In the Matter of the Last Will and Testament of Lewis Abra Medina, Deceased. No. 522

### NOTICE

#### To Whom It May Concern:

Notice is hereby given that an instrument purporting to be the Last Will and Testament of Lewis Abra Medina, Deceased, has been filed for probate in the Probate Court of Lincoln County, New Mexico, and by order, the 12th day of May, 1941, at the hour of 10:00 A. M., at the court room of said court in the Village of Carrizozo, New Mexico, is the day, time and place for hearing proof of said Last Will and Testament.

Therefore any person or persons wishing to enter objections to the probating of said Last Will and Testament are hereby notified to file their objections in the office of the County Clerk of Lincoln County, on or before the time set for hearing.

Dated at Carrizozo, N. M., this 26th day of March, 1941.

Felix Ramey, Probate Clerk.

Mmes. Steve Bostian and R. E. Lemon of Carrizozo and Mmes. G. A. Titsworth and Jack O'Malley of Capitan attended Grand Chapter, Order of Eastern Star in Las Vegas Monday and Tuesday.

### CHEVROLET COLOR SCHEMES

With the approach of spring, a color-conscious America is becoming increasingly aware of the contribution of the motor-makers to the brightening of the American scene, for few sights are as cheerful as a modern highway with its splashes of rainbow hues that bedeck the modern automobile.

Yet it was only a matter of decades ago that the highway was a sombre place indeed, with a rare navy blue car serving to abate some of the gloom of the all-inclusive black in which motor cars first appeared.

Gradually the motoring public has shown greater and greater preference for colors, according to William E. Holler, general sales manager, Chevrolet Motor Division, who pays tribute to women drivers and their influence as auto buyers upon the manufacturers.

"As soon as the public was ready," Mr. Holler said, "the manufacturer were delighted to heighten the appeal of their products by employment of new and attractive colors—and lately color combinations not only exterior but interior."

To point up this comparison of modern days against the youth of the auto industry, Mr. Holler cited the new 1941 Chevrolet convertible cabriolets, produced in seven striking colors, with a wide range of color contrast in tops and interior trim. The cabriolets, he said, may be obtained in black with black or tan top and red or tan leather trim inside; in ruby maroon with black or tan top and red leather trim; two shades of gray are available with black tops and red trim; the blue cabriolet has a tan top with harmonizing blue trim; tan top and green brighten the green cabriolet, and Chevrolet's smart cameo cream convertible is offset by black top with red trim.

"With new color accents in modern costumes, and everywhere throughout modern living, the motor car has finally come into its own not merely as a utilitarian device providing transportation but in addition, has attained new pinnacles of beauty as it has climbed over the rainbow. The Flexline Chevrolets illustrate the trend of the industry toward beauty, style, color combinations and utility.

Pontiac engineers, in pointing out the necessity for an exceptionally high out-put generator on the modern car, show the following sources of electrical consumption: lights and ignition 12.5 amperes; car heater, 5.0 amps.; radio, 7.5 amps.; defrosters 3.5 amps. These are the major sources of electrical consumption. To them must be added the drain of extra horns, stop lights, direction indicators, spotlights, fog lamps, cigar lighters, clocks.

During the winter months, engineers declare, ignition systems must be kept in good shape, battery condition checked, and no more of the electrical accessories used than are necessary at any one time.

Mr. Sultemeir of Vaughn is spending the week at the local bank, assisting in the absence of Mr. Lemon.

### 10-Year Grazing Permits

Returning today from a swing of inspection through Federal Range territory of the West, Director of Grazing E. H. Rutledge reported to Secretary of the Interior Harold L. Ickes that the Grazing Service will begin general issuance next July 1 of 10-year term grazing permits to range users in all of the grazing districts established under the Taylor Grazing Act.

"Systematic range use and protection coupled with range improvements of every type and favorable weather conditions," said the report, "have placed the Federal range in the best condition for years to meet expanded needs for beef, leather, mutton, and wool incident to National Defense."

Regional graziers have been authorized by the Department to issue term permits, in lieu of one-year licenses in all cases where the qualifications of applicants are regarded as satisfactory. This applies to all grazing districts or administrative portions where substantial agreement has been reached between the users of the range and the advisory and administrative personnel of the Grazing Service as to the practicability of the issuance of such permits.

Preliminary estimates based on reports of the regional graziers indicate that more than 12,000,000 sheep, cattle, horses and goats will obtain part year feed requirements on the 140,000,000 acres of Federal range in 50 grazing districts during 1941.

Upon the basis of his inspection Director Rutledge estimates that approximately 12,000 or 60 percent of the present users will receive their term permits on July 1. He stated that others will follow just as fast as agreements are reached between stockmen and these agreements are supported by factual data sufficient to warrant the change from temporary licenses.

The Grazing Service with the help of advisory boards in the districts has been working to determine the number of livestock to which each user is entitled and whether that use can be allocated equitably in an individual allotment, a group allotment or a common use area, and the proper season of use. As fast as that determination was made term permits have been issued. Prior to this year term permits were issued in one complete district and part of another in Colorado, and in one complete district in New Mexico.

The job of reaching this important stage of stabilizing the livestock industry has been a big one. It has meant a gradual change from the confusion and anxiety that existed on the open range six years ago; the constant sifting of facts, readjustments here and there. With patience and diligence the stockmen themselves have worked incessantly to get their own house in order by reducing stock numbers, adjusting seasonal use, and enlarging their ranch facilities where necessary to meet the carrying capacity of the range.

Had it not been for the impartial and untiring efforts of the local advisory boards, the step to be taken July 1 would still be a long way off, said Mr. Rutledge. During the past 5 years, for example, the boards have considered a total of 75,000 applications for range privileges in 10 states.

Only 2,100 protests have been recorded by applicants against the recommendation of the local advisory boards. Of this number only 78 finally reached the Secretary of the Interior. The remainder were "ironed out" on the ground by the advisory boards, the field men of the Grazing Service and the applicants themselves.

Mrs. Homer McDaniel left last Monday for Flagstaff, Arizona to visit her daughter, Mrs. Lois Kuykendall, who underwent an operation this week.

Mr. and Mrs. Will Ed Harris and Messrs. Tennis Bigelow, T. A. Spencer, L. A. Whitaker and Albert Roberts were attendants of the Cattle-men's Convention in Albuquerque last Monday and Tuesday.

Mr. R. E. Lemon was a business visitor in Roswell Wednesday. Mrs. Maggie Hutchinson of White Oaks was in town Wednesday.

### Mr. Juan Romero

Mr. Juan Romero, age 80 passed away Thursday morning at his home on the Eastside of town. Mr. Romero spent most of his life in Lincoln county, he leaves to mourn his death, one son, and a large number of relatives and friends. He was buried today in the local cemetery.

### STATE SOIL CONSERVATION COMMITTEE OF NEW MEXICO NOTICE OF REFERENDUM ON CREATION OF PROPOSED UPPER HONDO UNIT SOIL CONSERVATION DISTRICT EMBRACING LANDS LYING IN THE COUNTY OF LINCOLN, IN THE STATE OF NEW MEXICO

To all owners of land lying within the proposed UPPER HONDO UNIT SOIL CONSERVATION DISTRICT, comprising the territory described as follows:

AN AREA TO INCLUDE THE BONITO AND RUIDOSO WATERSHED—BOUND ON THE EAST BY THE COUNTY LINE AND TO ALSO INCLUDE NOGAL CANYON.

Notice is hereby given that on the 16th day of April, 1941, between the hours of 9:00 a. m. and 4:00 p. m., a referendum will be held in the said territory upon the proposition of the creation of the UPPER HONDO UNIT SOIL CONSERVATION DISTRICT as a governmental subdivision and a public body, corporate and politic, under the provisions of the Soil Conservation Districts Law of this State.

All persons, firms, and corporations who shall hold title to, or shall be in possession of, any lands lying within the said territory as owners, are eligible to vote. Only such persons, firms, and corporations are eligible to vote.

Polling places for the referendum are as follows: Capitan Grade School Building, Glencoe Woman's Club Building, Hondo, School Gymnasium.

Eligible voters residing within the proposed district shall cast their ballots at the polling place for the division wherein they reside. Eligible voters not residing within the proposed district shall cast their ballots at the polling place for the division which includes their land, or the greater part thereof. Eligible voters who will be absent from their division on the day of the referendum may apply in person or in writing to James Brister, Box 357, Carrizozo, New Mexico, Polling Superintendent, for absentee ballots. Each applicant for an absentee ballot shall give his name, residence, location, and acreage of land owned or possessed, and interest therein.

Judge M. C. St. John of the Probate Court was seriously ill this week.

### STOCKMEN SHOULD ADJUST HERDS TO RANGE CAPACITY

Now is the time for cattlemen to have their cake and eat it too, says George F. Ellis, of the New Mexico Extension Service, who points out that ranchmen have a good opportunity to adjust their herds, in line with conservative estimates of carrying capacities of their range.

Conditions are good for such an adjustment, according to Mr. Ellis, because of three factors: 1. Cattle prices are good at this time. 2. Cattle numbers in the United States are increasing rapidly, which will mean in the long run, lower prices; just when this will occur, no one knows. 3. More pounds of beef can be produced from less cattle, according to experiments conducted on the State College ranch.

This latter statement may seem strange to many, but it has actually been proved that a conservative rate of stocking means a more plentiful supply of feed, a larger percentage of which is available for the production of calf weight. Such stocking has resulted in a larger percent calf crop and heavier calves so that fewer pounds of beef from the same pasture. Conservative stocking has the added advantage of being a sort of insurance against a shortage of grass in the event of drought. Thus, the cowman who wants to adjust his herd now, can take advantage of good prices, can soften the effects of a later drop in prices, can be safer in case of a bad drought, and can still keep his production of beef at about the same level as it is now.

While thus benefiting his ranges and getting his business in better shape, the rancher can, at the same time, help himself in meeting his responsibilities of keeping adequate supplies of beef available at this critical period in the nation's history.

### SPORT GOODS FOR MILITARY

WASHINGTON, D. C.—To meet an emergency caused by the lack of sufficient government funds immediately available, the American Red Cross, has agreed to furnish the Army and Navy with urgently needed athletic and recreational equipment for their camps, it was announced here.

The Red Cross, it was explained, will buy sporting supplies up to the value of \$1,000,000 for immediate use by soldiers and sailors until the government can obtain an additional appropriation to carry out its recreational program in the camps.

The emergency character of the need for recreational equipment in the camps was called to the attention of the Red Cross by General George C. Marshall, Red Cross Chairman Norman H. Davis, immediately authorized the Red Cross to meet the situation in view of the fact that the Red Cross shares responsibility with the Army and Navy for the health and morale of the armed forces.

In virtually identical letters to the Secretaries of War and Navy, Mr. Davis informed them of the Red Cross action as follows: "My dear Mr. Secretary:

"I am writing to confirm the understanding which I have discussed with General Marshall and Mr. Osborn during the past few days concerning assistance by the American Red Cross to the Army and the Navy in

### Frigidaire's Brilliant New Beauty

Frigidaire's Brilliant New Beauty, uses less current, Sensational new values.

Scientists found that wilting and drying destroy vitamins in foods, that still, moist, uniformly cold air preserves health-giving freshness. Air circulation, which wilts and dries foods, is minimized in the unique Frigidaires Cold-Wall because the chilling coils are in the walls, and the Cold-Wall compartment is sealed. Foods need not be covered.

By scientifically combining three ideal conditions, uniform low temperatures, high humidity and minimum air circulation, the Moist Cold Compartment enables one to keep even highly perishable foods from drying. Foods retain more of their precious vitamins, freshness, flavor and color for days longer than dreamed possible.

Fresh vegetables and fruits need still air, uniformly cold and extra moist. These essential conditions are provided in Frigidaire's Glass-Topped Sliding Super-Moist Hydrators as they are kept extra cold by the concealed chilling coils which surround them.

Frigidaire has exclusive Quikubes Trays, lever releases ice cubes instantly, and the famous Meter-Miser, Simplest refrigerating mechanism ever built. Super-powered, whisper quiet, permanently sealed, never needs oiling. Cuts current cost to the bone.

More than six million Frigidaires have been built and sold. If a refrigerator does not bear the Frigidaire nameplate, it is not a Frigidaire. Be sure you get a genuine frigidaire, see the Lincoln County Utilities Company for arrangements.

the emergency which exists in connection with the recreational program for the men of the armed forces.

"The offer of assistance from the Red Cross was prompted by the disclosure at the recent conference of morale officers, held by the War Department, that an urgent need, which could not be met from government funds, existed for recreational supplies and equipment, in order that those officers and their associates charged with that phase of the morale program might go forward with their work in an effective way immediately.

"Inasmuch as it seemed essential that the work should proceed rapidly, representatives of the Red Cross have been conferring with officers of the Army and the Navy and have completed an understanding concerning methods of purchasing and other details, so that there will be no delay whatever."

The dance held at the Country Club last Saturday night was well attended.

### KNOW YOUR BANK

## How to Stop Payment on a Check

Stopping payment on a check consists of giving the bank official notice that it is to refuse to pay a check you have issued if it is presented for payment. This notice should be in writing, and should describe the check number, date, amount, payee, and reason for stopping payment.

If payment is stopped by telephone it should be confirmed in writing immediately.

If payment is stopped on a lost check which if later found, is preferable to issue a new check bearing a different date and number than to revoke the stop-payment order.

# WHO'S NEWS THIS WEEK

By LEMUEL F. PARTON  
(Consolidated Features—WNU Service.)

**NEW YORK**—Field Marshal Alexander Papagos, chief of staff of the Greek army, is a professional soldier, singularly free from any political context whatever, domestic or foreign. With the passing of the late Premier John Metaxas, he becomes possibly the most important single individual in the kingdom, so far as immediate issues are concerned. From all that can be gleaned from Athens dispatches, he has made up his mind and, by all accounts, his is a mind that stays put. Greece will keep on fighting. There will be no separate peace.

The scholarly, gray-haired, trim-rigged soldier, smartly tailored in mufti or in uniform, has been occupied quite steadily with military strategy, both in study and practice, since 1912.

After his graduation from military academies and cavalry schools in Athens, Belgium and Italy, he fought in the Balkan war of 1912 and 1913, rising from a lieutenant to a captaincy. In the World War, he fought against Bulgaria and Germany and, in the campaign of 1920, had a staff assignment in Asia Minor. He was made minister of war in 1925 and chief of staff and chairman of the supreme war council in 1930.

If he uses ammunition as carefully as he uses words, he should be a supremely effective fighter against all comers. Most characteristic is his reserve, his calm precision in action and his capacity for swift decision. Also characteristic is his long aloofness from intrigue and politics, during changing regimes. He has opposed and bested the brass hats of the army in modernizing Greek fighting forces. His calm, expert judgment no doubt weighs heavily in the royal councils today.

**AS DIVING** airplanes reach a speed of 600 miles an hour, they're processing pilots through depression chambers like the sand-hogs. Milo Burcham, oriented self on record-holder for upside down flying, is rare laboratory material for the army air corps, whamming a 1,100 horsepower Lockheed plane through power dives which might finish him if he hadn't had a half hour in a decompression chamber. It prevents paralysis.

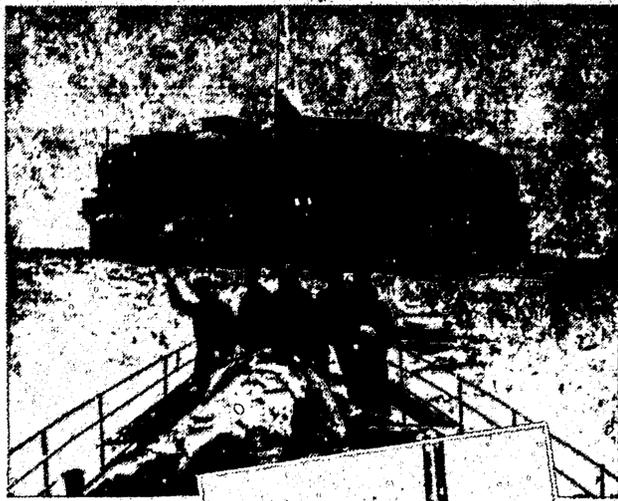

Mr. Burcham, test pilot for the Lockheed corporation, conditioned himself for his hazardous career by nailing a chair upside down on the beam of his kitchen, and spending a lot of his time sitting head downward as he coached arteries, nerves and vision for a topsy-turvy life. That was in 1933 when he decided to make a try for the upside-down flying record.

His record flight of 4 hours, 5 minutes and 23 seconds was just like an afternoon of pleasant lounging in the old kitchen chair. He had been a sand-blot flier on Long Island before going to California, to get a new orientation on an also topsy-turvy world. He is thirty-seven.

**NELSON D. ROCKEFELLER'S** friendly overtures to South America hit a hot mambo rhythm and a mezzo-voce moaning. Hollywood Aiding In Cartelization of U. S. - S. America Carmen Miranda, the Latin lallapalooza who has been hopping up the good neighbor spirit in these parts for nearly two years. The new film, "That Night in Rio," opening here, with Senorita Miranda singing "Chica, Chica, Boom, Chic," looks like a better attention-getter than anything the Export-Import bank might work up in the way of hemisphere cartelization. All this was premeditated, as Hollywood is definitely in on Mr. Rockefeller's new up and down flux of trade and culture. The beautiful Brazilian chanteuse was born in Portugal and was taken to Brazil by her parents at the age of two.

Her real name is Maria do Carmo da Cunha, her stage name having been taken from her mother's maiden name. Still in her early twenties, she has made nine concert tours of Brazil and other South American countries, and her more than 300 recordings top all sales in the Western hemisphere. When she made her debut here in "Streets of Paris," in June, 1939, North and South America began to realize they had much in common. Her "Samba" rhythm seems to be indigenous to both continents and ought to help to keep good neighbors in step.

## Britain's Floating Fortresses

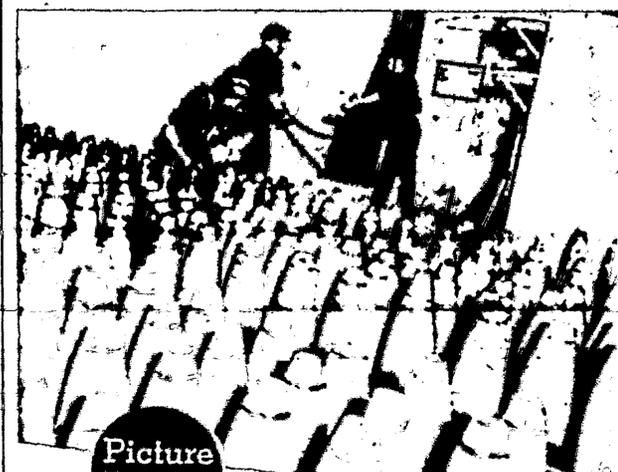

Above: Approaching one of Great Britain's formidable forts of the sea. These giant masses of steel and concrete, literally bristling with guns, are a new departure for war, and so far as England is concerned, a good investment. They are planted in "strategic" spots around England.

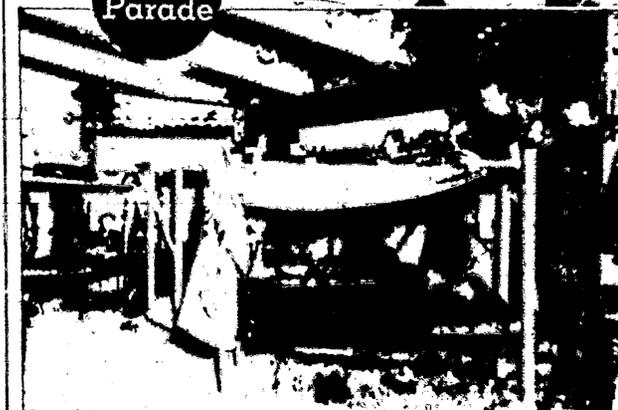

Right: On the gun deck of a floating fortress the crew prepares a 3-inch anti-aircraft gun for firing against enemy planes.

A sentry, a 12-inch cannon, and a lookout pictured on a floating fort somewhere in the southern command. Living quarters are located deep in the bowels of the fort.

Picture Parade

Top: A glimpse into the magazines of a floating fortress. The shells are sent to the guns above on a chain belt. Lower: Sleeping quarters. Men not on duty are shown at ease in double-decker cots.

Looking down into the deep hole that leads to the living and working quarters.

### Essentials in Lawn Planting

Beauty in lawns like beauty in persons is considerably more than skin deep. It is not to be had merely through surface applications of water and fertilizer, but depends in large measure upon certain fundamental requirements which must be met when the lawn is started. Those fundamental requirements are, (1) attention to sub-surface drainage, (2) proper leveling of the soil, (3) kind of soil, (4) preparation and fertilization of the seed bed, and (5) kind and quality of seed used.

### SUB-SURFACE DRAINAGE

A clay loam with sandy sub-soil will require no artificial sub-surface drainage since the sand will readily carry off any excess moisture. If, however, the surface soil is underlain by a hard clay, so compact that, instead of draining readily it allows water to stand about the roots of the grass, it will be advisable to use tile drainage. To afford such drainage, the U. S. department of agriculture says that "Lines of four-inch tiles, spaced 20 to 30 feet apart, laid 2 1/2 to 3 1/2 feet deep, with a fall of from 3 to 4 inches for every 50 feet, should ordinarily insure sufficient underdrainage."

### GRADING AND LEVELING

As a rule, when the builders leave the scene of their labors, the ground from which the lawn is to be made is in much less favorable condition for the growing of grass than it was before the necessary excavating was done. The topsoil has been covered with infertile subsoil and is mixed with considerable waste from the building construction. Before anything else is done, all such subsoil and waste should be removed to a depth of at least four inches—six is better—and replaced by a good grade of topsoil. If it is necessary to make extensive fillings around the buildings, do not use broken boards, pieces of concrete and other debris for the purpose. Lawns built on such fillings will not remain level, nor will they retain proper moisture content in dry seasons. Necessary fillings should be made with soil, to insure satisfactory results in the finished lawn.

### SURFACE DRAINAGE

The next important point to consider is that of surface drainage. As a rule lawns are constructed so as to result in an even slope of 1 to 2 per cent from the house, in all directions. After the ground has been graded, it must be carefully leveled to avoid the presence of pockets which will hold water and thus ruin the health and appearance of the lawn. After grading and leveling, water the lawn thoroughly and note where pools have a tendency to form—then re-level with care, before seeding.

### SOIL FOR LAWN GROWTH

Although there are grasses which will make a fair growth even on poor soil, any grass will give much better results on good soil. A good garden soil—that is, one which is light and friable, with sufficient fertility to maintain a luxuriant growth and sufficient humus to retain a proper supply of moisture—is the most satisfactory soil for grasses. If the soil is of heavy clay it must be lightened by addition of sand—a surface layer of one inch, worked well into the clay to a depth of three or four inches; if, on the other hand, it is very sandy, a similar layer of clay should be incorporated. Since subsoils thrown up from excavations are usually deficient in organic matter, such matter must be supplied if the subsoil must be used for the lawn. Well-rotted stable manure, or mushroom soil, mixed with the subsoil at the rate of one-half ton per 1,000 square feet, will supply the required organic matter. If the lawn is very large it may be necessary to furnish organic matter by means of a green manure crop—a legume, by choice—plowed into the soil.

### PREPARING SEEDBED

The ideal seedbed is firm and has a finely pulverized surface. It is advisable to water the lawn thoroughly, some time in advance of sowing, in order to encourage the germination of any weed seeds that may be in the soil. The germinating weeds may then be destroyed by raking, before the grass seed is planted. Just before sowing the seed, a fertilizer rich in nitrogen, phosphorus and potassium should be evenly distributed and worked thoroughly into the soil.

For information with regard to the kind of seed best suited to your locality and to the rate of the seed-bed, send five cents to Superintendent of Documents, Washington, D. C., asking for Farmers' Bulletin No. 1677.

### THE WORTS

No doubt you have wondered why so many plants bear names ending in the syllable wort. This suffix is an Anglo-Saxon word meaning simply any plant or herb, but especially a pot herb. Among the commonest in America are cowwort, a variety of cabbage; liverwort, which is a member of the beautiful Hepaticas; the lovely golden ragwort, inhabiting marshy places, and the bellwort, native to the U. S., whose lemon-yellow, bell-shaped flowers beautify the forests in early spring.

## FIRST-AID to the AILING HOUSE

by Roger B. Whitman  
(© Roger B. Whitman—WNU Service.)

### Shrunken Blankets.

**QUESTION:** A pair of all-wool blankets has become very hard and stiff after washing. How can I restore their softness? I wish to do the job myself.

**Answer:** Fill your bathtub with tepid water, dissolve half a package of soap flakes completely, and soak the blankets. Do not rinse; leave the soap in the wool. Wring lightly, hang over a line, and with someone to help you, pull and stretch the blankets as they are drying. Do not subject the blankets to any great change of temperature, either of air or water.

### Painting a Floor.

**Question:** Printed linoleum in my kitchen is so worn that I want to remove it, but must wait for about two years before laying new linoleum. In the meantime, what will be the most practical finish for the wood floor?

**Answer:** If your printed linoleum is not worn through, it can be painted with floor enamel, after thorough washing and then wiping with turpentine to remove all traces of grease and wax. If you must paint the wood floor, it should first be smoothed with a sandpapering machine to take off all splintering particles and roughness, and to give a smooth surface. You can then use any good quality floor paint or floor enamel. Waxing will not be necessary.

### Musty Odor.

**Question:** Of late there has been a moldy, musty smell from my floors. At first, I thought it was the rug, but investigation proved it to be coming from the floor. The odor is always present, but in damp weather it is twice as bad. How can I get rid of it?

**Answer:** A musty odor indicates rotting wood. It may be that the supports of the floor are in contact with the earth, or water may be getting into your wall from leaks in the wall or roof, or from a plumbing pipe. Whatever the cause, rotting is going on, and there will be eventual trouble if you do not correct the condition.

### House Appraisal.

**Question:** I am considering the purchase of a small, 10-year-old house, which to my inexperienced eye looks in good condition. But I should like the benefit of expert advice. Could I rely on the loan company's valuation, which will be made by the bank, as a fair estimate of the condition of the house? Otherwise, how could I go about getting reliable inspection and opinion of the property?

**Answer:** A bank's appraisal of the condition of a building is usually quite accurate. However, if you wish to check on the bank's findings, you could have a competent architect or builder make an inspection and give an opinion.

### Painting Stained Shingles.

**Question:** We have a Dutch colonial house; the upper part is dark brown shingles, the lower part being painted a cream color. We would like to paint the house a cream color all over. Is it possible to paint over dark stained shingles? Would one coat of aluminum paint over the brown be satisfactory, before putting on a light color?

**Answer:** If the stain on the shingles is comparatively new; that is, less than a year old, it is advisable to wipe with turpentine. Otherwise, one coat of good aluminum paint, applied uniformly, will seal the stain and will make a good priming coat for the paint to follow.

### Painting a Metal Animal.

**Question:** I have a plated metal animal 14 by 8 inches; silver plated on copper. I wish to paint it. How should I prepare the surface for a flat paint?

**Answer:** Roughen the surface of the metal by rubbing with sandpaper. Follow by wiping with benzine, being very careful of fire when doing so. Put on house paint in thin coats, and allow plenty of time for drying between coats.

### Stair Creaks.

Creaking in stairs is from the springing up of the treads over the risers; it occurs when a weight presses the tread back into place. The tread can be secured with long finishing nails, driven through it and into the edge of the riser underneath. Nails should be driven in pairs and at opposite angles. Sink the head below the surface with a nailset and fill the holes with wood putty.

### Water Supply Tank.

**Question:** In putting in an electric pump water outfit, would you prefer a small supply tank, or a large one?

**Answer:** I should use a large tank, to have an ample supply in case of fire or other emergency.

# TIPS to Gardeners

GARDENING AS HOBBY

**GARDENING** is a hobby can be made to pay excellent dividends. As an example, a Missouri woman reports she made a net profit of \$300 from her two-thirds-acre garden in a single season. Figured at market prices, food used fresh was \$250; food canned, \$80; and food stored, \$71. Seed and sets cost her only \$20.

There are two major requisites to obtaining garden profits of this kind. They are, willingness to work and the use of quality seed. It is important also to devote considerable space to multiple purpose crops like beets, onions, and tomatoes—crops that can be used in a variety of ways.

Here, briefly, are the uses of principal multi-purpose crops; Onions—green, as relish; mature bulbs fried, stewed, or as seasoning; bulbs for pickle, and relish making; tops for seasoning; bulbs for storage. Tomatoes—fresh fruits for slicing or stewing, for immediate table use, for canning, or for making tomato juice, or tomato catsup; green tomatoes for frying, or for use in pickle relishes, or in pie filler (like mince meat); yellow fruits for preserves, juice, or immediate table use.

Cabbage—fresh in slaw, or salad; cooked for table use; canned as kraut, or stored. Beets—tops for greens; roots cooked fresh, canned, pickled, or stored.

## Don't be a Blowhard!

Remember that your nose is not made of rubber. If you keep on blowing and blowing, it's bound to become red, sore, and swollen. So stop blowing.

The easy, modern way to clear stopped-up nostrils due to a cold is to use Mentholatum. All you need do is insert this gentle ointment inside your nostrils—spread some outside, too. See how quickly it clears up the stuffiness and relieves irritation—how it checks sniffing and sneezing.

Once you use Mentholatum you'll say it's wonderful. It helps in so many different ways that you should always remember this: For Discomforts of Colds—Mentholatum. Link them together in your mind.

### Real Necessities

Necessity hath no law. Feigned necessities, imaginary necessities, are the greatest cozenage men can put upon the Providence of God, and make pretences to break known rules by.—Cromwell.

## YOUR EYES TELL how you feel inside

DOES LENT CHALLENGE YOUR COOKING ABILITY?  
(See Recipes Below)

### SPEAKING OF LENTEN VEGETABLES

Yes, speaking of Lenten vegetables reminds us that the Lenten season has again returned—that season when Lent challenges us as good cooks to produce something new and different—something which will entice the appetite of the family—something that will perchance become so great a family favorite that it will remain a "must" on our recipe list all through the year.

Such is the list of new ideas for cooking vegetables as contained in this column today. Not only will you like these new ideas for cooking vegetables—but also equally as much I think you will like some of the ideas for serving them. Note the canned peas as shown in the photograph above. Look good enough for any company dish, do they not, yet all that was done to dress them up was simply to surround them with onions and carrots and the carrots were garnished with the sprigs of fresh parsley.

Thus it is that every day foods—foods full of nourishment and of food value become new favorites. Please from time to time, try each one of these recipes—you'll like all of them, I know.

If you've strange guests coming for dinner and don't know what vegetables they like, cover your confusion by letting them choose their own from this attractive arrangement of canned peas, onions and carrots.

#### French Fried Onions.

Use Spanish or large Bermuda onions. Peel and cut in slices 1/4 inch thick. Separate slices into rings, soak in milk for a few minutes. Drain and roll in flour. Fry in deep fat, which has been heated to 350 degrees F. hot enough to brown a cube of bread in 1 minute. When onions are golden brown, remove from fat and drain on absorbent paper. Serve very hot with broiled steak.

#### Vegetable Rice Ring.

1 cup rice  
2 cups peas  
1/2 cup tomato puree  
1 teaspoon celery salt  
1/2 teaspoon curry powder  
1/2 teaspoon paprika  
1/4 cup butter

Cook the rice in boiling salted water until tender and drain. Place in ring mold and dry slightly in oven. Heat peas. Remove rice ring from mold and heap peas in the center. Cover with sauce made of the tomato puree, seasonings and melted butter. Serve very hot.

#### Orange Sweet Potato Baskets.

Cut large navel oranges in half and scoop out centers. Cube the pulp and fold in hot mashed sweet potatoes. Fill the orange shells and bake in a moderate oven (350 degrees) for approximately 10 minutes. Then top each half orange with a marshmallow and continue baking until marshmallow is puffy and golden brown. Remove from oven and serve at once.

#### Baked Tomatoes and Shrimp.

5 fresh medium-sized tomatoes  
2 tablespoons butter  
2 tablespoons diced green pepper  
2 tablespoons minced onion  
1 No. 1 can shrimp—diced

Hollow out tomatoes. Melt butter in frying pan and add diced green pepper, onion, and shrimp. Brown mixture very lightly and fill tomato shells. Sprinkle with buttered cracker crumbs and bake until tomatoes are tender.

#### Stuffed Baked Onions.

3 large onions  
1 cup soft bread crumbs  
1/2 teaspoon salt  
Dash pepper  
4 slices bacon, minced and cooked  
Buttered bread crumbs

Remove the outer skin of the onions and cut in half horizontally. Cook in boiling salted water, un-

### Want to Learn Some New Household Tricks?

Of course you do—and it's the simple easy way of doing things—as ferreted out by millions of homemakers that have been compiled in this book, "Household Hints"—a book that literally every homemaker should own.

To get your copy, to learn the household tricks that for some reason or other you just haven't thought of before—send 10 cents in coin to Eleanor Howe, 219 North Michigan Avenue, Chicago, Illinois—ask for the booklet "Household Hints."

ered, until onions are almost tender (approximately 20 minutes). Take care to preserve shape of onions while cooking. Drain, and arrange cut side up in a buttered baking dish. Remove the center of each onion and chop fine. Mix with the soft bread crumbs, salt and pepper, and bacon. Fill onion halves and top with the buttered bread crumbs. Cover bottom of the baking dish with water and bake in a moderate oven (350 degrees) until onions are tender and bread crumbs have browned, approximately 1/2 hour.

#### Cauliflower a la Parmesan.

1 head cauliflower, cooked  
3 tablespoons grated cheese  
1 cup white sauce  
1/2 cup buttered bread crumbs

Place cauliflower in greased casserole. Pour white sauce over cauliflower, and sprinkle with cheese and bread crumbs. Bake in moderate oven (375 degrees F.) 20 minutes, or until crumbs are delicately browned. Serves 6.

#### Spinach Nut Ring.

(Serves 6)  
3 cups cooked spinach  
3 eggs (beaten)  
1/2 cup bread crumbs  
1/2 cup nut meats (cut fine)  
1/2 cup bacon fat  
1/2 teaspoon salt  
1/4 teaspoon pepper

Chop the spinach and add the beaten eggs and other ingredients in the order given. Turn into a greased ring mold and bake in a moderately hot oven (375 degrees F.) about 20 minutes, or until it is firm. Turn out on a hot, round platter.

#### Savory Glazed Carrots.

Cook until onions are tender:  
2 tablespoons onion, chopped  
2 tablespoons butter

Flour carrots and saute with onions and butter for 10 minutes: 9 or 10 whole carrots, scraped (5 to 6 inches long)

2 tablespoons flour  
1/2 teaspoon salt

Then pour on:  
1 can consommé, diluted with  
1/2 cup water

Cover tightly and cook until carrots are tender. Sprinkle with chopped parsley just before serving.

#### Corn Souffle.

4 tablespoons butter  
5 tablespoons flour  
1 teaspoon salt  
2 cups milk  
2 cups canned corn  
1 tablespoon chopped pimientos  
1 tablespoon finely chopped onion  
2 tablespoons chopped celery  
4 egg yolks  
4 egg whites, beaten

Melt butter and add flour, salt and milk. Cook until very thick sauce forms. Stir constantly. Add corn, seasonings and egg yolks and beat three minutes. Fold in egg whites. Pour into buttered baking dish, set in pan of hot water and bake 40 minutes in moderate oven (350 degrees F.).

#### Brussels Sprouts

Select light green, compact heads. One quart will serve six. Remove wilted leaves and soak for 15 minutes in cold water. Drain and cook uncovered for 20 minutes in boiling water. Add salt the last 10 minutes. Drain and serve with Hollandaise sauce.

# PATTERNS

## SEWING CIRCLE

1313-B

ONE little, two little, three little fashions—all in one easy pattern (No. 1313-B) that even inexperienced-at-sewing mothers can make with more fun than effort. This design includes a sleeveless pinafore, a brief trifle of bolero and a sunbonnet, all as cute as a baby in a bathtub! In the flaring pinafore alone, your tot can be as carefree and hoydenish as she could wish, playing on the sands or the greensward or her own backyard. When she adds the bolero, she's as demurely dressed for a visit to grandma as you could

wish. The eye-protecting bonnet, of course, goes beautifully with either or both.

This little outfit looks adorable in red-checked gingham, flowered percale, plain or striped seersucker and buttercup yellow chambray, outlined with bright ricrac braid to match or contrast.

Pattern No. 1313-B is designed for sizes 2, 3, 4, 5 and 6 years. Size 3 requires 2 1/2 yards of 35-inch material without nap and 8 yards of ricrac. Send order to:

### NEW IDEAS

for Home-makers  
BY RUTH WYETH SPEARS

HOUSES of glass are realities today and, if you want to give any house a modern air, try to make the windows seem important. One way is to frame them in a group by covering the wall and leaving the glass exposed. A comparison of these two sketches shows that this may be done even though the windows are unevenly spaced. The cream colored walls, glass curtains and window shades are the same in both and the same

two-toned green rug and the same lamp and pictures are used. The couch and cushions are also the same but the covers are new. An inexpensive chintz with gray-green ground and a flower pattern

### HOUSEHOLD QUESTIONS

Put small cooked hamburger cakes between two hot biscuit halves and top them with a brown savory gravy or well seasoned white sauce. You'll like these.

Wire and iron bed-springs that become rusty should be given a coat of paint.

Pillow slips iron easier lengthwise.

Meat should not be seasoned until it is partially cooked.

Put your white wash on the sunny side of the line and keep the colored clothing in the shade.

A strong railing to prevent falls and plenty of headroom are two important necessities for any safe cellar steps. When the steps are in a dark place, several coats of white paint applied to the steps will make for greater safety.

Before the Facts  
Sit down before every fact as a little child. Be prepared to give up every preconceived notion, follow humbly wherever and to whatever abysses Nature leads, or you shall learn nothing.—T. H. Huxley.

## ASK ME ANOTHER ?

A Quiz With Answers  
Offering Information on Various Subjects

1. Who has charge of the Great Seal of the United States?
  2. How does the size of an electron compare with that of an orange?
  3. Tweedle-dum and Tweedle-dee are characters in what story?
  4. Who was the first king of the house of Windsor?
  5. Can eclipses of the sun occur in any month of the year?
- The Answers
1. The secretary of state has charge of the Great Seal.
  2. If an electron and an orange could be magnified equally until the orange was as large as the earth, the electron would still be too small to be visible to the unaided eye.
  3. "Alice's Adventures in Wonderland."
  4. George V. The name of the British royal family was changed to Windsor in 1917.
  5. Eclipses of the sun, visible at some parts of the earth's surface, have been recorded in every month of the year.

## HOW "WISE" ARE YOUR EYES?

TOBACCO PACKAGES CAN SURPRISE YOU, TOO—THE P.A. POCKET TIN IS GOOD FOR 70 "MAKIN'S" SMOKES

● Prince Albert's "crimp cut" packs down in the tin—packs smoothly and evenly in your papers. Rolls fast, easy without fuss, fumbling, or spilling. Smokes grand—smooth, mild, good-tasting from first smoke to last. (Same in pipes, too!)

● The post that's furthest away looks largest, doesn't it? But get out your ruler and measure all three. You'll agree that the posts are exactly the same size!

"SMOKING JOY AND LOTS OF IT!"

CANCELLED EASTER MASS

Pope Pius XII has cancelled the usual papal Easter mass in Saint Peter's and benediction from the church's balcony for the first time in nine years because of war conditions.

Transportation restrictions on Sundays, when private motoring is forbidden and public transportation reduced, were given as one of the principal reasons for cancellation of the Easter service.

Pope Pius XII had been expected to deliver an Easter homily on war and peace as he did last year, but prelates indicated this also would be omitted.

**SELECTIVE SERVICE ELIGIBLES' APPEAL**

Only 10 selective service eligibles out of some 2,600,000 classified to date have appealed to President Roosevelt, it was learned today, from local board rulings that they were immediately available for military training.

The negligible number of appeals was interpreted by some highly placed officials as indicating a "remarkably small amount" of dissatisfaction among registrants who have been put in class 1A by their local boards.

All the cases involved the issue of dependency, the only ground on which an appeal can be carried to the president under the law.

Mr. Roosevelt returned about half of the 10 cases to local draft boards to be reopened. This action was taken it was learned, on technical grounds because the boards had lacked some essential information when the classifications were first made.

The remainder of the cases were decided by the president in favor of the men who appealed and they were thereupon given deferment from immediate service.

**Literary Criminal Now in Cell After Sensational Theft**

**Directs Aids in Stealing Shakespeare Folio From Library.**

**BUFFALO.**—Impossible feats always have held a hypnotic fascination for a certain few quixotically minded people.

For them, no mountain is too high to assault, no abyss too great to start across on a tightrope, no problem too knotty to tackle.

It was the spirit of such endeavor, perhaps, which a year ago led a 22-year-old Buffalo, N. Y., draftsman to conceive the Homeric project of stealing the Shakespeare first folio, one of the most bizarre modern crimes.

It was a venture comparable in principle to the classic theft of the Mona Lisa, and equally impossible of successful completion.

The Shakespeare folio, the first compilation of the bard's plays printed in 1623, was in the library of Williams college at Williamstown, Mass., and was one of the few copies extant.

They are worth upwards of \$50,000, and the ownership of each is known to thousands of rare-book connoisseurs.

**Had Experience.**

William Kwiatkowski already had considerable experience in illicit literary transactions, so the assistant district attorney's office says. In 1930 he sent to a magazine as his own work a story that had been published by another magazine 14 years before, and had been discovered. He was put on probation upon his agreement to return the \$300 he had been paid.

This time he laid more careful and elaborate plans.

To do the actual stealing, he enlisted a friend, Donald Lynch, and assigned his own younger brother, Edward Kwiatkowski, 19, to assist.

Last February 7, Edward drove Lynch to Williamstown, and the latter, equipped with the simple disguise of a pair of scholarly shell-rimmed glasses, and carrying a brief case, walked into the Williams library.

To the librarian, Miss Lucy Osborne, he presented a letter forged in the name of the president of Middlebury, Vt., college, identifying the bearer as a Middlebury professor, and asked to see the folio.

Miss Osborne escorted Lynch to a private room and put the valuable volume on a table before him.

**Exchanged for Dummy.**

The minute she left the room, Lynch slipped the book into his brief case and substituted a dummy he had brought. He waited a few moments and then rushed out, affecting restrained excitement.

The folio was so marvelous, he exclaimed, that he must call his wife to come see it. Then he vanished.

The theft was discovered in a few minutes. Massachusetts state police quietly arranged observation of every bookstore.

Whatever strange plans he may have had for disposing of the folio probably never will be learned, because five months later, while Kwiatkowski was still biding his time, Lynch became overburdened by his guilty knowledge and went to the police in Albany.

They turned him over to the Massachusetts police, who took him to Buffalo, where the whole group presently were rounded up by federal agents.

A short time ago William Kwiatkowski, the "master mind," was sentenced to two years in prison. His brother-in-law, the financier, and Lynch, the actual thief, got a year and a half; and the younger Kwiatkowski a two-year sentence, suspended.

**Handless Hunter Kills Giant Bear in Mountains**

**WALLA WALLA, WASH.**—A man who lost his hands seven years ago has the hide of a 400-pound bear to prove his prowess as a hunter.

He is John Tamplin, and he shot the bear in the Blue mountains of Oregon.

After Tamplin lost his hands by amputation, he supervised the making of mechanical hands which he now wears. With the artificial members, he learned to shoot a rifle and soon was an adept rifleman.

A Blue mountain rancher, Jake Klieker, told how the huge bear had charged at Tamplin. "After Tamplin had fired two shots at it and missed. The third shot dropped the bear at Tamplin's feet."

**Romance Knows No Age, Bridegroom, 90, Insists**

**SANGER, CALIF.**— "Romance knows no age," says the Rev. J. M. Spencer, 90 years old, who revealed that he had married Mrs. Belle Hurst, 55, of Oklahoma City after a whirlwind letter writing campaign.

A matrimonial agency put him in touch with Mrs. Hurst last July, he said, but he had told her that he was only 80, for fear she would not be interested if she knew he was 90. "I think I've got a prize package and I know we'll be happy," said Spencer, a bridegroom for the fourth time. "Nobody ever took me to be older than 80 anyway."

**Industry Ready to "Keep 'em Rolling" for Defense**

Graphic illustration of the way in which one of America's greatest industries gears its activities with the United States Army for national defense is found at Little Falls, Minn., where the greatest peacetime maneuvers in the history of the country are being held Aug. 2—Aug. 24.

To "keep them rolling," Chevrolet, one of the largest suppliers of motor transport equipment to the nation's armed forces, has set up through one of its dealers, the Bert Boston Motor Co., of Minneapolis, a complete parts and service headquarters in the military reservation at Little Falls. More than \$10,000 worth of parts is maintained at this depot, where three service representatives are on duty 24 hours daily to service Chevrolet equipment in use. The 25,000 troops in actual combat maneuvers will use 1,100 Chevrolet transport units, including officers' cars, reconnaissance cars, hundreds of trucks adapted to special uses, and military ambulances.

Upper left in the photo shows army transport crewmen servicing an ambulance. Upper right is the Chevrolet parts and service headquarters tent, where service experts are always on duty. Lower left is Lieut.-Col. R. F. Roseberg, of the Minnesota National Guard Quartermaster Corps. At lower center, an officers' car used by the major-general in command of the Little Falls campment is being serviced. Lower right is an interior view of the Chevrolet parts tent, showing completeness of stock.

**BILLIONS OF DEFENSE SECURITIES**

The treasury began enrolling an army of 500,000 persons to assist in a campaign to sell billions of dollars worth of new defense savings securities to the American public.

Gale F. Johnston, St. Louis insurance man who will supervise the drive, said the campaign workers would be sent out to ask employers to use the securities for employee savings plans; to canvass the schools; to urge labor union co-operation; to arrange with banks so depositors can have the bonds bought for them regularly and charged to their accounts, and to organize other promotional activities.

Governors, mayors and other prominent local officials will be asked to name committees in even the smallest communities.

Johnston explained that the theme of the drive would be for continuous purchase rather than large lump sum transactions.

For example, he said, the idea would be to encourage a school child in the habit of buying one 10-cent savings stamp a week or month, rather than have the child buy \$5 worth at one time, and then forget about the matter.

The new securities, announced last night by Secretary Morgenthau, were graded in denominations all the way from 10 cents to \$10,000, in order to make such regular purchase programs fit into almost any size purse.

Some officials hope to multiply several times the \$1,000,000-a-year rate at which "baby" bonds have been sold.

The drive being organized is expected to rival some of the Liberty bond campaigns of the World war days.

**NOTICE TO TAXPAYERS**

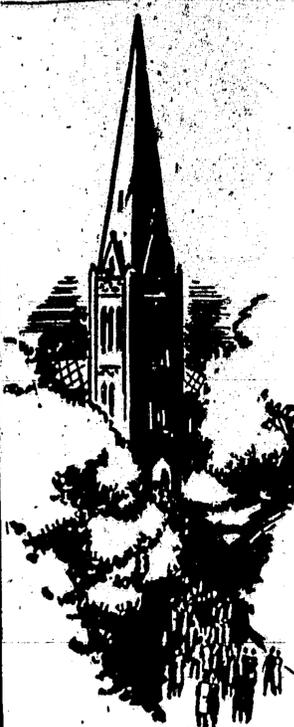

**NOTICE IS HEREBY GIVEN,** That the second half 1940 taxes are due and payable April 1st, 1941 as shown by the Tax Roll in the office of the County Treasurer. Where first half 1940 taxes have not already been paid 5% penalty should be added to said first half. Penalty of 1% will be added to the second half 1940 taxes May 1st, 1941.

**TRACKWALKER HONORED BY S. P. COMPANY**

Antonio Nencini, trackwalker for the Southern Pacific Company, was the proud possessor of a gold watch and chain today, presented by the railroad's management "for meritorious service in the line of duty."

The gift was accompanied by a personal letter from A. D. McDonald, president of the company, in appreciation of Nencini's prompt frustration of an attempt to derail a train near Dutch Flat, California last month.

Nencini's handling of the emergency was pointed to as "an outstanding example of how railroad workers continue to make 'safety first' their paramount endeavor."

While patrolling the track on his section, at a point 68 miles east of Sacramento February 8, Nencini discovered that a rail had been tampered with. Unable to repair the damage alone, he set out warning signals, telephoned a report to his roadmaster and then returned to the danger spot to act as flagman as a further safety precaution.

Three men, arrested February 14 and held in jail at Sacramento, have confessed the crime, according to Nat Pieper, agent in charge of the Federal Bureau of Investigation, San Francisco district, and Daniel O'Connell, chief special agent of Southern Pacific's police department.

Department of The Interior  
General Land Office at Las Cruces, New Mexico, February 21, 1941.

**NOTICE** is hereby given that Ernest R. Clifton, of Kermit, Texas, who, on December 7, 1934, made homestead applications No. 050014 and No. 050272, for SE 1/4 NE 1/4, NW 1/4, SW 1/4 Sec 11, S 1/2 N 1/2, S 1/2 SE 1/2, Section 12, Township 5 S., Range 6 E., N. M. P. Meridian, has filed notice of intention to make 3 year proof, to establish claim to the land above described, before Felix Ramey, County Clerk of Lincoln Co., New Mexico, at Carrizozo, N. Mex., on the 11th day of April, 1941.

Claimant names as witnesses:  
Leon Houston,  
Velma Wilson, both of Carrizozo, N. Mexico.  
Irvin Griffin,  
Lionie Moon, both of Abobe, New Mexico.  
Paul A. Roach,  
Register.  
F28-March 28.

Mr. L. T. Collier of Alto who is advertising manager for the Boy Scout movement in this area was in town last Friday.

This semi-arid climate has become very moist. It has rained every few minutes for several days. It will almost rival California if the rains continue.

Mrs. Bryan Hightower of Ancho was in town last Thursday and while there renewed her subscription to the News.

Dr. M. G. Padon came down from White Oaks last Monday to do some shopping and visit some of his Carrizozo friends.

Lt. Bradley Smith of Fort Bliss, and his brother-in-law, Mr. Robert Hemphill of El Paso were here Saturday and Sunday. They were accompanied by Miss Bernice Hale.

Mr. Jack Harkey came up from Fort Bliss last Sunday to visit his parents.

Mr. and Mrs. R. C. Hemphill and daughter Marilyn, who have been spending the winter in Mississippi are again living in Orogrande.

Dr. Carl E. Freeman and Mr. and Mrs. Ralph Pruett visited Miss Rhoda Freeman in Albuquerque last Sunday.

Mr. and Mrs. Jack Zummalt moved to Cloudcroft, where Jack is employed by the Southern Pacific.

The singing convention held at Tumble last Sunday was largely attended and those present say the basket dinner was the best yet, and in such quantities.

Hon. Lako J. Frazier of Roswell was in Carrizozo last Thursday on business.

**Find Initialed Turtle Again After 30 Years**  
LANESBORO, MASS. — While picking strawberries with his brother in 1910, Sidney Newton found a shopping turtle. Dean held the reptile while Sidney cut the initials "S. N. 1910" on the shell, then released the turtle. Now, 30 years later, Dean E. Newton spied the initialed turtle while walking on his farm.

**Will Use Magic to Pack Church Pews**

**Handsome Performer Goes To Work for Christianity.**

CHICAGO.—John Booth, a handsome youth who has lived off magic the last six years, transfers his tricks and fancy talk from night club floors to the church pulpit to "pack the pews" for Christianity. He has promised to "rekindle enthusiasm for the church if I have to pull jackrabbits from the organ stops."

Booth, 23, is a theology student at the University of Chicago. He said he decided to become a minister when he realized that "something constructive" should be done with his powers of entertainment.

For six years after his graduation in 1934 from McMaster university, Hamilton, Ont., he pounded the footboards as a career conjurer, winning reviewers' plaudits from scores of metropolitan newspapers. A national trade journal rates him "one of the nine foremost magicians of the day," and, additionally, he has written three books of instruction in the art.

Tall, dark and mustached, Booth said he learned early that presentation—"gift of gab" he calls it—was "90 per cent" of any trick.

"If I could make presentation pay with mere tomfoolery I figured I could make it do big things for truth," he said.

Booth long had nurtured an ambition for the ministry because it was as a child in Sunday School at Cleveland that he learned his first "magic" from Carl Germain, a prominent showman and a teacher in the church school.

"Of course I cannot hope to make the money I made on the stage," Booth said. "But I will have become useful to myself and to mankind."

He said he expects to bring magic and logic together in the pulpit "in a modern, sane setting." In ancient ritual, magic and religion were united in ceremony, he said, to impress the congregations.

How the rocky romance of the love-smitten heiress was saved by the stroke of a pen. Louis Sobol, popular Broadway columnist, tells how nothing but trouble pursued the lively glamour girl after she eloped with the Rhumba expert, and it even looked like her hubby was a bigamist, till a sympathetic judge extricated them from their predicament. Don't miss this up-to-the-minute, illustrated feature in The American Weekly, the magazine distributed with next week's LOS ANGELES EXAMINER.

**His Idle 25-Cent Boast Buys Him a Village Lot**

FAIRBURY, NEB. — Everett Clark, mingling with a crowd attending a tax sale of village lots, showed a friend his new work gloves. "How much did they cost?" asked the friend. "Twenty-five cents," boasted Clark loudly. Sheriff Dwight Young, conducting the auction, heard only the price and promptly marked it down. There were no other bids and the sheriff informed a surprised Clark he had bought a lot in Harleme.

**Blacksmith Too Noisy, Is Indicted by County**

GRAYVILLE, PA.—"The smith, a mighty man is he," came from Longfellow's pen long years ago, but it isn't that way in Grayville now. Davis S. Sukay, the village "smithy," was indicted by the county grand jury for maintaining and causing a common and public nuisance. The former tinkle of hammer on anvil has now become an unnerving clang, and the flashing sparks are just so much smoke and cinders to Grayville, F. Jablonski, the prosecutor, maintains.

How the homely housewife's ardent bared the Nazis' new ugly spy system. The British could hardly believe that dumpy Mrs. O'Grady was a traitress, but now they know the Germans are hiring unattractive women for undercover jobs because pretty ones are more liable to get in trouble. Read of the Astonishing way they discovered this and what they are doing about it, as told in The American Weekly, the magazine distributed with next week's LOS ANGELES EXAMINER.

Lowest price ever for a Frigidaire with so many features... 1941 Model R-6

**Lincoln County Utilities Co.**  
CARRIZOZO, N. M.

More than 6 million Frigidaires built and sold.

**A REPORT to America**

The Ford Motor Company's business has always been to serve the needs of the American people. In providing them with low-cost transportation for the past 38 years, we have developed one of the country's largest and most useful industrial units. During a national emergency, we feel that these facilities should be devoted without reserve to our country's needs. Toward that end we started rolling months ago, with these results:

5 Several months ago work was started, on our own initiative, on an entirely new 1500 horsepower airplane engine especially designed for mass production. This engine is now in the test stage and plans are being developed for producing it in large quantities when and if needed.

6 A Ford aircraft apprentice school has been established, to train 2000 students at a time.

That is a report of progress to date.

The experience and facilities of this company can be used to do much of the job which America now needs to get done in a hurry.

Our way of working, which avoids all possible ted tape, enables us to get results and get them fast. This benefits users of our products and workers who produce them.

We are ready to make anything we know how to make, to make it to the limit of our capacity if need be, to make it as fast as we can go, and to start the next job whenever our country asks us to. And to this end, we know we have the full confidence and loyal support of the workmen throughout our plants.

- 1 A \$21,000,000 Ford airplane engine factory, started only 6 months ago, is nearly completed. Production will start with an initial order for 4,236 eighteen cylinder, air-cooled, double-row, radial engines.
- 2 We are building a new \$800,000 Ford magnesium alloy foundry, one of the few in the country. It is already producing lightweight airplane engine castings.
- 3 Army reconnaissance cars—military vehicles of an entirely new type—are rolling off special Ford assembly lines at the rate of more than 600 a month. We have produced Army staff cars and bomber service trucks.
- 4 The government has given the "go-ahead" and work is now under way for the fast construction of an \$11,000,000 Ford plant to produce bomber-airframe assemblies by mass production methods.

**FORD MOTOR COMPANY**

# War Front Moves to North Atlantic Sea As Nazis Unleash Bombers, Submarines

By ROGER SHAW

(Released by Western Newspaper Union.)  
NEW YORK.—This is a funny war, but no longer a phoney war. The phoney phase, if any, passed with the Norwegian campaign of a year ago. Since then, things have been grimmer and grimmer. Various fronts have evolved. There are the Balkans. There is Gibraltar. There is North Africa, and East Africa, and Albania. There are the fifth columns all over Europe that favor German rule, and the opposition fifth columns that detest German rule—the treadmill of the Nazi military boot.

Then, there is the hammer and the anvil phase. England is the sturdy anvil. Germany in the vengeful hammer. The Spitfires and Hurricanes and Heinkels and Messerschmitts fight it out in the third dimension, on an aerial front such as mortal man never saw before. There are Coventries and Hamburgs and all manner of hapless atrocities. But are these aviatory antics decisive? Apparently not, to date. London may be gutted, but it still laughs and goes to the movies and sings "There'll Always Be an England." In Berlin, only 500 houses have been damaged, according to recent reports. British factory power has been slowed up, but the "arsenal of democracy," so-called, is gaining momentum and hastening replacements to the scene of insular carnage. The life-line of empire no longer runs up the Mediterranean and on to India. Instead, it runs across the North Atlantic, from Roosevelt to Churchill, and back again.

### Most Important Front.

This is where the most important front comes in, as this is written. It is the watery U-boat front. The purpose of the U-boat is to cut the new life-line of empire, nullify the American "arsenal," and leave the damaged British factories to shift for themselves as they face the hideous hammer of Thor. It is also intended to cut down on foodstuffs, and thereby loose still another of the terrible horsemen of the vaulted apocalypse. In the minds of many critics, the U-boat threat outweighs the Balkans, North Africa, the late lamented battle of France, and even the airplanes. It is, as they say, of the essence. All this remains to be seen, but the weather is getting better—which means that things may be getting worse.

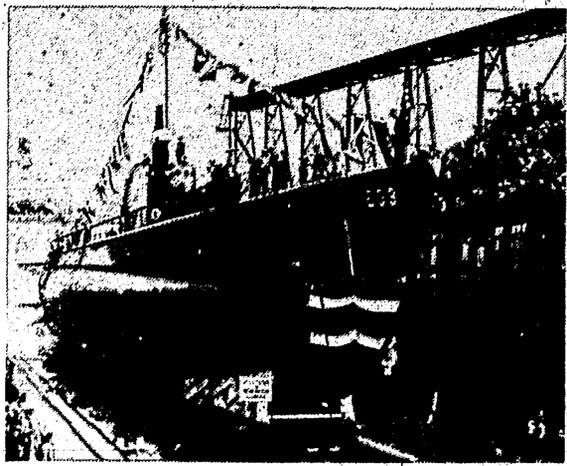

The high point of the U-boat threat in the first World war was April, 1917. It was the same month in which America entered the conflict. There was a connection between these events. But in those days, the active U-boats were not too numerous. Seldom were there more than 30 at sea, at any given time. They operated only from such limited spots as Cuxhaven and Kiel in Germany, Ostend in Belgium, and Austria's old Adriatic ports, for the Mediterranean trade. In 1914, Germany started the war with less than 23 submarines, and perhaps 10 more in the process of building. In the course of the war, there was something like 700 laid down.

### Long Training Needed.

It takes a long time to produce and train a good U-boat commander—come critics say all of five years. Despite the hundreds of German submarines between 1914 and 1918, half a dozen experts accounted for no less than 70 per cent of the Allied ship losses. Naval statistics verify this astonishing fact.

Winston Churchill recognizes the true state of affairs. His cry is ever for sub-fighters, destroyers, for convoys.

Germany isn't the only nation conscious of the submarine's power. Another new addition to America's large submarine fleet is shown being christened by Mrs. Wilhelm Friedell at Vallejo, Calif.

In this war, the Germans have an air fleet schooled to co-operate 100 per cent with the subs. Of these, in 1939, there were about 60 to 70. What the figure now is, nobody accurately knows. It's on the up and up, for fast streamline production has been introduced in the German shipyards, and in interior-located factories. U-boats can easily be shipped about on railroad flatcars—even up over the Alps, like Hannibal's elephants. Further, most of the British navy is now being built in the Mediterranean. In the last war it was based on Scotland, and therefore in a far handier position than is now the case. The French coast is a great basic convenience to Hitler's Admiral Raeder, and so are the north-reaching Norwegian fjords. The Kaiser

are under aerial bombardment, to boot. At night there are blackouts, and these delay loadings and un-loadings in the ports. The ports, too, have taken a terrific hammering from Herr Goering, and in some cases their dock facilities are badly damaged, or even closed up. No longer may floodlights be used to hasten a 24-hour schedule. In short, the German boats dovetail "nicely" with the U-boats and the French and Scandinavian ports, to produce an all-round picture of ill omen.

Churchill has a clear naval head. He recognizes the true state of affairs. He relegates subs, Balkanics, and Africanders to second or third place. His cry is ever the same: For the new "corvettes," for destroyers, for convoys, for submarine detection devices to catch the U-boats "bitting." Meanwhile, in the German naval ranks, two or three small submarines are taking the place of any single big one of the "1918" type. The mutinous mermaids will soon be learning of mass production at its deadliest, and in its most sinister form.

The no-man's land of 1941 is the billowy north Atlantic, and its dough-boys are old salts. Watch it. It's the present-day "Hindenburg Line."

Germany's outstanding submarine hero is Captain Guenther Prien who steered his craft into Scapa Flow in 1939 to sink Britain's Royal Oak. In the first World war 70 per cent of Allied ship losses were attributed to only six such experts.

didn't have such an advantageous frontage.

The royal air force is constantly bombing German U-neats along the vast coastal stretch, when they might better be hammering German factories in the interior. This costs men, planes, explosives, time and money. Meanwhile, the Germans have been concentrating on small submarines. These can be built much more quickly, they cost less, and they are just as effective for short trips around the British Isles and west of Ireland. Another very important factor is this: They require much smaller crews, and submarine crews are singularly hard to train. When it comes to U-tactics, Germany may be more pressed now for U-men than for U-boats. As for sub commanders, to date there are no outstanding individuals except the well-known Gunther Prien—the Ferrero of the second world war. Even Churchill admires Prien, and has said so.

### Small Craft Needed.

What the British need is small craft to hunt the subs. They have produced a sort of "corvette"—a type modeled on the fast little "chasers" that professional whalers use today.

The British have lost heavily in shipping, in the past year and a half. They had never made up their losses from the last war, and the fresh invasions cut seriously into the sum total of his majesty's tonnage.

The British shipyards, at Newcastle and Glasgow and elsewhere, are trying to speed up production as best they can. But it's far easier to sink ships than to build them, and in some cases the shipyards

## Aluminum Utensils May Be Restricted By Defense Needs

KINGSTON, N. J.—If homemakers have their hearts set on buying aluminum pots and pans in all the shapes and sizes they want, they're going to find it a little difficult, especially in the next few months to come. And if papa decides the family needs a new radio about two months hence, he's liable to discover he's out of luck.

It appears that civilian consumers in this country will have to stand back for a little while and watch the shiny, strong, light metal shaped around airplanes, put into military motors of all kinds, fixed into place in innumerable parts of ships. As for pots and pans—the army and navy will need plenty of those, and will come first.

A spokesman for the Aluminum Company of America, at the moment the only producer of virgin aluminum, estimated that the bottleneck made by the defense demands will probably be opened within 120 days. Retail distributors have a much gloomier outlook. Radio manufacturers seem plainly scared, and one manufacturer says openly that he thinks a shortage of the useful metal will utterly disrupt radio production.

Defense needs can stop the production of radios, for you see, aluminum is a requirement for condensers, and other parts in a radio.

Manufacturers of ordinary aluminum household utensils have been informed that all future orders will require at least eight weeks for delivery. Heretofore, the metal could be picked up almost immediately.

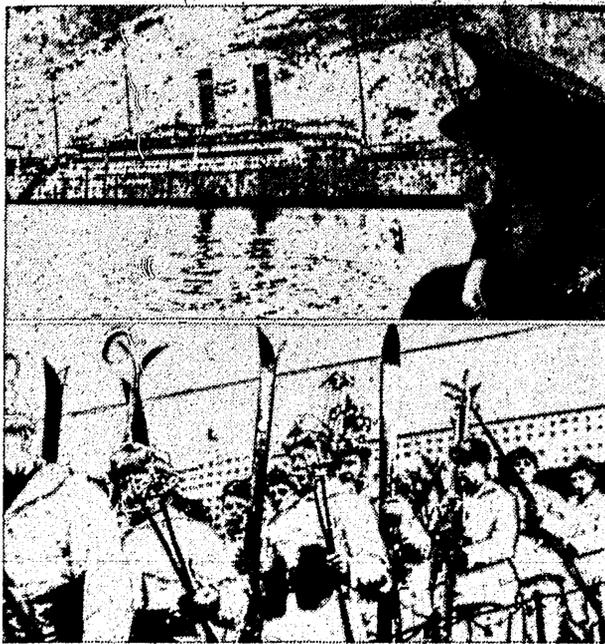

A houseware buyer in New York reports that, although the stocks of pots and pans appears to be adequate for a few weeks, there is already a shortage on delivery of certain items—mainly the 7-inch frying pan.

The spokesman for the Aluminum Company of America estimates that nearly 600,000,000 pounds of aluminum will be produced by that organization in 1941. Defense needs are expected to total some 330,000,000 pounds, which is about what the entire output was in 1939, leaving 270,000,000 pounds for civilian use.

Sometime in March the new Lister, Ala., plant of the Reynolds Metals company—the expansion and development of which has been aided by government money—undertook to manufacture some 40,000,000 pounds additionally. By the spring of 1942, the output will be upped to 80,000,000 pounds. Eighty per cent of this will go to the government at all times.

The Reynolds company also is preparing to construct a second manufacturing plant in the Pacific Northwest, which, by the end of this year, will manufacture another 40,000,000 pounds of the metal.

## U. S. Troops on Duty in Newfoundland

U. S. troops recently sent to Newfoundland on the U. S. transport Edmund B. Alexander, are getting used to winter warfare conditions. At top the transport is shown, docked at St. John's. It serves as headquarters and barracks for the soldiers. Below: Ski troops dressed in white to blend with the snow leave for the training grounds.

## Ambassador

Anthony J. Drexel Biddle Jr., who is ambassador in England to the exiled governments (Holland, Norway, Poland, and others) is pictured at LaGuardia airport in New York city just before taking off on the Yankee Clipper for London, by way of Lisbon.

## To Investigate Defense Contracts

A senate investigation of strikes, bottlenecks, etc., was outlined by Senator Truman (D.) of Missouri, chairman of special committee to probe defense contracts. The committee, is L. to R., (standing) Senator Ball (Illn.), Senator Wallgren (Wash.), Senator Connally (Texas), Senator Mead (N. M.), Senator Brewster (Maine), Senator Truman (seated).

## Arrest Nazi

Dr. M. Zapp, chief Nazi propagandist in the U. S., after arrest in New York by federal agents. He is charged with failure to register properly as foreign agent.

## Pre-views

### Men's Senior A. A. U. Indoor Swim

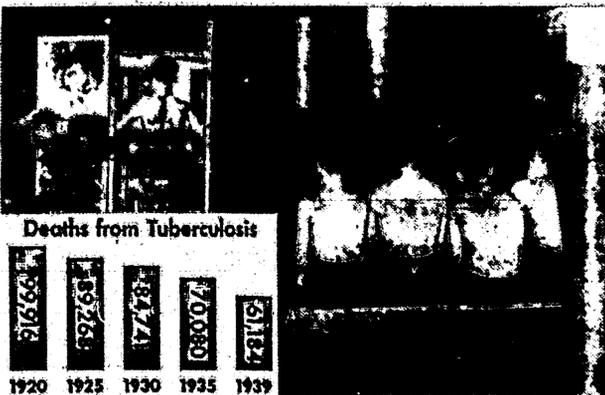

The Men's Senior National A.A.U. championship meet for indoor swimming will be held at Ann Arbor, Mich., on April 4, and continue through Saturday, April 5. The pictures show the present title holders at various events. Each of these champs is expected to defend his title at the Ann Arbor meet.

### Political Science

Annual meeting of the American Academy of Political and Social Science will be held at Philadelphia, April 4-5. The general topic of discussion will be, "The United States and Durable Peace." Above: Ernest M. Patterson, president.

## National Tuberculosis Association Drive

The annual "early diagnosis campaign" of the National Tuberculosis Association and its 1,700 affiliated state, county and city associations starts April 1. slogan, "A good X-ray is your doctor's best aid in discovering early tuberculosis." Chart shows diminishing death rate from this cause; other pictures show high school boys being X-rayed.

## Table Tennis

The National Table Tennis tournament will be held in New York city on April 2 through 5. George Hendy, above, leading U. S. table tennis player for the past three years, is expected to compete.

## Coast Guard to Convoy Migrating Pacific Seal Herds

SEATTLE, WASH.—Ten Coast Guard cutters will soon convoy Pacific seal herds as they migrate from warmer waters off the coast of the United States toward their summer homes near Alaska.

When the seals congregate in numbers off the coast of Oregon and Washington, the patrol will get under way. They will accompany the herd as far north as the Aleutian Islands to protect them against poachers.

A few of the boats will remain to guard the herds during their mating season and the summer until the last seals depart from the rookeries in late autumn.

Coast Guard protection is the result of an international agreement that became effective in 1911. At this time the United States, Great Britain, Russia and Japan reached an agreement to protect the rapidly dwindling seal herds from extinction.

# The Strumpet Sea

By BEN AMES WILLIAMS

SYNOPSIS

George McAusland was 38 years old when he sailed from America to undertake his post as a missionary in the Gilead Islands. A crime he had committed in a fit of excitement had shattered all his confidence in himself. He felt forced to avoid pretty Mary Doncaster, who boarded the ship at Honolulu. She was en route to visit her parents, who were missionaries on Gilead Island. Mary was attracted by George's attempts to avoid her.

CHAPTER I—Continued

"So you're sorry for that poor young man?" John Gale asked.

"Yes," said Mary. He'd be nice if he didn't think he had to be so severe! And when I speak to him, he jumps as though I'd stuck a pin in him. Mrs. Gale says he wants to talk to me and doesn't know how. He'd feel so much better if he just did."

"You think he does want to talk to you?"

"Of course! Why shouldn't he? I'm young, and pretty, and friendly, and nice and he's not nearly as old as he thinks he is. You watch him, sometime, when I'm talking with Joseph Neargood."

They heard a cry forward, and Mary leaped; past the old man to look overboard. George McAusland somehow had fallen off the stage, had toppled into the sea.

"He can't swim!" Mary Doncaster exclaimed. The old minister heard the hiss of torn garments; and, an instant later, she stepped out of her skirts and petticoats, and—slim and white in less encumbering apparel—vaulted easily over the rail into the sea.

The deck was a scurry of activity. John Gale kept his eye fixed on these two dark spots that were heads, in the vast waste of ocean, hidden as they dipped into the trough—between great swells, lifting on the crests again into his view.

CHAPTER II

At the moment when Mary Doncaster leaped overboard, George was almost directly below her. She jumped wide of the vessel's side in order to clear him; and when she came to the surface again, the ship, towering high, was gliding smoothly away across the silent sea. From her deck shouts came back to the girl, and she saw the splash of a grating thrown overboard, and knew help would come quickly.

But in the meantime this helpless George McAusland had sunk, sucked under in the burble at the ship's stern. Mary swam toward the spot where he had disappeared, and saw his floundering arm break the surface. He coughed and gapped and muttered something and she heard the words:

"Into Thy hands . . ."

She felt a hot impatience with him because he did not know how to swim, and because he now surrendered so supinely. She cried: "Don't talk so silly! You're not going to drown! You're all right! I've got you. Lie still."

At her voice behind him, George stiffened rigidly, and a little wave crest lapped across his face and into his open mouth, and he gagged and revolved in the water like a crocodile twisting to tear off the gout of flesh in which its teeth are set. He rolled over facing her and tried to clutch at her. She dove instantly, escaping his grasp, and ruthlessly caught his foot and pulled him under-water. Then she slipped up past him, clear of his hands that were like talons, and from behind him caught his collar again and drew him to the surface.

She was on guard against any sudden movement by George; but he now submitted, rigid as an ear. Yet he was heavy, and his clothes were heavy, and the grating was farther away than she had thought. Before she reached it, she was tired, her heart pounding. The ship now was almost broadside to her. She hoped someone aboard had had the wit to keep an eye on them; and then she saw a man in the rigging, pointing in their direction; and when the next swell lifted them, she saw a boat in the water between them and the ship, the oars glinting in the sun, racing this way like a spider.

She told George: "Hold on to the grating. Don't try to climb on it. Just hold on." His fingers clutched the edge, and she released him and moved away out of his reach.

He said humbly: "I can't swim." She laughed, herself easier now. "I noticed that! You'll learn. Every one swims in the Islands. I could swim before I could walk, I think. The boat's near." His teeth were chattering. "You're not cold," she said. "That's just nerves. Don't worry, we could float like this for days."

She talked more and more swiftly, fighting to hold him up with words; for under her eyes strength visibly flowed out of him. Yet he must hold on a minute more, a minute more . . .

The boat reached them. The mate was in the stern; two sailors at the oars. "Take him first, Mr. Chase," she said quietly. "He's tiring."

They hauled George McAusland over the gunwale, and he collapsed in the bottom of the boat between the oarsmen and the mate. "I'll come in over the bow," she said. The mate swung the boat and she caught the bow and with a deep

kick of her feet thrust herself upward, swinging one leg over the gunwale, clambered in. The mate said: "Here's my coat, Miss Doncaster."

When they came alongside, the rail was lined above them. A sailor gave Mary a hand up, cupping her foot in his palm, and Captain Keen reached down to help her. On deck, Mrs. Gale had a long coat to put around the girl.

Mrs. Gale said: "Run and change, Mary." But the girl stayed a moment to be sure George was all right. They were rigging a whip to hoist him aboard, since he was still too weak from the shock of his immersion to help himself. The mate and the sailors watched him gravely. Mary, understanding that he would not want her to see him thus, went below, leaving him to other hands.

George even when he was safe on deck was barely able to stand. John Gale said to him: "Well, it's lucky for you Miss Doncaster was aboard."

"Yes. I'd have drowned. Where is she?"

"In her cabin, changing."

"I want to thank her."

"Later. The first thing is dry clothes for you, and a noggin of rum."

But the girl stayed a moment to be sure George was all right.

rum. You're blue with cold. Come along."

George followed obediently; but he refused the rum. He shook with a teeth-chattering chill till he had rubbed himself dry and glowing. Then he lay down under blankets to warm himself, and slept till John Gale came to rouse him for supper.

"All right?" the older man asked. "I thought you were probably asleep, needed sleep more than anything."

"Yes, I'm fine. I'll be along."

But he was slow in dressing, dreading the necessity of meeting Mary and of thanking her. When he came out into the main cabin, the others except John Gale and the Captain had finished supper and were already on deck. "Gone to watch the sunset," the old minister explained. "It promised to be fine."

George was relieved at this postponement; but when he and John Gale presently went on deck—the sun was gone, the sky fading to the deep blue of night—he faced his duty. Mary was in the waist with Mrs. Gale. He went toward them, and they saw him coming, and Mrs. Gale asked:

"All right now?"

"Fine," he told her. She said some approving word and went aft, leaving him alone with Mary. He wished to ask Mrs. Gale to stay; turned to face Mary reluctantly. She smiled, understanding, and said quickly:

"It's all right. You needn't thank me."

"I want to," he told her, blurring out the words; and then he spoke the phrase he had decided was most suitable. "I owe you more than I can ever pay."

Mary smiled. "I'm glad you feel so much in debt to me. It will be fun to have you try to pay. Be very nice to me, won't you?" But then she relented, seeing his embarrassment, and said quickly: "It wasn't anything, really. I could have kept you afloat all day."

"I'm sorry you had to . . ." He hesitated. "Well, I mean . . . Well, I know how brave you were, how hard it was to do what you did."

Mary frowned a little, puzzled, and then suddenly understanding. "Oh, you mean because I took off a few petticoats?"

He insisted stubbornly. "I know what it must have meant to you. She touched his hand. "You're sweet; but honestly, I didn't mind. I didn't even think of it. Naturally I couldn't swim in a lot of petticoats." And she said, faintly amused: "You know, Mr. McAusland, you'll have to learn to look at so many things differently on the Islands to learn new ways."

"I hope instead of—learning their ways, I can teach them ours. Do you remember a lot about your childhood down here?"

She looked at him in a quick satis-

faction. "I think that's the first question I ever heard you ask," she declared. "Yes, of course I do. After all, I've only been away eight or nine years."

"You seem glad to come back?"

"Of course! I'm coming back to my home, to my father and mother! This is where I live, really. I just went away to school, you know. I lived with my aunt in New Bedford. Aunt Patty Hanline. Uncle Tom was away all the time; only came home twice. He's mate on the Venturer, Cap'n Corr's whaler."

George echoed: "A whaler?" He said with a strong distaste: "Corkran's told me stories about the whalers, the whaleships. They've ruined these islands."

"Whalers aren't so bad. New Bedford's full of them. The Venturer is a fine ship. I know Cap'n Corr. His sons are mates aboard her. I knew them both in New Bedford. Peter was in the same school with me; and Richard too, for a while, years ago. He went to sea as cabin boy first, and then came home and came to school for two years, and then went fourth mate with his father again." Her eyes were dancing, amused at his expression. "I thought Richard was pretty wonderful, and Peter too, of course. Richard was so shy he hardly looked at me, but I worshiped him. You know how little girls are."

"I'm afraid I don't know much about little girls."

She smiled. "Or big ones, either, do you, Mr. McAusland," she challenged; and then she told him quickly: "But maybe you'll see them. Richard and Peter, I mean. Cap'n Corr promised to put in at Gilead to see my father and mother on this voyage. Mother's Uncle Tom's sister. Maybe we'll find them at Gilead when we get there. I hope so."

He asked in curiously thick tones: "Why? Because you want to see your uncle again?"

"I want to see them all, of course," she said.

He said, after a moment, almost wistfully: "I've never known young men. My brothers were a lot older than I."

"I know," she absented softly. "You haven't known young women either, have you?"

"No."

She said, smiling in the darkness, as though he were a child: "I knew you wanted to be friendly with me, but you didn't quite know how."

"I want to be friendly with everyone!"

"But specially with me, a little, don't you?" she urged. "Only you're sort of afraid?"

"I don't think so!" he protested, half-repentful.

"Oh, but you are," she insisted. "You're afraid to do the things you want to do."

He swung toward her as though startled; but someone spoke behind them.

Suddenly George sneezed. "You'd better go below, hadn't you?" she suggested. "You've taken cold."

He blew his nose. "I'm afraid I have." They went aft together. Mrs. Gale prescribed hot lemonade, but George protested that he was all right, till he sneezed again. Then he consented to go below.

During the days that followed, John Gale was pleased to see that having taken the plunge, George no longer avoided Mary. They were much together, as often forward as on the after deck. Under Corkran's instructions they practiced rope work and listened to his tall tales. Mary led him to talk of whaling; and sometimes Corkran told of bloody battles with Leviathan that made George's pulse pound, and sometimes he made them laugh together in a gleeful incredulity.

They sighted the tip of Gilead's highest peak one day as the sea cut the sun's disk in half. At dawn they were close aboard, or seemed to be, although still ten or twelve miles distant.

Mary was with Captain Keen, and George joined them and asked a question; and Mary said:

"We'll come to a big bay presently, with room for a hundred ships. It runs deep into the Island, over two miles, and there's a small island in the mouth of the bay, so there are really two ways in. The bay narrows all the way to the beach at the inner end. You'll see!" Her eyes were happy with anticipation. "Father and Mother will come out to meet us," she predicted.

"Will they be keeping a lookout?"

"Oh no, but someone will see us." She pointed ahead. "That's the entrance, Cap'n Keen. You can't see it yet, but that rock that looks like a hill with no trees on it is the island in the mouth of the bay."

The Captain asked: "We go in south of it, don't we?"

"Whichever's easiest, according to the wind. There's deep water everywhere, even close in to shore. The best holding ground is about a mile this side of the beach."

Captain Keen nodded. Mary went forward, George with her; and she pointed out to him things familiar to her eyes, which his could not perceive.

"TO BE CONTINUED"

## This Year's Easter Fashions To Be Dainty, Very Feminine

By CHERIE NICHOLAS

ALL signs point to a lovely and colorful array of sweetly feminine fashions for Easter.

Speaking of flowers, milliners everywhere declare that myriads of fluttering little flower hats are selling in unprecedented numbers. The significant message about these adorable little flowery confections is that you may wear them as correctly with your prim little tailor suit as you can with your dressiest dress-up costumes. (Quite a departure from the old idea which exacted a tailored hat with a tailored outfit!)

The thought that is prevalent throughout this season's style program is that one should wear alluringly feminine and flattering accessories. This applies not only to flowery hats and colorful whimsical veils but also to "hankies," which are of the pretty-pretty type.

It is just such flower-bedecked hats as the one shown above (to the left in the illustration) that are lending "endearing young charms" to the Easter fashion picture this spring. Note the dainty handkerchief, designed by Burmel, which so artfully plays up a dainty petal-point garland encircling an embroidered full blown rose. You can get these "hankies" with violets or daisies or whatever flower you may choose. The other flower chapeau is typically an Easter bonnet. It is a shiny straw in bon bon pink, trimmed with cherry blossoms, full-blown roses and wide green ribbons. The veil matches the straw.

(Released by Western Newspaper Union.)

ley will vie with orchids, gardenias, flaming hibiscus and camelias. Silvered and gilded leaves are a new and distinctive Easter fashion with appeal to those seeking the out-of-the-ordinary.

Fresh flowers add chic to these attractive Easter outfits. Beaux please take notice! The lady of your heart will be queen of the Easter parade if you send a corsage of fresh white freesias to match the bouquet on her hat (note the model in the center of the picture).

If she is sophisticated, any beau may win her heart with a modernistic corsage of fresh gardenias. If you're away she will appreciate your wiring her local florist to include an extra gardenia or two to tie on her wrist bracelet fashion as illustrated to the right.

The newest idea of American designers is that fragrant flowers should match the motif of gay print dresses with which they are worn. This Easter, romantic arrangements of roses, violets and lilacs-of-the-val-

### Fruit Buttons

Look to fashions for a new yield of vitamins Fruit has become an outstanding inspiration for design in the apparel field. Many of the smartest new prints are patterned with colorful fruit motifs: hats are trimmed with realistic looking fruit; lapel gadgets are replicas of fruit, and buttons that fasten our dresses and blouses, coats and jackets, are copies of fruits. The beige wool sport jacket here pictured is "vitaminized" with fruit buttons, new this spring! A miniature dish of polished wood gives the button form. There's good news for tired clothes at your nearest button counter!

These novelty buttons are durable, as well as attractive. Vieing for honors with the fruits are vegetables—carrots, onions, lettuce, etc.

### Fads and Fancies

Young moderns are all enthusiastic over fringed play shoes that take their cue from Western cowboy fashions.

The inverted pompadour is a "last word" hair-do that is exciting much interest. The hair is brought down over the forehead, the ends turned under, which, when deftly done, gives every appearance of bangs. Not only is this ever so flattering, but it is very practical, for it stays neatly "put," with minimum care.

Something new for the bridal gown—white Nylon velvet, said to be very charming to the eye, and highly satisfactory in that it drapes beautifully and yields pleasingly to fabric manipulation.

Very new for spring are navy coats or capes that have small shapely collars of white caracul, broadtail or similar fabriclike fur. Other models in navy have simply a cluster of white ermine tails at the throat. White hat and accessories worn with these coats and capes key to the white of the fur.

To wear with your spring and summer print dresses, look up bead or flower necklaces, bracelets and clips that pick up one or more colors of the print.

### 1941 Jeweled Gadgets

Romantic, Whimsical

You must wear a jeweled "gadget" of some sort on your lapel. It may be as romantic and sentimental as your mood dictates, or it may be humorous and delightfully whimsical. In every event, however, it will be a masterpiece of good workmanship, for even the novelty types are exquisitely wrought. One of the amusing sort that is extremely provocative is a huge question mark all set in brilliant, with a dazzling solitaire rhinestone suspended from the base.

You might wear a glittering gold fish, a spray of colorful flowers worked out in elaborately set stones or a bright patriotic emblem.

## These Cuddle Toys Will Delight Kiddies

Pattern No. Z9034.

ALL padded, and preened are Hattie, the hen, and her proud rooster hubby. They've plain-colored wings, tail feathers and combs—and not one ruffled feather on their 13-inch print-material bodies.

**Jessye Collins  
 Presented in Recital**

Miss Jessye Collins, daughter of Rev. and Mrs. J. S. Collins, was presented by Chester Crill in a voice certificate recital last Friday evening in Bethany, Oklahoma, according to an announcement made early this week by Miss Lois Stockett, Bethany Peniel college news release agent. Miss Collins, a senior in Bethany Peniel college, has been an outstanding student throughout the four years she has been there.

For her recital Miss Collins wore a frock with black lace bodice with a sweetheart neckline, short puffed sleeves, and a double skirt of white tulle. She wore a shoulder corsage of white gardenias. The stage was decorated with floor baskets of peach gladioli.

Her program included the following numbers: "I Know That My Redeemer Liveth" Handel, "Ave Maria", Franz Schubert, "Lovely Flowers" from Faust by Gounod, "Indian Flute Song", Grunn, "La Paloma", S. Yradiier, "Cuckoo Clock", Anthony Paganuccio, "The Heart of Her" "At Dawning," and "My Lovely Rose" all by Cadman.

Miss Collins is now traveling through Oklahoma, Texas, Kansas, and Missouri with the Acapella choir of the college. Late in May she will make another trip with the choir through Arkansas and Louisiana. She will receive her Bachelor of Fine Arts degree May 28.

The purchase of recreational equipment was described by Red Cross officials as part of its widening program of adding the armed forces to morale maintenance. Adequate federal funds will be available July 1 for the purchase of additional equipment, the Red Cross was told. The girls also will be given credit for making exhibits and participating in public demonstrations of their handiwork, as well as judging that of others. The program thereby affords clubsters, in addition to the chance to win county, state and national awards provided by the Spool Cotton Company, the opportunity to earn money through sales and displays of their work.

County winners will receive gold medals and each recipient of state honors will be given an all-expense trip to the National 4-H Congress in Chicago next November, to participate in the finals. Six educational scholarships of \$200 each will be presented to a blue award group comprising one winner from each extension section and two at large.
