LINCOLN COUNTY NEWS

Official U.S. Land Dist. Paper

VOLUME XIV—[Carrizozo News, Vol. 28] CARRIZOZO, NEW MEXICO, FRIDAY, MARCH 17, 1939 NUMBER 38

News Notes of Carrizozo Schools

The Physical Education Class, under the direction of Mrs. Honaker, gave a "Penny Social" last Friday which was enjoyed by all who attended. The enjoyment included a morgue, Japanese tea garden, fish pond, auction, games of many kinds, Kay Kayser's school. The income was very gratifying for the Athletic Association.

Two new students have enrolled in school this week. They are Raymond Hobbs, Junior, and Ward Hobbs, Freshman, from Gran Quivira.

The Home Economics girls have started a very interesting unit in which they are learning to make their own clothes.

The High School track team has started their practice.

The Junior play, "No-Account David," which was presented Thursday evening, was well attended. The Juniors wish to thank you for your patronage.

The Sociology Class members are taking imaginary trips. Each girl has chosen some foreign country to visit.

The Seniors are making plans for their play which will be given some time next month.

Mr. and Mrs. Stiles and Mr. Carpenter will spend the week-end in Albuquerque visiting relatives.

Attention, Ladies!

New York, March 15.—Half a million dollars worth of perfumes, cosmetics, powders and other aids to feminine beauty are to be on exhibition in the Cosmetics Building at the New York World's Fair 1939.

McAllaster Appointed S. P. Land Commissioner

Appointment of Turner McAllaster as land commissioner of Southern Pacific Lines, to succeed the late C. F. Impey, has been announced by D. V. Cowden, real estate and tax commissioner for the railroad.

The title of railroad land commissioner is a familiar one in the McAllaster family, both his father and grandfather having served in that capacity for Southern Pacific and Union Pacific, respectively, it was pointed out.

McAllaster began his railroad service with Southern Pacific in 1908 as secretary to the land commissioner, and has continued in that capacity, having held the post of assistant land commissioner for the past two years.

R. C. Hemphill, Agent.

"Quints" to Enjoy Their First Excursion

Ottawa, Canada, March 15.—Those world famous five little girls, the Dionne Quintuplets, will have their first vacation on May 22, when they will journey to Toronto, to be the guests of King George and Queen Elizabeth of England.

This trip was made possible by the Canadian Government, who extended them the invitation, and who will provide two special railway cars to transport the entire Dionne family.

This will be the "Quints'" first trip away from home.

The little girls will be 5 years old on May 28.

Rainbows Honor Brides

Last Saturday afternoon the Rainbow Girls honored Mrs. Glenn King and Mrs. Johnny Estes with a miscellaneous shower at the home of Mrs. Jimmy Duncan. The honoree received many lovely and useful gifts. Games of Chinese checkers and fiddlesticks were played. Refreshments of cocoa, sandwiches and cookies were served. A pleasant time was spent.

Court Items

Teofilo Salazar, was convicted by the jury at nine o'clock March 15 of second degree murder for the death of Tranquilino Montoya at Tinnie on December 8, 1938. Sentence will be imposed later on during the court term. Two other defendants for the same murder, Margarita Sedillo and Cruz Sedillo were found not guilty. These latter showed their appreciation of the verdict by shaking hands with each juryman.

Kenneth Sexe pleaded guilty this morning, March 16, to a charge of killing a dog. Ruidoso, N. M.

The Court is hearing the case of State vs. Frank Riddle who is charged with arson. He is charged with setting fire to the house belonging to Mrs. Riddle, his wife.

Farm Meeting at Hondo

An educational meeting on the 1939 Farm Program will be held at the Hondo schoolhouse, Saturday, March 18, 7:00 p. m.

The meeting will be conducted by the committeeman of that community, the County Extension Agent, and the A. C. P. Secretary.

This is the third of a series of meetings held in the county concerning the farm program. The meeting will be held for the purpose of discussing with the farmers how they can earn the most under the farm program.

Farmers are urged to attend, so that their individual problems may be worked out and that they may have a clearer understanding of the program.

This meeting applies only to the farm program. Meetings to discuss the range program will be scheduled soon.

Music-Drama Study Club

The Music-Drama Study Club met on Thursday evening, March 9, at the home of Mrs. Albert Ziegler. A most enjoyable program of readings and musical selections was given. Meeting place for April will be announced later.

Mrs. John E. Hall and little son are quite ill of influenza.

Last Sunday's El Paso Times carried a photograph of Miss Marian Selby, daughter of Major and Mrs. John Selby of Roswell, whose engagement to Lt. T. A. Spencer, Jr. has been announced. Miss Selby is a student in the Colorado Woman's College in Denver. Lt. Spencer is located at Hamilton Field, Calif.

Mrs. W. R. Farmer, of Van Nuys, California, subscribed for the News this week. Mrs. Farmer is the daughter of Mr. and Mrs. C. Carl. Another new subscriber is Frances Burch, Capitan.

Poverty or Conservation

By JAY N. DARLING

President, National Wildlife Federation

THIS disclosure purports to be a general discussion of conservation, toward which we have dedicated a great many banquets but have made very little practical progress. We have, as a nation, specialized on exploitation. We have exploited our forests, exploited our rivers and lakes, exploited our soils and exploited our wildlife. The question is, how long can we continue by exploitation alone? It was Benjamin Franklin who wrote "Forever taking out and never putting anything in soon exposes the bottom of the meal barrel." Conservation is the reverse of exploitation, and unless we soon begin to counteract exploitation, by the practice of conservation, how soon shall we find ourselves at the bottom of an empty barrel, looking out through the bunghole at our departed standards of living.

The term conservation has too often been accepted as though it applied only to forests, fish and game, and the beauties of nature. Quite universally conservationists are looked upon as close relatives of "Ferdinand the Bull," whose sole ambition was "just to smell the flowers." Within the ranks of conservationists we discover group self-interests whose motives are only slightly removed from those of the exploiters. The landman thinks only of land conservation; the birdman thinks in terms of saving the birds; the fisherman thinks conservation means more and bigger fish. Each is, of course, an integral part of conservation, but we can no more succeed by thinking of conservation in terms of a single pet resource by itself, than we can think of the legs of a man

(Continued on Page Four.)

Juniors Present Play

The Junior Class of Carrizozo High School presented "No-Count David" a comedy-drama in three acts last evening to a good crowd at the High School auditorium.

Students taking part were Hilda Barnett, Albert Bates, Mary May Freeman, Bobby Mackey, Dorothy Rogers, Alameda Bowlin, Robert Hemphill, Ralph Pruett and Melton Evans.

All characters were well taken and all members of the cast acquitted themselves with distinction.

First Methodist Church

J. M. Glazier, Minister

Sunday, March 19th

Sunday School, 10:00 A. M., Mr. Frank Adams, Superintendent.

Sermon Themes:

11:00 a. m. "Man's Conflicting Selves."

7:00 p. m. "The Greatest Miracle."

We try to speak these messages to your religious needs. Come and let us know what yours are, and find help in sermon and music.

What you receive will be commensurate with the self you put into it.

"Mountain Man," our new serial starts in this issue.

Singing Convention

The next tri-annual all-day singing convention will meet at the Community Hall in Carrizozo, on Sunday, March 26th. The singing will begin at 10 a. m. and will close at 8:30 p. m., with an hour's recess at noon to enjoy a basket dinner. Many visiting singers are expected, and all interested in gospel singing in Lincoln county are invited to attend.

Order of Service of First Baptist Church

(March 19, 1939.)

Sunday School 10 A. M.

Preaching service 11 A. M.

Evening service 7:30 P. M.

Choir practice Wednesday evening 6:45 P. M.

Prayer meeting Wednesday evening 7:30 P. M.

L. D. Cochran, Pastor.

I. O. O. F. Notes

The Odd Fellows conferred the first degree on Mr. Sam Welsh last Tuesday. A good crowd of members was on hand.

Last Sunday a large group of members were in attendance at the Baptist church. Rev. Cochran delivered an excellent sermon.

BANKING LOOKS AHEAD

Do Bank Services Affect You

Bank services affect every man, woman or child—whether a bank customer or not.

Our economic system is based on money, credit and banking. Our food, our clothes, our homes, are made possible by credit to the farmer, the shipper, the manufacturer and the merchant. Banks, and the credit they supply, have helped to make possible the American system of enterprise and the high American standard of living. And in so doing they have contributed to the well-being of every person in the country.

This bank will continue its policy of providing helpful service for its community.

Listen for "Song and Story" over KOB each Sunday evening at 4:45 P. M. Sponsored by New Mexico Banker's Association. 4-7-39

Double Wedding

An event of interest to many local and Nogal people took place last Sunday morning, March 12, at the home of the Baptist pastor, Rev. L. D. Cochran, when he performed a double ceremony, which united in marriage Miss Carrie Dell Zumwalt, and Mr. Floyd Smith of Nogal, and Miss Madelle Yates, of Carrizozo, and Mr. Noel McDaniel, of Nogal.

The brides are attractive and popular, and are members of prominent families. The grooms are industrious young business men. Mr. McDaniel is employed by the Southern Pacific Company, and Mr. Smith operates the mercantile store at Nogal owned by Smith and McDaniel. Both couples have the best wishes of friends.

ANCHO NEWS

Mr. and Mrs. Halley Hall and children left Tuesday morning for their new home at Socorro, N. M. Mr. John Dale accompanied by Mr. John E. Hall also left the same day with the household goods, old "Bossy" the cow and their nice portable house, which Mr. Hall and Halley have been working on for several weeks. We regret losing these good neighbors but wish them success in their new home.

Mrs. Allen Kile visited the Straley families this week at Ancho and Luna. The Kiles live at Tucson, Ariz.

Mrs. Dick Willis, sister of Mr. Bill Nickels taught in his place a few days during his absence while suffering from flu.

Mr. L. V. Hefker from Coyote, is relieving Mr. J. C. Brickley at Luna while he is in jury service at Carrizozo.

Mr. and Mrs. Henry Morris received the sad news of the sudden death of their brother-in-law Tuesday in Fort Worth, Texas.

Mr. George Goodson is back on the job after several days off with the flu.

The children of Mr. and Mrs. Cap. Straley have been sick the last week from flu.

Mrs. John Dale and son, Elmo, were Corona business visitors this week.

Mrs. J. W. Balow is recovering from a spell of illness, we are glad to report.

Mr. and Mrs. J. M. Frame, Ancho; Mr. and Mrs. Bert Penix, Corona visited the Geo. Goodson home Sunday.

Mr. and Mrs. H. T. Porter were Carrizozo visitors last Saturday.

Mr. and Mrs. Bryan Hightower made a rush business trip to Roswell Wednesday.

The little daughter of Mr. and Mrs. Perry Melton is doing nicely, having had a very bad sick spell.

Wallace, son of Mr. and Mrs. L. P. Hall is staying with his aunt, Mrs. J. E. Hall during Mr. Hall's absence.

Mr. Harry Straley went to Roswell last week to attend the funeral of a cousin.

John Allen Hightower, played a violin solo last Sunday at Sunday School which was greatly enjoyed by everyone. John Allen is a pupil of Mrs. Bill Nickels.

Mrs. Frank Woodside came up from her Three Rivers home and spent the week-end with her husband Agent Woodside.

Mr. and Mrs. J. M. Frame visited Mr. and Mrs. Ben Burns of Carrizozo last Saturday evening.

The young son of Mrs. Juanita Frausto was sick with flu last week-end.

New County Nurse And Consultant Here

Lincoln County welcomes the new County Health Nurse, working under the immediate direction of Dr. C. W. Gerber, District Health Officer.

Miss Holst, a graduate of Kansas City General Hospital, received her public health nursing training at Teachers' College, Columbia University, New York City. Her liberal experience in public health nursing has included such responsible positions as assistant supervisor on the staff of "Henry Steele Visiting Nurse Association;" Managing Director of St. Louis County Welfare Federation, St. Augustine, Florida; nurse in charge of the Dental Hygiene Clinic in Trenton, N. J; has also studied abroad in Paris, Vienna and Geneva.

In order to assist Miss Holst with initial organization of her service in Lincoln County, Dr. Gerber, District Health Officer, has assigned Mrs. Katherine Baker consultant in Public Health Nursing to Lincoln County for a week or two. —Contributed.

The Las Cruces Daily News has sold out to the Sun Publishing Company, and now Las Cruces has only one daily, "The Las Cruces Sun-News." Both papers had many excellent features, which are now combined in the one paper.

Lyric Theatre

Friday and Saturday
Hopalong, Windy and Lucky in
"SILVER ON the SAGE"

Taken from the song of the same name which was heard in "The Texans." This picture gives Hopalong the toughest assignment he has yet had, when twin brothers, one a gambling hall owner, the other a double crossing ranch foreman, make it plenty tough for him.

Night show at 7:30

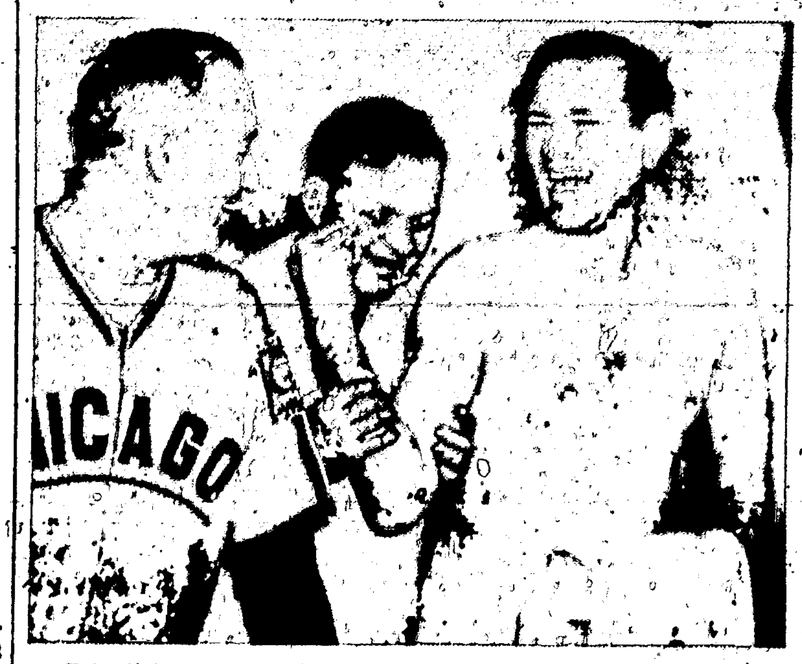
Mechanized Cavalry Practice Wartime Maneuvers

Weather conditions and rough terrain do not stop the mounted soldier. He operates as well in fog or rain as when atmospheric conditions are favorable. To the horse cavalry the passage of bad terrain is all in a day's work—rocks and hills, sand and mud, forests and rivers never stop them. Graphic illustration of this is furnished in the picture at the left where a 75-mm gun battery unit nears the top of a steep hill during First Cavalry division maneuvers at Fort Bliss, Texas. Right: A 75-mm gun unit photographed during night firing.

GLOVED GOURMET

Either the corn was too hot for this old fellow or else he couldn't wait to take off his gloves before digging into the delicious corn-on-the-cob. He is one of the many hungry, homeless vagrants fed by the Volunteers of America soup kitchen in Detroit.

'Dizzy' Confident Arm Is in Shape



Take it from Jerome "Dizzy" Dean, his "ahm" is all right. He also stated that the shoulder which was injured last season has been given a complete rest all winter. Dean was one of 13 pitchers in spring training practice at Santa Catalina island, Calif. Left to right: Charles Leo ("Gabby") Hartnett, manager of the Chicago Cubs; Andrew Lelshaw, trainer, and Dizzy himself.

Royal Guest—Award Winner—Stylist

In an official announcement from London recently Lady Nunburnholme was listed as a member of the party of King George and Queen Elizabeth when they visit Canada and the United States in the near future. Bette Davis, center, pictured as she appeared in "Jezebel," a role which won for her this year's Motion Picture academy award for the best performance of a film actress. "Women's hats will be saner this spring," according to Lilly Dache, fashion authority, who arrived in New York from Paris recently.

Bachelor Hairdresser Adopts Baby Boy

Happy indeed are Sydney Guilaroff, 30-year-old Hollywood bachelor, and Jon, the 10-months-old baby boy he has adopted. Guilaroff says he is the nation's highest paid hairdresser, and, as far as he knows, the only bachelor in the nation to adopt a baby. He took the boy when he was six days old because he liked babies.

DEADEYE DICK

Young Dick Shaughnessy of Dedham, Mass., set a new world record in the annual Middle Atlantic skeet championship in Morristown, N. J., recently. His high average for the three events, the .410, 20-gauge and all-bore was 300.

WHAT to EAT and WHY

C. Houston Goudiss Reveals Several Reasons Why Food Sometimes Disagrees; Warns Against Eating When Tired or Worried

By C. HOUSTON GOUDISS

A GREAT many people have the unfortunate habit of warning friends and acquaintances against this or that food, on the ground that it is "difficult to digest," or "is almost sure to cause digestive distress, especially if eaten at the wrong time of day or in combination with the wrong foods." Indeed, to hear some men and women recount the various dishes that are best left alone, is to wonder how they manage to find anything to eat at all, in view of the many good foods they consider taboo!

Certainly there is no objection to food as the topic of conversation.

It is so basic to good health that it should be uppermost in the mind of every individual who desires to promote physical and mental efficiency. And it is also natural for a person to be guided by past experience in determining what he should eat, and what it may be advisable for him to avoid.

But it is a grave mistake for one person to warn another against any food or combination of foods on the ground that it will cause digestive distress. For the truth of the matter is that under proper conditions, a normal, healthy person should have no difficulty in digesting almost any food that has a place in the well-balanced diet.

Food Dislikes Often Unfounded

I once met a woman who told me that her contented-looking husband could, and did, eat most everything 'cept horseshoes. Menu planning was simple for her! And how different from the problems of the home-maker who must try to reconcile her menus, both with the food dislikes of various members of the family, and with the foods that they declare they can't eat, for fear of digestive distress.

It is true, of course, that individuals differ greatly, and occasionally a food that can and should be eaten regularly by most people, will cause distress in an individual case. But that is no indication that the food will have the same effect on another person, and it is misleading either to proffer or accept advice of this nature from friends.

It may be that the victim has an allergy to the food in question—that he reacts to it differently than the majority of people. But there is also the possibility that the prejudice exists because of some previous distress, caused, not by the food itself, but by the circumstances under which it was eaten.

Perhaps a clearer understanding of some of the mental and physiological factors influencing digestion would dispel many of the bugaboos that cause people to avoid various, wholesome foods and food combinations, and to warn others against them.

Emotions Influence Digestion

Scientists have established that the stomach is capable of reacting to almost every emotion and sensation that is experienced by men and women. Thus, how you eat becomes quite as important as what you eat. And any food or combination of foods consumed when you are tired, worried or angry, may cause acute distress, whereas the same food, when eaten at another time, may be digested without the slightest disturbance.

This indicates the folly of jumping to the conclusion that you can't eat this or that, and shows that one is scarcely justified in warning friends or relatives to avoid certain articles of diet.

There is a large amount of evidence that fear, anger or anxiety have the effect of diminishing the gastric secretions, and further, of arresting or slowing down the movement of the intestines.

If food is eaten under these conditions, it may remain stagnant in the alimentary canal, with the subsequent formation of gases and decomposition products. But instead of recognizing the true cause of the trouble, many people erroneously blame the food itself!

Medical men have frequently noticed that people often develop gastric disturbances when they suffer financial reverses, and continue to suffer from them until their financial condition improves—a striking demonstration of the importance of banishing fear and worry!

Never Eat When Tired

Almost any food may cause distress when one is suffering from fatigue. So it is unwise to sit down to a large meal when exhausted from too much physical or mental work. A brief rest before eating will put the body in much better shape to receive and assimilate the food.

Then, if the meal is served in pleasant surroundings, and if the food is flavorful and well cooked, the chances are that it will be digested satisfactorily by all normal individuals.

Be Tranquil at Mealtimes

In view of the fact that tranquillity of mind is essential to the proper utilization of food, homemakers should remember never to discuss unpleasant subjects at meal times. Don't nag the children about eating, or choose that time to discuss their lapses from discipline. Don't talk about finances or take up real or fancied grievances with your husband. Let such matters wait until the meal has been digested.

If these suggestions were more generally followed, it is almost certain that we would hear much less conversation about foods that cause distress, much more wholesome talk about the pleasures of the table.

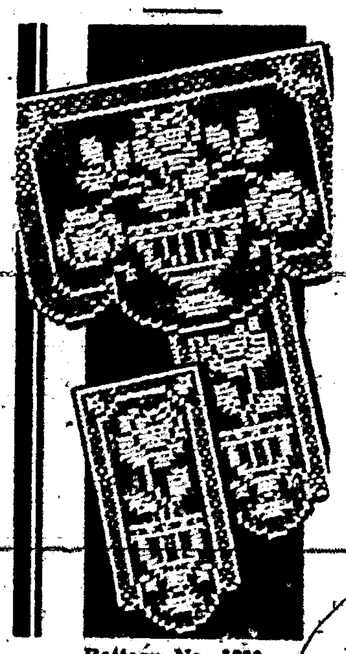
Filet Crochet Design For Chair or Scarf



Pattern No. 1830

This graceful bowl of filet crochet roses is set off by the K stitch. The design is lovely as a chair set, scarf ends, or buffet set. Pattern 1830 contains directions and charts for making this set; illustrations of it and of stitches; materials required.

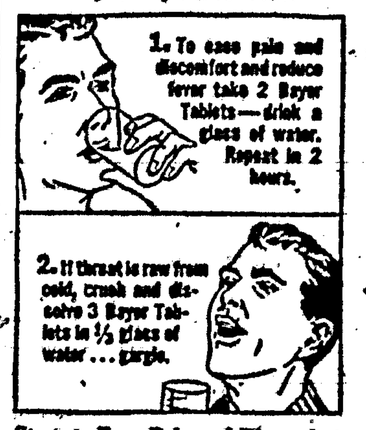
Send 15 cents in coins for this pattern to The Sewing Circle, Needlecraft Dept., 82 Eighth Avenue, New York, N. Y.

Please write your name, address and pattern number plainly.

DO THIS

TO RELIEVE PAIN AND DISCOMFORT OF A COLD

Follow Simple Method Below Takes only a Few Minutes When Bayer Aspirin Is Used



Starts to Ease Pain and Discomfort and Sore Throat Accompanying Colds Almost Instantly

The simple way pictured above often brings amazingly fast relief from discomfort and sore throat accompanying colds.

Try it. Then—*see your doctor.* He probably will tell you to continue with the Bayer Aspirin because it acts so fast to relieve discomforts of a cold. And to reduce fever.

This simple way, backed by scientific authority, has largely supplanted the use of strong medicines in easing cold symptoms. Perhaps the easiest, most effective way yet discovered. But make sure you get genuine BAYER Aspirin.

Thoughtless Words

Words without thought never to heaven go.—Shakespeare.

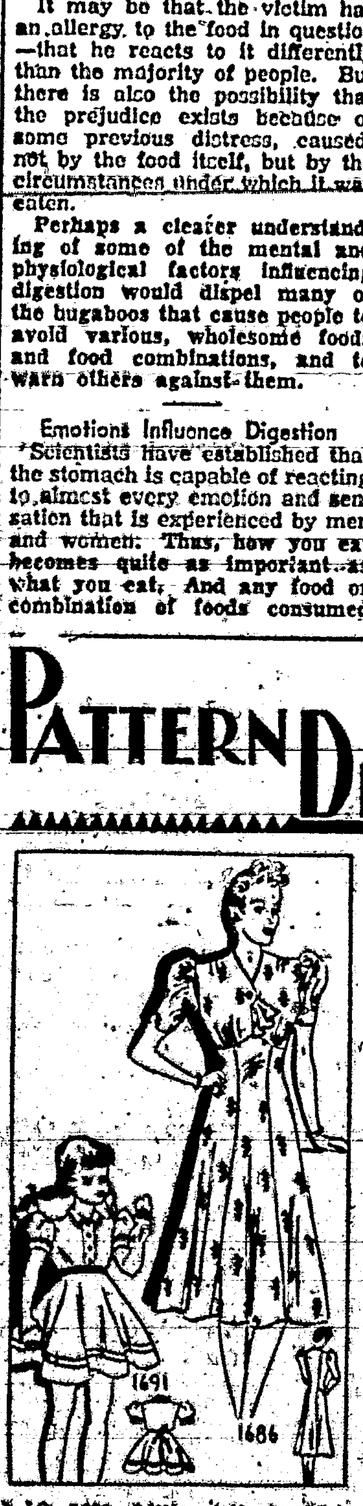
To Check Constipation Get at Its Cause!

If constipation has you down so you feel heavy, tired and dopey, it's time you did something about it. And something more than just taking a physic! You should get at the cause of the trouble.

If you eat the super-refined food most people eat, the chances are the difficulty is simple—you *don't get enough "bulk."* And "bulk" doesn't mean heavy food. It's a *kind* of food that isn't consumed in the body, but leaves a soft, "bulky" mass in the intestines.

If this common form of constipation is your trouble, eat Kellogg's All-Bran for breakfast every day and drink plenty of water. All-Bran isn't a medicine—it's a *crunchy, toasted, nutritious cereal.* And it will help you not only *to get regular* but to *keep regular, day after day.* Made by Kellogg's in Battle Creek. Sold by every grocer.

PATTERN SEWING CIRCLE DEPARTMENT



NO. 1691—Little girls should be seen (if not heard!) in simple, flare-skirted frocks like this one, that looks wee at the waist, flaunts a narrow ribbon sash, and bright rows of braid or ribbon. For school and everyday, make this dress of gingham, percale or batiste, with ricrac for trimming. It will be equally pretty for dress-up, in taffeta or organdie, with velvet or ribbon trim.

Slenderizing Lines.

No. 1686—A lovely dress for afternoon parties is this new one with a princess skirt, v-neckline and jabot trim. Every detail is designed to make you look slimmer. The bodice fits beautifully, thanks to darts on the shoulders and gathers above the waist. And of course nothing could be more slenderizing than a skirt like this. Choose flat crepe, small-figured silk print, georgette or chiffon for this design.

No. 1691 is designed for sizes 4, 6, 8, 10 and 12 years. Size 6 requires 2⅝ yards of 35-inch material, with 7 yards of braid or ribbon to trim, and 2½ yards ribbon for belt.

No. 1686 is designed for sizes 36, 38, 40, 42, 44, 46, 48, 50 and 52. Size 38 requires 4⅛ yards of 39-inch material, with 1¾ yards of edging.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coins) each.

Easter Costume Is Prettied With Beguiling Accessories

By CHERIE NICHOLAS

IN PLANNING your Easter outfit remember that fashions this season have gone utterly, enchantingly feminine. The whole story is one of softly styled suits, dresses and coats that are garnished with brain-storming accessories and breath-taking color schemes all of which bespeak womanly wiles and witchery.

It matters not how fundamentally simple and demure your costume starts out to be, by the time it has been accessoried in accord with fashion's idea of things for spring, it will have become a masterpiece of sophistication.

And so, in the forthcoming Easter fashion parade, eyes will shine from behind romantic veils as gaily colorful as blossoms in springtime, gloves will be worn that look as if they may have been dipped in Easter egg dyes, hats will be as sweetly feminine as flowers and wing trimmings and ribbons can make them. However, for news that is biggest news there's nothing quite so exciting as the irresistibly lovely lingerie touches of frothy frills and dainty lingerie neckwear fantasies that give a freshness to spring outfits.

When it comes to the costume-ideal to wear on a gladsome Easter day choose a suit. Style-leaders have already declared this to be a suit season. This year suit enthusiasm reaches a new high, especially so because the woolens that fashion them are beyond a doubt the handsomest that ere glorified the fabric realm. It would be beyond human imagination to conceive of weaves more eye-appealing than the gorgeous plaids and stripes that go to make up the jaunty jackets that partner with pleated or gored swing suits registering as "little girl" fashions for grown-ups on the new style program. And tweeds! We have gone so completely English on the subject of tweeds. There are suits and ensembles and gowns galore to choose from made of the daintiest most fetching woolens that ever you saw.

So, if your fancy turn to other than tweed why not a superbly tailored pencil-striped lightweight wool crepe suit such as centers the group pictured?

To the right in the picture, see what white violets and frothy white organdie do in the way of toning a sheer black wool dress up to a fascinating degree of feminine allure. The draped cowl of embroidered organdie with val edging as here worn is real news as to what's doing in the neckwear realm this spring. Top this costume with a white violet crowned hat, add a violet corsage and you couldn't look sweeter on a bright Easter morn.

To the left is a charming suit in navy serge with collar and cuffs of pique.

With a greater than ever suit season heralded for spring one can't possibly have too many blouses, and the big news in the blouse realm is the revival of the sheer handmade "baby blouse" exquisitely tucked and frilled, hand-embroidered and lace trimmed. See the picture of one of the newest lingerie blouses inset in the group below. It is of self-printed organdy. Note the new fluted collar with its tiny narrow lace-trimmed edge to add to its sheer daintiness.

© Western Newspaper Union.

Style Intrigue

Jacket costumes are having their big moment this spring. According to reports more jacket suits are selling than any other type. The jacket suit presents a particularly interesting theme in that it invites not only intriguing color schemes but also it affords opportunity for contrasting materials, features which designers are playing up most dramatically. The clever plaid jacket pictured has an individuality all its own in that the arrow-shaped contrast fastenings add an unusually interesting decorative note.

Back Comes Sheer Lingerie Blouse

All signs point to one of the biggest, best and most exciting blouse seasons that has ever gone on record. Which of course is the same as telling you that suits are "tops" this spring and to meet the demands of a suit nothing less than a well-stocked wardrobe of blouses will suffice.

The most important message about the exciting blouse furore that is now going on is the revival of the exquisitely sheer lingerie type which is that naive and innocent and young looking it registers on the style program under such endearing terms as baby blouse and it is just that—a confection of finest batiste or organdie all handworked with wee tucks, embroidery and lace edgings, just too lovely for words.

For practical daytime wear you'll be wanting several washable crepe blouses and the gypsy-stripe blouses are practical too and flamboyantly colorful tuning perfectly into fashion's mood this spring.

Gloves Are Worn In Dashing Shades

Your gloves must tune to the color scheme of your costume. The shops are showing doveskin slipons, also fine fabrics in all the new tones, tints and hues. Fuchsia shades lead and violene is also popular. Very smart are the new pink tones as well as a range of blues.

Seasonal Shades

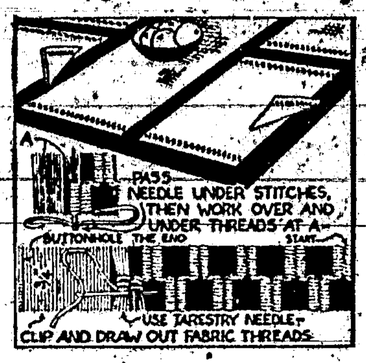
Greens and browns will be leading shades for sports clothes.

Open Toes for Spring

There's nary a closed toe in the lot of smart shoes for spring.

HOW TO SEW

by Ruth Wyeth Spears



"DEAR MRS. SPEARS: I had been wanting some really handsome velvet roses to pep up an evening dress. I was thrilled to find in your Book 2, instructions for making them from materials I already had. I would also like to thank you for the knitted rag rug in Book 1. My Mother spent many happy hours making it last winter."

"I thought you might be interested in a luncheon set I have just finished. It was planned to go with a set of blue dishes. There are four mats and a long runner in medium blue linen with bands of old fashioned needle weaving in darker blue across the ends. Just two edges of the napkins are banded with the weaving."

We can imagine how attractive the table must be set with these mats and the blue dishes. Some of you who have pink dishes might like to try the same idea in tones of rose. Use a rather coarse linen. Prepare the work for the weaving by drawing out the fabric threads as for hemstitching. Each step is shown here in the diagram. Either linen or mercerized embroidery thread may be used.

Sewing Book No. 2, Gifts, Novelties and Embroideries, contains 48 pages of step-by-step directions which have helped thousands of women. If your home is your hobby you will also want Book 1—SEWING, for the Home Decorator. Order by number, enclosing 25 cents for each book. If you order both books, copy of the new Rag Rug Leaflet will be included free. Those who have both books may secure leaflet for 6 cents in postage. Address Mrs. Spears, 210 S. Desplaines St., Chicago, Ill.

TIPS to Gardeners

Flowers for a Purpose

GARDENERS want flowers for house bouquets, for beautification of the yard, or both. To be certain of an abundance of flowers for cutting throughout the growing months, however, the gardener need plant packets of only three or four of the following flowers:

Annuals—snapdragon, aster, calendula, calliopsis, candytuft, carnation, bachelor button, cosmos, dahlia, larkspur, annual lupin, marigold, nasturtium, salpiglossis and zinnia.

Perennials—columbine, coreopsis, gaillardia grandiflora, perennial lupin, pyrethrum (painted daisy) shasta daisy and delphinium.

For earliest bloom, the following are recommended by Gilbert Bentley, flower expert: Calliopsis and candytuft among the annuals, and coreopsis, delphinium and pyrethrum among the perennials.

For late-blooming cut flowers, grow zinnia, marigold, gaillardia, snapdragon, aster, cosmos and dahlia.

Improved Oration

It is a thing of no great difficulty to raise objections against another man's oration—nay, it is a very easy matter; but to produce a better in its place is a work extremely troublesome.—Plutarch.

SAFETY TALKS

Mischievous Hands

MAYBE he picked up the habit about the time he couldn't resist pulling the pig-tails of the girl who sat ahead of him in grammar school. But even though they were more chivalrous in their school days, adult man (and woman) has a lot of trouble keeping his hands and fingers out of mischief.

The National Safety council reports that of all accidents suffered during 1937 by persons who were at work, 33 per cent were hand and finger cases. Legs and feet were injured in 24 per cent of the occupational accident cases. The human trunk was injured in 19 per cent, or the third largest, number of cases.

Other parts of the body and the frequency with which they were injured: arms, 11 per cent; head (other than eyes), 6 per cent; eyes, 2 per cent. The council said general accidents accounted for 5 per cent of the cases.

JUST FUN

Sounds Probable

Magistrate — You are charged with assault and battery by knocking this man down at a street crossing.

Motorist—Not guilty, your Honor, absolutely. He started across in front of me, I stopped to let him go ahead, and it was such a shock he fainted.

His Dish

Jane—George says I look good enough to eat.

Jean—He always did like plain fare.

Just Sales Talk

House Agent—This is a house without a flaw.

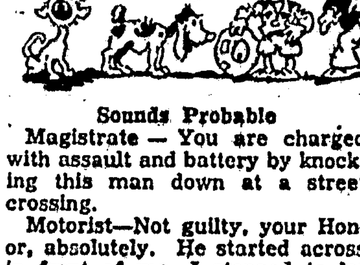
Prospective Client—Gosh! What do you walk on?

No Come Down

Mr. Smith—My wife came from a very large family. Did yours?

Mr. Brown—No, she brought it with her.

HUNTER HUNTED



"Is that dog good to hunt?"

"Is he? I have to hunt for him a dozen times a day!"

Doubtful

"Is Kathleen going to marry that magistrate?" asked Elsie, with interest.

"I don't know," replied Betsy. "He proposed last night."

"Well, didn't she accept him?"

"No; she asked for time to think it over and he gave her six months."

A Reminder

"Are your neighbors honest?" the old Negro was asked.

"Yasir, dey is."

"But you keep that loaded shotgun near your hen coop."

"Yas, dat's to keep 'em honest."

All work and no play makes Jack a dull boy to everybody except his boss.

A Day Dream

Tom—My wife had a dream last night and dreamt she was married to a millionaire.

Bill—You're lucky, old chap, my wife dreams that in the daytime.

Uncle Phil Says:

Not by Compulsion

The best "improving" of moral character is by advice and example.

"It isn't loaded" never reassured a living soul.

A friend is one who thinks you are a dear old cuss when your opinion differs from his

Hardly an Instance of It

Does any man become a millionaire by his own efforts who wasted money in his youth?

Safety is the dividend paid by caution.

When a dog growls over his food he likes it, but with a man it is different.

And Release Is Easier

The boredom of having too much of everything is no greater than the boredom of having nothing.

Vanity dies hard; in some obstinate cases it outlives the man.

How to make the best of life: Dodge some of the drudgery.

Desire to Ride

"The ambition of the average person today is to ride in the cart rather than to help pull it."—Roger W. Babson.

QUESTION
You never seem to have a cold, Ethel.

ANSWER
Perhaps I'm just lucky. But I always use Luden's at the first sign. They contain an alkaline factor, you know.

LUDEN'S 5¢
MENTHOL COUGH DROPS

Sin's Handle

"Sin has many tools, but a lie is the handle which fits them all."—Oliver Wendell Holmes.

Don't Aggravate Gas Bloating

If your GAS BLOATING is caused by constipation don't expect to get the relief you seek by just doctoring your stomach. What you need is the DOUBLE ACTION of Adlerika. This 35-year-old remedy is BOTH carminative and cathartic. Carminatives that warm and soothe the stomach and expel GAS. Cathartics that act quickly and gently, clearing the bowels of waste that may have caused GAS BLOATING, headache, indigestion, sour stomach and nerve pressure for months. Adlerika does not gripe—is not habit forming. Adlerika acts on the stomach and BOTH bowels. It relieves STOMACH GAS almost at once, and often removes bowel waste in less than two hours. Adlerika has been recommended by many doctors for 35 years. Get the genuine Adlerika today.

Sold at all drug stores

WATCH GEORGE WOOD CLOSELY AS HE ROLLS UP HIS JOY-SMOKIN'

1 THE "MAKIN'S"! Ready with the paper, ready with the tobacco! And look at what he rolls—yes, sir, Prince Albert! His name is George E. Wood (insurance) and he says: "Start with Prince Albert and you're all set. I got a yen for P.A. and you're about to see why..."

2 LAYS RIGHT! P.A. smuggles right down in the paper, pinches up tight, thanks to its "crimp cut." "I'll say it rolls firm and neat," says Wood. "It's the easiest-handling makin's tobacco I know of. That special cut helps Prince Albert to smoke cooler and taste mellower..."

3 ROLLS RIGHT! It's so easy to get the "hang" of rollin' 'em if you use P.A. The picture can't show how quickly Wood twirls up his "makin's," but it's only a matter of seconds. "And speakin' of taste," he says, "well, Prince Albert has more taste—more smoke-joy—and no bite."

4 READY! GO! Look at that smile on George Wood's face as he lights up his mellow-smoking "makin's" cigarette. "Show me a man with a P.A. tin peeking out of his pocket," he says, "and I'll show you a real contented smoker who's enjoying a smooth 'makin's' cigarette."

Keeps One Busy

"A fellow has to be a contortionist to get on these days," says a philosopher, "First he has to keep his back to the wall and his ear to the ground." Then he must put his shoulder to the wheel, his nose to the grindstone, keep a level head, and have both feet on the ground."

Agricultural Conservation Program

There will be an educational meeting of the 1939 Range Conservation program, held for Lincoln and Chaves counties in Roswell, March 20, 1939. The meeting is open to anyone interested in the 1939 R.C.P., and are urged to attend.

The meeting will be presided over by the range member of the State Committee, the State Range Examiner, and a representative of the Extension Service.

The topics to be discussed are:

1. Objectives of the 1939 Agricultural Conservation Program.
2. Duties of the County Committeemen and Range Examiners.
3. Interpretation of 1939 Handbook and filling out range forms, WR-815 and WR-816.
4. Necessity of meeting all specifications and requirements set up for each practice.
5. Importance of completing work early in the year.
6. Basic elements of range surveys and their tie-in with the Range Conservation Program.
7. Desirable results which can be obtained from this program.

Our Want Ads

Poverty or Conservation

(Continued From Page One.)

functioning without a body, arms functioning without a head, or a dismembered heart performing its duties without a circulatory system.

Land, water and vegetation are just that dependent on one another. Without these three primary elements in natural balance, we can have neither fish nor game, wild flowers nor trees, labor nor capital, nor sustaining habitat for humans.

To attempt to remedy the lack of fish in our streams or game on our uplands without attacking the ailments of our land, water and vegetation, would be like trying to cure consumption with Smith Brothers cough drops. Building ten thousand new fish hatcheries will not restore the fish unless we first restore the condition of the waters in our lakes and streams so that fish can live in them. We might as well try to restore the Dust Bowl to prosperity by running excursion trains of new settlers to take up life on the depleted Dust Bowl lands, as to pour millions of fish into public waters where the fish have all died out from malnutrition. When fish can no longer live in our public waters, it is a sign that those waters are deteriorated. Denuded lakes and stream bottoms are to fish and aquatic life what the dust bowl is to man.

When water goes, vegetation departs with it. When vegetation departs, soil goes. When soil is gone man can no longer remain. Neither fish nor game nor man can digest inorganic material. Raw earth must first be consumed by vegetation before living things can digest it. Neither man nor beast can live without vegetation and vegetation cannot exist without water and soil.

The horse who bit the parson "because he said all flesh was grass" knew more about conservation than some people I know.

If I read aright the signs in the skies, these more fundamental aspects of conservation have been, and are still, a blind spot in our social, economic and political vision. If we continue to ignore them we shall have not only no fishing or hunting, bu we shall be heading our nation into social, economic and political bankruptcy. The following discussion has been prepared in the hope that when the word "conservationist" is mentioned you will not be reminded of "Ferdinand the Bull" but of the economic and social consequences to the people of this nation.

Servants of culture have traced with pride man's progress from his lowly beginning with a stone ax in his hand and little on his mind, up to and including air-conditioned homes, luxurious transportation and universal education—but these same experts have consistently failed to note that where natural resources failed, culture, progress and civilization died.

Scientists have deciphered the secret formulae of chemistry and physics to transmute saw-logs into silk, to deaden pain and lengthen the span of man's existence with products distilled from nature's organic laboratory, but have they given thought to perpetuation of the source of organic materials with which they perform their magic? That problem remains practically unapproached.

Political scientists and economists have devised formulae for wealth, and labor has claimed to be its sole creator, but none has paused long enough to observe that without natural organic resources there would have been no labor, no political scientists, no wealth and no human life. In other words, our economics have built the superstructure of a house for us, without any reference to a foundation to support it.

Can it be that all our planning and hope of prosperity is based on the false assumption that nature's resources are inexhaustible? Crumbling ruins where ancient civilizations once prospered would indicate that other races and other nations before us have miscalculated their wealth and degenerated to poverty because of the same error our economists are now making.

Boiled down to the fundumental truth, the history of civilization, since man was created, is largely made up of the rise and fall of empires through the exhaustion of resources. History, therefore, in reality turns out to be the story of a hungry man in search of food. Conservation is the job of so managing our soils, waters, and gifts of nature on this continent of ours that man's search of these necessities shall not be in vain.

If we do neglect conservation as history has ignored it in the past, and any considerable portion of our population does search in vain for existence, we shall have increasing poverty, social upheavals and, in spite of our high ideals and worship of peace, we shall have more wars instead of fewer, for wars are the spawn of empty stomachs, and empty stomachs follow—as the night the day—the excess of demand for natural resources over the supply.

No one can look at this continent today, compare it with the way we found it, and deny that we have ruthlessly ignored the law of nature.

Hunger has, since the world began, thrown men at each other's throats. Hunger, or the threat of it, has been, and still is, one of the compelling forces back of racial struggles. Comparative peace reigns in all the biological world while competition between species for sustenance precipitates the death struggle. Man is not exempt from this rule of nature. And America is no richer than her remaining resources.

I can imagine that you are scoffing at this statement with about the same mental reservations that the people of the middle ages accorded the statement of Columbus that this world was round and not flat. We must therefore remember that new ideas which upset our mental comfort is just as painful now as they were in the Middle Ages. To continue to believe that America is not on the road to impoverishment through the waste, consumption and exploitation of its resources is as blind to facts as the ancient belief that the sun revolves around the earth.

The geological record of this continent indicates that the buffalo roamed the North American prairies for 400,000 years. The white man came and liquidated that species in one generation. Thousands of buffalo skulls and remnants of their skeletons, bleaching in the sun, still mark the former range of that departed host.

But far more significant than buffalo skulls, are the other relics of man's destructive practices. Eroding plains, abandoned farms, great dust bowls, rivers and lakes polluted and devoid of acquatic life, eroding hills and wastelands where millions of acres of primeval forests once flourished, are not just a city dump where we throw our cast-off waste. They are empty shelves in our national pantry.

All of those millions of acres of exhausted land, forest and water, once sustained life in comfort and abundance. They no longer yield the necessities of life, and there remain only the decaying remnants of former homes, tombstones of dead and gone resources on which we might as well write an epitaph, "Rich for a day and poverty stricken for a thousand years." The ghosts of these dead resources are visible in the ever-increasing army of human derelicts, their meager belongings tied on to their decrepit automobiles, aimlessly wandering on our public highways with no goal in sight except a hand-out from the next relief station.

Wealth will continue to exist only so long as the natural resources of our soil and water continue to yield up their riches in proportion to the requirements of our population. That population already includes a widening margin of want and unemployment.

Right or Wrong?
How good a guesser are you?

1. Old telephone directories are collected in order to sell them for waste-paper.
RIGHT ☐ WRONG ☐

2. Any Bell telephone can be connected with more than 90 per cent of the world's telephones.
RIGHT ☐ WRONG ☐

The answers are shown below but make your guesses before you take a peek. And here is an answer to the problem of quick, low cost communication when you want to reach someone in another town. Telephone—and get your answer now.

The operator will be glad to tell you any out-of-town-rates.

Answers Don't look until you've guessed—
1. WRONG. Many changes in telephone numbers are constantly being made. Old books are collected to eliminate sources of wrong information.
2. RIGHT. You can talk to some 70 foreign countries and a score of ships at sea—93 per cent of the world's telephones.

WANTED — Some fifty to seventy-five pound shoats. THE TITSWORTH COMPANY, Capitan, N. M. J 26-tf

Mr. Theodore Hobbie has been transferred from Fort Baker, California, to Hamilton Field, Fifth Air Base Squadron.

Mr. and Mrs. J. R. McCracken left last Tuesday for Beeville, Texas, where they will reside.

Mrs. C. H. Thornton, of Oscuro, has as her guest, Mrs. Ramseur, of El Paso. They were Carrizozo business visitors Monday.

FOR SALE—Limited number of shade trees. Will sell cheaper if you dig them yourself. Mrs. C. H. Thornton, Oscuro, N. M.

Mr. and Mrs. Albert Snow and children spent Saturday and Sunday in Las Cruces, where they enjoyed a picnic dinner with their daughter, Wilma, in honor of her birthday.

Mr. and Mrs. Troy Woodall spent Sunday and Monday in Albuquerque, due to the illness of Mrs. Woodall's mother, Mrs. Lamb. They were accompanied by Mr. Charles Fouch.

Rev. R. L. Allen, pastor of the Church of Christ, visited his family in Portales this week.

Mrs. Hollis Jones has returned from Abilene, Texas, where she spent a week with relatives.

Mrs. R. A. Walker, of the theatre, has been quite ill of flu the past week.

FOR RENT—House next to Beck home. See W. J. Humphrey. pd.

Alvin Carl returned to his duties as operator of the Lyric theatre projection machines Tuesday. During his illness Robert Hemphill and Johnny Rowland were substitute operators,

Mrs. L. J. Adams and her sister, who have been ill of flu, are able to be up, but Mr. Adams is still seriously ill.

More than "making the motions" when you change to OIL-PLATING

...the oil-change *plus*

Dump Winter-fouled oil. Whatever you do, drain and refill now with *something*. But drain and refill with Conoco Germ Processed oil and then your engine's OIL-PLATED. Then it's got more than swell fresh oil down in the crankcase—it's got another big plus *all the way up*... It's got fresh surfacing ... OIL-PLATING. That comes from the actual union of this patented oil direct with inner engine surfaces. Conoco Germ Processing gives this oil so much "power of attraction" that it cannot drain down and leave engine parts bare, though your car stands by the hour or speeds by the hour.

Never all Spring and Summer, with Germ Processed oil, can your engine suffer rasping "dry starts"... not with every square inch always oiled *in advance* by drain-proof OIL-PLATING. Nor will four to five thousand revolutions per minute whirl away this implanted OIL-PLATING. It stays on. It helps the oil-level to stay up. Your OIL-PLATED engine and Germ Processed oil will both be giving you *plus* mileage. Change today to Your Mileage Merchant. Continental Oil Company

CONOCO GERM PROCESSED OIL

Television Sprouts Commercial Wings, Backed by 10 Years' Experimentation

Receivers Placed on Sale As Infant Industry Tests Apparatus

By JOSEPH W. LaBINE

History will remember April of 1939 as the month America became television-conscious.

The research of more than 10 years, the expenditure of more than $10,000,000 will be climaxed when radio manufacturers place commercial television receivers on the market for the first time.

At least this announcement was made last October by David Sarnoff of the Radio Corporation of America, speaking for the American Radio Manufacturers' association. Simultaneously, when the New York World's fair opens April 30, commercial telecasting will begin in the Manhattan metropolitan area.

Before the year is out additional transmitters will be operating commercially at Schenectady and (possibly) Los Angeles.

But this most fascinating of modern sciences will still be wearing short trousers, enshrined in more technical, economic and artistic difficulties than the complicated motion picture industry ever imagined.

Strange to say, the least of these problems is that of technique. Ten years ago visionary television engineers dreamed of the great future in this business, once equipment could be perfected. The weird situation today is that television is mechanically quite perfect but programming and financing have been neglected.

Horizon Is Maximum Distance.

The receivers going on sale next month will project an 8 by 10-inch image into your living room, provided you live within horizon-range of the Empire State building or a 1,500 foot mountain near Schenectady. Also provided you can pay from $150 to $1,000 for a receiver. The former has sight only, the latter both sound and sight.

Behind that image in your living room is a devastating complexity of electrons, light beams, photography and ultra-short waves. Standing before a camera in the Empire State building, your favorite politician will harangue his no-longer-unseen audience with gestures as well as vocal inflections, all of which are picked up by a camera-sound combination. Whereas a regularly photographed image is transferred to the plate chemically, television does it electrically on a plate made up of several thousand tiny silver dots which react electrically to light.

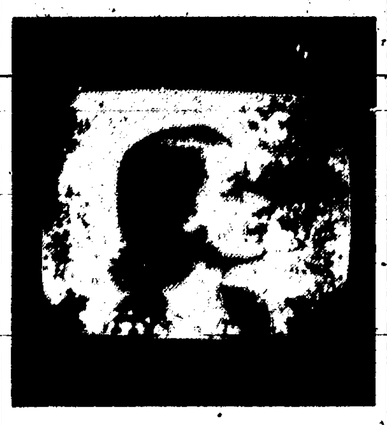
The trick is that these silver dots are arranged regularly in lines across the plate. There are 441 lines on the full plate and by the time each is filled with its light and dark dots you have a finished picture not entirely different from the halftone pictures used to illustrate this story. Examine the pictures closely and you'll see the dots.

From Dots to Impulses.

Somehow, these television dots are transferred to electric impulses, amplified and shot through the air to receivers, whence the picture is recreated bit by bit. All this takes place in about one-thirtieth of a second. Since each complete image contains 300,000 dots, you get 9,000,000 a second, which is a lot of dots.

There's good reason for television's narrow broadcasting range. To transmit both pictures and sound requires a "channel" six times the distance from top to bottom of your radio dial, which means that television must turn to the unexplored field of ultra-short waves. Here is encountered still another problem. Regular "long" radio waves shoot into the air, bounce off the ionosphere and come back to earth. Not so ultra-short waves. Highly independent, they proceed in a straight line out over the horizon and zip off into space, never returning. Consequently all television audiences are confined to eye-shot of the transmitting station.

The National Broadcasting company's television announcer, Betty Goodwin, steps before a television camera in the Radio City studios, New York.



Betty Goodwin's image is televised, shot through the air by electric impulses, and comes out this way.

The one exception is that broadcasts may be "piped" from one city to another with coaxial cable, but a mile of this wire costs a small fortune and it is therefore impractical.

'Ghosts' Cause Interference.

Even on ultra-short wave and within the horizon radius, television does not always have clear sailing. "Ghosts" pop up occasionally in the form of reflecting surfaces which send an extra delayed image into the receiver. Empire State building broadcasts often encounter a ghost in the Palisades, a vertical wall of rock on the Jersey side of the Hudson river. Large surfaces like gas tanks also provide ghosts.

Sometimes freak waves may be reflected from the ionosphere, producing ghosts of broadcasts being made miles away on the same wavelength. During the past winter Dr. DeWitt R. Goddard, working on television at Riverhead, L. I., received fairly clear images televised from London and bounced off the ionosphere.

Artistically television compares with motion pictures. Only it has more ramifications. The first performance must be letter-perfect because it is the last performance. There are no retakes to correct poorly acted scenes, nor any time to debate the proper instant to "fade in" a second or third camera. Technicians, actors and audience are constantly alert, which indicates the change television may make in your home life.

New Field for Programming.

Once established, television holds tremendous program possibilities. Writing for the Christian Science Monitor, Volney D. Hurd visualizes evening foreign affairs discussions with the commentator pointing out spots of interest on the map of Europe. A few minutes later news events of the day may be recreated by motion pictures taken at the actual scene a few hours earlier. The next morning a cooking school will show someone actually preparing food. Visual education broadcasts will become an important factor in training both children and adults.

If $10,000,000 has already been spent to bring television into its present infancy, many more millions must be spent to give it the polish of our modern radio programs. The distance handicap and the expense of "piping" may be technical problems, but they're business problems, too. Add to this the fact that a half-hour television production will cost $60,000 (over one station) while a full-hour sound radio show costs only $30,000 over the complete national hookup.

These things frighten would-be sponsors. Many firms now using sound radio would gladly invest $60,000 in a half-hour television show—provided they got something in return. But in New York, where American television has reached its highest development, the number of receivers by next December will be far less than 10,000. It's simply not worthwhile to spend $6 on each of these possible 10,000 prospects!

Population Counts.

Meanwhile, however, televisionists realize the New York metropolitan area will—by virtue of its population—be the first site of self-liquidating operations. That's why experimentation and sale of commercial receivers is being confined largely to this vicinity.

Much can be learned from England's experience. Youthful John L. Baird began experimenting with British television back in 1925 and today there are 10,000 receivers in the 30 to 50-mile radius surrounding Alexandria palace, London. This, incidentally, includes more than 25 per cent of the total population of England and Wales, making British television more feasible commercially. Two systems are used, the Emitron camera which—like the American method—uses electrical signals, and the Scophony system which uses a mechanical process and "scans" by strips instead of dots. The latter camera permits televised pictures to be reproduced on a large screen, encouraging the development of television theaters.

Don't expect television too quickly; in fact, be thankful its pioneers are holding back their achievement until they've something more permanent to offer, otherwise your investment might be a total loss. In the opinion of the federal communication commission, television is not ready for standardization or commercial use by the general public. But by the time 1939 is out this viewpoint may change.

© Western Newspaper Union.

Atop the peak of the world's tallest building, New York's Empire State building, can be seen the new apparatus erected for television broadcasts. Since television waves are not reflected back to earth, they are effective only to the horizon visible from the top of the broadcasting apparatus.

Iran, Egypt Royalty Wed In Splendor

CAIRO. — A wedding ceremony whose complexities and magnificence outshine any in modern history is uniting 17-year-old Princess Fawzia of Egypt and the youthful crown prince of Iran (Persia). Celebrations started long before March 16, the wedding date, and will continue long after, to be culminated April 21 in a second marriage ritual in Teheran, Iran capital.

Princess Fawzia

Important because it unites the two most influential Mohammedan nations, the wedding is nevertheless said to be a love match since the prince and princess met during a winter sports expedition to Switzerland. A million Egyptians are participating in the gayety of Cairo, a three-day holiday having been proclaimed following the wedding.

A royal welcome, aerial and military escorts and special trains featured the prince's arrival in Egypt. In his honor the tomb of Mohammed Ali—founder of the present Egyptian dynasty—was reconstructed at a cost of $250,000.

The royal couple are being accompanied by Egyptian Queen Mother Nazli on their honeymoon trip to Shahpour, Iran. There they will be met by the empress of Iran and two of her daughters. The party will travel by special train to Teheran for four days of wedding celebration beginning April 21. On April 24 the prince will take his bride to their permanent residence, the marble palace. Since this date is the anniversary of the accession to the throne of the shah of Persia, it will have a double significance this year.

Princess Fawzia, westernized like Egypt's beauteous young queen, Farida, is well versed in her native Arabic and speaks excellent English and French. Her next problem will be learning modern Persian, her new native tongue.

Household Hints

By BETTY WELLS

IT'S inventory time, darlings. Time to ring your own front door-bell and take a stranger's view of the old home place. Have you given up your decorating ambitions because you have to keep on using the same old furniture? Tut, tut . . . all the more reason why you should have a clearage of scenery. A new background will make your old things seem like new.

Helen A. got quite hard boiled about her living room recently. Tried to take off her rose colored glasses of affection for old familiar things and size up her situation. Here's what she concluded:

Dingy tan walls, droopy scrim curtains, badly fitting drab cretonne slip covers, walnut furniture that wasn't bad, not bad at all, taupe broadloom rug that would take on the character of the room.

That was a challenge. She wasn't doing right by the dearly beloved furniture that had seen her through thick and thin.

She and her husband did a re-napering job—choosing a plain-ish

It's time to ring your own doorbell.

pinkish-apricot wall paper that did wonders right off the bat. New white organdie curtains very full and with seven-inch ruffles Helen made herself—also slip-covered the old sofa in a new floral sateen with a dark red ground. The same material went on a pair of easy chairs.

Helen did an ingenious thing with the old lamps. They were nondescript—some of the bottle variety, some of pottery, some with metal bases; none distinguished at all. So she just up and painted them all in a flat surface turquoise blue. Then made ruffled petticoat shades in white organdie, added accessories in turquoise, and now is at work on two needlepoint footstool tops with white flowers and turquoise backgrounds.

If you don't think that was a transformation worth making, and would rather go right on getting more frayed and dowdy in a down at the heels room, don't let me interfere!

• • •

Combining Furniture Periods

How long since your living-room had a good doing-over? Yet you're probably already calling that 1936 car "the old bus" and the family is looking speculatively at the newer model automobiles. But we ask you which matters most to the family background—the house or the car?

And you wouldn't be seen dead in a 1930 coat . . . now would you? (If you're not sure, refer to your kodak album). But curtains go out of style too, and lampshades get dated.

A little dissatisfaction with the house wouldn't be out of place. For most of us are content to rock along with homes that aren't up to the standards we maintain in dress, transportation, clubs, education. So look around and see if your place isn't due for a bit of perking up.

From the big winter furniture market in Chicago, where manufacturers show their new offerings and furniture dealers select the things they'll present in their stores dur-

Marriages are back to the 1929 level.

ing the coming months, we've gleaned several tidbits of interest to a lady with a house:

This year of 1939 is expected to be a big replacement year. Because most of us actually do refurnish about every 10 years and the last peak year was 1929. The low ebb year in home furnishing buying was 1932.

Another white hope for furniture buying this year is the fact that marriages are back to the 1929 level after a drop, also lowest in 1932.

As for styles, here is a bird's eye view—Swedish modern will lead in the contemporary group for the simple reason that it is graceful and light with all its clean current lines. There will be a revival of the gay and jaunty peasant types of furniture. And early American furniture is due for a new lease on life what with many new and interesting colonial accessories turning up to refresh familiar colonial rooms.

All of Our Fruits Are Health-Giving

Citrus Varieties Have High Vitamin C Content

By EDITH M. BARBER

HUMAN nature is so contrary that most of us dislike to be told what's good for us. When it comes to fruits, however, we are glad of another excuse besides the fact that we like them, to use them often.

The most important contribution which fruits make to general nutrition is through their vitamin C content. In the absence of an adequate amount of this vitamin, scurvy develops. For this reason and long before the word vitamin had been coined a supply of fresh food was included on long sailing voyages and exploring expeditions. In a book, "Hell on Ice," which depicts the experiences of a polar expedition of the eighties, note is made of the barrel of lime juice which was saved from the sinking ship by one of the crew, who dove into the icy water to recover it.

While acute cases of scurvy are practically unknown in this country today, certain ailments which are often considered unimportant and sometimes designated as a "run-down condition" may result when vitamin C is not used liberally. Perhaps the "growing pains" which were so common among children a few decades ago resulted from sub-acute scurvy.

Citrus fruits and tomato juice are first on the list of vitamin C contributors, but most fruits supply more or less liberally.

Fruit Bread Pudding.

6 or 7 slices bread
3 or 4 tablespoons butter
1 can shredded pineapple

Butter bread on loaf and cut in slices ¼ inch thick and remove crusts. Select a bowl, 5 or 6 inches in diameter with a rounding bottom, and grease with butter. Line with bread, cutting one piece to fill spaces between slices. Pour in the pineapple and cover with sliced bread. Select plate to fit just inside of bowl and weight it down into pudding. Put in refrigerator for 24 hours. Turn out of mold and serve with whipped or plain cream. Instead of the pineapple, canned berries may be used.

Lemon Meringue Pie.

½ cup flour
1 cup sugar
1½ cups boiling water
2 eggs
1 tablespoon butter
3 tablespoons lemon juice
Grated rind of one lemon
4 tablespoons sugar

Mix flour and sugar and stir in boiling water slowly. When well-blended boil over flame for five minutes, stirring constantly. Cook 15 minutes over boiling water, stirring occasionally. Beat egg yolks and add a little of the hot mixture to them and then pour back into rest of hot mixture. Add butter, lemon juice and rind and cook over hot water until the mixture is thick. Cool and pour mixture into a baked pie crust. Beat egg whites until stiff, beaten in 4 tablespoons of sugar and spread meringue over filling. Bake in a moderately slow oven, 325 degrees Fahrenheit until meringue is brown.

Mince and Cranberry Pie.

1½ cups mince meat
1½ cups cooked cranberries
½ cup sugar
Pie crust

Mix mince meat prepared as for cranberries and sugar. Place in a pie tin lined with pastry. Place one-half inch strips of pastry over top to form lattice work. Bake in a hot oven (450 degrees Fahrenheit) about 15 minutes, then lower temperature to 350 degrees and bake 20 minutes.

Fruit Meringue Cream.

¾ cup sugar
⅓ cup flour
⅛ teaspoon salt
3 egg yolks
3 egg whites
1 teaspoon vanilla or
½ teaspoon lemon extract
3 cups scalded milk
½ cup powdered sugar
¼ cup toasted coconut
3 cups sliced oranges and bananas

Mix the dry ingredients, add the egg yolks slightly beaten, and pour in gradually the scalded milk. Cook 15 minutes in a double boiler, stirring constantly until thickened, afterwards occasionally. Flavor and pour over the fruit in the serving bowl. Beat the egg whites and fold in the powdered sugar. Cover with coconut and bake 10 minutes in a slow oven. (320 degrees Fahrenheit)

Apple Pandowdy.

Pastry
1 quart sliced tart apples
¾ cup sugar
1 teaspoon cinnamon
½ teaspoon nutmeg
¼ teaspoon salt
1 cup molasses
2 tablespoons butter
2 tablespoons water

Line deep baking dish with pastry. Fill with apples, mixed with sugar, spices and salt. Add two-thirds of the molasses, the butter and water. Cover with pastry and bake in a moderate oven (350 degrees Fahrenheit) for one hour. Remove from oven and cut pastry with a knife and fork and mix thoroughly with the apples. Add remaining molasses, return to slow oven (325 degrees Fahrenheit) and cook another hour.

ADVENTUROUS AMERICANS

By Elmo Scott Watson

'Pegleg' Smith

FOR an example of chilled steel nerve, consider the case of Thomas L. Smith. He and his partner, Jim Cockrell, were trapping in the Green river country of Wyoming in the 1820s when Smith fell over a cliff and broke his leg. It was not an ordinary fracture. The bone was shattered and a piece of it protruded through the flesh. Prompt action was necessary to prevent blood poisoning.

"Guess we'll have to cut 'er off, Jim," said Tom Smith, calmly.

Their only instruments were a three-cornered file and their hunting knives. Cockrell used the file to make a saw of Smith's knife. Then Smith took his partner's knife, cut through the flesh, tied up the arteries, sawed the bone, seared it with a red-hot iron and sewed up the stump.

When the wounded leg healed, Smith made a wooden leg for himself and thereafter he was known as "Pegleg" Smith. Before the accident he had been a famous horseman. Now there was all the more reason for going mounted and the wooden leg apparently made little difference in his horsemanship.

At any rate he became the most successful horse thief on a large scale in the history of the West. He spent most of his time organizing expeditions into California to rob the Spaniards. He and the famous Jim Beckwourth made one foray into the land of the dons that netted them 3,000 head of horses!

But when California came under the Stars and Stripes it changed the habits of "Pegleg." "I won't never steal from my fellow-Americans" he declared virtuously. Temperance, however, was not among his newly acquired virtues. He ended his days, a victim of strong drink, in San Francisco in 1866.

A Perilous Journey

CAPT. RANDOLPH B. MARCY halted with his party of 40 soldiers and 25 mountain men at the junction of the Uncompahgre and Gunnison rivers on his way to Fort Union, N. M., in 1857. "Me no guide you over San Juan mountains in winter time," declared the old Ute Indian chief.

Capt Marcy had orders to join the forces of Col. Albert Sidney Johnston near Salt Lake City with animals and supplies. The orders said to proceed without delay so there was nothing for Captain Marcy to do except proceed. In spite of the Indian warning that none of the men would get through Cochetopa pass alive, the party left December 11 for Fort Massachusetts near the present Fort Garland.

Four days later, when they reached the mountains, winter's fiercest storms were raging. Snow swirled and beat against their faces. It piled in deep drifts and hung heavily on the legs of animals and men. The cold became intense.

Captain Marcy's detachment pushed on, although animals fell dead in their tracks and men had to abandon equipment. Before they reached even the summit of the pass their rations were exhausted and they had to eat the flesh of the mules as the animals died.

On January 12 couriers from a relief party arrived and announced that help was close at hand. Shortly thereafter aid came. So starved were the men that Captain Marcy issued strict warnings to eat sparingly.

His orders evidently were only partly obeyed as one man died from overeating—the only fatality in one of the most trying adventures of American history.

The Scholar-Builder

IN 1798 Gabriel Richard, a French priest, arrived in Detroit, whose muddy streets were lined with log huts and shacks housing its 1,200 inhabitants. But most shocking of all to Pere Richard, who had been a teacher in France, was the utter lack of educational opportunities for the children of the village.

With what funds he had, he founded private schools and began a campaign to establish public schools. Music was lacking, so he gave the people their first organ, brought piece by piece on pack horses almost 1,000 miles through the wilderness. He succeeded in getting Detroit its first public library.

He made a journey to Washington to get federal funds for other projects and brought a printing press with him when he returned. With it he established the first newspaper in Michigan.

In the election of 1823, Pere Richard was chosen delegate to congress from the Michigan territory which included all of Wisconsin and Iowa, part of Minnesota and a small strip of Ohio.

When the Asiatic cholera swept the city in 1832, Pere Richard visited the sick and dying without thought of himself. He died September 12, the last victim of the epidemic, and leaving behind him many monuments of accomplishment.

MOUNTAIN MAN

A Banner Fiction Serial

By HAROLD CHANNING WIRE

© H. C. Wire—WNU Service

CHAPTER I

—1—

Dusk fell softly over the High Sierras. Tom Cook, "Dad" Cook to all comers, and district ranger of the Inyo Forest, sat with boot heels on the edge of his desk and watched the play of light beyond his station door. A picture was framed there; Mount Whitney, bold, forbidding, flinging its black pinnacle upward against a red fan of sunset. As Cook watched, blue eyes beneath gray brows squinted thoughtfully. His rugged form in khaki and flannel slumped a little to one side in that attitude a riding man often takes to relax saddle muscles.

It was the first of June, and although from this same office chair Dad Cook had witnessed some fifteen other first of June evenings, the scene held him as spellbound as if his gaze had just now struck upon the mighty peak.

Fifteen years ago the Sierra Nevadas had flung down their challenge to him, when, from the Mojave Desert, he had faced the sheer eastern slope and felt a grim defiance in the granite wall.

Whitney melted slowly into the darkening sky. Cook continued to stare at it, while his thoughts from long habit took up things brought about by the first of June:

This month marked the beginning of the field season. Headquarters must be moved from the winter station, here in the valley town of Lone Tree, and established some thirty miles up the pack trail. Soon he would sign on his summer rangers and scatter them over the area. There would be fires to fight and cattle range troubles to settle; and this year there would be something more.

Cook surveyed his boot toes solemnly. "I'm sure going to miss Jimmy Cotter!" His brown fists tightened on the chair arms. He sat fixed, tense, his gray head bent. It was seven months since Jim Cotter had vanished, murdered somewhere up on top.

When Cook's eyes lifted and turned again to the door, a man was standing there, towering blackly in the dusk. He almost filled the opening, tall-figured, with close bronze hair beneath a limp Panama, a little stooped from the weight of a hand bag he carried.

He spoke at once. "Good evening, Dad."

The strong full-toned voice sounded familiar. Cook stood up; himself a big man, angular, erect, firmly planted on his two feet, with only gray hair showing age. Suddenly he exclaimed. "Well, if it isn't you! Just a minute now, I'll remember your name."

He looked into a young face, less than thirty, white, too soft, though strong brown eyes with a quiet humor made up for that. On the whole he liked what he saw.

"Breck!" he remembered. "That's it. Gordon Breck. Well, son, how's the movie business in Hollywood? Or was it ponies you were backing, down at Tia Juana?"

"A little of both," Breck admitted, grinning. "But I'm through."

"You?" Cook questioned, "through with the game? Why I thought the last time you were up here . . ." He ended abruptly.

Gordon Breck had put down his hand bag and his hat, and now approached the desk where Cook stood.

"Go ahead and say it," he urged. "The last time I was here to see Cotter I came like a young sport, all smoked up over spending a lot of money and the big things I was doing down below. I called Cotter a fool for wasting time in the forest service. I couldn't see any use in it. Maybe I can't now. No matter That isn't the point." He paused, breathless from his outburst.

Cook resumed his chair, produced a pipe and began to fill it. "Of course you know about Cotter, being his friend."

"More than a friend," said Breck, controlled now. He dropped into a seat across the table from the ranger. "I owe him something. That's why I'm here."

Lifting his pipe to a lighted match, Cook glanced over the bowl and into the young man's eyes. Something was in them that had not been there before. They were narrowed, darkened, and behind that darkness was fire. It seemed for an instant to change the whole expression of Breck's face. He was no longer soft-looking.

"Well then," Cook asked, "just why are you here?"

Breck shot a glance backward to the open door and waved one hand in the direction of Whitney. Only a tip of the peak showed now, rising across the black valley bottom to catch the last faint gold of evening.

"I want a job," Breck said, "up there. I want Jim Cotter's place if you haven't put anyone in it yet."

Cook surveyed him, puzzled and scowling. "You aren't a mountain man."

"I wasn't raised here, if that's what you mean," Breck answered. "But neither was Cotter. I can ride a horse and pack a mule—at least I could once. I'm handy with a gun if necessary. Don't those things about make me a mountain man?"

"No," said Dad Cook, wagging his head, "you'd need something more. Look at me. I can go down to your city and jam myself in a flat and eat off a white table cloth, but I'd hate it and wouldn't get along with folks there. Just so a man has got to have his heart in these mountains or they'll get him. He's got to love 'em and fight 'em and all the time understand that he wouldn't be happy anywhere else."

The old ranger hesitated, with a slow smile lighting his eyes. "Think I'm a simple fool, don't you?"

"Not quite," Breck laughed. "I don't have your feeling, Dad, that's all. Mountains are just rocks to me. Anyhow, as far as the job goes, I can learn and learn fast."

"I believe it," Cook asserted. "College man, aren't you? Traveled. Family money. What I don't see is, why you want the job at all. It's short pay, hard work, and likely to be dangerous."

"You've just named my reasons," Breck returned. "Short pay but something I earn myself. Hard work—God knows I need it. Dangerous, the same danger Cotter faced. There's the truth of my coming up here!"

"What do you mean, son?" Cook asked, his voice lowered.

For reply Breck extended one arm with the under side of his wrist up. There, close together, were three small blue dots.

"That's a fraternity mark," he said, "made when Jim Cotter and I were in college."

"Seems to me I did notice it on him," Cook offered. "But he never explained the meaning."

Through a moment of silence Breck sat with head lowered, eyes riveted on the three marks.

"Jim couldn't explain," he answered. "Neither can I, for of course it is a fraternity secret. Each dot has a purpose and the total of the thing, you might say, is blood brotherhood; stand by one another, here and hereafter."

Breck shrugged, dropping his hand upon the table. "I wasn't strong on this sort of tie. Cotter kept it up. We were pretty close and he was the romantic one. Then in the war he showed it was not all romantic talk. Understand? I owe him something. I never had a chance to live up to my part of the pledge until now. I'm looking for the man who killed him."

Cook's gray brows lifted. "Know the man, do you?"

"Good God, Dad," Breck replied tensely, "if I did, I wouldn't take this way to get on his trail! He's one of a certain gang. I do know that."

"How?"

Breck drew a letter from his coat pocket, folded it at one paragraph and stood up to switch on a light. "This is the last word I had from Cotter, seven months ago. I'll read a part.

"'There's something brewing up here, Gordon. I mean that two ways. A white mule outfit is making straight poison by the barrel; but that's out of my department and I haven't gone to much trouble over it. I did make one arrest. The fellow was freed and back here in less than a week. All I got out of the deal was an enemy. So I'll let prohibition take care of itself. But when a gang of men find they can get away with one law, they throw down all of them. Things have been happening—too much to tell you in a letter. Anyway I'm not certain until I work it up a little more. I'm going out tomorrow on a live hunch and hope to know straight facts by night.'"

Breck folded the paper and returned it to his pocket. "Cotter was killed that day," he said quietly, "as near as I can figure it. His hunch was good and he found out too much."

Silent, rigid, Dad Cook sat with the pipe stem clenched between his teeth. Breck remained standing, face set, fingers running through his bronze hair then down as if to wipe a vision from his eyes.

"I didn't come as soon as I heard about it," he said at last, "because the season was ended and you were leaving the mountains. Now you're sending summer rangers up there. Am I going?"

Cook leaned back heavily in his seat. "Cotter didn't tell me as much as he put in that letter. Some of us could have helped."

"Jim liked to play a lone hand," said Breck.

"I know; and he acted a lot on impulse." Cook shot a stern gaze across the table. "If I read you right, you're some quick yourself."

"Perhaps."

"That trait is to a man's advantage sometimes," Cook continued, "but in this business he's got to think a long ways ahead. Cotter was a good ranger. I didn't intend to waste another one up there in the forest until I had found out who killed him."

"You might as well put me on the job," Breck insisted.

"You're the only man who knows I am Cotter's friend—or of any bond between us. Someone would have to take his place. I'll learn the job and work at it. This other can be my own personal affair, if you like." Impulsively, Breck bent across the table. "Dad, I've got to get busy! I'm pretty much at loose ends."

Breck paused to light a cigarette, striking the match savagely.

Cook watched him with concern. "In trouble?" he asked. "Money, drink . . ."

"No, not that. It's, well—Oh, the devil! I've just fallen out of love."

"And that," the ranger agreed, his eyes twinkling, "is more of a shock than falling in."

Breck grinned. "Shock nothing. This was just a fade-out. Anyway, I want to work. Will you sign me on tonight?"

"Not so fast," said Cook. "You'll find this man-hunt is no personal affair to be settled on the side. It may mean getting one, or half a dozen, or rounding up the whole range. Did Cotter ever write about the Tillson brothers?"

"No, unless they were the ones he meant in this last note."

(TO BE CONTINUED)

"I want to work. Will you sign me on tonight?"

One Hundred Workers Handle Ordinary Suit of Clothing Before Man Gets It

More than 11,000 threads about one-eightieth of an inch in diameter are woven together in your suit. Next time you suffer from insomnia try counting them.

If they were all joined end to end in a single yarn, its length would be 13 miles, 20 rods, poles, or perches, or just about as far as most people could comfortably walk in a day, according to George Race, writing in London Answers Magazine.

There are 3¼ yards of cloth, 56 inches wide, in a suit, without linings, and it weighs from 2½ to 4½ pounds according to its purpose and quality. An average weight is 18 ounces per yard.

It takes 53 minutes to weave a suit length, and for weaving it the weaver earns sixpence. The cloth is woven in 65-yard lengths, each weaver looking after two looms.

From the sheep's back to yours, your "gent's smart three-piece" has undergone more than 30 major processes and operations, traveling perhaps from South Australia to the North of England—over 12,000 miles.

At least a hundred workers have been directly employed in evolving that fancy-striped serge you are wearing. Many more have been employed indirectly in clerical and transport work.

One new suit gives work to maybe a dozen firms, and out of the 10s. or so paid for a yard of cloth a penny or twopence, or even a fraction of a penny, goes to this man and that—to wool grower, shipper, merchant, woolcomber, spinner, weaver, dyer, and cloth merchant.

Twelve months may elapse while the wool is traveling from the sheep's back to yours, for it may be held in stock at several stages of its journey. This is a much longer time than that taken by the world's record speed suit, made in connection with a wool trade fair held in Bradford.

On that occasion, from sheep's back to man's back was completed in the amazing time of 2 hours and 10 minutes. From shearing the sheep to finishing the cloth took 100½ minutes, and the suit was made up by a tailoring factory in 23½ minutes. One hundred and thirty-four people were needed to make this record, 40 of whom were employed in tailoring the cloth. And if you fancy one like it the cost was 100 pounds sterling.

MURDER IN A NATIONAL FOREST

Gordon Breck joined the U. S. Forest Service to avenge the murder of his best friend, one of Uncle Sam's forest guardians in the West's High Sierras. It's an easy task to find the murderer . . . a harder one to bring him to justice. Does Gordon Breck get his man?

You'll thrill to the adventures of a month in the life of a forest ranger, written by a man who lived the life himself. You'll say that "MOUNTAIN MAN," Harold Channing Wire's new story, is one of the best "westerns" you've ever read.

Start it in this issue!

WHO'S NEWS THIS WEEK

By LEMUEL F. PARTON

NEW YORK.—Lester P. Barlow, temperamental inventor of bombs and other war weapons, recently said he wasn't going to congress with his bad news about the devastating new German air bomb, because they "put him in the dog-house" when he tried to tell the house naval affairs committee something last year. But his story gets into the Record, via Senator Bennett C. Clark, who relays to Maj. Gen. H. H. Arnold the news of the bomb, as he had it from Mr. Barlow, and asks the general what about it. The general tells of army reports that the German bombs in Barcelona "killed every human being within the range of a quarter of a mile."

Inventor Gets German Bomb Story Recorded

The U. S. A. was supposed to have used about $300,000,000 worth of Barlow bombs and weapons in the World war. Several weeks ago, the senate voted him $592,719 in royalties for the wartime use of his patents. He is a prolific inventor, now consulting engineer for the Glenn L. Martin Co., of Baltimore, builders of bombing planes. He describes the new German bomb as truly horrendous, basically a combination of liquid oxygen and carbon, but with other ingredients, such as magnesium and aluminum. He thinks he can just about match it with his L. O. X. bomb.

In 1932, he offered to President Hoover a simple button-pushing rig which would wipe out a city hundreds of miles away. Even with the backing of Senator Frazier of North Dakota, he failed to get the government interested and was said to have offered his device to Russia and Germany. Later, he had other disappointing encounters in congress, offering, among other things, a shock-proof battleship, on whose ribs the heaviest projectile would be just the pat of a powder-puff.

BIG, Bucko Giuseppe Creatore, puffing smoke from a cigar as unfailing as Vesuvius, makes a grand comeback, as he nears 70, to his own and everybody else's complete satisfaction. The Bronx recently celebrated its 300th birthday with a big splash of 40-cent grand opera, with Signor Creatore finding in "Aida" something in the range of his titanic energies. The opera company will be permanent, financial wind and weather permitting, to be supplemented by a series of symphonic concerts.

Creatore Comes Back in Opera For the Masses

As a band conductor, Signor Creatore used to earn as much as $5,000 a night. He slipped out of sight, and then, in June, 1935, was conducting one of the park bands of the New York Emergency Relief bureau. His cigar and his baton were still bold and unwavering and he told the reporters he was pacing the country back to better times. He had with him about half of the players in his old band of the days of their tuneful and triumphant national tours.

He arrived in this country from Italy in 1902, with a lush black mustache and a heavy mane, but little else worth mentioning. Two days later, he was playing on Hammerstein's roof. A contemporary of Sousa, he became one of the country's most famous bandmasters, only temporarily clipped — or eclipsed—by the depression, it is to be hoped.

WHEN Britain and the United States begin to exchange cooking recipes, they are really getting neighborly. Carlota, the British poetess, who arrived here recently, not averse to favoring friendly relations, prefaced her trip with a radio appeal for American recipes. She got more than 2,000. When we get to telling each other about our operations, the entente will be complete.

Recipe Swap to Better British-U. S. Relations

Carlota is the wife of Louis Oppenheimer, managing director of the South African diamond syndicate. She has published many books of poetry in many countries, speaks seven languages fluently, and finds time to convert old houses into charming dwellings or "mews," for working people.

Her London home is one of the great social and political salons of England. She knows the proverbial way to the now somewhat intransigent American heart. Her visit marks a pleasant departure from the customary exchange of recipes for cooking TNT and the like.

Change of Mind
No well-informed person ever imputed inconsistency to another for changing his mind.—Cicero.

NEWS..*Perfected* CASTOR OIL EASY TO TAKE

It's news when, by a new and revolutionary process, that old reliable medicine, castor oil, is now made actually odorless, tasteless and easy to take. Kellogg's Perfected Tasteless Castor Oil—the name of this newest and purest of castor oils—sold in refinery-sealed 3½ oz. bottles at all druggists. Palatable, full-strength, efficient, always fresh. Insist on Kellogg's Perfected—accept no so-called "tasteless" substitute. Keep Kellogg's Perfected handy—only 25c a bottle, but what a difference in quality! Approved by Good Housekeeping Bureau.

Great Stimulator
Nothing great was ever achieved without enthusiasm.—Emerson.

NERVOUS?

Do you feel so nervous you want to scream? Are you cross and irritable? Do you scold those dearest to you?

If your nerves are on edge and you feel you need a good general system tonic, try Lydia E. Pinkham's Vegetable Compound, made *especially for women*.

For over 60 years one woman has told another how to go "smiling thru" with reliable Pinkham's Compound. It helps nature build up more physical resistance and thus helps calm quivering nerves and lessen discomforts from annoying symptoms which often accompany female functional disorders.

Why not give it a chance to help YOU? Over one million women have written in reporting wonderful benefits from Pinkham's Compound.

Destitute
He who has lost confidence can lose nothing more.—Boiste.

HEADACHE?
Here Is Amazing Relief for Conditions Due to Sluggish Bowels

Nature's Remedy. If you think all laxatives act alike, just try this all vegetable laxative. So mild, thorough, refreshing, invigorating. Dependable relief from sick headaches, bilious spells, tired feeling when associated with constipation.

Without Risk get a 25c box of NR from your druggist. Make the test—then if not delighted, return the box to us. We will refund the purchase price. That's fair. Get NR Tablets today.

Peace From Within
"Nothing can bring you peace but yourself."—Emerson.

THE TRUTH

Today's popularity of *Doan's Pills*, after many years of world-wide use, surely must be accepted as evidence of *satisfactory* use. And favorable public opinion supports that of the able physicians who test the value of Doan's under exacting laboratory conditions.

These physicians, too, approve every word of advertising you read, the objective of which *is* only to recommend *Doan's Pills* as a good diuretic treatment for functional kidney disorder and for relief of the pain and worry it causes.

If more people were aware of how the kidneys must constantly remove waste that cannot stay in the blood without injury to health, there would be better understanding of why the whole body suffers when kidneys lag, and diuretic medication would be more often employed.

Burning, scanty or too frequent urination may be warning of disturbed kidney function. You may suffer nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—feel weak, nervous, all played out.

Use *Doan's Pills*. It is better to rely on a medicine that has won world-wide acclaim than on something less favorably known. *Ask your neighbor!*

DOAN'S PILLS

Little Miss Jeanne Hall, daughter of Attorney and Mrs. John E. Hall, was quite ill for several days this week.

Local and Personal

Mr. Johnie Rowland, who has been employed at Corona, has returned to his home here.

Mr. Bernardo Salazar of Fort Stanton, Mr. Martin Walter of Roswell and Miss Eulalia Salazar of Lincoln were here this week attending the Teofilo Salazar murder trial.

O'Dell Baker was a business visitor in Albuquerque yesterday.

Messrs. Finley and Kelley went to Artesia yesterday.

FOR RENT---One 4-room apartment, partly furnished. See Mrs. Phipps. M 17-tf

Mrs. A. J. Gilmore, who has been very ill at the home of her daughter, Mrs. Paul Mayer here, is very much improved at present.

Mr. Charles Carl was a business visitor in Alamogordo last Friday. Miss Teddy Lee Ward accompanied him home to visit her sister, Miss Lucile Ward; then both young ladies went to Tucumcari to spend Sunday with Mrs. Wayne Van Schoyck.

We have been asked to call attention of readers to Mr. Darling's article on "Conservation" on pages one and four.

FOR SALE---Bed room suite and other household goods. Inquire at News office. M 17-tf

Mr. John Miller and grand daughter arrived from San Antonio, Texas this week. Mr. Miller spent the winter in San Antonio.

Mrs. Albert Snow has been ill of influenza since her return from Las Cruces last Sunday.

Federal Administration Of Public Works

The 841 non-Federal projects being built with the aid of the Public Works Administration in the seven states of the PWA's Fifth Region are being completed at the rate of 12 a week in the largest and fastest moving construction program in the nation's history.

The non-Federal projects in the Fifth Region have a total estimated cost of $198,802,251. All but 38 of the non-Federal projects in the Region were begun under the 1938 PWA appropriation.

In addition to the non-Federal projects with a total estimated cost of $27,178,600 are now under construction in the Fifth Region states of Arkansas, Colorado, Kansas, Louisiana, New Mexico, Oklahoma and Texas.

With spring weather approaching in many parts of the region, George M. Bull, Regional Director, has advised Administrator Harold L. Ickes, the construction pace is expected to exceed recent records. In some instances work on projects was slowed because of heavy snows or rains.

Warmer weather, the Regional Director declared, was expected to bring employment on the PWA projects to a peak some time in April. Orders for materials have already created millions of man hours of work in producing, processing and transporting the vast quantities of supplies used in every type of construction.

"Mountain Man," our new Western serial starts with this issue. Don't miss it.

IN THE PROBATE COURT

County of Lincoln. }

In The Matter of the Last Will and Testament of Manuelita H. Salsberry, Deceased. | No. 485

Notice

To Whom It May Concern:

Notice is hereby given that an instrument purporting to be the Last Will and Testament of Manuelita H. Salsberry, Deceased, has been filed for probate in the Probate Court of Lincoln County, New Mexico, and by order, the 1st day of May, 1939, at the hour of 10:00 A. M., at the court room of said court in the Village of Carrizozo, New Mexico, is the day, time and place for hearing proof of said Last Will and Testament.

Therefore any person or persons wishing to enter objections to the probating of said Last Will and Testament are hereby notified to file their objections in the office of the County Clerk of Lincoln County, on or before the time set for hearing.

Dated at Carrizozo, N. M., this 15 day of March, 1939.

(Seal) Edward Penfield, Probate Clerk.

By Bryan Hendricks, Deputy.

Notice of Hearing of Final Report and Account

In the Probate Court of Lincoln County, State of New Mexico.

In the Matter of Isaquio Gonzales Deceased. } No. 471

To Jesueita Gonzales and to all unknown heirs of the said decedent, all unknown persons claiming any lien upon, or right, title, or interest, in or to, the estate of the said decedent, and to whom it may concern:

You, and each of you are hereby notified, and notice is hereby given, that the Administratrix of the estate of Isaquio Gonzales, deceased, has filed in the above entitled Court, her final report and account as such Administratrix, and the Court has appointed Monday, the 1st day of May, 1939, at the hour of 2:00 o'clock p. m., as the hour and day for hearing of objections, if any there be, to the approval and settlement of said final report and account, and the discharge of the said Rosa Arrieta de Nunez as such Administratrix, and at the hour on the day named, the Probate Court will proceed to determine the heirship of said decedent, the ownership of his estate and the interest of each respective claimant thereto and therein and the persons entitled to the distribution thereof.

The name and post office address of the attorney for the Administratrix is Hordo Chavez, Carrizozo, New Mexico.

Witness the honorable John Mosley, Judge of the said Court, and the seal thereof, this 14th day of March, 1939.

Edward Penfield, Clerk.

By Bryan Hendricks, Deputy.
