CARRIZOZO, NEW MEXICO, FRIDAY, JULY 15, 1938

NUMBER 3

New Mexico Livestock and Range Report--July 1, 1938

RANGES: There was a general improvement in the ranges over New Mexico in all counties of the state from rain beginning about June 22 and continuing for about 10 days. A below-normal amount of precipitation during April, May and early June had caused a drouth situation that was becoming more serious each day. With few exceptions, recent rains have improved very materially the prospects for summer ranges. Because of the dry condition of the soil, it will be necessary to have early rains to continue the growth of irrigated sections; but in the dry-land counties where planting has been delayed because of insufficient soil moisture, there may develop some shortage in feed for this season. The grasshopper infestation counties has been very materially checked by the campaign waged by different organizations, although the danger is not over. The damage to ranges will be materially overcome by sufficient rainfall. The condition of ranges is reported at 80 per cent of normal as compared with 72 per cent last month and 82.2 per cent for the average of the past 10 years.

CATTLE & CALVES: There has been some improvement in condition of cattle and calves over that of a month ago. Improvement in range feed from rains beginning late in June has had much to do with the improvement in the general condition of cattle. In many localities the calves have become thin and were making very little progress in weight. The calf crop is possibly smaller than a year ago with losses of this year's calves a little heavier up to this time than for the past two years. The prospects for grass-fat cattle for fall marketing are not as good as the past two years, unless sufficient rainfall will continue improving range feed. The shipments of cattle during recent weeks have been light but there have been several reports of inquiries for young stock, especially yearlings at strong prices. The condition of cattle and calves is reported at 81 per cent of normal as compared

Griffin Items

The good rain we received Monday has helped the grass for the ranchers. The cows are all doing better.

Mr. Harold Dean, of Bingham, made a business trip to Carrizozo Monday.

Messrs Frenchie and Shorty McNabb, who have been in Kansas for several weeks, came home last week end.

Mrs. J. T. McNabb has been on the sick list for several days.

Mrs. M. Griffin and son, Alvin, went to Lamesa, Texas, last Tuesday to take Mrs. Griffin's mother, Mrs. Hutcherson, home. They returned Sunday.

Mrs. J. P. Glover spent Sunday with Mrs. J. T. McNabb and Jean.

Mr. Alvin-Griffin spent Monday with Mr. and Mrs. B. L. Moore of White Oaks.

Mrs. N. F. Hefner and daughter, Ruby, of LaLuz, are visiting Mr. Hefner and boys near Griffin store.

Misses June and Marie Cooper were visitors with Mrs. Griffin Tuesday.

Road conditions are good.

ed with 72 per cent last month and 84.6 per cent for the average of the past 10 years.

SHEEP & LAMBS: There has been a general improvement in the condition of sheep and lambs because of improvement in range feed from recent rains. Losses of lambs generally are not great, but with the increased drouth condition deaths were occurring in greater numbers. Losses of ewes were reported as being somewhat greater during the spring than during the winter months. The lamb crop generally is somewhat shorter than those of the past two years. The number of dry ewes is reported as about the same as a year ago. Most of the wool has been shorn with much of it being secured by government loans. Recent sales were reported somewhat lower than those from a month to six weeks ago. No contracts of lambs for future delivery have been reported, but offers for lambs for fall delivery have been reported at 5c-5 1/2c. The condition of sheep and lambs is reported at 83 per cent of normal as compared with 79 per cent last month and 86.0 per cent for the average of the past 10 years.

LINCOLN CO., Picocho: Had best rains in years; probably enough to make winter feed. Good lamb crop; sheep and lamb losses small. General outlook for the development of the lamb and calf crops good. Ancho: April, May and early June dry. June 28 and 29 one-inch rain and few showers; grass stand fair to thin; needs lots of rain. Lamb crop light. Lamb losses heavy in some cases; sheep losses light.

FRED DANIELS,
Agricultural Statistician.
Isaquiio Gonzalez.

Mrs. Rosa Arrieta de Nunez of San Patricio was in town on business connected with the estate of her father Isaquiio Gonzales, who passed away on Friday, July 1st 1938. His funeral was conducted at San Patricio Saturday, July 2nd. Besides his widow, Mr. Gonzales is survived by three daughters.

Farus--Ward

Constance Farus and Connelly C. Ward, both of Ruidoso were married here Saturday morning by Rev. J. C. Vandiver, pastor of the Baptist Church.

Budget Meeting

The County Commissioners and the representatives from the state tax commission are holding a budget meeting here today.

Mr. E. A. Bellinger, of Tularosa, accompanied by his two sons, Paul and Junior, was in Carrizozo Tuesday, on business in connection with his store here.

Revival Meeting

July 12th, Dr. Geo. Shearer and Rev. H. H. Nance will be with us to hold a series of meetings. Everyone is invited to come and help in this campaign for a higher and better life.

R. A. Crawford, P. C.

Methodist Church

At the Methodist Church S. S. 10, o'clock every Sabbath Mrs. R. E. Lemon, Supt. Preaching every 2nd and 4th Sunday mornings at 11 o'clock.

Services every Sunday evening at 8 o'clock.

Every one welcome.

R. A. Crawford, P. C.

Citizens Military Training Camp

Headquarters, Fort Bliss, Texas. July 6, 1938. The C. M. T. C., Fort Bliss, Texas, opened on July 1st, 1938. The camp will be in operation for a period of thirty days. One hundred and Sixty Candidates have been enrolled. The Candidates will be given training in horsemanship, marksmanship, Cavalry weapons and Artillery weapons. Medals will be awarded to candidates who excel in Athletics at the end of camp. Parents' and visitors' day will be on July 20th, when a horsecow, track and swimming meet will be held.

The following candidates are attending from Corona, New Mexico: Don D. Cato, Willis P. Cato, Elliott Jones, Roy J. Rogers, Henry F. Kilpatrick, Paul S. Hamilton, Fenner D. Jones, Tom W. Keelin, Eugenio Lueras. From Carrizozo, C. Bradley Smith, Aubrey Hines, Walter Fulmer, and George Sanchez, H. T. Cherry, Jr., 1st Lieut, 8th Cavalry, Adjutant.

Candy Shop Sold

Wayne Zumwalt sold the retail business of the Candy Shop to "Red" Eaker last Monday morning and the entire stock and fixtures were moved the same afternoon into Paden's drug store, which Mr. Eaker purchased July 1st.

Wayne intends to retain his wholesale candy business.

ANCHO NEWS

Mr. and Mrs. J. M. Frame spent last week at their home in Ancho, but returned to their Ruidoso Cabin Sunday.

Mrs. O. M. Holmes and children of San Mateo, Calif. is visiting her brother Jimmie Garner and family of Ancho and her parents Mr. and Mrs. Garner of Carrizozo.

Mr. John Straley came out winner in a race to Carrizozo with old Bird Stork Saturday morning, where Mrs. Straley presented him with a 7 pound girl shortly after his arrival at the Turner hospital. Mother and daughter are doing fine.

Mr. and Mrs. Henry Dale and little Betty Joy are located north of Luna for some time where Mr. Dale is working with Mr. Hall building a large tank for the Straley Brothers.

Mr. and Mrs. Guthrie are the proud parents of a fine boy born at the Turner hospital last Tuesday at Carrizozo. Both are doing fine.

Mrs. Belle Collier is visiting the Cleghorn and Collier families of White Oaks for two weeks.

Mr. and Mrs. "Red" Hobbs were in from their ranch this week, shopping and visiting friends.

Mr. L. P. Hall and family visited Mr. Hall's brother and family at Capitan Thursday of

Lyric Theatre Installs New Seats

Mr. and Mrs. R. A. Walker, the forward looking operators of the Lyric theatre, installed 340 new, luxurious leather-cushioned seats in the Lyric yesterday. This show has always been popular, but as each new improvement is added it becomes more so. Mr. Walker had the building air conditioned and now since the last improvement the Lyric has "every little thing" to make it a delightful place for an evening's entertainment.

Scotch Golf Tourney

Twenty couples took part last Sunday in the Scotch golf tournament which was put on by the members of the Carrizozo Country Club.

Mr. Shaw of the Girls Camp and Mrs. Evelyn Dixon won the tournament with a 48. The required one extra hole played off with Will Ed Harris and Mrs. Leo Ortz, who also won with a 48.

Johnson Stearns and Mrs. Robinson of the Girls camp broke all course records with a score of 84 for consolation. A searching party sent out after the match was over found them coming up No. 9 Fairway; then lanterns were put on No. 9 Greens so they could finish the match.

Everyone had such an enjoyable time that the tournament committee will hold another match just as soon as the grounds committee can get the course back in proper condition for the affair. Date will be announced later.

last week.

Mr. E. M. Brickley visited Mr. J. C. Brickley at Luna Saturday evening. Then drove on to Vaughn where he met Mrs. Brickley on her way home from a visit to Kansas.

Mr. and Mrs. Bryan Hightower were at Luna Tuesday morning on business.

Mr. Geo. Roberts spent last Friday and Saturday surveying his land at Coyote.

Mrs. W. Balow has been on the sick list the past two weeks.

Mr. and Mrs. Bell of Jicarilla were in town and in Carrizozo Saturday.

A good crowd attended Sunday School and services both in the morning and afternoon at the Ancho school house.

Mr. and Mrs. Chas. Peters went to Carrizozo Wednesday on business.

Mr. and Mrs. Geo. Goodson and Mrs. Belle Collier visited the ranch home of Mr. and Mrs. Geo. Jeffries Sunday.

Baptist W M U

The Woman's Missionary Union of the Baptist church will meet in the church the first and third Wednesdays of each month.

Ziegler Bros. invite you to their July Clearance Sale which starts tomorrow. Many choice bargains are displayed.

Ft. Stanton Ball Game

Fort Stanton, won the ball game 8 to 7, Saturday, when they played the Alamogordo Black Giants at Ft. Stanton, in a 11 inning game. Batteries for Ft. Stanton were "Cue Ball" Elliott, F. Peralta, Lucero and Luna. For the Giants were Kelly and Lester, Pitcher Kelly broke his arm below the elbow in the 5th inning. Reporter.

Notice

Saturday, July 30, has been chosen as the day to work the graveyard at Angus. Everybody is invited to come and bring a lunch.

Josue Lueras

Josue Lueras, age 39, was drowned, accidentally Thursday afternoon at Corona.

According to evidence at the inquest, held by the Corona Justice of Peace, the deceased ate his dinner and shortly after took the cook he was going to take a swim in the new tank. After considerable time had elapsed the cook decided to go see why he had not returned. When he arrived at the tank, he found Lueras' clothes, but could not see the bottom of the tank, which contained twelve feet of water. When the tank was dragged, the body was found.

Lueras was born at Rabenton, N. M., and is survived by five brothers and five sisters. Funeral was held at Rabenton Saturday. Contributed.

To All Democratic Central Committee Members, Lincoln County, New Mex.

You are notified that a regular meeting of the Democratic Central Committee will be held at the County Court House, in the District Court Room, Carrizozo, New Mexico, on Saturday, July 16, 1938, at two o'clock.

Purpose of said meeting is to select the date of the County Convention, at which Convention delegates to the State Nominating Convention will be selected, and to apportion the number of delegates each precinct will be entitled to.

WAYNE RICHARD,
Chairman, Lincoln County Democratic Central Committee.

Mr. Jess Dillard and family visited relatives in Lubbock, Texas last week.

Bees Take Over Fire Hydrant

It was a good thing that a fire didn't break out in Detroit in the area of this fire hydrant which was taken over by a swarm of bees. Bee experts say the bees crossed the Detroit river from the Canadian side and decided that the fire plug would be a good spot to rest. Two Detroit policemen are shown trying to get the bees to move away from the hydrant.

Civilians Welcome Rebel Army to Castellon

The civilian population welcomes soldiers of Generalissimo Francisco Franco as they arrive in Castellon de la Plana, key position in the present insurgent drive on Valencia. Shortly afterward, 3,000 civilian refugees from the provinces moved into the city, adding to its food and housing problems.

WHAT to EAT and WHY

C. Houston Goudiss Recounts

The Miracle of Milk

Noted Food Authority Explains Why It Is the Cheapest and Most Nearly Perfect Food

By C. HOUSTON GOUDISS

6 East 39th Street, New York City

OF ALL the foods known and used by man, milk is supreme. It is a miracle of perfection—a veritable elixir of life.

Milk has powers possessed by no other food. It builds sturdy bodies for infants; strong bones and sound teeth for growing children; helps to maintain vitality in adults; and to delay the onset of old age.

It contains a greater assortment of nutritive materials than any other single food. It is the foundation of every balanced diet. Considering the services it performs for mankind—from infancy to old age—it is the cheapest food we have.

Milk is so many-sided that I always think of it as the Benjamin Franklin of foods. It is a vast treasure chest of nutrients—the most complex product of nature's chemistry. It contains nearly every chemical element of the body itself, in proportions adapted for quick and easy assimilation.

Milk fulfills six essential requirements of a perfect diet.

First: It supplies carbohydrate and fat for heat and energy.

Second: It furnishes protein that is suitable for building new tissues and repairing the millions of cells that are worn out daily.

Third: It yields minerals which build bones and teeth and regulate the subtle internal processes of the body.

Fourth: It contains every known vitamin in some degree and is abundantly supplied with the vitamins that are necessary to growth, to the smooth running of the body machine, and to the prevention of many types of infection.

Fifth: It contains water, to act as a solvent, a carrier and regulator.

Sixth: It is easily digestible.

This brief summary helps to explain the unique place of milk in nutrition. Think of it! In one food, we find protein of the highest type; carbohydrate and fat; all the vitamins; every one of the minerals demanded by the human body; water; and an easy digestibility that readily changes these ingredients into vigorous life.

The Biggest Food Bargain
We occasionally hear the charge that milk is too high in price—that it is a luxury to afford enough of this master food to supply a quart daily for every child—at least a pint for each adult. That is ridiculous! The cost of milk is much cheaper than the cost of illness. And milk is not a luxury, but an indispensable necessity.

I contend that no homemaker can afford not to buy milk in adequate amounts—that if she desires health, efficiency and longevity for her family, she must provide a sufficient amount of milk before she purchases any other food.

A Food for Children and Adults
Humankind needs milk as the flowers in the garden and the grains in the field need the blessing of rain.

Deprived of milk, children develop a multitude of ills. They become thin and weak; their resistance is low; they fall easy victims to the germs of disease; there is small hope of their reaching normal manhood and womanhood.

Nor is milk only a food for children. It is likewise essential for adults who desire to live longer, happier, and healthier lives—to fortify their bodies against the assaults of disease—to retain or regain mental and bodily vigor. It is indeed a Fountain of Youth!

Milk for Pep and Power
A quart of milk daily supplies from two-thirds to three-fourths of the total calories required by a

year-old child. For a five-year old, it provides about half the day's fuel requirements, and for a ten-year old, one-third. Even a moderately active man could obtain one-fourth of his energy requirements from a quart of this precious fluid. It is also interesting to note that five-eighths cup of milk is equivalent in energy value to one and one-third eggs, or two and one-fourth ounces of lean beef.

A quart of milk yields more than an ounce of pure protein of the highest quality. Moreover, nutrition authorities hold that under normal conditions, it is the most completely digested and absorbed of all food proteins.

Milk for Minerals
As a source of calcium, milk is indispensable. Without milk, it is practically impossible for the body to obtain enough of this captain of the minerals for normal skeletal development.

It has been estimated that when the calcium requirement is met through the use of milk, the need for phosphorus will also be adequately provided.

Though milk is not as good a source of iron as of calcium and phosphorus, the iron is present and in a form that can be easily utilized by the body.

Milk for Vitamins
Milk is so rich in vitamins A and G, that the addition of a quart

Send for This Free Chart

Showing which Foods are ACID and which ALKALINE

One of the principles in planning a balanced diet is to include at least enough alkaline, or base-forming foods, to balance the acid-forming foods.

To help you distinguish the foods that belong in each group, C. Houston Goudiss offers to send a free chart listing the principal acid-ash and alkaline-ash foods. Address C. Houston Goudiss, 6 East 39th Street, New York City.

of milk daily to a good mixed diet practically guarantees against a deficiency of either of these precious substances which promote growth, help build resistance to disease, prolong the prime of life, and help to ward off old age. It also furnishes a considerable amount of vitamin B, which promotes appetite, aids digestion and helps to prevent a nervous disorder.

Milk contains a relatively small amount of vitamin D, but this can be remedied in both bottled and evaporated milk by irradiation, or the addition of a vitamin D concentrate. It is less dependable as a source of vitamin C than any other vitamin, as the amount it naturally contains varies with the diet of the cow and is reduced by pasteurization or evaporation. This deficiency is easily made good, however, by adding to the diet fresh fruits and fruit juices and raw leafy vegetables.

In Praise of Milk Producers

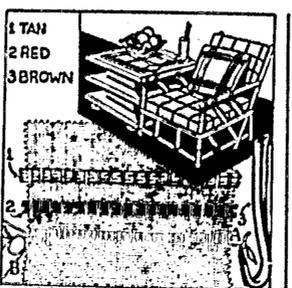

As milk is man's finest food, the men who are occupied with its production are engaged in the world's most important pursuit. They labor to provide the nation with a pure, safe, clean supply of the food that makes life worthwhile for children and helps to prolong life for adults.

Let no one say that milk is expensive. Rather let every homemaker come to realize that this magnificent food would be CHEAP AT ANY PRICE!

HOW to SEW

By RUTH WYETH SPEARS

THERE is a modern air about the colorful roughly woven table mat and the chair cover and cushion shown here. Does it surprise you to learn that they cost next to nothing? There is a trick in it. The fabric is actually, burlap sacking with dyed strips of old silk stockings drawn through. Bright colored yarns may be substituted for the stocking strips or combined with them if desired. Either plaids or stripes may be worked out, and the best results will be obtained with a simple color scheme such as the one suggested here.

Dye the stockings before cutting. Cut the strips 3/4-inch wide and about an inch longer than the space they are to fill. Taper one end of the strip so that it will pull through the burlap easily. If long strips are needed, cut around and around the stocking spirally instead of lengthwise. Now, draw out one thread of the burlap; then tie one end of the next thread to the tapered end of the stocking strip as at A. Pull the other end of this thread as at B to draw the strip through.

NOTE: If you wish to use these weekly articles for reference paste them in a scrapbook, as they are not included in either Sewing Book No. 1 or 2. Book 1, "Sewing for the Home Decora-

tor," covers curtains, slipcovers, dressing tables; 40 pages of fascinating directions. Book 2 illustrates 90 embroidery stitches with numerous applications; doll clothes and gift items. Order by number, enclosing 25 cents for each book desired. If you order both books, leaflet on making crazy quilts, with 36 stitches illustrated, will be included free. Address Mrs. Spears, 210 South Desplaines St., Chicago, Ill.

IRIUM Conquers Surface-Stains for Pepsodent Users

Irium contained in BOTH Pepsodent Tooth Powder and Pepsodent Tooth Paste

"It's Pepsodent for me!"... That's what thousands of people the country over are saying about the new, modern Pepsodent containing Irium. Yes... and you'll say the same once you've used this remarkable fast-acting toothpaste.

For Pepsodent—thanks to Irium—is now more effective than ever! See how Irium helps brush away dirty surface-stains... leaving your teeth naturally radiant! And Pepsodent is SAFE—it contains NO GRIT, NO FUMIC, NO BLEACH! So give Pepsodent a trial!

Quality Silk Weaves Lead Styles

By **CHERIE NICHOLAS**

FINE silks make fine ladies, or rather we should say fine ladies are wearing fine silks—finer and more of the quality type than for many seasons past. The enthusiasm expressed for handsome silks is no doubt due to the fact that current fashion declares in favor of greater elegance in the mode, and when the "dress-up" mood is on, as it so unquestionably is this season, the logical answer that has stood the test of centuries is—silk!

The significant thing about the present silkward movement is that the fine silks fine ladies are wearing are fine indeed. They are pure silk and no camouflage about it. Then, too, the quest for the better silks has revealed so many new and novel types brought out this season that the silk vogue now on is contributing a most exciting and fascinating chapter in the 1939 story of fabrics.

A note of elegance runs through the patrician silk costumes pictured. These modes convey an idea of how the "dress-up" spirit is interpreted by women of discriminating taste.

Speaking of silk weaves that are new this season, the dress to the right is made of a rustic-weave Indian silk that is a joy to wear, since it is quite crush resistant and good-looking and its slightly rough surface adds charm to the texture. It is smartly styled in peasant type with long sleeves and striped silk girdle in vivid gypsy colors that contrast the neutral tone of the silk most dramatically. It is topped by a full length sleeveless coat of matching silk. The sombrero of natural straw adds a picturesque touch.

Dusty rose-pink silk crepe fashions the coat-dress to the left. It is a charming costume for the young matron, its slim draped lines and slightly bloused back being par-

ticularly flattering to the slender figure. Shirring at the neckline, shoulders and down the center front places emphasis on the style message that declares shirred effects to be a leading trimming feature this season. The hat faced with black organdy and trimmed with dusty rose grosgrain ribbon is extremely effective with this charming costume.

A smart ensemble for mother or daughter centers the group. The straight, printed crinkled silk crepe coat with quilting spaced between the large white flowers is new on several counts. Note that the silk print is crinkled, and crinkled fabrics are the rage this season. In cottons crinkled seersuckers and crinkled flowered organdies lead in chic, while in the silk realm the accent is on richly colorful crinkled prints, preferably crepes, together with a versatile showing of crinkled silk sheers. The idea of the long silk coat is going big this season, prints, if prints, be your choice, or dressmaker separate coats made of choice navy or black failles, crepes, bengalines and other silks of similar type.

The dress worn under this crinkled and quilted flower-print coat is of black silk Canton crepe with sleeves continuing the quilted theme. The scalloped Milan hat is something to talk about in that it confirms the report from Paris that designers are "scalloping everything" this season.

Among the newer silks that are making a definite impression the sheer crepe that is ribbed in raised relief should be mentioned. There are also many interesting novelty crepes, outstanding among which are those having honeycomb patternings, while still others are of etamine construction. In the sports class the new Chinese silk damask crepes in clear pastel shades are greatly admired. As a parting word—don't forget the importance of taffeta.

© Western Newspaper Union.

BABY TRIMS GIVE THAT CHARM TOUCH

By **CHERIE NICHOLAS**

This season's frocks and lingerie blouses are taking on the charm of childhood days when leisure moments were taken up with running ribbons through beading, or hand-running numberless pintucks or with "whipping on" dainty lace edgings, plus countless other enhancements that contribute that something called "charm."

The trend toward ultra femininity in dress that marks current styles accounts for the revival of the dainty "baby trims" that are so much in evidence in summer fashions. As a consequence, in selecting your wardrobe you can indulge to your heart's content in the fancies and foibles that give the "pretty" look to summery clothes. So look up the dress and the blouse collections in your favorite shops and departments and be gladdened at the refreshing sight of fascinating touches that designers are lavishing on even the most inexpensive washable as well as upon the delectable "dressup" fashions for more formal wear.

Simpllicity for Day

New day and afternoon dresses are straight and simple, with plaits for morning wear but draped for afternoon. Hips tightly modeled, rather far down, are plain in contrast to tucked and shirred waists.

Versatile Silk Jersey

Silk jersey is being used with equal success in the sports, afternoon or evening wardrobe. It may be combined with other materials, and is particularly effective when it forms the blouse to a wool suit.

HOT-WEATHER WEAR

By **CHERIE NICHOLAS**

The lovely cool fabric which fashions this frock is ideal for hot-weather wear. It is a new shadow-and-substance weave of rayon that is lacy, lightweight, washable, highly crease-resistant and comes in the most delectable colors fancy can picture. You'll love it in dusty rose and other choice pastels as well as white. Be sure to take note of the touch of peasant Swedish embroidery that embellishes this charming frock. Watch the embroidery vogue!

Lights of New York

by **L. L. STEVENSON**

New York is the home of Tin Pan Alley. It is also the home of a number of well-known composers and the part-time home of many others. On the West Coast, grinding out the tunes that are heard in movie houses all over the world, are many former New Yorkers in whose being is still the tempo and the feel of the metropolis. Yet New York has no theme song. In fact after two years of waiting with a cash prize of \$2,000 as bait, it is still anthemless. Not only that but the outlook is so hopeless that an anthem contest started away back in January, 1936, has been called off. The contest was sponsored by the American Society of Composers, Authors and Publishers. It was the result of a suggestion made by Mayor Fiorello H. LaGuardia. In the beginning the sponsors were so optimistic they set a six-months limit. On occasions the time was extended until more than two years had passed. But still no anthem!

Two thousand dollars represents a lot of royalties especially in these days when the radio runs a popular song ragged practically overnight. So there was no lack of contestants for the A. S. C. A. P. prize. During the time the contest ran, the award committee, headed by Judge James G. Wallace, examined more than 2,000 compositions. Included in the manuscripts were many by composers with established reputations. Tin Pan Alley was heavily represented because \$2,000 is 2,000 bucks to Tin Pan Alley. Unknowns, including some who had never so much as seen the city also entered their brain children. But of all the tunes and lyrics submitted, all supposedly portraying the spirit and color of the city for all time, not one was found of sufficient vivid and lasting quality to merit the award.

Gene Buck, president of the A. S. C. A. P., summed it up thus: "We were looking for a fellow to capture the city musically. The mayor and I subscribed to the belief that this town had a very definite tempo. If some composer with a song in his heart and some poet with a lulling lyric in his bosom could have captured this tempo, this city would have had a swell theme song. Some of the country's outstanding songs were written with just such purpose and under conditions we have here." He did admit it was a tough assignment, however, since some composers simply must wait for inspiration—and to the city will have to wait for its anthem.

It's a rather long leap from music to women's hats but if someone would start a contest for the funniest one, I could think of several promising entries. Women's hats simply can't escape observation, of a mere man nowadays, especially if he is a subway sardine. The theater also gives opportunity for contact and comment. In fact conditions today bring back memories of those old movie slides, "Ladies will please remove their large hats." The appearance of that request on the screen always brought applause from the male portion of the audience—and sometimes caused the removal of a few hats. Maybe a revival of that old injunction might do some good now. But my knowledge of feminine psychology being what it is, I hesitate to make a prediction.

Coming downtown this morning in the subway, I noted a stylish young miss—and well worth noting she was too, mates—who not only had one of those big skimmers but projecting from the forward deck a foot or more was a quill with an extremely sharp point. Another flash-back to olden days, when a young lady, annoyed by a flirt, fed him a half inch or so of hat pin. And now that form of protection, absent for years, has staged a comeback.

Saw something funnier than hats on Park avenue—a very dignified, morning-coated gentleman endeavoring to give a half-pint Pom an airing. The pouting pooch simply didn't want to be led and when the big fellow tried to pick it up, took a bite at him! As I left the scene the contest was still on—with the Pom having most of the points.

Arkansas Section Marked

For Vast Game Preserve

MENA, ARK. — A 96,000-acre game refuge, to be located northwest of Mena, probably will be created in the Ouachita national forest.

J. E. Bishop, one of the sponsors of the move, has said the new refuge would be the largest in the nation.

Dog Goes to Doctor

For Nervous Collapse

PASADENA, CALIF. — Dogs suffer from nervous breakdowns the same as human beings, according to Dr. R. M. Pritchard, who is now treating one.

The fact that dogs have these nervous collapses has also been established by a series of experiments at Johns Hopkins university, he said. The treatment consists of light dieting and the administration of a certain vitamin.

Winners in Cake Recipe Contest

THE home economists on the staff of the Experimental Kitchen Laboratory, maintained in New York city by C. Houston Goudiss, who conducts our "WHAT TO EAT AND WHY" series, have reached their decision concerning the prize winners in the recent Cake Recipe Contest. Winners have already been notified and have received their checks.

The first prize of \$25.00 went to Mrs. D. F. Kelly, 1004 Charles St., Whitewater, Wis.

Second Prize Winners.

The five second prizes were awarded to Mrs. H. Harshbarger of 2427 Fifth Ave., Altoona, Pa.; R. A. Williams, 12075 Rosemary Ave., Detroit, Mich.; Mrs. C. A. Burns, Box 788, Oakland, Miss.; Miss Sadie Cunningham, Avonmore, Pa.; and Mrs. Laura Meyer, 107 Pleasant St., Plymouth, Wis.

Third Prize Winners.

Mrs. T. H. Fione, Flaxville, Mont.; Mrs. Lester Ralston, 127 South Judd St., Sioux City, Iowa; Mrs. Harry A. Kramer, 16 Marlin Road, Manor, Calif.; Mrs. F. D. McDonald, Route 1, Amherst, Texas; Vera Tygar, Commodore, Pa.; Mrs. George Ahlborn, R. D. No. 1, Mt. Pleasant, Pa.; Mrs. B. A. Robinson, Box 578, Emmett, Idaho; Jean Guthrie, 4712 Campbell St., Kansas City, Mo.; Mrs. Wal-

ter Richter, Bonduel, Wis.; Mrs. P. C. Blakely, Alden, Mich.

Honorable Mention.

Emogene Williams, Damon, Texas; Mrs. Simon Moen, Norma, N. D.; Mrs. Dick Collins, Masonville, Iowa; Mrs. B. F. Herman, Box 1118, Crosby, Miss.; Mrs. Paul Lorenz, P. O. Box 225, Strathmore, Calif.; Mrs. S. S. Arant, Simpson, Nev.; Mrs. Vida Hilger, Box 257, Rockland, Mich.; Mrs. Grace H. Peterson, Box 335, Amherst, Wis.; Mrs. Cecil Skinner, Bedford, Wyo.; Mrs. Joe Furnace, 317 West, Twentieth St., South Sioux City, Neb.

Magnificent Cakes Entered.

The judges report that they have never seen a finer collection of cakes assembled at one time. Because almost all the cakes were so exceptionally good, it was extremely difficult to choose the winners. But a most careful scoring system was used, and the cakes were checked for general appearance, including shape, size and crust, both color and character; flavor, including odor and taste; lightness; crumb, including texture, rated as to its fineness, tenderness, its moistness and elasticity, and its color and the grain.

C. Houston Goudiss has said that he regrets that every woman who entered the contest could not win a prize. He offers his congratulations to the winners and his thanks to the many other homemakers who helped to make this Cake Contest such a splendid success.

Important Counties

Six counties of this country—Cook in Illinois, Los Angeles in California, Philadelphia in Pennsylvania, Wayne in Michigan, New York in New York and Cuyahoga in Ohio—contain one-tenth of the population of the United States and produce one-fourth of the business pay roll.—Collier's.

Designs for Sheer Cottons

THESE pretty styles will make you and your daughter feel fresh and cool, and look smart and charming, when you go out to tea parties or dinner, these midsummer days. They have a summery, dressy effect, and yet they are not fussy. Make them yourself, and have something very individual as well as fashion-right. It's so easy: a detailed sew chart comes with each pattern. And you can wear much prettier materials when you sew your own—at big savings, too.

Afternoon Dress With Shirring. Shirring is one of the smartest details you can choose—it's used just this way in new and expensive models—on the shoulders, to give fullness over the bust, and at the sides only of the skirt. Thus your dress has animation and grace, and yet the front and back are plain and won't crush and muss when you sit down. In dim-

ity, voile, organdy, handkerchief lawn or mull, with a youthful tie belt and frills of lace, this will be the most flattering frock you own.

Bolero Frock for Little Girls. With or without the sleeveless bolero, this dress is a perfect darling for little girls! It's so simple and yet it has loads of style, with its very puffed sleeves, very full skirt, and little round collar. Notice how short the bolero is—that's the smart new kind. Make this up in dotted swiss, dimity, organdy or batiste, and trim it with ricrac, irish edging, or linen lace.

1505 is designed for sizes 4, 6, 8, 10 and 12 years. Size 6 requires 2 1/4 yards of 35 inch material for dress alone. Three-eighths yard for bolero; 1/4 yard for contrasting collar, if desired. Two and three-eighths yards is required for trimming bolero and collar.

1545 is designed for sizes 12, 14, 16, 18 and 20. Size 14 requires 4 3/4 yards of 35 inch-material. Three yards of lace edging for neckline and sleeves. One and one-fourth yards ribbon for belt.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coils) each.

Largest Flag

The largest national flag in history, so far as is known, is one of the Stars and Stripes, made by a New York company for a Detroit department store in 1923, says Collier's. This flag, which cost \$2,700, is more than 20,700 square feet in area.

Local and Personal
Mr. F. H. Hall, popular druggist and mayor of Capitan, was a business visitor in Carrizozo last Saturday...

Mr. and Mrs. Ernest Key and children returned last week from a trip to Oklahoma and Colorado, where they visited relatives.

Miss Mary Lou Phillips left Saturday of last week for Arizona to spend a month with relatives.

Born at the Turner hospital, to Mr. and Mrs. Cap Straley, a baby girl, Saturday July 9th.

Mr. John R. O'Malley, of Capitan, writes: "Enclosed please find check for one year's subscription to your excellent publication."

Mrs. R. A. Walker, of the Lyric theatre, came home Sunday from a trip to San Angelo, Texas, where she had been visiting relatives.

Charles Carl came home Saturday from Sterling, Colorado, where he has been at the home of his uncle since the close of school.

Mr. and Mrs. Johnie Jordan, of Santa Fe, spent last Sunday with Mr. Jordan's mother, Mrs. May Jordan, returning home the same day.

Mrs. J. V. Hobbie and daughter, Bliza, were in El Paso last Monday on business.

Nellie Lee Smith visited her brother, Bradley Smith, in El Paso last Monday.

Miss Bonnie Rummel, of El Paso, spent last Monday in El Paso.

John Kelt, who took a two week's vacation, is back at his post in the post office. His brother-in-law and sister, Mr. and Mrs. Ohio Bilbo accompanied him. They covered considerable territory making stops in six states. John thinks Carrizozo is the best place of all.

Mr. and Mrs. Albert Ziegler will have as their guests shortly, their two daughters, Mrs. Coplin, of Kansas City, and Mrs. Guteknecht, of Chicago.

Miss Inez Dillard, of Lubbock, is visiting her uncle, Mr. Jess Dillard.

The County Board of Education will be in session all day Monday.

Mr. and Mrs. Tom Cook have returned from Greensburg, Kansas, where they had been to attend the funeral of Mrs. Cook's grandmother, Mrs. Cobb, who passed away on July 3rd.

Mr. and Mrs. Northrup, and daughter Miss Ruth Northrup of Alamosa, Colorado, were visitors of Mrs. Tom Cook this week. Mr. and Mrs. Northrup returned home, but Miss Northrup will stay with her sister several weeks.

Mrs. R. E. Berry and children visited Mrs. Berry's cousin in Brownfield, Texas, the first of last week.

The Lincoln Co. Singing Convention will meet at Anecho the 4th Sunday in this month and Saturday night before. We are expecting the usual good attendance of visiting singers from other counties. Everyone is invited to come and bring baskets for noon lunch. Chairman:

WHO'S NEWS THIS WEEK

By LEMUEL F. PARTON

NEW YORK.—As a token of good will, President Kemal Ataturk of Turkey sends his bomb-tossing adopted daughter on a flight over Greece and the Balkans. She holds **Feminine Bomb Tossing** medal **Has Good Aim** for a bombing Kurds, having out-scored veteran male fliers in a recent work-out.

When the timid and demure Turkish women started coming out from the harem, they kept right on going. They seem to be out-distancing our girls who are merely coming out of the kitchen.

Turkey's "Flying Amazon" is Sabiha Gueckchen, twenty-four-year-old daughter of a Turkish army captain who was killed fighting Greeks in 1921. She is a pretty little thing.

An admiring woman correspondent described her as "shy and demure," with quick recourse to her "modish little vanity case," as she climbed from her plane after a hard day's bombing. That was in the Derim area, in eastern Anatolia, in which she had been blasting the Kurds out of their caves.

She is a first lieutenant in the Turkish army, the only woman air force officer in the world.

Her French flying instructor says she is the most gifted woman acrobat pilot in the world. She was trained in flying and gliding in Russia and later was a cadet in the Turkish army air force school. She rides a single-seated military plane, handles all types of planes and is especially accurate and skillful in bombing.

It is said no aviator in Turkey can match her in diving and stunting, but she shirks modestly from all such, possibly unfeminine, exhibitionism, and sticks to her humdrum bombing tasks.

HERE is another diverting little news note, in sharp contrast, however, on the emergence of the modern woman. At her home in New York, Mrs. Lewis Stuyvesant Chanler presents prizes of \$750 to the winners of the annual "Intellectual Olympics," conducted by her new history society.

Happily the flying bomb put is not included in her deathblow. She has been for many years a diligent and earnest advocate of peace and brotherhood, working through the international Bahai movement, of which she has long been a leader. She derives from the Blue book and has turned from society to religious and humanitarian concerns.

Her husband, now retired, is a great-grandson of John Jacob Astor, and a former lieutenant governor of New York. He is a big, gray, silent man, walking a small white poodle dog, rarely seen at his wife's salon, but a loyal partner in her endeavors. He is the brother of the late Bob and John Chanler.

The flaming-haired Valeska Suratt was an instrument of fate in the life of Mrs. Chanler. They were jointly engaged in a Hollywood script enterprise when Mrs. Suratt introduced her to Mirza Ahmed Sahrob, descendant of Mohammed and a disciple of the Abdul Baha. He was her tutor in the esoteric faith whose followers, like those of the Oxford movement, fervently believe the world can be saved only by a religious and cultural internationalism.

DOWN in Peru, this writer knew some dilatory natives who frequently used a word which meant, "not tomorrow, but day after tomorrow and maybe not then." From ancient parchments, Trinity college dons lift the reverse expression—"hunc pro tung," which means "now instead of then." With this high academic sanction, they are enabled to deal a bachelor's degree to Richard Barthelmess, who failed to touch second when he was there 20 years ago.

Baseball moguls could now say "hunc pro tung" and hand Fred Merkle that run he didn't get in 1908. If the custom gets going, it might open the way for some European debt payments.

Dick Gets Degree 20 Years Late

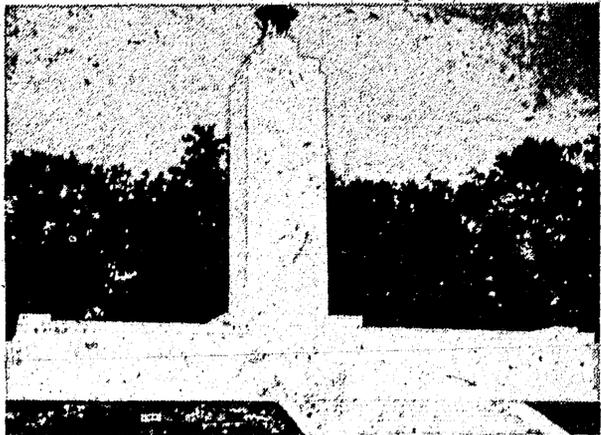

Mr. Barthelmess is one of the thinning line of the stars of the old silent screen who remain in the public consciousness. His mother was Caroline Harris, an actress of the Biograph days. She gave Nazimova English lessons and in return Nazimova gave her boy his professional start in "War Brides." "Broken Blossoms," with Dorothy Gish, was his last big success.

BLUE AND GRAY MEET

Veterans of Gettysburg Celebrate Together on Field of the Crucial Civil War Battle

Here is the new Peace Memorial in the Gettysburg National Military park which was dedicated by President Roosevelt during the celebration of the 75th anniversary of the Battle of Gettysburg, in which veterans of the Northern and Southern armies participated. On the top of the shaft burns "The Flame of Eternal Peace."

Edward W. Pickard
SUMMARIZES THE WORLD'S WEEK
© Western Newspaper Union.

Yanks and Johnny Robs

SEVENTY-FIVE years after they faced each other in deadly conflict, some 2,000 old soldiers gathered in friendly concert to celebrate the great Battle of Gettysburg. The Stars and Stripes and the Stars and Bars flew side by side on the once bloody field, and the veterans of the Northern and Southern armies that fought there in one of history's biggest battles wandered together over the hills and meadows or sat in their tented city, exchanging reminiscences and renewing old friendships.

The war department had done everything possible to make the now feeble old warriors comfortable and safe, and the Pennsylvania National Guard and Boy Scouts attended carefully to their every want. There were feasts, parades, and military displays in plenty, but the veterans were not called on to do the entertaining. They were the entertained.

In the Gettysburg National Military park, comprising the battlefield, had been erected a beautiful peace memorial, and President Roosevelt was there to dedicate it on the afternoon of July 3. At the top of the monument's shaft is a burner for natural gas that supplies "The Flame of Eternal Peace." This was kindled by the President as the climax of the day's celebration.

There were no re-enactments of battle scenes. The observances was all of peace, and peace and harmony of all the land breathed all through the talks made by Mr. Roosevelt and other speakers.

From a common platform Commander-in-Chief Overton H. Mennet of the Grand Army of the Republic and Commander-in-Chief John M. Claypool of the United Confederate Veterans spoke to their comrades.

Politics in Relief

CHAIRMAN SHEPPARD of the senate campaign funds committee put it up to the members of that body whether they should investigate charges that the WPA had increased relief wages in Kentucky and Oklahoma to aid the candidates of Senators Barkley and Thomas.

Harry Hopkins

Works Progress Administrator Harry L. Hopkins denied that the WPA has been made a political instrument in Kentucky.

In a statement accompanied by exhaustive documentary evidence, Hopkins challenged 22 charges that his agency has subjected WPA workers to political pressure. He said the facts do not substantiate the charges, but reiterated his promises of summary and stringent action in all cases where political coercion could be proved.

"Every charge in which a WPA worker or official was named has been thoroughly investigated and documentary evidence conclusively establishes that out of more than a score of cases in which political activity was alleged, only two instances of improper conduct could be found," he said.

Hopkins' statement referred to a series of articles on the Kentucky senatorial primary fight between Alben W. Barkley, senate majority leader, and Gov. A. B. ("Happy") Chandler. The articles enumerated specific instances where, it was asserted, political pressure was being exerted on relief workers in behalf of Barkley.

Real Drive on Depression

WITH the start of the new fiscal year the administration began what the President calls "the real drive on depression." In the coming fiscal year relief agencies, army and navy, public works departments

and federal lending corporations may pour out approximately \$6,500,000,000. Some of this money is returnable to the treasury.

Administration officials said this huge sum—equal to more than \$60 for every person in the nation—was needed because there are approximately 10,500,000 unemployed in the country. This estimate, furnished by a federal economist, was 4,500,000 higher than last October, when the recession's effect became visible.

Officials left little doubt they hope to get business positively on the upgrade by Labor day, although economists estimated it would take a year from the upturn to recover the ground lost since last summer.

Upholds Free Press

PRESIDENT ROOSEVELT delivered two speeches in New York, on the site of the world's fair that is being built. First he spoke at the laying of the cornerstone of the federal building at the exposition after dabbling in cement with a silver trowel.

Then the Chief Executive appeared before a convention of the National Education association, and declared that the mission of America is to carry the torch of free thought and free learning in a world in which dictators have smothered the fires of freedom.

He did not mention Nazi Germany or Fascist Italy by name, but he condemned in most positive language such purges as burned libraries, exiled scientists, artists, musicians, writers and teachers, dispersed universities and censored news, literature and art.

"If in other lands the press is censored," Mr. Roosevelt declared, "we must redouble our efforts here to keep it free. If in other lands the eternal truths of the past are threatened by intolerance, we must provide a safe place here for their perpetuation."

In his address to the teachers the President warmly defended the spending of his administration on the ground that the outlays of federal money had increased national and human resources.

"The only real capital of a nation is its natural resources and its human beings," he said. "So long as we take care of and make the most of both of them we shall survive as a strong nation, a successful nation, and a progressive nation—whether or not the bookkeepers say other kinds of budgets are from time to time out of balance."

"This capital structure—natural resources and human beings—has to be maintained at all times. The plant has to be kept up and new capital put in yearly to meet increasing needs. If we skimp on that capital, if we exhaust our national resources and weaken the capacity of our human beings, then we shall go the way of all weak nations."

Strike at New York Fair

MORE than 6,000 workers were affected by a general strike of construction men at the New York world's fair, called by the Building Trades and Construction council, an affiliate of the American Federation of Labor. All construction work was tied up except structural steel work. The strike was precipitated by a jurisdictional dispute.

Heads N. Y. Exchange

WILLIAM McCHESNEY MARTIN of a St. Louis brokerage firm and chairman of the New York Stock exchange since last May was elected president of the exchange at a salary of \$48,000 a year. His selection was the final step in the reorganization of the executive personnel of the exchange which was brought about through the insistence of the securities and exchange commission and the "liberal" group within the exchange membership.

Rail Wage Parley Set

REPRESENTATIVES of the Railroad Trainmen, and of the Carriers' Joint Conference committee agreed to meet in the Stevens hotel, Chicago, on July 18 to start negotiations over the 15 per cent wage reduction proposed by the railroads. The trainmen, numbering about 150,000 workers are headed by A. F. Whitney, who declares they cannot and will not accept the wage cut.

On July 20 the 18 other railroad brotherhoods affected by the proposed wage reduction will start their negotiations with the managements under the leadership of George M. Harrison, chairman of Railway Labor Executives' association.

Indiana G.O.P. Picks Willis

RAYMOND E. WILLIS of Angola, Ind., a newspaper publisher and veteran, political leader, was nominated for the senate by the state Republican convention in Indianapolis. Willis was named on the third ballot, defeating four rivals, among whom was James E. Watson, former senator.

The nominee, who is sixty-two years old, has been the active editor and publisher of his weekly paper, the Angola Republican, since its establishment in 1898. He is president of the Steuben Publishing company, and, with another editor at its head, publishes the Angola Herald, a Democratic organ.

Spending Is a Stop-Gap

DECLARING the New Deal's objective is to give wages for real work and that he is opposed to the outright dole for bare existence, President Roosevelt said in a press conference that he is still looking for a permanent solution of the unemployment problem. He made it clear that he did not believe relief or public works afforded "anything" more than a stop-gap remedy for a little understood dislocation of the nation's economic and industrial life. In fact, he said, no country in the world had as yet worked out a method for dealing with the most acute unemployment situation in the history of the world.

He noted that public works expenditures had worked better in Sweden than in this country, because the Swedish government had been able in recent prosperous years to put on heavy taxes and pay off its borrowings. He said the Swedish method was being given close study. The President warned that the prosperity which vast outlays for rearmament appeared to have brought to European nations was unound. When the munitions plants close down, he predicted, the nations of Europe will find themselves weaker in an economic sense than ever before. No nation, he argued, could spend its way back to prosperity by laying out vast sums in unproductive goods like weapons of war.

All federal spending agencies received instructions to launch the big spending push July 1, Mr. Roosevelt said. Funds will pour out through the Works Progress administration, the Civilian Conservation corps and the Reconstruction Finance corporation.

France to Execute Spies

DEATH on the guillotine will hereafter be the fate of persons convicted of peacetime spying in France. The government issued this decree, according to officials, because of the increase of espionage in France. In the Strasbourg area alone—near the German frontier—there were 150 convictions on espionage charges in 1937. This year such convictions have averaged nearly four a week.

Forms of espionage for which the death penalty may be imposed include entering into a contract with a foreign power with the intent of weakening the national defense, taking up arms in a foreign army against France, and supplying information to a foreign power concerning inventions, manufacturing processes, studies, industrial methods, maps, documents or military plans which might be used against France in time of war.

Disaster in Japan

NEARLY 200 persons were killed in Japan during two days of violent storms and floods and the disaster was aggravated by rather severe earthquake shocks. Many thousands of houses were destroyed and the main railway lines were put out of commission by landslides and wrecked bridges.

Italy Checks Franco

VIRGINIO GAYDA, noted editor and spokesman for the Fascist regime in Italy, declared that Italy had advised Franco, leader of the Spanish insurgents, to use "moderation" in his efforts to prevent British and other foreign ships from bringing supplies to government Spain. Gayda said, however, that Italy approved the bombing of vessels-carrying contraband, but disclaimed any Italian responsibility therefor.

Representations by the earl of Perth, British ambassador to Rome, had opened the way to an agreement to end the bombings. Mussolini was reported as ready to act only to spare Prime Minister Chamberlain from embarrassment.

Expert Advice on Making of Jelly

Every Glass Should Be Clear, Firm and Quivery

By EDITH M. BARBER

"JELLY" is one of those words which seems to sound the way it should. To live up to the name jelly should be clear, sparkling, firm but quivery. Every glass you fill should score on these counts.

Certain fruits were designed by nature particularly for jelly making. They are juicy, pungent in flavor and have as well a quality which allows the strained cooked juices to jelly when cooked with sugar. Other fruits may have all the qualities except the latter. We have, however, got around that nowadays. We may take advantage of their flavors and add to them fruit pectin in a concentrated form. For perfect jelly the right proportion of sugar to fruit juice must be used. For solid currants and green grapes it may be possible to use the old-fashioned rule of cup for cup, but generally even a thick juice will take not more than three-quarters of a cup of sugar to a cup of juice. If too much sugar is used, the jelly will be gummy and will seldom mold. If too little sugar is used, the jelly will either be tough or syrupy.

Unless you are an experienced jelly maker, you will find it simpler and surer to combine fruit pectin with fruit juices. In this case you must measure exactly and follow directions absolutely.

Do not be too ambitious when you make jelly and try to make enormous quantities at one time. You will have better results if you prepare small amounts.

Select and wash fruit. Remove the hulls, stem and blossom ends. Cut hard fruits into pieces without peeling or coring.

For soft fruits use just enough water to prevent sticking. Heat gradually, mash while heating and cook until the pulp has lost its color.

For hard fruits, cook with just enough water to cover until the fruit is tender. Do not mash if you wish to have a clear jelly. Strain the juice through a wet-flannel jelly bag, but do not squeeze as this will give a cloudy jelly.

When the juice has stopped dripping from jelly bag return the pulp to the preserving kettle, add enough water to cover, heat gradually and simmer for 30 minutes and strain again through jelly bag. Test for pectin and if the test shows sufficient pectin present a third extraction may be made. Keep the juice obtained from first extraction separate from juice obtained in second and third extractions, as juice from the first extraction usually makes a clearer jelly.

Test strained juice for pectin to determine whether it contains sufficient pectin which in turn indicates the proportion of sugar to be used.

Test for Pectin.
Put one tablespoonful of hot juice into a glass or cup. Add one tablespoonful of alcohol and stir once. Let stand two minutes. If it is a thick jelly which can be taken up on a spoon without breaking, one cup of sugar to one cup of juice may be used. If jelly forms, but breaks as it is taken up with the spoon three-fourths cup of sugar to each cup of juice should be used. If there is no jelly formation, the juice must be combined with sour apple juice or currant juice and retested.

Old-Fashioned Jelly.
To obtain best results in jelly making, it is advisable to work with a small quantity of juice. Two quarts of juice is a sufficiently large quantity to handle at one time.

Measure juice, add sugar and stir until sugar is dissolved. Boil rapidly until jelly test is obtained. When two drops will hang side by side from a spoon which has been dipped into the boiling mixture, the jelly is ready to be skimmed and to be poured in clean, hot glasses. Pour hot paraffin immediately over the jelly to the depth of one-eighth inch. When cold cover with tin lids.

Cherry Jelly.
3 cups (1½ lbs.) juice
6½ cups (3¼ lbs.) sugar
1 bottle fruit pectin

To prepare juice, stem and crush about three pounds, fully ripe cherries. Do not pit. Add one-half cup water, bring to a boil, cover and simmer 10 minutes. (For stronger cherry flavor, add one-quarter teaspoon almond extract before pouring.) Place fruit in jelly cloth on bag and squeeze out juice.

Measure sugar and juice into large saucepan and mix. Bring to a boil over hottest fire and at once add fruit pectin, stirring constantly. Then bring to a full rolling boil and boil hard one-half minute. Remove from fire, skim, pour quickly. Paraffin hot jelly at once. Makes about nine glasses.

Raspberry Jelly.
4 cups (2 lbs.) juice
7½ cups (3¾ lbs.) sugar
1 bottle fruit pectin

To prepare juice, crush thoroughly or grind about three quarts fully ripe raspberries. Place in jelly cloth or bag and squeeze out juice.

Measure sugar and juice into large saucepan and mix. Bring to a boil over hottest fire and at once add fruit pectin, stirring constantly. Then bring to a full rolling boil and boil hard one-half minute. Remove from fire, skim, pour quickly. Paraffin hot jelly at once. Makes about 11 glasses.

Household Hints

By BETTY WELLS

IF THERE'S anything that puts a damper on a crisp cool summer room, it's a dark cavern-like black fireplace. The very sight of it raises the temperature of a room degrees and degrees... anyway it feels that way. So we've been digging up ideas for making a fireplace contribute its share to the cause of coolness.

The most successful idea we know of is to have a panel of ply-board or compo-board cut to fit into the fireplace opening. Then cover this with a large scale floral medallion cut out of wallpaper or chintz.

Another way to get the same effect is to have a fire screen frame made with a pedestal base so that it will stand up steadily. Cover this with chintz or needlepoint and see what you have.

You can buy tilt-top tables that make lovely fire screens when their

In summer a flower panel is cool-looking for the fireplace.

tops are painted with attractive floral designs. Or you can buy interesting folding firecreens in lacquer or some other pleasing finish.

The decorators often take a good-sized piece of white or figured paper (flowered wallpaper for instance) and pleat it into a big gay fan and put this in the fireplace just back of the andirons to brighten up the effect.

But when all's said and done, nothing is half so nice as fresh flowers here as elsewhere, so if you're a good hand with the garden and are assured plenty of cut flowers for the house, then by all means plan on having them in your fireplace in graceful arrangement. Your best bet here would be to get a glass fish tank in a size to fit into the fireplace opening. This you can keep banked with greenery and large dramatic flowers for a charming fragrant effect. Next best would be a large vase or bowl for flowers. Or even a fish tank filled with tropical fish indirectly lighted would stand out and contribute design and interest to this space.

What to Do With a Gun Collection

"I'm no feminist," writes Mrs. C. V. S., "so I play up to my husband and make him the big shot around the place in a way that probably makes my more modern friends writh. But I've observed that life usually goes along more pleasantly in homes where a woman doesn't rule the roost. Or appear to! She can have her say in subtler ways. And after all what's the point of life but to be as happy as you can around home. Well, all of this rambling on now because I have a problem. My husband is a collector of old guns. He has dozens of all sorts and spends all his spare time reading up on old weapons."

"But there's no place in the house to keep them. For all my theories, I can't come to the point of offering him the living room walls, because all those guns would spoil our lovely room. And yet in my heart I know it's not fair to make him keep them in boxes in a closet. There's simply no room to turn over to

In our mail today—

him for a den or game room or anything like that. Our house is just barely big enough for our family as it is. I'd thought of the hall which is pretty good sized. But I'm afraid they'd give such a cluttered impression as people come into the house. What would you suggest?"

The hall, by the way, means, wise lady. It needn't look cluttered, and the collection will give interest to it. Too often a hall is as dull as dull because it doesn't have any specific design. Nothing solves the hall decoration problem more interestingly than a collection of most anything—old bottles, books, brass, pewter, prints or whatever.

But they have to be displayed and arranged with design and distinction. Just piled in, they look cluttery. But if they're worth collecting, they're worth setting off to a good advantage. Therefore a collection to be displayed in the hall should be given the proper frames or racks or cabinets to make it look important or rare or precious. For guns, perhaps very shallow wall cases with glass doors would be the thing. Your carpenter can build them in at not so great expense. Paint them the color of the woodwork, which we hope is white, or cream because that will give the dark of the guns a chance to silhouette themselves effectively.

CHAPTER XI—Continued

The marshal put him through an exhaustive quiz. As Gray had already suspected, Curly and one or two others were rustlers but not bandits.

Gray nodded to Frank. "That's all," he said. Young Chiswick took his prisoner away.

The officer stood before the table absorbed in thought. A light, hurried step sounded in the passage. Gray looked up, to see Ruth at his elbow.

"You're not going to Tail Holt—alone!" she broke out.

He frowned at her, slowly dragging back his thoughts to meet the interruption. "Yes. Why not?"

"Father told me so. You can't do that. Don't you see you can't? Sperm Howard knows it was you who told Father about the Live Oak expedition. He must know, since he's not a fool. You won't last there an hour."

"I surprised Gray that he did not resent her impulsive entrance into his affairs. Indeed, the distress of the girl sent a warm glow through him.

"Sperm Howard may be a bad man," he told her quietly. "But I'm leaving a hostage here at the ranch. He can't hurt me if he thinks your father would retaliate on his son."

"I don't know anything about that!" she cried wildly. "Maybe some of his men would shoot you without waiting to ask him. Can't you see how dangerous it is?"

"Most things aren't dangerous if you walk straight up to them," he explained. "It's when you run away from them they get you."

"Father will let you have some of his men as a guard," she insisted.

"That will be fine. By and by I'll need them, but not yet."

"You haven't any right to throw your life away. Haven't you a mother—or sisters?"

"No. I'm a lone wolf."

"There must be a woman somewhere who—cares."

He flung away discretion and caught her in his arms. "I wonder about that," he said, and looked into her deep, lustrous eyes.

They told him, plainer far than words, that she was sealed to him for all time.

He kissed her lips, pushed her away abruptly, and strode out of the room.

CHAPTER XII

"Now why did I do that?" Gray asked himself reproachfully as he rode to town. "Here I've watched my step all these years so as not to get tied up with a girl, and then I go to acting like a kid because she is pretty as a painted wagon and is made to be loved. I don't aim to get married. I'm a lone wolf and I figure on traveling alone. So there won't be any more nonsense from you, Jeff Gray."

It was all very well to decide this, but it was quite another thing to banish Ruth from his mind.

As he drew nearer Tail Holt, he brought his attention back strictly to the business of the hour. While he was in the bailiwick of the enemy there must not be any dreaming. To survive he would have to keep his senses focused upon the immediate present.

It was growing dark, but there was still too much light for his purpose. He drew aside from the road and guided his horse through the mesquite and the prickly pears until he came to a more open space where Spanish bayonets were scattered. Here he rested until stars began to prick through the sky roof.

He remounted, but did not return to the road. Winding in and out among the brush, he came to a barbed-wire fence and followed it to a gate. Through this he passed into a large pasture. At the far side of this he stopped and looked down upon the lights of the town. He unsaddled, then picketed the horse. The saddle he hid in a clump of mesquite.

His approach to the village brought him to the rear of Ma Presnall's boarding house. The chances were that the man he wanted to speak with first was staying there, but it was important to make sure.

For several minutes he watched the house. There were lights in two of the bedroom windows upstairs.

He slipped through the back door into a hall. From the kitchen he heard the clatter of dishes. The Mexican flunky was washing those that had been used for supper. Jeff took the narrow stairway to the second story. He placed his feet on the treads softly, to make as little noise as possible. On the land-

ing he waited a moment listening for sounds to guide him. Two of the rooms had someone in them probably, since it was not usual to leave without blowing out the lamp.

Out of one of the rooms a man walked. There was no light in the hall. The man walked toward the front stairs. Jeff called a question after him.

"Say, which is Curly's room?" The lodger stopped. "The one on yore right," he said.

"Obliged," Gray told him, and watched the other go downstairs. Again the officer listened. There was no murmur of voices inside the room indicated. He opened the door, walked in, and pushed the bolt home.

Curly was in bed reading by the light of a lamp beside him. He looked up, marking with a finger the place in the book where he had been interrupted. His eyes gleamed.

"Mr. Jeff Gray made a short visit to Tail Holt Tuesday," he said in the singsong voice of an uneducated man reading from a newspaper.

"The boys were certainly glad to see him and gave him a warm welcome. The obsequies will be at Boot Hill this afternoon."

"Which one of the boys are you interring?" Gray asked.

"I wouldn't know who else beside you," Curly answered. "You're

The man circled the house.

a cool customer, Jeff. Don't you know this town is mighty unhealthy for you?"

"It doesn't seem to have been healthy for you either, Curly. How's yore wound getting along?"

"Fine and dandy. Morg was in some hurry when he handed me this pill, and didn't plant it where he wanted."

"He sent one to my address, too, a few days earlier, but I wasn't where he mailed it."

"How come you to let the rattlesnake get away when you had him under yore heel?" Curly asked.

Gray told him the circumstances. The wounded man meditated over the strange ways of women.

"Funny the way they act," he said. "All day she had been scared to death of the hell-hound, don't you reckon? Yet she butts in and prevents you from killing him."

"Yes. She couldn't stand any more bloodshed."

"He didn't harm her any, did he?"

"No." Gray asked a question. "Know where Norris is, Curly?"

The black-haired man shook his head. "If I knew I'd tell you. Maybe he's clear out the country. While he was in town he held up Sperm Howard and took five hundred dollars from him."

"That distresses me," Jeff said dryly.

Curly grinned. "I thought it might. The scalawag was just lighting out when we bumped into him."

"Sperm done any talking about me?" Gray asked casually.

The man in the bed looked at him. "You're sure a cool cuss. Yes, he's talked considerable, and that's all I aim to tell you—except that Tail Holt is a good place for you to be an absentee from." The face of Curly had taken on a stiff harshness. "I'm no sidekick of yours, fellow. I'll throw in with you or anyone else to stomp out that villain Morg Norris. Then I'm through. Understand? I've got no information for you—or any other government man. You came here to us with a lie, claiming to be Clint Duke. That washes you up with me."

"How do you know I'm not Clint Duke?" the officer queried.

"Because Clint Duke—"

I'm a government man, as you say, I didn't come here to get you."

"There's nothing you can get me for," Curly answered hardily. "What you came to see me for was to get me to throw down my friends. Nothing doing. I'll tell you another thing. Some of the boys usually drop in during the evening. Better not let them find you here."

"That's good medicine," Gray said, and reached for his hat. "Only you're wrong about why I came. I thought there was a chance you might tell me where Morgan Norris is hiding, if he hasn't slipped across the border yet. I had another reason too, Sperm Howard's day is over. Don't let him draw you into any of his schemes deeper than you are now. He's coming to the end of the trail."

Footsteps sounded in the hall. Someone tried the door-handle and found the door bolted.

Curly drew a long blue-nosed revolver from beneath his pillow. He looked at Gray. The narrowed eyes of the detective were like half-scabbed steel. In them shone a cold, fierce wariness. His lithe body was crouched, the tense muscles catlike.

"Don't start anything," Curly warned, a rasp to his low command. "Better tell yore friends that," Gray said, almost in a murmur, his gaze fixed on the door.

A fist thumped on a panel. "Do we get in—or don't we?" a cheerful voice demanded. "What's the idea of bolting us out, unless—?"

Through the door came a jovial chuckle.

"Who's with you, Mile High?" Curly asked.

"Sperm Howard. Let us in, fellow, and give us a knockdown to her."

"Might as well let them in," Gray said quietly.

"All right, but don't you go reaching for yore gun. I'll be watching you every minute."

Gray trotted to the door and drew back the bolt, then stepped across to a far corner.

"Come in," Curly said.

Howard waddled in, Mile High at his heels. They stared blankly at Gray. The fingers of Mile High's right hand closed spasmodically, but his arm did not move toward the weapon at his side. It was not time for that yet. Gray had not drawn a gun.

"Keep yore shirts on, boys," Curly snapped. "I don't aim for you to have any Fourth of July in here." One of his hands was under the sheet.

The opaque eyes of Howard shifted to the man in the bed. "What does this mean, Curly? You throwing in with this spy?"

"No, Sperm. He says he dropped in to ask me where is Morg. And don't make any more cracks like that. There's dynamite in them. It's liable to go off and blow someone up. It might be you." Curly spoke softly, but his mouth was a thin straight line not reassuring.

"Don't get on the prod, Curly," answered Howard crustily. "When I find you locked in a room with this fellow who is here trying to make us trouble, I'm entitled to ask questions."

"Sure, but ask 'em gentle, Sperm."

The lank cowpuncher flung out abrupt inquiries. "When did this bird come to town, Curly? What's he doing here? I'll say he can't get away with any such stenanigan. He tipped off Lee Chiswick about the Live Oak business, and he can't tell me anything different."

"Blame yoreself and Sperm and Morg for that, Mile High," said Curly. "You rode out asking for trouble."

The blank eyes of Howard rested on the marshal. "Nothing to that, Curly. The boys were attacked by

these smugglers while riding peacefully through the canyon. I don't know whether Lee Chiswick incited that or not, but he was right there to cut off the retreat of our friends. Looks to me like he was in with the greasers to fix up the ambush. This fellow Gray too. We don't know a thing about him even now. He has lied about himself and abused our kindness from the start. But we're not looking for trouble. Come on, Mile High. We'll go where we are welcome. I'm disappointed in Curly."

His manner of reproachful resignation annoyed the wounded man. "Don't pull that line, Sperm. You knew all along where I stood about these holdups. I stayed out of them, and I'm still doing that. I'm not throwin' in with this fellow here, whoever he is, but I'm not going to let Uncle Sam jump me for what I didn't do. You nor nobody else can pass the buck to me."

"There's no buck to pass, Curly, and if there was you ought to know me better than that," Howard said, shaking his head sadly, a picture of a good man misunderstood. "Let's go, Mile High."

He reached for the doorknob.

"One moment, Howard," interposed the crook-nosed man. "Get this right. I'm here on a little visit, and yore son Lou is at the L C on one. Think that over carefully."

The fat hand of Sperm Howard made a gesture repudiating any lawless intent. "I'm not lookin' for trouble," he said again mildly.

But for an instant, before he vanished from sight, the certain lift in front of the blank eyes, to show a venomous glare behind which the lust of murder lay crouched.

Gray laughed mockingly. "Too bad to misjudge such a fine upstanding citizen."

Curly did not laugh. "Fellow, you're in a tight," he said acidly. "Don't let him fool you."

"He's not foolin' me a minute," the officer replied. "Mr. Howard means to blast me soon as it is safe."

Gray said good-by to Curly and walked out of the room. He tipped down the same back stairway up which he had come a short time earlier. Slipping round the house, he crossed the road to the cottonwood grove opposite. At the other side of the clump of trees was a path which angled back to a small adobe house built on the edge of a creek. Through a window he saw a man in his stocking feet sitting at a table reading a newspaper. The man wore spectacles. He was past fifty, a heavy-set, tough-looking customer whose arm muscles bulged beneath the shirt-sleeves.

The man outside circled the house and knocked on the front door.

"Evening, Hank," he said a moment later, smiling at the blacksmith. "Can I stay with you for a while?"

Ransom stared at him in surprise. "Lord love ye, man, where did you blow from?" the old soldier asked. "Come in and rest your weary bones."

Gray walked in and closed the door. "I came from having a talk with Sperm Howard, Mile High, and Curly," he said.

"And they didn't shoot you into a rag doll? Man, don't you know Tail Holt is plain poison for you?"

"So Curly says. Sperm doesn't want any trouble, he claims."

"Where did you leave your horse?"

"In Mack Willard's pasture."

"I'd better rope it and turn it loose outside, so they won't know you haven't left town."

Gray told him where he had left the saddle, and Ransom left to recover it and free the horse.

(TO BE CONTINUED)

Tung Oil Used for Centuries in Orient Before Western World Knew of Its Value

Tung oil was used for centuries in the Orient to waterproof wood, paper and cloth before the western world became aware of its value. By 1922, however, the United States was importing 79,089,293 pounds of tung oil; the next year the figure rose to nearly 96,000,000 pounds—valued at \$14,000,000 and constituting 85 per cent of China's export of the oil. In 1923, 107,356,971 pounds were imported, and by 1936 annual consumption was 127,000,000 pounds. In addition to its primary use in paint manufacturing, notes a correspondent in the New York Herald Tribune, tung oil was adapted to other industries—in insulating compounds, brake linings and gaskets on pumps and engines. But the conditions of the trade in China were such as to hinder further expansion, and to cause anxiety to American consumers.

Production of tung oil in China is a comparatively simple process. With proper climatic conditions—for they are susceptible to spring frosts—tungyu trees require little care after reaching maturity. The fruit—brown and the size and shape of

a small apple, when ripe—can be picked from the ground and husked by hand. The seeds are ground, heated, and pressed, and the oil strained out. With no elaborate machinery being used, the Chinese industry tends to be scattered among many small producers.

These factors make standardization of the quality of the oil difficult, and militate against improvement of the culture of the trees. Adulteration of tung oil with inferior vegetable oils is common. Attempts have been made to induce the growers to ship the seeds to some central spot where they can be processed by modern methods, but without much success.

Sermon Repeated for Sleepers In older days clergymen preached long sermons and demanded more of their flock than do those of today. One such preacher had most of his audience asleep, but they all woke up toward the close and got ready for the closing service when the preacher announced "that, as they were all awake, he would repeat his sermon, hoping now to be heard"

LITERARY GEMS Poe's Tale of 'Gold Bug' Is Very Realistic

By ELIZABETH C. JAMES

AT THE time Edgar Allan Poe was living at Charleston, S. C., his friend, one Legrand, was living on Sullivan Island, just off the mainland. Legrand had long been ill, so that he was attended in his loneliness by Jupiter, a negro servant.

One night in the fall of the year, when Poe was visiting at Legrand's cottage, he found his host greatly excited about a rare scarrabaeus that he had found on the beach. Unfortunately he had lent the specimen to an officer at the nearby army post, but he drew a picture of the bug and handed the drawing to Poe. The latter regarded it a moment, holding it before the light of a blazing fire, and then mentioned that it looked more like a skull than a bug. Legrand became angry and took the paper back, looked at it intently and then dropped into a reverie.

Elizabeth James

A few days later Poe received a summons to come at once to the cottage. At first Legrand appeared preoccupied, then he confided a mysterious plan, stating that they must leave in the late afternoon to carry it out. Poe feared that he was ill, and concurred for the sake of expediency.

Soon they were in a desolate place where the wasteland had never been reclaimed. Legrand indicated the route and Jupiter cut the path through the luxuriant undergrowth. Presently a gigantic tree appeared.

Treasure Discovered. Legrand gave his orders: Jupiter was to climb the gigantic tree, to count the limbs, and to go out as far as he could on the seventh limb. Some time elapsed for the climbing then Jupiter yelled in a lusty style: "Here's a skull!"

Legrand smiled with satisfaction. "Now drop the bug down through the left eye!" Explanations were necessary to indicate the left eye, but presently the gold bug slowly descended. Legrand became more eager. He made certain calculations, marked off 50 feet, drove a stake, and began to dig. The three men dug for two hours, but found nothing.

"Jupiter, I'll kill you!" cried Legrand suddenly. "Which way was that skull facing?" The skull was facing the tree, so the bug had indeed been put through the wrong eye. The entire calculation had to be repeated. When the digging had gone on space the second time, a metallic sound rang out

PIONEERING AUTHOR

The temptation is to write the column about the author and the box about the story. Poe is among the enigmatical writers of America. His literary position is three fold. He originated the analytical story, known to us as the detective story; he ranks high as a literary critic; and he is usually regarded as the greatest poet that our nation has yet produced. Many critics of course do not accept this last evaluation, preferring Walt Whitman.

in the night. Faster they dug, and in the tor height they saw two skeletons. Beneath them was an iron chest. The three men raised the chest, slipped the bands, and with their eyes magnetized, they beheld a king's ransom in gold pieces. Jupiter was left on guard while the others carried the first load to the cottage. A second trip conveyed all the treasure to Legrand's cottage. Poe and Legrand estimated the wealth at a figure far less than the actual value. As they counted it out, Poe urged Legrand to relate how he had first believed treasure to be there. Legrand summarized his story thus:

Legrand's Explanation. That first evening beside the fire, he noticed the skull on the paper which Poe returned to him. The skull had not been on the paper when he had drawn the scarrabaeus. Later he beheld the paper before the fire, heating it cautiously, and saw the picture of a kid slowly appear in one corner. Then a series of numbers became visible, covering the paper. Decoding it, he found directions for locating a tree with a skull on a certain limb, even the number of feet was indicated in the circle. The kid was the signature of Captain Kidd. "And what was the connection between all this and that infernal scarrabaeus that you kept talking about and that you had Jupiter let down through the eye of the skull?" "I was irritated that you thought me crazy, so I thought I would give you something to think about," Legrand said. "The gold bug has no connection at all, except I was drawing the picture of it, for it is a rare species, when the hot fire called my attention to the fact I held not paper, parchment."

To obtain this pattern, send 15 cents in stamps or coins (coins preferred) to The Sewing Circle, Household Arts Dept., 250 W. Fourteenth St., New York City.

Please write your name, address and pattern number plainly.

NERVOUS?

Do you feel so nervous you want to scream? Are you tired and irritable? Do you need sleep? If your nerves are on edge and you feel you need general system tonic, try Fisk's Compound. It's the nature built up your physical resistance and thus helps calm quivering nerves and loosen disordered functions. It's a tonic which cleans, soothes, and restores. Why not give it a chance to help YOU? Over one million women have written to Fisk's Compound.

Generous Tree Clear, cold spring water flows from the trunk of a tree on a ranch near Grass Valley, Calif.

KILL ALL FLIES DAISY FLY KILLER. Flied anywhere. They fly over streets and in the air. Kill them with Daisy Fly Killer. It's a powerful, effective fly killer. It kills all flies, including house flies, stable flies, and mosquitoes. It's safe for people and animals. Buy it today!

WNU—M 28—31 Encouraging Men aren't to succeed, not it all.—Thbreau.

Sentinel of Health

Don't Neglect Them! Nature designed the kidneys to do a marvelous job. Their task is to keep the flowing blood stream free of an excess of toxic impurities. The act of living—1/2 life—is constantly producing waste matter. The kidneys must remove from the blood if good health is to endure. When the kidneys fail to function as Nature intended, there is retention of waste that may cause body-wide distress. One may suffer nagging backache, persistent headache, attacks of dizziness, itching up at night, swollen puffiness under the eyes—feel tired, nervous, all worn out. Frequent, scanty or burning passages may be further evidence of kidney or bladder disturbance. The recognized and proper treatment is a course of medicine to help the kidneys get rid of excess poisonous body waste. Use Doan's Pills. They have had more than forty years of public approval. Are endorsed by the country over. Based on Doan's. Sold at all drug stores.

Local and Personal

Miss Edith Hall, daughter of Mr. L. P. Hall was in town Tuesday accompanied by Mr. Johnnie B. Ray, McClure, and George Taylor.

Mrs. Edith Leonard and children of El Paso are visiting Mr. Leonard's mother, Mrs. Tuttleton.

Miss Elizabeth Day has been visiting relatives in Lincoln.

Rev. and Mrs. I. C. Vandiver visited their daughter who resides in El Paso last Tuesday and Wednesday.

Mr. Elmer Baker returned from Carrizozo on Monday.

The Lincoln County Agency has installed on their electric chaff cutters, which are equipped with a special attachment to cut the straw into small pieces.

Mrs. Inez Hart who resides on her husband's farm near El Paso.

Mrs. Reynolds and her daughters, Hazel and Annie and Sterling of Baird, Texas, and Mrs. Reynolds' daughter, Dan Conley for four days of the week.

Miss Ruth Peppan of Dallas is visiting the families of Mrs. L. H. and Gene Dow, Sr.

Mrs. Harbison, mother of Mr. Frank English is spending the week with her sister, Mrs. Louise Ward.

After three weeks at home, Mrs. Katherine Kelt has gone to Albuquerque where she will be employed for the summer.

Mrs. A. C. Russell, of Bonto Dam, is in Lincoln, her father and mother, Mr. and Mrs. J. C. Russell, of Veneta, Calif. A sister and family, Mr. and Mrs. P. W. Wilson, of Hopedale, Calif. and a brother and family, Mr. and Mrs. Tom Fisher, of Mirt, Texas, are also visiting her.

Mr. and Mrs. Roy Teator and family, Mr. and Mrs. Gillette and family, and Mr. Rufus Hughes and family of El Paso were in Lincoln on Monday and Tuesday of this week. What they went up to do is a day's outing. Mr. and Mrs. Hughes accompanied them on the picnic.

Mrs. C. J. Jones, who has been attending the University at Albuquerque, was in Carrizozo Wednesday.

Miss Thelma Peters was in El Paso on Wednesday.

Miss Ruth Skinner is spending the week with Miss Martha Mathews Smith.

Mr. Sam Norman who is employed at Bonto Dam has returned from a visit to Hutchinson, Kansas.

Mrs. R. J. Le Ward of Alamogordo is spending the week with her sister, Mrs. Louise Ward.

Legion Auxiliary

Ladies of the American Legion Auxiliary met at the home of Mrs. Dan Conley, the evening of July 8th. Plans were made for a dance to be given in the near future. Vice President, Mrs. Joe West, presided over the meeting in the absence of the president, Mrs. O. Bamberger, who was away vacationing.

Motions were made and carried to send the 'units' quota of money to buy pillow cases for the nursery at the Veterans' Hospital at Albuquerque. A report was heard on the District meeting which was held at Tularosa June 17th.

After the business meeting, the hostesses Mrs. Joe West and Mrs. Thelma Peters served sandwiches and lemonade to the members and a number of the Legionnaires who, after the adjournment of the meeting, joined in the social hour. Reporter.

Cows Decrease 398,000 in Number During Past Year

Washington.—The number of milk cows on farms decreased an average of more than 1,000 a day during 1938, according to reports to the Department of Agriculture.

The milk cow population, which has declined 7 per cent—nearly 2,000,000 head—during the past three years, is believed to have reached the low point, the department said.

Some increase in milk cow numbers is expected in the next two years and a more marked increase to be anticipated in 1939. There are now about one cow to every five persons in the United States.

The cow population dropped from an all-time peak of 27,931,000 head in 1934 to a five-year low of 25,040,300 head on January 1, this year, the department "cow census" showed.

The drought and high feed prices in relation to the price of dairy products was blamed for a decrease of 398,000 head of milk cows last year. Prices of milk cows have been unusually low in relation to other commodities during the past three years. The inventory value per head rose from \$27 in 1934 to \$50 on January 1, 1937.

Beauty

May be "only skin-deep," but don't depend on ordinary care to pass you in the daily "close-up" tests.

Use standard brands of tissue cream, and hair dressing.

Hands

need nail creams, cuticle lotion, and creams. We have Proton for brittle and splitting nails.
