NOTICE

The regular Lincoln County Singing Convention will convene at Tinnie the 4th Sunday, March 23, and Saturday, March 22nd; the night before.

Every one is invited to attend and bring basket lunch for dinner on the ground Sunday noon.

The Stamps-Baxter quartet and the James and Vaughn quartet of Lubbock, Texas, will be there.

Colonel Jones, Pres.

Mrs. Mae Jordan and daughter Elizabeth and Mrs. Evelyn Dixon and two daughters left yesterday morning for Santa Fe, where they will visit Mr. and Mrs. Johnie Jordan and attend the District Basketball tourney.

KNOW YOUR BANK

The Trend in Bank Service

THE objective of banking in the past decade has been to extend banking service to the greatest possible number of people. To that end banks have made loans available to a greater number through personal loans, and through the financing of automobiles and household appliances. They have made it possible for a greater number to have the advantages of a checking account through the installation of a plan of making moderate charges to pay for the service rendered and not requiring any particular amount of balance. These and many other services are offered to the American public today. We have services in this bank which can be used by everyone. We invite you to come in and let us explain them to you.

Boy Ignores Hurts To Warn of Bomb

English Youth Proves Self Made of Hero Stuff.

ENFIELD, ENG.—If an appropriate medal is not struck bearing the name of Norman Horry, Enfield folk are going to be disappointed, for to them 15-year-old Norman is a hero in the truest sense. But judge for yourself.

Anxious to render some service to his country, in the present emergency, Norman became a messenger in the wardens' service at Enfield, England. He had put in several successive nights of hard work, and just after one o'clock in the morning, in a lull between the cracking of guns and the falling of bombs, Norman was told to "beat it" for home.

He did so, and on his way was thrown to the ground as a result of a violent explosion. His collarbone was fractured, and a piece of shrapnel penetrated his shoulder.

It was a "dud" shell which had fallen, but Norman, thinking it was a bomb, and fearing for the safety of residents in the locality, ran, not for the first aid clearing station, which was only a short distance away, but to the A. R. P. post, to report on the explosion.

At the post it was obvious Norman had been severely injured. His raincoat was saturated with blood, as was his suit. Actually a piece of shrapnel weighing several ounces had gone through his shoulder and embedded itself within one-eighth of an inch of his spine.

But while awaiting the ambulance to take him to hospital, he made light of his suffering and laughed and joked as he always does. His farewell to his chums as he was rushed off to hospital was "I hope the people in those houses are all right. I shall be back on the job again tomorrow."

No wonder the doctor who attended Norman remarked: "No harm can come to Old England as long as there are boys of this type."

Happily, the operation on Norman has proved entirely successful, but it will be some time before he is back on duty. In the meantime he is keeping his chin up and helping all the other patients in his ward to do the same.

Unlocked Home of Lock Collector Has 588 Locks

MANFIELD, OHIO.—Paul Harter has 588 locks in his home but not one on his door.

Harter collects locks. He has locks from China, Germany, France and every corner of this country—big ones, little ones, old ones, and the latest models.

He makes friends with farmers, antique-shop owners, locksmiths and junk dealers to get them. And he also is on good terms with policemen; because they know the locksmiths in town.

Harter frequently takes trips to distant parts of the country and on these journeys he's always on the lookout for old and interesting locks.

He has one old padlock that requires two keys to open it—one for the top and one for the side. Another was carried through the Civil War by a member of Stonewall Jackson's brigade. A third has a small protective pad over the keyhole. Harter learned that when the lock was in use, in an old distillery, a small seal was placed under the pad and over the keyhole to show when the lock had been tampered with.

Local and Personal

Mr. and Mrs. Kennedy of Jicarilla were business visitors here Wednesday.

Mrs. J. J. Hoffman has been quite ill of influenza since last Sunday.

Mrs. W. W. Smith was in El Paso last Sunday to visit her new grandson.

Born—To Mr. and Mrs. Paul Hildebrand of El Paso, Sunday morning March 9, a son. Mrs. Hildebrand was formerly Miss Lorena Smith of White Oaks, daughter of Mr. and Mrs. W. W. Smith.

Members of the local Odd Fellows lodge, who went to Alamogordo last Monday night to assist in conferring the degree upon two candidates were Messrs. Jim Tan, Glen Dorsett, C. Carl, Herman Kent, of Carrizozo and Roy Kent of Oscura. Odd Fellows are asked to be present at the regular meeting here Tuesday night. Business of importance.

Mrs. Roy Richard and niece, Miss Hilka Ann Barnett, were Alamogordo visitors last Sunday.

Mr. and Mrs. Jack Graves of Nogah have moved to Carrizozo to live. Mr. Graves is employed at the Harkey Lumber Co.

Mrs. O'Dell Baker and Robert Hemphill spent Monday and Tuesday in El Paso.

1941 SENIOR CLASS ROLL

Commencement is just around the corner. Following is the Senior Class roll:

Ralph Pruett, Mabel St. John, Tom Jones, Morris Akorn, Duane Chancellor, Trinidad Martinez, George Sanchez, Shirley Rea Phipps, Bradley Moberly, Nina Norris, Henrietta Degner, Isidro Muniz, Allan Beck, Joseph Forsythe, Kathleen Smith, Henry Burton, Joe Phillips, Violet McDaniel, John Allen Hightower, Josephine Dow, Oleta Drake, Gene Hines, Walton Wilson and Milton Huffnager.

Industry and Defense

It is no idle statement, and the public no longer needs proof of the same, that American industry has cooperated magnificently in the defense program. Both the President and William Knudsen have praised the work of those who are at present co-operating and the spirit of those who have as yet found little they can do.

In particular regard to the latter there is a current activity planned this long time and lately brought into being by the National Association of Manufacturers, which gives them a chance at aiding in defense activity.

The association has originated and asked local aid in pushing a survey inventory of American industry. This survey may be of vital importance. The office of production management count, heavily upon its work will be to record every square inch of industrial capacity now in use and the possible maximum of that capacity.

Here is real service on the part of industry and such gives an idea of the intelligent way they are going about their task. Nothing haphazard here, nothing left to chance. The survey gives ample indication why the problem of mass armament procurement is best left to the skilled hands of industry itself.

School Notes

The Senior play last Friday evening was a great success. The proceeds, after all expenses were paid was \$104.80.

The Carrizozo Country Club Party last Saturday evening was a help to Basket Ball Team went over in elaborate style. After all bills were paid there remained a neat gift to the team of \$92.00 cash.

Prof. James Ryan and Mr. Carpenter attended a District Boy Scout Meeting Monday evening in Fort Station. Thirty good scouts were present and much interest is being developed in the movement of Boy Scouts of America.

Miss Dorothy Conley, who holds a Bachelor of Science also Master of Arts degree from Pittsburg State Teachers College, arrived Monday to take charge of Department of Mathematics in our High School. She comes to us most highly recommended and her pleasant disposition with keenness of intellect is winning a large place in the lives of her students.

Coach Wood and his ten basket ball boys left Wednesday morning for State Basket Ball Tournament in Santa Fe. Several sport fans have left since then to help our team mount the rounds which lead up the ladder to Championship.

Senator Krannawitter of Vaughn has been extended an invitation to give Commencement Address this spring.

Mr. Geo. Joyce custodian of Buildings and Grounds, took a load of Basket Ball Boys to Santa Fe, Wednesday. Mr. Myer Barnett took over the full duties of Custodian during Mr. Joyce's absence.

NOTICE

Chief Machinists Mate Harold V. Beckwith of the U. S. Naval recruiting service was in Carrizozo last Monday to accept recruits — young men from 17 to 31. The naval expansion program will give opportunity equal to any trade school. Mr. Beckwith will be in Roswell at the postoffice on March 17, 18 and 19th, for the purpose of conducting physical examinations and accepting applications for enlistment. Even though the men have been drafted for the army they can join the navy by getting deferment date from the draft board. Educational opportunities are wonderful in the navy.

VOLUNTEERS ACCEPTED

Men who have become 21 years of age since October 16, 1940, are not required to register for Selective Service training unless or until another registration day is proclaimed by the president. Nevertheless, they can volunteer.

This announcement was made today by Colonel Russell C. Charlton, Director of Selective Service for the state of New Mexico, because of numerous inquiries being received at State Headquarters and by local boards.

Mrs. Gutknecht left Monday last week for her home in Chicago. She went by the way of Kansas City where she intends to spend a week with her sister, Mrs. Charles Caplin and family.

PICTURE THIS SERVEL IN YOUR KITCHEN

It's A Woman's Dream Come True!

Look at that big, beautiful refrigerator! It's identical in every respect to the Servels used in the city! Wouldn't you like to see it standing in your kitchen right now? Think of the convenience it would mean to you... the savings it would bring. New Conveniences, Savings Possible. Think what a joy it would be to have plenty of ice cubes always ready at your elbow in the kitchen... of being able to make cold drinks, ice cream, cool, crisp salads whenever you wanted them... to be able to keep the frozen foods as long as you wanted to.

Servel's perfect, constant-temperature protection keeps food fresh for days... means savings of meats, fruits and vegetables. Through less food spoilage, being able to buy more at a time at lower quantity prices without risk of waste, to take advantage of market specials, to save leftovers—you can save enough on your monthly food bill alone to pay for your Servel.

In addition to these savings... it costs less to run a Servel than to buy ice. And don't forget the time, money and inconvenience you'd save if you life far from town and have to drive in for ice!

Most Convenient Servel Ever Built! This is the most beautiful, the most convenient Servel ever built! There's loads of room inside for everything you want to store... and the interior equipment may be arranged and re-arranged to suit your every need.

There's an automatic interior light... a cold indicator... a panel temperature control... an easy-to-clean porcelain interior... and many, many other features.

No Other Refrigerator Like It! But the best feature of all is Servel's own, exclusive freezing system with no moving parts.

More than 1,600,000 Servels have gone into service in American homes... and thousands beyond the gas mains just like yours. Many families still use the first models they bought 14 years ago, in 1927, and find them still silent, economical, efficient.

It will pay you to look at a Gas Refrigerator today. Telephone us and we'll see that you are provided with more complete information... See it at Carrizozo Hardware Co.'s Store.

Popular Couple Wed.

Miss Johnnie Joann Bell became the bride of Mr. Dimmitt Bond at an impressive ceremony performed in Roswell, by the Rev. Le Roy Thompson on St. Valentine's Day, Feb. 14, 1941. Mr. Bond is an energetic and successful young ranchman of Corous, and Mrs. Bond is a popular teacher at the Stetson school, near Hondo. Both these young people are highly regarded and have many friends who wish them happiness. At the close of Mrs. Bond's school they will reside at the groom's ranch home at Corona.

Dr. Fred R. Baker of San Angelo, Texas has notified friends here that he will not make his usual trip to New Mexico, as he is kept busy checking the eyesight of the men at the big airfield, and training station, at his home.

Jo Ann Karr

Jo Ann Karr, age 10 years, little daughter of Mr. and Mrs. Thomas Karr passed away at the Turner hospital yesterday morning about 8:30. Jo Ann had been ill of heart trouble for more than a year, and for weeks her little life had been trembling in the balance. All that skill and expert care could accomplish was done, but to no avail.

She was a beautiful child, with a brilliant mind, and very, very sweet. She had many devoted friends, not only among her little class mates, but among adults who came in contact with her.

She is survived by her parents, Mr. and Mrs. Thomas Karr, and a little brother, in her immediate family; also her paternal grandparents, Mr. and Mrs. H. K. Karr of Brooklyn, Iowa, her maternal grandmother and several aunts, uncles and other relatives.

Funeral services will be held at the Methodist church this afternoon at 2:30, and tonight the remains will be sent to Brooklyn, Iowa for interment.

Hall-Brazel

Miss Juanita Hall and Mr. Jack Brazel were united in marriage at Carlsbad, N. Mex., on Tuesday, February 26th, 1941, at the home of a friend of the bride. The Rev. Goodwin of Carlsbad pronounced the marriage vows.

The bride is an attractive young lady, whose home was Clairmore, Oklahoma until recently. She is accomplished and friendly.

The groom is a son of Mrs. Anna Brazel. He was born and reared in Lincoln county and has a host of friends who wish him well and extend congratulations. They will reside in Carlsbad.

The STRUMPET SEA

By

Ben Ames Williams

Here's a story in which love and lust, jealousy and greed, come to grips on an old whaler, homeward bound. You'll be thrilled by this vigorous sea yarn. It's one of Ben Ames Williams' best.

WHO'S NEWS THIS WEEK

By LEMUEL F. PARTON (Consolidated Features-WNU Service.)

NEW YORK.—Robert A. Lovett, New York banker and World war flying ace, gets the news spotlight as a possible aviation production czar, after two months' service with the war department in which he has shown extraordinary capacity for slashing red tape and getting things done. His father, Judge Robert S. Lovett, was head of the war industries board in the World war.

When he was summoned by the war department, Mr. Lovett withdrew from the New York banking firm of Brown Brothers, Harriman and Co. A few months earlier, the also comparatively young James V. Forrestal, Mr. Lovett's friend, and bracketed with him among the up-and-coming young financiers, left the presidency of Dillon, Reed and Co. to become undersecretary of the navy. Years before, their Wall Street running mate, Averill Harriman, had moved into the Washington picture and just now appears to be pegged as the liaison between British and American business in the hastening crisis.

There is a complaint from the bankers themselves that bank money is on the sidelines in the defense crisis, if that's what it is, but at any rate the bankers are in the line-up, particularly the younger set, serving the army, the navy and the department of state, as above and in many other instances.

They lot by-gones be by-gones. Mr. Harriman was an early convert to the New Deal, while Mr. Lovett is dead-set against it. But that's all water under the bridge.

Mr. Lovett and Mr. Harriman are both small-town boys, the former from Huntsville, Texas, and the latter from Beacon, N. J. Mr. Lovett, rather slight in stature, good-looking, an easy-going, taciturn executive, was graduated from Yale in 1918 and pursued postgraduate business studies at Harvard in 1920 and 1921. Then he took over where his father left off in running the Union Pacific, the Oregon Short Line, the Oregon-Washington and the St. Joseph and Grand Island railways, picking up a few important industrial directorates on the side and keeping everything moving nicely.

The Wall Street battalions of youth provide evidence of the many tributaries of specialized skill and experience feeding into democratic defense effort.

ALCHEMY brought on chemistry; astrology led to astronomy and now the forked hazel twig to "dows" ground leads to the discovery by one of the world's most distinguished geophysicists that the horsetail plant of the meadows locates gold, and perhaps stores up a bit for all comers.

Dr. Hans T. F. Lundberg of Toronto is the scientist. He is a widely famed mining engineer of Swedish birth and education. Experimenting with various means of locating metals deep in the earth, he worked through Sweden, Norway, Finland, Belgium, France, Germany, Spain, Mexico, Canada and the United States. His success with "electrical prospecting" methods was sufficient to gain for him the gold medal of the Swedish Engineering academy in 1925, and to locate 14 profitable mines. But he needed a more accurate method and kept on the trail of the horsetail.

The more gold in the ground, the more in the horsetail, with even infinitesimal quantities to be detected by the spectroscope. Dr. Lundberg calls it the "geobotanical method." Furthermore, subterranean may get in on the profits, even if they don't find a gold mine. A ton of horsetail, Dr. Lundberg figures, would yield 4 1/2 ounces of gold worth \$157.50 at current gold prices. This back-to-the-land movement may come off yet.

Dr. Lundberg was born in Malmo, Sweden, in 1893. He was graduated from the Royal Institute of Technology at Stockholm and later was a professor there. He came to Brooklyn in 1923, and formed the Geophysical Exploration Limited, which, exploring many countries, took over where the Willow-Wythe left off. He is highly certified in his profession and a member of many scientific societies.

Incidentally, miners always look for iron wherever they find orchids. One would think they would be the gold-diggers.

Guarding 'The Rock' From Sea and Air

A view from an accompanying British war plane high above Great Britain's Rock of Gibraltar, showing another plane on patrol duty, winging high over the harbor, wherein are several men of war. All are on the alert against attack by German planes from the air and German troops that might be given a "corridor" down to southern Spain by the Fascist government. The Rock, which is one of the most formidable fortresses in the world, is Great Britain's effective western door to the Mediterranean, through which British commerce and warships flow from day to day.

Delayed Inaugural

Forrest C. Donnell was inaugurated Missouri's fortieth governor after a six weeks' delay because of contested election. He is the first Republican governor to crack the Missouri capitol's Democratic ranks since the Roosevelt landslide in 1932. This picture shows him at the inaugural in Jefferson City, Mo., with Col. Branch Rickey, owner of the St. Louis Cardinals. Left: Governor Forrest Donnell, and (right) Col. Rickey.

'Four of a Kind!'

Mrs. Peter Lasley, 42-year-old farm wife and mother of Leitchfield, Ky., shown in the city hospital at Louisville with the quadruplets born to her at Leitchfield. The babes, which were rushed to Louisville, are (left to right): John, 5 1/2 pounds; Mildred, 4 pounds; Martine, 4 pounds; and Beniah, 5 pounds.

Appointees

Left: Ralph Austin Bard of Chicago, who was appointed assistant secretary of the navy. Right: Robert A. Lovett of New York, appointed special assistant to secretary of war for air.

Pre-views

Spring Beckons as Daffodils Bloom

Spring comes marching in on March 21, and close upon its heels will follow the Payalup Valley daffodil festival, at Tacoma, Wash., March 24-26. The event will include a spectacular parade in which about a half a million blooms will be used. The above scene depicts daffodils in Payalup valley.

Final Ski Event

The National Four Event Combined championships and Harriman Cup race will climax the skiing season at Sun Valley, Idaho, March 28-29. Pictured here is Alf Engen, who will defend his championship title at this event.

Women's Indoor Swimming Meet

Practically every woman swimming star in the country will contest for 10 championships on the four-day program of the women's senior national indoor A. A. U. swimming and diving championships, at Buffalo, March 19-22. All of the 1940 champions will defend their titles. The picture shows defending champion.

Anniversary

The Co-operative League of the U. S. A. will observe its twenty-fifth anniversary March 15. Dr. J. Warshawsky (above) is president of the league. It has 1,115,000 members.

FIRST AID to the AILING HOUSE by Roger B. Whitman

(© Roger B. Whitman—WNU Service.)

Wet Chimney.

QUESTION: How can I keep rain from coming down the chimney of my bungalow?

ANSWER: One method is to put a slab of stone over the top of the chimney, supported on columns, so that the draft will not be interfered with. It may be that the water does not come down the flue, but gets into the brickwork through defective mortar joints, or through a broken chimney cap. These possibilities should be looked into.

Darkened Floor.

QUESTION: After scraping and wiping a floor was given a coat of white shellac thinned with denatured alcohol. The floor has darkened and is so rough that it catches dust from the mop. Shellac was purchased in a gallon-can two years ago, but has been kept covered in the cellar. Is this shellac responsible?

ANSWER: Yes; for shellac deteriorates with age. It should be used within a few months. The quality makers of shellac date their cans. All of the old shellac should be taken off, which can be done by wiping with denatured alcohol. You will probably find that this will leave a smooth surface. Get top quality and pure shellac, and thin it with an equal quantity of good denatured alcohol, put on in two or three thin coats. Instead of shellac, you could use two coats of top quality floor varnish.

Washing Painted Walls.

QUESTION: What is your formula for washing painted interior house walls?

ANSWER: Use tepid water in which dissolve trisodium phosphate in the proportion of one teaspoonful to the gallon. When washing painted walls, start at the floor level and work upwards. If you start at the top and work down, you will make dirty streaks that will be almost impossible to clean off. Rinse thoroughly. Trisodium phosphate can be had under a trade name at a grocery store; ask for a white cleaning powder that makes no lather. Another excellent type of paint cleaner is made of a cereal preparation, which has no strong chemicals and does not hurt the hands. It is on sale at most paint stores, and is much used by professional painters.

Cesspool in an Old Well.

QUESTION: Can you give me any information about using an old well as a cesspool? Are wells built with holes in the sides to permit the water to seep in? Do you think the water from the cesspool could drain away through the sides or only from the bottom? The well is 30 feet deep and three or four feet wide.

ANSWER: With water in the bottom of the well, you will naturally get no drainage, and the idea would be impractical. There is also a possibility of contaminating the water supply of another well which may be close by. I would advise building a cesspool and locating it as far from the source of water supply as possible. Have you considered a septic tank instead of a cesspool?

Refinishing a Brick House.

QUESTION: We wish to clean our brick cottage, which is 60 years old. How should we do it? What colors do you suggest for the trim and the shutters?

ANSWER: You can clean the brickwork with any coarse scouring powder and plenty of water with a stiff scrubbing brush. If this does not restore the color sufficiently, you can use a cement paint that is intended for masonry, and that you can get in brick or other color, at a paint store. White painted bricks are very popular, and you might consider this. White trim against red bricks is effective, and a soft green jado for instance, should be a good contrast for the shutters.

Cleaning a Statuette.

QUESTION: I have a statuette of the kind that was made in large numbers 30 or more years ago, but that now can be found only in antique shops. It would look better if it were cleaned. What method and materials should I use?

ANSWER: The statuette is undoubtedly of a kind known as a Rogers Group, or something similar. It is made of plaster of paris and finished with oil paint. You can clean it with a cloth damp with soapy water; follow by wiping with clear water and then allow to dry thoroughly. For a final finish you can repaint it with ordinary oil paint.

Oil Finish.

QUESTION: In a rubbed off finish, is raw or boiled linseed oil used? Is the first coat applied hot or cold?

ANSWER: Raw linseed oil is usually applied cold. One excellent combination is 3 parts oil and 1 part turpentine, which has greater penetration. An alternative is equal parts of oil, turpentine and denatured alcohol.

CLASSIFIED DEPARTMENT

DENVER HOTEL

DREXEL HOTEL, 433 17TH ST. Comfortable rooms with all conveniences. Attractive low daily and weekly rates. Where All Buses Arrive and Depart.

TIPS to Gardeners

GARDENS FOR DEFENSE

THE home gardener has an important place in our program of national defense, a much more important role than he played during the first World war.

In the face of these facts, gardeners are advised to do two things: Plan to devote increased space to vegetable gardening; and perfect plans for the 1941 garden so as to get the greatest possible yield from the available space.

In stepping up yield from vegetable gardens of limited size, two major devices should be relied on, first, companion cropping—the planting of fast-growing crops like radishes, spinach, and lettuce between rows of slower-growing vegetables like tomatoes, and cabbage. The fast growers will be pulled and used before the other crops need the space.

Second, succession cropping—the repeated planting of major crops such as beans, sweet corn, radishes, carrots, beets, and lettuce. Moderate-size, new plantings made at regular intervals during the early part of the season will provide a steady supply of fresh vegetables until the season's end.

DON'T BE BOSSED

BY YOUR LAXATIVE—RELIEVE CONSTIPATION THIS MODERN WAY

When you feel gassy, headachy, lory due to clogged-up bowels, do as millions do—take Feen-A-Mint at bedtime. Next morning—thorough, comfortable relief, helping you start the day full of your normal energy and pep, feeling like a million! Feen-A-Mint doesn't disturb your night's rest or interfere with work the next day. Try Feen-A-Mint, the chewing gum laxative, yourself! It tastes good, it's handy and economical... a family supply costs only

FEEN-A-MINT 10¢

Nothing From Nothing Nothing can be born of nothing, nothing can be resolved into nothing.—Perseus.

Beware Coughs from common colds That Hang On

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding you must take the way it quickly allays the cough or you are to have your money back.

CREOMULSION For Coughs, Chest Colds, Bronchitis

Wretched Minds

How wretched are the minds of men, and how blind their understandings.—Lucretius.

Miserable with backache?

WHEN kidneys function badly and you suffer a nagging backache, with dizziness, burning, scanty or too frequent urination and getting up at night when you feel tired, nervous, all upset... use Doan's Pills. Doan's are especially for poorly working kidneys. Millions of boxes are used every year. They are recommended the country over. Ask your neighbor.

CHAPTER XVII—Continued

"I'll have to scour the windshield," Wills said. "I can't see through it." Air that cut their faces rushed in as he opened the door. Marian thought of old Tom—the thin, torn old coat he had worn in the jail, his feet sloshing through the freezing mud, wind cutting through mercilessly.

"Oh—hurry!" she whispered. "But—Mother, what if he didn't come this way?"

"He came this way. He took the old log trail across the ridge, and crossed the river on that swinging bridge."

"There's a light," said Branford Wills.

"The gate is beyond that big tree. It's steep beyond—you'd better change gears."

"Has he had time?"

"He left before dark. A boy saw him go. They didn't miss him till supper time."

"If only they had locked the door," Marian mourned.

"We may be in time," Virgie was hopeful.

The house that sprang out of a gnarled darkness of old apple-trees was bleak and somber and somehow desolate.

"The door's open—" breathed Marian.

Virgie gave a little groan.

"I'll go," she said. "You wait here."

"Not alone, Mother."

"No—not alone," Wills sprang out after her.

Marian hurried after them, slipping and panting in the wan beam of their headlights. But somehow she knew it was too late. She had known it when the dreary old house leaped out of the darkness, out of the solitude and silence which for a year it had known.

"Don't let her come," Virgie warned sharply.

"But I'm coming," Marian answered, catching the chin she had from David Morgan.

"Take my hand," Wills said.

"I can walk alone." But she took the hand.

Held it tight, clutched by the dread of that sinister, opened door. Beyond that door a lamp fluttered in the draft. Beyond it was a deserted room, where coils glowed in a base burner and Wallace Withers' elastic-sided shoes sat warming on the floor. Shoes he would never wear any more.

"Don't come closer," Virgie called sharply.

But Wills went on and Marian would not let go his hand, though her flesh was icy and her hair lifted a little on her head, at what lay there, face upward in front of that open door.

Wallace Withers had been shot cleanly through the head.

This time Tom's gun had not jammed.

"Don't touch anything," Wills warned. "Is there a telephone in this house?"

Virgie, a little sick because she could not hate even a dead, cruel old man who had wronged her, shook her head.

"Not even a well," she said.

"But—we've got to find Tom!" Marian began sobbing wildly.

"Take care of her," Virgie said to Wills wearily. "I'll get a sheet. I know where they are. I can't leave him lying there—like that."

She had heard Marian's little choking cry. "Oh, Bran—Bran—"

She had seen Wills holding her in his arms. Suddenly she was old

and lonely, and this was death lying face up to the hostile sky—and out of the aloof hills a winter wind howled in desolation. Suddenly she was sorry for Wallace Withers. He had been lonely, too!

They found Tom Pruitt at dawn. Men with lanterns and dogs had crashed, and slid through the icy night, cursing the storm and the darkness. And all night Virgie had sat by the stove in Wallace Withers' house, looking straight ahead of her, musing on the tangled tragedy of life—and the way greed snarled the twisting strands, wove traps and nooses and webs for hopes and high ambitions to be choked in.

Wills and Marian had gone for help and met a posse on the road. But light was under the hemlocks along the river bluff when they found Tom.

Virgie saw them coming, slowly, up the frozen lane, and knew what they had found.

"He went over them rocks—down there where the river runs under the cliff," a deputy said. "He was heading back toward your place I reckon, Mis' Morgan, and he missed his footing in the dark. I wouldn't take on, Mis' Morgan—I reckon it's just as well."

"Yes," said Virgie, tonelessly, "it's just as well."

Somehow she got home.

Riding in somebody's rickety car, cold and weary and aching from head to foot with a sorrow that was rigid and steely like bonds around her heart and throat.

The mountains and the woods were frigidly incased in a coating of icy glass. The streams were hidden and from the stack of the mill a wan, steam drifted.

The fires were banked and tomorrow the barkers would whirl again, gnashing their steel teeth into unresisting wood, grinding and spawling and cucking away the life-blood of a green tree go that missals could be printed for praying nuns and letters written to old mothers.

The mill would go on.

The mill would go on and Tom would not be there. David would not be there. A sudden, stark, awful loneliness got Virgie Morgan by the throat as she walked into her own house, and drank into the chair that had the print of David Morgan's thin shoulder-blades.

She couldn't go on—she couldn't—alone!

And then suddenly she was not alone. Youth was there, with lights and hot coffee and gentle hands.

Marian and Branford Wills.

"We've stopped fighting, Mother—we found out we were terribly in love with each other. Do you mind, Mother? Take off her shoes, Bran, and rub her feet. I'll get her slippers."

Branford Wills knelt at her feet, lean and brown, with his deep voice and gentle eyes.

"I can't go on without her," he said. "I know what a presumptuous fool I am—"

"I'm glad," said Virgie numbly. She would have liked a son like this had she been thinking.

Lucy was there—and Stanley Daniels, looking sheepish and relished and eager to help. They were scrambling eggs, they announced.

"We thought you'd need us, Mrs. Morgan," Lucy said, brightly, little red coins shining in her cheeks.

Suddenly Virgie began to sob.

They were so brave and so reckless and so gallant. Their eyes were so clear. They were youth—going on!

"Yes, I need you!" she said hoarsely.

LET'S BE VENTURESOME—TRY IT!
(See Recipes Below)

ADVENTURES IN COOKING

"I got just as much 'lift' out of a new recipe as I do out of buying a new hat"—so stated a homemaker recently and her statement set me thinking. After all, why shouldn't we women enjoy a new recipe?

Given a brand new, unusual and different recipe to prepare the making up of that recipe, becomes a challenge, almost a game. Can we make it up correctly? Does the recipe suggest a new cookery process, one which perhaps we have never tried before?

How is the new dish going to taste? Are we going to be really proud of it when we take it to the table? Is the family going to like it? Adventure in cooking—that's the just what it is, and that's why I like new recipes; that's why I like to suggest new recipes to you.

Today's assortment (given below) is centered around a number of new ways to prepare various kinds of sausage. Far too often, I fear, we think of sausage as something to serve for breakfast or light supper; we fry it, serve it and that's the beginning and the end of all the thinking we do about it.

So let's be venturesome and try these recipes. The list contains a number of my personal favorites. I am sure both you and the family will enjoy them.

Sausage Stuffed Cinnamon Apples. (Serves 6)

2 cups sugar
1 cup red
½ cup red cinnamon candy
6 apples

10 small link sausages

Cook sugar and water and cinnamon candy to a thick syrupy consistency (230 degrees). Core apples and remove peeling from top half of each apple. Place peeled side in hot syrup and cook for 5 minutes. Remove from syrup and place three uncooked link sausages in center of each apple. Then place apples, peeled side up, in baking pan. Pour remaining syrup over them and bake in moderate oven (350 degrees) approximately 40 minutes.

Thuringer Sausage With Apple Rings. (Makes 4 servings)

8 Thuringer sausages.
1 No. 2 can whole kernel corn (2½ cups)
2 tablespoons butter
½ teaspoon salt
Few grains pepper
1 tablespoon pimiento (finely cut).
2 tart cooking apples
3 tablespoons butter

Place Thuringer sausages in skillet with sufficient water to cover bottom of pan. Cook for about 20 minutes, turning occasionally, until water has evaporated and sausages are tender and brown. Drain corn and place liquor in saucepan. Heat until it has evaporated to about one-half. Add corn and heat, then mix lightly with butter, salt, pepper and pimiento. Meanwhile, wash apples and cut into ¼-inch slices. Pan-fry in butter over medium heat. Turn when brown on one side and brown on the other. To arrange plates, place two sausages, two apple slices and a serving of corn on each plate.

Sausage Waffles.

2 cups pastry flour
2 teaspoons baking powder
½ teaspoon salt
2 eggs, separated
1¼ cups milk
¼ cup melted butter
¾ cup bulk pork sausage

Mix and sift all dry ingredients. Beat egg yolks thoroughly and add milk to them. Stir milk mixture into the dry ingredients. Add melted butter and sausage and fold in the well beaten egg whites. Bake as waffles in a hot waffle iron until crisp and brown. Serve with maple syrup.

Sweet Potato and Puritan Sausage Cakes.

Parboil 5 sweet potatoes. Peel and cut in half lengthwise. Place ½ of the slices in a buttered baking pan.

Adventures in Cooking

Everyone likes to adventure in cooking and that's just the opportunity that comes to each homemaker when she tries out a new recipe. The best part of the adventure, however, comes about when the recipe makes the map of the family look up and with both pride and appreciation in his voice pronounces the whole meal a tremendous success.

The 10c recipe book, "Feeding Father," contains a large number of brand new recipes, each so different that making them up is an adventure—so good that eating them entirely merits and begets the gratification of the man of the family. Send today—this offer may be eliminated at any time. To get your copy, send 10c in coin to Eleanor Howe, 919 North Michigan Avenue, Chicago, Illinois. Ask for the cook book, "Feeding Father."

Make ½ pound of pork sausage up into flat sausage cakes. Place one sausage cake on each sweet potato slice and top with a second sweet potato slice. Fasten with a toothpick. Brush with melted butter and salt lightly. Bake in a moderate oven (350 degrees) for approximately ½ hour.

Porcupine Sausage Balls.

2 tablespoons butter
1 small onion, chopped
1 green pepper, chopped
2½ cups canned tomatoes
1 tablespoon sugar
1 pound bulk pork sausage
¾ cup uncooked rice

Melt butter in frying pan and brown onion in it. Add chopped green pepper, tomatoes, sugar, and salt. Cook until green pepper is tender. Make the sausage into small balls and roll in the uncooked rice. Place in greased baking casserole and pour the tomato mixture over the sausage balls. Cover baking dish and bake 1½ hours in a moderate oven (350 degrees).

Sausages in Pastry Blankets. (8 sausage rolls)

1½ cups flour
½ teaspoon salt
¼ teaspoon baking powder
½ cup shortening
3 tablespoons cold water (approximately)

8 pork link sausages

Sift together the flour, salt, and baking powder. Blend in the shortening. Then add just enough water to form a dough, mixing lightly. Roll out and cut into 8 oblong pieces, each sufficiently large to wrap around one link sausage. Place individual sausages (well pricked) on individual pieces of pastry; fold ends over and roll up. Place, folded side down, on a baking sheet. Prick crust with a fork. Bake in a hot oven (425 degrees) for about 30 minutes. Serve very hot.

Sausage Stuffed Tomatoes. (Serves 8)

8 large firm tomatoes (uncooked),
1 pound country style pork sausage
½ cup soft bread crumbs (buttered)
Remove stem end of tomatoes. Scoop out the center and sprinkle lightly with salt. Form sausage into eight balls and place one ball in each tomato. Top with buttered bread crumbs. Place tomatoes in a shallow baking pan, bake in a moderate oven (350 degrees) for 45 minutes (approximately).

Ham Stuffed Baked Apples. (Serves 6)

6 large tart apples
1½ cups baked Ham (cut in small pieces)
1 teaspoon whole cloves
2 tablespoons butter

Cut a ¼ inch slice from stem end of each apple and remove core carefully. Scoop out, reserve apple pulp, and leave apple shell about ¼ inch thick. Combine ham and apple pulp (cut fine) and fill the apple shells. Top each shell with a clove and dot with butter. Place in a baking pan, add ¼ inch water and bake in a moderate oven (350 degrees) for about one hour.

PATTERNS

SEWING CIRCLE

under your coat. Here's a perfect love of an afternoon frock—not too dressy for general wear—that will accent the curves and belittle the waistline of practically any figure. This design (8867) is one of those gracefully simple basics that you'll want to make up in more than one version. The deep V of the neckline is a perfect background for jewels or a cluster of flowers, so that you can vary it endlessly with different accessories. Detailed sew chart included.

Pattern No. 8867 is designed for sizes 14, 16, 18, 20, 40 and 42. Size 16 requires 4 yards of 36-inch material without nap. Mail your order today to:

Address

Maryland Short-Landed

If the early settlers of Maryland had possessed better geographic knowledge and claimed all the land granted to Lord Baltimore by the king of England in 1632, the state would be nearly 17,000 square miles in area, according to Collier's. Instead it has only 10,000 square miles, having lost the 7,000 miles, which are now worth about \$12,000,000,000, to Delaware, Pennsylvania and what is now northern West Virginia.

Check COLD DISCOMFORTS

At the first sign of a cold, make a use of your mind to avoid as much of the sniffing, sneezing, soreness and stuffy condition of your nostrils as possible. Insert Mentholum in each nostril. Also rub it vigorously on your chest. You'll be delighted with the way Mentholum combats cold misery and helps restore comfort.

MENTHOLATUM
Gives COMFORT Daily

Memory Clings
Experience teaches that a good memory is generally joined to a weak judgment.—Montaigne.

grass
Popular Varieties at Saving Prices

Live, clean seed for hay crops, pastures and dry range—
Crested Wheat, Brome, Red Top, Timothy, etc.

Alfalfa, Sweet Clover, Strawberry Clover for wet, alkaline soil. Sorghum, Millets and all other wanted varieties.

An ounce of mirth is worth a pound of sorrow.—Baxter.

HOUSEHOLD QUESTIONS

If dirt becomes ground into waxed floors moisten a cloth with turpentine and rub well into floor until wax is removed, then wax and polish.

Baking soda will keep the baby's bottles sweet. After sterilizing bottles, shake in a little soda, fill with cold water and let stand until bottles are used.

Smoky Rooms—You can quickly clear the air in the living room by leaving overnight a tablespoonful of ammonia in a bowl of water.

Soup is usually better if allowed to stand overnight, giving the flavorings a chance to blend.

A dry cloth is better for removing a pan or dish from the stove than a damp or wet one.

Kerosene will soften boots and shoes that have been hardened by water.

To remove chewing gum from rug, rub with any drycleaning fluid. Rub different ways on the rug and soon the gum will loosen so that it can be picked off. The cleaning fluid then removes the gum stains.

HIGH PRICES
Do Not Go WITH ADVERTISING

Advertising and high prices do not go together at all. They are extremely incompatible to each other. It is only the product which is unadvertised, which has no established market, that costs more than you can afford to pay.

Whenever you go into a store and buy an item of advertised merchandise, it doesn't make any difference what you are getting more for your money—more in quality and service—than you would get if you spent the same amount for something which was not advertised.

The STRUMPET SEA
by BEN AMES WILLIAMS

MEET lovely Mary Doncaster and George McAnland, the missionary who married her, but who would not admit that he loved her. And Peter Corr, who sought in treacherous ways to win her, and Richard Corr, who hid his love. Ben Ames Williams has created some real people and some tense situations in "The Strumpet Sea," a story that will keep you on edge from start to finish.

IN THIS NEWSPAPER
Beginning in the Next Issue

WHO'S NEWS THIS WEEK

By LEMUEL F. PARTON
(Consolidated Features—WNU Service.)

NEW YORK.—Robert A. Lovett, New York banker and World war flying ace, gets the news spotlight as a possible aviation production czar, after two months' service with the war department in which he has shown extraordinary capacity for slashing red tape and getting things done. His father, Judge Robert S. Lovett, was head of the war industries board in the World war.

When he was summoned by the war department, Mr. Lovett withdrew from the New York banking firm of Brown Brothers, Harriman and Co. A few months earlier, the also comparatively young James V. Forrestal, Mr. Lovett's friend, and bracketed with him among the up-and-coming young financiers, left the presidency of Dillon, Reed and Co. to become undersecretary of the navy. Years before, their Wall Street running mate, Averill Harriman, had moved into the Washington picture and just now appears to be pegged as the liaison between British and American business in the hastening crisis.

There is a complaint from the bankers themselves that bank money is on the sidelines in the defense crisis, if that's what it is, but at any rate the bankers are in the line-up, particularly the younger set, serving the army, the navy and the department of state, as above and in many other instances.

They let by-gones be by-gones. Mr. Harriman was an early convert to the New Deal, while Mr. Lovett is dead-set against it. But that's all water under the bridge.

Mr. Lovett and Mr. Harriman are both small-town boys, the former from Huntsville, Texas, and the latter from Beacon, N. J. Mr. Lovett, rather slight in stature, good-looking, an easy-going, tactful executive, was graduated from Yale in 1918 and pursued postgraduate business studies at Harvard in 1920 and 1921. Then he took over where his father left off in running the Union Pacific, the Oregon Short Line, the Oregon-Washington and the St. Joseph and Grand Island railways, picking up a few important industrial directorates on the side and keeping everything moving nicely.

The Wall Street battalions of youth provide evidence of the many tributaries of specialized skill and experience feeding into democratic defense effort.

ALCHEMY brought on chemistry; astrology led to astronomy and now the forked hazel twig to "dowsing" ground leads to the discovery by one of the world's most distinguished geophysicists that the horsetail plant of the meadows locates gold, and perhaps stores up a bit for all comers.

Dr. Hans T. F. Lundberg of Toronto is the scientist. He is a widely famed mining engineer of Swedish birth and education. Experimenting with various means of locating metals deep in the earth, he worked through Sweden, Norway, Finland, Belgium, France, Germany, Spain, Mexico, Canada and the United States. His success with "electrical prospecting" methods was sufficient to gain for him the gold medal of the Swedish Engineering academy in 1925, and to locate 14 profitable mines. But he needed a more accurate method and kept on the trail of the horsetail.

The more gold in the ground, the more in the horsetail, with even infinitesimal quantities to be detected by the spectroscope. Dr. Lundberg calls it the "re-botanical method." Furthermore, suburbanites may get in on this profit, even if they don't find a gold mine. A ton of horsetail, Dr. Lundberg figures, would yield 4 1/2 ounces of gold worth \$157.50 at current gold prices. This back-to-the-land movement may come off yet.

Dr. Lundberg was born in Malmö, Sweden, in 1893. He was graduated from the Royal Institute of Technology at Stockholm and later was a professor there. He came to Brooklyn in 1923, and formed the Geophysical Exploration Limited, which, exploring many countries, took over where the Willow-Wythe left off. He is highly certified in his profession and a member of many scientific societies.

Incidentally, miners always look for iron wherever they find orchids. One would think they would be the gold-diggers.

Guarding 'The Rock' From Sea and Air

A view from an accompanying British war plane high above Great Britain's Rock of Gibraltar, showing another plane on patrol duty, winging high over the harbor, wherein are several men of war. All are on the alert against attack by German planes from the air and German troops that might be given a "corridor" down to southern Spain by the Fascist government. The Rock, which is one of the most formidable fortresses in the world, is Great Britain's effective western door to the Mediterranean, through which British commerce and warships flow from day to day.

Delayed Inaugural

Forrest C. Donnell was 'inaugurated' Missouri's fortieth governor after a six weeks' delay because of contested election. He is the first Republican governor to crack the Missouri Capitol's Democratic ranks since the Roosevelt landslide in 1932. This picture shows him at the inaugural in Jefferson City, Mo., with Col. Branch Rickey, owner of the St. Louis Cardinals. Left: Governor Forrest Donnell, and (right) Col. Rickey.

FIRST AID to the AILING HOUSE

by Roger B. Whitman
(© Roger B. Whitman—WNU Service.)

Wet Chimney.

QUESTION: How can I keep rain from coming down the chimney of my bungalow?

Answer: One method is to put a slab of stone over the top of the chimney, supported on columns, so that the draft will not be interfered with. It may be that the water does not come down the flue, but gets into the brickwork through defective mortar joints, or through a broken chimney cap. These possibilities should be looked into.

Darkened Floor.

QUESTION: After scraping and wiping, a floor was given a coat of white shellac thinned with denatured alcohol. The floor has darkened and is so rough that it catches dust from the mop. Shellac was purchased in a gallon-can two years ago, but has been kept covered in the cellar. Is this shellac responsible?

Answer: Yes; for shellac deteriorates with age. It should be used within a few months. The quality makers of shellac date their cans. All of the old shellac should be taken off, which can be done by wiping with denatured alcohol. You will probably find that this will leave a smooth surface. Get top quality and pure shellac, and thin it with an equal quantity of good denatured alcohol, put on in two or three thin coats. Instead of shellac, you could use two coats of top quality floor varnish.

Washing Painted Walls.

QUESTION: What is your formula for washing painted interior house walls?

Answer: Use tepid water in which dissolve trisodium phosphate in the proportion of one teaspoonful to the gallon. When washing painted walls, start at the floor level and work upwards. If you start at the top and work down, you will make dirty streaks that will be almost impossible to clean off. Rinse thoroughly. Trisodium phosphate can be had under a trade name at a grocery store; ask for a white cleaning powder that makes no lather. Another excellent type of paint cleaner is made of a cereal preparation, which has no strong chemicals and does not hurt the hands. It is on sale at most paint stores, and is much used by professional painters.

Cesspool in an Old Well.

QUESTION: Can you give me any information about using an old well as a cesspool? Are wells built with holes in the sides to permit the water to seep in? Do you think the water from the cesspool could drain away through the sides or only from the bottom? The well is 30 feet deep and three or four feet wide.

Answer: With water in the bottom of the well, you will naturally get no drainage, and the idea would be impractical. There is also a possibility of contaminating the water supply of another well which may be close by. I would advise building a cesspool and locating it as far from the sources of water supply as possible. Have you considered a septic tank instead of a cesspool?

Refinishing a Brick House.

QUESTION: We wish to clean our brick cottage, which is 60 years old. How should we do it? What colors do you suggest for the trim and the shutters?

Answer: You can clean the brickwork with any coarse scouring powder and plenty of water with a stiff scrubbing brush. If this does not restore the color sufficiently, you can use a cement paint that is intended for masonry, and that you can get in brick or other color, at a paint store. White painted bricks are very popular, and you might consider this. White trim against red bricks is effective, and a soft green jade for instance, should be a good contrast for the shutters.

Cleaning a Statuette.

QUESTION: I have a statuette of the kind that was made in large numbers 30 or more years ago, but that now can be found only in antique shops. It would look better if it were cleaned. What method and materials should I use?

Answer: The statuette is undoubtedly of a kind known as a Rogers Group, or something similar. It is made of plaster of paris and finished with oil paint. You can clean it with a cloth damp with soapy water; follow by wiping with clear water and then allow to dry thoroughly. For a final finish you can repaint it with ordinary oil paint.

Oil Finish.

QUESTION: In a rubbed oil finish, is raw or boiled linseed oil used? Is the first coat applied hot or cold?

Answer: Raw linseed oil is usually applied cold. One excellent combination is 3 parts oil and 1 part turpentine, which has greater penetration. An alternative is equal parts of oil, turpentine and denatured alcohol.

'Four of a Kind!'

Mrs. Peter Lasley, 42-year-old farm wife and mother of Letchfield, Ky., shown in the city hospital at Louisville with the quadruplets born to her at Letchfield. The babes, which were rushed to Louisville, are (left to right): John, 5 1/2 pounds; Mildred, 4 pounds; Martine, 4 pounds; and Beniah, 5 pounds.

Appointees

Pre-views

Spring Beckons as Daffodils Bloom

Spring comes marching in on March 21, and close upon its heels will follow the Puyallup Valley daffodil festival, at Tacoma, Wash., March 24-30. The event will include a spectacular parade in which about a half a million blooms will be used. The above scene depicts daffodil-time in Puyallup valley.

Final Ski Event

The National Four Event Combined championships and Hartman Cup race will climax the skiing season at Sun Valley, Idaho, March 25-27. Pictured here is Alf Engen, who will defend his championship title at this event.

Women's Indoor Swimming Meet

Practically every woman swimming star in the country will contest for 16 championships on the four-day program of the women's senior national indoor A. A. U. swimming and diving championships, at Buffalo, March 19-22. All of the 1940 champions will defend their titles. The picture shows defending champs.

Anniversary

The Co-operative League of the U. S. A. will observe its twenty-fifth anniversary March 18. Dr. J. Warbasse (above) is president of the league. It has 1,115,000 members.

CLASSIFIED DEPARTMENT

DENVER HOTEL

DREXEL HOTEL, 433 17TH ST. Comfortable rooms with all conveniences. Attractive low daily and weekly rates. Where All Buses Arrive and Depart.

TIPS to Gardeners

GARDENS FOR DEFENSE

THE home gardener has an important place in our program of national defense, a much more important role than he played during the first World war.

In the face of these facts, gardeners are advised to do two things: Plan to devote increased space to vegetable gardening; and perfect plans for the 1941 garden so as to get the greatest possible yield from the available space.

In stepping up yield from vegetable gardens of limited size, two major devices should be relied on, first, companion cropping—the planting of fast-growing crops like radishes, spinach, and lettuce between rows of slower-growing vegetables like tomatoes, and cabbage. The fast growers will be pulled and used before the other crops need the space.

Second, succession cropping—the repeated planting of major crops such as beans, sweet corn, radishes, carrots, beets, and lettuce. Moderate-size, new plantings made at regular intervals during the early part of the season will provide a steady supply of fresh vegetables until the season's end.

DON'T BE BOSSED

BY YOUR LAXATIVE-RELIEVE CONSTIPATION THIS MODERN WAY

When you feel gassy, headachy, lory due to clogged-up bowels, do as millions do—take Feen-A-Mint at bedtime. Next morning—through, comfortable relief, helping you start the day full of your normal energy and pep, feeling like a million! Feen-A-Mint doesn't disturb your night's rest or interfere with work the next day. Try Feen-A-Mint, the chewing gum laxative, yourself! It tastes good, it's handy and economical... a family supply costs only

FEEN-A-MINT 10¢

Nothing From Nothing
Nothing can be born of nothing, nothing can be resolved into nothing.—Percius.

Beware Coughs from common colds That Hang On

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you are to have your money back.

CREOMULSION
For Coughs, Chest Colds, Bronchitis

Wretched Minds

How wretched are the minds of men, and how blind their understandings.—Lucretius.

Miserable with backache?

WHEN kidneys function badly and you suffer a nagging backache, with dizziness, burning, scanty or too frequent urination and getting up at night when you feel tired, nervous, all upset... use Doan's Pills. Doan's are especially for, poorly working kidneys. Millions of boxes are used every year. They are recommended the country over. Ask your neighbor.

Hawk in the Wind

BY HELEN TOPPING MILLER

© D. APPLETON-CENTURY CO.
W. N. U. Service

CHAPTER XVII—Continued

"I'll have to scour the windshield," Wills said. "I can't see through it."

Air that cut their faces rushed in as he opened the door. Marian thought of old Tom—the thin, torn old coat he had worn in the jail, his feet sloshing through the freezing mud, wind cutting through mercilessly.

"Oh—hurry!" she whispered. "But—Mother, what if he didn't come this way?"

"He came this way. He took the old log trail across the ridge, and crossed the river on that swinging bridge."

"There's a light," said Branford Wills.

"The gate is beyond that big tree. It's steep beyond—you'd better change gears."

"Has he had time—"

"He left before dark. A boy saw him go. They didn't miss him till supper time."

"If only they had locked the door," Marian mourned.

"We may be in time," Virgie was hopeful.

The house that sprang out of a gnarled darkness of old apple-trees was bleak and comber and somehow desolate.

"The door's open—" breathed Marian.

Virgie gave a little groan.

"I'll go," she said. "You wait here."

"Not alone, Mother."

"No—not alone," Wills sprang out after her.

Marian hurried after them, slipping and panting, in the wan beam of their headlights. But somehow she knew it was too late. She had known it when the dreary old house leaped out of the darkness, out of the solitude and silence which for a year it had known.

"Don't let her come," Virgie warned sharply.

"But I'm coming," Marian answered, cutting the chin she had from David Morgan.

"Take my hand," Wills said.

"I can walk alone." But she took the hand.

Held it tight, clutched by the dread of that sinister, opened door. Beyond that door a lamp sputtered in the draft. Beyond it was a deserted room, where coals glowed in a base burner and Wallace Withers' elastic-sided shoes sat warming on the floor. Shoes he would never wear any more.

"Don't come closer," Virgie called sharply.

But Wills went on and Marian would not let go his hand, though her flesh was icy and her hair lifted a little on her head, at what lay there, face upward in front of that open door.

Wallace Withers had been shot cleanly through the head.

This time Tom's gun had not jammed.

"Don't touch anything," Wills warned. "Is there a telephone in this house?"

Virgie, a little sick because she could not hate even a dead, cruel old man who had wronged her, shook her head.

"Not even a well," she said.

"But—we've got to find Tom!" Marian began sobbing wildly.

"Take care of her," Virgie said to Wills wearily. "I'll get a sheet. I know where they are. I can't leave him lying there—like that."

She had heard Marian's little choking cry, "Oh, Bran—Bran—"

She had seen Wills holding her in his arms. Suddenly she was old

and lonely, and this was death lying face up to the hostile sky—and out of the alqof hills a winter wind howled in desolation. Suddenly she was sorry for Wallace Withers. He had been lonely, too!

They found Tom Pruitt at dawn. Men with lanterns and dogs had crashed and slid through the icy night, cursing the storm and the darkness. And all night Virgie had sat by the stove in Wallace Withers' house, looking straight ahead of her, musing on the tangled tragedy of life—and the way greed snarled the twisting strands, wove traps and nooses and webs for hopes and high ambitions to be choked in.

Wills and Marian had gone for help and met a posse on the road. But light was under the hemlocks along the river bluff when they found Tom.

Virgie saw them coming, slowly, up the frozen lane; and knew what they had found.

"He went over them rocks—down there where the river runs under the cliff," a deputy said. "He was heading back toward your place I reckon, Mis' Morgan, and he missed his footing in the dark. I wouldn't take up, Mis' Morgan—I reckon it's just as well."

"Yes," said Virgie, tonelessly, "it's just as well."

Somehow she got home.

Riding in somebody's rickety car, cold and weary and aching from head to foot with a sorrow that was rigid and steely like bonds around her heart and throat.

The mountains and the woods were frigidly incased in a coating of icy glass. The streams were hidden and from the stack of the mill a wan steam drifted.

The fires were banked and tomorrow the barkers would whirl again, gnashing their steel teeth into unresisting wood, grinding and spawling and sucking away the life-blood of a green tree so that misalls could be printed for praying nuns and letters written to old mothers.

The mill would go on.

The mill would go on and Tom would not be there. David would not be there. A sudden, stark, awful loneliness got Virgie Morgan by the throat as she walked into her own house, and sank into the chair that had the print of David Morgan's thin shoulder-blades.

She couldn't go on—she couldn't—alone!

And then suddenly she was not alone. Youth was there, with lights and hot coffee and gentle hands.

Marian and Branford Wills. "We've stopped fighting, Mother—we found out we were terribly in love with each other. Do you mind, Mother? Take off her shoes, Bran, and rub her feet. I'll get her slippers."

Branford Wills knelt at her feet, lean and brown, with his deep voice and gentle eyes.

"I can't go on without her," he said. "I know what a presumptuous fool I am—"

"I'm glad," said Virgie numbly. She would have liked a son like this lad, she was thinking.

Lucy was there—and Stanley Daniels, looking sheepish and relieved and eager to help. They were scrambling eggs, they announced.

"We thought you'd need us, Mrs. Morgan," Lucy said, brightly, little red coins shining in her cheeks.

Suddenly Virgie began to sob.

They were so brave and so reckless and so gallant. Their eyes were so clear. They were youth—going on!

"Yes, I need you!" she said hoarsely.

ADVENTURES IN COOKING

"I get just as much 'lift' out of a new recipe as I do out of buying a new hat"—so stated a homemaker recently and her statement set me thinking. After all, why shouldn't we women enjoy a new recipe?

Given a brand new, unusual and different recipe to prepare the making up of that recipe becomes a challenge, almost a game. Can we make it up correctly? Does the recipe suggest a new cookery process, one which

perhaps we have never tried before? How is the new dish going to taste? Are we going to be really proud of it when we take it to the table? Is the family going to like it? Adventure in cooking—that's just what it is, and that's why I like new recipes; that's why I like to suggest new recipes to you.

Today's assortment (given below) is centered around a number of new ways to prepare various kinds of sausage. Far too often, I fear, we think of sausage as something to serve for breakfast or light supper; we fry it, serve it and that's the beginning and the end of all the thinking we do about it.

So let's be venturesome and try these recipes. The list contains a number of my personal favorites. I am sure both you and the family will enjoy them.

Sausage Stuffed Cinnamon Apples.

(Serves 6)

- 2 cups sugar
- 1 cup red cinnamon candy
- 6 apples
- 10 small link sausages

Cook sugar and water and cinnamon candy to a thick syrupy consistency (230 degrees). Core apples and remove peeling from top half of each apple. Place peeled side in hot syrup and cook for 5 minutes. Remove from syrup and place three uncooked link sausages in center of each apple. Then place apples, peeled side up, in baking pan. Pour remaining syrup over them and bake in moderate oven (350 degrees) approximately 40 minutes.

Thuringer Sausage With Apple Rings.

(Makes 4 servings)

- 8 Thuringer sausages.
- 1 No. 2 can whole kernel corn (2½ cups)
- 2 tablespoons butter
- ½ teaspoon salt
- Few grains pepper
- 1 tablespoon pimiento (finely cut).
- 2 tart cooking apples
- 3 tablespoons butter

Place Thuringer sausages in skillet with sufficient water to cover

bottom of pan. Cook for about 20 minutes, turning occasionally, until water has evaporated and sausages are tender and brown. Drain corn and place liquor in saucepan. Heat until it has evaporated to about one-half. Add corn and heat, then mix lightly with butter, salt, pepper and pimiento. Meanwhile, wash apples and cut into ½-inch slices. Pan-fry in butter over medium heat. Turn when brown on one side and brown on the other. To arrange plates, place two sausages, two apple slices and a serving of corn on each plate.

Sausage Waffles.

- 2 cups pastry flour
- 2 teaspoons baking powder
- ½ teaspoon salt
- 2 eggs, separated
- 1½ cups milk
- ½ cup melted butter
- ¾ cup bulk pork sausage

Mix and sift all dry ingredients. Beat egg yolks thoroughly and add milk to them. Stir milk mixture into the dry ingredients. Add melted butter and sausage and fold in the well beaten egg whites. Bake as waffles in a hot waffle iron until crisp and brown. Serve with maple syrup.

Sweet Potato and Puritan Sausage Cakes.

Parboil 5 sweet potatoes. Peel and cut in half lengthwise. Place ½ of the slices in a buttered baking pan.

Adventures in Cooking

Everyone likes to adventure in cooking and that's just the opportunity that comes to each homemaker when she tries out a new recipe. The best part of the adventure, however, comes about when the recipe makes the map of the family look up and with both pride and appreciation in his voice pronounces the whole meal a tremendous success.

The 10c recipe book, "Feeding Father," contains a large number of brand new recipes, each so different that making them up is an adventure—so good that eating them entirely merits and begets the gratification of the man of the family. Send today—this offer may be eliminated at any time. To get your copy, send 10c in coin to Eleanor Howe, 919 North Michigan Avenue, Chicago, Illinois. Ask for the cook book, "Feeding Father."

Make ½ pound of pork sausage up into flat sausage cakes. Place one sausage cake on each sweet potato slice and top with a second sweet potato slice. Fasten with a toothpick. Brush with melted butter and salt lightly. Bake in a moderate oven (350 degrees) for approximately ½ hour.

Porcupine Sausage Balls.

- 2 tablespoons butter
- 1 small onion, chopped
- 1 green pepper, chopped
- 2½ cups canned tomatoes
- 1 tablespoon sugar
- 1 pound bulk pork sausage
- ¾ cup uncooked rice

Melt butter in frying pan and brown onion in it. Add chopped green pepper, tomatoes, sugar, and salt. Cook until green pepper is tender. Make the sausage into small balls and roll in the uncooked rice. Place in greased baking casserole and pour the tomato mixture over the sausage balls. Cover baking dish and bake 1½ hours in a moderate oven (350 degrees).

Sausages in Pastry Blankets.

(8 sausage rolls)

- 1½ cups flour
- ½ teaspoon salt
- ¼ teaspoon baking powder
- ½ cup shortening
- 3 tablespoons cold water (approximately)
- 8 pork link sausages

Sift together the flour, salt, and baking powder. Blend in the shortening. Then add just enough water to form a dough, mixing lightly. Roll out and cut into 8 oblong pieces, each sufficiently large to wrap around one link sausage. Place individual sausages (well pricked) on individual pieces of pastry; fold ends over and roll up. Place, folded side down, on a baking sheet. Prick crust with a fork. Bake in a hot oven (425 degrees) for about 30 minutes. Serve very hot.

Sausage Stuffed Tomatoes.

(Serves 8)

- 8 large firm tomatoes (uncooked)
- 1 pound country style pork sausage
- ½ cup soft bread crumbs (buttered)

Remove stem end of tomatoes. Scoop out the center and sprinkle lightly with salt. Form sausage into eight balls and place one ball in each tomato. Top with buttered bread crumbs. Place tomatoes in a shallow baking pan, bake in a moderate oven (350 degrees) for 45 minutes (approximately).

Ham Stuffed Baked Apples.

(Serves 6)

- 6 large tart apples
- 1½ cups baked ham (cut in small pieces)
- 1 teaspoon whole cloves
- 2 tablespoons butter

Cut a ¼ inch slice from stem end of each apple and remove core carefully. Scoop out, reserve apple pulp, and leave apple shell about ½ inch thick. Combine ham and apple pulp (cut fine) and fill the apple shells. Top each shell with a clove and dot with butter. Place in a baking pan, add ¼ inch water and bake in a moderate oven (350 degrees) for about one hour.

PATTERNS SEWING CIRCLE

under your coat. Here's a perfect love of an afternoon frock—not too dressy for general wear—that will accent the curves and belittle the waistline of practically any figure. This design (8867) is one of those gracefully simple basics that you'll want to make up in more than one version. The deep V of the neckline is a perfect background for jewels or a cluster of flowers, so that you can vary it endlessly with different accessories. Detailed sew chart included.

Pattern No. 8867 is designed for sizes 14, 16, 18, 20, 40 and 42. Size 16 requires 4 yards of 36-inch material without nap. Mail your order today to:

Maryland Short-Landed

If the early settlers of Maryland had possessed better geographic knowledge and claimed all the land granted to Lord Baltimore by the king of England in 1632, the state would be nearly 17,000 square miles in area, according to Collier's. Instead it has only 10,000 square miles, having lost the 7,000 miles, which are now worth about \$12,000,000,000, to Delaware, Pennsylvania and what is now northern West Virginia.

Check COLD DISCOMFORTS

At the first sign of a cold, make a rub your mind to avoid as much of the sniffing, sneezing, soreness and stuffy condition of your nostrils as possible. Insert Mentholatum in each nostril. Also rub it vigorously on your chest. You'll be delighted with the way Mentholatum combats cold misery and helps restore comfort.

HIGH PRICES
Do Not Go WITH ADVERTISING

Advertising and high prices do not go together at all. They are extremely incompatible to each other. It is only the product which is unadvertised, which has no established market, that costs more than you can afford to pay.

Whenever you go into a store and buy on item of advertised merchandise, it doesn't make any difference what you are getting more for your money—more in quality and service—than you would get if you spent the same amount for something which was not advertised.

The STRUMPET SEA
by BEN AMES WILLIAMS

MEET lovely Mary Doncaster and George McAnland, the missionary who married her, but who would not admit that he loved her. And Peter Corr, who sought in treacherous ways to win her, and Richard Corr, who hid his love. Ben Ames Williams has created some real people and some tense situations in "The Strumpet Sea," a story that will keep you on edge from start to finish.

WHO'S NEWS THIS WEEK

By LEMUEL F. PARTON
(Consolidated Features—WNU Service.)

NEW YORK—Robert A. Lovett, New York banker and World war flying ace, gets the news spotlight as a possible aviation production czar, after two months' service with the war department in which he has shown extraordinary capacity for slashing red tape and getting things done. His father, Judge Robert S. Lovett, was head of the war industries board in the World war.

When he was summoned by the war department, Mr. Lovett withdrew from the New York banking firm of Brown Brothers, Harriman and Co. A few months earlier, the also comparatively young James V. Forrestal, Mr. Lovett's friend, and bracketed with him among the up-and-coming young financiers, left the presidency of Dillon, Reed and Co. to become undersecretary of the navy. Years before, their Wall Street running mate, Averill Harriman, had moved into the Washington picture and just now appears to be pegged as the liaison between British and American business in the hastening crisis.

There is a complaint from the bankers themselves that bank money is on the sidelines in the defense crisis, if that's what it is, but at any rate the bankers are in the line-up, particularly the younger set, serving the army, the navy and the department of state, as above and in many other instances.

They let by-gones be by-gones. Mr. Harriman was an early convert to the New Deal, while Mr. Lovett is dead-set against it. But that's all water under the bridge.

Mr. Lovett and Mr. Harriman are both small-town boys, the former from Huntsville, Texas, and the latter from Beacon, N. J. Mr. Lovett, rather slight in stature, good-looking, an easy-going, tactful executive, was graduated from Yale in 1918 and pursued postgraduate business studies at Harvard in 1920 and 1921. Then he took over where his father left off in running the Union Pacific, the Oregon Short Line, the Oregon-Washington and the St. Joseph and Grand Island railways, picking up a few important industrial directorates on the side and keeping everything moving nicely.

The Wall Street battalions of youth provide evidence of the many tributaries of specialized skill and experience feeding into democratic defense effort.

ALCHEMY brought on chemistry; astrology led to astronomy and now the forked hazel twig to "dowsing" ground leads to the discovery by one of the world's most distinguished geophysicists that the horsetail plant of the meadow locates gold, and perhaps stores up a bit for all comers.

Dr. Hans T. F. Lundberg of Toronto is the scientist. He is a widely famed mining engineer of Swedish birth and education. Experimenting with various means of locating metals deep in the earth, he worked through Sweden, Norway, Finland, Belgium, France, Germany, Spain, Mexico, Canada and the United States. His success with "electrical prospecting" methods was sufficient to gain for him the gold medal of the Swedish Engineering academy in 1925, and to locate 14 profitable mines. But he needed a more accurate method and kept on the tail of the horsetail.

The rare gold in the ground, the more in the horsetail, with even infinitesimal quantities to be detected by the spectroscope, Dr. Lundberg calls it the "geobotanical method." Furthermore, subterranean may get in on the profits, even if they don't find a gold mine. A ton of horsetail, Dr. Lundberg figures, would yield 4 1/2 ounces of gold worth \$157.50 at current gold prices. This back-to-the-land movement may come off yet.

Dr. Lundberg was born in Malmo, Sweden, in 1893. He was graduated from the Royal Institute of Technology at Stockholm and later was a professor there. He came to Brooklyn in 1923, and formed the Geophysical Exploration Limited, which, exploring many countries, took over where the Willow-Wythe left off. He is highly certified in his profession and a member of many scientific societies. Incidentally, miners always look for iron wherever they find orchids. One would think they would be the gold-diggers.

Guarding 'The Rock' From Sea and Air

A view from an accompanying British war plane high above Great Britain's Rock of Gibraltar, showing another plane on patrol duty, winging high over the harbor, wherein are several men of war. All are on the alert against attack by German planes from the air and German troops that might be given a "corridor" down to southern Spain by the Fascist government. The Rock, which is one of the most formidable fortresses in the world, is Great Britain's effective western door to the Mediterranean, through which British commerce and warships flow from day to day.

Delayed Inaugural

Forrest C. Donnell was inaugurated Missouri's fortieth governor after a six weeks' delay because of contested election. He is the first Republican governor to crack the Missouri capital's Democratic ranks since the Roosevelt landslide in 1932. This picture shows him at the inaugural in Jefferson City, Mo., with Col. Branch Rickey, owner of the St. Louis Cardinals. Left: Governor Forrest Donnell, and (right) Col. Rickey.

'Four of a Kind!'

Mrs. Peter Lasley, 42-year-old farm wife and mother of Leitchfield, Ky., shown in the city hospital at Louisville with the quadruplets born to her at Leitchfield. The babes, which were rushed to Louisville, are (left to right): John, 5 1/2 pounds; Mildred, 4 pounds; Marlene, 4 pounds, and Beniah, 5 pounds.

Appointees

Left: Ralph Austin Bard of Chicago, who was appointed assistant secretary of the navy. Right: Robert A. Lovett of New York, appointed special assistant to secretary of war for air.

Pre-views

Spring Beckons as Daffodils Bloom

Spring comes marching in on March 21, and close upon its heels will follow the Payalup Valley daffodil festival, at Tacoma, Wash., March 24-30. The event will include a spectacular parade in which about a half a million blooms will be used. The above scene depicts daffodil time in Payalup valley.

Final Ski Event

The National Four Event Combined championships and Harriman Cup race will climax the skiing season at Sun Valley, Idaho, March 28-23. Pictured here is Alf Engen, who will defend his championship title at this event.

Women's Indoor Swimming Meet

Practically every woman swimming star in the country will contest for 10 championships on the four-day program of the women's indoor national indoor A. A. U. swimming and diving championships, at Buffalo, March 19-22. All of the 1940 champions will defend their titles. The picture shows defending champs.

Anniversary

The Co-operative League of the U. S. A. will observe its twenty-fifth anniversary March 18. Dr. J. Warshaw (above) is president of the league. It has 1,115,000 members.

FIRST AID to the AILING HOUSE

by Roger B. Whitman

(© Roger B. Whitman—WNU Service.)

Wet Chimney.

QUESTION: How can I keep rain from coming down the chimney of my bungalow?

Answer: One method is to put a slab of stone over the top of the chimney, supported on columns, so that the draft will not be interfered with. It may be that the water does not come down the flue, but gets into the brickwork through defective mortar joints, or through a broken chimney cap. These possibilities should be looked into.

Darkened Floor.

Question: After scraping and wiping, a floor was given a coat of white shellac thinned with denatured alcohol. The floor has darkened and is so rough that it catches dust from the mop. Shellac was purchased in a gallon-can two years ago, but has been kept covered in the cellar. Is this shellac responsible?

Answer: Yes; for shellac deteriorates with age. It should be used within a few months. The quality makers of shellac date their cans. All of the old shellac should be taken off, which can be done by wiping with denatured alcohol. You will probably find that this will leave a smooth surface. Get top quality and pure shellac, and thin it with an equal quantity of good denatured alcohol, put on in two or three thin coats. Instead of shellac, you could use two coats of top quality floor varnish.

Washing Painted Walls.

Question: What is your formula for washing painted interior house walls?

Answer: Use tepid water in which dissolve trisodium phosphate in the proportion of one teaspoonful to the gallon. When washing painted walls, start at the floor level and work upwards. If you start at the top and work down, you will make dirty streaks that will be almost impossible to clean off. Rinse thoroughly. Trisodium phosphate can be had under a trade name at a grocery store; ask for a white cleaning powder that makes no lather. Another excellent type of paint cleaner is made of a cereal preparation, which has no strong chemicals and does not hurt the hands. It is on sale at most paint stores, and is much used by professional painters.

Cesspool in an Old Well.

Question: Can you give me any information about using an old well as a cesspool? Are wells built with holes in the sides to permit the water to seep in? Do you think the water from the cesspool could drain away through the sides or only from the bottom? The well is 20 feet deep and three or four feet wide.

Answer: With water in the bottom of the well, you will naturally get no drainage, and the idea would be impractical. There is also a possibility of contaminating the water supply of another well which may be close by. I would advise building a cesspool and locating it as far from the sources of water supply as possible. Have you considered a septic tank instead of a cesspool?

Refinishing a Brick House.

Question: We wish to clean our brick cottage, which is 60 years old. How should we do it? What colors do you suggest for the trim and the shutters?

Answer: You can clean the brickwork with any coarse scouring powder and plenty of water with a stiff scrubbing brush. If this does not restore the color sufficiently, you can use a cement paint that is intended for masonry, and that you can get in brick or other color, at a paint store. White painted bricks are very popular, and you might consider this. White trim against red bricks is effective, and a soft green jade for instance, should be a good contrast for the shutters.

Cleaning a Statuette.

Question: I have a statuette of the kind that was made in large numbers 30 or more years ago, but that now can be found only in antique shops. It would look better if it were cleaned. What method and materials should I use?

Answer: The statuette is undoubtedly of a kind known as a Rogers Group, or something similar. It is made of plaster of paris and finished with oil paint. You can clean it with a cloth damp with soapy water; follow by wiping with clear water and then allow to dry thoroughly. For a final finish you can repaint it with ordinary oil paint.

Oil Finish.

Question: In a rubbed oil finish, is raw or boiled linseed oil used? Is the first coat applied hot or cold?

Answer: Raw linseed oil is usually applied cold. One excellent combination is 3 parts oil and 1 part turpentine, which has greater penetration. An alternative is equal parts of oil, turpentine and denatured alcohol.

TIPS to Gardeners

GARDENS FOR DEFENSE

THE home gardener has an important place in our program of national defense, a much more important role than he played during the first World war.

In the face of these facts, gardeners are advised to do two things: Plan to devote increased space to vegetable gardening; and perfect plans for the 1941 garden so as to get the greatest possible yield from the available space.

In stepping up yield from vegetable gardens of limited size, two major devices should be relied on, first, companion cropping—the planting of fast-growing crops like radishes, spinach, and lettuce between rows of slower-growing vegetables like tomatoes, and cabbage. The fast growers will be pulled and used before the other crops need the space.

Second, succession cropping—the repeated planting of major crops such as beans, sweet corn, radishes, carrots, beets, and lettuce. Moderate-size, new plantings made at regular intervals during the early part of the season will provide a steady supply of fresh vegetables until the season's end.

DON'T BE BOSSED

BY YOUR LAXATIVE—RELIEVE CONSTIPATION THIS MODERN WAY

When you feel gassy, headache, lory due to clogged-up bowels, do as millions do—take Feen-A-Mint at bedtime. Next morning—thorough, comfortable relief, helping you start the day full of your normal energy and pep, feeling like a million. Feen-A-Mint doesn't disturb your night's rest or interfere with work the next day. Try Feen-A-Mint, the chewing gum laxative, yourself. It tastes good, it's handy and economical... a family supply costs only

FEEN-A-MINT 10¢

Nothing From Nothing
Nothing can be born of nothing,
nothing can be resolved into nothing.—Percius.

Beware Coughs from common colds That Hang On

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you are to have your money back.

CREOMULSION
For Coughs, Chest Colds, Bronchitis

Wretched Minds

How wretched are the minds of men, and how blind their understandings.—Aeschylus.

Miserable with backache?

WHEN kidneys function badly and you suffer a nagging backache, with dizziness, burning, scanty or too frequent urination and getting up at night when you feel tired, nervous, all upset... use Doan's Pills. Doan's are especially for poorly working kidneys. Millions of boxes are used every year. They are recommended the country over. Ask your neighbor!

Hawk in the Wind

BY HELEN TOPPING MILLER

© D. APPLETON-CENTURY CO.
W. N. U. Service

CHAPTER XVII—Continued

"I'll have to scour the windshield," Wills said. "I can't see through it." Air that cut their faces rushed in as he opened the door. Marian thought of old Tom—the thin, torn old coat he had worn in the jail, his feet sloshing through the freezing mud, wind cutting through mercilessly.

"Oh—hurry!" she whispered. "But—Mother, what if he didn't come this way?"

"He came this way. He took the old log trail across the ridge, and crossed the river on that swinging bridge."

"There's a light," said Branford Wills.

"The gate is beyond that big tree. It's steep beyond—you'd better change gears."

"Has he had time?"

"He left before dark. A boy saw him go. They didn't miss him till supper time."

"If only they had locked the door," Marian mourned.

"We may be in time," Virgie was hopeful.

The house that sprang out of a gnarled darkness of old apple-trees was bleak and comber and somehow desolate.

"The door's open—" breathed Marian.

Virgie gave a little groan.

"I'll go," she said. "You wait here."

"Not alone, Mother."

"No—not alone," Wills sprang out after her.

Marian hurried after them, slipping and panting, in the wan beam of their headlights. But somehow she knew it was too late. She had known it when the dreary old house leaped out of the darkness, out of the solitude and silence which for a year it had known.

"Don't let her come," Virgie warned sharply.

"But I'm coming," Marian answered, cutting the chin she had from David Morgan.

"Take my hand," Wills said.

"I can walk alone." But she took the hand.

Held it tight, clutched by the dread of that sinister, opened door. Beyond that door a lamp fluttered in the draft. Beyond it was a deserted room, where coal glowed in a base burner and Wallace Withers' elastic-sided shoes sat warming on the floor. Shoes he would never wear any more.

"Don't come closer," Virgie called sharply.

But Wills went on and Marian would not let go his hand, though her flesh was icy and her hair lifted a little on her head, at what lay there, face upward in front of that open door.

Wallace Withers had been shot cleanly through the head.

This time Tom's gun had not jammed.

"Don't touch anything," Wills warned. "Is there a telephone in this house?"

Virgie, a little sick because she could not hate even a dead, cruel old man who had wronged her, shook her head.

"Not even a well," she said.

"But—we've got to find Tom!" Marian began sobbing wildly.

"Take care of her," Virgie said to Wills wearily. "I'll get a sheet. I know where they are. I can't leave him lying there—like that."

She had heard Marian's little choking cry, "Oh, Bran—Bran—"

She had seen Wills holding her in his arms. Suddenly she was old

and lonely, and this was death lying face up to the hostile sky—and out of the aloof hills a winter wind howled in desolation. Suddenly she was sorry for Wallace Withers. He had been lonely, too!

They found Tom Pruitt at dawn. Men with lanterns and dogs had crashed and slid through the icy night, cursing the storm and the darkness. And all night Virgie had sat by the stove in Wallace Withers' house, looking straight ahead of her, musing on the tangled tragedy of life—and the way greed snarled the twisting strands, wove traps and nooses and webs for hopes and high ambitions to be choked in.

Wills and Marian had gone for help and met a posse on the road. But light was under the hemlocks along the river bluff when they found Tom.

Virgie saw them coming, slowly, up the frozen lane; and knew what they had found.

"He went over them rocks—down there where the river runs under the cliff," a deputy said. "He was heading back toward your place I reckon, Mis' Morgan, and he missed his footing in the dark. I wouldn't take up, Mis' Morgan—I reckon it's just as well."

"Yes," said Virgie, tonelessly, "it's just as well."

Somehow she got home.

Riding in somebody's rickety car, cold and weary and aching from head to foot with a corrow that was rigid and steely like bonds around her heart and throat.

The mountains and the woods were frigidly incased in a coating of icy glass. The streams were hidden and from the stack of the mill a wan steam drifted.

The fires were banked and tomorrow the barkers would whirl again, gnashing their steel teeth into unresisting wood, grinding and opening and cucking away the life-blood of a green tree so that miscels could be printed for praying nuns and letters written to old mothers.

The mill would go on.

The mill would go on and Tom would not be there. David would not be there. A sudden, stark, awful loneliness got Virgie Morgan by the throat as she walked into her own house, and sank into the chair that had the print of David Morgan's thin shoulder-blades.

She couldn't go on—she couldn't—alone!

And then suddenly she was not alone. Youth was there, with lights and hot coffee and gentle hands.

Marian and Branford Wills. "We've stopped fighting, Mother—we found out we were terribly in love with each other. Do you mind, Mother? Take off her shoes, Bran, and rub her feet. I'll get her slippers."

Branford Wills knelt at her feet, lean and brown, with his deep voice and gentle eyes.

"I can't go on without her," he said. "I know what a presumptuous fool I am—"

"I'm glad," said Virgie numbly. She would have liked a son like this lad, she was thinking.

Lucy was there—and Stanley Daniels, looking sheepish and relieved and eager to help. They were scrambling eggs, they announced.

"We thought you'd need us, Mrs. Morgan," Lucy said, brightly, little red coins shining in her cheeks.

Suddenly Virgie began to sob.

They were so brave and so reckless and so gallant. Their eyes were so clear. They were youth—going on!

"Yes, I need you!" she said hoarsely.

(THE END)

Household News By Eleanor Howe

LET'S BE VENTURESOME—TRY IT!
(See Recipes Below)

ADVENTURES IN COOKING

"I get just as much 'lift' out of a new recipe as I do out of buying a new hat"—so stated a homemaker recently and her statement set me thinking. After all, why shouldn't we women enjoy a new recipe?

Given a brand new, unusual and different recipe to prepare the making up of that recipe becomes a challenge, almost a game. Can we make it up correctly? Does the recipe suggest a new cookery process, one which

perhaps we have never tried before? How is the new dish going to taste? Are we going to be really proud of it when we take it to the table? In the family going to like it? Adventure in cooking—that's just what it is, and that's why I like new recipes; that's why I like to suggest new recipes to you.

Today's assortment (given below) is centered around a number of new ways to prepare various kinds of sausage. Far too often, I fear, we think of sausage as something to serve for breakfasts or light suppers; we fry it, serve it and that's the beginning and the end of all the thinking we do about it.

So let's be venturesome and try these recipes. The list contains a number of my personal favorites. I am sure both you and the family will enjoy them.

Sausage Stuffed Cinnamon Apples.
(Serves 6)

2 cups sugar
1 cup water
1/2 cup red cinnamon candy,
6 apples
10 small link sausages

Cook sugar and water and cinnamon candy to a thick syrupy consistency (225 degrees). Core apples and remove peeling from top half of each apple. Place peeled side in hot syrup and cook for 5 minutes. Remove from syrup and place three uncooked link sausages in center of each apple. Then place apples, peeled side up, in baking pan. Pour remaining syrup over them and bake in moderate oven (350 degrees) approximately 40 minutes.

Thuringer Sausage With Apple Rings.
(Makes 4 servings)

8 Thuringer sausages.
1 No. 2 can whole kernel corn (2 1/2 cups)
2 tablespoons butter
1/2 teaspoon salt
Few grains pepper
1 tablespoon pimiento (finely cut)
2 tart cooking apples
3 tablespoons butter

Place Thuringer sausages in skillet with sufficient water to cover bottom of pan. Cook for about 20 minutes, turning occasionally, until water has evaporated and sausages are tender and brown. Drain corn and place liquor in saucepan. Heat until it has evaporated to about one-half. Add corn and heat, then mix lightly with butter, salt, pepper and pimiento. Meanwhile, wash apples and cut into 1/4-inch slices. Pan-fry in butter over medium heat. Turn when brown on one side and brown on the other. To arrange plates, place two sausages, two apple slices and a serving of corn on each plate.

Sausage Waffles.

2 cups pastry flour
2 teaspoons baking powder
1/2 teaspoon salt
2 eggs, separated
1 1/2 cups milk
1/2 cup melted butter
1/2 cup bulk pork sausage

Mix and sift all dry ingredients. Beat egg yolks thoroughly and add milk to them. Stir milk mixture into the dry ingredients. Add melted butter and sausage and fold in the well beaten egg whites. Bake as waffles in a hot waffle iron until crisp and brown. Serve with maple syrup.

Sweet Potato and Puritan Sausage Cakes.

Parboil 5 sweet potatoes. Peel and cut in half lengthwise. Place 1/2 of the slices in a buttered baking pan.

Adventures in Cooking

Everyone likes to adventure in cooking and that's just the opportunity that comes to each homemaker when she tries out a new recipe. The best part of the adventure, however, comes about when the recipe makes the man of the family look up and with both pride and appreciation in his voice pronounces the whole meal a tremendous success.

The 10c recipe book, "Feeding Father," contains a large number of brand new recipes, each so different—that making them up is an adventure—so good that eating them entirely merits and begets the gratification of the man of the family. Send today—this offer may be eliminated at any time. To get your copy, send 10 cents in coin to Eleanor Howe, 910 North Michigan Avenue, Chicago, Illinois. Ask for the cook book, "Feeding Father."

Make 1/2 pound of pork sausage up into flat sausage cakes. Place one sausage cake on each sweet potato slice and top with a second sweet potato slice. Fasten with a toothpick. Brush with melted butter and salt lightly. Bake in a moderate oven (350 degrees) for approximately 1/2 hour.

Porcupine Sausage Balls.

2 tablespoons butter
1 small onion, chopped
1 green pepper, chopped
2 1/2 cups canned tomatoes
1 tablespoon sugar
1 pound bulk pork sausage
1/2 cup uncooked rice

Melt butter in frying pan and brown onion in it. Add chopped green pepper, sugar, and salt. Cook until green pepper is tender. Make the sausage into small balls and roll in the uncooked rice. Place in greased baking casserole and pour the tomato mixture over the sausage balls. Cover baking dish and bake 1 1/2 hours in a moderate oven (350 degrees).

Sausages in Pastry Blankets.
(8 sausage rolls)

1 1/2 cups flour
1/2 teaspoon salt
1/4 teaspoon baking powder
1/2 cup shortening
3 tablespoons cold water (approximately)
8 pork link sausages

Sift together the flour, salt, and baking powder. Blend in the shortening. Then add just enough water to form a dough, mixing lightly. Roll out and cut into 8 oblong pieces, each sufficiently large to wrap around one link sausage. Place individual sausages (well pricked) on individual pieces of pastry; fold ends over and roll up. Place, folded side down, on a baking sheet. Prick crust with a fork. Bake in a hot oven (425 degrees) for about 30 minutes. Serve very hot.

Sausage Stuffed Tomatoes.
(Serves 6)

8 large firm tomatoes (uncooked)
1 pound country style pork sausage
1/2 cup soft bread crumbs (buttered)

Remove stem end of tomatoes. Scoop out the center and sprinkle lightly with salt. Form sausage into eight balls and place one ball in each tomato. Top with buttered bread crumbs. Place tomatoes in a shallow baking pan, bake in a moderate oven (350 degrees) for 45 minutes (approximately).

Ham Stuffed Baked Apples.
(Serves 6)

6 large tart apples
1 1/2 cups baked ham (cut in small pieces)
1 teaspoon whole cloves
2 tablespoons butter

Cut a 1/4 inch slice from stem end of each apple and remove core carefully. Scoop out, reserve apple pulp, and leave apple shell about 1/4 inch thick. Combine ham and apple pulp (cut fine) and fill the apple shells. Top each shell with a clove and dot with butter. Place in a baking pan, add 1/4 inch water and bake in a moderate oven (350 degrees) for about one hour.

(Released by Western Newspaper Union.)

PATTERNS SEWING CIRCLE

under your coat. Here's a perfect love of an afternoon frock—not too dressy for general wear—that will accent the curves and belittle the waistline of practically any figure.

This design (8867) is one of those gracefully simple basics that you'll want to make up in more than one version. The deep V of the neckline is a perfect background for jewels or a cluster of flowers, so that you can vary it endlessly with different accessories. Detailed sew chart included.

Pattern No. 8867 is designed for sizes 14, 16, 18, 20, 40 and 42. Size 16 requires 4 yards of 36-inch material without nap. Mail your order today to:

Maryland Short-Landed

If the early settlers of Maryland had possessed better geographic knowledge and claimed all the land granted to Lord Baltimore by the king of England in 1632, the state would be nearly 17,000 square miles in area, according to Collier's. Instead it has only 10,000 square miles, having lost the 7,000 miles, which are now worth about \$12,000,000,000, to Delaware, Pennsylvania and what is now northern West Virginia.

At the first sign of a cold, make it your mind to avoid as much of the sniffing, sneezing, soreness and stuffy condition of your nostrils as possible. Insert Mentholatum in each nostril. Also rub it vigorously on your chest. You'll be delighted with the way Mentholatum combats cold misery and helps restore comfort.

HIGH PRICES

Do Not Go WITH ADVERTISING

Advertising and high prices do not go together at all. They are extremely incompatible to each other. It is only the product which is unadvertised, which has no established market, that costs more than you can afford to pay.

Whenever you go into a store and buy an item of advertised merchandise, it doesn't make any difference what you are getting more for your money—more in quality and service—than you would get if you spent the same amount for something which was not advertised.

The STRUMPET SEA

by
BEN AMES WILLIAMS

MEET lovely Mary Doncaster and George McAusland, the missionary who married her, but who would not admit that he loved her. And Peter Corr, who sought in treacherous ways to win her, and Richard Corr, who hid his love. Ben Ames Williams has created some real people and some tense situations in "The Strumpet Sea," a story that will keep you on edge from start to finish.

27th ANNUAL CONVENTION NEW MEXICO CATTLEMEN

Albuquerque, N. M., Feb. 21, 1941 -The program for the 27th Annual Convention of the New Mexico Cattle Growers Association, to be held in Albuquerque, N. M., March 24th and 25th, is rapidly taking form and will include speakers of nation wide prominence in the livestock industry, President Con W. Jackson, Las Vegas, announced today.

It is believed that upwards of 1200 cattlemen representing all parts of New Mexico and the southwest will come together in Albuquerque on March 24th, to make this cattlemen's convention the largest in the states livestock history.

Among the speakers who have already accepted invitations to speak at the annual meeting include: Gov. John E. Miles, Santa Fe; Governor A. G. Black, Director Farm Credit Administration, Washington, D. C.; Jay Taylor, President, Texas and Southwestern Cattle Raisers' Association, Amarillo, Texas; Edward N. Wentworth, Director of Agricultural Research Armour and Company, Chicago; R. C. Folsom, General Manager National Livestock and Meat Board, Chicago; President Hugh M. Milton, II, New Mexico State Agricultural College, Las Cruces; Mr. H. R. Davison, Vice-President, Institute American Meat Packers, Chicago; and others to be announced at a later date.

Con W. Jackson, President of the State Cattlemen's Association announced that all cattlemen in the state are cordially invited to attend and take part in this convention. The Association now has more than 1100 members, or the largest membership in history of the organization, Jackson said.

INDUSTRIAL SURVEY SOIL CONSERVATION

Giving increased momentum to the soil-moisture conservation program of the Department of the Interior, which already is fanning out across millions of acres of public lands, Secretary Harold L. Ickes has announced the beginning of field operations by the General Land Office on an additional 1,200,000 acres in 10 western states. The new work brings the extension of conservation activities into numerous areas where few such operations heretofore have been conducted. It will be carried out under an allocation of \$229,630 made to the General Land Office by the Office of Land Utilization. This is a part of the money made available to the Department of the Interior as a result of the transfer of soil and moisture conservation work on public lands from the Department of Agriculture to the Department of the Interior.

The State, in which the new soil and moisture conservation work of the General Land Office will be carried out include Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Washington, and Wyoming.

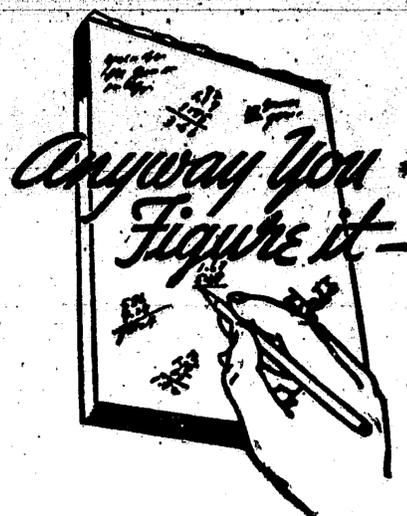

The enlarged action program on unappropriated, unreserved public lands will be under the immediate supervision of the field offices of the Range Development Division of the General Land Office located at Santa Fe, New Mexico, Cheyenne, Wyoming, Reno, Nevada, and Portland, Oregon. Initial work will involve making survey, upon which to base determination of conditions and problems of range use and locations of sites for various improvements. The surveys will cover such physical factors as soil types, degree of slopes, the nature, extent, and distribution of soil erosion, and the present use to which the land is being put. Studies also will be made on existing and potential water supplies.

Since public domain lands under the jurisdiction of the General Land Office are for the most part in widely scattered areas, no plans have been made for setting up large projects in specific areas. Each of the western states, exclusive of Utah where there is practically no public land outside of grazing districts, will be considered as one project area for the purpose of the survey. The data secured, however, will determine the location of problem areas where soil and moisture

conservation work is most needed.

Actual field operations will fall into the four broad categories of grazing management, range rehabilitation, range improvement, and land stabilization. Grazing management work will consist of the erection of drift fences and holding corrals, and will provide also for technical help to stockmen in preventing overgrazing on critical areas by distributing stock on the range in conformity with its carrying capacity. Range rehabilitation operations will include revegetation, rodent control, and destruction of noxious weeds. Denuded areas will be reseeded in order to increase forage and the density of erosion-resisting plant cover.

Engineering measures to be employed in range management operations call for the development of small water-storage works to provide water for stock and to contribute to the prevention of small floods. The construction of this type of wa-

ter facility will make possible a wider use of the range, prevent concentration of stock on areas where water is now available, and will reduce erosion hazards while improving the operating efficiency of the stockmen.

In many areas rapid runoff of rainfall from heavily grazed lands contributes to floods, causes gully-erosion, and drains needed moisture from both topsoil and sub-soil. Such land will be stabilized and protected from further damage by the use of check dams in gullies, constructing contour furrows on range lands, and building terraces on locations where such water-holding structures are needed.

MORE CARS FOR MORE AMERICANS

In 1938, only 65,000 automobiles were made in the United States. Today, as a result of mass production lower prices, and research gains, we can turn out that many cars in five working days.

Industry in this country produces well over 90 per cent of the molybdenum in the world. This particular product is of great defense value in making armaments tough.

How glamour girls have changed. Louis Sobol, popular Broadway Columnist, draws a striking contrast between the streamlined youngsters of today and the beauties of other years, telling how society has taken over the job of picking them. Don't miss his witty comments in The American Weekly, the magazine distributed with next week's LOS ANGELES EXAMINER.

Mainly due to various industrial uses, such as the new plastics which have been developed recently, this year saw about 18 per cent more land planted to soybeans than ever before.

Killed his artistic wife to spare her the miseries of war. The sight of bombing cities and the thought of invasion were too much for the imaginative English Professor, so he did the woman he loved. Read this poignant account of one of the Luftwaffe's most tragic cases, as told in The American Weekly, the magazine distributed with next week's LOS ANGELES EXAMINER.

Always With Us There are two kinds of people—those who do things without making a fuss and those who make a fuss without doing things.—Katherine

M. U. FINLEY, Mayor.

Attest:
MORGAN LOVELACE, Clerk.

THE LIVESTOCK SITUATION

Livestock prices are holding up
well on the Los Angeles market, in-
dicating broad consumer demand for
meats. There has been some strength
in the fat cattle market, carrying the
top on fed steers to \$11.85 a cwt.,
highest price paid on this market
since the summer of 1937. With
California gra's cattle likely to be
later than usual, it is probable that
there will continue to be some scarc-
ity of fed cattle available for the
California market this spring.

Warm weather coupled with sever-
al days of sunshine gave ranges and
pastures considerable improve-
ment last week. Rainfall has been
well above normal, giving promise of
excellent feed conditions in the
southwest.

The present attractive prices for
cows provide cattlemen with the best
opportunity in years to cull out their
herds, and at the same time, improve
the quality and efficiency of their
range herds. Range cows have been
selling for slaughter at \$7.25 to
\$8.25 a cwt. and some of the better
quality, well-covered cows are selling
up to \$3.50 and higher. This means
that the cowmen can realize more
cash for his undesirable cows than
he has been getting for his fat
steers during the recent years.

Bulls also are selling at very at-
tractive prices at the stock yards,
due to the broad demand for hologna
and sausage beef. The general run
of meaty bulls are selling at the Los
Angeles Union Stock Yards at \$8.25
to \$9.25 a cwt. Many range men
are taking advantage of these prices
to sell the older and less desirable
bulls, making replacements with high
quality animals.

There is a very general inclination
on the part of range cattlemen to
curb any great increase in production
but they are increasing the efficiency
of their herds and making steady
improvement in the quality.

The hog market remains on a
stable basis with the best butcher
hogs continuing to sell around \$9 a
cwt. on the Los Angeles market.

Fat lambs are stronger and it is
believed that choice, full-wooled fed
lambs would sell upwards to \$11 a
cwt. Good woolled ewes are quoted
at \$5 to \$7 a cwt.

WORLD LEADER

America produces more finished
rubber than all the rest of the world
combined. As a result of this great
production, the rubber industry in
the United States now employs about
150,000 persons.

**GENERAL MOTORS
TRUCKS ANSWER U. S.
DEFENSE NEEDS**

Despite the wide publicity given
to mechanized army divisions in
the European War and in the cur-
rent national defense program, few
people realize the importance of the
part being played in a motorized
army by motor trucks themselves.
The wide diversity of military
tasks being performed by today's
motor truck is well portrayed by
current activities in the Pontiac,
Michigan, plant of General Motors
Truck & Coach.

Here, in the plant of the world's
largest exclusive manufacturer of
commercial vehicles, thousands of
olive-drab colored military vehicles
of all types and descriptions are
rolling off the assembly lines—both
for the Army of the United States
and for export.

These ultra-modern defense units
being produced by General Motors
Truck perform thousands of im-
portant tasks in the military world
—just as commercial trucks play a
necessary part in the civilian life
of every individual. They also serve
as concrete examples of the part
being played by the automotive in-
dustry in providing this country with
an army properly equipped to move
swiftly over rough terrain as well
as on paved highways.

Foremost and best-known among
these GMC Army vehicles is the unit
commonly known to Army men as the
"two and a half, six by six." This
truck, as the term implies, is a
2 $\frac{1}{2}$ -ton, six-wheel drive cargo-
body truck, which is used for trans-
porting troops or supplies.

"A READY-MADE FAMILY"

Each year it seems that the High
School plays are more, and more in-
teresting and the one given by the
Senior class last Friday night was
no exception. It was the best com-
edy we have seen for some time, and
was played by an all-star cast to a
capacity house. Mr. Martinez, sen-
ior class sponsor, may be justly proud
of their accomplishment; no one
forgot, no one failed in any detail,
regardless of the laughter and applause
just before the last act Mr. Martinez
was presented with a gift by the
class.

ahead as it dips and rises.

Under your feet there's
a quiet whispering, to
let you know that all
eight able Buick cylinders are happily
on the job.

You're giving not a single thought to
what's happening under that long
bonnet nosing out in front, but here's
what's going on:

Instead of the single, compromise-size
carburetor you find on most cars, this
Buick FIREBALL eight with Compound
Carburetion* has two good mixers on
the job.

A single one of them—the front one—
keeps you rolling smoothly, easily,
quietly, on the very minimum ration-
ing of gasoline.

But the other carburetor is alert and
ready for any sudden need. Just tramp
down on that accelerator pedal—it
goes into instant action, giving you

more fuel and more
power for any emer-
gency purpose!

It's almost like having
two engines—one to
handle normal require-
ments thriftly, another to team up
with the first for extra oomph and
wallop when you want it.

That kind of teamwork pays.

And owners by the thousand will tell
you it's more economical too—as much
as 10% to 15% more economical.

If you haven't experienced what it
feels like to have that under the
bonnet of your automobile, better go
have that Buick demonstration now.

Sub-Stratosphere Training For Army Air Corps Crews

A school for the instruction of air corps officers in the new technique of high-altitude flight, with emphasis on the use of oxygen equipment, has recently been opened at Wright field, Dayton, Ohio. The school is being conducted by the Wright Field Aero Medical Research Laboratory. Some of the activities at this school are shown in these pictures.

Picture Parade

Above: A student learns the "How, Why and When" of breathing through an oxygen mask—one of the first courses given in the Altitude school. New types of masks, oxygen tanks and working principles of distributing mechanism are explained.

Right: This experimental electrically-heated suit provides warmth without weight, and is worn underneath regular flying clothes or coveralls. Weighing 7 pounds, it keeps a pilot comfortable in temperatures that outside are as low as 60 below, F. These suits are distributed primarily for pursuit pilots who fly in the stratosphere.

Inside this pressure chamber, officers "go up" to 10,000 feet without oxygen. Pumps exhaust air in the chamber for accurate simulation of altitude. Both ascent and descent are at rate of 1,000 feet per minute.

Altitude chamber controls. An operator takes officers inside the chamber up to 10,000 feet and back in about half an hour. Without oxygen average men "black out" above 20,000 feet.

Going up... Familiarization with new oxygen and communication equipment is acquired when officers attending the Altitude school board a Flying Fortress for practice at 30,000 feet.

Dr. Wm. Lovelace, Mayo Foundation, inventor of oxygen mask (center), shown with pilots on historic sub-stratosphere flight in 1932.

LEAVES from Uncle Sam's Notebook

Poultry House Construction

Specific rules for poultry house construction, which will be applicable to all parts of the country, are of course impossible to lay down, but there are, nevertheless, certain important facts which must be kept in mind by all poultrymen, wherever they may be located. One of these facts is that the house must be built for the comfort of chicks and laying hens; a second fact is that the house must be built for soundness and durability, yet with due regard to economy; and a third fact to be kept in mind is that the poultry house must be conveniently located and easy to take care of. Unless the houses are comfortable, chicks will not grow well nor will the hens lay well.

SIZE OF BUILDING

The size of the building will of course depend upon the size of the flock. If, for example, yours is just a back-yard flock, a house 12 to 18 feet deep will serve; it should be high enough so that a worker can stand up in it with comfort. A floor space of 2½ to 4½ square feet of space should be allowed for each fowl; with a small flock it is good practice to allow 3½ square feet of space for leghorns and 4 square feet for the general purpose breeds; if flocks are large, this space may be somewhat less.

FENCING THE FLOCK

Since many a neighborhood feud has had its beginning in the nuisance of straying poultry, it is important to fence the flock effectively. The light breeds fly easily and to confine them it is necessary to put up a fence from six to seven feet high. For the general purpose and meat breeds, a fence five to six feet high is sufficient. For building the fence, use wooden posts, set from 8 to 10 feet apart. Corner posts should be about eight inches in diameter and set four feet in the ground; line posts should be four or five inches in diameter and set three feet deep. The posts will last longer if the ends that go below the ground are creosoted. For wire, chicken netting of the hexagonal type is satisfactory.

FLOORS

Concrete floors are best for all permanent or stationary houses. Such floors are rodent-proof, sanitary, and easy to clean, but they will be cold if they are laid directly on the ground. They should be made by putting down a firmly packed foundation of cinders or gravel about six inches deep and then laying on it three to four inches of concrete. It is advisable to lay tarred building paper—lapped and cemented at the seams—between the foundation and the concrete. This precaution will prevent moisture coming in from the earth and making the floors damp.

If lumber is used for the floors, they should be from 1½ to 2 feet above the ground. If they are too close to the ground, they become rat harbors and are, moreover, liable to rot. In mild climates, one thickness of matched flooring is sufficient; in colder climates, two floors should be laid, the lower one laid diagonally and a thickness of building paper placed between the two floor layers. The space below the floors should be boarded up to prevent draughts.

WALL AND ROOFING MATERIAL

Matched lumber, seven-eighths of an inch thick, placed vertically, makes a satisfactory wall. In very cold climates it is customary to make a wall of two thicknesses of boards, with building paper between; these two thicknesses will consist of siding laid over sheathing. An essential point is to have a rear wall which is tight near the roosts to prevent draughts. Prepared roofing, laid on wide matched sheathing is the material generally favored for roosts.

PAINTING AND WHITEWASHING

For the sake of durability and appearance, poultry buildings should be painted or whitewashed. Before painting, see that all surfaces are clean and dry. Use a priming coat—about equal parts of paint and linseed oil—and cover with one or more coats of paint. Whitewash is cheap and may be applied inside and out. It is made by slaking lime in water and thinning to the consistency of paint. Powdered whitewash, ready for mixing with water, may be purchased on the market.

For complete information on poultry houses and fixtures, send 5¢ coin to Superintendent of Documents, Washington, D. C., asking for a copy of Farmers' Bulletin No. 1554.

BURYING BEETLES

There is a certain beetle known to science which is called the burying beetle. This curious insect, when he finds a dead mouse or a dead bird, will dig beneath it until it settles down into the ground. He then covers it. He does not do this, however, for any purposes of sanitation. When he has buried the body, the female beetle digs down, deposits her eggs in it, and when the larvae hatch they feed upon the food thus provided. The young are thus assured an ample food supply.

Plaids Bold, Colorful, Striking In Spring Coats, Capes, Jackets

By CHERIE NICHOLAS

ALL signs point to a riot of handsome plaids in the spring style parade. When you choose your plaid for a new coat, cape, jacket, dress or separate skirt, fashion asks you to throw all caution to the wind. New plaids are big and bold, brazen and color-mad, for fashion is in a mood for drama in plaids this spring.

However, there is another side to the plaid story which has to do with conservative plaids that are in pastel colors so subtle, so winsome, that you will find yourself yielding to their enchantment at very first glance. Which all goes to show in the new spring collections that there's a plaid for every time, place and occasion and for every individuality.

Notwithstanding the color furore that is going on, there is much enthusiasm for black and white wool plaids. They are very new and very good-looking and have a unique style all their own.

The plaid costumes pictured typify the new trends. These stunning models were selected from among hundreds at a recent preview dramatically presented in a pageantry of fashion by the Style Creators of Chicago, an event that illustrated new achievement, new triumphs for American designers. Conveying the message that plaids are stylish this season, we illustrate three distinct types herewith—the long coat, the dramatic cape of which you will see an endless procession this spring, and the ever-favorite softly tailored long jacket.

The cape vogue is taking the

world of fashion by storm. The wearing of a plaid cape over a smartly tailored jacket suit is very practical to wear during the fleckle weather of early spring days. As an ideal ensemble for later on, you will be topping your crepe and print frocks with a cape in one of the pretty springtime colors. Note the smartly daped lady of fashion in the picture, who wears over a frock of gold hued crepe a full length wool plaid cape, straight lined according to latest althouetic trends.

One of the new and very smart gestures of fashion is to top your tailored suit with a coat of wool plaid. Provided with such a chic outfit as the sailor-hatted young modern in the picture is wearing, you will be ready to greet spring in fitting regalia. Furthermore, if you own a sleek tailored plaid surcoat, smartly straightlined and pocketed as the one worn by the model illustrated, it will prove a perfect treasure later on as a wrap to wear over various prints or plain frocks.

Note the good-looking plaid-jacket costume centered in the group. Here you see a very advance model in the new longer length. The bias cut of the plaid adds to its charm. You will love the hazy green gold and gray tones in this plaid. Worn with a sheer dress that features an all-around pleated skirt, this jacket will take you places in high style.

More plaid! Here's the latest—hat and enormous underarm bag of vivid plaid to add color glory to your new ensemble.

(Released by Western Newspaper Union.)

All-In-One Sleeves

There are important changes going on in sleeve styling. The new movement toward an all-in-one sleeve and bodice or sleeve and yoke is very obvious this season. You see it in the Chinese influence this season and in smart dolman sleeves. In this picture, the sleeve extends seamless at shoulders from the yoke section. The Russian-styled blouse underneath is of white linen, and the skirt repeats the slight flare of its own poplum.

Fashions Reveal Hawaii Influence

New fashion trends used to come 3,000 miles east from Paris. This season important fashion influence comes to us 6,000 miles out of the west. At the moment it is Hawaii that is interesting front-page fashion and social news.

Just as the Rhumba and the Conga have swept America, so will the Hula, the native sacred Hawaiian dance, one of the most beautiful dances in the world when it is danced and interpreted correctly, so declares Dr. Gladys, just returned from a year's research in Hawaii.

In their current resort collections the best stores throughout the country are making a feature of Hawaiian-inspired fashions. Dresses of Hawaiian prints by Tina Leser, well-known designer versed in Hawaiian lore, are especially a forerunner of costumes that will take lead in the spring style parade. The collection includes such interesting themes as a day dress of a flowery new lei print, also a charming Laui fern print is shown. Unique and very attractive are undersea fish patterns, a novel pineapple print, also fluted clam-shell motifs and the sensational Sarongs are greatly admired.

Tiny Bows Decorate

M'Lady's Spring Shoes

There is no type shoe so universally flattering to the foot than a neat-fitting shapely pump. This year pumps are decorated with bows of every description. You can tune your pump to almost any occasion via its bow.

For the tailored street look, the bow is of patent or the leather that fashions the shoe. Ribbon grosgrain bows act on the dressier types of shoes. Bows of perforated leather are very decorative. For dressiest wear are bows which are made of sequin or rhinestones.

Ask Me Another A General Quiz

The Questions

1. Who was the father of King Solomon?
2. In what year was the "Star Spangled Banner" designated by congress as the national anthem?
3. Jefferson Davis' first wife was the daughter of what President of the United States?
4. How long is a song protected by the copyright law?
5. Which of the following is a detergent—soap, handcuffs or sulphuric acid?
6. Do any banks in the United States have resources of over a billion dollars?
7. Is there any temple in the world dedicated to the founder of another religion?
8. In what profession is a metro-nome used?

The Answers

1. David was the father of King Solomon.
2. In 1931.
3. Zachary Taylor.
4. Fifty-six years. The term of copyright is 28 years, with right of renewal for 28 years.
5. Soap.
6. Yes, eight have.
7. The Mohammedan mosque in Damascus is named in honor of Jesus Christ.
8. Music (a device for marking time).

Doctors Store Blood Plasma For Emergency

Program Prepares to Aid Victims of Disasters On Short Notice.

(Released by Western Newspaper Union.)
NEW YORK, N. Y.—Large scale collection of blood plasma by the American Red Cross for the United States navy and army will be the proving ground for the development of a nationwide network of hospital blood banks, Dr. Charles R. Drew, medical supervisor of the plasma division of the Blood Transfusion association, predicts. He says this program was instituted to acquire stores of dried and liquid plasma both for the armed forces and for use in disasters involving civilians. Plasma can be substituted for whole blood in transfusions for treatment of many cases of injury, shock and illness.

"In case of need, the program could be expanded rapidly to reach thousands of donors in major cities," Dr. Drew explains. "As the technique and facilities for blood and plasma collection improve, the use of plasma, or serum, undoubtedly will increase. Plasma banks and blood banks are being more and more widely used in hospitals throughout the country."

Stored in Philadelphia.
"At the present time, blood for the national defense plasma program is being collected only in New York City," Dr. Drew continued. "The blood is being sent to laboratories in Philadelphia for processing into dried plasma." Dried plasma is easier to store and transport than the liquid form. It is less susceptible to infection because the moisture necessary to most bacteria life has been withdrawn. Dried plasma is restored to liquid form before it is administered in transfusions. Both liquid and dried plasma may be stored for long periods of time, even several years. Neither form requires "typing" to an individual patient's requirements when drawn from a supply made up of plasma from many individuals.

The Presbyterian hospital blood bank is representative of modern blood plasma banks. The "vault" is a special Westinghouse refrigerator, developed by the Times Appliance company, to meet the association's requirements. "A constant evenly distributed temperature and absence of vibration is essential in the plasma technique," Dr. Drew said. Maintain Even Temperature.

Special controls of the Presbyterian blood bank refrigerator maintain the temperature within one-tenth of one degree of 39.7 degrees Fahrenheit, the ideal cold point for blood and plasma storage.

The heart of the blood bank is the pooling room, a glassed-in cubicle in which the plasma is drawn off after the corpuscles have settled. The Presbyterian hospital pooling room is bathed in the bacteria-destroying rays of three Sterilamps. One Sterilamp casts a curtain of ultraviolet rays between technicians and containers and tubes with which they draw off and bottle the plasma.

Specifications of this refrigeration, Sterilamp and air conditioning equipment for blood banks, have been recommended to the National Research Council which is acting at the request of the navy, army and public health administration.

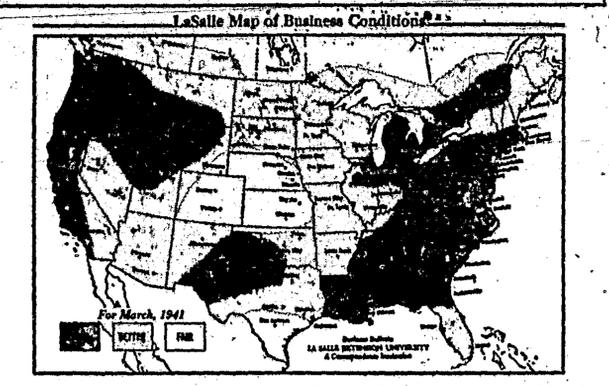

A trained technician is shown drawing plasma from a bottle of blood. Ultraviolet rays from three Sterilamps protect the blood plasma from bacteria in the air during the process.

Electrically Cleaned Air Helps Machine 'Breathe'
AKRON, OHIO.—Enough electrically cleaned air to meet the normal breathing requirements of 50,000 persons is being supplied continuously to ventilate a new 75-ton electrical machine for the Ohio Edison company.

The air is cleaned to keep dust and dirt out of the windings of a new synchronous condenser which regulates voltage and current on power lines.

Consumer Income Continues Rise

By L. G. ELLIOTT
President, LaSalle Extension University

More people are at work in factories and are earning more money than at any time in this country's history. Incomes of consumers are steadily rising, and the larger amounts of money in circulation keep the products of industry and agriculture moving at a more rapid rate.

Retail trade in all parts of the country is from 12 to 14 per cent higher than it was last year at this time. Volume of sales is increasing in rural districts and small towns, as well as in the larger cities.

Prices of many farm products have continued to rise. Even those prices that have declined recently are, for the most part, higher than they were a year ago. Prospects are that the increased purchasing power of consumers will keep prices and cash farm income above the average of last year.

Many farm products are being used in increasing volume. Production of milk and dairy products has made a new record and indications point toward a continued high level as long as consumer demand remains steady or increases. Farm prices of dairy products have been the highest in four years, and income from dairying is expected to be the largest in a decade. Prices for poultry and eggs are also higher this year than they were last year. Exports of industrial products, especially war materials, are large, while those of agricultural products continue to be small. Unless con-

ditions abroad change considerably these trends are likely to continue for some time. Larger domestic demand and the government farm program will do much, to keep up farm prices even though surpluses in many products are large.

Prospects for 1941 crops are good because precipitation in most parts of the country was above average during the winter. Exact estimates of the probable harvest cannot be made this early in the season, but the outlook now appears favorable. Farmers are planning to have about the same total acreage in cash and feed crops as they planted a year ago. Government payments are expected to be about the same in 1941 as they were last year. Good crops and rising prices will probably push farm income to the highest level in many years.

Woman 'Railroader' Marks Fifty Years Of Active Service

"... I must make good... I must keep this job."

Fifty years have passed since a young girl, Katherine Loretta Connell, repeated these words to herself on the way to her first day of service in the employ of the Union Pacific railroad at Omaha, Neb. She has kept that pledge made to herself and now is believed to be the oldest woman employee in point of service on the railway's entire service.

Early this month she passed that fiftieth milestone and recalled some of her early impressions of railroad work in those days.

"It seems as though it was only

Katherine L. Connell (left) as she appeared when she started work for the railroad 50 years ago, and (right) as she looks today.

yesterday when I went to work," she says.

In those days the company's headquarters in Omaha employed about 500 persons and in her tenure of service she has watched this number grow to nearly 2,000.

Especially does she remember her first salary of \$35 a month as freight car mileage clerk, which was a "very comfortable" salary in those days, Miss Connell recalls. She has worked under seven immediate superior officers, her present position being in the company's auditor of equipment service accounts office.

Supervisory Positions.
She has held supervisory positions with the company since February 1, 1900, when she was appointed head clerk in the statistical bureau. For 24 years she was a head clerk, and since 1932 has been assistant bureau head.

Her life belongs to the romance that is railroading, for her father too, was an employee of the Union Pacific. He died shortly after her birth, of a cold, contracted on the job.

It was after this that a company official promised her widowed mother that as her children grew up they would be given work, if they desired, with the railroad. Years later the official kept his promise and Katherine went to work.

Her mother dying 16 years ago, and a brother Pat more recently, Miss Connell has been left without kin except for two nephews. But she finds comfort and great companionship both in her work and in a wide acquaintanceship of friends. She is active in several Omaha business and social organizations.

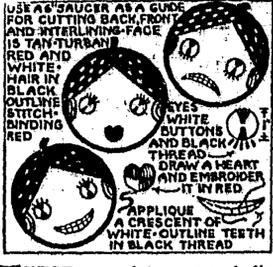

Bloodstone's 'Powers' Considered Miraculous

NEW YORK.—Ancient legends gave the wearer of the birth gem for March, the bloodstone or jasper, a wide choice of miraculous powers, ranging from calming the wrath of betators to stopping a nosebleed, according to Natural History magazine.

Among alleged qualities of the bloodstone is that its owner will be believed, whatever he may say.

HOW TO SEW

by Ruth Wyeth Spears

other crosswise through the center. The two pieces for the bandanna lap one inch below the top of the up-and-down line. Their lower ends come one-half inch below the ends of the crosswise line. Stitch these in place. The one-inch buttons for the eyes are spaced two inches apart and the tops are one-fourth inch above the crosswise line of basting. The top of each mouth is 1 1/2 inches below this crosswise line.

NOTE: There are many other illustrated ideas for gifts and bazaar items in numbers 2 and 4 of the series of 32-page booklets which Mrs. Spears has prepared for our readers. She will mail copies to readers who will send name and address with 10c in coin for each booklet ordered. Just address:

AGAIN CHEVROLET'S THE LEADER

City Garage

V. REIL, Prop. Phone 86 Carrizozo, N. M.

Internal Revenue Service

This is the income tax filing period. The Congress has changed the law so that the liability for filing a return is now based on gross income and not net income as in the former years. The base also has been changed, so that single persons whose gross income is \$800 a year, and married persons whose combined gross income is \$2,000 for a year must file a return. Last year this base was \$1,000 for single persons and \$2,500 for married persons.

The exemptions have also been lowered to \$800 for a single person and \$2,000 for married persons. The credit of \$400 for each dependent has not been changed.

Last year nine million income tax returns were filed with the Bureau of Internal Revenue. This year, partly because of these changes, the Bureau expects fifteen million returns to be filed.

Pleasant Social Hour

Mr. Brewster, Colonel Jones and wife, Hollis Jones and wife, and Mrs. Dan English visited W. J. and Mrs. Ferguson Monday night and all engaged in singing. Mr. Ferguson made recordings of several numbers and played them back on his new radiophograph-recorder machine.

Mr. L. J. Adams has returned from a trip to Tulsa, Okla.

Mr. Eddie Long was in town today representing the Titsworth Co. The Titsworth Company are expanding their business in many ways. They have added many feet of floor space and have increased their stock to many different items, not carried formerly.

Mr. A. N. Rannels of Nogal was in town last Tuesday, attending to business matters. While in town Mr. Rannels renewed his subscription to the Lincoln County News.

Mrs. S. H. Nickels, teacher at Jicarilla school announces a box supper and dance at the Jicarilla school house on March 15th. It is hoped a good crowd will turn out.

Mrs. Van Schoeyk Jr., and baby of Tucumcari visited relatives here and at White Oaks last Friday and Saturday.

Mr. L. P. Hall of Ancho was a business visitor in Carrizozo last Saturday.

Lost Combination Is

Found, Safe Is Barren
TULSA.—A cry of triumph rang through the city hall when Hubert Smith, secretary to Mayor C. H. Veale, found a long-lost combination to a safe in the mayor's office which hadn't been opened since the former mayor left. Smith called Veale and together they opened the safe. It was empty.

Dying Miner Seals Body in Solid Ice

Believed Done to Save It From the Wolves.

FAIRBANKS, ALASKA.—Out of the frozen Yukon came the uncanny story of an aged Alaskan sourdough who, dying in the wilderness, was believed to have deliberately entombed his body in ice to save it from the wolves.

Encased in solid ice, the body of 84-year-old Edwin A. Robertson was found by a searching party in a glacial stream where a little trickle of water still flowed over the ice.

His rifle, the tracks of wolves and a tiny heap of sticks with which he had tried vainly to build a fire were found beside the stream.

Robertson, a Maine man who had spent most of his life in the wilds of interior Alaska, lived in a lonely cabin on a Seventy Mile river. On November 14 he set out for Engle, near the Alaskan-Yukon territory border and less than 100 miles below the Arctic circle.

The weather was bitterly cold, the route untraveled and without shelter and the country infested with packs of wolves.

As United States Commissioner R. E. Steel reconstructed Robertson's end, darkness overtook the old timer on the trail and he tried to camp for the night beside the stream. But when he was unable to light a fire, death from freezing swiftly approached.

The commissioner believes the howling wolves and the certainty of death then impelled the Alaskan pioneer to take the step which cheated the wolves.

From the position in which the body was found with parka pulled over his head and his arms folded, Steel was convinced that Robertson had purposely lain in the stream, with the freezing water trickling over him, to make sure the wolves would not get his body.

Once-Rich Man Is Found

Dying in Stripped Home
SEWICKLEY, PA.—There was no sign of life in the huge, ornate house set in spacious grounds in this exclusive Pittsburgh suburb when police approached. They had been called by neighbors, who reported that they had not seen A. Campbell Stewart, owner of the house and last of a once prominent family, for several days.

The officers knocked. Receiving no answer, they crawled through a window into the great drawing room. It was cold and barren except for a few pieces of worn furniture—pieces that obviously had been priceless.

In an upstairs bedroom, cluttered with family heirlooms, they found Mr. Stewart lying, semi-conscious. He died at Valley hospital soon after he had been removed there. A post-mortem was to be performed, but authorities believed malnutrition and exposure—there was no heat in the big house—had caused his death.

None of his wealthy friends, who frequently had attended social gatherings at his home, had known of his plight. Too proud to ask for help, he had been selling the furnishings of his home little by little to obtain food. Apparently he had balked at parting with the remaining heirlooms.

Only a few months ago he had lent treasures left by his grandfather, Col. David Campbell Stewart, Civil war hero, for exhibition during a Sewickley centennial exhibition.
