"Men of The Lightships"

Mrs. Montfort Entertains

Tuesday afternoon, Mesdames Montfort and Jenne entertained with a tea at the Montfort home honoring Miss Kay Read, of Louisiana who is visiting the two ladies. Refreshments were sandwiches, punch, cookies all in a color scheme of pink and green. About forty ladies were in attendance.

Buy U. S. Defense Bonds.

EXTENSION HAY SCHOOL

Plans have been made by the Extension Service to conduct an all-day hay school on the farm of Mr. George Titsworth, Tuesday, June 17 beginning at 9:00 a. m. The demonstration and program will be held on the "Bible Place" located one mile east of the Hondo Post Office.

Implement companies are to demonstrate recent hay equipment; such as, side delivery rakes, choppers, and pick-up balers. Other special features of the program will include a discussion on fertilizer, by Clayborn Wayne, Extension Agronomist; Cutting, Curing, and Grading Hay, by Glen Staton, Associate Agronomist; and Utilization of Hay, by George F. Ellis, Extension Animal Husbandman.

All who are interested are invited to attend the school.

Carl P. Radcliff
County Extension Agent

Dunlap-Walker

Miss Pauline Dunlap of Artesia and Mr. Buster Walker, son of Mrs. Clara B. Walker of Carrizozo were married in Artesia, Saturday evening, June 7, 1941.

The bride has visited Carrizozo several times and is pretty and attractive. She is popular both in her home town and in Carrizozo.

The groom is an energetic young business man, and is well known here where he was formerly employed by the City Garage.

Jones-Peters

June 2 at 9:00 p. m. Mr. La Moynes Peters and Miss Opal Jones were united in marriage at the Nazarene Parsonage in Roswell.

Mr. Peters, who is the son of Mr. and Mrs. Gilbert Peters of Nogal, is a well known young rancher and is a graduate of the Capitan High School.

Mrs. Peters is the daughter of Mr. and Mrs. D. O. Jones of Angus. She is a graduate of Portales Jr. College and has been a teacher in the Capitan School for the past two years. They will make their home on their ranch near Capitan.

Mr. Porfirio Chavez is building a new house on Alamogordo Ave

Local and Personal

Mrs. Dan Elliott was hostess to the Past Matron's club last Tuesday. A pleasant afternoon was spent.

Lee Ivan Carl, who is stationed at Fort Sill, Oklahoma, will visit Carrizozo one day next month, enroute to Fort Sam Houston.

Mr. John W. Harkey has completed his new building, which will be occupied by the Lincoln County draft board.

Mrs. Victoriano Romero held the lucky number that won the dining room suite given away at the Petty General Merchandise store on June 5.

Mr. and Mrs. Joe Garcia of Albuquerque spent a few days here last week visiting relatives and friends.

Mr. O' Dell Baker left today for Tucson where he will be employed by the Southern Pacific Company.

Charles Snow and Bradley Smith spent yesterday in Roswell visiting Jobie McPherson.

Pvt. Lorenzo Mirabal of Fort Bliss spent the week-end here with his family.

Mr. and Mrs. Robert Hemphill of Orogrande arrived Wednesday to spend a week at the Smith home.

Lt. Bardley Smith came up from Fort Bliss for a few days with his parents, Mr. and Mrs. C. E. Smith.

Judge and Mrs. M. C. St. John drove to Las Cruces Sunday to take their little daughter, Eva Jane to summer school at that place.

Miss Estelline Turner of Hobbs is visiting her grandmother, Mrs. Mae Jordan and daughter Eliza Beth. She will stay two weeks.

Mr. Lino Herrera left last week for Albuquerque to take medical treatment at the veteran's hospital.

LOST: Billfold, finder will receive liberal reward if returned with contents. Lincoln Co. News.

NOTICE OF HEARING OF FINAL REPORT AND ACCOUNT

In the Probate Court of Lincoln County

State of New Mexico

In the Matter of the Last Will and Testament of } No. 291
Thomas E. Welch } Deceased.

To Lucile N. Welch Davis, Formerly Lucile N. Welch, White Oaks, New Mexico, and to all unknown heirs of the said decedent, and all unknown persons claiming any lien upon, or right, title, or interest, in or to, the estate of the said decedent, and to whom it may concern: You, and each of you are hereby notified, and notice is hereby given, that Lucile N. Welch Davis Formerly Lucile N. Welch, Executrix of The Last Will and Testament of Thomas E. Welch deceased, has filed in the above entitled Court her final report and account as such Executrix, and the Court has appointed Monday, the 28 day of July, 1941 at the hour of 10 o'clock A. M., as the hour and day for hearing of objections, if any there be, to the approval and settlement of said final report and account and the discharge of the said Lucile N. Welch Davis as such Executrix, and at the hour on the day named, the Probate Court will proceed to determine the heirship of said decedent, the ownership of his said estate and the interest of each respective claimant thereto and therein and the persons entitled to the distribution thereof.

The name and post office address of the attorney for the Executrix is John E. Hall, Carrizozo, New Mexico.

Witness the honorable Marcial G. St. John, Judge of the said Court, and the seal thereof, this 12 day of June, 1941.

Felix Ramey,
Clerk.

J13-July 4.

S. C. S. SUPERVISOR APPOINTED.

The State Soil Conservation Committee, at its last meeting appointed Mr. O. B. Shook, of Capitan and Mr. Floy Skinner, of Nogal as supervisors of the newly formed Upper Hondo Soil Conservation District. Three more supervisors will be elected by land owners of the district at an election in the near future. The five supervisors will form the governing body of the newly created district and will direct soil conservation activities within the area.

THE FOREST FRIEND IS THE CAREFUL SMOKER

The careful smoker knows the constant danger of fire and habitually observes the following rules while traveling through forest land, brush land or grassy land.

He smokes only while stopping in a safe place clear of all inflammable material; or he smokes inside a vehicle equipped with ash receptacle; or

He smokes in a safe place beside water; and

He always crushes out all glowing tobacco and matches before throwing them away.

G. J. GRAY
Forest Ranger.

FOOD STAMP VIOLATORS

Evidence presented by food stamp investigators resulted in three to six month jail sentences being imposed in Federal Courts recently against three food retailers in southern California and Arizona, according to announcement made today by Charles F. Kunkel, acting director of the Surplus Marketing Administration.

Vito Angiulli, operating Alfano market in Los Angeles, was sentenced to three months at Terminal Island, Federal prison in Los Angeles Harbor, and placed on three year probation upon completion of the sentence. In addition, Angiulli was fined \$500.

Samuel Fe'dman, operating the Rena E. Levine Grocery in Los Angeles, was sentenced to six months at Terminal Island with the same probation term as Angiulli.

In Arizona, Nelson Borce, Sr., operating food stores in both Coolidge and Florence, plead guilty and was sentenced to six month imprisonment on one count and a year's suspended sentence on a second count.

In all cases the sentences were imposed under the federal statutes of making a false claim against the government.

"As food stamps are redeemed by the U. S. Treasury any misuse of food stamps by merchants constitutes a false claim when the stamps are presented for payment," said Mr. Kunkel. "Food retailers well understand the simple rules and regulations governing the operation of the food stamp plan and the campaign of compliance will be continued until all malicious violators are prosecuted or barred from further participation. Only in this way can the government, the farmer, the honest merchant and the needy food stamp user be protected."

Surplus food committees comprising representative food retailers and wholesalers who assist in the operation of the plan in food stamp areas have been very helpful in securing compliance, according to Kunkel.

Purchase of food stamps for cash and sale of non-food items such as alcoholic beverages, tobacco, gasoline and household items make up the bulk of complaints received by SMA from retailers and participants.

THE FOREST ENEMY IS THE CARELESS SMOKER

About 50,000 forest fires were caused by careless smokers last year. Those who failed to observe a few simple precautions while smoking in the woods caused about 20 per cent of all forest fires.

THEY SET:
More fires than were set by railroads, logging and debris burning. Over three times the number of fires caused by carelessly left campfires.
Over three times the number of fires set by lightning.

VILLAGE REPORT

Minutes of regular meeting of Board of Trustees held at City Hall June 3, 1941, at 7:30 P. M.

Members present: M. U. Finley, Mayor; G. T. McQuillen, R. E. Shafer, Albert Scharf and Daniel Chavez, members; Roley Ward, Marshal and Morgan Lovelace, Clerk.

Members absent: None.

Minutes of last meeting were read and approved.

Mr. Fairbank and Mr. Putman of the Southern Pacific Company met with the Board and discussed matters relative to the closing of Main Street crossing over the railroad tracks and opening a new crossing at the end of the West switch.

Mr. Fairbank and Mr. Putman of the Southern Pacific Company met with the Board and discussed matters relative to the closing of Main Street crossing over the railroad tracks and opening a new crossing at the end of the West switch.

Motion by G. T. McQuillen and seconded by R. E. Shafer that the applications for occupation licenses as submitted by the Clerk be accepted. Motion carried.

Motion by A. J. Scharf and seconded by R. E. Shafer that the City Council hereby appoints, subject to approval of the volunteer fire department, Fay Harkey to act as Fire Chief in the place of Mr. J. M. Beck, who is leaving the City. We regret very much to lose Mr. Beck, as a citizen, and especially as Fire Chief. Motion carried.

Motion by G. T. McQuillen and seconded by A. J. Scharf that the Village take preliminary steps in the matter of procuring a WPA Project for the building of an overhead pedestrian crossing over the railroad tracks. Motion carried.

Motion by Daniel Chavez that the Village remove and haul trash, garbage, etc., from residence and business houses and that a charge of 20c per month will be made for each residence or business house for this service. Those desiring this service please notify the Village Clerk. A statement for the service rendered will be mailed to those receiving this service. The collection of garbage and trash will be made monthly. Motion carried.

The following bills were approved and ordered paid.

Received Appointment

Mrs. R. C. Stinnett received a telegram this week stating that she had passed an examination for senior stenographer and had been appointed to the munitions plant at Washington, D. C. She accepted and she and her mother and little daughter will leave tomorrow night for that point. Mr. Stinnett will remain here a month and will then join them there, at which time, Mrs. Elliott will return home. The eldest son Daniel of Mr. and Mrs. Elliot is stationed at Baltimore.

Sgt. U. D. Walker, who is located at Cavite, near Manila, in the Philippines, wrote his mother last week, it would be several months before he could return to the States. He is enjoying naval life says it fine there and always reads his Lincoln County News with interest.

Second Registration July 1st, 1941

The President of the United States has proclaimed a second registration for all male citizens and aliens residing in the United States who have reached the age of 21 years between the 17th day of October, 1940 and the 1st day of July, 1941, both inclusive.

Registration for Lincoln County will be held at the Selective Service office in Carrizozo, New Mexico, located between Alamogordo and Tularosa Avenue facing the city park. The office will be open from 7 A. M. to 9 P. M. Tuesday, July 1, 1941 for registration purposes. Men failing to comply with the regulations of the Selective Training and Service Act of 1940 are subject to fine and imprisonment under this law. We, therefore, urge that the above information be given the widest publicity possible.

Edith McKinley, chief clerk,
Lincoln County Local Board.

FSA Designated National Defense Agent

The Farm Security Administration, United States Department of Agriculture, has been designated as a National Defense Agency, according to word received here by John Paul Jones, rehabilitation supervisor for the FSA in Lincoln County.

Federal program contributing directly or indirectly, or both, to national defense have been given a deference rating by the Federal Government.

The chief contribution of Farm Security to national defense is its rehabilitation of farm families who have suffered the plight of economic insecurity.

The Farm Security Administration has many programs to assist America's rural families other than making loans to low income needy farm families.

Farm Security makes it possible for many low-income rural people to find security of tenure, improved housing and sanitation facilities, improved diet, more stable income and, in many cases, improved medical attention.

Another phase of the defense program is that FSA families are cooperating in the soil conservation program. They are using sound farm and home practices, rotating their crops, planning to plant cover crops, and they are growing feed for their stock as well.

In these times of stress, long term leases—three to five years—are needed to give stability to the tenants and sharecroppers. These leases are beneficial to the land owners as well as tenants, because it gives the tenants an opportunity to improve the fertility of the soil.

In designating the Farm Security Administration as a National Defense Agency the National Defense Commission recognizes the fact that a nation that has too many low-income, inadequately housed, fed and clad persons in it, together with those who suffer ill health, cannot be a strong nation in time of peace or war.

Mr. Irl Hemphill, who has been visiting his parents, Mr. and Mrs. R. C. Hemphill at Orogrande, left Tuesday for Norfolk, Virginia, where he will attend the Naval Academy preparatory school.

KNOW YOUR BANK

What Is The "American Way" In Banking?

Our American Banking System is actually forty-nine systems, state and national, knit together by a common policy of service to community and nation. It consists of about 15,000 privately owned, chartered banks, operating under governmental supervision. Through individual initiative it has grown to be the greatest financial structure on earth. It is a good system, a monument to democracy. May it long survive!

YOUR SUNDAY DINNER
(See Recipes Below)

ESPECIALLY FOR DAD

Sunday, June the fifteenth, is the day you want to especially prepare DAD's favorite foods—for it's Father's day—and don't forget it. The favorite of all men is a good tasty meat pie—so the suggestion for the main course is a delicious individual meat pie. Dad doesn't like to bother much with side dishes of salad, so

place his salad right on the plate with the rest of the meal. He likes a cole slaw stuffed tomato. Buttered carrots and peas are the vegetables. Because he is so fond of blueberries, it's blueberry muffins to go with the meal, and blueberry ice cream cake for dessert.

This week's menu is properly balanced for nutritional value. It supplies:

The appetizer: Carbohydrates, minerals, Vitamins A, B, C, and G.

The Meat: Protein, phosphorus, Vitamins B, B-1; fats, carbohydrates in crust.

The Vegetables: Minerals, Carbohydrates, Vitamins A, B, C, and G. Muffins and butter: Vitamins A, B, C, and G, minerals, carbohydrates.

Salad: Minerals, Vitamins A, B, C, and G, carbohydrates and fats. Dessert: Carbohydrates, minerals, fats, Vitamins A, B, C, D, and G.

To Serve 6 You Need:
1 can apricot nectar
1 can pineapple juice
2 lbs. lamb shoulder
2 bunches carrots
1 No. 2 can peas
6 tomatoes
1 small head cabbage
2 pints blueberries
1 pint ice cream

(Balance of materials among staples)

***Individual Lamb Pies.**
2 lbs. shoulder of lamb
2 small onions
3 tablespoons flour
1 1/2 teaspoons salt
2 1/2 cups milk
Butter Pastry

Trim the lamb, cut in small cubes and brown in a hot frying pan. Add the chopped onion and cook until light brown, stirring constantly. Add the flour and salt and mix well. Stir in the milk gradually. Cover and cook over low heat for about 45 minutes or until the lamb is tender. Roll out pastry and place in individual pie tins or cut in six five-inch rounds and place in large cupcake pans. Fill with the lamb mixture and brush the rims of the pastry with milk.

Top each pie with another round of pastry. Crimp the edges and cut

slits in the top for the steam to escape through. Brush each pie with milk or cream. Bake in a 425-degree F. oven for 25 to 30 minutes or until the crust is evenly browned. Lift gently from the pan and serve.

LYNN SAYS:

Dad's day might be the one day when Dad would really like to try his hand in the kitchen. How about some feathery light biscuits to go with dinner? They're an easy trick if you just put out the ingredients for Dad, along with one of those big bowls and a spoon. Now sift 3 cups of flour, 2 teaspoons of baking powder, and 1/2 teaspoon of salt. Cut in 4 tablespoons of shortening, and then add about 1/4 of a cup of milk gradually. Stir until a soft dough is formed, not too long, though, or the biscuits will be tough. Turn the dough on a slightly floured board, pat to a 1/2-inch thickness, and cut with a floured biscuit cutter. Pop them into a hot oven (450 degrees) on an ungreased baking sheet for 10-15 minutes. Dad will probably like the large biscuits, so better give him the large cutter. The recipe will make about 12 biscuits of that size, or 16 of the smaller ones. Can't you just see him beaming over a plate of hot, flaky biscuits he made all by himself?

THIS WEEK'S MENU

- Chilled Mixed Fruit Juices
- *Individual Lamb Pies
- Buttered Carrots and Peas
- *Blueberry Muffins Butter
- Tomato and Cole Slaw Salad
- French Dressing
- *Blueberry Ice Cream Cake
- *Recipes given.

Butter Pastry.

- 1 1/2 cups flour
- 1/2 teaspoon salt
- 1/2 teaspoon baking powder
- 3/4 cup butter
- 3 to 5 tablespoons milk

Mix and sift the flour, salt and baking powder. Cut in the butter with two knives or rub in with the fingertips. Add milk slowly, tossing the mixture together lightly and use only enough milk to hold the ingredients together.

*Blueberry Muffins.

- 2 cups sifted flour
- 4 teaspoons baking powder
- 2 tablespoons sugar
- 1/2 teaspoon salt
- 2 eggs, beaten
- 1 1/2 cups milk
- 3 tablespoons melted butter
- 1 cup blueberries.

Sift dry ingredients together. Combine eggs, milk and shortening and add to dry ingredients, stirring only until moistened. Fold in blueberries. Pour into greased muffin pans and bake in moderately hot oven (425 degrees F.) for 25 minutes. Makes 10 muffins.

- *Blueberry Ice Cream Cake.
- 1/2 cup butter
- 1/2 cup sugar
- 1 egg
- 1 cup flour
- 1/2 teaspoon salt
- 1 1/2 teaspoons baking powder
- 1/2 cup milk
- 1/4 teaspoon vanilla
- 1 1/2 cups blueberries
- Vanilla ice cream

Cream the butter, add the sugar gradually and cream thoroughly. Add the egg and beat well. Mix and sift the flour, salt and baking powder and add to the first mixture alternately with the milk. Add the vanilla and pour into a buttered cake pan about 8 inches square. Sprinkle blueberries over the batter and bake in 375 degree F. oven for 30 minutes. Cut in squares and serve warm with ice cream and warm blueberry sauce.

Blueberry Sauce.

- 1/2 cup sugar
- 1 1/2 tablespoons flour
- 1/4 teaspoon salt
- 1/2 cup water
- 1 cup blueberries
- 1 tablespoon lemon juice
- 2 teaspoons butter

Mix the sugar, flour and salt in a saucepan, and add water and blueberries. Cook over low heat, stirring constantly until thickened. Stir in lemon juice and butter.

SERVING HINTS:

Place individual pies right on the serving plate. The tomato cole slaw salads may be arranged on lettuce leaves on a platter and each person can serve himself from this platter. Peas and carrots always offer a good color combination. Arrange them in a bowl tossed together or separately arranged with carrots in the center and peas surrounding the carrots.

The dessert had better be served in a rather deep dessert dish. Place a square of cake in each dish, then top with a ball of ice cream. Over all pour the rich looking blueberry sauce. Prepare this dessert just before it is to be served. The whole family will love it.

USE OF LEFTOVERS:

Here's what to do with that bowl of leftover vegetables. Say you have peas, carrots and mashed potatoes. This is a fine combination for Vegetable Puffs. Mix 1 cup leftover mashed potatoes with 2 eggs, 3 tablespoons milk, 1 teaspoon baking powder, 1 1/2 cups peas, carrots, mashed, 1/2 cup flour and 1 tablespoon chopped parsley. Mix thoroughly together and drop by teaspoons into hot deep fat—350 degrees F. Cook until brown. Drain on absorbent paper. Makes 6 to 10 puffs.

Flower-Edged Hats, Parasols, Latest Wedding Innovations

By CHERIE NICHOLAS

PROSPECTIVE brides and bridegrooms usually plan the floral color schemes for the wedding party together, since the groom is responsible for the bouquets carried by the bride and her attendants.

Fashions in fresh flower arrangements promise brides of summer 1941 the utmost in beauty. White iris combined with white gladioli in a bridal bouquet tied with lace will be a favorite for the early summer wedding and orchids, lilies, roses, stock and sweet peas in modern or old-fashioned bouquets will be in demand for bridal parties throughout the summer.

Whether a wedding emulates one of the periods of past history or anticipates next year's styles, there are enchanting headresses and bouquets that any bride will delight in selecting. Corsages of lilies, fragrant carnations and roses with rose geranium leaves as a background are quaint looking. Carnations, used in modern scroll arrangements, make a bouquet that even the most budget-minded bride can afford.

Huge arm bouquets of fragrant stock and snapdragons are lovely for both the bride and her attendants in a garden wedding, and these same flowers may be used to fashion crown-like bonnets. Gladioli blossoms are another favorite flower choice for outdoor weddings. These flowers in white would be lovely for the bride, while deep shades of tangerine and fuchsia or the more delicate coral pink will blend beautifully with summer pastels.

Flowers sure to bring ohs and ahs of admiration are parasols or delicately colored sweetpeas. Carried in a garden wedding, tiny nosegays of the same flowers should be reserved for the bridesmaids. Baskets of blossoms are new, too. Carna-

tion petals fashion them, with wide brims of flattering tulle. A Mary-Queen-of-Scots bonnet might have the heart-shaped brim outlined with tiny sweetheart roses.

Garlands, rather than bouquets of white blossoms, are another new note in bridal flowers. Painted daisies, cornflowers, blue iris or bright pink carnations make enchanting garlands for the attendants.

The bride who wears her going-away frock for the ceremony may prefer a corsage to a hand bouquet. Orchids, gardenias and sweetpeas in modern scroll arrangement give a luxurious note to an otherwise simple costume. Tailored corsages, tied with bows of green leaves, are still another innovation for the informal wedding. Since the bride's mother shares the limelight with the wedding party, her flowers are important. The flattery of deep blue iris would be lovely with any soft-toned frock.

As effective as heirloom lace is the scalloped, hand-patterned lace fabric used for the youthful bridal dress pictured. Style-important features in the gown pictured are the flattering round neck; the full puffed sleeves; the quaint, fitted bodice that buttons down the front, emphasizing a snug waistline; and the full skirt. The dress has a long train, and because it is so beautifully patterned, the veil is a short one, edged with a band of the same lace as that in the skirt. The bride's bouquet is of roses and white snapdragons.

Delicate pink sweetheart roses, worn as a corsage, are matched by wee roses outlining the Mary-Queen-of-Scots bonnet worn by the bride's attendant. The pale pink of the blossoms contrasts beautifully with the deep periwinkle blue of her chiffon frock.

(Recreated by Western Newspaper Union.)

White With Color

White with a splash of daring color is an important style message for summer. The white flannel outfit here pictured tallies perfectly with this idea. The white skirt has a red and white polka dot blouse, topped with a white flannel jacket, belted at the waistline. White pigskin bag, doekin gloves and chic white hat complete the ensemble.

Alluring Veils

The National Geographic Society says the women of America wear more veils than the women of Turkey. Easy to believe if you notice the clouds of veiling—pink, white, red, green, black and brown—which will continue to soften the fashion scene, right through summer.

The newest use for veils is to tie them about the crowns on big-brimmed hats and let them drip down the back.

Big brims are really big this season, up to nine inches. Usually soft, not stiff, in outline—made of rippled black organza, champagne-colored straw, chicken wire white straw, and shirred red felt.

Telltale Sleeves

Sleeves are telltales this season. So complete has been the change in sleeve treatments that they definitely tell the newness of your dress, your coat or blouse. The new silhouette is achieved through deep armholes and smooth shoulders.

In softly styled dresses of summery silks and cottons the latest news is short sleeves, mere shoulder caps in many instances. In sleeves that are longer there's fullness below the elbow.

Color on Color

Very new is the color-on-color treatment that designers are carrying out in summer sheers. The new nylon sheers, especially, lend themselves to this technique in that they are thin almost to the point of transparency. Black over pink is a favorite combination, navy over red is effective, and orchid over pink or light blue is lovely for evening.

THE "Self-Starters" BREAKFAST
A big bowlful of Kellogg's Corn Flakes with some fruit and lots of milk and sugar.

It gives you FOOD ENERGY! VITAMINS! MINERAL! PROTEINS!

plus the famous FLAVOR of Kellogg's Corn Flakes that makes so good it sharpens your appetite.

YOU ARE AN INFLUENTIAL PERSON

The merchant who advertises must treat you better than the merchant who does not. He must treat you as though you were the most influential person in town.

As a matter of cold fact you are. You hold the destiny of his business in your hands. He knows it. He shows it. And you benefit by good service, by courteous treatment, by good value—and by lower prices.

FIRST-AID to the AILING HOUSE

by Roger B. Whitman
(© Roger B. Whitman—WNU Service.)

Crust on Bricks

QUESTION: In our new house the foundation is red bricks, backed with concrete. We have recently noticed a gray-white coating on the bricks. The bricks are also spotted with cement and paint. How can we bring out the color of the bricks without injury?

Answer: The gray-white coating is the coming to the surface of mineral salts in the mortar brought out by rain. Eventually all of the salt will come to the surface and will disappear. Washing the wall with a mixture of 1 part muriatic acid in 20 parts of water will take off the coating and the spots of paint; it will also soften the hardened cement, which can then be scraped off. Pour the acid slowly into the water and use a wooden or earthenware container. The acid wash should be quickly followed by rinsing with plenty of clear water. The acid being corrosive, you should wear rubber gloves and old clothes and shoes.

Cleaning Gilt Frames

Question: Gilt picture frames are badly blackened. Could I do a satisfactory job of regilding? How?

Answer: The blackening may be no more than dirt. Try cleaning with a half-and-half mixture of denatured alcohol and household ammonia, applied with a camel's hair brush. After a few minutes, using the same brush, go over the frame with clear water to take off loosened dirt. Do not rub. If the gilding is actually damaged, it is better to have the frames regilded professionally than to attempt to do the job yourself, for it requires experience. You might be able to patch small places with the kind of liquid gilding to be had at an art store.

Stopped-up Leaders

Question: Our copper leaders are stopped up, presumably with leaves. They are connected with cast-iron pipe drains in the cellar. Is there any solvent I could use, or have you any other suggestions for clearing the pipes?

Answer: If the leaves are clogging the cast-iron drain, you may be able to dissolve them by pouring down a solution of lye. Be very careful when handling this chemical. This solution should be allowed to stand for several hours. Do not pour the lye into the copper leader; disconnect it. Should this fail, you will have to get a plumber with the proper equipment to clear the pipe.

Chipped Porcelain

Question: I had the misfortune to chip quite a large piece of porcelain from a shelf on my new stove. I have tried repainting it, but the white paint turned yellow and then peeled off. How can I touch it up so that it will look right?

Answer: There is no process by which chipped porcelain can be repaired. The porcelain is applied at the factory under very high heat, which of course cannot be duplicated at home. However, the people who sold you the stove can obtain a new shelf for you at no great expense, and it can easily be put on. You will find this more satisfactory than any attempt at patching.

Removing Wallpaper

Question: How can I remove wallpaper from a room that I want to use for a kitchen? If the plaster needs repairing before being painted, how can I do it?

Answer: Take off the wallpaper by soaking with water until the paste has softened. Go over the paper again and again until the water has struck through. If the paper sticks, use a broad putty knife. After drying, go over the wall with sandpaper wrapped around a block of wood to take off hardened crumbs and fragments. For cracks and holes in the plaster, use patching plaster, which you can get at a hardware or paint store. Full directions for use are on the label.

Storing Books

Question: I want to pack for storage some good books. If they are wrapped in newspaper and packed in wood boxes, will that be enough?

Answer: If the boxes are to be stored in a dry place the only additional protection would be to scatter handfuls of moth crystals in each one to guard against possible book lice and silverfish. Do not, on any account, store the books in a cellar, even if it appears to be dry.

Slamming Doors

Question: I live in a large apartment house, and am constantly disturbed by the noise of slamming doors in the apartments above and below mine. What can the landlord do to stop this nuisance?

Answer: Hardened door-slammers are difficult people to reform. Your only hope for peace and quiet is in door checks.

'Non-Coms' Are Real Backbone Of U. S. Army

Corporals, Sergeants Need Leadership Ability, Character.

(Special to Western Newspaper Union)

WASHINGTON. — The backbone of the army is the non-com.

In Uncle Sam's new army of 1,400,000 men, approximately 346,712 soldiers will be non-commissioned officers. Selective service men will wear a substantial number of these chevrons of leadership.

"Parents of soldiers who wear chevrons should be proud," says George C. Marshall, four-star general, and chief of staff of our army.

It is a fighting army Uncle Sam is developing and these non-commissioned officers have taken the first step upward in the chain of command which starts with the two stripe corporal, and in the military service, ends with the four stars worn by General Marshall.

In addition to the 340,712 soldiers holding warrants as non-commissioned officers, 429,253 are rated as first class privates, with consequent increases in pay and responsibility. Another medium available for the recognition of aptitude and devotion to duty in our army are "Specialist" ratings. A total of 390,397 soldiers are rated as "specialists," with increases in pay ranging from \$3.00 to \$39.00 per month.

"While every man with the colors will benefit from his service, those men who are promoted will develop traits of character which will be of tremendous value to them on their return to civil life," General Marshall said.

Character, Ability Important.

"All non-commissioned officers are appointed by regimental or similar commanders, on the basis of recommendations made by the soldier's immediate superior. These men are specially selected, and seniority carries little weight. Character and demonstrated ability are essential attributes," General Marshall continued. "Grave responsibilities are placed on the shoulders of these soldiers, as indicated in the opening sentence of their warrants."

"Reposing special trust and confidence in the fidelity and abilities of," reads the opening sentence which continues, "I do strictly charge and require all Non-commissioned Officers and Soldiers under his command to be obedient to his orders." The document continues. "Throughout the world's military history, commanders have ever relied upon the resourcefulness, fortitude, and strength of character of the non-commissioned officer. In Philip of Macedonia's early Greek army, it was the Lechagoes; while in Caesar's Roman army, it was the Decurion who carried those forces through to victory. Napoleon recognized the importance of the enlisted man and non-commissioned officer, stating that "every soldier carries a marshal's baton in his knapsack."

General Marshall observed that in many respects the strength of character of non-commissioned officers must be as great or greater than that of commissioned officers. The non-com lives with his men 24 hours a day and participates in every phase of their lives. Despite this familiarity, which the old adage declares "breeds contempt," the non-com must demonstrate that he is a better man—not physically, but mentally. The officer in maintaining discipline is armored with a certain degree of aloofness. This simplifies

Ranks of soldiers and their officers are revealed by the insignia they wear. The insignia most commonly seen are shown above. First class privates and non-commissioned officers wear their insignia on the left arm, while commissioned officers wear theirs on the shoulder.

his task of maintaining discipline. But the corporal living with his squad of some eight or twelve men is on his own.

Enhance Self-Respect.

"Many of our citizens feel that the non-commissioned officer's task is simplified because of the support he always receives from officers. However, the new army we are developing is not an army where fear of punishment is the right arm of discipline," General Marshall said. "It is an army where every effort is made to enhance the soldier's self-respect. Consequently, the non-com must ever be alert to curb any possible tendency to violate the Code of the American Soldier. Instead of waiting to report violations of orders, with possible disciplinary action, the corporal, by example and straight talk, prevents these derelictions which so vitally affect a military organization."

Should our armies have to take the field in defense of American liberties, the responsibilities of corporals and sergeants would be tremendous. In order to develop their military qualifications for command, these non-coms attend schools, and one of the basic points emphasized is that the leaders who permit one of their men to be killed needlessly is a murderer. With such high standards, it is apparent that the character development which accompanies appointment as a non-commissioned officer is a factor which will pay dividends in both civil and military life.

The road leading to a commission and further advancement in the army is also open to enlisted men, and on July 1, 1941, 10 Officers' Candidate schools will open in various parts of the country. A total of 2,200 warrant officers and enlisted men, all with at least six months' service, will attend these schools. Men successfully completing the course will be commissioned as second lieutenants. It is probable that the majority of these students will be non-commissioned officers, for they have already demonstrated their worthiness for promotion.

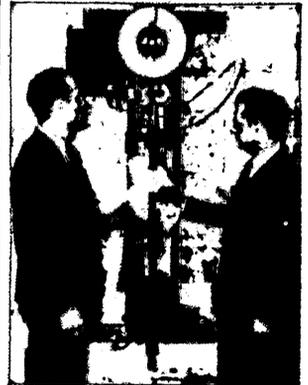

In the army, as in civil life, increased responsibility is rewarded by increased pay. All of the men now entering the service start with base pay of \$21.00 per month. At the end of four months' service, their pay is increased to \$30.00 per month, unless inefficiency or other unfitness indicates that the soldier is unworthy of receiving extra compensation. The next promotion is to first class private, carrying an advance of \$3.00 per month. From first class privates the corporals are selected and they receive \$54.00 per month. Pay of other non-commissioned grades are: Sergeant—\$60.00 per month; staff sergeant—\$72.00 per month; first or technical sergeant—\$84.00; and master sergeant—\$123.00.

Modern Science Improves Value Of Cloth Fabrics

CHICAGO.—Women in small cities and rural communities have reclaimed homemaking leadership by their wholehearted acceptance of consumer education. It is these women who today really understand and apply the principles of scientific homemaking.

Not so long ago, when modern homemaking first reared its scientific head, it was perfectly true that the city gal's glib talk about thread count and vitamin content—backed by a Home Economics degree—had the farmer's wife definitely at a disadvantage.

Then came rural electrification, and modern homemaking paraphernalia was no longer the city woman's special privilege. Expansion of the 4-H club, the Grange, and county agent activities brought new

Scientists test cloth for tensile strength. The machine measures the amount of "pull" required to tear the cloth.

knowledge of how to safeguard the health, wealth and happiness of these vast areas.

Today, the co-ordinated power of these educational groups and homemakers is felt in every branch of industry—for, by their refusal or acceptance of new ideas in homemaking, industries rise or fall.

For example, professional laundering has been a leader in practical consumer education, with far-reaching results in consumer protection, and in forcing manufacturers to produce products to match consumers' new standards.

Laundrymen became tired of "taking the blame" for washing failures and called on science to protect them with their customers. Through their national association, the American Institute of Laundering, they set up research laboratories in Joliet, Ill.

Results have been interesting. For instance, a few years ago, the farmer's daughter and her city sister judged a bed sheet only on price and appearance. If it fell to pieces after a few washings at home they were downhearted but didn't know what to do about it; if it came back from the laundry somewhat in shreds, they blamed the laundry.

So, bed sheets were put through the research laboratories. These scientific studies revealed that the inherent weaknesses of the sheets themselves were to blame for the damage—not the washing process. With consumers and the professional laundries demanding sheets which meet minimum standards, the manufacturers got busy and produced them.

Methods of dyeing also are subjected to the laundries' test tubes. Color fastness is an important subject to the housewife. It is estimated that about 50,000,000 is wasted annually because fading colors destroy the eye appeal of garments otherwise wearable. By the way, the scientists point out that few, if any, home treatments for "setting" fugitive colors are effective. If such remedies possessed merit, textile dyers and printers would adopt them. Some of these "home treatments" merely fail to be effective, while few even harm the fabrics.

Nation's Farm Income Rises

LaSalle Map of Business Conditions

An increase in farm-product prices has brought the nation's farm income to its highest peak since 1937. As indicated by the map above, favorable business conditions prevail in most sections of the country.

By L. G. ELLIOTT
President, LaSalle Extension University

CHICAGO.—Farmers are receiving more money than they did last year, and are buying more goods, the result of increased income from higher prices for dairy products, grains and cotton. Advances in these commodities have more than offset the recent moderate declines in livestock prices, which are now at the top for several years. The general average for all farm prices is 12 per cent higher than a year

ago, and is the highest since 1937. Government payments to farmers, which have been somewhat smaller, are expected to rise during the next few months.

Greatly increased purchasing power of consumers in cities, and the improvement in general economic conditions, have been partially responsible for these higher prices for farm products. Another contributing factor is government purchasing of large quantities of farm products under the "Food for Defense" program.

FAMOUS ALL-BRAN MUFFINS. EASY TO MAKE. DELICIOUS!

They really are the most delicious muffin that ever melted a pat of butter! Made with crisp, toasted strands of KELLOGG'S ALL-BRAN, they have a texture and flavor that have made them famous all over America.

KELLOGG'S ALL-BRAN MUFFINS
2 tablespoons 1 cup milk
1 cup shortening 1 cup flour
1/2 cup sugar 1/2 teaspoon salt
1 egg 2 1/2 teaspoons
1 cup All-Bran baking powder
Cream shortening and sugar; add egg and beat well. Stir in All-Bran and milk; let soak until most of moisture is taken up. Sift flour with salt and baking powder; add to first mixture and stir only until flour disappears. Fill greased muffin pans two-thirds full and bake in moderately hot oven (400°F.) about 30 minutes. Yield: 6 large muffins, 3 inches in diameter, or 12 small muffins, 2 1/2 inches in diameter.

Try these delicious muffins for dinner tonight or for tomorrow morning for breakfast. They're not only good to eat; they're mighty good for you as well. For several of these muffins will add materially to your daily supply of what physicians call "bulk" in the diet, and thus help combat the common kind of constipation that is due to lack of this dietary essential. Eat ALL-BRAN every day (either as a cereal or in muffins), drink plenty of water, and see if you don't forget all about constipation due to lack of "bulk." ALL-BRAN is made by Kellogg's in Battle Creek.

Noble Man
What a piece of work is man! How noble in reason! How infinite in faculties! In form and moving, how express and admirable! In action, how like an angel; in appearance, how like a god! the paragon of animals.—Shakespeare.

KILL ALL FLIES
Daisy Fly Killer
This is a new, safe, and effective fly killer. It kills flies, mosquitoes, and other annoying insects. It is easy to use and does not harm your household.

Spread of Evil
There are many that despise half the world; but if there be any that despise the whole of it, it is because the other half despises them.—Colton.

Wedding Announced

Saturday morning of last week, Miss Evelyn Sprinkle and Mr. James C. Hutchison announced their marriage which took place in Socorro, N. M., February 16, 1941, and which they kept secret until after the close of school.

Mrs. Hutchison has been one of the popular teachers in the Carrizozo Grade school for several years, and is highly regarded by everybody for her ability, accomplishments and her retiring manner. She is also a member of the local Rebebah lodge.

Mr. Hutchison is at present in training at Fort Bliss. Until he was called to the colors he was employed at Miller's Service Station near town. He is friendly, popular and business-like. For the present they will live in El Paso.

Mr. Charles Snow came home last week from State College where he completed his basic course in flying. Charles received the best grades and highest average out of a total of 26 students in the same course, and now has two attractive offers to complete his course in flying. He will accept one of the offers, as he really enjoys the air service.

Mrs. Mae Jordan attended the singing convention and visited her daughter, Mrs. Lenora Turner at Hobbs last Sunday.

Mrs. Clara Frizer and little daughter Bettie are here from Tularosa visiting friends.

Blondes are more to be pitied than censured. They aren't really gold-diggers, see badly at night don't powder or paint as a result of vanity, but because of tender skin, and are more likely to kill themselves than their sweethearts. Read Dr. Donald A. Laird, prominent psychologist's surprising new appraisal of them in The American Weekly, the magazine distributed with next week's Los Angeles Examiner.

Defense - Keynote of newest auto engineering. How a motorized circus can replace a bombed city; how an astonishing naval academy has developed inside a factory; and how pleasure car assembly lines are rolling off huge moving fortresses. A challenging feature that should appeal to every patriotic American. Read it in The American Weekly, the magazine distributed with next week's Los Angeles Examiner.

**OVER 200 EXPECTED AT
CATTLEMEN MEETING,
LORDSBURG, JUNE 21**

Albuquerque, N. M., May 30—President Tom Clayton of the New Mexico Cattle Growers Association, has extended a personal invitation to every member of the New Mexico Cattle Growers Association and to sections of the First Quarterly Executive Board meeting of the Association to be held at Lordsburg on Saturday, June 21 in the County Court House. A preliminary meeting of the Board will be held in the Hidalgo Hotel.

While the principle purpose of the Board Meeting is to attend to urgent business before the Association, the morning program on the 21st of June will include addresses from: Burton Roach, Hillsboro, Chairman of the Legislative Committee, who will report on developments of the last State Legislature concerning the livestock industry; New Mexico Cattle Sanitary Board, George Cureton, Chairman Southwestern Fair and Feeder Calf Association; A. D. Brownfield, Deming, Past President of Association; C. F. Dierking, Regional Grazier for Division of Grazing and Forest Service officials and others.

B. A. Christmas, Las Cruces and Vice-President of the Association has been appointed Chairman of the General Resolutions Committee for the Board Meeting.

Present indications are that more than 200 cowmen representing all parts of the state and Eastern Arizona will be in attendance. President Tom Clayton stresses the fact that meetings are open to the public and that all cowmen in the state are cordially invited to attend and take part in the meeting.

WHO'S NEWS THIS WEEK

By LEMUEL F. PARTON
(Consolidated Features—WNU Service.)

NEW YORK.—It isn't only the heat that is good news for soda-jerkers. It is an alumnus of their guild who develops a 57-passenger transport plane, galleed at 350 miles per hour, and gets an order for 40 of them, right away quick. The man from behind the counter is 30-year-old Jack Frye, president of the Transcontinental & Western Air, Inc., for the last six years.

He has been merging air companies the way he ambidextrously merged raspberry flips—up through the depression years to the status of a high-rating aviation mogul. His new plane, the largest commercial land plane ever projected, will have a flying range of 4,000 miles and a ceiling of 30,000 feet. He says his fleet of 40 of these planes could hustle 10,000 troops into Alaska in 36 hours.

Born in Sweetwater, Okla., Mr. Frye grew up and did his soda-jerking in California. He nicked each pay check for something for the kitty, to buy into aviation. His first investment was in a series of flying lessons. He and his instructor then bought a battered old war veteran Curtiss Jenny and made it the nucleus of a flying school and an aerial taxi service.

Standard Air Lines came later when two students, Paul E. Richter and Walter A. Hamilton joined young Mr. Frye in establishing it, operating between Los Angeles and Phoenix, Ariz. As one thing led to another, as they bought and merged companies, his associates moved along with him and became executives of the T.W.A. Mr. Richter shared his last notable acquisition of aviation stock, when, in April, 1929, T.W.A. took over about 70,000 shares of the Lehman Bros. holdings in T.W.A. at two points above the market.

Mr. Frye has kept right on flying as well as designing and financing airplanes, and in 1934 set up a record in crossing from Los Angeles to Newark in 11 hours and 31 minutes. Thirty-six years is young for a mogul. Last January, he married Helen Varner Vanderbilt.

COMMANDER Edward Ellsberg's new novel, "Captain Paul," the fictional narrative of the life of John Paul Jones, is another reminder of American penchant for doubling in writing and fighting. We have had Gen. Lew Wallace, with "Ben Hur," "Captain King" and all his other bell-ringing stories; Maj. John Thomasen, of the marines, author of "Fix Bayonets," and many other books and short stories and one of the best writing men of the country, regardless of weight or class; and of course Maj. Gen. "Hop" Arnold of the air corps, author of the long string of "Bruce" stories.

As to Commander Ellsberg, his New Book is one of an increasing number of his imprint which get loud applause from the critics. His spectacular feat in raising the submarine S-31, off Block Island in 1925 first brought him to national attention. His first book, "On the Bottom," told the story of the S-31. Thereafter came "Pigboats," "Thirty Fathoms Deep," "Hell on Ice," "Men Under the Sea," and many short stories and magazine articles. He is now a United States naval reserve officer.

He was born in Hartford, in 1896, the son of a Russian Jewish immigrant. Young Ellsberg went to Annapolis, where he was graduated at the head of his class.

His eminence in engineering is comparable to his literary reputation. He attended the Yale School of Naval Architecture, after his graduation from Annapolis and in the World war got a fast running start into his career by refashioning interned German ships for transports. He is short, compact, squarely built, with an outthrust jaw, and always stirred by keen intellectual interests.

NEVER an engineer, metallurgist, financier or salesman, Walter S. Tower worked up in the steel industry to a \$100,000-a-year job. As president of the American Iron & Steel Institute, he tells the New York general meeting of that organization that this country has steel enough to supply all possible 1942 demands several times over. Mr. Tower taught economic geography at the University of Chicago and was trade adviser for the U. S. shipping board. Has a Harvard M. A. and a degree from Pennsylvania.

Uncle Sam's Notebook
WNU Service—By HARRIET MAY WILSON

Lice and Mites

A prospective poultryman can, with sufficient care, avoid a poultry parasite infestation, but his first consideration will have to be to select a site for his operations which is isolated from other poultry. He will then have to fence the site completely and construct entirely new buildings and runs. He should begin with incubator-hatched chicks, and neither other fowls nor second-hand crates must be allowed on the place. Even then, he will need to be vigilant to prevent insects being brought in from infested quarters by means of clothing, trucks, wagons, etc.

Since very few poultrymen are able to start in this manner, the result is that practically all of them must wage constant battle against the lice and mites which commonly infest domestic fowls.

The chicken mite is a red or gray, blood-sucking insect which feeds during the night and secretes itself in cracks and crevices of walls and roosts during the day. Because of this habit, its presence is sometimes not suspected until a decreased egg production and a generally poor condition of the poultry betrays the ravages of the insect. In heavily infested coops chickens grow droopy and weak; their combs and wattles are pale, and sitting hens are sometimes found dead on the nest, having succumbed to the attacks of thousands of the blood-sucking insects.

Infested Quarters.

Take down all roosts and remove all boards and boxes that may be lying about. Then, with a hand pump, if the place is small, or with a bucket pump or knapsack sprayer for larger houses, spray the entire interior thoroughly with a suitable insecticide. The spray must be driven thoroughly into all cracks, and the floor, too, must be sprayed to kill any mites which may have fallen when the roosts were removed.

The carbolineums or anthracene oils, derived from coal tar, are extremely effective. It is true that they cost more per gallon than other materials but the number of treatments required to control an infestation is less than with other insecticides, and the effect of the carbolineums is very lasting. Another coal tar product, creosote oil, is cheaper than anthracene, is available in most cities, and is very effective.

It is well to reduce either the carbolineums or the creosote oils with kerosene, to facilitate spraying, using one part of kerosene to three parts of the other materials. Crude petroleum, although not so effective as the other oils mentioned, still is very satisfactory in places where the infestation is not excessive. If a sprayer is not available, it may be applied with a brush. Poultry should be kept out of the building until the oil is well dried into the wood.

Treatment to Control Lice.

Lice are not blood-suckers as are the mites, but they feed either on feathers, or on scales from the skin, and cause serious injury. Treatment may be either by dipping or by dusting, the latter method being favored by the majority of poultrymen because dipping soaks the feathers and in some cases injures the skin of the fowls.

One of the most effective, if not indeed the most so, of all dusting materials is sodium fluoroide. It may be bought at from 30 to 60 cents per pound, the price varying with quantity bought and with distance from manufacturing centers.

How to Apply the Powder.

The so-called "pinch method" has been found to be most effective. When the material is applied by this method, the procedure is as follows: Place the powder on a table in an open vessel; hold the fowl by the base of the wings with one hand and with the other apply small pinches of the chemical among the feathers, next to the skin; place a pinch on the head, one on the neck, two on the back, one on the breast, one below the vent, one on the tail, one on each thigh, and one scattered on the underside of each wing when spread. Distribute each pinch somewhat by pushing the thumb and fingers among the feathers as the powder is released. One application of sodium fluoroide to all fowls on a given premises will completely destroy all lice present, but it is necessary that the treatment be thorough and that every fowl be treated.

For more extensive information relative to the control of lice and mites, send five cents to Superintendent of Documents, Washington, D. C., asking for Farmers Bulletin No. 901.

SHORTAGE OF HORSES AND MULES

A reprint from the Yearbook of Agriculture for 1930 indicates that the production of horses and mules in the United States is now much below replacement needs.

NUTRITIVE VALUE OF CEREALS

A convenient and inexpensive way to add nutritive value to cereals is to mix the dry cereal, before cooking, with dry skim milk, in the proportion of one-half to one cup of dry skim milk to each cup of cereal.

INDIGESTION

may affect the Heart.
Gas trapped in the stomach or piles may set like a hair-trigger on the heart. At the first sign of distress smart men and women depend on Doan's Tablets to see gas free. No laxative but made of the Digestive medicine known for its action. If the FIRST DOSE doesn't prove satisfactory, return bottle to us and receive DOUBLE MONEY BACK.

Help to Relieve Distress of
FEMALE PERIODIC COMPLAINTS
Try Lydia E. Pinkham's Vegetable Compound to help relieve monthly pain, headaches, backache and ALSO calm irritable nerves due to monthly functional disturbances. Pinkham's Compound is simply marvelous to help build up resistance against distress of "difficult days." Famous for over 60 years! Hundreds of thousands of girls and women report remarkable benefits. WORTH TRYING!

Time of Life
A long life may not be good enough, but a good life is long enough.—Benjamin Franklin.

THE TRUTH SIMPLY TOLD
Today's popularity of Doan's Pills, after many years of world-wide use, surely must be accepted as evidence of their value. And favorable public opinion supports that of the able physicians who test the value of Doan's under exacting laboratory conditions. These physicians, too, approve every word of advertising you read, the objective of which is only to recommend Doan's Pills as a good diuretic treatment for disorder of the kidney function and for relief of the pain and worry it causes. If more people were aware of how the kidneys must constantly remove waste that cannot stay in the blood without injury to health, there would be better understanding of why the whole body suffers when kidneys lag, and diuretic medication would be more often employed. Burning, scanty or too frequent urination sometimes warn of disturbed kidney function. You may suffer nagging backache, persistent headache, attacks of dizziness, getting up at night, swelling, puffiness under the eyes—feet weak, nervous, all played out. Use Doan's Pills. It is better to rely on a medicine that has won a worldwide acclaim than on something less favorably known. Ask your neighbor!

DOAN'S PILLS

Apply in Life
To live is not to learn, but to apply.—Legouve.

CHAPTER XII—Continued

Mary felt herself tighten warily. "Pearls? Who says so?"

"I'm naming no names, ma'am. I have to sleep against 'em. A map has to sleep some time, and it's easy to slide a knife into a man asleep."

She protested: "You're trying to scare me!"

"I'm scared myself, ma'am," he insisted. "I was in a ship once that came near mutiny and you could smell it coming days before. It was wanting to get ashore to the gold fields that was the trouble then; and it's pearls they're talking now. Pearls as big as chestnuts. And they're saying that barrel of ambergris would make the man rich that had it safe ashore."

"But I don't believe a word of all that about pearls, Corkran," she declared. "If Cap'n Corr had any pearls aboard, I guess I'd know it! And nobody with any sense would want that bad-smelling stuff in the barrel; so if that's all you're worrying about . . ."

He looked at her briefly. He said in a flat tone, grave again: "It's not all, if you want the rest of it. Ma'am, I've served many's the year at sea, and I never did see a mate playing lickspittle and 'polish your boots, mister' with his men that harm didn't come of it in the end."

Mary's pulse leaped. She knew suddenly that she had thought this same thing, without knowing her own thought, as she watched Peter day after day about the ship.

She tried to persuade herself thereafter that Corkran was afraid of shadows but she could not forget his uneasiness, and a day or two later she repeated part of what he had said to Richard. She did not quote Corkran's criticism of Peter, but she told Richard about the pearls.

He was interested in the pearls, but he did not ask where she had hidden them; and he made light of Corkran's fears. "Men are bound to talk when they've nothing else to do," he said.

Since the day he killed the whale, he and Mary had drawn happily together, finding pleasure in this new companionship, each at ease with the other. His confident dismissal of her fears reassured her; and their talk turned at random now, turned back to the years in New Bedford. Mary laughed at a sudden memory and said:

"You know, Richard, I really hated you for a while when we were children."

"Me?"

"Yes. When Peter gave you my letter."

He looked at her in a puzzled way. "What letter, Mary?"

"Forgotten, have you?" She smiled.

He shook his head. "I guess I'm dumb. What was in the letter? Who was it to?"

She looked away from him, absurdly hurt and unhappy because he had forgotten; but then she remembered that Peter said Richard kept her letter, that he even read it aloud to people, and laughed at it with them. She turned away from him, her eyes suddenly hot with tears; and he saw them and caught her arm and protested:

"Here, wait a minute, Mary. Listen . . ."

Then he stopped, for George was just emerging from the cabin companion close beside them, seeing her crimson, with tears in her eyes and Richard's hand restrainingly upon her arm.

If George was disturbed by what he had seen he did not show it. "He kept them together in talk with him a while. When Richard presently left them, Mary tried to make some explanation, but George stopped her.

"You don't need to explain to me, Mary," he said, gently and honestly. "I'm beginning to get hold of myself. There's a jealous devil in me. I hate to have any man look at you. I've made you unhappy because of it more than once; but I'm whipping it. I know you and Cap'n Corr are old friends; but I know there's nothing else."

She was so grateful to him that thereafter she loved him more and more.

Richard told them one morning at breakfast his plan to cruise a while on the right whale grounds among the islands off the South American coast, and perhaps fill their casks before refitting to round Cape Horn homeward bound.

Peter was eating slowly, sawing at the tough salt beef, not raising his eyes. He said resentfully: "This salt beef's tough as witchet, Dick. It's about time we put in some where for fresh stores."

"We'll refit before we make up for Cape Horn," Richard reminded him. "But we've got business to attend to around here first." Mat Forbes went on deck. "It won't take more than a couple of these fat old bulls to fill us bung up," Richard said; and then Mat spoke softly through the open skylight above them:

"Whales close aboard. Cap'n Corr!"

Richard leaped toward the companionway. He called back to Tommy: "Get the harpoons to grab a big one. I'll have cork pass along the mess hall loaded, sharp." He scrambled for the deck, and Peter more slowly followed him.

Mary and George went on deck together. The day was fair, and for the season—early spring in these latitudes—mild enough; the wind light. Mary saw broad streaks of yellowish red upon the water to starboard where the great schools of brit were near the surface; and a moment later a black back showed and twin spouts rose straight as fountains. Richard himself was in the main rigging, watching the whales now so near the ship that voices aboard were hushed and whispering.

"Mr. Forbes, you play loose boat and stay clear," he directed. "The mate and I will fasten if we can. Tommy, go aloft and keep your eye peeled if they sound. Ready the boats."

Peter said, to no one in particular: "Where's Feik?" Without waiting for an answer, he dropped down into the after 'tween decks to find him. A moment later he came on deck again.

"He's sick, Dick," he said.

"Corkran will take Feik's place. Mr. Forbes, lend Borst to the mate's boat. You can manage without him," replied Richard.

Peter protested: "Blast it, Dick, I don't want to tackle a whale with a green man."

"I think Corkran knows his business," Richard said curtly. "Lower away."

He turned toward the boats, not waiting for any further word; but George moved quickly toward him, caught his arm. "Cap'n, may I go with Mr. Forbes?"

Richard looked down at him, grinned and clapped George on the

"Ah-h!" For the boat yonder was in the air.

backed off, the sail and mast came down. Richard and Big Pip were changing ends. Isaiah cackled in shrill glee.

"Never saw Pip mux it before. They don't take to that! Look at him cut for 'em!" And then suddenly, in a long, whistling sigh: "Ah-h!"

For the boat yonder was in the air. Then the bow seemed for no reason to break off in small fragments; and then men and boat were in the sea, lost in a shuddering confusion of torn water and flying flukes and a great black body swinging to and fro.

She had forgotten Peter. She saw his boat now, the sail down, the oars springing. He was at the steering oar, leaning on, making the boat swerve toward the fighting whale. Mat Forbes, well away from them, was racing toward the fight. Peter's boat shot in alongside the black bulk. She saw Corkran in the bow erect, the harpoon ready.

She had an instant's pride in Peter. This time at least he had not failed! Then she saw Corkran drive home one iron and then another.

Mary saw then that Corkran was in fact lancing, his shoulders pivoting like a boxer's as he drove the keen shaft home. The whale in the instant after these new irons struck him had rolled a little, giving Corkran a chance; and he was bold to seize it. She saw the thrust; and a moment thereafter, above that turbulence of foam and flukes, she saw a red flag of blood like a fountain playing.

Isaiah cackled in a sort of gleeful wonder:

"Got him first jab! Say, that Corkran won't ever go ashore 'wind-ard!"

Then the whale dove away, on the surface, thrashing flukes, breaching half out of water, its opoutholes streaming blood like a crimson banner. Mary watched the men in the water. Mat's boat reached them and began to pick them up, pulling man after man over the side. All of them! Saved! A great relief swept her; and she held hard to Isaiah's arm.

Isaiah said disgustedly: "Blast! That whale's sunk."

Her eye swept the water in all directions and saw nowhere a spout, no glistening back, nothing but Mat's boat yonder now full of men, and Peter's bobbing on an empty sea.

"Corkran went in too high with that lance," Isaiah said, and spat. "Can't blame him. He had to work fast. But he went in over the shoulder blade. Right whale's got an air bladder came as a fish. You let the air out and down it goes."

He looked at her sideways.

"There's times I talk more'n I'd ought to," he admitted awkwardly. "Like telling you about the mate not being Cap'n Ira's son. Richard told me not to, and he'd give me fits if he found out I did; but it's so. Cap'n Ira married a widow woman, and the mate was her young 'un. She wouldn't marry him only if he'd tell folks Pete was his. They kep' anybody from knowing, somehow." He added: "But I'd oughtn't to've told you. I was kind of wanked up at Pete for trying to get out of lowering."

She said reassuringly: "I won't tell anyone. It's not our business, is it. Does Peter know?"

"He ain't supposed to." He cackled with a relish. "It's going to be come surprise to that young smelt when he hears the will read out. I'd admire to be there to see."

The boats were near; and they moved to the rail. Mat was ahead, Peter some distance behind, towing the stove boat; and Peter was standing up, using the long steering oar instead of the tiller which he might sensibly have preferred for this peaceful return to the ship.

Richard faced forward, and he seemed to droop in a discouraged, broken fashion. Mary lifted her hand and called to them, a greeting without words. The boat came alongside, and she called: "Was it fun, George? Are you hurt, Richard?"

George grinned happily, and Richard shook his head. "I'm all right. Sannet's ankle's twisted. The flukes just ticked me on the arm. But if it hadn't been for Peter it would have been bad. The whale was ugly."

Yet she saw then that he was more seriously hurt than he had said. He was needing help to reach the deck. His left arm appeared to be of little use to him; and he was white with pain.

Mat said: "You'd best get into some dry clothes and see how bad that arm is."

Richard nodded and went aft, and Mary looked after him, wishing to follow him but George was beside her, flushed, full of talk, trembling with the excitement of the past few minutes. She heard him telling her what he had seen, and tried to listen, and caught broken phrases.

"One so near we could have hit him with our oars . . . Peter didn't hesitate this time." And then she heard him say: "Losing his boat will make Richard a little more human. Not quite so sure of himself."

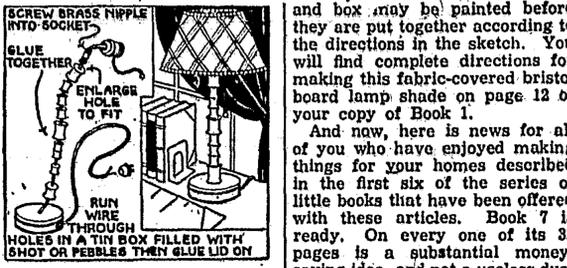

She wished to say loyally that an accident might happen to anyone; but instead she spoke of Peter. "I'm glad Peter killed the whale. He's been feeling so badly about Uncle Tom."

"It was Corkran who killed it," he reminded her.

CHAPTER XIII

She thought for a moment then that Pip had harpooned not one whale but a dozen. The great flukes rose and whipped from side to side with a terrible rapidity. The boat

FIRESTONE TIRES WIN AGAIN

IN 500-MILE INDIANAPOLIS RACE

MAURI ROSE, Co-Winner With Floyd Davis in the 500-Mile Indianapolis Race May 20th, Averaged 118.117 Miles per Hour on Firestone Gum-Dipped Tires Without a Tire Change or Tire Trouble of Any Kind.

FLASHING down the straightaways at speeds as high as 160 miles an hour, Mauri Rose streaked to victory in the 1941 Indianapolis Sweepstakes without a tire change. 500 miles of grinding, pounding, torturing speed — and not one tire failed! Here's proof of safety — proof of blowout protection — proof of endurance — proof of tire superiority backed not merely by claims, but by PERFORMANCE! For 22 consecutive

years all the winning drivers in this great classic of speed and endurance have driven to victory on Firestone Tires. Why? Because race drivers know that their very lives depend upon the safety of their tires. They have made it their business to know how tires are built. And they know that the patented construction features found only in Firestone Tires provide the extra strength and durability necessary to safety and victory!

The same super-safety and dependability that are built into Firestone Tires for the speedway are also built into the new *Safty-Sured* Firestone DeLuxe Champion Tires for the highway. Both are *Safty-Sured* against blowouts by the patented *Safty-Lock* Gum-Dipped cord body. Both are *Safty-Sured* for longer wear by the exclusive new Vitamic rubber compound. Profit by the experience of famous race drivers. Equip your car today with a set of these new Firestone DeLuxe Champion Tires — the world's first and only tires that are *Safty-Sured*.

Coca-Cola Building Yandell Blvd. at Birch El Paso, Texas

THIS WEEK IN DEFENSE

Dr. Will Alexander of the OPM, speaking in Atlantic City, said defense industries will need 4,000,000 more workers by January. He said, as examples, the San Diego, San Francisco and Vallejo areas of California will need 31,000; Detroit, 66,000 to 88,000; Philadelphia, 70,000; northern New Jersey, 30,000; Dallas and Fort Worth, 17,000; and Wichita, 7,000. He asked employers not to discriminate against persons with necessary skills because of race, religion or color.

Labor Secretary Perkins reported 324,000 workers will be needed in the shipbuilding industry, 408,000 in aircraft, 291,000 in machine tools and ordnance, and 384,000 in other defense industries. She said the greatest single need is for 156,000 skilled machinists and 139,000 semi-skilled assemblers.

War Secretary Stimson announced that skilled workers in the Army will be released, if required in key civilian jobs, upon the request of former employers. Sidney Hillman, OPM Associate Director General, again appealed to all unemployed, all persons not in defense industries, and all persons who can do more highly skilled work than required by their present job, to register at local public employment offices so they may be trained and placed in defense work.

Prices

Bureau of Labor Statistics reported food prices increased for the sixth consecutive month and are now about 6.5 percent above last November. Prices of all foods moved upward but the latest increase resulted from advances in prices for dairy products, fresh fruits, vegetables, pork and lamb, the Bureau said.

The Department of Justice announced Federal Grand Juries in San Francisco, New York, Philadelphia, Hartford, Denver, Dubuque, and Washington have indicted 300 firms and individuals in a nation-wide drive to prevent unwarranted increases in food costs.

Agriculture

Agriculture Secretary Wickard asked for a one-third increase in Cheddar cheese production and a one-fourth increase in evaporated milk. He said an increase in total milk production, asked several weeks ago, has been made, but the milk supply must increase in areas surrounding cheese and evaporated milk plants. He said prices would be supported by Government purchases for lease-lend activities.

Priorities

The OPM added copper, cork and steel to vital defense materials under priority control to give defense needs and essential civilian needs first call on the materials.

L. Edward Scriven, Assistant Priorities Director, speaking in Chicago, said, "you can walk through any large retail store today and see all around you commonplace objects—stoves, toasters, vacuum cleaners, typewriters, cameras, tools, and lots of other things—which cannot escape being hit by the demands of the defense program."

Consumers

The Office of Price Administration and Civilian Supply suggested that local consumer groups aid the defense program by establishing local market radio news service, analyzing price rises, and establishing consumer information centers to advise on buying problems and check quality, grading and labeling of consumer goods.

Prospective Oil and Power Shortage

Secretary of Interior Ickes, Defense Petroleum Coordinator, said a temporary restriction on the use of gasoline and oil on the East coast may become necessary because of the shortage of tanker transportation. He said a proposed \$70,000,000 pipe line from Texas to ease the situation would require 12 to 15 months to build.

The Federal Power Commission began a series of conferences with electric utilities officials regarding rapidly expanding defense needs for power, aggravated by a drought in the mid-Atlantic and Southern areas.

Home Defense

New York's Mayor LaGuardia, Director of the Office of Civilian Defense, reported it will take at least a year to obtain equipment to protect the nation's cities during bombing raids. He said it would cost about \$43,000 each to equip the permanent fire companies in the country, and in many places auxiliary fire companies would be needed.

Foreign Affairs

Secretary of State Hull, said French-German collaboration threatens seriously to alter French relations with the United States. The

Naval Recruits Wanted

Secretary of the Navy Knox recently announced that the Navy will open 23 new trade schools. These schools are primarily for the training of the Naval Reserves and ten basic subjects will be taught, namely; radio, visual signaling, diesel engine operation and maintenance, aviation metal-smiths, cooks and bakers, yeomen, carpentry, store keepers, and electricians. The Navy has recently opened other schools and many more will be opened in the near future to take care of the increase in Naval personnel necessary for the Two-Ocean Navy. The training will be intensive, but none the less thorough, the course in these schools will average 16 weeks consisting of shop practice and theory. The practical work will be obtained on board Naval ships and in Naval shore establishments.

The Navy is now conducting a drive to enlist 85,000 men, either in the regular Navy or Reserves, prior to June 30, 1941, to man the increased number of vessels due to join the fleet. Since the Navy is self maintained it requires a great number of technicians to operate efficiently. This is an excellent opportunity, all trades taught are useful in civil life. The period of enlistment for the regular Navy is six (6) years, and for Naval Reserve four (4) years. For more detailed information call or write to your nearest Navy Recruiting Office. Room 227 Post Office Bldg., Roswell, N. M. on Mondays, Tuesdays, and Wednesday of each week.

Open every day except Friday. We have a new steamer which reconditions the hair Before Giving a permanent. 1/2 block west of Buena Vista Hotel.

NOTICE

The Committee has set June 20 as the tentative closing date for receiving applications to make mattresses. The last order of cotton has been made and all eligible applicants who make their applications prior to June 20 will be given first consideration in receiving the remainder of the cotton mattress material. Should there be material left, applications received after the closing date will be considered; but, applications received prior to the date designated will be given first consideration.

Application blanks and rules governing eligibility may be obtained at the County Agent's office.

Carl P. Radcliff,
County Extension Agent
