month.

For three generations one woman has told another how to go "smiling through" with Lydia E. Pinkham's Vegetable Compound. It helps Nature tone up the system, thus lessening the discomforts from the menstrual disorders which women must endure in the three decades of life: 1. Tending from girlhood to womanhood. 2. Preparing for motherhood. 3. Approaching "middle age."

## Aisle of Woman's Dreams

Suppose you knew that one aisle of one floor in one store had everything you needed to purchase!

Suppose that on that aisle you could buy household necessities, smart clothing, thrilling gifts for bride, graduate, voyager! How much walking that would save! How much time, trouble and fretful shopping you would be spared!

That, in effect, is what advertisements in this paper can do for you. They bring all the needs of your daily life into review... in one convenient place. Shop from your easy-chair, with the advertisements. Keep abreast of bargains, instead of chasing them. Spend time in your newspaper to save time—and money—in the stores.

# NOTICE to OUR Retail Trade

We will hold our usual drawing on  
**Dec. 23, 1937**  
2:30 P. M.

Prizes to be given are as follows:  
1st, Walnut Veneered Cedar Chest  
2nd, Choice of Kitchen Cabinet or  
Bridge Set consisting of table and  
3rd, \$5.00 in Cash.

For each \$1.00 worth of merchandise you buy for cash between now and the above date, and for each dollar paid on account, you will get a ticket which entitles you to a chance on the drawing.

WE are already displaying our CHRISTMAS TOYS. Our stock is large and assorted. Also have a large variety of suitable Gifts for every member of the family.

Our Prices are Reasonable

### Local and Personal

Mrs. Jeff Herron and children were here for the Thanksgiving holidays.

A number of out-of-town people attended the Lyric theatre here Sunday night.

Messrs. J. H. Fulmer and John Wright left Wednesday for Roswell and Clovis to attend to some business matters.

Dr. Godfrey, state director of public health, and Mr. Chas. M. Cree, director of education in the state health department, made an official visit here Wednesday, meeting with the County nurse, Miss Birkland, and the clerk of the department, Mrs. Shearer.

The Lincoln County Teachers' Association will be held in Lincoln December 10th and 11th. Program will be announced next week.

Mr. and Mrs. Bill Renick of Socorro were guests of Tommy Cook and family last Saturday.

The White Oaks Ladies' Aid Society met yesterday to arrange for their Christmas program. The Ladies' Aid is indeed a live wire. They have many interesting meetings and accomplish much good.

The addition which Mr. Vidauri had built to the residence occupied by Mr. and Mrs. Salvador Ortiz has been finished. Mr. James Gatewood was the contractor.

The American Legion and Auxilliary Unit are sponsoring a dance to be held at Community Hall on Dec. 4th. All proceeds will go for gifts and entertainment for the children to be held at Community Hall Wed. night Dec. 22nd.

Mr. Ted Purcey made a business trip to El Paso yesterday. He was accompanied by his sister, Miss Jay Romero.

Mr. and Mrs. W. W. Smith and family moved back to White Oaks this week.

R. L. Huffmyer has the job of driving the White Oaks school bus, which was put on December 1st.

Mr. James Duncan is the new truck driver for Herron's Grocery store.

The Titsworth Company at Capitan have on hand a magnificent stock of Christmas goods appropriate for gifts to anyone, and quite reasonably priced. New shipments are arriving daily and they invite your inspection of the entire line. With each \$1.00 spent you receive a ticket which entitles you to a chance on several fine prizes. Read their ad for further particulars.

Mr. Lell St. John came from Albuquerque Thursday, then left immediately for Fort Stanton to visit his sister, Mrs. Andy Padilla, who is in the Ft. Stanton hospital.

Mr. E. G. Gallegos was at San Patricio Tuesday to attend the funeral services of Mr. Refugio Torres.

A good roads meeting was held in Capitan last Wednesday night to discuss plans for a highway from Capitan to Ruidoso.

Mr. Parker of Ancho was transacting business in Carrizozo yesterday.

The new library building next to the city hall will soon be ready for occupancy.

**FOR SALE:**—or trade 30 Victor wolf traps, good as new. Also one 2 wheel trailer.—Western Lumber Co.

Mrs. J. V. Hobbie and daughter, Eliza were El Paso visitors today.

Theodore Hobbie went to Capitan and Ruidoso on business yesterday.

The pupils of Miss Gerda Smith honored her with a fruit shower this afternoon.

Mr. and Mrs. Bob Cook moved yesterday, to a ranch near Magdalena.

### Editor Returns

From California

While in California last week, the editor of the News and two daughters, Nellie Lee and Catherine visited Mrs. Mary Strauss at Fresno also her daughter and son-in-law, Mr. and Mrs. Johnnie Orndoff, and we would not forget Johnnie, Jr., who is a bright, handsome, friendly baby. Mrs. Strauss has charge of a beauty parlor in Fresno, with several operators under her.

Other former Carrizozo people whom we saw, were Mrs. Elliott and Margaret in Los Angeles; Mr. and Mrs. Grant Bobier and three children at Glendale, Mrs. Bobier was the former Miss Lalia Peek, who lived here with her parents until her marriage in 1914 and Mr. and Mrs. Albert Channell and son, Jr., who live in Visalia.

We were gone nine days and covered about 2,500 miles; traveled up the coast route on Highway 101, which was cold and foggy, came back on Highway 99, then followed 66 through the desert, by Mojave, Needles, Kingman, Gallup and home.

Things in California apparently are flourishing—bumper crops and an air of irresponsibility. However nothing looked half so beautiful as New Mexico. Our mountains are lovelier, our climate is more comfortable; we have no depressing fogs. Our flowers, while not so abundant, are as splendidly colored.

I must not fail to mention the landslide. While driving along viewing the beauties of the state, suddenly we came upon some large signs which said—"Landslide District, Dangerous but passable"—This made us feel as if the next hill we went past might fall upon us or start sliding towards the ocean. Later we saw from a distance where the landslide with its many tons of rock and debris was. The state highway department of California decided it would be cheaper to build a highway around the landslide than to remove the enormous pile. The state has many beautiful advantages, but to our way of thinking New Mexico is superior in many ways. At least, it is good enough for us.

Mr. Pete Johnson returned Thursday from a trip to the Liberal hospital. One of the casts could not be removed as the leg had not healed properly.

Dorothy Hoffman, as the girl receiving highest averages in the grade school for the passed six weeks, won the Lyric theatre ticket, and Arthur Holguin won the ticket for boys. The Lyric management offers these tickets to the grade school each six weeks. The winners are to be congratulated.

Monday, while handling some dynamite, Horace Smith, keeper of the Eagle Creek Lodge got two of his fingers blown off.

IN THE PROBATE COURT OF LINCOLN COUNTY, STATE OF NEW MEXICO

In The Matter of the Last Will and Testament of John W. Owen, Deceased. No. 435

### Notice

To Whom It May Concern:

Notice is hereby given that an instrument purporting to be the Last Will and Testament of John W. Owen Deceased, has been filed for probate in the Probate Court of Lincoln County, New Mexico, and by order, the 18th day of December, 1937, at the hour of 10:00 A. M., at the court room of said court in the Village of Carrizozo, New Mexico, is the day, time and place for hearing proof of said Last Will and Testament.

Therefore any person or persons wishing to enter objections to the probating of said Last Will and Testament are hereby notified to file their objections in the office of the County Clerk of Lincoln County, on or before the time set for hearing.

Dated at Carrizozo, N. M., this 17th day of November, 1937.  
(Seal) Edward Penfield,  
Nov. 19, 1937. Probate Clerk.  
Dec. 10, 1937.
