

# LINCOLN COUNTY NEWS

Official U.S. Land Dist. Paper

VOLUME XV—(Carrizozo News, Vol. 29)

CARRIZOZO, NEW MEXICO, FRIDAY, APRIL 4, 1941.

NUMBER 89

## Lyric Theatre

R. A. Wilker, Mgr.  
FRIDAY and SATURDAY  
Tim Holt, Ray Whitley, Virginia Vale

### "ROBBERS OF THE RANGE"

The struggle between small ranchers of the Blue Mesa and crooked representatives of the railroads of the last frontiers of 1880. Lots of action and cowboy songs. Sportscopie and Beated by a Beard.

SUNDAY, MONDAY & TUESDAY  
Mickey Rooney, Judy Garland, June Frisesser, Paul Whiteman

### "STRIKE UP THE BAND"

Mickey and Judy, Hollywood's two talented youngsters team again in this, fast moving musical comedy. Gay, sparkling and full of fun. Paramount News and "Christmas Under Fire."

WEDNESDAY and THURSDAY  
Ann Magel, Ray Milland, Rolland Young, Alan Marshal

### "URENE"

The Cinderella-story of a vivacious little Irish colleen who, from a sales-girl becomes the talk of New York. Filmed partly in technicolor with lots of music and dancing. "Kentucky Royalty" and "Information Please"

### WOMEN'S CLUB NOTES

The Woman's Club held their regular meeting Friday, March 21, with Mrs. Turner, President in the chair. Meeting was opened by singing "God Bless America," followed by the pledge to the Flag. Secretary's report read and approved. Treasurer's report read and approved. Mrs. Kelly, chairman of the Spring Festival announced a Silver Tea to be given April 5 at the Community Center, and a picture show April 10. Mrs. Hall announced a meeting to be held at the home of Mrs. Paul Mayer Thursday afternoon, March 27 to arrange a club to study Parliamentary rules. Mrs. Nicholas, Mrs. Petty and Mrs. Davis are to see the city council in regard to getting some one to take care of the garbage. Mrs. Eaker had charge of the following program: piano duet, "Salute to the Colors," Anne Eaker and Adaline Stokes; vocal solo, "Winter Lullaby" and "Senorita" by Elizabeth Carret, and Ruth Perry; paper on "Notable New Mexicans—Native and by Adoption," Madena Brady; song, "O Fair New Mexico" by the club. Dainty refreshments were served by the committee.

Mr. and Mrs. T. E. Kelley came home last Saturday from a two week's trip to Fort Worth and other Texas points where they visited Mrs. Kelley's relatives.

Mrs. Bryson Corbett and little son were here from Albuquerque Sunday to visit her parents, Mr. and Mrs. T. E. Kelley.

### CARRIZOZO SCHOOL NEWS

**Easter Cantata**  
The Methodist choir is sponsoring an Easter Cantata which is to be presented at the school auditorium Easter evening at 8:00 p. m.

The cantata, "Hosanna," by Roy E. Nolte, being sung by about thirty singers under the direction of Mr. Clyde Brewster, promises to be the best that the town has ever known.

We urge a large attendance at this event.

There will be no charge for admission, but an offering will be taken to pay the expense of production.

Rev. L. D. Cochran taught four days for Mr. Woods while he was away attending the funeral of a relative.

The eighth grade assembly program last Thursday was greatly enjoyed by a large audience. Mr. Lloyd Hughes, sponsor of the eighth grade, deserves great praise for his commendable rendition of the program. His solo was unique.

Our Junior Hi Girls Basketball team enjoyed the tournament at Hondo even though they did not win all their games.

The student body and many visitors looked forward with pleasure to the coming of the Glee Club from the A. and M. College of Las Cruces.

This quotation, decorates the walls of one of our school rooms. "There is no defeat in life, save from within; unless you are beaten there, you are sure to win."

### The Radicals Asked For It

Reports to the effect that the Federal government is planning to establish some sort of a new labor mediation board, with wide powers, should not come as a surprise. Certain segments of labor have shown themselves completely irresponsible. They have delayed the defense drive. They have stopped production in important factories. They have, in short, taken advantage of the nation's need to "demand the moon."

Mrs. L. A. Hughes left last Tuesday morning for Mountainair. She was accompanied by her mother, Mrs. F. A. Simms, who has been spending a few days in the Hughes home. Mrs. Hughes went from Mountainair to Albuquerque where she attended the Annual Conference of the Woman's Society of Christian Service, which convened there.

Mr. Wm. S. Norman, Southern Pacific fireman spent the week end here with his family. Mr. Norman's run is between here and Tucumcari.

Mr. B. E. Nosker, Postmaster at Glencoe, N. M., was in the city on business Thursday.

Miss Dorothy Bates has been ill of influenza for two weeks.

### THIS WEEK IN DEFENSE

The following is a brief summary of information on the important developments of the week made available by official sources through and including today, Friday.

The National Defense Advisory Commission charged the Office of Production Management, Plant Site Committee with "the main responsibility" in selecting locations for new defense production facilities. The Committee will attempt to choose uncrowded areas and regions suffering a decline in peacetime industries widely, and increase subcontracting to distribute defense contracts more to utilize all human and natural resources. It will also review plans already formulated.

The Maritime Commission announced it favored extension of existing shipbuilding facilities rather than building new plants in order to avoid fly-by-night financing and "further dilution" or scattering of experienced management and labor.

Congress authorized a defense housing insurance fund of \$10,000,000 with which to underwrite \$100,000,000 in mortgages on defense homes. Construction contracts for 2,400 new defense housing units, largest number in any one week, brought the total to 43,367—of which 25,377 are for civilian workers, 17,990 for enlisted personnel.

The OPM announced scheduled defense expenditures total nearly \$40 billion, including \$7 billion for British aid. Nearly \$30 billion represent appropriations and authorizations already made and the rest is in bills now before Congress. Actual cash spending from last June to March 17 amounted to \$3.5 billion.

The Treasury announced income tax returns reached \$1,189,000,000 in the first 20 days of March, far exceeding estimates. U. S. savings bonds and stamps to help finance defense will go on sale May 1, the Treasury said. Stamps can be bought for as little as 10 cents and bonds as little as \$25.

President Roosevelt signed legislation authorizing additional Navy expenditures of \$40,334,368, including \$60,000,000 to complete air bases in British possessions. Congress voted \$75,000,000 more for defense housing and \$22,500,000 for the National Youth Administration to train 400,000 youths in defense industries.

The House passed and sent to the Senate the fifth supplemental defense appropriation bill providing \$4,078,810,074 for the Army and Navy in fiscal 1942, including \$1,000,000,000 for 3,000 Army bombers.

The OPM Labor Division announced the settlement of eight strikes in defense industries: Bethlehem Steel Corporation, Bethlehem, Pa.; American Chain and Cable Co., York, Pa.; Todd Shipbuilding Company, Galveston, Texas; Union Electric Company, St. Louis, Mo.; Dolese Brothers, Wichita, Kans.; Walworth Co., Boston, Mass.; Ray Day Piston Corporation, Detroit, Mich.; and the Indiana Steel Products Co., Valparaiso, Ind.

Secretary of Labor Perkins asked Defense Mediation Board action on four strikes: International Harvester Company, four plants, involving 24,000 workers; The Condenser Corporation, South Plainfield, N. J., 2,200 workers; Vanadium Corporation, Bridgeville, Pa., 225 workers; and the Universal Cyclops Steel Co., Bridgeville, 1,400 workers. The Board asked the disputants to resume production and prepare to negotiate with the Board. Shortly afterwards the Cyclops Company strike was settled.

Secretary of War Stimson stated "steps must be taken" to reduce delays on defense orders caused by strikes. Under Secretary of War Paterson said several strikes were very seriously affecting the Army re-armament program. Interior Sec. Ickes said the Allis-Chalmers tie-up was holding back equipment to supply power to defense plants.

A Social Security Board survey showed 351,000 available workers with primary skills in selected defense industries—more than half in New York, California, Ohio, Illinois, Michigan, Pennsylvania and Texas. Most workers are in construction occupations. In some metal trades none were found. Only a "relatively small number" were found for aircraft and shipbuilding work.

The Department of Agriculture prepared to aid local committees in determining and avoiding farm labor shortages and dislocations. The OPM began consideration of new jobs

### MAJOR STANDS GUARD

**FORT BLISS, Tex.**—A train was whisking officers of the 206th Coast Artillery and 400 selectees from Arkansas to El Paso. One of the novices was standing guard at a door when Major Stanley M. Gates approached. "Say Bud," called the draftee, "You guard this door awhile. I want to get something to eat."

And the major, unwilling to nip an army anecdote in the bud stood guard.

Mrs. Elmer Eaker, who underwent an operation at the Turner hospital is recovering nicely.

For workers in industries slowed by the affect of priorities on vital materials.

The U. S. Employment Service announced it would inform local schools which types of defense vocational training should be given priority. The OCC announced it has speeded up training valuable to defense industries and that beginning April 1 it will enroll 65,000 boys between 17 and 23.

Selective Service anticipated a shortage of certain experienced merchant vessel seamen and recommended their deferment to Class 1-A. An amendment to the Selective Service Act was approved by the House to exempt former marines, coast guardsmen and sailors.

Secretary of the Navy announced awards of contracts totaling \$100,315,682 for 239 submarines and fleet tugs. Maritime Commission awarded contracts totaling \$206,500,000 for 187 ships in the President's 200-vessel emergency program.

The NDAO issued statements that recent rises in the prices of sugar and quicksilver were unwarranted. Actually the supply of sugar for consumers is larger than usual, the agency said.

The NDAO also set a ceiling on rising aluminum prices and said if similar unwarranted increases continue in iron and steel scrap and materials used in shoes, additional price ceilings will be established.

Congress passed and the President signed legislation appropriating \$7,000,000,000 to provide Great Britain and other democracies with war materials. The OPM announced 200 tons of magnesium would be delivered to Britain shortly.

The State Department announced arrangements to send two shiploads of flour to occupied France under Red Cross supervision.

The Department informed the new Jugoslav Government aid was possible under the lease-lend program.

The OPM issued General Preference Orders placing British and U. S. defense needs for magnesium, tungsten and machine tools ahead of civilian needs and providing that civilian orders can be filled only with special permission. The OPM also applied a formula for the allocation of all aluminum and aluminum alloys, and directed producers to set aside each month one per cent of their production as an emergency reserve.

Grand Coulee Dam, world's largest structure and greatest source of hydroelectric power, was placed in operation two years ahead of schedule. The U. S. and Canadian Governments prepared plans for the St. Lawrence power project—described in a Commerce Department report as an even larger power source.

The Securities and Exchange Commission invoked a law providing for elimination of companies which "unduly or unnecessarily complicate" public utility operation and ordered dissolution of the top holding units of the \$600,000,000 United Light and Power System. The Georgia Power Reserve Cooperative became the first cooperative to receive a Federal loan for an emergency mobile power reserve.

Predicting a local need for policemen, firemen and health authorities trained in civilian defense, an OPM committee recommended a training program supervised by local authorities with financial and technical assistance from the Federal Government.

War Secretary Stimson stated formation of Home Guards should be speeded to replace National Guard units in the case of serious labor disturbances or other situations liable to retard the defense program. He said Home Guards are "under way or will begin soon" in 36 states.

### WIDELY KNOWN ATTORNEY PASSES AWAY

J. Charles Gilbert was born in Arkansas and came west when a young man. He has been an attorney most of his life, practicing many years in Roswell and moved here three or four years ago and practiced law here until his health failed a year or so ago. In fact he kept up some activity until quite recently.

He passed away in a local hospital Wednesday afternoon, March 26th, where he had been taken Friday, following a stroke.

Mr. Gilbert was sixty years of age. He was widely known and highly respected.

He will be buried in the local cemetery Saturday morning. There will be a Rosary Service at the French Chapel Friday at 7:30 p. m. and a funeral service at the Catholic church Saturday at 9 a. m. Rev. Father Dokl will conduct the Rosary and funeral services. The Woodmen of the World will have charge of the graveside service.

Mr. Gilbert is survived by his widow Mrs. Elma Fierrez Gilbert, two sons, J. Chas. Gilbert, Jr., of Roswell, and Gatewood Gilbert, of Kansas City, a daughter, Mrs. R. D. Haire, of Denver City, Texas and by a former wife, Mrs. Kate G. Gilbert. Hot Springs Herald, March 27, 1941.

Mr. Gilbert practiced law in Lincoln county for a number of years when his home was in Roswell. He has many friends in this county who regret to learn of his death.

### Local and Personal

Mr. W. J. Langston is proudly wearing his 30-year pin presented by the local I. O. O. F. last Tuesday, April 1st, at their regular meeting.

Among 29 prospective firemen certified to the Fire Department eligibility list by the Civil Service Commission at Stockton, Calif., was the name of Marshall Lujan, son of Ben Lujan, former Lincoln County Commissioner.

Read the ad then see the new Serval Electrolux at the Carrizozo Hardware Co.

Jack Harkey was at home Sunday from Fort Bliss.

Mrs. Edith Beck of Alamogordo was a guest of the Dudley family last Sunday.

The new Frigidaire is for sale by Lincoln County Utilities Co. They are always ready to answer inquiries.

Paden's Drug Store has dressed their soda fountain all up—in real marble. A combination of brown and green has been used, which creates a favorable impression.

J. C. Hutcherson came up from Ft. Bliss last Sunday to visit his mother. Like most of our young men, J. C. is in the Army for a year.

The Petty General merchandise store is making a very interesting offer to their customers. Don't fail to read their ad on page 8.

Saturday. A dance at Hammett's hall, Capitan, sponsored by Lewis and Burch.

FOR SALE—Turkey eggs. See Mrs. Seldon Burkes, Capitan, N. Mex.

Mr. E. V. Morris, of the Hondo store, was in Carrizozo Wednesday on business.

Buy your Easter Hams at T & G grocery. Fancy, and already cooked.

Ramon St. John of the Tokay CCC camp spent Sunday at the home of his grand-mother Mr. P. C. St. John who has been very ill for about a month. Ramon was recently promoted to sergeant.

Lorenzo Mirabal, Fort Bliss soldier, spent Sunday here with his family.

### Village Report

Minutes of regular meeting of Board of Trustees held at City Hall April 1, 1941, at 7:30 p. m.

Member present: M. U. Finley, Mayor; R. E. Shafer and G. T. McQuillen, members, Morgan Lovelace, clerk and Roley Ward, Marshal.

Members absent: A. J. Scharf and D. Chavez.

Minutes of last meeting were read and approved.

Mrs. Nicholas comprising a committee representing the Woman's Club met with the Board of Trustees for the purpose of discussing with the Board the matter of disposing of garbage, refuse, trash etc., in the alleys and streets of the village. The Board agreeing to cooperate in every way available.

Motion by G. T. McQuillen and seconded by R. E. Shafer that Mansfield Tweedy be employed by the Village to audit the books for the fiscal year ending June 30, 1941. Motion carried.

Motion by R. E. Shafer and seconded by G. T. McQuillen that the application of Marvin Burton for a building permit be granted. Motion carried.

The following bills were approved and ordered paid.

El Paso P. V. Trunk Line	.50
Lincoln Co. Utility, at lights 58.38	
" " office " "	1.96
S. P. Co. water for Feb.	239.54
" " Freight	6.24
El Paso PV truck line, freight	.50
Tom Current, labor, park	14.00
Roley Ward, Marshal sal.	100.00
Morgan Lovelace, salary	90.00
Fay Harkey, water supt. s.	17.50
J. M. Beck, fire truck m.	5.00
J. M. Beck, paint job	35.60
Paul W. Wilson, labor	9.60
Horkey Lumber Co. paint	1.70
" " " park sup.	32.90
" " " cartridges	.35
Sabino Vidaurri, cloth	1.00
Mt. States Tel. phone	7.20
City Gas Co. fuel	4.76
C'zozo Auto Co. gas, oil, rep.	7.79
John Scharf, labor, park	10.00
M. U. Finley, reimbursement	1.00
Art Concrete works, 24 lids	26.40
Crane O'Fallon Co. 12	
Corp. Stops	14.37
12 Curb Stops	25.20
Total	707.24

There being no further business presented the meeting adjourned.

**NOTICE.**—The picture show to be given for benefit of Woman's Club will be on May 14th and 15th instead of April as stated in the Woman's Club notes. Club Reporter.

Born: to Mr. and Mrs. Vic Lopez an 8 lb. girl Tuesday morning.

Mr. and Mrs. B. L. Stimmel have arrived home from California and Washington where they had been spending the winter.

Wedding Saturday

Miss Frances Eariena Berry became the bride of Mr. Garvis Wayne Tubbs, at a quiet wedding, solemnized at the home of the bride's parents Mr. and Mrs. R. E. Berry, last Saturday, March 29th at 7:15 in the evening, with Rev. L. D. Cochran, pastor of the Baptist church performing the ceremony.

The bride was born and reared in Carrizozo and was graduated from the local high school last June. She is very attractive and her quiet, unassuming demeanor has won her a world of friends.

The groom came here about three years ago from Ivanhoe, Texas. He is an exemplary, and highly regarded young man. He is employed at Camp Mal Pais. They will make their home in Carrizozo. Best wishes are extended by their many friends.

### KNOW YOUR BANK

**A Customer's Relationship With His Bank Is Confidential**

A bank in serving its customers comes in possession of a great deal of confidential information about their personal financial affairs. It obtains this information through handling their savings and checking accounts, and through information about their personal finances and business which is given when they apply for a loan.

This confidential information is to us a secret trust. Our officers and employees are forbidden to discuss customers' affairs outside of a bank, and only as little as necessary inside the bank to properly transact the bank's business. Employees are carefully instructed to answer questions about customers only to properly authorized persons.

## Making Fish Lines That Will Hold the BIG Ones

Imported silk and flax fiber are two important materials used in the braiding and twisting of the kind of fish lines that hold the big ones. The manufacture of quality lines of this kind is one of the most unique industries in the Redwood Empire counties of northern California and southern Oregon. These photos take you through one of the plants at Petaluma, California.

Dena Jacobsen places a valuable stein of pure imported silk on a large wooden spindle, preparatory to winding on uniform size spools.

Right: J. W. Woodson, plant manager and mayor of Petaluma, inspects a battery of "twister" and "layer" machines in action. The former twists any number of desired strands together, while the latter picks up and lays three of such strands to gether to comprise finished product.

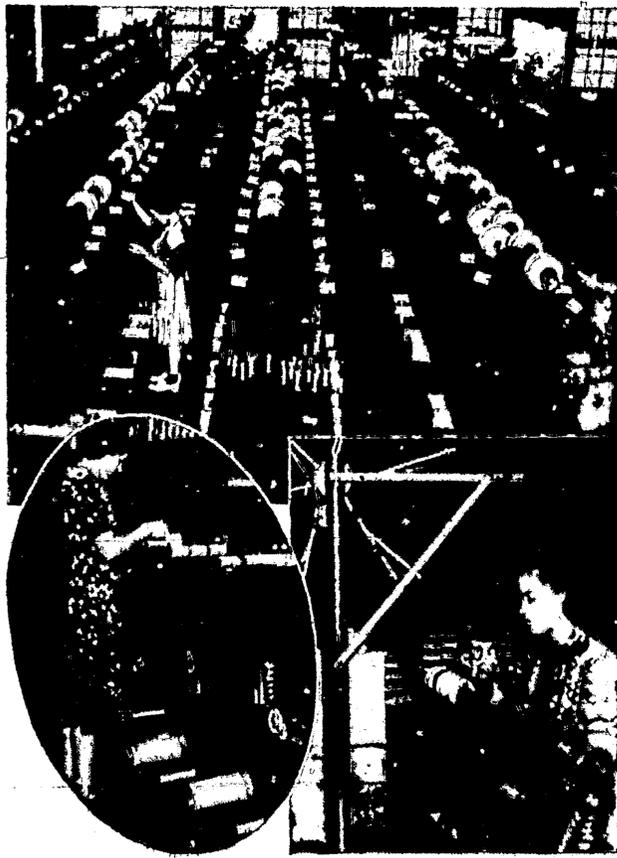

Picture Parade

Left: Ruth Bon delle, standing in front of a line "polishing" unit displays an armful of "treated" oil fly and tapered lines on her right. On her left arm are oil-treated bait casting lines.

Below: A battery of 300 braiding machines, representing the latest method of converting raw materials into sturdy lines. Following braiding the lines are carefully inspected and wound on spools.

Finished twisted lines being placed on paper tubes, ready to be wound on the fisherman's reel.

Fine trout lines are minutely inspected. This girl "feels" the line for lint or any foreign substance.

A lucky fisherman takes a salmon from the world famous Rogue river in the Redwood Empire of southern Oregon.

## Men in U. S. Army Best Fed in Nation With Meals Carefully Planned by Experts

By HOPE CHAMBERLIN

(Released by Western Newspaper Union.)  
 ET. SLOCUM, N. Y.—America's rapidly growing army will be on display April 7 as Army Day is observed throughout the nation. Whether visiting civilians know it or not, they will be watching the best fed army in the world. They will see men whose diet is watched so carefully that even the number of calories and vitamins they eat are planned far in advance.

"Uncle Sam feeds its soldiers better'n 72 per cent of American families are fed," these are the words of Sergt. Thomas L. Delvecchio, boss of the U. S. Army School for Bakers and Cooks at Ft. Slocum, N. Y. And he should know!

Proof of Sergeant Delvecchio's statement comes from Maj. Paul Logan, food expert of the army's quartermaster corps, who states emphatically that the army is and will continue to be the best fed group of our population!

In averaging the analyses made of army messes throughout the country, it was found that the American soldier consumes 5,139 calories a day, as compared to the 3,000 of the average American. In vitamins, the soldier averages 5,760 units of vitamin A, 1,173 of vitamin B, 46 milligrams of vitamin C, and 2.3 milligrams of vitamin B2—all in greater quantities than the average American!

Served Nutritious Food.  
 "Come and get it!" to the soldier of 1941 means a plentiful of good, palatable, nutritious food. To food wholesalers and government men it means hard work behind the scenes.

Before conscription, when the army had no more than 50,000 men, split into given units, the food-buying problem was simple. The 130-odd camp quartermasters went personally to local markets.

But the problem changed overnight. Not only will the army shortly have a million and a half men to feed, but the number of men in each camp will be tremendous. Camps of 25,000 men require more food than cities of equal size. The army will be about the biggest food buyer and distributor in the country, exceeded in size only by A & P and perhaps one or two other chains.

On certain staple items, such as canned goods, army purchases may well amount to from 10 to 15 per cent of total production. Food orders that used to require less-than-carload shipments will call for the shipment of many solid carloads. So, independent local buying is out of the question, and centralized purchasing is the only logical answer.

### Regional Markets.

New York offices will buy all sugar, coffee, tea, spices and other manufactured items. Chicago will buy all canned vegetables, canned meats, cereal, flour and similar foodstuffs produced on a nationwide basis. San Francisco will buy canned and dried fruits, salmon and other West coast produce.

By May 1, the date when the army will start issuing rations to local quartermasters in actual food, rather than cash, these new super offices will be ready to take over all contract letting, according to Douglas Mackevich, food purchase co-ordinator.

When it comes to buying food, the army is far more finicky than the average housewife. Old army rules read that a packer could deliver on an army contract no lamb weighing more than 45 pounds, and the soldiers' mess tables used to be guarded against all but steer beef. But that's all changed now.

Because the army can't be guided by what the book says, but by what

K. P. (kitchen patrol) ain't what it used to be. These giant speed peelers can each peel a bushel of potatoes a minute.

Even though meals are now scientifically planned by experts, army cooks look the same as they did back in '17. This field kitchen staff is hard at work preparing for "mess," because the soldiers will probably be very hungry.

the market offers, lambs up to 60 pounds will be acceptable until April 30, when the new group is well along. Helder meat will be acceptable for boxed, frozen field supplies.

Smaller Cans Used.  
 The army has also stepped down its ideas on can sizes and will hereafter buy some of its spiced pork products (such as Spam and Prem) in the 12-ounce cans of retail trade, instead of holding doggedly to only those cans large enough to feed a battalion. Also, six-ounce cans of emergency rations will be bought in large quantities.

Soldiers generally get meat for five dinners, five suppers and four breakfasts a week. Allowances for the noon meal alone average around one-half pound per man—more meat than the civilian ordinarily engulfs, no matter how prosperous.

The foregoing facts are probably adequate to convince the reader that military experts recognize the importance of good food in maintaining a high esprit de corps, morale and efficiency of an army. Without good food and nutrition, all other preparation, no matter how carefully planned, will not be brilliantly or efficiently executed.

The collapse of Germany in 1918 was partially due to malnutrition of the German soldier; the rout of the Italians in Caporetto in October, 1917, has been traced to the drastic reduction in the Italian army ration put into effect the preceding February; similarly, the defeat of the British at Gallipoli in the Dardanelles campaign of 1915-1916 has been attributed to the failure of mind, nerve and muscle, caused by rations so unbalanced as to permit a high percentage of both beri beri and scurvy.

Aware of the importance of food, the quartermaster corps, directly responsible for providing food, and plenty of it, has efficient personnel, highly trained in the science of nutrition, inspection, and preparation of food.

### Maintain Cooking School.

Because there has been difficulty in the past in obtaining enough good cooks, the army even maintains cooking schools (one of which is located in every army corps area) whose facilities may be, severely tested by the rapid growth of our citizen army. The best cooks, it is said, are Negroes, Frenchmen and Italians.

The ration (food provided for one man for one day) being used by our citizen army for its one-year of training is called the Garrison ration. It consists of 39 items, such as 10 ounces of beef and 8 ounces of other meats; 10 ounces of potatoes and 11 ounces of other fresh vegetables; 12 ounces of flour; 1 1/2 ounces of rolled oats and a little more than 10 ounces of rice and dried beans; 20 ounces of butter; 1 egg; 1 1/2 ounces of lard; 8 ounces of fresh milk and 10 of evaporated; 8 ounces of sugar; 5 ounces of fruit, 20 of coffee and smaller amounts of various others, such as jams, jellies, peanut butter and condiments. The shipping weight of this food is 5 1/2 pounds every day for each man. The cost? \$750,000 a day for a million and a half soldiers.

This Garrison ration, however, is not limited to these 39 items, which might become monotonous. This is prevented by a system of substitution, which permits the mess officer to substitute other items in the same general class of foods of about equal nutritive value. That is, in place of the 10 ounces of beef each day, he may substitute an equal amount of lamb, mutton, veal, liver, or pork.

Latest news for army diets is the plan for feeding soldiers bread fortified by the morale-building B vita-

mins, which, authorities claim, will make them better fighters.

Strain on body and nerves which modern warfare brings about with its lightning speed, whirl-wind devastation and nerve-shattering machines causes army nutritionists to feel that soldiers must be fed not only enough food of the right kind, but enriched foods.

Dehydrated foods are also undergoing tests. These foods occupy little space, and therefore help the quartermaster corps in its continual battle to ship as much food in as little space as possible. Soldiers recently ate a test dinner prepared entirely from dehydrated foods, except for the meat and gravy. The menu included cream of tomato soup, roast beef with brown gravy, mashed potatoes, creamed carrots, cole slaw, cranberry jelly, apple and pumpkin pie.

A pound of cranberry flakes, "gross weight," expands to serve 100 soldiers, whereas a pound of canned cranberry jelly represents only 6 1/2 servings.

Food value of the dehydrated preparations is apparently equal to that of canned foods, but tests are now being conducted to obtain accurate information as to the vitamin and mineral values that the dried foods contain.

All this planning is a far cry from the meager unbalanced meals fed the Colonial Army. And it proves that those in command are leaving no stone unturned in their effort to serve, in American Army camps everywhere, the finest mess on earth!

## Tuberculosis Death Rate Found Highest Among Young Girls

MINNEAPOLIS.—Girls between 15 and 25 years of age have lagged far behind young men of the same ages, in the improvement of the tuberculosis death rate.

Each year 65 per cent more girls die from the disease than their brothers, boy friends and husbands in the 15-25 age bracket, according to a study by the Northwestern National Life Insurance company.

In the United States tuberculosis does its deadliest work nowadays among women of child-bearing ages, the population segment most vital to America's present and future, the study points out.

Biological differences—the greater changes in the female organism at adolescence—make girls and young women naturally more susceptible to tuberculosis.

The male death rate from tuberculosis overtakes that of women at about age 30, and thereafter runs steadily higher, but in the child-bearing ages from 20 to 35, 22 per cent more women die of tuberculosis than do men of corresponding ages. The greatest number of deaths from this cause among any five-year age-sex group occurs among young women aged 20-24, and the second largest group of fatalities occurs among young women aged 25 to 29.

Since girls first reach maximum susceptibility to tuberculosis in their early teens, the report suggests that all high schools should conduct health classes in which effects of "fad" diets, tobacco, alcohol, insufficient sleep, and scanty clothing are graphically taught.

It also recommends that parents of teen-age and older girls should act promptly upon observing any symptoms of lassitude, even slight elevation of temperature, or loss of appetite.

A tuberculin test should be made, supplemented by X-ray chest examinations wherever indicated. If there has been any exposure through association with a case of tuberculosis in class or elsewhere, tests should always be made.

A case of pleurisy without pneumonia, the report warns, should in the case of a girl or young woman be considered tuberculosis until definitely proved otherwise. If tuberculosis is detected in its early stages and modern treatment is promptly begun and carried through, a cure is usually assured.

## PATTERNS

PERFECT for slim, young figures, this flaring frock has a tiny corselet waistline, and bodice gathers to round you out a bit. With the bolero, it serves as a "little cult" for street wear. Make this of gay silk prints, or flat crepe, plain or with lots of braid in bright contrast.

Pattern No. 8880 is designed in even sizes 12 to 20. Enclose, with 14, 0 1/4 yards 35-inch material without nap. For this attractive pattern send to:

## Government Buys Trailers for Defense Workers

WASHINGTON.—More than 2,000 automobile trailers are to be purchased by the government to furnish "stopgap" housing in crowded defense areas.

These orders are expected to absorb virtually the entire output of the largest manufacturers in the trailer business for some time, according to C. B. Baldwin, Farm Security administrator.

The trailer camps will be established as part of the emergency de-

fense housing program to provide shelter for families of industrial workers in areas where the period of defense employment is expected to be relatively short. In addition to the trailers, Farm Security will build dormitories for approximately 2,900 single men working in such industries.

When they are no longer needed in the original locations, the trailers can be moved to other areas with emergency housing problems.

# The Strumpet Sea

By BEN AMES WILLIAMS

SYNOPSIS

George McAusland was 38 years old when he sailed from America to undertake his post as a missionary in the Fiji Islands. A crime he had committed in a fit of excitement had shattered all his confidence in himself. He felt forced to avoid pretty Mary Doncaster, who boarded the ship at Honolulu. She was en route to visit her parents, who were missionaries on Glerd Island. Mary was attracted by George's attempts to avoid her. One day George accidentally fell overboard. Mary unhesitatingly dove into the sea to rescue George. Now George had to talk to her. His fears were realized when he began to fall in love with her.

CHAPTER II—Continued

"There aren't any houses anywhere in sight," George said.

"They're in among the trees, in the shade," Mary told him. "People keep out of the sun down here." A faint trouble showed in her eyes. "I don't know why no canoes come off. They must have seen us long ago."

But a moment later she cried, relieved: "Oh, there they come!" Captain Keen and the others joined them in the bow, and Mary borrowed the Captain's glass to look for her father and mother.

"There's Jarambo," she said. She gave the glass to George. "Look," she said. "That old man in the first canoe. He worships my father, goes everywhere with him, like a dog."

Captain Keen spoke to the mate. She was close-hauled, the wind light. He said quietly:

"Square your fore and main yards, Mr. Chase. Smartly now."

The mate shouted orders; men swarmed to their tasks; and presently the cable slid out through the hawse, men standing by. Mary moved back to the waist while the old man in the canoe drew along side and she was white now with formless fears. She called something to Jarambo in his own tongue; but instead of answering, he dropped his eyes. There was something terrifying in his silence.

A moment later, still without speech, he swung himself aboard. Jarambo produced a folded bit of paper and offered it to Mary.

She took it; she looked at Jarambo imploringly. Then her dry eyes raced along the lines, and the color drained out of her cheeks. Old John Gale came quick beside her, and she gave him the bit of paper, shaking her head wretchedly. He read it aloud, slowly.

"My dear Daughter, "I thought I could wait for you, but since your mother died I am lonely and tired. I cannot wait any longer. I have nothing more to do except leave you my love and my blessing, and draw up my feet like good old Jacob and go home.

"Your father, "Ephraim Doncaster."

John Gale read the letter, and George McAusland said, not understanding: "Gone home? Didn't he know Mary was coming?"

John Gale said: "Yes, gone home. Ephraim is dead."

CHAPTER III

After she had read her father's letter, Mary turned to Mrs. Gale and clung to the older woman and was suddenly like a child weeping at a hurt it cannot understand. Mrs. Gale led her below. George wished to follow them. An overpowering sympathy and tenderness filled him. Mary in her sudden bitter grief seemed small and defenseless and in need, and he felt himself strong and wished to strengthen her. But John Gale, watching him, said:

"Let her weep, George. She'll be better then." He suggested: "You and I might go ashore, see the Island."

George agreed

George McAusland looked around him at the clustering crowd which welcomed them as loving children welcome a returning father, and he thought with a sort of reverence: This is what the first missionaries found. These are the heathen. Yet even in that first moment a doubtful reprobation filled him. Jarambo leading them, they moved away along a broad beaten path while men and women and children of every age trooped happily about them. McAusland said uneasily: "Mary's father hasn't taught them to wear many clothes."

"Ephraim was a trouble to the Board in some ways," John Gale admitted. "He refused to teach all the things they thought important; yet he accomplished more than most missionaries do. He worked less by precept than by example. I've heard his house is a model of what island houses should be; neat, secure, clean. I'm anxious to see it, perhaps to get some ideas to improve my own."

They moved on, many following; and a little way beyond a pool, they came to the house in which Mary's father and mother had lived.

McAusland saw the house with a quick pride in his race. It was built of stones, set on a sort of platform of basalt blocks five or six feet high, with a wide, thatch-shaded veranda all around. A fence of poles bound together with vines enclosed a neatly tended garden in front; and when they went indoors George saw everywhere evidences of proud and loving care. John Gale said understandingly: "These people have kept the temple, since Ephraim

died." Jarambo began to give an account of his stewardship, and since he and John Gale spoke in the Island tongue, which George did not understand, the young man turned aside. He saw a wide doorway opening at the rear of the main central room, and stepped out and found himself in what might have been a pulpit, with a lectern of stone, facing a rising slope of ground like a small amphitheater under the palms. Then John Gale beside him said quietly: "Ephraim preached to them here."

"Had he no church?"

"He thought it suitable to worship out of doors."

That night on the ship a grave question was discussed. Mrs. Gale and the old minister, George McAusland and Joseph Neargood and Captain Keen talked over the replacing of Ephraim in the cabin after supper. Mary sat with them; but she was very quiet, and she seemed small, as though grief had gone out of her and left her empty. John Gale stated the problem to Captain Keen.

"Someone ought to stay here," he said. "Jarambo tells me that a schooner lay in the lagoon across the Island for a while, and the natives aboard her dived for shell till bad weather drove the schooner away. But I judge they found pearls."

"Someone ought to stay here," he said. "Jarambo tells me that a schooner lay in the lagoon across the Island for a while, and the natives aboard her dived for shell till bad weather drove the schooner away. But I judge they found pearls."

"Someone ought to stay here," he said. "Jarambo tells me that a schooner lay in the lagoon across the Island for a while, and the natives aboard her dived for shell till bad weather drove the schooner away. But I judge they found pearls."

ment: "I might even stay on here after that; but at least I want to stay a while, in my father's house, with the people who were mine when I was a little girl."

"I'll stay with Joseph," she said. "Joseph can help them; and I can live in our house, and perhaps help him a little, too."

"I don't like that business of shell in the lagoon," Captain Keen reminded them. "If those men found pearls, they'll be back, and pearls are a hard crew."

"I'm not afraid," Mary insisted. "No one could find me unless I chose. Remember, I was a child here. I know all the hidden trails."

"Joseph couldn't protect you," John Gale pointed out. "They wouldn't respect him." He looked at the Marquesan apologetically. "You understand, my son, I hold you high; but they would not."

The Marquesan nodded simply. George McAusland felt his hands clench on his knees. There was burning in him now, something reckless of all reason. To think that Mary was to be left here alone with a brown-skinned man for her protector filled him with a passion beyond controlling. His nails bit his palms; and he rose abruptly, stalked toward the companion, and went on deck. He went forward, stood by the rail, staring off across the water toward the shores so incredibly green that rose steeply to the tips of the mountains shimmering in the sun. There was a thumping in his throat that would not be still.

Corlran spoke at his shoulder. "A fine island, and fine people, Reverence," he said. "No one's spoiled 'em. The young lady's father, the missionary that was here, he must have been a sensible lot."

George spoke without thought. "She's going to stay here."

"Now if I was in the missionary line, myself, Reverence," the sailor remarked, "and if I was looking for some heathen to convert, I'd ask nothing better myself than to tackle this lot here, with the young lady to help." He glanced at the man beside him, saw the jaw muscles knot, saw George swallow hard.

"Yes, Reverence," he declared, "I'd say to myself, 'Tis no work for a brown-skinned man, this; so I'll stay. The heathen need me, so they do.'"

"I want to, Corlran," he said miserably. "I want to. But I don't know whether I could do the work. Alone."

Corlran nodded. "If it was me, I'd be thinking a wife would make it easier," he agreed. "I'd be thinking of marrying. Someone." He added calmly: "The young lady, oay."

"We certainly couldn't stay here alone together without being married," George reflected, half to himself.

George looked along the deck. Joseph Neargood and Mrs. Gale were together aft. Captain Keen and John Gale and the mate were in the waist, close by. George turned abruptly to ask John Gale: "Where's Mary?"

"In the cabin!"

George went toward the companion and descended. Mary was sitting at the cabin table, with paper before her, pen in her hand, writing. She looked up at him when he appeared. Her eyes stopped him for a moment. He stood unsteadily; and when the ship lifted beneath them, tilting into the trough, sliding down, he came forward carefully to sit facing her with the table between them.

Mary Doncaster waited. Her eyes were serene and calm; but on her cheek color played faintly, like heat lightning from a distant storm. He tried to find the word he wished to say; and his dry lips moved a little without sound.

It was she who spoke first. She asked: "What is it, George?"

He tried to explain, as much to himself as to her. "I know I ought to stay here and take your father's place. I want to, and yet I'm afraid to. I'm afraid of failing." He said more quickly: "I didn't understand what it would be like, till I went ashore yesterday. I thought being a missionary meant being brave and strong and firm and stern; but I can see now it's more than that. I want to do the work; but I can't do it without you, Mary. I want to stay here with you to help me."

She asked, carefully grave: "You want me to be sort of an assistant? Is that it?"

"Well, I'd have to have someone. I can't even speak their language."

"Why don't you let yourself go, George?" she urged. "Tell me what you really want." He did not speak, and she saw that he could not. Her eyes deep and still, she asked at last: "You want to stay here and try to fill my father's place? Is that all, really?"

"Yes."

"Tell me, if you could do it alone, if you were sure you could, would you still want me? Or would you let me go on with the ship? Honestly?"

His face suddenly was convulsed. "No!" he cried. "I never want to let you go!" He was crimson, as if he had confessed something of which he was ashamed. He said awkwardly: "We couldn't stay alone here if we weren't married."

"TO BE CONTINUED"

## Neckwear Gives Fresh, Sparkling Charm to Spring Suits, Coats

By-CHERIE NICHOLAS

### FOR a fashion-right approach to chic and charm for your Easter costume, try the lacy, crisp-white neckwear way. It will work like magic. The new jabots and animated cascades of sheer white, the smart detachable lace-trimmed and befrilled yokes, likewise the huge immaculately white sailor collars that stress the new low-cut, deep-throated lines are performing miracles in adding "the touch that tells."

You will find the neckwear quest one of high adventure this spring, for fashion is dramatizing the theme. Versatile lingerie touches will carry your costume to dizzy heights of allure.

There's big news in the revival of frilly jabots this season, and history is also repeating itself in the animated white flutery cascades, the kind that will help "lift" any blouse, frock or jacketed tulleur right into spring. The sheer organdie and Val lace jabot which cascades from a tiny turnover organdie collar (pictured above to the left in the group illustrated) is warranted to give springlike froth and freshness to any Easter costume. The jabot is attached to an organdie vestee, so it stays anchored and serves as a blouse.

A magic panel in embroidered organdie and lace (shown above to the right) may be depended upon to perform magic on any dress, be it print or plain, smart navy, unerring black or a delectable pastel shade. A clip attachment under the bow adjusts to any neckline. Clip it on to your newest frock and presto! it will sparkle with lacy loveliness.

Colored embroidery, especially

cross stitch and petit point, is an important spring 1941 message for neckwear. The collar and cuff set below to the right in the group is one of the charming new versions. Rambler roses are embroidered on linen, in red and black cross stitch.

You will be seeing quantities of this type of embroidery on the season advances, for petit point, especially, is being featured on handkerchiefs, handbags, and in fact, quite generally throughout the mode.

All dressed up and ready to go stepping in the Easter parade is the smartly clad maiden in the panel portrait to the left. For that fresh-out-of-a-band-box look, Evelyn Alden, American designer, has created a youthful redingote (redingote are "tops" this spring) with a crisp lingerie bib attached to the neckline of the dress beneath. Be sure to wear a fruit-laden hat with this ensemble, for fruit trimmings are tremendously important.

A new trend, and one that is rich with possibilities, is the wide use of pleated white lingerie frillings in unique and dramatic ways. You can buy these pleatings by the yard at neckwear counters. Newly arrived navy or black suits and dresses are finished off at throat and wrist with generous ruffings done in the dandified Regency period manner.

You can give your bolero frock or suit a fresh spring uplift by sewing in a white ruff that extends down the front edges of your bolero or even all the way round if you prefer. As most fashion-alert women are aware, the newest dresses are styled with yokes this spring. For a final swank accent, follow the outline of the yoke of your frock or your blouse with crisp white lingerie pleating. Many best shops are featuring this very new idea. (Released by Western Newspaper Union.)

### Patriotic Emblems

Patriotic emblems are proving an endless source of inspiration for decorative motifs in costume design. Flags, stars, eagles, nautical insignia seen in-bright embroidery or in glittering colorful jewels. They lend enchantment to new fashions in endless ways. Here you see a stunning white rayon hi-hat turban and matching scarf. This twosome is inexpensive, and at the same time is good looking and decidedly practical.

Thoroughly American in color and design, these decorative pieces give wardrobes that pro-America look!

### Low-Cut Necklines Tell

**New Fashion Story**  
There is a new movement in necklines that will be a dominating influence in blouses and dresses from now on. The collar opening continues down to form a low deep slender point. Some dresses have an extra little camisole device to wear on less formal occasions. The deep-throated effect is extremely flattering. To wear at the low point, stunning jewelry clips are being especially designed. These will tell a fascinating new fashion story.

### Deep Pleated Flounces

**Popular on Navy Coats**  
There is a very smart new-type coat being shown which is particularly striking in navy. The body line is fashioned after the fitted princess line, to which a knee depth pleated flounce of the self fabric is seamed. You can get stunning costume suits that have these long coats, worn over a matching one-piece dress.

### Enchanting Blouses

The new blouses are simply enchanting. They are frilled, tucked and lace-trimmed in fascinating profusion. Their feminine frou frou is distractingly pretty. On the Easter parade they will appear in endless procession, adding winsomeness to the legions of navy suits and caped costume ensembles.

### Pale Coats, Pale Furs

Beige coats are taking unto themselves fur trimmings in delicate tones to match. Reefer fronts of furs are chic.

## Things to do

Pattern 6902  
THE knitted woman's jersey— the well-dressed woman's standby for variety in her wardrobe. Add this one to yours—it's in a simple pattern stitch that's quickly done.

Pattern 6902 contains instructions for making the jersey in sizes 12-14 and 16-18; illustrations of it and of stitches; materials needed. Send order to:

Sewing Circle Order Dept. 62 Eighth Ave. New York

Swift Changes

In future years, historians will record the swift changes that took place in the temper and attitude of the American people and their leaders during 1940 and 1941. Looking back now on months that followed the outbreak of World War II, it seems as if we lived then in another world. The majority of the people wanted neutrality—and they wanted no part of Europe's newest mess. They wanted to avoid the risk of war at all costs. And statesmen who represented them felt the same way.

Today polls show that we still want to keep out of war—but that a considerable majority, despite that, favor helping England to the fullest extent even if it involves the risk of our being drawn into war. No one talks of neutrality—it is as dead as Moses. The cash-and-carry policy has been virtually forgotten—it is perfectly clear that every financial resource will be used to help arm Britain no less than ourselves. The American people, in short, are violently partisan, and the American nation is definitely and irretrievably involved in the war.

What has caused this change? It took us almost three years to become really anti-German in the last war—it took us less than a year this time. Better communication, both verbal and visual, has been a factor. So has the amazing courage of the British people—the Americans like and respond to any display of bravery against odds. Most important, in all probability, has been the fast-growing feeling that our destiny and Britain's are intermixed and inseparable, and that if Britain falls we will be in grave danger.

There are those who stoutly believe this doctrine, but they are much in the minority. The President obviously thinks that Britain is fighting for us as well as for herself. So do most members of Congress. So do the bulk of the leading commentators. So does a long list of principal daily newspapers. That is why opposition to the lend-lease bill has made so little progress. There just isn't enough support behind it.

Last chance of defeating or seriously modifying the bill—and, at best it was an extremely frail chance—ended when Wendell Willkie took the stand. Mr. Willkie received 22,000,000 American votes last November, only 4,000,000 less than the President. His trip to England, in which he crammed months of visiting, talking and investigating, into a few days and nights, was a dramatic pilgrimage. He made impression abroad. While he has lost some of his past supporters, he has gained new friends and followers. So when Willkie said he was 100 per cent in favor of the bill with certain modifications, and went even further than the President in some respects (by suggesting that we give Britain outright destroyers and Army bombers) the die was cast.

The two men who were given the votes of close to 50,000,000 Americans in their race for the presidency and he stand out head and shoulders above any other national figures of this day, believe that England's fate and our fate cannot be separated. There is no doubt of their sincerity—even as there is no doubt of the sincerity of those who still hold to a different and opposed point of view. And there is no doubt that this country is committed to the hill to the policy for which Roosevelt and Willkie stand.

Today millions of Americans hate Hitler and what he represents with an almost personal hatred. For Mussolini they have contempt and laughter. These millions of Americans feel that the dictators are their enemies, just as they are England's enemies. The old crimes and mistakes of imperial England have been forgotten; and in the opinion of many a thoughtful student, we ourselves are about to embark, from necessity, on an unprecedented imperial policy of our own.

Science unmasks divorce villains you'd never suspect. Work-saving household gadgets and other modern inventions are upsetting the old institution of marriage, says one sociologist, but other scientists are finding out how to assure happy homes. An illustrated article everyone should read, in The American Weekly, the magazine distributed with next week's Los Angeles Examiner.

The Gay Lord's Escapades Ended by Mystery Bullets. The play boy Peer seemed at first to be victim of a perfect crime, without even a suspect—but authorities have just interrupted a honeymoon to charge the bridegroom with murdering him. Don't miss this real-life mystery in The American Weekly, the magazine distributed with next week's Los Angeles Examiner.

STATE SOIL CONSERVATION COMMITTEE OF NEW MEXICO NOTICE OF REFERENDUM ON CREATION OF PROPOSED UPPER HONDO UNIT SOIL CONSERVATION DISTRICT, EMBLACING LANDS LYING IN THE COUNTY OF LINCOLN, IN THE STATE OF NEW MEXICO

To all owners of land lying within the proposed UPPER HONDO UNIT SOIL CONSERVATION DISTRICT, comprising the territory described as follows:

An AREA TO INCLUDE THE BONITO AND RUIDOSO WATERSHED—BOUND ON THE EAST BY THE COUNTY LINE AND TO ALSO INCLUDE NO-GAL CANYON.

Notice is hereby given that on the 15th day of April, 1941, between the hours of 9:00 a. m. and 4:00 p. m., a referendum will be held in the said territory upon the proposition of the creation of the UPPER HONDO UNIT SOIL CONSERVATION DISTRICT as a governmental subdivision and a public body, corporate and politic, under the provisions of the Soil Conservation Districts Law of this State.

All persons, firms, and corporations who shall hold title to, or shall be in possession of, any lands lying within the said territory as owners, are eligible to vote. Only such persons, firms, and corporations are eligible to vote.

Polling places for the referendum are as follows:
Capitan Grade School Building
Glencoe Woman's Club Building
Hondo School Gymnasium

Eligible voters residing within the proposed district shall cast their ballots at the polling place for the division wherein they reside. Eligible voters not residing within the proposed district shall cast their ballots at the polling place for the division which includes their land, or the greater part thereof. Eligible voters who will be absent from their division on the day of the referendum may apply in person or in writing to James Bristor, Box 357, Carrizozo, New Mexico, Polling Superintendent, for absentee ballots. Each applicant for an absentee ballot shall give his name, residence, location, and acreage of land owned or possessed, and interest therein.

**Attention Rebekahs**

The local lodge, Daughters of Rebekah, are invited to be guests of the Alamogordo Rebekahs on Saturday, April 26th and on Sunday too. This is to be one of the biggest affairs the Rebekahs have had for a long time. The El Paso Lodge will put on the work. Candidates are to be initiated from Alamogordo and Carrizozo. All local members are asked to keep the date, April 26th, in mind and plan to go. A25

**LEGISLATIVE SESSION**

Entered upon its second term, under the split-session plan, the Fifteenth legislature has gotten off to a flying start, apparently fully realizing the magnitude of the task with which it is faced—passage or rejection of more than 500 bills, introduced at the first term, in the brief space of 30 days.

If averages of past legislatures still hold good, more than half of the bills will be killed or chloroformed. However, this operation, too, takes time.

Both senate and house leaders, fearing possible congestion, have prepared the way to speed up the legislative wheels at this session. The senate did something unprecedented in New Mexico on its opening day—a Saturday at that, March 15—remaining in session until after 4 p. m., after passing SJR 10, urged by Governor John E. Miles, the last step needed to enable the State A. & M. College to regain its place on the North Central Association's accredited list.

This resolution, also passed by the house, provides for staggered terms for the boards of regents of all state educational institutions, to make for the continuity of policy desired by the accrediting association. It is now through the legislature and to be submitted to the people for ratification at the 1942 regular election. (It was understood the association would be satisfied for the time being with passage by the legislature now accomplished.)

While the house was acting on this, senate committees were meeting despite the fact that a state basketball tournament was going on in Santa Fe. The committee reported 32 bills Saturday, providing a substantial calendar for the next legislative day. Nothing slow about this start.

In the house, Speaker Frank McCarthy stated he viewed the finish with no alarm. There Rep. H. Vearde Payne, D., Hidalgo, was named a sort of master of ceremonies to facilitate legislation—to arrange for the time and place of committee meetings to avoid conflict, with the supervision of the speaker and the floor leader, Rep. Gilbert Lopez, D., McKinley. Payne also is to recommend the grouping of related bills in the same committees.

Breaking other precedents to gain time, the house adjourned to 9 a. m., Monday, an unusually early hour; the senate to 10 a. m. Senator Burton Roach, Democratic Senate Leader, announced that hereafter he would call for even earlier daily starts, at 8:30 or 9 a. m.

SJR 10 appears to go about as far as is humanly possible to remove politics from the state's institutions of higher learning. If it is ratified by the people of the state each board of regents will consist of five members to be named by the Governor with senate approval. Their term six years being the tenure, will overlap.

Heretofore the governor has been able to remove regents almost at will, under a state supreme court decision of years ago. SJR 10, passed at Gov. Miles' request, places a check on this power. It says the governor may remove for certain specified causes and goes even further, providing something never before thought of by any state administration—it gives any regent the right of appeal to the state supreme court. In other words, the chief executive will share his removal power with the court.

In proposing this Governor Miles told the legislature he had no thought in mind but the best interests of the institutions. That seems to be obvious.

V. Reil, Prop. Phone 36 Carrizozo, N. M.

CORNELIUS VANDERBILT, JR.

'Around the World'

HELLO America! Here I am sitting on the very edge of Lake Placid in the Adirondack mountains of New York. Mirror Lake inn is perched on a hillock above me. I've just finished a stack of flap-jacks with some of the best maple-sugar syrup I've ever tasted. The sun is shining on the frozen lake; mountain peaks are clothed in the deepest snow I've seen anywhere in America this year. The woods and trails are dotted with skiers. Roadways banked in ice, with three-passenger and ten-passenger sleighs skimming along behind jingle-belled sturdy, mountain horses. For months now I've been bobbing about the country. I have been trying to find out how the country is getting on, what people are thinking about, and what's happened since I was last there. Since early September I've been lecturing too, in nearly every state in the Union.

But this is not new to me, for all my life it seems, I've been going places. Even as a boy I made dozens of trips across the Atlantic, and visited nearly every country in Europe, as well as a major portion of our own country. For the past 23 years I've been a Roaming Correspondent in all parts of the world. I was in Italy when Fascism walked into Rome; in Germany when Nazism began; in Russia just after Communism was born; in China as the Japanese stalked into Shanghai; in Spain two hours after the revolution broke out; in Hyde Park, N. Y., the night the New Deal swept into power; in Europe the summer of 1939 on the eve of the Armageddon; and in Central and South America last summer as democracy lay at the cross-roads.

Being on the spot at the crucial moment has been partly luck, partly experience, and partly the good judgment of the editors who employ me. Don't know how far I've traveled, but would say well over 2,000,000 miles.

Early in life I made up my mind to find out for myself how people lived in all walks of life. With a Fifth Avenue background this was impossible if I stayed there. So when just 17 I ran away from home and enlisted in the United States army. I added a year to my age. Spent 22 months as a buck-private with the American Expeditionary forces in France. After the war I went to work on the editorial staff of a New York newspaper. Since 1910 I have been employed by I don't know how many newspapers and magazines, and for the past 11 years almost continuously for one big string of publications.

The more I've traveled abroad, the more I realize how fortunate we are to be Americans. Every time I step on a gangplank of a ship that has "U. S. A." written on the other end, I breathe a sigh of relief for the freedom from petty nuisances and regimentation found elsewhere. I always feel like embracing the Statue of Liberty and shaking hands with the first cop, when I reach home.

I think I would be satisfied if, during the rest of my life, I could be of some aid in helping Americans better to appreciate their native land. The more one travels in this great country of ours, the prouder is he to be an American. We must iron out our internal difficulties and forget our sectional jealousies. We must pull together, all of us, for the time is fast approaching when we may have to stand together, alone, against the rest of the world. Only through a strong feeling of fellowship and close co-operation will we be able to protect our priceless heritage of liberty and our form of democracy.

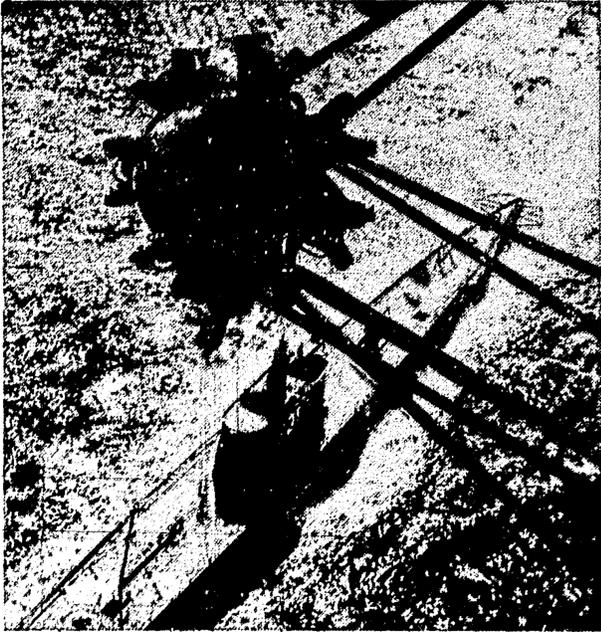

Foreign vultures with their power diplomacy and jungle strategy approach more ominously each day. Few Americans realize what a privilege it is to make the 3,000-mile run from San Francisco to New York on a wide, well-kept, well-marked highway, bordered with excellent service stations, fine restaurants and stores and modern hotels and tourist camps. To encounter everywhere expert, courteous service and fair prices. Or to make the 2,200-mile run from Los Angeles to Chicago in less than 40 hours in luxurious streamlined trains; or the overnight skyway hop from coast-to-coast.

Compare this with what you used to find in Europe—in the Orient there is nothing actually to compare with. But enough about me and my own travels. From hereon I promise to talk chiefly of places, people and things along the way.

So let's get going—going places. Next week we'll be on our way.

SEEING THINGS: Driving up to Placid from Plattsburgh Barracks where the U. S. is training ski-troops for service in Newfoundland and Alaska, could scarcely keep my eye on the road for watching the fantastically beautiful mist formations rising from Lake Champlain. Expected to be equally moved by Ausable Chasm. It is reputed to be one of the marvels of this part of the country. Perhaps this is an awe-inspiring sight to easterners, but to one familiar with the West, this chasm was but a spasm to me.

New Might for the U. S. Navy

A striking photo of two powerful arms which go far towards making our navy the world's greatest. The submarine Triton, sister ship of the Squalus, and one of the navy's newest overseas craft, is seen from the navy Blimp, G-1, off Barneget, N. J., light. One of the blimp's motors covers the upper part of picture.

Arrive in U. S.

The East Indies situation is becoming more tense each day. Above is Eelco Van Kleffens, foreign minister of the Netherlands in exile, shown on arrival in New York with his wife. He is on his way to discuss East Indian problems with President Roosevelt.

Foreign Propaganda Fed to Furnace

This is a scene at the Roncon Annex post office in San Francisco, Calif., as postal employees burn a big load of foreign propaganda consisting of magazines, pamphlets and books. Officials have been watching incoming propaganda for many months and thought it about time to consign it to the flames.

'Tummy' Victim

Gail Grochowski, 6½-pound girl, of Worcester, Mass., youngest victim of the "upside-down" stomach malady on record. She is now recovering, following an operation.

FIRST-AID to the AILING HOUSE

by Roger B. Whitman

(© Roger B. Whitman—WNU Service.)

Leveling a Basement Floor.

QUESTION: I have taken a partition wall out of my basement, which has left one floor lower than the other by two or three inches. How can I get the two floors level, and how should I go about the job of mixing and applying the cement, sand, etc.?

ANSWER: For the first step, go over the low part of the floor with a pointed hammer or a pick, to make gashees and dents in it; these will form an anchorage for concrete to be poured on top. Then cover the low part of the floor with wire netting, and pour concrete to bring the low part of the floor to the level of the other part. At the time of pouring, the old floor should be well soaked with water.

For a mixture, use 1 part Portland cement, 2½ parts clean, sharp building sand, 5 parts pebbles or crushed stone, and only enough water to make a workable mixture.

You can get a great deal of information from booklets issued by the Portland Cement Association, 33 West Grand Avenue, Chicago; or from the New York office at 347 Madison Avenue. Write and explain what you want to do, and they will send you the booklets without charge.

Peeling Paint.

QUESTION: Paint on the northeast side of my wood house peels badly. The last time it was painted, about two years ago, my painter, after scraping and sandpapering, gave it a coat of shellac before repainting, but I cannot see that this helped any. What is your advice.

ANSWER: The commonest cause for the peeling of paint is dampness in the wood. In an old house this is very likely to come from leakage into the walls; water runs down inside, settles on a cross-piece, and soaks through. One very usual cause of leakage is open joints between the window frames and the outside walls, due to the failure of inside flashings. If you find even hairline cracks at these points, have them filled with caulking compound. Carpenters and painters have the necessary caulking-gun. Water may also leak into a wall from defects in roof flashings, leaks in gutters that permit streams of water to strike the outside wall, and through similar causes. You can suspect any part of the walls that are above the places where the paint peels.

Storage Room.

A correspondent asks for advice on constructing a storage room for clothing under his front porch. The room should be moisture and moth proof. The space is 3 by 6 feet, and 7 feet high; concrete block walls on three sides.

ANSWER: No storage room in a cellar is safe for the contents unless the walls are especially waterproofed and insulated. Dampness is almost inevitable; not necessarily from leakage, but from condensation. The job should begin with the sheathing of the three walls with a double layer of moisture proof insulating board, and with the waterproofing of the floor. But even with this, mildewing would be only too likely.

Painting Pine.

QUESTION: My living room is knotty pine. I would like to paint it white. Would a priming coat of aluminum paint cover the knots? How many coats of paint would be necessary to cover?

ANSWER: Wipe all of the knots with turpentine, using it liberally. A coat of aluminum paint is excellent to seal the knots. As to the coats of paint that will be necessary, much will depend on the kind of paint that you intend using. It is advisable to use two coats over the priming coat. The paint applied directly over the prime coat should be thinned according to manufacturer's directions on the label of the can.

Wood Borers.

QUESTION: Something is boring into the roof timbers of my woodshed. Each morning there are little piles of something similar to sawdust, but finer, and there are holes in the wood. How can I stop it?

ANSWER: Those insects are probably powderpost beetles. Swab the surfaces with kerosene, and force kerosene into the holes with a fine-spout oil-can or a poultry needle, such as is used for hypodermics.

Repairing Chairs.

A correspondent sends me his method for repairing a loosened chair. He takes it apart, softens the glue on the rungs and in the holes with water, and cleans it all out. He places strands of an untwisted hemp rope across the holes, uses plenty of hot glue, and drives the rungs into the holes. Excess hemp is cut off with a sharp knife before the glue hardens. Sounds like a practical idea.

Bobby Should Know!

Supposing you had 10 points to award for the qualities that go to make a good wife. How would you distribute them?

Bobby Burns, the Scottish poet, divided them in this wise. Four parts to good temper; two parts to good sense; one part to wit, and one part to beauty. The remaining parts he divided amongst other qualities attending on a wife, such as fortune, connections, education, family, and several others.

He came to the conclusion that none of these latter qualities was entitled to as much as one part.

She's getting on toward 80, perhaps and she doesn't get enough exercise; sits around, knits and dozes. Of course you want to keep her as long as you can. If her inactivity brings on bowel-laziness, intestinal and stomach gas, followed by listlessness, sour stomach and bad breath, probably restlessness, get her some ADLEREK. She will find it gentle in action, yet thro. Druggists have sold it for 40 years. Get ADLEREK today.

Virgil's Complexion Once he had a youth blushing, and addressed him, "Courage, my boy; that is the complexion of virtue."—Diogenes Laertius.

DISCOMFORTS of COLDS MENTHOLATUM. Mentholatum Quickly Relieves STUFFINESS, SNIFFLING, SNEEZING.

Hollow Sound The empty vessel makes the greatest sound.—Shakespeare.

Nervous Restless Girls! Cranky? Restless? Tired easily? Because of distress of monthly functional disturbances? Then try Lydia E. Pinkham's Vegetable Compound. Pinkham's Compound is famous for relieving pain of irregular periods and cranky nervousness due to such disturbances. One of the most effective medicines you can buy today for this purpose—made especially for women. WORTH TRYING!

Apparent Sufferings Present sufferings seem far greater to men than those they merely dread.—Livy.

LET US TELL YOU MORE ABOUT IT

Pre-views

United States to Observe Army Day

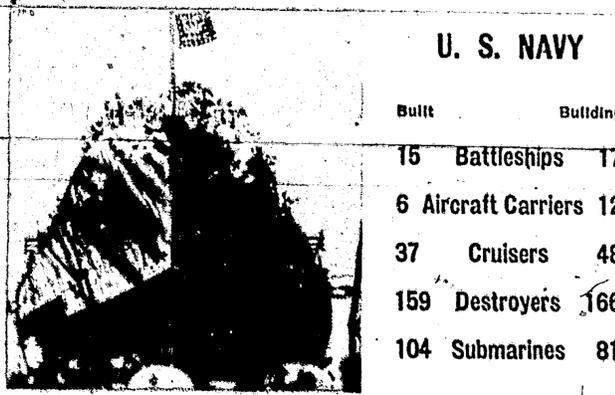

SIZE of U. S. ARMY

1865 approx.	2,128,948
1918 approx.	3,673,888
1939	1,871,886
1941 approx.	1,003,600

The rapidly growing armed forces of the U. S. will be on review on Army day, April 7, when troops will hold open house to visiting citizens. Upper left: Gen. George S. Marshall, army chief of staff. Upper right: A recruiting poster of World War days, which is again being widely used. Lower right: H. H. Arnold, chief of the army air corps.

A 'Big Shot' for Uncle Sam

The North Carolina, (above) first new battleship of the U. S. navy in 20 years, is to be commissioned April 11, five months ahead of schedule, has nine 16-inch guns, which can fire a broadside of 28,000 pounds for 20 miles. Its displacement is 35,000 tons, the biggest in the U. S. navy. It was launched June 13 at New York.

Gymnasts

Collegiate gymnasts will compete at the National Collegiate Athletic association championship at the University of Chicago April 12. Co-captains Delver Daly (top) and Bob Hanning of Minnesota are favored for top positions.

Chemist

W. L. Evans (above) will preside when some 3,500 chemists gather in St. Louis, April 7, for the American Chemical society convention. Subject, chemistry and defense.

# WHO'S NEWS THIS WEEK

By LEMUEL F. PARTON  
(Consolidated Features—WNU Service.)

**NEW YORK**—When he made his first million at the age of 30, Bernard M. Baruch said he would indulge himself from then on by being a sort of doctor or diagnostician of politics, government and finance, rather than a self-interested participant. Although he did gather a few more millions, as a speculator, as he has frankly said, it was in the same mood of detachment with which he has appraised the social scene, and it is in this mood that he has been the adviser of every President since Taft.

Each day in the news brings some new demand that the tall, pleasant, snowy-haired Mr. Baruch, surely our elder statesman of such bottleneck urgency as that of today, be given a free hand, in the courtroom, or perhaps the wheel-house, to steer our emergency defense course. Some of these nominations come from the established school of Baruch men, such as Gen. Hugh S. Johnson, Herbert Bayard Swope and George N. Peck; others from those who remember Mr. Baruch's achievements as head of the War Industries board, and his alert, speculator's awareness of what has been going on in Europe for the last few years.

As to this business of being a speculator, Mr. Baruch says, "I make no apology. I am a speculator. The word comes from the Latin word 'speculari,' meaning to observe. I observe."

Like all seasoned speculators, he never pounds his desk or runs a temperature or inclines to high blood-pressure, although he is 70. He keeps fit by his own system of calisthenics, pragmatically arrived at, like his financial operations.

As head of the War Industries board, he toiled the 20-mule team of labor, industry, raw-materials and government deftly through many a narrow defile and hazardous passage, and a large cession of his public would like to see him again in the driver's seat.

Naturally a skeptic as to the grand solution, like most speculators, he has stood at few, if any false dawns. He was a prophet of doom for the Dawes plan, from the first. In 1927, he predicted that it would be scrapped within two years. "A demand might be morally reasonable as a business proposition," he said.

As a foe of paternalism in business and a staunch states' rights Democrat, he has insisted that a means must be found to mobilize national energies without taking on the crushing overhead of a crippling and self-destroying bureaucracy. He has expounded these and kindred subjects in many economic treatises in dry-as-dust journals, for here is a Wall Street speculator who also wears the golden key of Phi Beta Kappa. He is an able evangelist of the school of pragmatism in government and business—again the speculator, whose judgments, if he is a good speculator, are never emotional.

His early definition of his attitude as that of a diagnostician might have denoted a sympathetic identification with his distinguished father, Dr. Simon Baruch of South Carolina, a widely known surgeon and health authority who took a leading part in developing the Saratoga spa. Born in South Carolina, Bernard M. Baruch took an earned degree at the College of the City of New York in 1889 and subsequently six honorary degrees from various other colleges.

For the last few years he has been calmly, but earnestly prescribing preparedness. Returning from Europe in 1937, he said, "Europe is hopeless." In January, 1939, he offered to supply from his own funds \$3,300,000 which the army lacked for certain equipment. An adjustment of an appropriation bill made this unnecessary. He has been friendly to the New Deal, but has chided and warned it on many occasions.

THIS reporter, on occasional trips to Washington, has noted that some of the heaviest hitters there are the least publicized. Here today is the amiable Harold N. Graves in charge of the new defense loan drive, which will start May 1. Mr. Graves, in his 33 years in the government service, has showed singular ability in getting things done without a lot of fuss and feathers. He is assistant to the secretary of the treasury, 54 years old, educated at Knox college and George Washington university.

INVITE THEM ALL—AND HAVE BAKED POTATOES  
(See Recipes Below)

### LET'S SERVE POTATOES

Guests are coming for dinner. You have your meat and vegetables, and you have planned your dessert. You have potatoes on hand. But have you decided how you're going to prepare them?

I'll wager you haven't. It's an oft-repeated story in kitchens from Washington to Florida, Maine to California. Because the POTATO is such an old standby, you perhaps wait 'til the last minute to decide its preparation. Then it's too late to try "something different."

Don't treat the potato as though it were the Cinderella of the vegetable kingdom. Remember, it responds well to careful treatment. While it is usually considered to have a bland flavor, proper cooking will bring out its subtleties.

Although there are only three basic ways of cooking potatoes—baking, boiling or frying them in their raw form—there are innumerable new and different things to do with this vegetable.

I wonder if you have ever tried frankfurter- or sausage-stuffed potatoes, potato croquettes, pancake potatoes, Idaho Suzettes or potato doughnuts?

If not, resolve to use those recipes. I guarantee they'll help you "get the most out of your potatoes!"

**\*Quick Dutch-Staffed Baked Potatoes.**  
(See picture at top of column)  
6 medium-sized Idaho potatoes  
8 link sausages or frankfurters  
Scrub the potatoes and with an apple corer make a hole lengthwise through each potato. Stuff with a frankfurter or sausage. Bake at 400 degrees F. for 45 minutes, or until potatoes are done.

For an even richer flavor, stuff with a mixture of finely chopped sweet spanish onions and ground meat. Put a slice of bacon or salt pork over the potatoes and bake as usual. Length of baking time depends on size of potatoes.

**Nut Potato Croquettes.**  
2 cups hot mashed potatoes  
1/4 cup cream or milk  
1/2 teaspoon baking powder  
1/2 teaspoon salt  
Pepper to taste  
1 cup crushed nuts

To the potatoes add the cream or milk, baking powder, seasoning and half the nuts. Spread mixture on plate to cool. Shape, roll in nuts and cook in deep, hot fat (350 degrees F.) until golden brown. Drain on soft paper.

**Potato Doughnuts.**  
2 cups flour  
1 1/2 teaspoons salt  
2 teaspoons baking powder  
1/2 teaspoon nutmeg or cinnamon  
1 cup ricod potatoes  
1 tablespoon butter  
2 eggs  
1 cup sugar  
Sift flour, salt, baking powder and spice together. Put the hot ricod potatoes in a mixing bowl, add the butter and stir until the butter is melted. Cool until lukewarm. Add

### LYNN SAYS:

Baking potatoes is perhaps the most healthful method of preparing them, because steam escapes from them and results in a mealy product. No valuable minerals are lost, and, if the skin is also eaten with the contents, all benefits of the potato are realized.

If you are not quite ready to serve your potatoes when they are ready to come out of the oven, cover them with a towel so that moisture will be absorbed, and at the same time warmth will be retained.

Sweet potatoes bake in less time than white potatoes.

It is important to retain vitamin C in potatoes, as well as in all vegetables. In order to do this, store them in a cool place; peel just before cooking; cook whole, if possible; have the water boiling rapidly before plunging them in; use a small amount of cooking water; cook only until tender.

### MENU OF THE WEEK

- Tomato Broth
- \*Quick Dutch-Staffed Baked Potatoes
- Buttered Beets
- Molded Fruit Salad
- Bread - Butter
- Berry Pie
- Beverage
- \*Recipe given.

the unbeaten eggs and sugar; mix well. Stir in the sifted dry ingredients; mix until smooth. Place mixture on a floured board; roll until 1/2 inch thick, cut into rounds with a floured doughnut cutter. Cook in deep, hot fat (370 degrees F.) until golden brown. Drain on soft paper. Sprinkle with powdered sugar.

**Idaho Suzettes.**  
6 medium-sized Idaho potatoes  
1/2 cup hot milk  
2 tablespoons melted fat  
6 tablespoons buttered crumbs  
1 tablespoon grated cheese  
6 eggs  
Salt and pepper

Select medium-sized or large potatoes; scrub and bake at 450 degrees F. until each is soft when you pick it up and squeeze with a cloth. When done, remove a piece of skin from the side of each potato to make it boat-shaped, or cut

large potatoes in two, lengthwise. Scoop out the inside, being careful not to break the shell. Mash the pulp thoroughly, or put it through a ricer. Add butter, salt and milk and beat well. Pile the mixture lightly back into the shells. Refill the shell to the top and make a depression in the center of each potato. Break an egg into each depression, season with salt and pepper and sprinkle with buttered crumbs that have been combined with grated cheese. Bake in a slow oven (250-350 degrees F.) long enough to set the egg and brown lightly—for 6 to 10 minutes.

**Belgian Baked Potatoes.**  
Wash and peel potatoes and cut into eighths lengthwise. Dry between towels. Dip cut pieces in melted shortening and lay in a shallow pan, being sure that they do not overlap. Bake in a quick oven (400 degrees F.) until brown on top. Turn carefully and continue baking until they resemble french-fried potatoes. Baste them with more shortening during baking, if necessary. When done, sprinkle with salt and serve piping hot.

**Franconia Potatoes.**  
Use uniform medium potatoes. Pare and parboil 10 minutes. Drain, place around roast, and bake 40 minutes, or until soft, turning often and basting with fat in pan so that they will brown.

**Old-Fashioned Scalloped Potatoes.**  
4 large potatoes, pared  
1 small onion, thinly sliced  
1/2 teaspoon salt  
Dash of pepper  
1 1/2 tablespoons flour  
1 tablespoon butter  
1 1/2 cups milk

Cut potatoes in 1/2-inch slices. Place potatoes and onions in buttered baking dish sprinkling each layer with salt, pepper and flour, and dotting with butter. Add milk and cover. Bake in moderate oven (350 degrees F.) 2 hours, or until potatoes are tender, uncovering them during the last 30 minutes of baking. Serves 4.

**Lyonnais Potatoes.**  
4 teaspoons butter or bacon fat  
2 onions, sliced  
3 cups cooked potatoes  
Salt and pepper  
2 tablespoons finely chopped parsley

Heat the fat in a frying pan and cook the onions in it a few minutes. Add the potatoes and cook slowly, stirring occasionally until all sides of the potatoes are golden brown. Season with salt and pepper. Press flat with knife and shake over low fire until brown on bottom. Turn like an omelet. Serve on a hot platter with finely chopped parsley sprinkled over the top.

# NEW IDEAS for Home-makers

By RUTH WYETH SPEARS

SAME BED WITH FOOT CUT DOWN—THE DOTTED SWISS VALANCE IS STITCHED TO MUSLIN BETWEEN THE SPRINGS AND MATTRESS

HAND-MADE QUILT IS NOT WELL DISPLAYED ON A BED WITH HIGH FOOT BOARD AND NO VALANCE

frills of dotted Swiss were added! Surely, any quilt that is worth piecing is worth this extra touch.

NOTE: If you have an old iron bed that you would like to cut down, SEWING Book 3 tells how, 10 cents postpaid. You may also want Mrs. Spears' three Favorite Quilt Patterns. One, called the Ann Rutledge, was sketched from an original in the reconstructed Rutledge Tavern at New Salem, Illinois, and it is possible that Ann may have been making these quilt blocks when Abe Lincoln came courting. The other two patterns are the Whirl Wind and the Kaleidoscope. Set of three patterns with directions mailed, for 10 cents. Send order to:

MRS. RUTH WYETH SPEARS  
Drawer 10  
Bedford Hills New York  
Enclose 10 cents for Book 3 and 10 cents for set of 3 quilt block patterns.  
Name .....  
Address .....

QUILTS do not belong to any one period and there doesn't seem to be the slightest indication that the old art of making them is dying out. Most quilts today are planned as bedspreads and have a color scheme to harmonize with other decorations. If a variety of figured scraps are used in the piecing, one dominant plain color is generally repeated in each block to give the design unity. Again, one color is combined with white throughout the entire quilt. Some quilts have elaborate pieced borders; others are finished with a band of white with the dominant color used as an edge binding. A bias striped material makes the binding of the quilt in the Whirl Wind pattern shown here.

The beauty of any quilt is enhanced if it is set off with a valance around the bed. They knew that in the days of the four-poster and the rule applies still. The bed in the sketch had no particular tradition and the footboard was much too high to display the quilt spread to advantage. What a difference in the effect when the board was cut down and the crisp

# TIPS to Gardeners

### QUICK FLOWER GARDENS

MANY people want quick results in the flower garden, and for them the lists of annual flowers offer effective aid.

A highly satisfactory, and economical hedge, for instance, can be grown in six or eight weeks from seed. Kochia is the plant. A single packet of Kochia seed will provide a full, bushy hedge along the front or side of the yard. For a flowering hedge, Four o'Clock will produce attractively within two months after seed is planted.

Glowing borders of flowers that beautify the yard, and at the same time provide ample cut flowers for the housewife, may be enjoyed the first summer. The fastest-growing and most dependable annuals for cutting include the Zinnias, Marigolds, Bachelor Buttons and Petunias. There are tall, medium, and dwarf varieties of each.

Most widely used of fast-growing annual vines is Heavenly Blue Morning Glory, whose giant, soft-blue flowers are in a class by themselves. It is well to scratch the coat of Heavenly Blue seeds before planting them to speed their otherwise slow germination.

### CAN'T YOU SLEEP?

If it weren't for heartburn and "fullness" caused by acid stomach, you might get some rest! ADLA Tablets contain Bismuth and Carbonates for quick relief. Ask your druggist for ADLA Tablets tomorrow.
