Lyric Theatre
R. A. Walker, Mgr.

FRIDAY & SATURDAY
Jackie Cooper, Gene Reynolds, Bonita Granville, Gail Patrick,
— In —
"GALLANT SONS"
A dramatic story of the teen age in which more than 100 youngsters appear in the school sequences and rally to prove the father of one of them innocent.

— ALSO —
"Wedding Bills" and "Happiest Man on Earth"

SUNDAY, MONDAY & TUESDAY
Clark Gable, Heddy Lamarr, Felix Bressart,
— In —
"COMRADE X"
A comedy in which all comrades are not on the up-and-up. Everything is built for laughs and wild, hilarious action.

— ALSO —
March of Time. Third Dimensional Murder, News.

WEDNESDAY & THURSDAY
Dick Powell, Ellen Drew,
— In —
"CHRISTMAS IN JULY"
A clerk who becomes a forceful personality when practical jokers tell him he has won a huge slogan contest prize.

Lincoln National Forest Notes

A match, a cigarette or cigar butt tossed from a car window; a campfire left burning; the pipe heel knocked out against a tree; or any small flames or ember left unattended may start a forest fire because even after a rain, a forest is inflammable and can burn if started. So— Be careful with fire in forests or you will leave desolation instead of green trees, wild flowers and creatures that are your friends and companions. Only one visitor in 5000 sets a forest fire—the other 4,999 are welcome in the forests.

Local and Personal

Mrs. Henry Hoffman and Mrs. Jimmie Duncan honored Mrs. Robert Hemphill with a shower and party last Saturday afternoon. The honoree received many lovely gifts. Refreshments were delicious, congealed salad, wafers and ice tea.

Misses Louise and Agnes Degner were hostesses at a bridal shower given for Mrs. J. R. McPherson the former Miss LaWana Conley. A large number of guests attended the shower Saturday evening May 31, at the Community Center. Mrs. McPherson received many beautiful gifts. Bridge was played after which delicious refreshments of ice cream and cake were served by the hostesses.

Messrs. Pat Murphy and Jimmy Lucero of Carrizozo are driving new Chevrolet's bought at the City Garage.

Mr. and Mrs. Albert Kimbrell, and Mrs. Anna Michell of Picacho, visited last Saturday at the home of Mr. and Mrs. Manuel Ortiz.

Sergeant Ramon St. John of Tokay was here on business this week.

Mr. Joe Chavez returned Sunday from Tucumcari, where he spent a two weeks' vacation.

The first aid extended to Agricultural colleges by the Federal government was through grants of land to the states under an act known as the "Morrill Bill." The allowance made was 30,000 acres of land to the state for each member of Congress it was entitled to under the Federal Apportionment act at the time it was admitted to the Union.

HOT LUNCHES IN THE LINCOLN COUNTY RURAL SCHOOLS

In the Lincoln County Rural Schools at Ancho, San Patricio, Ruidoso, Lincoln, Picacho, and Stetson a total of 535 children have received a free, hot noon meal each day this year. This is 61 percent of all children enrolled in the rural schools, and 25 percent of all county schools.

Through the Department of Public Welfare surplus commodities are obtained. Through the W. P. A. we obtain labor. Through this labor, meals are prepared and served. Menus are carefully prepared by dieticians in the W. P. A. in order to give the children well balanced food.

The Lincoln County Board of Education equips the school kitchens with furniture and furnishes water, fuel and lights.

The local sponsor is responsible for food which supplements commodities, and must furnish dishes and cooking utensils. This local sponsor is the P. T. A., Lions Club, or a Hot Lunch Committee which is an organization of school patrons. Teachers have gladly co-operated toward baking these lunches a success.

Before hot meals were served the children, many of them came to school with no lunch because there was no food at home with which to prepare it. Busses in rural districts must leave early in order to make the long route by 8:30 or 9:00 o'clock, and many times the mother did not get to the task of fixing lunches before the bus arrived.

As a result of hot lunches, we are glad to report that the children are in better condition physically. The quality of class work is better because the children are healthier and happier. The social attitude is much improved. During the meal with classmates pupils may relax from the tension of work, learn to meet other pupils easily, and behave in a socially acceptable manner. In some schools hosts and hostesses for each table are selected for the day or week. They are responsible for the general atmosphere of courtesy and good order. We have found this a very successful plan for teaching good table manners.

Average daily attendance in these schools has increased ten per cent. In schools where hot lunches were served last year, the average increase in weight is greater than in those schools not having hot meals until this school year. The average increase in weight for the year is nine pounds per child. Comprehensive achievement test results throughout the county this year average two marks higher than last year. This we partly attribute to the better physical condition of the children, which naturally results in a more desirable mental reaction.

Next fall hot lunches will be served through the help of the Department of Public Welfare and the W. P. A. to an additional 175 pupils in the Lon, Arabela, Tinnie, Elowater, Jicarilla, and Rabenton schools. That will mean that 81 percent of all boys and girls in the county schools will have free, hot lunches served by W. P. A. labor.

In addition to this, where W. P. A. labor is not available, hot meals will be served in several of the one room schools by the teacher with the help of the older pupils.

Since the success of the entire school program depends on the health and happiness of the pupils, we feel that the school lunch is one of the vital functions of our educational system. The entire personnel of the Lincoln County Rural Schools is anxious to take advantage of W. P. A. labor and the surplus foods now available, and is striving toward a 100 percent hot lunch program in the county for the next school year.

Mrs. Ola C. Jones, County School Supt.
Mrs. Gayle S. Swearingen, County School Supervisor

Memorial Day

In the well kept cemetery of Old White Oaks among the shadows of the great gold mines that formed the nucleus around which early life in Lincoln county received its stimulating support and the location of the grave of New Mexico's first Governor, a most appropriate Memorial Day program was held Friday, May 30th. M. L. Jackson, a noted and untiring community worker with the faithful cooperation of the White Oaks Ladies Aid, and civic minded individuals of this historic locality arranged a most impressive program in memory of those whose every simple shrine represents some valuable contribution toward the great progress we have made as liberty loving Americans.

America today! Great, indeed, in every human requirement, was not handed to us on a silver platter: on the contrary, those who have gone before are the originators of the Great Land whose light of hope reflects in the eyes of millions of war ridden people everywhere. To these, the people of White Oaks have annually paid their highest tribute.

Contributions of the American Legion, were American Flags and green wreaths, made by the Legion Auxiliary, and placed on each Veteran's grave. Representing the Legion were Dan Conley and Clyde Brewster who blew taps at the close of Ceremony.

NOTICE FOR LUMBER AND STEEL BIDS

The Lincoln County Board of Education is asking for sealed bids on Lumber and Steel for the Ruidoso Gymnasium, bids to reach this office by June 14, 1941.

Prices must be f. o. b. the Ruidoso Gymnasium. Below is a list of required lumber.

Pieces, Size, Length and Description as follows:

- 6M 1x6 S-1S-1E No. 2 Pine or Fir. Native Sub Floor
- 50 2x12 10 Rgh. Native Pine or Fir. Joint over Bas.
- 312 2x8 10 Rgh. Native Pine or Fir. Fl. Joint & Girders.
- 220 2x10 16 Rgh. Native Pine or Fir. Roof Joint
- 110 2x10 12 Rgh. Native Pine or Fir. Roof Joint
- 250 2x6 16 Rgh. Native Pine or Fir. Ceiling Joint
- 96 2x6 12 Rgh. Native Pine or Fir. Ceiling Joint
- 16 2x8 18 Rgh. Native Pine or Fir. Wood Truss
- 10 2x6 16 Rgh. Fir. Wood Truss
- 20 2x4 18 No. 1 Fir. Bucks
- 2M 1x4 Rgh. Pine or Fir. Bridging
- 2 1/2M 1x3 S4S No. 2 Pine or Fir. Stripping
- 7300 Ft. No. 2 Red Oak Fig. 7800 Ft.
- 58 10 inch x 32 inch Celotex Concealed Nailed
- 2M Nails 8 - 10 - 12 - 16 D. Com. as ordered.
- 4 steel trusses, approximately 64 feet long.
- 1 I Beam 16 inches x 26 feet 0 inches.

Steel Sash specifications: All steel sash shall be horizontal pivoted type as mfg. by Ariston Steel Products or equal in size, quantity, and with hardware as listed below:

No. Required, Gl. Sizes and Hardware as follows:

- 10 53161 12x18 Spring catch
- No. 20 - 5
- 10 53161 12x18 Chain Roller
- No. 7 - 1
- 10 53161 12x18 Chain Cleat
- No. 6 - 2
- 4 52160 12x18 Stay Bar No. 32 - 3
- 4 52160 12x18 Hook Bracket No. 6 - 4
- 2 53161 12x18 Spring Catch No. 20 - 6
- 2 53161 12x18 Chain Roller No. 7 - 1
- 2 53161 12x18 Chain Cleat No. 6 - 2

Bolts and anchors as follows:

- 10 5-8 inch x 1 foot 0 inches.
- 100 1-2 inch x 0 feet 3 inches.
- 48 3-8 inch x 0 feet 10 inches.
- 60 1-2 inch x 0 feet 8 inches.
- 220 1-2 inch Cut Washers.
- 48 3-8 inch Cut Washers.
- 350 Bull Dog Floor Clips.
- 75 Sqs. 29 gage galvanized roofing.
- 210 lineal ft. box gutter, 28 gage iron.
- 105 lineal ft. conductor pipe 4 x 6.
- 200 lineal ft. 7/8" counter flashing.

The County Board of Education reserves the right to reject any or all bids.

STATE SOIL CONSERVATION COMMITTEE OF NEW MEXICO NOTICE OF REFERENDUM ON CREATION OF PROPOSED CLAUNCH-PINTO SOIL CONSERVATION DISTRICT

EMBACING LANDS LYING IN THE COUNTIES OF TORRANCE, SOCORRO AND LINCOLN IN THE STATE OF NEW MEXICO

To all owners of land lying within the proposed Claunch-Pinto Soil Conservation District, comprising the territory described as follows:

LEGAL DESCRIPTION OF THE CLAUNCH-PINTO SOIL CONSERVATION DISTRICT

Beginning at the quarter section corner of the north boundary of Sec. 5 T1S, R13E; thence south 1 1/2 miles to the quarter section corner of Sec. 8 T1S, R13E; thence in a southerly and southeasterly direction along U. S. Highway 54; to a point near the quarter corner on the south boundary of section 23, T2S, R12E; thence west about 10 1/2 miles, south 2 miles, west 5 miles to the northwest corner of sec. 6 T3S, R10E; thence south, 6 miles along the Lincoln-Socorro county line, west 7 miles, to the northwest corner of T4S, R9E, thence south 3 miles, west 4 miles, south 1 mile, west about 8 1/3 miles to the southwest corner of Sec. 19 T4S, R7E, thence along the west boundary of the Cibola National Forest, north 7 miles, west 2 miles, north 1 mile, west 1 mile, north 2 miles, west 6 miles, north 6 miles, east 2 miles, north 3 miles, west 1 mile, north 3 miles, to the south boundary of Torrance county in R5E, thence east about 10 1/2 miles to the SE corner of Sec. 32, T1N, R8E, thence north, 2 miles, west 1 mile, north 2 miles, west 1 mile, north 2 miles, to the southeast corner of T2N, R7E, thence west 6 miles, north 6 miles, east 6 miles, north 3 miles, east 8 miles to the NE corner of Sec. 20 T3N, R9E; thence along the west boundary of the Lincoln National Forest, south 2 miles, east 1 mile, south 2 miles, east 1 mile, south 1 mile, east 1 mile, south 1 mile, west 1 mile, south 6 miles, east 3 1/2 miles, south 1 mile, west 1 1/2 miles, south 1 mile, east 1 mile, south 1 mile, to the SE corner of Sec. 31, T1N, R10E; thence east about 19 1/2 miles to the point of beginning. The district is to exclude the following lands belonging to J. H. Armstrong, S. A. Corley, J. A. Easley, H. A. Bush, John Morrow, A. C. James, J. M. Bond, John Montgomery, Roy Montgomery, Mack Wells, Grady Wells, Jim Wells, Kenneth Galloway, Fred Rippey, John T. Maple, Bear Talley, Matt Talley, Jim Talley, Jack Beal, J. D. Draper, D. Martin, Ross Johnson, T. A. Corley, Jim Montgomery, Red Talley, The Schooner, L. H. Claunch, Estarlasa Beho, Mr. Etheridge, Mr. Bennett, all of Claunch, New Mexico. All properties within the exterior boundaries of this soil conservation district of a residential, business, or non-agricultural nature are hereby excluded, omitted, and specifically excepted from this soil conservation district.

Notice is hereby given that on the 25th day of June, 1941, between the hours of 8:00 a. m. and 5:00 p. m., a referendum will be held in the said territory upon the proposition of the creation of the Claunch-Pinto Soil Conservation District as a governmental subdivision and a public body, corporate and politic, under the provisions of the Soil Conservation Districts Law of this State.

All persons, firms, and corporations who shall hold title to, or shall be in possession of, any lands lying within the said territory as owners, are eligible to vote. Only such persons, firms and corporations are eligible to vote.

Polling places for the referendum are as follows:

- Center Point, Torrance County, New Mexico.
- Claunch, Socorro County, New Mexico.
- Corona High School Gymnasium, Lincoln County, New Mexico.

Eligible voters residing within the proposed district shall cast their ballots at the polling place for the division wherein they reside. Eligible voters not residing within the proposed district shall cast their ballots at the polling place for the division which includes their land, or the greater part thereof. Eligible voters who will be absent from their division on the day of the referendum may apply in person or in writing to Fred Shumate, Polling Superintendent, at Claunch, New Mexico, for absentee ballots. Each applicant for an absentee ballot shall take his name, residence, location and acreage of land owned or possessed, and interest therein.

STATE SOIL CONSERVATION COMMITTEE
E. F. Redding,
Administrative Officer.
Dated this 23rd day of May, 1941.

Second Publication Friday, June 20.

Miss Wilma Snow is attending summer school at State College.

Charles Snow who has been to Las Cruces to complete his flying hours, will be home today.

Magdalena Boy Graduates

William Oscar Bamberger, son of Mr. and Mrs. O. W. Bamberger formerly of Carrizozo and now of Magdalena, graduated from N. M. M. I. on Tuesday, June 3, 1941.

Bamberger has been enrolled in the Junior College of N. M. M. I. for two years and has done well. He was admitted upon certificate from the Carrizozo, New Mexico High School.

Young Bamberger is a Corporal and is completing the Basic Course in the Senior Cavalry Unit of the R. O. T. C. His athletic participation has been in intramural tennis and basketball and in softball.

Bamberger was among the one hundred and forty graduates who received diplomas from Governor John E. Miles. Twenty-two states, Canal Zone, Hawaii, and Mexico are represented in the Class of 1941. Thirty-seven young men from New Mexico were members of the graduating class.

There were one hundred forty boys from New Mexico enrolled at N. M. M. I. at Roswell this year.

American Legion Convention

The annual convention of the American Legion will open in Ruidoso, Lincoln County's famed mountain resort, on the 19th day of June and will close Saturday, June 21st.

Glued Wood Arches Span River

The first bridge ever built in the United States using glued laminated arches for supports now spans a river at Madison, Wis., the home of the U. S. Forest Products Laboratory. The construction of the bridge has been made possible by the development of glues which afford highly water-resistant joints. The bridge, which is for pedestrians, was built by the city, is entirely of wood, and was selected in competition with various materials and other forms of construction.

Two arches, 73 ft. 6 in. long and only 8 in. wide, were used to span the river. They look like solid timber arches but are really built from boards or strips glued together. After the arches were in place, a walk was nailed to them a railing was added, and the bridge was complete.

This glued arch construction which may revolutionize bridge building was pioneered in the United States by the Forest Products Laboratory and was first used in this country in the construction of a large service building on the Laboratory grounds a few years ago. Since then factory fabricated arches, of widely varied sizes and designs have been used in hundreds of buildings throughout the United States.

KNOW YOUR BANK

What Part Are Banks Taking In National Defense

Bank credit is termed the "life blood of commerce." It is fast revealing itself as also the life blood of defense. Fortunately, American Banking is organized on a highly efficient basis and crisis found it ready and waiting to serve. Ample funds are available and from the start banking has been able to meet the credit needs of defense. We welcome opportunities to serve and will consider all loan applications promptly.

"Box-hauling", or sailing backward, accounted for the defeat of the British frigate "Cyane" by "Old Ironsides." Hidden by the smoke of battle, the U. S. S. Constitution actually sailed back to shatter the stern of the surprised Britisher with a devastating broadside.

Buy U. S. Defense Bonds.

Making Our 'Flying Fortress'

One of the large cogs in the U. S. defense machinery is the Glenn L. Martin aircraft factory in Baltimore, Md., where the B-26, Uncle Sam's super "flying fortress," is being turned out in quantity lots. This is one of the most powerful airplanes in the world. These photos take you inside the workshops of Vulcan.

Wearing heavy metal shoes, a fireproof suit and a helmet that looks like a diver's, a worker pours molten metal.

This worker is using a bandsaw to trim a compound contour formed on a Martin drop hammer. The piece will go on a bomber.

There are two miles of wiring in the B-26. At the left we see a cross section of the tail section with equipment and gadgets being installed. Right: Like a modern Jonah emerging from a flying whale, this workman is coming from the tail of the B-26.

Mass production—1941! A line of noses moves toward the final stage of assemblage.

The first step after one of the giant B-26's leaves the assembly line is to give it a thorough ground test. This flying fortress, destined for the U. S. army, is pictured undergoing such a test.

Below: Glenn L. Martin, with models of two famous Martin bombers of other days. On the table is the Martin bomber of the first World War.

A new type mid-wing monoplane Martin bomber. Construction is all-metal monocoque. The landing gear is a retractable tricycle type.

St. Lawrence Seaway Plan Would Open Great Lakes Ports to Ocean Shipping

NEW YORK.—More than 70 per cent of the world's merchant shipping will be able to enter Great Lakes ports if the St. Lawrence seaway project is approved by congress. Only 67 miles of canals are needed to open a 2,350-mile waterway into the heart of North America.

Vessels with a draft of less than 14 feet are now able to enter the lakes, but their small size has greatly limited their cargo carrying capacity. Proponents of the project assert that it would prove a valuable aid in national defense.

The St. Lawrence seaway was approved on March 21 by a joint board of engineers and diplomats representing Canada and the United States. Congress is expected to accept or reject their agreement in the near future.

Test Borings Made.

Since November, 1940, United States army engineers have been working in the International Rapids section of the river, making surveys and test borings and drawing up plans. Construction work can begin soon after congress and the Canadian parliament approve the agreement.

The job to be done immediately will cost \$266,170,000. It consists of damming the St. Lawrence at the foot of the International Rapids, where the river drops nearly 90 feet in 40 miles. A control dam would be built some 40 miles up the river to regulate the level of Lake Ontario and provide an even flow of water into the deep pool created by the main dam near Massena, N. Y.

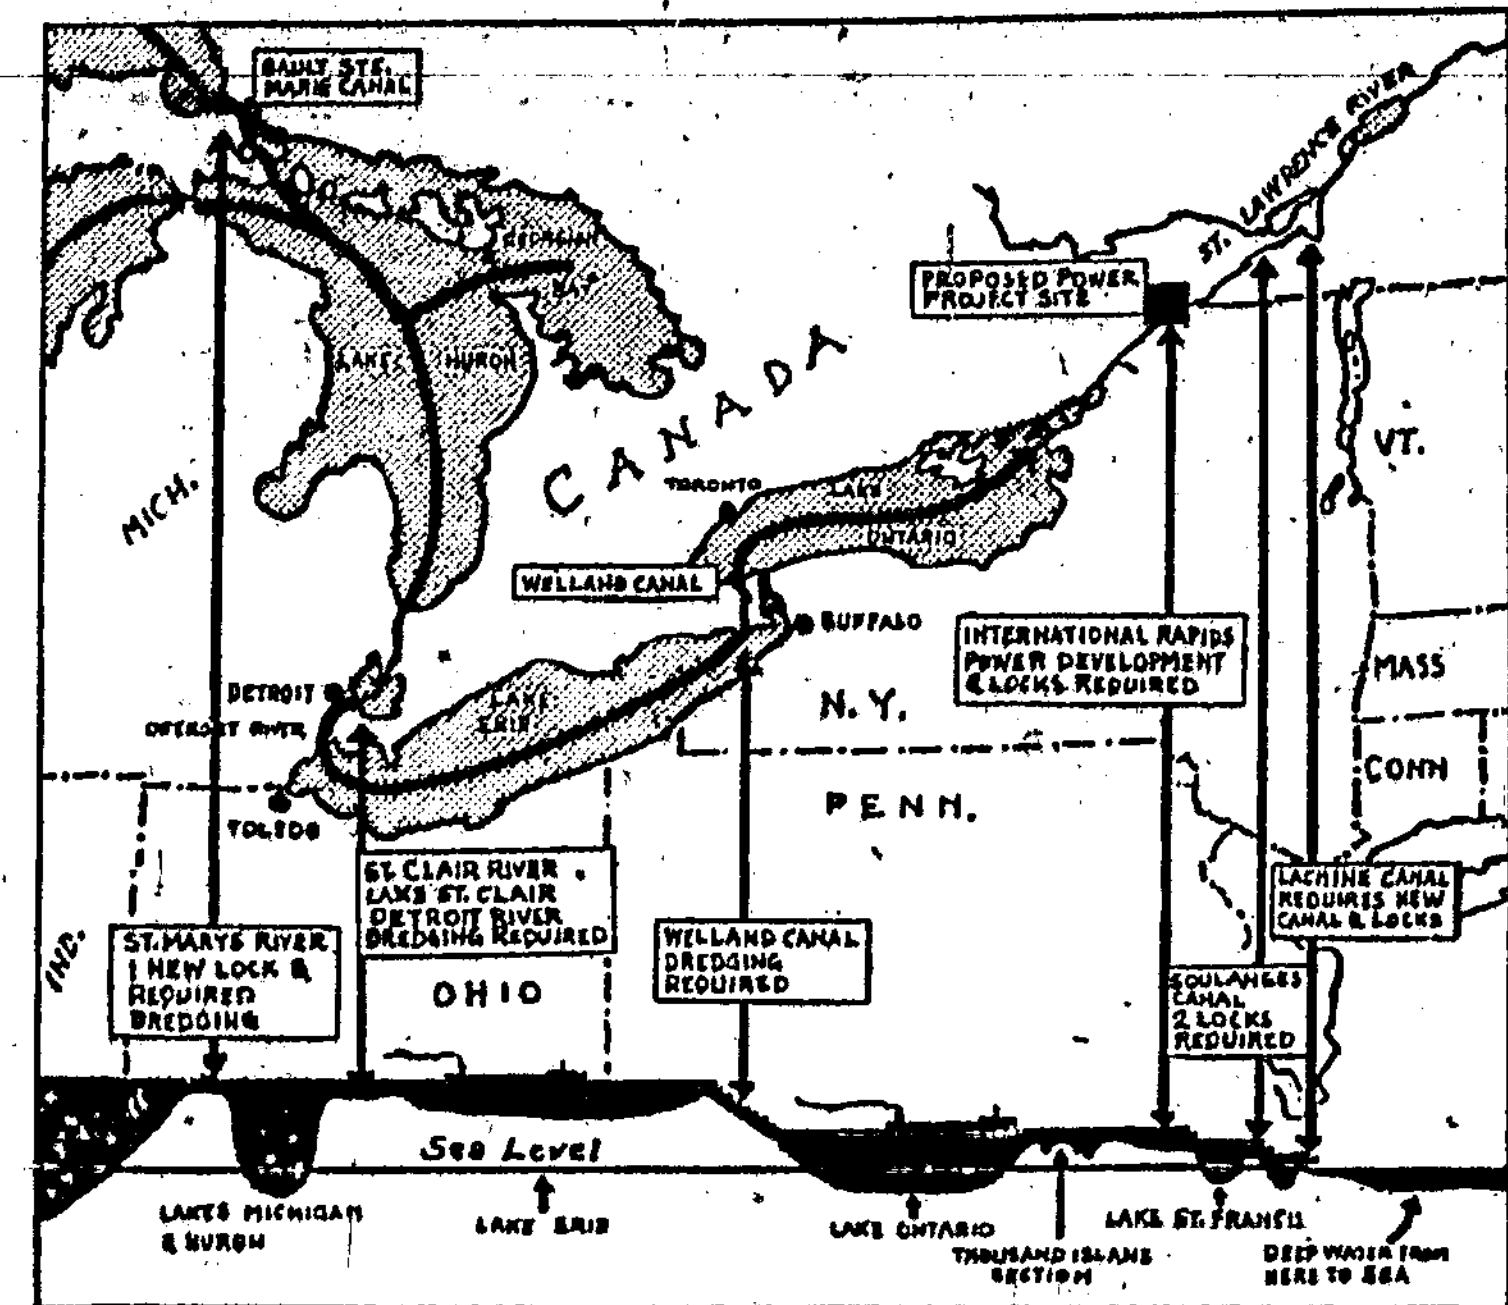

A canal with a minimum depth of 27 feet, equipped with locks, would be built on the American side. Powerhouses would be built under the main dam, and would produce approximately 2,200,000 horsepower, making the St. Lawrence hydro-electric development the largest in North America with the exception of Grand Coulee in the state of Washington.

Completion of this project, which will take about four years, will remove the last important obstacle to deep water traffic from Great Lakes ports to the Atlantic. With a few other minor channel improvements and canal enlargements a seaway extending 2,350 miles into the heart of the continent, from the Atlantic to Duluth, Minn., and which will accommodate any vessels of 25-foot draft or less, will be completed.

Save Freight Charges.

A recent survey by the department of commerce indicates that approximately 70 per cent of the world's freight vessels would be able to use the seaway, and that it will save \$50,000,000 a year in freight charges to shippers of the Middle West.

The International Rapids section of the St. Lawrence is the largest undeveloped source of waterpower remaining in North America. It has the further advantage of being located near the heart of the United States' biggest manufacturing cen-

Great Lakes ports would be made available to seagoing ships in four or five years if the St. Lawrence seaway is approved by congress. The map above graphically illustrates the work required to complete the project.

where factories already are importing power from Canada, and where residential consumers' rates are among the highest in the nation.

The project itself is not a new one. Ever since 1895 Canada and the United States have worked together at the job of making the Great Lakes, their connecting channels, and their outlet, the St. Lawrence, economic assets to the continent. Canada completed the biggest link in 1932 with the opening of the Welland canal, enabling freight vessels to by-pass Niagara Falls, which was the chief navigation obstacle up to that time.

Small Canadian canals on the St. Lawrence now carry freight direct from the Great Lakes to the sea, but their minimum depth of 14 feet limits traffic to small vessels. Nevertheless these shallow canals have been operated at capacity for several years, carrying some 9,000,000 tons of freight last year. The new seaway will be limited in capacity only by its canal and locks system, but it is estimated that it will carry at least 25,000,000 tons of cargoes annually.

Roosevelt Supports Project.

President Roosevelt has urged the immediate construction of the St. Lawrence development as a necessity for continental defense. Shipyards in the protected waters of the Great Lakes could produce a large percentage of the warships needed for the two-ocean navy, and cargo-carriers of every type. Lakes shipyards have the further advantage of being nearer to the source of steel and other materials, it is pointed out.

The national need for more electric power already has brought about an increase of production at Boulder dam, Bonneville, TVA, Grand Coulee, and other big hydro-electric plants. The President recently pointed out that St. Lawrence power is badly needed particularly to produce more aluminum.

Even though the St. Lawrence development would not be completed

for four years, it is pointed out in Washington, it still would be in operation before many of the other defense projects are finished.

Another defense factor recently advanced is that the seaway will provide a protected supply line for the new defenses which the United States is building on Newfoundland, which guards the mouth of the St. Lawrence. Newfoundland is an island approximately as large as the state of Pennsylvania. The St. Lawrence disgorges the waters of the St. Lawrence into the Atlantic through two channels, one on either side of Newfoundland.

Newfoundland is accessible only by water or air. For several centuries military tacticians of every nation have regarded the St. Lawrence valley as the logical "invasion route" into North America. Strong bases at Newfoundland, supplied from the interior by a protected water route, military men say, will block any possible invasion of North America's "vulnerable waist line."

In peacetime, proponents of the project point out, the seaway will give mid-western agriculture and industry the benefit of water-haul freight rates to any port in the world.

(Released by Western Newspaper Union.)

'Voting Is Patriotic,' NCTC Leader Says

Ballots Help Nation More Than Knitting Needles, Women Advised.

CHICAGO.—The American woman's right to vote, gained two years after the close of World War I, now for the first time provides her with an opportunity to be more than a "back-seat driver" during a period of national peril, Mrs. Melville Mucklestone, president of the National Consumers Tax commission, declares.

In a message to the 2,500 units of her organization in 43 states, the former national president of the American Legion Auxiliary, said that "if we women seize our opportunity, we shall find the ballot a far more effective tool to use in patriotic service than the knitting needle ever was."

"A crying need in the U. S. is thoroughgoing improvement of state and local governments," Mrs. Mucklestone said. "By cutting costs and lowering local taxes, such improvements would make it far easier for the taxpayer to bear the national defense burden."

Declaring that "this is an important job which the men, in the main, have left undone," she urged "organized women" to adopt a 10-point program for civic betterment and then to "put the program through." This is possible, she said, because since the adoption of the Nineteenth Amendment on August 26, 1920, women have had the franchise.

The 10 points proposed are as follows:

- (1) adoption of a budget plan, (2) preparation of an understandable annual report, (3) reduction of debt, (4) adoption of centralized purchasing, (5) adoption of the merit system, (6) preparation and adoption of a long-term plan; for counties—(7) centralization of authority, (8) consolidation of small counties; for states—(9) elimination of state trade tax barriers, (10) reorganization of state administrative machinery.

"Adoption of any of these 10 points would result in greater governmental efficiency, and therefore in lower tax levies. Yet not one would curtail any essential governmental service," Mrs. Mucklestone added.

"Moreover, not one of the suggestions is experimental—all have been tried, tested and found successful."

"In August American women will celebrate the twenty-first anniversary of the passage of the Nineteenth Amendment. By pressing such a program as this in local governments, they will demonstrate that they have 'come of age' politically."

Piano an Accomplishment You Can Teach Yourself

Short-Cut Way to Learn Music

A HAPPY accomplishment to play the piano, to entertain with the latest hits. As for that special man, his favorite tune lures him like a magnet! Learning to play isn't hard. You read music quickly with the aid of a chart which shows life-size the main part of the keyboard.

Templed to learn how? Do Our 24-page instruction book, with life-size keyboard chart, explains elements of music, time, chord building. Has three favorite pieces for practice. Send for your copy today.

Getting Ready

Prepare yourself for the world, as athletes used to do for their exercises; all your mind and your manners, to give them the necessary suppleness and flexibility; strength alone will not do.—Chesterfield.

Noble to Forgive
"It's more noble to forgive, and more manly to despise, than to revenge an injury. — Benjamin Franklin.

Swaying Mind
When the mind is in a state of uncertainty, the smallest impulse directs it to either side.—Terence.

SOUND BUSINESS

Army Survey Reveals Appropriate Gifts for Soldiers
CHICAGO.—To answer many requests for suggestions of appropriate gifts to send soldiers in the expanding army of the United States, the Headquarters Sixth Corps area in Chicago has conducted a survey among chaplains, morale officers and enlisted men.

From a soldier's point of view, it was agreed that any gifts for his personal comfort and enjoyment were acceptable. It was suggested, however, that gifts be small and easily portable. Heavy and bulky gifts are not desirable because the soldier might find it inconvenient or even impossible to take them with him if he is transferred to a different camp. "Desirable" gifts cover a large range of articles from subscriptions to home newspapers and personal apparel.

All gifts should be well-marked and properly addressed, giving the rank of the receiver, as well as the camp, company and post office.

The Strumpet Sea

By BEN AMES WILLIAMS

CHAPTER XI—Continued

Richard's boat was near the dead whale, moving to and fro, Richard standing high in the bow and pointing this way and that to guide Pip at the steering bar; and Mary could see now and then a man lean over-side and pick something up out of the water with both hands. Mary looked around for information. Peter was aft; but Isaiah was here with them; his elbows on the rail, quinting at the boats yonder. Mary asked him what they were doing.

"Mat's cutting a hole in the small so's he can tow her in."

"I mean, what's Richard picking up?"

"Oh, might be grease," he suggested. "You see it sometimes, where a whale's costume."

Mary, looking down into Richard's boat, saw that it was half full of some strange stuff, noisome in appearance, a mass of gouts and chunks and fragments deep gray in color, from which an unpleasant odor rose. The stuff was piled around the feet of the men, the whole whaleboat matted with it. Peter came here beside them; and he called down to his brother:

"What's all that gurry, Dick?"

Richard looked up at them with calm eyes; but then his own excitement made him grin like a proud, triumphant boy. He threw up his hand. "Greasy luck today, Peter. It's ambergrie!" he cried.

Mary remembered vaguely having heard someone at some time speak of "ambergrie." She had an obscure impression that it was valuable, and she decided now with an amused grimace that it must be, or Richard would not have brought this boatload of ill-smelling stuff back to the Ventura. He leaped to the deck beside them, dripping with his exertions, and drunk with the hot taste of victory; and as the men swung the whaleboat aboard he spoke to Peter.

"What's ambergrie good for, Richard? It smells awful."

Richard chuckled reassuringly. "It'll get over that as soon as it dries out. They use it to make perfume!"

"Where does ambergrie come from?"

"I guess nobody knows just what it is. A whale gets rid of it while he's dying, just the way a trout will clean out its stomach on the hook. You'll see chunks of squid half as big as a man floating around a whale after he's fin out and sometimes you find ambergrie the same way."

Mary watched him, her eyes still as woodland pools, remembering what she had seen this tall young man do a while ago. When he came toward her again, she could not face him, and like one waking she looked around, and realized for the first time that George was no longer here beside her. She saw him by the cabin skylight aft.

Richard returned past her. "Got to go get dry," he said. She followed him toward where George stood; and George stopped Richard, said in unattained praise:

"That's the finest thing I ever saw or heard of, Cap'n Cor."

Richard laughed with pleasure and Mary linked her arm through her husband's and held tight to it, and echoed: "Did you ever see anything so wonderful?"

Richard grimed. "It was a pretty good fight," he admitted.

"It was great," George agreed. "I didn't take a full breath for ten minutes." He smiled. "If that's whaling, Cap'n Cor, I'll stick to the ministry."

Richard chuckled in shy pleasure. "Shucks, most times it's like beefing a steer. Nine whales out of ten just make a little run and then take it; and the bowheads don't even do that."

"A bowhead killed Uncle Tom," Mary remembered.

"Oh, sometimes they'll act bad." The business of cutting in the dead whale was pushed at top speed to beat the threat of weather. Mary watched the long spades slice through blubber and flesh and gristle as easily as hot butter. Peter, she saw, was shrewd and skillful at this business.

Mary watched the whole operation, from the first cut into the black carcass scarred white by the sharks. The sharp blades the men used fascinated her. Hiram was kept busy grinding them, Tommy turning for him. She and George watched proceedings together; and once when Richard stopped near them, she said:

"All these spades and harpoons and lances are pretty deadly, aren't they. I should think you'd be nervous, having them around."

"Well, they're our tools," he reminded her. "We get used 'em."

And he said:

"You know, Peter's the best I ever saw on the cutting stage." She thought he wished to restore Peter's stature in her eyes, and said agreeably:

"I could see that. He knows just where to cut, doesn't he?"

All that night the decks were a red-lighted inferno of smoke and flame, and the smell of hot oil penetrated every part of the ship.

It would be days before the Ventura was spick and span again. The whale, beside the ambergrie, added sixteen barrels of spermaceti and forty-odd of oil to their cargo, but the ambergrie had captured the imagination of every man aboard.

That single small barrel which a strong man could lift and carry away was worth thousands of dollars. No one could be sure exactly how much, and every man aboard was wondering.

After they found the ambergrie, Richard, who had till then maintained a careful dignity, as though to support his new part as Captain of the Ventura, became more expansive. Mary thought his luck had given him a sense of his own powers on which now he could build. At table he was more ready to talk about himself, and about the things he had seen in his ten years of seafaring. When he spoke of whales and whaling, even George was interested and attentive but sometimes, chuckling at his memories, Richard spoke of brawling days ashore.

One day he related a rather gay tale of wine and women that nettled George. Leaving Richard in the outer cabin he stalked out, Mary quick on his heels. George led Mary into her own cabin and closed the door and he said at once:

"Mary, I don't like that talk! Captain Cor ought to mind his tongue."

She hesitated, seeing how anger shook him, wondering in embarrassment whether Richard could hear. Then she heard Richard go on deck. "Don't you think you're a little unreasonable, George?" she pleaded. "Of course, you're a minister, and

"I knew darned well you'd be crying!"

a fine one; but Richard's fine in his way too. Don't you think there are two ways, at least, for men to live?"

He said, after a moment, with that humility which a consciousness of his own one-sidedness always woke in him: "Yes, I know, Mary. But I hate his attitude toward—well, toward women. The relationship between men and women—lan't a game, to be played for fun. When a man does things like that, and brags about them . . ."

"I don't think he was bragging," she argued. "I thought he was just telling some of the foolish things he used to do."

"Mary, are you trying to justify him?"

"Yes, I am," she admitted. "I think by his standards Richard's a pretty fine man. Just as you are by yours. I think if you did things like that, you'd feel ashamed and degraded; so of course you shouldn't do them. But when he did them, he didn't feel ashamed. He just thought they were fun! They were foolish, perhaps; but all young men do foolish things, don't they?"

"Most of them, I suppose. That doesn't make them any less fools!" His voice was tight with rage.

She protested, herself half angry now: "You surely don't expect me to be like you, stiff, and disapproving, and hardly speaking to him at all."

"I don't expect you to defend him!"

"Richard doesn't need defending!"

George said rigidly: "I expect you to remember you're my wife, Mary."

She told him wearily: "Oh I do, George. You know I do." But something in her tone made him look at her with bleak eyes; and he turned without a word and went out of the cabin, closing the door harshly behind him.

She dropped on her bunk, lying on her back, her eyes open, and it occurred to her after a little that she was very tired. She wondered why; and her eyes filled, and she rolled over, her head in her arms, crying quietly. When the door of the stateroom opened and then closed, she thought it was George returning to make his peace with her; and she lay still, waiting for him to speak. She felt his weight on the bunk as he sat down beside her, his hand upon her shoulder; and she turned over to look up at him and saw not George but Peter.

He bent close above her so that she could not rise; and he whispered hoily: "I knew darned well you'd be crying! Blast him! If he were man's size I'd take him apart!"

She shook her head from side to side on the pillow. "He's all right,

Peter. I was just tired, that's all. I don't know why."

She tried to sit up, put her hand against his chest to thrust him aside; but he did not move. He laughed, in a comforting fashion. "Poor little Mary! You always were a sweet kid. I was crazy about you, at home."

"You were sort of mean to me, always teasing."

"Sure. That's the way boys do! That's the way they show it." He said quickly: "I'd do a lot to see you happy."

And he bent and kissed her.

CHAPTER XII

He said hoarsely, his lips against her ear: "I could do anything, with a woman like you."

He was pressing her down. She had to fight away, to fight to her feet in a sort of blind panic, to face him with blazing eyes, scrubbing at her lips which again now he had kissed, crying in low tight tones:

"Stop it, Peter! Stop it! Get out of here!"

She flung him back. He stood against the door, muttering brokenly. "I'm sorry. I couldn't help it. You're so sweet! I lost my head!"

"Get out of here!"

He said in sudden sullen wrath: "You're not fooling me, you know! You've always been crazy about Dick! You never would look at me!"

She took a quick step toward him, so angry that he recoiled; and he opened, behind him, the cabin door. She said: "If you ever come in here again, I'll . . ."

He exclaimed in quick alarm: "Sh-h! Don't yell, Mary. George will hear . . ." He turned and ran up the companionway to the deck.

After that while which Richard killed had been tried out, and the decks scoured clean again, there were long lazy days when the ship and those aboard her seemed asleep. Sometimes Mary, looking up at the men on watch at the cross-trees, saw them nodding on their lofty perch. When the Ventura was on whaling ground, she carried at night only enough sail to make her handy; but now Richard was making a passage, counting on picking up enough oil to fill their casks off the coast of South America.

Richard for the sake of warm weather did not yet turn southward and the sun shone fair and fine, and the winds were favoring. The watch on deck might be busy with scrimshaw, listening perhaps to one of Corkran's yarns; and the squawk of the parrot sometimes came aft. Richard, standing with Mary one day, watching Corkran and his listeners, said:

"He's a good man, a good sailor; and a story-teller in the fo'c's'le helps keep the men contented. Someone to tell 'em stories keeps 'em amused."

Mary reflected thoughtfully: "You know, Corkran's really fond of George. That's why he deserted the Sunset at Gilead, in case George needed him."

"George is a fine fellow, Mary. I like him too."

"The queer part is, he likes Corkran," she said. "Corkran lived with the natives on the island and George knows it, and yet he doesn't seem to blame him."

Richard looked at her. "You know, you may not understand George yourself," he said. "He's about the bravest man I ever saw. He's pretty small, and frail; but he's never afraid." He added: "He wants to go in one of the boats next time we strike whales."

She was astonished. "Honestly? After seeing that fight the other day? He said then he'd stick to being a preacher, don't you remember?"

He chuckled. "That was partly to make me feel good, and partly because he saw how impressed you were, and he was trying to please you by agreeing with you. George is a grown man, Mary, small as he is."

"Will you let him go in a boat?"

"Maybe."

George had long since made his peace with Mary after that ugly hour in her cabin when by defending Richard she roused his anger. He was humble and contrite and ashamed of his harsh word. Peter too came to her with apologies; and Mary guardedly forgave him, as a woman can always forgive a man for loving her; but sometimes when she looked at him suddenly she surprised a sultry hunger in his eyes that made her wary. She tried not to be left alone with him again.

There were other reasons too why her nerves drew tight and tighter. She saw much low-pitched conversation among the men forward.

Even Corkran was changed. Mary, when he had the wheel, sometimes talked with him, puzzled by the difference in his bearing. She and George discussed it too.

Mary asked Corkran straightforwardly one day why he had changed. He was, he confessed, uneasy. "I don't like the looks of things forward," he said. "Nor the talk I hear."

"What talk?"

"They're saying there's a packet of pearls aboard this ship that's worth a fortune." His eyes touched hers. "You mind, pearls made trouble enough back there at the island, for himself and you. I don't like the pretty little things."

(TO BE CONTINUED)

"I knew darned well you'd be crying!"

Hand-Crocheted Hat, Bag Sets, To Be Popular This Summer

By CHERIE NICHOLAS

NOW that dame fashion has given a high rating to hand-crocheted garments, it behooves every style-minded woman to stop, look and listen to what is being said and done in regard to this very smart trend. Via a simple crocheted hook, a spool or so of crocheted cotton, or perhaps a skein or so of washable cotton yarn, lovely-to-look-at styles may be made.

You could search everywhere and it would be difficult to find anything more fetching in hat and bag sets than the masterpieces in crochet artistry such as here pictured. Even if you have never crocheted before, with a little application and willingness to "live and learn," you can crocheted for yourself a whole collection of accessory items every bit as pretty and wearable as those here shown. A fascinating pastime you will find it, too, for the work is easy and the cost of crocheted cottons low.

Doesn't the very sight of the cunning fashions illustrated make your fingers fairly tingle to crochet and crocheted until you have acquired a number of accessories to wear with your summer outfits?

Have you ever tried crocheting with heavy cotton rug yarn, bollix and washable. The work just speeds along. In no time you can finish a new hat and bag. The attractive high-crowned turban-and-bag twosome shown to the left in the picture is crocheted of heavy white cotton rug yarn. It also comes in colors. You will be surprised and delighted at how quickly this set can be made. There's nothing intricate or tedious about it!

For the star-trimmed crocheted pillow and matching round bag to the

right, use mercerized cotton thread. The star detail is somewhat military in effect, as so many fashions are this summer. Mercerized cotton thread was used also for the beret in the inset below. Note the colorful crocheted emblem which adorns the front of the crown.

Describing other attractive crocheted themes, a prim little Gibson collar is worth noting. It is crocheted of mercerized cotton in a firm, even, single stitch and is manipulated it keeps in perfect shape. A cluster of crocheted berries in self color is its only trim. Be assured this sailor is very good looking.

As clever a headpiece as any modern school girl would want is the "pigtail calot." It is really very similar to the popular schoolgirl "beanie" and is worn on the back of the head in exactly the same manner. The novel and amusing part is a long braid of yarn that starts from the crown center of the calot and dangles to the waist in back, just like a Chinaman's pigtail. To add more interest, the braided yarn is tied with a hair ribbon in school-girl fashion.

If it is a lace-trimmed hat you want, it may be crocheted in a lacy open-work stitch and when finished, starched very stiff.

(Reprinted by Western Newspaper Union.)

New Sports Fabric

This very good-looking frock is made of a new and unusual sports fabric, which, because of its outstanding attractiveness plus its dependable wearability, may be regarded as a real "find" for women who seek reliable materials. It is a rough crepe, one of a number of new creative fabrics done in Celanese rayon and silk. Woven with a special twist in the yarn, a pleasing unevenness is produced—best described as a splash effect. This charming frock will be well liked both because of the ripple-surfaced crepe that fashions it and because of the promise it carries of satisfactory wearableness. Note how smartly it is styled, with the new accented neckline.

New Cottons Make Fashion Headlines

Cottons are not new, but the cotton materials manufactured today are not only new, but front page news!

One of the highspots on the summer program of cottons is the suit of crinkly seersucker. At the races fashion-wise women are wearing these suits. The perfected tailoring of these suits gives them a thoroughbred air that is recognized at a glance.

Chambray is also gaining in popularity. Emphasis on striped chambray leads to such intriguing styling as the dress of monotone chambray that is detailed with stripes. Matching hat and bag complete the costume.

A word about the new colorful denims and gabardines. The latest message is bright yellow denim for play clothes. And flowered chintz is seen in both formal and informal dresses.

In the evening cottons go forth in party frocks of gingham and flowered prints, and in peasant skirts with blouse or middy tops. This season's cotton sheers never were prettier.

Cotton Fabric-Type Lace Enters Fashion Picture

Lace is "all set" for a tremendous vogue this summer. Special emphasis is on a new all-over-patterned cotton lace that is so fabrilike that it is practical for dresses, redingotes and all types of summertime ensembles, including the suit tailored of starched cotton lace, either in white or colors.

Week-End Matchmates

Practically a complete wardrobe within itself is the five-piece matchmate cottons now selling throughout stores the country over. Very practical and very attractive are these ensembles made up of five pieces—pajamas or slacks, shorts, bra-top, butcher-boy smock, and knee-deep coat.

PATTERNS

SEWING CIRCLE

8929

FRANKLY, the purpose of this frock is to make you look sweet and pretty! A high point of charm is the open-cleaved effect, accentuated by fluttering frills. The portrait neckline is wickedly becoming. This fashion makes up very charmingly in silk print, taffeta, and afternoon cottons. Easy to do.

Pattern No. 8929 is designed in even sizes 12 to 20. Size 14, 4 1/2 yards Clinch material, 2 1/2 yards ready-made ruffling. For this attractive pattern, send your order to:

OVER 200 EXPECTED AT CATTLEMEN MEETING, LORDSBURG, JUNE 21

Albuquerque, N. M., May 30—President Tom Clayton of the New Mexico Cattle Growers Association, has extended a personal invitation to every member of the New Mexico Cattle Growers Association and to sessions of the First Quarterly Executive Board meeting of the Association to be held at Lordsburg on Saturday, June 21 in the County Court House. A preliminary meeting of the Board will be held in the Hildago Hotel.

While the principle purpose of the Board Meeting is to attend to urgent business before the Association, the morning program on the 21st of June will include addresses from: Burton Roach, Hillsboro, Chairman of the Legislative Committee, who will report on developments of the last State Legislature concerning the livestock industry; New Mexico Cattle Sanitary Board, George Cureton, Chairman Southwestern Fair and Feeder Calf Association; A. D. Brownfield, Deming, Past President of Association; C. F. Dierking, Regional Grazier for Division of Grazing and Forest Service officials and others.

B. A. Christmas, Las Cruces and Vice-President of the Association has been appointed Chairman of the General Resolutions Committee for the Board Meeting.

Present indications are that more than 200 cowmen representing all parts of the state and Eastern Arizona will be in attendance. President Tom Clayton stresses the fact that meetings are open to the public and that all cowmen in the state are cordially invited to attend and take part in the meeting.

NAUTICAL NOTES

NAMING THE NAVY: The custom of naming United States battle-ships after states of the Union originated in 1819 with a resolution of Congress which also provided that frigates would be named for rivers and sloops-of-war for principal cities and towns. This is the present system of nomenclature:

- Battleships States
Cruisers Cities
Carriers Historic naval vessels or battles
Destroyers Officers and enlisted men of the Navy or Marine Corps, Former Secretaries of the Navy, Members of Congress or inventors
Submarines Fish
Mine Sweepers Birds
Gun Boats Smaller Cities
Seaplane Tender, Sounds or Bays
Submarine Tenders Pioneers in Submarines
Oilers Rivers
Ocean-going Tugs Indian Tribes
Cargo Ships Stars

NO MORE PORTHOLE: The invitation of the Navy's Recruiting Service to "see the world through a porthole" will undoubtedly have to be changed, perhaps to "see the world through a gunner's telescope". The recently commissioned NORTH CAROLINA, and probably all future combat ships of the Navy, will be without portholes as a result of one of the lessons learned from the current war. It has been established that the concussive effect of bombs exploding alongside of ships has blown in portholes, causing internal damage to ships and making the porthole obsolete.

YOUR \$\$ IF YOU WILL GO FAR READ THE ADS

This Week In Defense

President Roosevelt, stating the European War is "coming very close to home," proclaimed an unlimited national emergency. The President called upon "all loyal citizens" to place the nation's needs first in mind and in action and said "the nation will expect all individuals and all groups to play their full parts, without stint and without selfishness."

Speaking over the radio, the President said it is the U. S. policy to give "every possible assistance" to Britain and her allies by whatever measures are necessary. He also said U. S. will not accept a Nazi-dominated world and will resist any German attempt to gain control of the seas of bases which could be used for an attack on the Western Hemisphere.

Production

OPM Director of Purchases Nelson, speaking at Baltimore, said Germany is producing war materials at a rate of \$15,000,000,000 a year "and the least we can do is see to it that British and American production together will top \$50,000,000,000."

Mr. Nelson said "by throwing himself and his business into the defense program a business man risks something; by staying out he risks everything—not merely his business but the framework in which it is conducted; the set of economic and political arrangements which make the very existence of his business possible."

Labor Disputes

Labor Secretary Perkins appointed a three-man committee, including the Chairman of the Mediation Board and the Chief of the U. S. Conciliation Service, to select disputes to be referred to the Board. The U. S. Conciliation Service reported settlement of 23 additional strikes.

Selective Service

President Roosevelt proclaimed July 1 as Selective Service registration day for all men who have become 21 since the first registration on October 16, 1940. Selective Service Deputy Director Horshy asked local draft boards to give serious consideration to individual claims for deferment of men engaged in agriculture. Gen. Hersey notified local boards that Agriculture Secretary Wickard reported the defense program has drawn heavily upon the supply of farm labor and an adequate supply is becoming a serious problem, particularly along the Atlantic Seaboard, in Ohio and Michigan, and parts of Indiana, Illinois, Wisconsin, Minnesota and Arizona.

Army

Army Chief of Staff Marshall announced that training maneuvers this summer and fall are designed to create an "all-purpose" force capable of operating in the Arctic, the tropics, in deserts or mountains. He said every man must be given basic infantry training before he can "pull his weight" as a specialist.

Undersecretary of War Patterson, speaking in New York, denied charges the Army is devoting too much time to basic training. He said "ours is not a mass Army, staking its success on sheer weight of men and machines." He said the ratio of infantry to air service—nine to one in 1917-1918—is now almost one to one and "our plans call for a higher proportion of armored and motorized units than Germany has today."

Navy

President Roosevelt approved legislation authorizing the purchase or construction of 53 additional naval auxiliary ships. The Maritime Commission began immediate acquisition of the vessels, including the 27,000 ton "America," largest liner ever built in the United States. The Navy asked Congress to grant naval commanders authority to "take whatever steps they deem necessary—for proper protection of the naval forces" in the U. S. territorial waters.

Navy Secretary Knox announced the Navy will open 23 schools for training regular and reserve men as petty officers. Mr. Knox estimated 114,500 of the Navy's 256,000 enlisted men will be petty officers by July 1. The Navy also announced a three-months course at Harvard to train 400 college-graduates as supply officers.

Air

The President asked Congress for an additional \$2,700,000,000 for planes for the Army and \$29,000,000 for planes for the Navy. The War Department announced that construction of new Air Corps schools is "proceeding much faster than expected," with eight of 100 stations already completed and 50 partially occupied. Some of the fields, the Department said, were completed in three months.

The Air Corps announced that examinations of applicants for flying to home," proclaimed an unlimited national emergency. The President had two years of college have been changed to include seven instead of nine subjects, with two of the subjects elective.

Pilots for Britain

War Secretary Stimson announced arrangement to train 8,000 RAF pilots, bombardiers and navigators in U. S. civilian and Army schools. The U. S. will defray some of the cost from lease-lend funds. Mr. Stimson said the program would not interfere with U. S. pilot training.

Ships

The Maritime Commission awarded contracts for 123 additional merchant vessels. To date, the Commission said, 850 ships have been ordered—312 emergency vessels, 85 cargo ships for private concerns, 72 tankers and 60 ships on British contracts. The Commission said the first of the emergency ships will be completed by November, a month ahead of schedule.

Congress voted the President authority to requisition foreign ships in U. S. ports.

Materials

A sample campaign to test effectiveness of scrap material collection by the public is being conducted in Richmond, Va., and Madison, Wis., under the direction of local defense councils. If the campaign is successful, the OPM said, it may be made nation-wide. In the meantime, citizens in other areas were asked to refrain from similar campaigns.

Nutrition

Agriculture Secretary Wickard told the National Nutrition Conference for Defense "at least three-fourths of us" do not have satisfactory diets. He said "we need to consume twice as much green vegetables and fruit, 70 percent more tomatoes and citrus fruits, 35 percent more eggs, 15 percent more butter, 20 percent more milk."

Surgeon General Parran of the Public Health Service recommended the following minimum daily diet: one pint of milk for an adult and more for a child, at least one serving of meat, one egg or substitute, two green vegetables, two fruits rich in vitamin C, bread and cereal, butter or oleomargarine, and "other foods to satisfy the appetite."

Prices

Leon Henderson, Price Control Administrator, reported that although industrial production is now almost 25 percent higher than in 1929, the cost of living has risen only about three percent and wholesale prices only about seven percent in the past year, considerably less than during the comparable period of the World War.

He said leading oil companies in New England and middle-Atlantic areas have agreed not to increase gasoline prices "substantially" unless basic cost conditions change. He announced a ceiling will soon be placed on cow hide prices. He requested producers of ammonium sulfate used as fertilizer to continue prices at the present level because there is no justification for an increase.

Defense Housing

President Roosevelt approved construction of 9,960 additional dwelling units for civilian industrial worker families and Army and Navy enlisted personnel in 32 localities, and use of 274 trailers, renting for from \$5 to \$8 per week, as temporary housing in defense areas. Defense Housing Coordinator Palmer reported total allocations for family dwelling units to be 87,200 as of May 24. During the week ended May 24, 1,600 homes were finished, making the total completed 12,261, Mr. Palmer reported.

Labor Secretary Perkins reported more dwelling units were provided in non-farm areas during the first quarter of 1941 than during any corresponding period since 1929.

Bought from her nobel French family by the wealthy Russian Prince. In second chapter of her intensely interesting memories of vanished European Society, Vanished Amelia Karapov tells of her life in an old-style Russian palace, how the Prince regarded her no more than a dog, some times grew tender with her when drunk, and killed a servant when he felt like it. Don't miss it in The American Weekly, the magazine distributed with next week's Los Angeles Examiner.

Local and Personal

Mr. and Mrs. Allen Orme-Johnson of El Paso visited Mrs. Leppett here Friday. Mr. and Mrs. Johnson had gone up to Eagle Creek on a vacation and the torrential rainfall marooned them there from Friday, May 23 until the 30th. It was impossible to cross the creek, so Mr. Johnson and Mr. Copeland rigged up a suspension and connection wire, on which they passed bottles of milk, eggs and other necessities vital to the sustaining of life, by a series of elevation and maneuvering of weights. The CCC boys cleared the debris from the road.

Mrs. Bryson Corbett was here from Albuquerque last week to visit her parents, Mr. and Mrs. T. E. Kelley, and to attend her mother's piano recital at the Baptist church Thursday.

The Village of Carrizozo is in possession of a new truck. It is very nice looking and is properly branded "Village of Carrizozo."

All local business houses were closed Memorial Day.

Out of town visitors last Saturday were: Leo Joiner, Hondo Postmaster; W. J. Sandfer, Tinnie ranchman; Fren Pacheco, and Luterio Fresquez, Pichaco ranchmen.

Mr. and Mrs. W. C. Hendren of Fort Stanton attended Mrs. Kelley's recital here Thursday night.

The highway from Hondo to Roswell was closed several days last week and all traffic was routed through Carrizozo and around by Vaughn.

HOME PRODUCTION

Farm families who have little money can't afford to buy all the food they need for a good diet, but they can afford to grow it, Miss Beavers, home management supervisor for the Farm Security Administration, said yesterday in discussing the part farm families have to play in the nationwide drive to secure ample food supplies for the United States and other countries resisting aggression.

"Fact is," Miss Beavers said, "they can't afford not to maintain cows to furnish a year-round supply of milk, cream and butter; to raise enough chickens to provide meat and eggs all year, instead of just a few months in the spring, and to produce a variety of animals for other kinds of meat, including pork, beef and lamb."

"Farm families in Lincoln County home operations by this agency are learning that they can have more food and better food for less money by raising bigger gardens, increasing their poultry flocks and feeding a few livestock for home consumption," Miss Beavers declared.

Miss Beavers said that although borrowers of the FSA have always followed a live-at-home plan and grown most of their food and feed on the farm, a majority of them are planning to produce more than ever this year. They expect to take full advantage of the opportunity to reduce their living expenses and at the same time produce additional quantities to meet the national needs for greater supplies.

The home supervisor believes that FSA borrowers in this county are in full accord with a recent statement by Secretary of Agriculture, Claude B. Wickard, in which he announced a nationwide drive to produce every possible egg from present laying flocks this spring and summer.

This effort is a part of the nation's determination to assure ample food supplies for this and other countries during the present emergency. It should, according to Department officials, increase egg production for the whole country in the next 15 months by about six percent.

Bigger and better gardens are also expected to be grown this year on a large number of farms whose operators are working with the FSA.

Newspaper advertising in the United States is said to have begun in the New England Weekly Journal, published in Boston, in 1728.

COLLEGE BRINGS PORTALES ITS FIRST CATHOLIC CHURCH IN 26 YEARS

Portales, N. M.—Determined to give Catholic students at Eastern New Mexico a house of worship, Catholic townspeople and faculty members and the Catholic Church in America itself have cooperated in construction of St. Helen's chapel here.

It is the first Catholic church in Portales in 26 years.

First Mass already has been said as College classes came to an end, by the Rev. Raymond Soper of Clovis, who has for two years been coming to the College at 11 a. m. every Sunday during the College year and conducting Mass in a room at the College.

But the church will not be officially dedicated until College reopens next fall, when Archbishop R. A. Gerken of Santa Fe will come to speak.

Bulk of the funds for the church came from a central Catholic agency in Chicago at the behest of Archbishop Gerken, but Catholics here contributed much, and townspeople, members of a half dozen non-Catholic churches, gave liberally to a committee which financed the chapel.

The church has an extra room near the altar for parish meetings and for use of the College's Newman Club.

In the old days, when there was a tiny chapel on the same lot, served by the Roswell parish, the priest would come from there to say Mass on Saturday here, on Sunday in Clovis, and on Monday in Melrose, since travel was so difficult then that it was impossible to make all three places in one day.

The Misses Agnes and Louise Degner, sponsored by the American Legion Auxiliary honored Mrs. Jay McPherson with a bridal shower at the Community Center building last Saturday afternoon. The honoree received many lovely gifts.

Lt. Freeman Called

Lt Carl Albert Freeman has been called to duty at Fort Benning, Georgia. He will leave on or before June 15th.

Lt. Freeman completed his college course at New Mexico A & M May 28, and also completed his ROTC training, being a Lieutenant in the Army Reserve Corps.

V. Reil, Prop. Phone 36 Carrizozo, N. M.

WHO'S NEWS THIS WEEK

By LEMUEL F. PARTON
(Consolidated Features—WNU Service.)

NEW YORK.—In his book, "Man the Unknown," published in 1935, Dr. Alexis Carrel revealed profound misgivings as to whether any existing patterns of human behavior political organization ever could meet the requirements of a stable and humane civilization. He urged collective and concentrated scientific inquiry into the nature of the "whole man," and possibly of the organic quality of human society. The particularized knowledge of physiology and medicine he found inadequate to supply this understanding.

When he went to France recently he found a clinic and laboratory for his continued studies with the "whole man" caught in totalitarian misery, and in a wide context of spiritual and emotional stress—a zone of social pathology no doubt revealing to Dr. Carrel's deeply searching and penetrating eye.

Just why the Nazi overlords of France should want to keep him there, as reported in dispatches, is a mystery. There is no evidence that the Nazis admire him. He has been no apologist for their flagrantly unscientific and inhumane doings, and if they expect to commandeer his profound knowledge of nutrition, medicine and surgery, it is difficult to understand how they may expect co-operation.

Dr. Carrel, a keen, compact, round-headed little Frenchman, will be 68 years old next month. The world knows of his 34 years with the Rockefeller Institute for Medical Research, the marvel he has wrought, including his 29-year-old living chicken heart, his distinguished contributions to medical science during the World war, and his fashioning of the mechanical heart with the co-operation of Charles A. Lindbergh.

In the last few years he has been preoccupied with the fange of human behavior lying outside and beyond medical knowledge. He visions come kind of government by a scientific elite. On August 14, 1933, just before the guns blazed, he said that civilized men must "pool their brains," or come to ultimate failure and then added: "Our America, with its democratic ideal, is based on ideologies of the Eighteenth century. If we used scientific concepts instead of ideologies, we might discover a new way of life."

HARRY WINSTON started subdividing real estate, but now sub-divides diamonds and finds it more profitable. He and his expert assistants nick a \$30,000 chip off the famous Vargaa diamond of Brazil, and when they get rid of roughage like this they expect to shape up a \$2,000,000 central core in the stone.

It is one of the most jittery jobs of diamond manufacturing ever attempted, but so far is going nicely. It took them a month and seven days to make this small, but lucrative beginning, working on the third largest diamond in the world. It will take 15 months to finish the cutting, with a phosphorus-bronze blade .0033 of an inch in thickness.

Rearred in Los Angeles, Mr. Winston learned the jewelry business with his father. Returning to New York, after a stretch in the AEF in the World war, he decided the war and its aftermath would imperil all values except those of durable old Mother Earth herself.

Land—that was the thing, in days of threatened inflation and social maladjustment. So he went into the real estate business in New York. The more he worked at it, the more safe, sound and conservative seemed the glitter of a diamond—even if traditionally baleful. He opened a wholesale jewelry business in New York and soon was gathering in some of the biggest and showiest diamonds in the world. He paid \$350,000 for the Jenkers diamond of 425 carats and \$700,000 for the Vargaa stone.

DR. TOYOHIKO KAGAWA, Japan's frail little Mahatma Gandhi, evangelist of world brotherhood and leader of the Christians in Japan, is in New York, in furtherance of the newly organized Church of Japan, which he helped to establish. He expresses surprise at talk of war with Japan and sees ahead a world church union which will end all wars. A tubercular little man, Dr. Kagawa has suffered jail, persecution, poverty and illness. He preaches a merger of Christianity and capitalistic economics.

British Captives of Nazis in Africa

This picture, taken somewhere in Africa, shows a group of British soldiers fresh from the fighting lines of the see-saw battle of the dark continent. They are shown in the prison camp to which they were removed after their capture by the successful Nazi and Italian forces.

Ford Workers Vote on Unionization

Using secret ballots, more than 83,000 workers of the Ford Motor company in the Detroit area voted overwhelmingly in favor of the U. A. W. C. I. O. to do their collective bargaining with Ford for them. Photo shows workers at the Ford River Rouge plant being checked in by Police Captain Don Leonard as the balloting began.

Christening Navy's Biggest Bomber

Largest and most powerful bomber in navy service, Consolidated's "The Spirit of American Democracies," being christened in the presence of chiefs of general naval staffs of 11 Latin-American nations by William Powell, son of an aircraft worker. Inset: Maj. Reuben Fleet, president of Consolidated Aircraft company, and Vice Admiral Jose Hachada E. Silva, spokesman for the visiting Latin-American navy chiefs.

Cotton—'White Gold' of the South

With the goddess of liberty spotlighted, the brilliantly lit royal barge of Memphis' Cotton Carnival monarchs moves into the harbor where they disembarked to officially open the 1941 cotton celebration, a week of merriment and fun-making, dedicated to the "white gold" of the Southland—cotton.

Testifies

'Ham' Honored

Pictured among the gadgets of his home-built station, W8BSF, in Olathe, Kan., Marshall H. Enzor, school teacher, was cited as the amateur radio operator who "contributed most usefully to the American people." The citation came with the William S. Paley amateur radio award.

Opens New Hospital

Mahatma Gandhi, Indian nationalist leader, sheva during ceremony he conducted at formal opening of the Kamala Nehru hospital at Allahabad, India.

Roses From Rose Cuttings
If you desire new bushes from your own stock, or if your neighbor has a desirable rose and will let you take a few cuttings from the plant, proceed as follows:

- For Greenwood Cuttings: The base of a flowering shoot after the flower has fully opened is in good condition for a greenwood cutting; wood, equally mature, from a non-flowering shoot is also suitable.
- Order of Procedure:
 1. With a sharp, thin-bladed knife, cut a piece from three to six inches long, with three buds, making the incision close below the lower bud and any distance above the upper bud;
 2. Remove the lower leaves; leave the top one on. All leaflets except two should be cut away to reduce the amount of leaf surface exposed to the air;
 3. Drop the cuttings, as made, into water or wrap in moist paper for protection;
 4. Plant immediately in sand or light loamy soil, setting about an inch apart and deep enough so that the top bud and leaves just protrude from the soil;
 5. Pack the sand closely around them, particularly at their lower ends;
 6. Water them thoroughly after planting, and enclose, to keep the leaves from wilting. A coldframe or spent hotbed is suitable for rose cutting if the glass is shaded or if a cheesecloth-covered frame is used in place of sash.
 - In handling only a few cuttings, many persons successfully invert fruit jars or glass dishes over them;
 7. As the cuttings begin to absorb moisture, admit a little air to coldframe or jar to prevent the growth of mold and fungi;
 8. In frames; frequent spraying should be given; under jars, this is not necessary;
 9. When roots have formed freely, transplant the plants to good soil, water well, and shade from the midday sun for a few days;
 10. Water moderately until the plants are well established.

For Hardwood Cuttings: Strong, well-ripened shoots of the previous summer's growth should be selected. Cut after the wood matures, but before freezing-weather. Proceed in the following order:

- 1. Cut into pieces four to six inches long, with the lower cut just below a bud;
 - 2. Plant in sand beds with jars placed over them, as described for greenwood cuttings, or in frames;
 - 3. If the cuttings are not to be planted until the following spring, they may be tied in bundles with raffia, plainly labeled, buried in a box of moist sand, and placed in a cool cellar or buried with the tops down in the open ground, below danger of frost;
 - 4. In early spring, plant in the open ground, deep enough so that one eye or not over one inch of the cutting is above the ground;
 - 5. Take care not to injure the calluses that have formed while the cuttings were buried;
 - 6. Sometimes better results are obtained by planting the cuttings in partial shade.
- Fertilization and Cultivation.
Roses grow well on both sandy loam and clay loam soils, but as a rule the best results are obtained from deep, rich soils, which are well drained. Good growth of stalk and plenty of bloom will usually result from soil which is enriched, at time of planting, with well-rotted cow manure. Mixed farmyard manures are satisfactory, but horse manure, alone, is the least desirable of all animal manures. Other fertilizers may be used, also, such as dried blood, tankage, fish scrap, cottonseed meal or ground bone. When manure or compost is used, it is advisable to apply a layer two or three inches deep, or even more.
- As to cultivation, it need only be said that roses require clean cultivation, or, as an alternative, must be well mulched.

Insect Enemies.
For slugs, caterpillars and beetles, the following spray is recommended; three-teaspoonfuls of lead arsenate to one or two ounces of soap, to one gallon of water. (NOTE: Lead arsenate is a dangerous poison and must be handled with care.)
For thrips, spider mites, and aphids, spray with a solution of one to two teaspoonfuls of nicotine-sulphate, one to four ounces of soap, and one gallon of water.

For further information, send five cents to the Superintendent of Documents, Washington, D. C., asking for Farmer's Bulletin No. 750.

COTTAGE CHEESE SALAD DRESSING

Add a half cupful of cottage cheese to a thick mayonnaise made in the usual quantity of oil and eggs, and mix thoroughly. Such a dressing will keep for a considerable time without separating.

THE BOMBARDIER BEETLE

This little beetle, like the locust or skunk, carries at the rear of its body a little sack filled with a foul-smelling liquid which it squirts on its enemies.

X Marks the Spot

A Hollywood story concerns a film magnate who had never learned to write. But that did not keep him from making money, and when he put two crosses on a check the bank honored it. Then one day he handed the bank cashier a check signed with three crosses. "What's this?" demanded the cashier, "you've put three crosses here." "I know," said the magnate. "My wife's got social ambitions. She says I must have a middle name!"

J. Fuller Pep

By JERRY LINK

Old Doc Wickham used to say: "No man is rich who got a hole in his pocket."

Which reminds me of getting your vitamins. Folks need them all; if any one of them is missing the old vitality is punctured. And that's why this delicious cereal, KELLOGG'S PEP, is important for its extra-rich in the two vitamins that are lacking in many people's meals—B₁ and D.

PEP's a jim-dandy tastin' cereal, too. Why not have it tomorrow? I just know you'll like it!

Kellogg's PEP

A cereal rich in vitamins B₁ and D

Necessity and Satire
Necessity reforms the poor, and satire reforms the rich.—Tacitus.

That Nagging Backache

May Warn of Disordered Kidney Action

Modern life with its busy and worry, irregular habits, improper eating and drinking—the jumpy, nervous and irritable—throws heavy strain on the work of the kidneys. They are apt to become over-taxed and fail to filter excess acid and other impurities from the life-giving blood.

You may suffer nagging backache, headache, dizziness, getting up nights, loss of appetite, swelling, especially tired, nervous, all worn out. Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.

Try Doan's Pills. Doan's help the kidneys to pass off harmful excess body waste. They have had more than half a century of public approval. Are recommended by grateful users everywhere. Ask your neighbor!

DOAN'S PILLS

We Can All Be EXPERT BUYERS

● In bringing us buying information, as to prices that are being asked for what we intend to buy, and as to the quality we can expect, the advertising columns of this newspaper perform a worth while service which saves us many dollars a year.

● It is a good habit to form, the habit of consulting the advertisements every time we make a purchase, though we have already decided just what we want and where we are going to buy it. It gives us the most priceless feeling in the world: the feeling of being adequately prepared.

● When we go into a store, prepared beforehand with knowledge of what is offered and at what price, we go as an expert buyer, filled with self-confidence. It is a pleasant feeling to have, the feeling of adequacy. Most of the unhappiness in the world can be traced to a lack of this feeling. This advertising shows us the way to it. It shows us how to get it. It shows us how to get it. It shows us how to get it. It shows us how to get it.

FIRST-AID to the AILING HOUSE

by Roger B. Whitman (© Roger B. Whitman—WNU Service.)

Space Around Pipes

QUESTION: What do you recommend to close up the space between pipes coming up into a room, and the floor? In our apartment there is a space between the floor and the hot and cold water pipes, also the radiator pipes, which I would like to seal up.

ANSWER: Because of the varying temperatures and vibrations in the pipes it is not possible to fill these spaces with cement of any kind. A piece of canvas cut to fit around the pipe might help.

Leaky Cellar

QUESTION: In our new house water leaks into the basement from underneath the floor along the joint between floor and walls. Can this be stopped with waterproof cement? If so, will the water pollute the concrete in remaining permanently under the floor and around the foundation during the wet season?

ANSWER: If the level of your cellar floor is below the natural ground water level during the wet season, the only remedy is to apply membrane waterproofing inside the cellar.

Paint After Whitewash

QUESTION: A wooden wall in my cellar was whitewashed. I washed off the whitewash, and then, after the wood dried, put on two coats of inside oil paint.

ANSWER: Although you took off the whitewash on the surface, some of the lime of which it was made, soaked into the wood and remained. This lime affected the oils of the paint and destroyed them.

Removing Wallpaper

QUESTION: I have been trying to remove wallpaper in my living-room by soaking it with water—but the water seems to have no effect.

ANSWER: Your wallpaper must have a varnished or other waterproof finish. To take it off, go over it with coarse sandpaper wrapped around a block of wood.

Wallpapering

QUESTION: My summer cottage is about 60 years old, but in good condition. The living room and lower bedroom need papering.

ANSWER: Yes, you can apply new paper over the old, providing the old paper is in good condition and is on tightly.

Questions on Painting

QUESTION: A correspondent asks if any of the following jobs can be done when temperatures are below freezing: Cold water painting inside of a cabin.

ANSWER: Any material or paint containing water or mixed with water should not be used when temperatures are at or below the freezing point.

Railroad Lands Are Liquidated

Eight Million Acres Given Roads in Early Days Recovered by U. S.

WASHINGTON.—A 90-year phase of American railroad building steeped in frontier history was closed as the interior department announced the recovery of 8,000,000 acres of land originally granted to railroads when they pushed westward to the Pacific.

Secretary Ickes approved a release by the Northern Pacific railroad of all claims under land gifts of 1864 and 1870—last and largest of the historic grants closed out under the Transportation act of 1940.

The Northern Pacific release embraced about 4,500,000 acres in Washington, Montana, Idaho, Oregon, North Dakota, Minnesota, Wisconsin and Wyoming. The land reverts to federal ownership for administration under the conservation program of the interior department.

Releases previously approved by Mr. Ickes restored to the public domain about 2,000,000 acres in Southern California held by the Southern Pacific and 1,600,000 acres in Arizona and New Mexico held by the Atchison & Santa Fe.

The value of the lands, larger than the states of Delaware, Rhode Island and Connecticut combined, has not been appraised.

Under the Transportation act of 1940 the interior department was empowered to close off the land grants and, in exchange, open the way for the roads to be relieved of low preferential rates on government freight and passenger business.

The land grant system was begun by congress in 1850, with allocation of 2,595,000 acres of the then plentiful public lands for construction of the Illinois Central road.

Of the original 159,233,000 acres, the railroads actually took patents on 110,000,000 acres.

Veterans Still Cling to Tough Old Army Mule

FORT BLISS, TEXAS.—This is a mechanized age, and the army is utilizing its share of machine-transportation and power, but motor vehicles never will knock out the tough army mule.

That's the consensus of military strategists at Fort Bliss, America's largest cavalry post.

Historians of the fort who have done research work on the subject, say the mule started with the army. They base their prediction that the mule never will be entirely supplanted by motor transportation and power on the proved fact that the animal is at its best in rough going.

Capt. Richard E. Arnold, who is serving his twenty-first year in the army and who now commands the Fort Bliss mule pack train—the only one in America—insists that the mule represents much of the color and romance of the army.

He and other veterans like to tell of the feats of sturdy mules in the World War and of the times they carried ammunition through to the front in France when trucks were mired in the mud or in shell holes.

Prisoner Admits Hoax In Slaying 'Confession'

LOUISA, KY.—District Attorney M. J. Eagen of Scranton, Pa., said that Dwight O. Thorne admitted he had concocted a "confession" of being responsible for the dynamite slaying of William and Lois Reborn in Scranton last November.

"It was practically convinced that it was a hoax before I came to Louisa," said Eagen, who questioned Thorne in the presence of local and Pennsylvania police.

"However, he gave us some side-lights I would like to look into before he is turned loose," Eagen added.

"It was a made-up story," County Attorney M. J. See quoted Thorne as saying.

Asked why he did it, See said Thorne replied: "Even if I have to spend the rest of my life in the penitentiary, I can't tell you why."

Museum Designed in Style Of Old Mound Builders

MOUNDVILLE, ALA.—A museum designed after the architecture of the ancient and little known Mound Builders of Alabama has been opened to house situ burials and artifacts found at the mound village here.

A burial, left exactly as it was uncovered, is under each wing of the building, and the center section contains cases holding hundreds of relics.

News holds News by Lynn Chambers

FILLED WITH SPICE 'N' EVERYTHING NICE... (See Recipes Below)

REFRESHMENTS PLUS!

Summer nears. You think of lots of things—new, crisp, cool clothes... vacation trips... gardening... and yes, even parties, especially gay ones that all for a minimum of "home work."

I think I understand. You love to have people in your home. In spite of the warmth of June days, you want those of your friends who remain in town to drop by often for conversation, relaxation and refreshments. But, of course, you want what you serve to be easy to make, delicious, entirely different from anything that you've ever served before, and economical.

So today I'm going to give you what I think are ace-high ideas on easy entertaining. I'm sure you'll find the recipes worth trying.

Dessert bridge parties will do wonders to round up the "Mrs." crowd who feel free, after feeding hubby and the children, to don dress-up frocks and skip out for dessert and an afternoon of fun.

Substitute another hobby, but the serving of dessert upon the arrival of guests can nevertheless be carried out. Serving dessert when guests arrive gives the hostess lots of leeway. She doesn't have to keep in mind that her friends will be going home to dinner soon, as she does with later-on refreshments.

Pictured at the top of the column is a dessert which I'm sure will answer your desires. It's Tropical Gingerbread.

2 eggs, 3/4 cup brown sugar, 1/4 cup pure molasses, 1/4 cup melted shortening, 2 1/2 cups flour, 2 teaspoons baking powder, 1 cup boiling water, 2 tablespoons ginger, 1 1/2 teaspoons cinnamon, 1/2 teaspoon cloves, 1/2 teaspoon nutmeg, 1/2 teaspoon baking soda, 1/2 teaspoon salt.

Add beaten eggs to the sugar, molasses, and melted shortening; then add the dry ingredients which have been mixed and sifted, and lastly the hot water. Bake in small individual pans, or in a greased pan, in a moderate oven (350 degrees F.) for 30 to 40 minutes.

With this dessert, you'll want to serve a beverage... coffee, tea or perhaps an iced drink of fresh fruit mixture.

Vanilla mousse is the basis for a number of appetizing desserts, and is a good party refreshment in itself. Among the many variations are peanut brittle and chocolate fudge mousses.

To make the vanilla mousse, fold one cup of confectioners' sugar and two teaspoons of vanilla into one quart of heavy cream that has been whipped. Fold in four egg whites which are stiffly beaten.

Spread the mousse into two large refrigerator ice trays and place in the freezing compartment of your refrigerator, or, freeze in your ice

cream freezer. Allow three hours for the freezing. This recipe will yield two quarts of mousse.

For a crunchy surprise frozen dessert for your guests, serve peanut brittle mousse. To make it, crush 1/2 pound of peanut brittle with a rolling pin and fold into the vanilla mousse before it becomes cold (about 1 1/2 hours).

If it's an extra-special party you're planning, I've included a special dessert-bridge menu in today's column. You'll spend more hours in the kitchen preparing these particular foods, but they're so-o-o good that your guests' ohs and ahs will amply reward you for your efforts.

Cream Sponge Cake. 1 cup sifted cake flour, 1 teaspoon baking powder, 1/4 teaspoon salt, 1/2 cup cold water, 1 teaspoon grated lemon rind, 2 egg yolks, unbeaten, 3/4 cup granulated sugar, 2 egg whites, unbeaten, 1 teaspoon lemon juice, 2 tablespoons granulated sugar, Sift flour, baking powder, and salt together three times.

Orange Chiffon Cake. 2 8-inch Cream Sponge Cake Layers, 1 envelope plain, unflavored gelatin, 1/4 cup cold water, 4 eggs separated, 3/4 cup granulated sugar, 1/2 cup orange juice, 2 tablespoons lemon juice, 1/2 teaspoon salt, 1 tablespoon grated orange rind.

If it's an extra-special party you're planning, I've included a special dessert-bridge menu in today's column.

Cream Sponge Cake. 1 cup sifted cake flour, 1 teaspoon baking powder, 1/4 teaspoon salt, 1/2 cup cold water, 1 teaspoon grated lemon rind, 2 egg yolks, unbeaten, 3/4 cup granulated sugar, 2 egg whites, unbeaten, 1 teaspoon lemon juice, 2 tablespoons granulated sugar

Sift flour, baking powder, and salt together three times. Add water and lemon rind to egg yolks, and beat with rotary egg beater until light colored and at least tripled in volume. Add 3/4 cup of granulated sugar, 2 tablespoons at a time, beating well with rotary beater after each addition; then add sifted dry ingredients, a small amount at a time, beating slowly and gently with rotary beater only enough to blend.

Beat egg whites until they form rounded mounds when beater is raised; then add lemon juice and 2 tablespoons sugar, and continue beating until stiff enough to hold up in moist peaks. Fold into flour mixture. Pour into two ungreased 8-inch layer cake pans, stirring lightly while pouring. Bake in moderate oven of 350 degrees F. for 20 minutes. Remove from oven, and invert on rack until cakes are cold. Fill with Orange Chiffon Cake Filling according to directions below.

Orange Chiffon Cake. 2 8-inch Cream Sponge Cake Layers, 1 envelope plain, unflavored gelatin, 1/4 cup cold water, 4 eggs separated, 3/4 cup granulated sugar, 1/2 cup orange juice, 2 tablespoons lemon juice, 1/2 teaspoon salt, 1 tablespoon grated orange rind.

Make and bake the Cream Sponge Cake Layers, following the recipe. Meanwhile, soak gelatin in cold water 5 minutes. Place beaten egg yolks, 3/4 cup granulated sugar, orange and lemon juices, and salt in double boiler. Cook while stirring until like custard. Add gelatin, and stir until dissolved. Remove from heat, stir in orange rind, and chill. When mixture begins to thicken, fold in meringue made by beating egg whites until frothy, but not dry, and folding in 6 tablespoons sugar gradually, while continuing to beat until stiff. Prepare cake layers for the filling by placing one layer on a cake plate; make collar of double waxed paper about 3 inches high to fit tightly around edge of cake; secure with pins or paper clips. Pour orange filling over the top of this layer; top with second cake layer; then place in refrigerator to chill until set. Before serving, remove waxed-paper collar from cake. To add finishing touch to top of cake, place lace-paper dolly over top layer, sift confectioners' sugar over it, and remove dolly carefully to preserve design.

Chained Tongues

Amyclae in ancient Greece had been harassed so often by false reports of an invasion by the Spartans that a stringent law was passed forbidding anyone to mention the enemy again. Shortly afterward, the Spartans did arrive and, as no one dared to give the alarm, Amyclae was captured and went down in history as "the city that perished through silence."

Was It but a Suggestion From Exhausted Clerk?

Froek after froek had been displayed to the lady with the supercilious air, until the salesperson in the exclusive dress shop was on the point of nervous exhaustion. The customer would inspect each dress and then make biting remarks about most of them. At last she looked around the devastated place with an overbearing glance and complained: "All your frocks are so skimpy. I believe I would look better in something flowing." The tired clerk was quick to seize the opening. "Madam might try the river," she said coldly.

NOTICE OF HEARING OF FINAL REPORT AND ACCOUNT

In the Probate Court of Lincoln County

State of New Mexico
In the Matter of The Last Will and Testament of J. E. Clark, No. 498

Deceased.
To: Alma H. Clark, Barbara Von Stuve, E.M. Clark, J.E. Clark, Jr., C. H. Clark, Jack A. Clark, Mary Eliza Clark and M. S. Clark and to all unknown heirs of the said decedent, and all unknown persons claiming any lien upon, or right, title, or interest, in or to the estate of the said decedent, and to whom it may concern:

You, and each of you are hereby notified, and notice is hereby given, that Alma H. Clark, Mary Eliza Clark, and J. E. Clark Jr., Joint executrices and executor of the Last Will and Testament of J. E. Clark, deceased, has filed in the above entitled Court their final report and account as such joint executrices and executor, and the Court has appointed Monday, the 21 day of July, 1941 at the hour of 10 o'clock A. M., as the hour and day for hearing of objections, if any there be, to the approval and settlement of said final report and account, and the discharge of said Alma H. Clark, Mary Eliza Clark and J. E. Clark Jr., as such joint Executrices and Executor, and at the hour on the day named, the Probate Court will proceed to determine the heirship of said decedent, the ownership of his said estate and the interest of each respective claimant thereto and therein and the persons entitled to the distribution thereof.

The name and post office address of the attorney for the Executrices and Executor is John E. Hall, Carrizozo, New Mexico.

Witness the honorable Marcial C. St. John, Judge of the said Court, and the seal thereof, this 4th day of June, 1941.

FELIX RAMBEY, Clerk.
By Thelma Shaver, Deputy
J-4-June 27.

STATE TOURIST BUREAU INQUIRIES

Santa Fe, June 2—Maybe the American people are just getting better educated.

Or maybe New Mexico is getting better known.

The point is that all the ludicrous, the unusual, the startling and the plain dumb questions that used to live the day's mail aren't reaching the State Tourist Bureau this year, according to director Joseph A. Bursey.

"Would you believe it?" Bursey said with just a hint of pride in the American people, "not a single one of them has written to ask if they have to have a passport to get into New Mexico.

"And that isn't all. Not a one—not a single one, mind you—has written to ask if American money is any good down here. Maybe the war's got 'em studying their geography, but whatever it is, the strange and unusual letters, to express it gently, aren't coming in."

Among other questions, favorites of potential tourists in the past, which have not been asked this year, Bursey cited the following:

"When's your next bull fight coming off?"

"Which boat would you advise taking to New Mexico, and which port should I land at?"—"That one," mused Bursey, "looks like he had a little port before he studied his map. But they are not asking such questions this year."

"Why did the Indians build their cliff dwellings so far from the railroad?" That one was a favorite with school teachers in the old days before they got educated.

"Are the Carlsbad Caverns natural, or were they built by the WPA?"

"Will American Stamps take a letter out of this country?"

"Is it safe to bring my wife, if I travel in the Mountains?"

"Is it safe to wear my scalp if I travel in the Indian country?"

"How high is Eagle Nest Lake? Please give the elevation for both ends of the lake."

"Should I bring my own bed roll, or do you have hotels?"

"Will you please send me some exhibit material for our school? We want to build some goodwill between America and your country."

"Those are only samples," Bursey said, "but they give you an idea of the kind of questions we used to get but aren't getting this year. And so far we have handled more than forty thousand letters from people who are thinking of spending their vacations here this year."

"But things do happen to live up the work. Down at Carlsbad the other day I heard a story about a man from the east who came to town with a good sized string of rattlers from a ho-man rattlesnake. One of the local boys asked him: "Where did you get them?"

"And the easterner replied: "I got them off a worm."

NOTICE

The Committee has set June 20 as the tentative closing date for receiving applications to make mattresses. The last order of cotton has been made and all eligible applicants who make their applications prior to June 20 will be given first consideration in receiving the remainder of the cotton mattress material. Should there be material left, applications received after the closing date will be considered; but, applications received prior to the date designated will be given first consideration.

Application blanks and rules governing eligibility may be obtained at the County Agent's office.

Local and Personal

Mr. and Mrs. Ralph Petty have returned from their wedding trip to Phoenix, Arizona, and other points of interest.

Mrs. Frances Payne has moved to El Paso to reside. She has accepted a position with the El Paso Telephone company.

Mrs. R. E. Berry left last Saturday to spend two weeks with her parents, who live in Texas.

Mrs. Doc Lacey of Santa Monica, California and two daughters of El Paso were in Lincoln county mingling with old friends the past weekend. Besides Carrizozo they visited Ruidoso, Lincoln and Capitan friends.

Mr. Ralph Petty made a good showing for himself in the 6th Southwestern golf tournament, but lost in the semi-finals to Stewart of Roswell who was representing Albuquerque Country Club.

Hon. John J. Dempsey of New Mexico, former Congressman was nominated by the president for under Secretary of the Interior.

In an automobile accident Friday night on the Capitan road Cruz Otero was killed instantly, and one of his companions was seriously injured.

Attorney John E. Hall and wife spent part of this week in Texas visiting relatives.

Miss Dolores Forsyth and Mrs. Edith McKinley arrived home last Sunday from two weeks' pleasant vacation on the West Coast.

Mr. and Mrs. O. W. Bamberger and son Billy passed through here Wednesday enroute to their home in Magdalena from Roswell, where Billy received his diploma from N. M. M. I.

Mrs. J. R. McPherson, of El Paso, spent the weekend with her parents, Mr. and Mrs. Dan Conley. Mr. and Mrs. McPherson will leave El Paso Saturday for Hereford, Arizona, where Mr. McPherson will be stationed as Signal Maintainer for the S. P. Railroad.

FOR RENT -- My cottage on Elm street. Mrs. Era Smith

Mr. and Mrs. Lou Fink and children moved to Roswell, where Mr. Fink will teach violin. He has been teaching in Carrizozo for several years.

Mr. and Mrs. Jack Aguayo who reside on a ranch near Santa Fe, spent the past weekend at the Aguayo and Gatewood homes at Nogal.

Mr. Doug Cain, ranchman of Engle, N. Mex., recently purchased 100,000 acres of ranch holdings from Mr. Tom McDonald of the Mocking Bird ranch. Mr. Cain is a brother-in-law of Messrs. Ira and Lester Greer.

Mr. and Mrs. Johnson Stearns have purchased the home of Mrs. Ola C. Jones, located near the school house.

Mr. and Mrs. Ted Purvey and son, Junior of the Standard Service station, and Ted's mother, Mrs. Clesta Prior left Sunday, June 1st for a trip to the west coast and intermediate points. They will be gone two weeks. Mark Harwell of the City Gas Co. is running the station for Ted and Mrs. John Redding is operating the hotel for Mrs. Prior.

Mr. Frank Martinez has moved into the Sproles apartment recently vacated by Mrs. Ola C. Jones.

Mr. Carl Freeman and his sister entertained at their ranch home last evening. Besides the picnic supper, a bonfire was the main attraction.

The use of asphalt for streets and roads dates back to about 1838. Asphalt springs occur abundantly on the shores of the Dead Sea, where it is known as Moses' Stone

CAPITAN NEWS

Mrs. Ike Broocke entertained the Thursday Bridge Club at her home.

Friday morning Mrs. James Thompson and Mrs. Chester James were hostesses to a breakfast given in honor of Mrs. Ralph Werner's birthday. Mrs. Werner received many lovely gifts. After breakfast the guests played bridge.

The Firemen had a very nice crowd for their dance Saturday and everyone reports a lovely evening.

Mrs. J. B. Kirkland entertained the Thursday Bridge Club Monday afternoon with a desert bridge. High score was made by Mrs. James Thompson; low, Mrs. Bert Cheney.

Miss Helen Provine is home for a few days from Hotel Dieu in El Paso, where she is taking training.

Mr. and Mrs. Thompson, from Brownwood, Texas, are visiting their children here and at Ruidoso.

Everyone is hard at work on their Red Cross sewing and knitting. Also raising food, clothes and funds for the flood refugees at Carlsbad.

A number of people attended the second showing of, "Gone With the Wind" at Carrizozo last week-end.

LOCAL 4-H CLUB MEMBERS WIN REGISTERED LIVESTOCK

Eight county 4-H club members received registered livestock from Sears Roebuck Company at Roswell, May 24. The livestock was awarded to the winners of an essay contest, which was sponsored jointly by Sears Roebuck Company and the Extension Service. The contestants who received registered ewes are Robert Freeland, Capitan; Richard Hancock, Corona; Loyd Hodge, Corona; Winston Cape, Lon; and John Hancock, Corona. Registered gilts were received by Glyn Tracy, Corona; Ada Mae Ashby, and Margaret Guthrie, Ancho.

Each winner will care for his animal under the supervision of the county agent. The contestant who shows the most interest and whose animal makes the greatest progress will be given his choice of a registered Hereford or Jersey heifer at the Eastern New Mexico State Fair at Roswell this fall. The registered heifer will be given by Sears Roebuck Company, of Roswell.

The project, as arranged, will be continuous. The first female lamb and pig from each animal will be returned to the Sears Roebuck Company to be given to eight more 4-H club members next year.

Food for Flood Victims

"In response to the present food crisis, the Federal Government has volunteered an abundance of foodstuffs to the many victims of the present flood in New Mexico," E. J. Caldwell, Area Supervisor of the Surplus Marketing Administration in the State of New Mexico, announced today.

Following a conference with Jennie M. Kirby, Director of the State Department of Public Welfare, R. L. Nations, State Director of Commodities Distribution, and officials of the Surplus Marketing Administration, the Government Agency made an exception to the rules governing the allocation of its supply of surplus foods and authorized the State to assist the flood victims at this time of emergency.

Mrs. R. J. Richrad returned the first of the week from a visit to Kansas.
