

No Bottleneck Here—but There Will Be

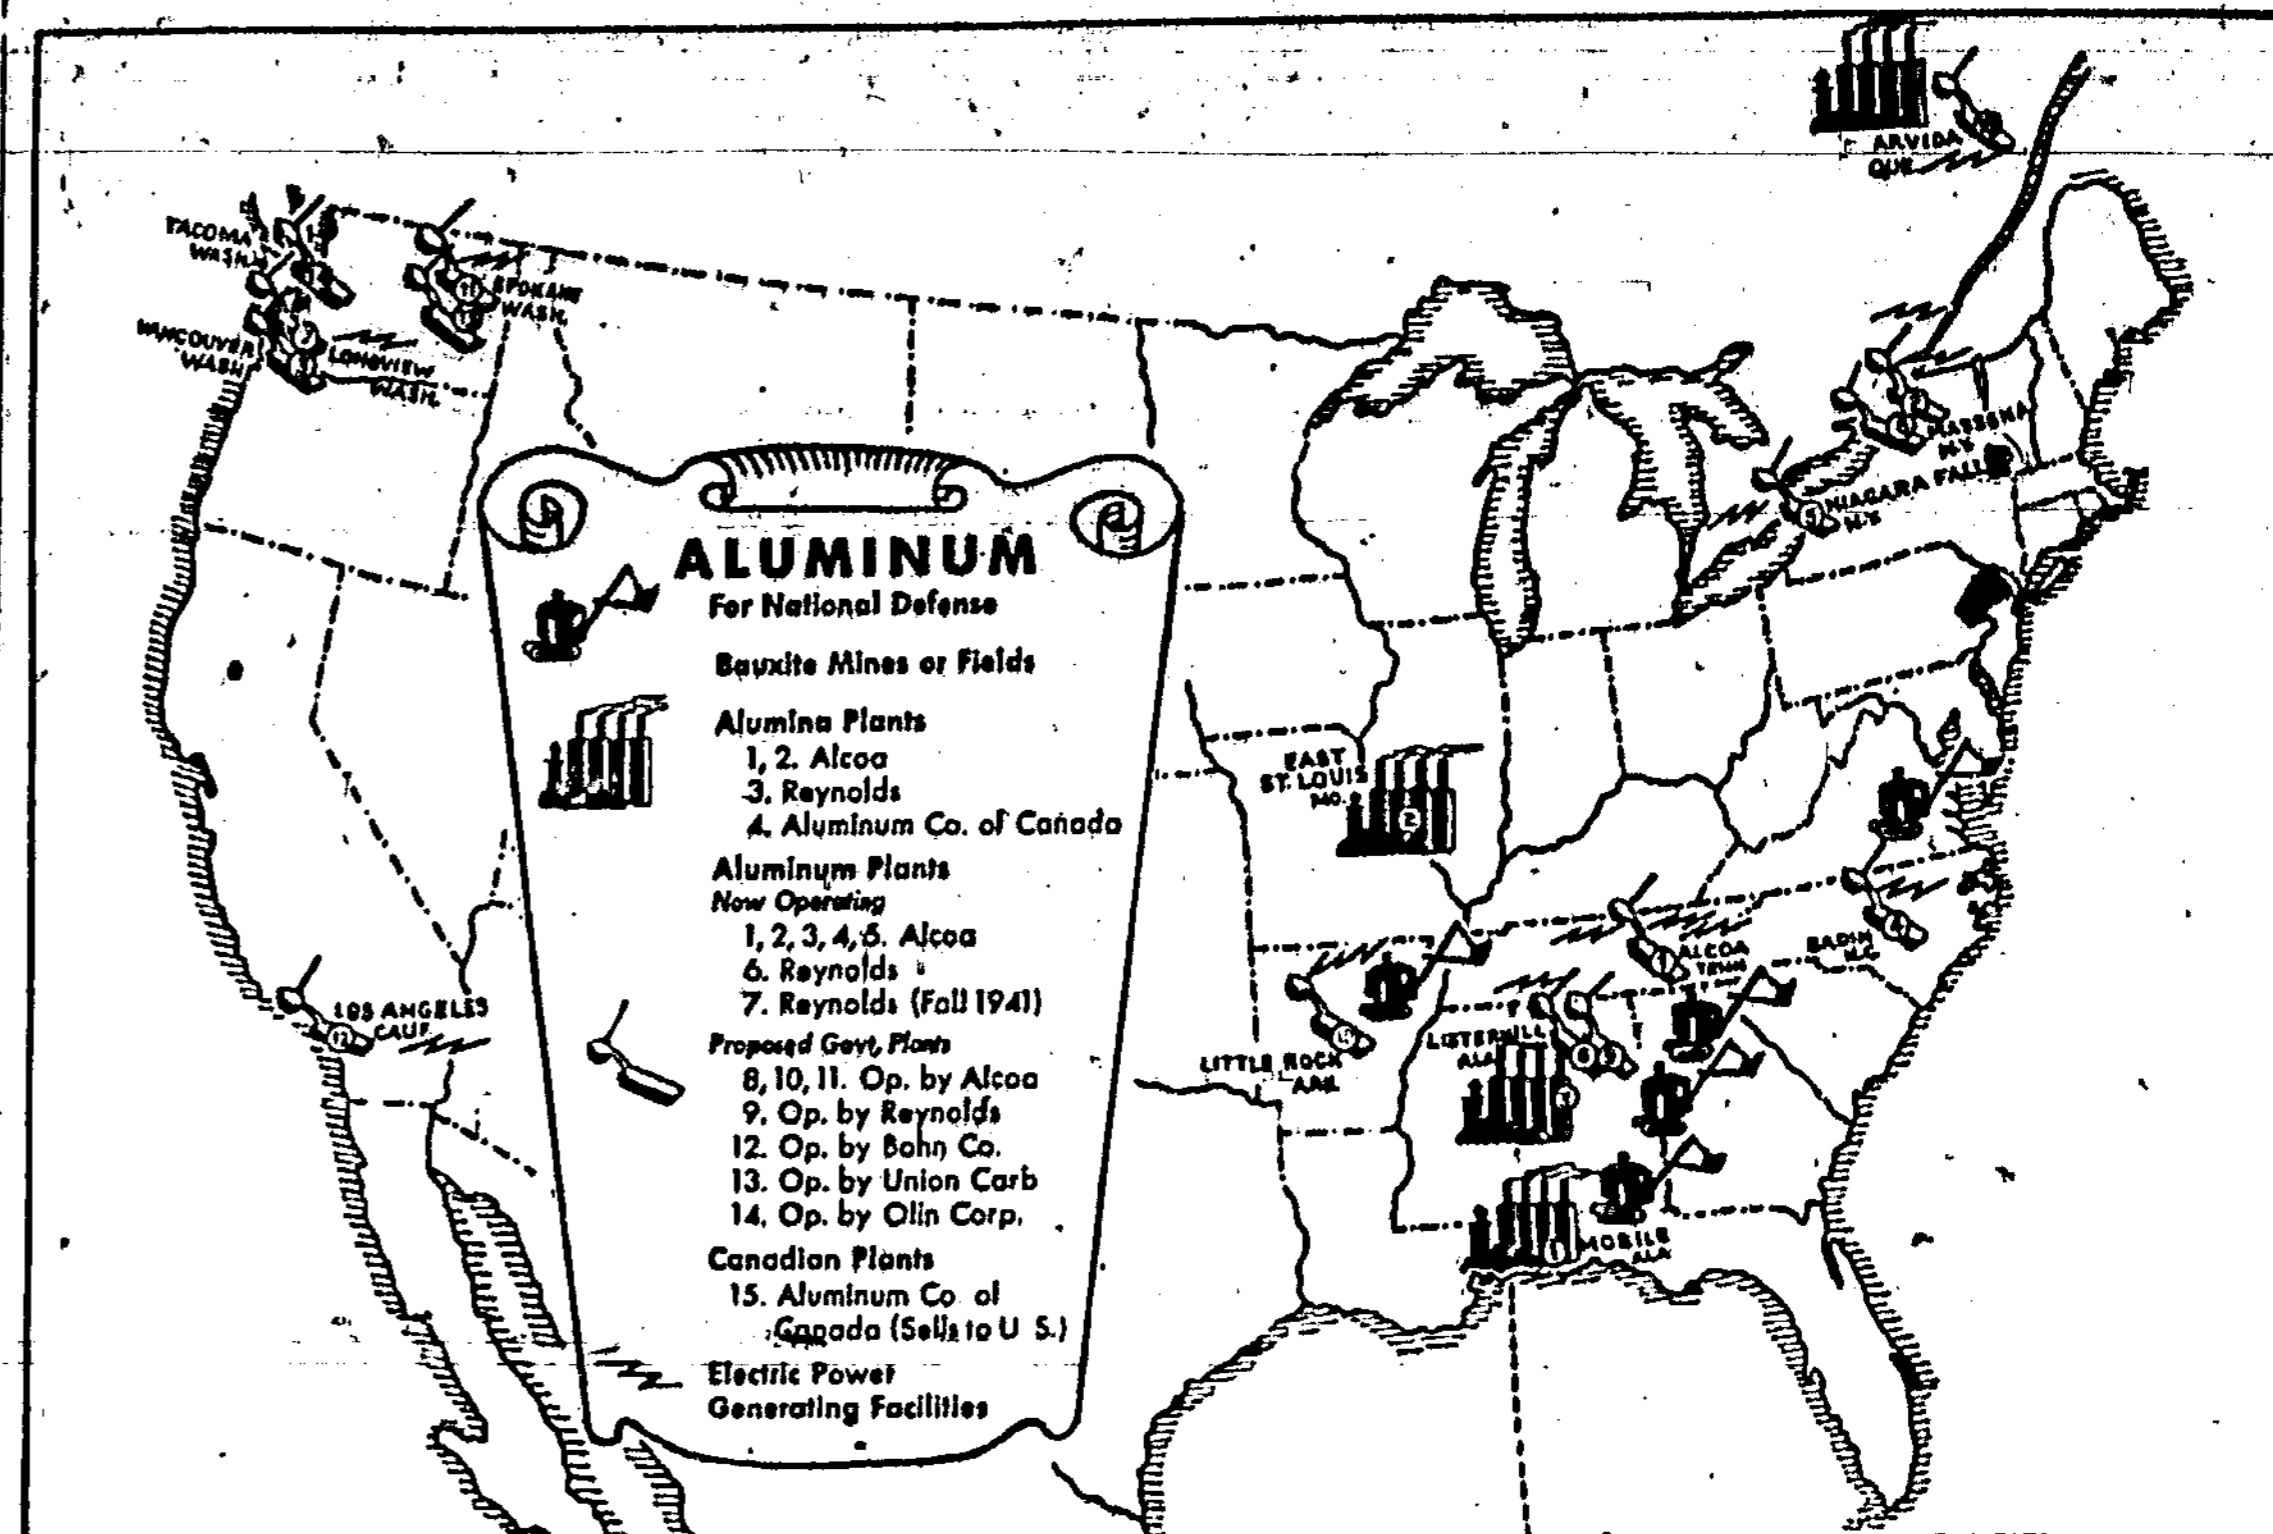

Cork—the stuff you find in bottlenecks—1,000 tons of it—is shown piled up on the deck of the Portuguese ship S. S. Pero De Alenques as she arrived in New York harbor. In addition to the cork, the ship brought 14 passengers. Cargo, exclusive of passengers, is for use in the national defense program.

Welcome to Iceland

The U. S. marines were greeted heartily by the British garrison in Iceland. Among the first official U. S. navy photographs from Iceland is this one showing Private R. C. Fowler of Venice, Calif., being welcomed by Gunner Harold Ricardo of Somerset, England.

Build Huge Plants and Power Dams to Supply 2 Billion Pounds Aluminum for U. S. Defense

William Knudsen, director-general of OPM estimates the U. S. will need an annual production of 1,600 million pounds of aluminum for national defense. Map shows where bulk will be produced. Plants indicated by pouring ladle symbol. Nos. 1 to 5 are now producing at combined rate of 635 million pounds, by middle of 1942 will reach 720 million. Plant 6 produces 40 million pounds, and Plant 7 (nearing completion) 60 million. Proposed government plants will produce in millions of pounds when completed: (8) 150, (9) 100, (10) 100, (11) 90, (12) 70, (13) 60 and (14) 30. Part of Canada (15) production has been contracted for by United States.

New Economic Defense Council

Members of the President's cabinet, and their representatives, hold an organization meeting in the office of Vice President Henry Wallace, forming an economic defense council. Seated, left to right, Henry Morgenthau Jr., Frank Knox, Henry Wallace, Henry Stimson. Standing: left to right, Francis Biddle, Jesse Jones, Dean G. Acheson and Claude B. Wickard.

Draft Wins by 1 Vote

By a margin of one vote, 203 to 202, the house passed the draft extension bill. Photo shows Rep. Andrew May (Ky.) who led fight for passage, and Rep. Dewey Short (Mo.) who lost fight by one vote.

Special to Western Newspaper Union

WASHINGTON, D. C.—What has been happening throughout the United States during the last few weeks would have constituted a phenomenon anywhere but in a democracy.

From Sauk Center to gay Broadway a fellow could take his girl to the swellest dance in town with no more capital than a couple of battered pots and pans. In Oklahoma City, solid citizens drove downtown to hurl their skittles and double boilers at a target painted on the posterior of an effigy Hitler, then let them lie there for Uncle Sam to pick up. In Harrison, N. Y., a dog bit a girl scout soliciting old aluminum from house to house; he was a German police dog, of course. Gypsy Rose Lee, exhibiting rare form (sic), contributed a pan dance. And more than 1,000,000 Americans did their bit in the drive to collect scrap aluminum for national defense.

In a few short months the threat of Hitlerism had brought the light, silvery metal off the kitchen ranges of the nation and dumped it all over the front page. For just as World War I has been described as a war of steel, World War II was rapidly developing into a war of aluminum.

World War I was a static and surface affair, fought from fixed positions. World War II is characterized by lightning-like movements of highly mechanized fighting forces. Airplanes and tanks rule the land, while airplanes and swift, modern battle fleets fight the Battle of the Atlantic.

Eighty to 90 per cent of today's military airplane is aluminum, for alloys of the metal, as strong as structural steel, are only one-third as heavy. Modern tanks use the aluminum for gun platforms, interior fittings and wherever else it can be employed efficiently to save weight and gain maneuverability. Today's battleship uses more than a million pounds—several times as much as the whole city of New York rounded up in the pot-and-pan drive.

Restricted Use.

This explains why you can no longer obtain aluminum for egg poachers, for refrigerator trays, for streamlined trains, hair curlers, bridge girders or chewing gum wrappers. Gone to defend its country, aluminum is needed in quantities the like of which peacetime America never imagined, much less consumed.

The United States' annual military requirements of aluminum when the defense program gets into full production, have been estimated at from 1,200,000,000 pounds to 2,000,000,000 pounds a year and up.

Suppose we take 1,600,000,000 pounds—the estimate of William Knudsen, director-general of OPM—as a fair average. That is twice as much aluminum as the entire world produced only five years ago. It is roughly equal to the entire world production of 1940, notwithstanding the gigantic war machines that were built. In terms more familiar to all of us, it is more than twice as much aluminum as this country has consumed in all its history for cooking utensils and electric refrigerators combined.

What is being done to meet this challenge? A great deal—some of it by private enterprise, some of it by the government, some by the two working together.

The Aluminum Company of America—"Alcoa"—since it was the only producer of virgin (new) aluminum in the United States until this year, was first to get under way with defense expansion. What it has done

is summed up in the recent report of the house military affairs committee on defense progress:

Aluminum Price Decline.

"In 1939 this company finished the year with an inventory of a stock of aluminum equal to the normal requirements for a year. As of the date of April 3, 1939, congress had authorized the navy to build 3,000 planes and the army 6,000. Such a program required no expansion of production facilities, inasmuch as a year's supply of the metal was on hand. However, late in 1939 this company inaugurated a program with additions since made to it calling for the capital expenditure of over \$200,000,000. Instead of an increase in the price of aluminum, as there has been in practically all strategic and critical materials, in some instances as high as 200 per cent, there has been a decline in the price of approximately 14 per cent. All the testimony given before this committee was to the effect that the Aluminum Company of America had given 100 per cent co-operation, had not only used its own money for expansion, but of its own initiative took steps to treble its production." Alcoa by July, 1942, will be producing 725,000,000 pounds annually.

Seven New Plants.

Aided by RFC loans totaling some \$35,000,000, the Reynolds Metals company, long a fabricator of aluminum, this year entered the business of making the metal. At Listerhill, Ala., one of its two plants is already in operation, and at Longview, Wash., another is nearing completion. Together they will make 100,000,000 pounds a year.

OPM is reported to have recommended to the war department the construction of seven new government plants. According to the reports, these would be run by private companies, three by Alcoa, one by Bohn Aluminum and Brass corporation, one by Union Carbide and Carbon, and one by the Olin corporation. These plants would add 600,000,000 pounds a year. The Metals Reserve company, a government corporation, has contracted with the Aluminum Company of Canada to obtain about 750,000,000 pounds, 187,000,000 to be delivered during 1942-1944.

Secondary or reclaimed aluminum (for its metal can in some ways be used over and over again)

will add further tonnage. The pots and pans collected in the recent drive, for instance, cannot be used for making bombers but they might be remelted and used to make army field kitchen equipment or to "quiet" steel, thus freeing other aluminum for airplanes. The steel industry, which burns up one-half pound to five or six pounds of aluminum in the making of each ton of steel, may well consume 100,000,000 pounds next year.

Aluminum, paradoxically, is the most plentiful of all the metallic elements known to man. It is in the clay under our feet, in the rocks high on a nearby hill, in the water we swim in and often in the very food we eat.

Aluminum is never found in the native state, as iron, copper and gold are; it is always locked tight in chemical combination with other elements. Napoleon III, awake to the advantage of light aluminum cavalry equipment would give him over his enemies, offered a fortune to the French scientist who could find a cheap way of producing the metal, which then cost \$545 a pound. But it was not until 1856 that an American youth, Charles Martin Hall, unlocked the secret and paved the way for aluminum at its present price of 17 cents.

Hall's process, still the basis of the aluminum industry, makes use

Forging an aluminum propeller blank. Defense aircraft will require many times the number of aluminum forgings the U. S. consumes in peacetime.

of an electrolytic furnace. This large rectangular pot is filled with cryolite, the "stone like ice," found only in far-off Greenland, but manufactured synthetically in large quantities here. Powerful electric current is introduced into the cryolite, passes through it, heating it to a molten mass, and leaves through the lining of the pot. A white substance like powdered sugar, called alumina (which is merely aluminum chemically combined with oxygen), is dissolved in the molten cryolite. The electric current decomposes the alumina, the oxygen passing off as gas and the then molten aluminum, heavier than the cryolite, sinking to the bottom of the pot. The aluminum is then tapped into ladles and poured into ingot at intervals.

Before the Hall process can be employed many complicated operations must be performed to obtain the alumina. It may be recovered from a number of materials, but it is obtained economically only from bauxite, a mineral which looks sometimes like clay and sometimes like rock and occurs in many combinations of colors. Roughly, four pounds of highgrade bauxite will make two pounds of alumina, which will then make one pound of aluminum. 12 kilowatt hours of electricity are required to make a single pound of aluminum.

History Made on High Seas

President Roosevelt and Prime Minister Winston Churchill of Great Britain, pictured during their historic meeting on the high seas aboard H. M. S. Prince of Wales, at which they joined in a declaration of general war aims which voiced the determination to achieve the "final destruction of Nazi tyranny." The joint declaration, constituting the most concrete war aims yet disclosed on the British side, embodied eight points on which the President and Mr. Churchill agreed to "base their hopes for a better future for the world."

To Wed

Sen. Robert Reynolds (below) is to become the husband of Evelyn McLean, Washington, D. C., heiress, shown above, whose mother is owner of the famous Hope diamond. The 37-year-old senator is chairman of the military affairs committee.

Sweeping Channel for Downed R.A.F. Fighters

Scows in the Straits of Dover as the crew of a high-speed rescue launch makes routine inspection of one of the new R.A.F. buoys which are moored at intervals in the English channel, as havens for downed air fighters. These steel chambers are fitted with warm beds, provisions, medical supplies and a radio to flash word of their occupancy.

Warns Tokyo Leaders

Kaname Wakasugi, Japanese minister to Washington, talked to a Tokyo newspaper from Los Angeles. He said the U. S. was concerned about Thailand, and that Americans "seem prepared with resolution" after arranging to enforce counter-measures against any Jap action.

USDA Develops 150 New Designs in Cotton Hosiery

WASHINGTON.—The U. S. department of agriculture has announced that more than 150 different cotton stocking designs are now available to the hosiery industry as a result of investigation by the bureau of home economics. Several of these designs are in production and more will be soon, now that cotton is expected to be increasingly important.

In an effort to reduce mounting cotton surplus, and in anticipation of a possible shut-off in silk supplies

because of the international situation, congress three years ago appropriated funds to the department of agriculture for investigating the use of cotton for women's hosiery.

David H. Young, textile technologist for the department has developed half-fashioned cotton hosiery designs for every occasion. These vary from cotton-web mesh for evening wear to plain knits in various weights for sports' wear and around the house and garden.

Mrs. Era B. Smith, Editor and Publisher

IN THE PROBATE COURT STATE OF NEW MEXICO,

County of Lincoln. IN THE MATTER OF THE ESTATE OF THOMAS GRIMES, Deceased.

No. 530 NOTICE OF HEARING PETITION FOR DETERMINATION OF HEIRSHIP

TO: ALICE GRIMES CLIFTON, KATE GRIMES BARNETT, and ERA GRIMES BAILEY, and to all unknown heirs of the said decedent, and all unknown persons claiming any lien upon, or right, title, or interest in, or to, the estate of the said decedent, and to whom it may concern:

YOU, AND EACH OF YOU, are hereby notified, and notice is hereby given, that A. A. Rhea has filed in the above entitled Court a Petition for Determination of Heirship, in accord with Chapter 187, New Mexico Session Laws of 1939, and the Court has appointed Monday, the 6th day of October, 1941, at the hour of 10:30 A. M., as the hour and day for hearing of objections, if any there be, to said Petition for Determination of Heirship and for determining the heirship of said decedent, the interest of each respective claimant to his said estate situate in the State of New Mexico, and the persons entitled to the distribution thereof, and to determine, if any, the amount of succession tax due the State of New Mexico.

That the property described in said Petition for Determination of Heirship is:

The East half (E 1/2) of Section four (4) in Township seven (7) South of Range nineteen East (19E) of the New Mexico Meridian, situate in Lincoln County, New Mexico containing three hundred twenty and fifty-seven hundredths (320.57) acres.

The name and postoffice address of the attorney for the petitioner is John E. Hall, Carrizozo, New Mexico.

WITNESS the Honorable Marcial C. St. John, Probate Judge of the said Court, and the seal thereof, this 11th day of August, 1941.

FELIX RAMEY, Clerk. First Publication Aug. 15, 1941. Fourth Publication Sept. 5, 1941.

NOTICE OF HEARING OF FINAL REPORT AND ACCOUNT In the Probate Court of Lincoln County State of New Mexico

In the Matter of The Estate of J. M. Minter, Deceased.

To Attie Minter Pepper, Zetta Minter Brockwell, Young B. Minter, Colgate Minter Hempstead, James Wilber Minter, Mack Duff Minter and Lewin A. Minter and to all unknown heirs of the said decedent, and all unknown persons claiming any lien upon, or right, title, or interest, in or to, the estate of the said decedent, and to whom it may concern:

You, and each of you are hereby notified, and notice is hereby given, that the Administratrix of the Estate of J. M. Minter, deceased, has filed in the above entitled Court her final report and account as such Administratrix, and the Court has appointed Monday, the 6th day of October, 1941 at the hour of 10 o'clock a. m., as the hour and day for hearing of objections, if any there be, to the approval and settlement of said final report and account, and the discharge of the said Attie Minter Pepper as such Administratrix and at the hour on the day named, the Probate Court will proceed to determine the heirship of said decedent, the ownership of his said estate and the interest of each respective claimant thereto and therein and the persons entitled to the distribution thereof.

The name and post office address of the attorney for the Administratrix is John E. Hall, Carrizozo, New Mexico.

Witness the honorable Marcial C. St. John, Judge of the said Court, and the seal thereof, this 18th day of August, 1941.

FELIX RAMEY, Clerk. By Miriam Payne, Deputy.

IN THE PROBATE COURT OF LINCOLN COUNTY STATE OF NEW MEXICO

In The Matter of The Estate of Ysidro Llamas, Deceased } No. 508

Notice of Hearing of Final Account and Final Report and Determination Of Heirship

STATE OF NEW MEXICO TO: Petra Marquez and to all unknown heirs of the said Ysidro Llamas, deceased, and to all unknown persons claiming any lien, right of title or interest in, to, or upon the Estate of Ysidro Llamas, deceased, and to whom it may concern, GREETINGS:

Notice is Hereby Given, that Pablo Marquez, administrator de bonis non of the Estate of Ysidro Llamas, deceased, has filed his Final Account and Report as such with the Clerk of the Probate Court of Lincoln County, New Mexico, and has filed his petition seeking the determination of heirship and for discharge as such administrator, and the Judge of the Probate Court has fixed the 29th day of September, 1941, at 10:00 o'clock A. M. in the Probate Court Room of the Court House at Carrizozo, Lincoln County, New Mexico, as the time and place for the hearing of objections, if any, to said Final Report and Accounting, and that the said Probate Judge will at said time and place proceed to examine and inquire into said Final Report and Accounting and, if found to be correct, will approve the same and discharge the administrator de bonis non and will at the same time and place determine the heirship and ownership of said decedent's estate and the respective interest of each and all claimants thereto or therein and the persons entitled to the distribution thereof as is provided by law.

That A. B. Carpenter, whose post office address is Box 896, Roswell, New Mexico, is the Attorney for the administrator de bonis non.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed the seal of the Probate Court of Lincoln County, New Mexico, on this the 7th day of August, 1941.

Felix Ramey, Clerk of the Probate Court. (P.C. Seal) A8A29.

Service Men

To the men of Lincoln County, whose numbers were drawn in the National Lottery and who are inducted into the Military Services of our country; The American Legion, cordially invites you to avail yourself of every facility of the American Legion and Auxiliary of Post No 11, Carrizozo. We wish to assure you of our heartiest co-operation and the services of this post are offered in any possible way that may be of benefit to you,

Albert Scharf, Commander, By: Dan Conley, Adjutant.

NOTICE

The United States Civil Service Commission announces an open competitive examination for the position of Attendant, for filling the positions of Hospital Attendant, Mess Attendant, Maid, Kitchen Attendant, and related positions. \$1029 to \$1080 a year, for filling vacancies in the U. S. Marine Hospital, Public Health Service, Federal Security Agency, Fort Stanton, New Mexico.

Applications must be on file with The Manager, Thirteenth U. S. Civil Service District, 136 New Custom House, Denver, Colorado, before the close of business on September 2, 1941.

Full further information may be obtained from The Secretary, Board of U. S. Civil Service Examiners, Fort Stanton, New Mexico, or The Manager, Thirteenth U. S. Civil Service District, 136 New Custom House, Denver, Colorado.

Carol Coburn was a "bush-rat's" daughter, who left Alaska for an education. When her father died on the trail she headed back North, where a shadow had fallen on the claim that should have been hers, though she returned primarily to teach in an Indian school.

When the school burned, Carol moved to Matanuska Valley, sub-polar land of promise—the latest American frontier—where the government planned its settlement project. And here against this background of fantastic social experiment, Carol's affairs mount swiftly to climax on climax. Sidney Lander, mining engineer, is in love with her, but is engaged to the daughter of his employer. Still another woman is in love with him. There are, indeed, a few threads to unravel, and the author does it skillfully.

Don't miss this absorbing story of the Far North—

IT'S YOUR MOVE-- Here Are Money Savers

A New Voice Highway for National Defense

Across Nebraska, Wyoming, Colorado, Utah, Nevada and California, work is proceeding rapidly on a new voice highway—an all-cable transcontinental telephone line.

Cable crews are equipped with mechanical plows hauled by large tractors. The cable laying train digs a trench about 30 inches deep, feeds the cable into it and back fills the trench in one continuous operation. Protected against ordinary hazards by being underground, the cable is also insulated against rodents by steel tape wound around the cable making it "gopher proof."

Increased facilities provided by this cable are designed to meet any demands that may arise for communication between centers of industry, railheads, troop concentration points and defense centers from coast to coast.

**State Fair Opens In Albuquerque Sept 21**

Albuquerque, N. M., Aug. 28.—Leon H. Harms, manager of the New Mexico State Fair, today asked exhibitors and prospective exhibitors at the 1941 Fair to observe carefully the closing dates for entries in the various departments, and also instructions in the premium book as to shipment of exhibits to the several department superintendents. Perishable exhibits, Harms pointed out, should not be shipped to the fair until the superintendents are on the ground to receive and care for them, which will not exceed three days in advance of the opening date, September 21. This, he said, should also apply to the division of home arts and sciences horticulture, floriculture, the art department, etc., which call for special care. Exhibitors of livestock and poultry, of course will time their consignments to arrive just in time for proper housing and grooming in advance of the opening day.

While the fair management will open offices in the fine arts building early in September, Harms said, this will be for supervision of construction work and systematizing of the office work well in advance of the big week.

Premium books and entry blanks are available at the downtown office of the Fair, First and Central Avenue. They can also be obtained from county agents in all counties.

The fair manager's statement was made after he had received several inquiries from prospective exhibitors of perishable products and valuable art objects, asking if such exhibits might be shipped to the fair grounds immediately and cared for there.

**120 Attend Ranch Program**

One hundred twenty stockmen attended the county-wide Ranch Program held on the O-Bar-O Ranch August 25.

The program was sponsored by the Extension Service in cooperation with Mr. Tom James, manager of the O-Bar-O ranch.

The day was devoted to discussions of current livestock problems by specialists and experienced ranchmen. During the noon hour a free barbecue lunch was served by Mr. James and a committee consisting of Messrs. Dewey Stokes, Pat Murphy, Guy Dabney and Daniel Brenton.

The program included: Market Outlook for Cattle—H. A. Van Dusen, Vice President Federal Intermediate Credit Bank Wichita, Kansas.

Lice and Tick Control—Steve Brock, of the Extension Service.

Screwworm Control—George Ellis, Extension Animal Husbandman.

Livestock Losses from Poisonous Plants—Dr. A. L. Hershey Botanist, State College.

Feeding Mineral Supplements—L. D. Merchant, Rancher, Capitan.

U. S. Standard Grades of Stocker and Feeder Cattle—George Ellis

Following Mr. Ellis' discussion, the ranchmen were provided with placing cards and took an active part in grading a number of steer and heifer calves.

Carl P. Radcliff  
 County Extension Agent

Mrs. T. E. Kelley, has returned from Albuquerque where she visited her daughter, Mrs. Bryson Corbett and Mr. Corbett, but more especially her little grandson, Kelley Corbett.

**4-H Club Delegates Attend State Encampment**

Sylvia Wilson, Leola Colbaugh, Allie Ruston, and Bonnie Waldrip were awarded the honor of representing Lincoln County and their clubs at the State 4-H Club Encampment held at State College August 14 to 19.

The delegates were accompanied by Mrs. Pallie Dishman, Mrs. George Simpson, Local Leaders, and County Agent and Mrs. Carl P. Radcliff.

Delegates were selected on leadership, ability, and interest shown in 4-H Club work. All but one of the representatives have had five years of 4-H Club work.

Approximately 275 4-H Club Delegates and leaders attended the State Encampment. The program for the Encampment included group conferences on clothing, handicraft, health, wildlife conservation, and livestock. Other activities included tours, demonstrations, special assemblies, and planned recreational programs.

Mr. and Mrs. R. C. Stinnett and little daughter, Sherrie Ann have gone to Albuquerque with a view of locating there permanently.

**WANTED:** The password to England's \$2,000,000,000 "Ali Baba's Cave." Piled up in England's vaults are hoards of gold and treasure, unclaimed for years, and a British lord, claiming it could win the war, wants somebody to say "Open Sesame," and set it to work against Great Britain's enemies. Read of his surprising proposal in the American Weekly, the magazine distributed with next week's Los Angeles Examiner.

### FIRST AID to the AILING HOUSE

by Roger B. Whitman

(© Roger B. Whitman—WNU Service.)

**Cleaning Metallic Cloth**  
A FREQUENT question this season has been on the cleaning of tarnished metallic cloth, usually called lame. Several methods have been proposed by correspondents who have used them successfully. One is to "cover with powdered magnesia, roll up in paper for an hour and then brush with a stiff brush." Several have had good luck in washing lame, especially collars and cuffs, with flakes of pure soap in cool water. "I have washed mine several times and they have always come out like new," says one correspondent. Another adds that "the material must not be wrung out, or creased after washing; just dipped up and down to rinse, rolled in a bath towel and ironed while damp." A third method is to immerse the metallic cloth in clean naphtha, being careful of fire, and using a stiff nailbrush or kitchen brush on the tarnished parts while in the naphtha. A friend who has had experience in dramatic work revives metallic cloth with dye, intended for tinting, to be had at a drug store. "Tarnished gold lame looked a more expensive weave after treating with a red dye. Silver lame came out beautifully after blue dyeing. The dyeing of the non-metal part of lame seems to mask the tarnished strands."

Tarnishing of metallic cloth can be checked or prevented by keeping it as much out of contact with air as possible. One favorite way is to wrap it in black tissue paper; another is to keep it in closed garment bags.

**Broken Mirror**  
Question: My wife's dresser is trimmed with a three-inch strip of mirror. At one corner this mirror broke and several small pieces have fallen off, as a result of slamming one of the drawers. The mirror is about one-quarter inch thick and the pieces are fairly heavy. Can you suggest a good cement or glue to put these pieces back on again?  
Answer: No glue or cement will keep the mirror in place permanently. The vibration of opening and closing the drawers plus the weight of the plate glass would soon loosen the pieces. A new strip of mirror would look better and will not cost much to put in place. Any local mirror works can supply it. See your classified telephone directory.

**Damp Walls**  
Question: Our house is 10 months old. Wet spots appear on the plaster on the chimney wall, while upstairs there are spots at the ceiling line and below it. The construction is plaster on brick. How can we make our walls dry?  
Answer: As your house is quite new, it is probably still drying out, and if so, the wet places will disappear by themselves. Plaster applied directly to brickwork is likely to be cold, so that condensation will occur should the house air be heavily humidified. All gas burners should be connected with flues to carry the vapors outdoors.

**Paint on Cherry Stain**  
Question: I have a room finished in dark cherry stain and varnished. I want to refinish it in ivory enamel. What can I use to keep the stain from bleeding through?  
Answer: Use two coats of top quality orange shellac, thinned with good denatured alcohol, in the proportion of three quarts of alcohol to the gallon of shellac. For extra sureness, put a coat of good aluminum paint on the shellac.

**Stained Ceiling**  
Question: A year ago my upstairs ceiling was stained by a leak in the roof. The leak has been repaired, but the stains still show. What can I do to remove this unsightly effect? The finish is cold water paint.  
Answer: To get rid of the spots, scrape off the finish to the plaster and then apply two coats of aluminum paint. This, of course, will be covered when the ceiling is refinished.

**Salt Water for Concrete**  
Question: Can cement be mixed with salt water, and what effect would it have?  
Answer: Pure fresh water should be used for mixing concrete. There have been occasions when sea water can be used for mixing, but extraordinary precautions must be taken to see that the water was absolutely free of organic matter. Use fresh water for a good concrete job.

**Leaking Bird Bath**  
For mending cracks in a bird bath I have recommended dense portland cement. A friend has had good results with caulking compound, such as is used to fill the joint between window frames and walls. He did not even widen the crack, and the repair made a year ago is still tight. Caulking compound is useful stuff.

## Woolknits, Jerseys, Gay Plaids 'Big Three' Campus Wardrobe

By CHERIE NICHOLAS

THIS is the home-from-vacation time of the year and "so what"? There's no guess work about the answer. Throughout shopping districts from coast to coast the very air is vibrating with the message of a wild "rush" in pursuit of clothes such as go to make up the perfect campus and classroom wardrobe for Miss Collegiate and her pert little sister, who must answer "present" when the back-to-school role is called.

Campus clothes collections are so intriguing this fall it is going to be difficult to arrive at actual choices. After you have window chopped and looked to the limit, the better part of wisdom is to calmly and deliberately take time off to go into conference with yourself. To think it through with the aid of notes you jotted down as you meandered through miles and miles of aisles and aisles of sports clothes sections, dress shops and departments, millinery displays and so on.

Sitting it through you'll find that all signs point to woolknits, also handknits, jersey dresses and gay plaids (especially smart for suits) playing the role of "Big Three" in a college girl's wardrobe. Invent in a woolknit two-piece, a plaid suit that has the "new" look silhouette. Add a jersey dress cut along a pattern of chic simplicity as expressed in the new drop shoulders, deep armholes and sleeves cut in one with the yoke (see illustration) and you will be started in the right direction toward a wardrobe that will serve you faithfully throughout your fall and winter campus career.

A new day of triumph is dawning for knitted fashions. Sweaters especially were never more attractively designed and varied in mood. Plan to buy several sweaters for they are so versatile they tune to

every occasion, from most formal to most informal and sports.

The new woolknits are simply amazing. One of the big favorites is the trim swank jacket suit that looks as if it had been expertly tailored of a stunning wool weave. Once try on a woolknit jacket two-piece and instantly you will be making an inroad on your clothes allowance to the extent of the amount on the price tag. There is a great deal to be said for woolknits "as is" these days. Their production has been so perfected they neither stretch nor sag and they are styled to the 'nth' degree of chic and charm.

See the charming machine-knit dress shown to the left in the illustration. This casual two-piece of gold nubby wool chenille yarn has all the appearance of a "classy" exclusive handknit. Its only trim is the knotted plastic buttons and crescent bordered pockets. With it is worn a new and flattering handknit hat made of bows that stand up behind a pompadour, the bows attached to a band of the same hand-knitted yarn. The accent on knitted and crocheted hats and trimming details on wool dresses is "strong" this season.

Jersey for this, jersey for that, jersey for everything from hats to dresses and blouses is a trend that is bringing vast influence to bear as to what must be included in every well-ordered wardrobe of schoolgirl and college miss. For office wear, unrinkable, unstretchable jersey is regarded as the ideal fabric. The jersey dress pictured to the right is designed on a pattern of simplicity that's news for fall of 1941. Smooth "dropped-shoulder" with elongated molded midriff, accent on hips are examination points of high fashion that point to a definitely new silhouette for this casual gray jersey frock. The plaid suit in the oval also announces a silhouette so new and "different" it is sure to intrigue the interest and fancy of every style-conscious school-faring maiden. (Released by Western Newspaper Union.)

### Plaid Ensemble

Every little girl starting out to join the fall and winter style parade will be wanting a cunning little plaid ensemble that teams a Stuart plaid kilt with a matching plaid tam o'shanter as pictured here.

The idea of a little jumper skirt that can be worn with a change of blouse each day, will delight mother, for it solves the problem of sending forth little daughter each morning to school looking as "fresh as a daisy" and quite picturesque too with a wee bit of Scotland injected into her costume.

### Brown Outstanding Color for Autumn

If in doubt, choose tones of brown for your color lead in assembling a new autumn wardrobe. With brown as a basic color, you will make no mistake. Opening displays put the emphasis on brown suits, brown dresses, brown fur coats and brown furs as trimming on cloth coats. The milliner, the jeweler and the glove maker have all joined in the brown fashion crusade this fall.

With the now-so-fashionable beige and biscuit colors you will find thrilling schemes that call for accessories in the new browns. The new topaz and amber jewelry is especially attractive. It will be very much in the foreground this fall. Brown leather buttons and beltbuckles match the new brown gloves and many sports hats are now trimmed with brown suede or smooth-finished leather.

### Sweaters Very Fanciful For Modern School Girl

It is the opinion among enthusiasts on the knitted theme that a girl starting to school should take along at least six sweaters. And there's a reason. Sweaters this season cover the entire field of both utilitarian and social needs. Then too, not only is there a sweater for every occasion but the new sweaters are simply irresistible, having taken on intriguing detail that is fascinating. You will find the new sweaters made very fanciful with wool fringe trimmings, little dangling yarn ball treatments. Then there are quilted effects, wondrously achieved, and plaid patternings and color contrast with bright yokes, sleeves and banded sections. Formal sweaters have flattering décolleté treatments and sparkling embroideries.

## PATTERNS SEWING CIRCLE

8967

THE new style the young jitterbug fans are looking for. They like the wide gathered skirt, the snug waistline which flattens the tummy in front, and the frout-frout, feminine collar with the large bow. Be first to make this new style and wear it among your own

crowd. Dotted voile, dotted satins, polka dot crepes and novelty tafeta are materials they are using.

Pattern No. 8967 covers odd sizes 11 to 19. Size 13, short sleeves, takes 4½ yards 35-inch material, ¼ yard contrast for collar and bow. Finish with 1½ yards machine made ruffing. For this attractive pattern, send your order to:

### Prolific Insects

Every season the white ant or termite proudly produces a million baby termites to swell the world's ant population. Toads and frogs both have large families, the former in the neighborhood of 6,000 at a time, and the latter half that number.

Snakes are three to four times as prolific as rabbits, for whereas the latter rarely produce more than a dozen baby rabbits at a birth, a snake often produces 40.

The king of the jungle, Lord Lion, is usually the proud father of quads, and his hereditary enemy, the tiger, can boast of the same number. Finally, the elephant, last descendant of the prehistoric monsters, rarely has more than one baby elephant at a time.

If you have any doubt about what to give a man in any of the nation's military or naval services, send a carton of cigarettes or a pound tin of smoking tobacco. Tobacco rates first as a gift with them. And when you check up, actual sales records show that in Army, Navy, Marine Corps and Coast Guard service stores (where the men buy their own) Camels outsell all other cigarettes. It is well-known that Prince Albert Smoking Tobacco is the "National Joy Smoke." Local tobacco dealers are now featuring Camel cartons and pound tins of Prince Albert Smoking Tobacco as number one gifts for men in Uncle Sam's services.—Adv.

## HOUSEHOLD TIPS

Colorful appetizers may be made by steaming dried fruits about 15 minutes and topping with well-seasoned cream or grated American cheese.

Add raisins to your conserves, jams and chutney to give them pleasing chewiness.

Chopped salted peanuts mixed with a little dark brown sugar give a crunchy coating to finger-lengths of cakes or to date, raisin or coconut sticks. Try this next time you are fixing up a trayful of "goodies" for your tea table.

To prevent silk dresses from slipping off wood and iron coat-hangers, paste or sew a piece of velvet on each end of the hanger.

### U. S. Voters

The census bureau estimates that there are 60,520,000 American citizens eligible to vote. The total number of persons 21 years of age or over, however, is 64,170,000, but 3,200,000 are aliens and 450,000 maintain their residence in the voteless District of Columbia.

Counted in the voting eligibility figure, but who are non-voters because of illness and because they have forfeited their voting privilege are the 563,321 occupants of our mental institutions, and the 161,000 members of America's prison population.

### Local and Personal

Mr. and Mrs. Herbert Harden of El Paso have moved to Carrizozo. Mr. Harden is third trick operator for the S. P. They will live in the Reil cottage formerly owned by Lloyd Vigil.

Judge M. G. St. John visited Capitan friends Sunday.

Mr. B. L. Stimmel is up and around after his long illness.

Born—To Mr. and Mrs. Burnett Means, Friday night, August 22, a 9 1/2 pound girl. She is named Joy Ann.

America's answer to the dictators is a declaration of national emergency. Buy Defense Savings Bonds and Stamps to build our defense.

America faces an emergency! Every Citizen is urged to assist to the utmost of his ability by buying Defense Savings Bonds and Stamps.

Civic, Fraternal, and social organizations can invest organization funds in Defense Savings Bonds, Series F and G.

It is an unfortunate fact that a good many politicians are still working on the assumption that the government might as well finance practically everything, and go into the banking and loan business on an almost unlimited scale. That attitude was responsible for the gigantic debt we built up before there was any need for a multi billion dollar defense program. And that attitude, if it is reflected in government policy now, could bankrupt the country.

The plain fact is that the government should not finance a single endeavor which can be financed with private capital. Government has plenty on its hands as it is, no one else can pay for battleships and airplanes and armies. But the regular banking channels of this country are eager and ready to finance almost any kind of industrial activity. They'll do it with private money, not tax money or deficit money.

At best, the national debt will reach staggering proportions, and if the pork barrel spenders have their way they will ruin us. "Money for anything and everything" is one government policy we can no longer afford.

### Boy Ignores Hurts To Warn of Bomb

#### English Youth Proves Self Made of Hero Stuff.

ENFIELD, ENG.—If an appropriate medal is not struck bearing the name of Norman Horry, Enfield folk are going to be disappointed; for to them 15-year-old Norman is a hero in the truest sense. But judge for yourself.

Anxious to render some service to his country in the present emergency, Norman became a messenger in the wardens' service at Enfield, England. He had put in several successive nights of hard work, and just after one o'clock in the morning, in a lull between the cracking of guns and the falling of bombs, Norman was told to "beat it" for home.

He did so, and on his way was thrown to the ground as a result of a violent explosion. His collarbone was fractured, and a piece of shrapnel penetrated his shoulder.

It was a "dud" snell which had fallen, but Norman, thinking it was a bomb, and fearing for the safety of residents in the locality, ran, not for the first aid clearing station, which was only a short distance away, but to the A. R. P. post, to report on the explosion.

At the post it was obvious Norman had been severely injured. His raincoat was saturated with blood, as was his suit. Actually a piece of shrapnel weighing several ounces had gone through his shoulder and embedded itself within one-eighth of an inch of his spine.

But while awaiting the ambulance to take him to hospital, he made light of his suffering and laughed and joked as he always does. His farewell to his chums as he was rushed off to hospital was "I hope the people in those houses are all right. I shall be back on the job again tomorrow."

No wonder the doctor who attended Norman remarked: "No harm can come to Old England as long as there are boys of this type."

Happily, the operation on Norman has proved entirely successful, but it will be some time before his is back on duty. In the meantime he is keeping his chin up and helping all the other patients in his ward to do the same.

### Unlocked Home of Lock Collector Has 588 Locks

MANSFIELD, OHIO.—Paul Harter has 588 locks in his home but not one on its doors.

Harter collects locks. He has locks from China, Germany, France and every corner of this country—big ones, little ones, old ones, and the latest models.

He makes friends with farmers, antique-shop owners, locksmiths and junk dealers to get them. And he also is on good terms with policemen; because they know the locksmiths in town.

Harter frequently takes trips to distant parts of the country and on these journeys he's always on the lookout for old and interesting locks.

He has one old padlock that requires two keys to open it—one for the top and one for the side. Another was carried through the Civil War by a member of Stonewall Jackson's brigade. A third has a small protective pad over the keyhole. Harter learned that when the lock was in use, in an old distillery, a small seal was placed under the pad and over the keyhole to show when the lock had been tampered with.

### Whistle of Train Lures Baby, Mother to Death

GASTONIA, N. C.—A funeral bell and not the locomotive bell that he liked so well tolled for 16-month-old Lawrence Chavis and his mother. Lawrence, so the neighbors said, liked to watch the train roar by his home; he'd cock his head when the bell rang and imitate the whistle.

He apparently decided that such a friendly thing as a train wouldn't hurt a little fellow. So while his mother was busy with the housework, he slipped away and headed for the tracks.

His mother saw him there, saw the train bearing down upon him. Screaming, she ran to his side, threw her arms about him and there they died together.

### Attention to Layers Pays With More Eggs

Successful New Mexico farmer-poultrymen pay nearly as much attention to the way they feed their pullets and laying hens as they do to the kind of feeds they provide, reminds E. E. Anderson of the New Mexico Extension Service.

Important too, is sufficient hopper space, lest the more timid birds in the flock go hungry. At least 10 linear feet of hopper, with hens eating from both sides, should be provided per 100 laying hens, and a sufficient length of watering trough or number of containers to prevent crowding.

One practice followed by many of the better poultrymen is to provide only a little more feed each day than the birds clean up. The left-overs, if clean and dry, can be mixed thoroughly with the fresh feed in the hoppers. In this way, there will be no accumulation of stale feed at the bottom of the hopper, reducing likelihood of mold.

Feed mixtures containing fish oil, as sources of vitamin-A or-D, should be bought or mixed in small quantities so that they can be used within 10 days or two weeks.

With egg prices good, New Mexico farmers should find it to their advantage to provide the right combination of high quality feeds, and provide them in a way that will make for maximum growth and egg production, Mr. Anderson states.

### Reduction of Property Tax

Santa Fe - August 26, 1941—Despite the \$750,000 defense appropriation made by the 1941 legislature, it has been possible to reduce the property tax rate for state purposes, Chief of the State Tax Commission, Paul B. Harris has announced. This is unusual in a bye year in elections. The levy for this year is 6.05 mills in comparison to 6.20 for the past year.

Describing the state's financial condition as excellent, Harris said the reduction was made possible by not having to make any provision for interest and sinking funds. With the state finishing the past fiscal year in the black, for the first time in many years, no levy was required for casual certificates of indebtedness. The decreased state purposes levy includes a half mill for defense purposes.
