Guy Kibbee

— In —

### "STREET OF MEMORIES"

An amnesia victim becomes a truck driver and falls in love. A second blow on the head restores him to recollection he is wealthy.

— ALSO —

"Bowling for Strikers" and  
"Spotlight on Indo China"

Mr. George Joyce who for six and one-half years has been the very competent and popular custodian of the Carrizozo High School building and grounds leaves today for Wichita, Kansas where he has accepted an excellent position. We wish him the best of every thing and hope to see him when he gets a vacation. We know he will be hard to replace, but the Board of Education will do its best.

Contributed

## New Mexico State Fair

Among new features scheduled for the entertainment program of New Mexico State Fair in September, is a Fiesta day, on Tuesday, September 23 in which Spanish dances dating from the colonial days will be represented by members of Coronado lodge No. 176 of the Alianza Hispano-Americana. The dances will be in full costume and all lodges of the organization in New Mexico, Arizona and Mexico will be invited to attend and enter contestants for prizes in dancing and authenticity of costuming. The Fiesta will be combined with the annual "Old Timers" day, will be featured by a morning street parade of the dancers and lodge members in costume and by pioneers of New Mexico on horseback and in horse drawn vehicles. The day will be climaxed by the annual "Baile en Espana" of Albuquerque lodge, at which visiting lodge members will be honor guests.

L. G. Lizarraga, supreme vice president of the order of Hermosillo, Mexico, has been invited to attend and to bring with him a famous Mariachi orchestra of Hermosillo. Invitations also have been mailed to a number of motion picture celebrities, of Latin-American descent, among them being Joseph B. Page, a native son of Albuquerque who is a director at Warner Brothers studio in Hollywood and who achieved fame as an actor under the name of Don Alvarado.

All of the usual features of "Pioneer Day" will be retained. Cash prizes will be tendered to the oldest native son of New Mexico attending in the afternoon of the 23rd; to the oldest married couple in the grand stand; and a number of other cash prizes and trophies which have become customary honors conferred on New Mexico annual State Fair and Pioneer day.

Mrs. Dan Elliott and daughter, Mrs. Margaret Stinnett and Mrs. Stinnett's infant daughter, Sherrie Annette, returned Wednesday from Washington, D. C. where they had spent several weeks. While in the East, Mrs. Elliott's son, Daniel of Baltimore came to Washington and took them to his home in an airplane, where they spent a week-end. Another former Carrizozoian they met while there, was Miss Edith Sammons, a former teacher here.

## Sykes - Dudley

Last Thursday, July 17, 1941, at 5 o'clock p. m., Miss Moy Sykes of Portales and Mr. Reid Dudley were united in marriage in Alamogordo at the home of the groom's aunt, Mrs. Edith Beek by Mr. Dill, Pastor of the church of Christ.

The bride is very pretty and charming. She is a graduate of the Eastern New Mexico College at Portales, which is her home town and she has been teaching in the local schools the past two years.

The groom is a son of Mr. and Mrs. B. A. Dudley of Carrizozo. He was graduated from the Carrizozo High School, after which he studied pharmacy in St. Louis, Mo. He was employed at Rolland's drug store for several years and at present is employed at Paden's drug store. He is quite dignified and highly regarded by everyone, as is also his bride.

They will make their home in Carrizozo and are at present living in an apartment at the Sproles residence.

## Notice For Coal Bids

The Lincoln County Board of Education is asking for sealed bids on lump coal for nine Rural School Districts, bids to reach this office not later than August 1, 1941. The Board will not consider or accept any bids submitted after this date.

Prices must be f. o. b. the different schools. Coal must be lump coal.

All bids must be accompanied by a certified check for 15 percent of the total amount of the bid said check to be returned if your bid is not accepted by the Board. There will be approximately 99 tons of coal to be delivered.

The following is approximately the number of tons of coal that will be needed by the Lincoln County Rural Schools:

District No. 1, Lincoln	14 tons
District No. 3, Ruidoso	19 tons
District No. 4, Picacho	8 tons
District No. 8, Eagle	3 tons
District No. 8, White Oaks	2 tons
District No. 11, Nogal	2 tons
District No. 12, Angus	2 tons
District No. 21, Ancho	20 tons
District No. 35, Stetson	29 tons
Total	99 tons

The County Board of Education reserves the right to reject any or all bids.

Details concerning the coal bids may be obtained from the County School Superintendent, Carrizozo, New Mexico.

Lincoln County Board of Education  
Mrs. Ola C. Jones, Secretary

## Surprise Party

The telephone operators gave Mrs. Beula Scharf a surprise birthday party Wednesday afternoon. Only the operators were present. The honoree received many lovely gifts. Refreshments were served; and a general round of good wishes and happy returns closed the session.

## Time Extended

The aluminum drive has been extended until July 30th. Any odd pieces which have been overlooked may be taken to the City hall for shipment on that date.

A. Scharf.

Mr. Monroe Howard of Capitán was in town on business Monday.

## County Agriculture Defense Board Established

Secretary Wickard recently has established State and County Defense Boards in every agricultural county in the United States.

Mr. L. D. Merchant, of Capitán will serve as chairman of the board in Lincoln County. The Board will be composed of representatives of the various Departments of Agriculture in the county who deal with or are affected by the Defense Program.

The purpose of the U. S. D. A. County Board is to expedite and coordinate in the field, the administration of activities carried on by the Department in the furtherance of the National Defense Program.

Carl P. Radcliff  
County Extension Agent

## All-American Team

America faces a crisis without parallel in history. Our very existence is threatened, and only through teamwork will security come. Every man, woman and child has a part in this great undertaking of making America strong. It is a supreme responsibility none may shirk.

In his Fourth of July address to the nation, President Roosevelt sounded a call for loyalty, unity, efficiency and toil on the part of Americans. He declared that an oasis of American liberty could not survive surrounded by a desert of cruel dictatorship.

To make the United States safe, we must all work harder and longer together. We must labor with all we've got. Not every man for himself, but every man for his country, whatever his job. Action is the need of the hour. Waste must be done away with. There must be unity, unity in industry and teamwork in everything.

A famed general of the Orient recently said: "If we perspired more in time of peace, we would bleed less in time of war." America today is in the sweating period. The more we perspire now the less we may bleed tomorrow. It is your job and mine to make this country we all love into one All-American team.—Anderson Bulletin (Ind.)

## BAKED SALE

Benefit Woman's Society of Christian Service.

## Call for Enrollees

For the first time there is no limitation on the number of enrollees who may be accepted for the CCC Camp in New Mexico, Mrs. Jennie Kirby, Director, Department of Public Welfare, said today.

"The enrollment period has been extended from July 20 to July 30," Mrs. Kirby said, "in order to give more time for New Mexico boys to apply for enrollment. All unemployed single boys between the ages of 17 and 23½ years, who can meet physical requirements, and who are not on vacation from school, are eligible. In order to make enrollment easy as possible, boys may apply at all county offices of the Department of Public Welfare, but also at the camps themselves."

## The Defense Meeting

All the business houses in Carrizozo were closed from 10 a. m. until 1 o'clock p. m. yesterday by order of Mayor M. U. Finley, in order that the defense meeting in the city park might be attended by everybody. Mayor Finley presided. "America" was sung. Mr. Radcliff of the Department of Agriculture made a talk on the various phases of defense which were supplemented by agriculture.

Superintendent James M. Carpenter of the High School spoke of the value to the fighting forces of our buying defense bonds and stamps to keep our army and navy fed and clothed, and that the security offered is the greatest security on earth—the United States government—which statement of course, met unanimous agreement. "God Bless America" sung by the crowd, closed the ceremonies.

## Dr. M. G. Paden, of White Oaks, New Mexico

An outstanding citizen of Lincoln County since 1880, was honored by the Society of Pharmacists last week.

## BINGHAM BREVITIES

Mr. Brack Sloan and daughters Joyce and Sue were in Bingham Monday.

Guy Dean, who has been visiting Harold Dean for several days, has returned home, going by the way of Fort Sumner to spend the night with a brother who is there. Mr. and Mrs. Harold Dean accompanied him to that point.

Mrs. Max Turney has returned home, after a few days, visit in the Dick Williams home.

Mr. and Mrs. P. H. Wrye, Jr., of Amarillo were at the Wrye ranch Saturday.

Lawrence Hefner delivered a horse to Carrizozo Saturday, for T. A. Jenkins.

Ruby Hefner was on the sick list last week.

Mr. Louis Nalda called at the store Monday.

Mr. Stratton of the Mocking Bird mine was at the store Tuesday.

Cecil Muncy is hauling wood for the Bursum ranch.

Mr. and Mrs. Dick Williams visited the Hefner's Monday evening.

Mr. and Mrs. Jack Walker who formerly lived here and were managers of the B&M store, before they moved to Gallup to operate a Company Commissary, have moved back to their former home at Carlsbad. They invite their Carrizozo friends, when in that city to see them at Anthony's Department store.

Mr. William Johnson of Tucuman visited his parents here Friday and Saturday.

## ORGANIZATION MEETING HELD

Monday evening, July 21, the Organization meeting of the Local Defense Council was held at the Community Center Building. There were present representatives of all the local organizations of our community. Many interesting points, bearing on National Defense, were brought before the meeting. Each representative registered for his organization and cards were filed for future reference as need arises for further committees. A committee was appointed for the program on National Defense Day, July 14, said committee is composed of Roy Shaefer, Mrs. John E. Hall and John Wright.

The chairman, Mayor M. U. Finley, appointed A. J. Rolland, G. T. McQuillen and Elmer Eaker to serve on the Defense Bonds sales committee. Also the Speakers Bureau Committee was named to-wit: John E. Hall, Frank Adams and Mrs. R. E. Lemon.

Chairman, M. U. Finley, appointed Mrs. Rachel West, secretary of organization and Mrs. Albert Scharf, treasurer.

Mr. and Mrs. Jim E. Dale and baby daughter, May Ellen of Dallas, Texas are visiting Mr. Dale's parents, Mr. and Mrs. John W. Dale of Ancho, N. M.

## Military Base on Iceland Is Generally Applauded

Establishment of an American military base on Iceland is generally applauded as an obviously intelligent element in our defense preparations.

Of course, the isolationists are clamoring that the President should have gone to Congress and gained Congressional cooperation in the project before closing up the deal, and there has been much oratory concerning infraction of the constitutional provision reserving to Congress the power to declare war, etc.

Now just suppose the President had gone to Congress with his proposal that Iceland should be garrisoned by Yankee troops as part of our defense program, and particularly to forestall Hitler from seizing that vantage point—Senator Wheeler would have stressed his determination to oppose what he calls an approach to war; Senator Nye would have voiced his variation of the theme and Senator Taft would have contributed his version of the limitations on the President's powers as Commander-in-Chief of the armed forces of the United States. There would be debate running into weeks, in the course of which the full details of our plans and specifications of the proposed base construction would have been ventilated.

What Her Hitler would be doing in the interim is anybody's guess. It seems quite possible, had there been such a debate, that an American transport—if one were finally sent, would have had an excellent chance of bumping into a mine, or being sunk by a submarine. Senator Taft is also much exercised because an American engineering firm is building a naval base in Northern Ireland, Ulster. In this he sees the establishment of a Yankee base. Actually, it is purely a British project, paid for by them. Doubtless, American skilled folks are on that job. Incidentally, what on earth would the United States want a base in England for?

## KNOW YOUR BANK

### What Makes A Bank Safe?

Many factors contribute. Laws and regulations play a part. Examinations by government examiners are important. Insurance protection is of course significant. But above all, the strongest safety factor is sound, progressive management. Efficient operation, and policies which win public approval and patronage, are not only important—they are vital to the well-being of a bank.

LINCOLN COUNTY AGENCY,  
Citizens State Bank of Vaughn,

# AROUND THE HOUSE

A swinging door between the kitchen and dining room is a convenient household aid. They may be installed in old as well as new homes.

Small pieces of soap can be placed in a bag and used for washing clothing.

Dipping fish in boiling water will aid scaling.

Heating thins molasses and makes it pour easier.

Inspect the backs of pictures from time to time to make sure the wires and fastenings are secure and to repair any holes in the paper coverings that might let in dust.

Because the kitchen is definitely the workroom of the home it should be provided with plenty of light and air.

Moist table salt will remove egg tarnish from silver.

After a number of dustings, Venetian blinds usually need a good soap-and-water bath. Go over them with a soft sponge frequently dipped in warm, mildly sudsy water. Rinse thoroughly with warm water applied on a soft cloth or sponge. Wipe dry with soft cloth.

Screw tops or stoppers are apt to stick fast in the glass bottles which hold scent and lotions. To get the stopper out, tap sharply all round the neck of the bottle with a knife or spoon handle. It will then come out quite easily.

## DIARRHEA

**DUE** to dietary indiscretions, change of drinking water or sudden changes in weather can be quickly relieved by Wakefield's Blackberry Balsam. For 94 years a household remedy. Sold at all drug stores. Be sure to ask for genuine.

**Wakefield's BLACKBERRY BALSAM**  
Compound

**When Men Want**  
Men will not bend their wits to examine whether things where-with they have been accustomed to be good or evil.—Hooker.

## "MIDDLE-AGE" WOMEN [38-52] yrs. old HEED THIS ADVICE!!

Thousands of women are helped to go smiling and attractive again by this period in life—**Wakefield's Blackberry Balsam**—made especially for women—has helped thousands to relieve such weak, nervous feelings due to this functional disturbance. Try it!

**Commonplace Our Day**  
The commonplace sun in the commonplace sky makes up the commonplace day.

## We Can All Be EXPERT BUYERS

● In bringing us buying information, as to prices that are being asked for what we intend to buy, and as to the quality we can expect, the advertising columns of this newspaper perform a worth while service which saves us many dollars a year.  
● It is a good habit to form, the habit of consulting the advertisements every time we make a purchase, though we have already decided just what we want and where we are going to buy it. It gives us the most precious feeling in the world: the feeling of being adequately prepared.  
● When we go into a store, prepared beforehand with knowledge of what is offered and at what price, we go as an expert buyer, and with self-confidence. It is a pleasant feeling to have, the feeling of adequacy. Most of the unhappiness in the world can be traced to a lack of this feeling. This advertising shows another of its manifold facets—shows itself as an aid toward making all our business relationships more smart and pleasant.  
\$\$\$\$\$\$\$\$\$\$\$\$\$\$\$\$\$\$\$\$

# WHO'S NEWS THIS WEEK

By LEMUEL F. PARTON  
(Consolidated Features—WNU Service.)

**NEW YORK.**—Dr. Minnie L. Maffett, who, as president of the National Federation of Business and Professional Women's Clubs, is the leader of the **Assesses Women For Authority in Tomorrow's Era** about 75,000 career women in America, insists on equal pay for women doing men's jobs, and she also assesses women with heavy responsibility for what lies ahead.

"Women must take leadership in insisting on a new economic world order," says Dr. Maffett. That might seem like a lot of bother for the women, what with getting the children off to camp and this and that, but Dr. Maffett tells them sternly they must face it, "if we want women to have authority in the world of tomorrow." Her observations were addressed to the biennial meeting of the above federation at Los Angeles.

The silver-haired, blue-eyed, pink-checked Dr. Maffett, is, like many contenders for equality and authority for women, emphatically feminine. Pre-meditated or not, it's a good technique which the early-day suffragists knew and practiced diligently. She lives in Dallas, Texas, where she has long been a distinguished physician and surgeon, a member of the college of medicine of Baylor university, on the staff of the three biggest hospitals in Dallas, and a director of the department of health education of Southern Methodist university.

Decendant of a family which went to Texas in 1834, Dr. Maffett took her academic and medical degrees at the University of Texas. She was elected president of the federation in 1933. She rallies women to intelligent social effort under the slogan "business women in a democracy."

She is a dynamo of energy, flying everywhere—she's an aviation fan—organizing and agitating for women and their work and their readiness for a new economic and cultural show-down after the war. Women certainly do like to get things ship-shape. Perhaps they rate a trial workout, considering the general state of masculine untidiness and confusion now prevailing.

**DR. ARTHUR UPHAM POPE,** art connoisseur and leading world authority on Iranian art, heads the "Committee for National **Out to Give War m o r a l e** To Adolf Hitler's after months of research, 'Secret' Weapon makes known it has discovered and identified Hitler's "secret" weapon. As Dr. Pope explains it, the device is the precise scientific mastery of impelling scientific forces by which you can make men think and act as you want them to.

One of the last books of the late Jacques Futrello, who went down on the Titanic, was "The Thinking Machine." It was about an old professor who discovered what Dr. Pope's committee thinks it has now learned. He finally dominated the world. The theme of the book was that any man who masters certain definite psychological formulas, and employs them diligently, will own and operate mankind.

That is exactly what the Germans have been doing, according to the committee, just now issuing a 153-page brochure describing its research and its findings. The committee, which began work last July, includes many of the leading social scientists and psychologists of the United States. It delivers not only a detailed description of the German psychological mass-pressure techniques, but it concludes that we have abundant knowledge and skills with which to meet it. But it will be no hit-or-miss job of agitating. It will be a campaign of psychological warfare as carefully contrived as an air battle. Mr. Pope, a native of Phoenix, R. I., was graduated from Brown university. He has long been a distinguished figure in the world of both art and philosophy—but always on John Ruskin's terms: "Fine art is that to which the hand, the heart and the hand go together."  
We saw Dr. Pope occasionally when he was professor of philosophy at the University of California, and again at the Foyot restaurant in Paris in 1923, fired up with Persian art and headed toward Teheran, to sink many years and much brilliant scholarship in that area. After a round-trip to about 3000 B. C., he landed in London in 1930 with the noblest exhibition of Persian art ever assembled.  
Last year, with his collection greatly augmented, he staged a memorable exhibition in New York, at the old Union League club.

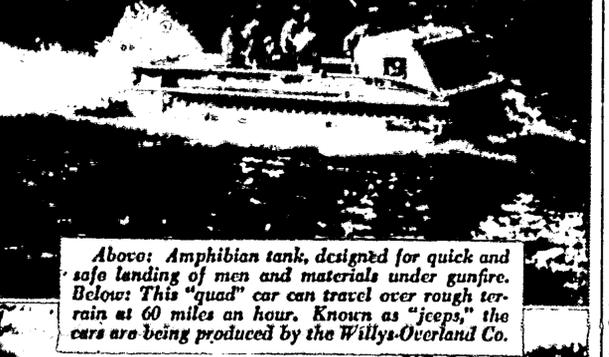

# All Out for Defense

Engaged in the most gigantic armament program in world history, the U. S. expects to spend approximately \$28,480,000,000 on ships, tanks, planes, munitions, training camps and other defense needs during the next two years. While factories, ammunition plants and shipyards hum feverishly with production, the nation's inventive genius works behind locked doors to develop new types of mechanized equipment.

Picture Parade  
With an appropriation of \$11,587,000,000 for a two-ocean navy, marine machine ships like the new \$14,000,000 Vulcan, recently launched, are necessary to service the mechanical needs of the country's battleships and cruisers at sea.

Right: The U. S. is spending several millions of dollars on anti-aircraft guns similar to this one. Shells travel 0 1/2 miles into the air. Germany's highest reach is said to be 7 miles.

Above: Amphibian tank, designed for quick and safe landing of men and materials under gunfire. Below: This "quad" car can travel over rough terrain at 60 miles an hour. Known as "jeeps," the cars are being produced by the Willys-Overland Co.

Above: This chocolate bar is known as "Ration D." It packs 600 calories. Left: New types of aerial combat, such as mine and torpedo laying, require ammunition of this type—said to be the costliest in the world.

Additional billions are being spent to build pursuit planes of this type—Lockheed's 500 m.p.h. speed marvel.

# LEAVES from Uncle Sam's Notebook

Planting for Windbreak

In any unsheltered spot, whether on the wide and treeless areas of the Great Plains or in the equally wide and treeless stretches of the reclaimed desert areas, or in smaller sections where, for one reason or another, there are few trees, it is of the greatest possible value to the farmer to plant a windbreak.

In like manner, it is often of great importance to plant some sort of screen, either to hide unsightly views, to mark a boundary, or to provide a background for ornamental plantings, for a pergola, or a summer house. Such a screen may be needed by any home owner, whether farmer, suburbanite, or city dweller.

### PLANTING THE SHELTER-BELT

Authorities in the field of arboriculture recommend that a windbreak, or shelter-belt as it is frequently called, consist of two or three varieties of trees rather than just one, and that it be planted with tall trees in the center rows, somewhat shorter ones in intermediate rows, and low-growing or shrubby ones on the outside rows. In the course of time such a planting comes to have the appearance of a green tent.

If, as is usually the case, it is important to secure a rapid growth, the center rows may be planted first to cottonwoods but since these are short-lived, they should be replaced as promptly as possible by the longer-lived elms—either the American or the Chinese variety.

For intermediate rows, unless the soil is of heavy clay or low and wet, any of the following may be chosen: Honeylocust, Green ash, Hackberry, western yellow pine (Ponderosa) or Colorado spruce. For the low, outside rows, any of the following will do well on almost any type of soil: Chokecherry, lilac, service-berry, American wild plum, Tartarian honeysuckle or Russian olive.

### PLANTING FOR A SCREEN

For a rather tall-growing screen any of the trees recommended for outside rows in the shelter-belt will serve. The Russian olive with its graceful, gray-green foliage is particularly attractive; choke-cherries and service-berries have the added advantage of yielding usable fruit, and the lilac is too well known to require discussion.

### SPACING THE SHELTER-BELT

The usual spacing of trees in a shelterbelt is two to four feet in the row, for low-growing outside shrubs, and six feet for trees in the inner rows. Rows should be from 8 to 12 feet apart. With such spacing, the treetops will in time interlace and lower branches also will grow so close together that they will effectively keep out the wind and stop drifting snows.

### OBTAINING PLANTING STOCK

Cottonwood seedlings are extremely hardy and may be pulled anywhere and transplanted with success. Any of the willows (suited, of course, only to rather low, moist ground) will grow readily from cuttings. Aside from these species, it is better to buy nursery-grown stock rather than to try to transplant young trees from wild growth nearby. The nursery stock usually has a much better root system than does the wild stock and hence ensures transplanting much better. It is customary for nurseries to sell planting stock by height. As a matter of fact, height is less important than stockiness. Experiments have shown that best results are secured from stock measuring from one-fourth to three-fourths of an inch just above the root collar. Such stock may range anywhere from 12 to 24 inches in height. If conifers are being planted, they should be from 6 to 12 inches in height, with preference given to trees of the smaller size because the smaller size makes it possible to keep the root system intact.

### RULES FOR TRANSPLANTING

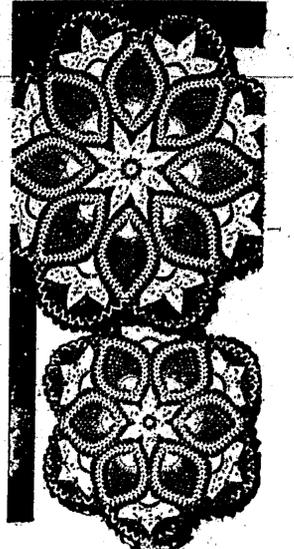

- Four fundamental principles underlie success in transplanting tree stock. These are:  
1. Keep the roots moist at all times; either carry the tree in a pail of water or wrap the roots in a wet cloth.  
2. Make the hole for planting wide enough and deep enough to fit the roots of the tree to be planted.  
3. Set the tree a little deeper than it stood in the nursery.  
4. Pack the soil firmly about the roots.

For further information regarding shelter-belt, send five cents to Superintendent of Documents, Washington, D. C., asking for Farmers' Bulletin No. 2403.

### TURTLES

Turtles belong to one of the four great orders of reptiles. Their most notable characteristic is the horny shell or shield which protects them. Most of them are capable of drawing their heads, legs and tails up into their shells, thus presenting an impregnable surface to their enemies. The well-known snapping turtle, which is one of those which are not able to draw in their appendages, is nevertheless a redoubtable fighter. He defends himself, much as does a snake, by striking.

● For, in our town... and towns like ours clear across the country... there's a steady revolution going on. Changes in dress styles and food prices... the rise of a hat crown... the fall of furniture prices... these matters vitally affect our living... And the news is lavishly covered in advertisements.  
● Smart people who like to be up-to-the-minute in living and current events, follow advertisements as closely as headlines.  
● They know what's going on in America... and they know where money buys most.

### Winning the West

By DUFORD JENNE  
(McClure Syndicate—WNU Service.)

WHILE she was waiting for the eastern express that was bringing Clyde for his first visit, Marjorie sat in her car and pondered the situation; in more than one way it looked a bit dubious.

She had met Clyde in an eastern city, had liked him from the start, and it had been only a brief step to love between them both. Now he was coming from his eastern home to visit her people at the western ranch; and just how he would be taken troubled her.

She thought of her rugged father, and the husky, rough and ready outfit at the ranch, and then of her fiancé. She would love him in spite of their attitude, but in his slim blond gentleness, his perfect grooming, there was an open mark for the men at the ranch. He was far from a dude—yet was he? She had seen him only at dances and parties and behind the wheel of his powerful car.

The great express alight—blim, perfectly garbed, his blond wavy hair shining in the sun as she ran up to him. He kissed her in his gentle way.

"Well, here I am, my dear, out in the wide open spaces, and I'll say they are wide!" he suggested, smiling.

"They will seem wilder still when you reach the ranch," she replied—and then wondered if some unhappy presentiment lay behind her thought.

She drove the car swiftly over the rolling miles to the sprawling ranch, and, as the day was fading, drew up to the hacienda. Her father came to meet them, his big form looming over her slight lover. His greeting was cordial and kind, but with her intimate knowledge of the tones of her father's voice, she sensed his disappointment.

Later on, after Clyde had gone to his room, she said to her father, "Well, dad, don't you think you'll like him?"

He swung her up into his arms. "Kittens, the main thing is how much you like him! He looks like a clean, fine lad who will always be good to the woman he loves; but—er—never went in for athletics, did he?"

She was a bit exasperated at her father's attitude, and she wanted to scold him for it—all men couldn't be football heroes or prizefighters! But she thought better of it particularly when Clyde appeared again, his handsome, friendly face showing his keen boyish interest in the place to which he had come, and his eyes always softening when he glanced at her.

Her next trial came when Ben Lane, the superintendent of the ranch, came in for his next day's orders. Ben's bronzed face was open in his frank and generous welcome to Clyde, but the cowboy's eyes held a little twinkle of amusement as his hand swallowed the easterner's.

Because she knew them, she knew something would be hatched up to try out Clyde. The next day her father suggested to Clyde that he and Marjorie ride out to the painted bluffs. She was a bit angry, but there was nothing to do but see it through. So she made her preparations, but with fear in her heart for Clyde who she knew had never ridden in a saddle.

When she came out the scene was set. Her father was on the porch, a twinkle in his eyes; the men in the bunkhouse had drifted out, each seeming to be busy at something; but all actually out to see the fun; and there was Ben leading up a saddled horse. Marjorie gasped. It was "Bony"—one of the meanest bucking bundles of horsehide on the ranch. Ben's face was innocent, but Marjorie hated him with all the hate of which she was capable. The scene was set; to try to save Clyde now would be to humiliate him.

She mounted her own favorite roan, and Clyde was helped into the saddle by Ben. Then the fun started. The buckskin turned into a rearing, tearing, jumping whirl of horse and man, up in the air and down on four still legs, around in dizzy circles, out straight away, away, then a sudden stop; the dust rose and swirled. Marjorie pressed her hands against her heart. But the slim, blond-headed figure stuck—and stuck—and the buckskin began to slow down—to waver—under command.

She heard her father's awed voice beside her. "Well, by gawd!" And his meaning was not profane.

Clyde brought the buckskin to the porch and said simply, "All ready, Marjorie, if you are."

A gust of cheers swept up from the bunkhouse. Clyde acknowledged them with a grin.

The minute they were out of sight, she halted him, and said with wonder, "Clyde, how did you do it?"

He chuckled. "I spent three solid months under an old army officer learning to ride everything that wore horsehide, before I came out; and I learned—believe me!"

She pulled his head over and kissed him, and far down in the blue of his eyes were two bright glints; and she knew that beneath the velvet of his gentleness and kindness was the steel of real manhood.

### Enchanting Party Frocks of All-White for Evening Wear

By CHERIE NICHOLAS

DO YOU believe in the magic of fairy wands? Unless it be at the touch of a fairy wand how could such visions of loveliness as the trio pictured ever come into being?

It is just such lacy, beguiling sheer and lovely gowns as these that women who yearn for pretty clothes envision in their dreams of "what to wear," when they go dancing on a gay summer night. So be as sentimental, as blithely romantic as you will in choosing your midsummer night festive gowns, keeping in mind that fashion particularly favors exquisitely fragile sheer media this season, with the emphasis definitely on all white for evening wear.

The all-white lace dress as pictured to the left is making its appearance again and again on best-dressed women who are attending fashionable night clubs or formal events at important summer resort hotels. It adds to the lure of this lace that it is American made. It is as exquisite and beautiful as it is surprisingly inexpensive. Crisp, white and delicate, the new laces make you look your prettiest with their lure and charm. The dress has its own rayon taffeta slip.

The South American influence is very prominent in the white cotton lace evening gown shown centered in the group. The four bouces on the skirt are reminiscent of the Spanish dancer's costume. The deep capelike collar opens at the back. With the return of the "gracious lady" period, the call for handsome lace such as fashions this distinguished frock is outstanding. Nothing in the way of sheer cottons surpasses organdy and when it is elaborately eyeleted, as is the organdy used for the "picture" gown on the fair socialite portrayed here, the effect is most eye-appealing. The introduction of black jersey in

the bodice is in keeping with the present trend. This touch of black gives a sophisticated look to an otherwise airy, fairy ingenue frock. The wing-sleeved bolero and the very full over-skirt effect are high-style details.

This matter of sheer airy-fairy fabrics for the party dress carries all the way through the program of the "pretty" frocks fashion so definitely favored this season. Often yards and yards of billowy tulle or stiffened chiffon or thinnest of marquisette go to make up the full skirt with its quaint little fitted bodice.

A new vogue this season is that of enormous florals handpainted on either most diaphanous filmy white sheers or these flower paintings are done on white jersey likewise white shirkin in dazzling color glory.

Most of the new white dresses of rayon jersey (with a dull finish) or rayon crepe are made very simply. They are, however, given a look of distinction and importance by intriguing touches such as gold kid trimmings, gold or jeweled buttons, girdles with an enrichment of jewel embroidery.

Watch buttons! They promise to be as important as jewelry in the evening mode, and are used conspicuously so as to call attention to their intricate design. Huge flower buttons add infinite charm to the otherwise all-white frock. Immense mother-of-pearl buttons are fashion highlights. Some of the pearl buttons are made up with a siligree design worked out in gold or silver. You can get buttons that snap on and off and thus change the entire aspect and color scheme at will. (Released by Western Newspaper Union.)

**Daily Beard**  
The average man's cheek, chin and upper lip produce a crop of some 12,500 beard bristles, each of which grows about half a millimeter every 24 hours. Thirty feet of beard is thus the average man's total production in a day.

### Vacation Outfit

You can bank on this simple rayon sheer striped dress no matter where you vacation, for simplicity is America's fashion this summer from coast to coast. Broadening horizontal shoulder stripes, with whittling vertical stripes prove the stripe is quicker than the eye when it comes to actually whittling down the figure. This optical-illusion outfit comes in brown and blue, navy and white, also gray and white. A flaring brimmed hat and gauntlet gloves complete this outfit.

### Chic Fur Capes Are on Fashion's New Calendar

Keep on the lookout for fur capes. They're on their way! They are available in any length from shoulder to waist depth and longer. If you have a coat that has served its time go to your favorite furrier without delay and have him transform it into a latest-model cape. If you are buying out-and-out new furs, before you invest take a look at the stunning cape fashions that definitely will carry the "new" look from now on. These are the final word in chic.

### Linen Dresses and Suits

Women of assured fashion intuition regard suits in black or brown, navy, or dark green linen as the best-looking costume of the season for town wear. These are meticulously tailored and are given charm and femininity via lovely white lingerie accents. One-piece dresses of non-wrinkle linen are very popular this summer. They are made with all the fine dressmaker details such as enhance chic models in crepe or thin wool. There are such highlight touches as braid trims, odd huge buttons and so on. The dress that looks like a suit, also princess types, are popular in linen.

### Print Lingerie

Enthusiasm for lingerie and negligee apparel that is fashioned of either cotton or silk prints that are patterned with luscious looking strawberries is running high. You will love the new rose-motif prints, too.

It's A GOOD AMERICAN CUSTOM

THE SEVENTH INNING STRETCH

**Benefits to Our Readers**

THE PUBLIC nature of advertising benefits everyone it touches. It benefits the public by describing exactly the products that are offered. It benefits employees, because the advertiser must be more fair and just than the employer who has no obligation to the public. These benefits of advertising are quite apart from the obvious benefits which advertising confers—the lower prices, the higher quality, the better service that go with advertised goods and firms.

### FIRST-AID to the AILING HOUSE

By ROGER B. WHITMAN

#### Leaky Brick Veneer

QUESTION: During heavy rains water seeps through my brick veneer house at the joint between the sill and the top of the foundations. What kind of caulking compounds can I use to close the leak?

ANSWER: That condition is fairly common with brick veneer houses. Water works through the bricks and the mortar joints and runs down into the space between the veneer and the sheathing, which is usually about an inch wide. As the sheathing is covered with waterproof paper, the water that collects in the bottom of the space can escape only through the joints along the sill. These joints can be closed with caulking compound, which should be forced in with a caulking gun. A better remedy is to drill a series of holes through the mortar joints in the lowest course of bricks, so that water can drain off to the outside. These holes can be made with a quarter-inch rose drill.

#### Maps on a Wall

QUESTION: I have removed the paper from the walls of a small room, and am going to cover them with maps. Should the walls be sized? And can I use regular wallpaper paste?

ANSWER: Yes; size the walls and put on the maps by the same method as wallpaper. Get the best grade of wallpaper paste that you can find. Spread the maps on the floor for pasting. In sticking them on, begin at the top edge and roll the maps downward so that all air will be excluded. If you find that bubbles of air have been caught, use a rubber roller of the kind meant for mounting photographs. If the bubbles will not roll out, puncture the paper with a needle; the air will escape, and when the paper is pressed down, the hole will disappear.

#### House Colors

QUESTION: The lower half of my house is imitation red brick, the upper half shingle stained dark brown, and the roof is green shingles. In repainting, what color would you suggest for the shingles that will blend with the red lower half and the green roof?

ANSWER: My choice for the shingles would be either white, or white with a coat of cream or warm gray. You will probably have to use a first coat of aluminum paint to keep the brown stain from bleeding through. For a suggestion, go around your neighborhood to notice the colors that houses are painted, not forgetting the colors of trim, to see which combinations you prefer.

#### Stopping Overhead Noise

QUESTION: The kitchen of the upstairs apartment is directly over our bedroom, and we hear every sound. Can our ceiling be made sound-proof so that we can sleep?

ANSWER: It cannot be made entirely sound-proof, but the noise can be greatly cut down. Line your ceiling with insulating board. On that put 2 by 2 strips of wood to support a second layer of insulating board. Pieces of thick felt should be put under all nail heads. Another method would be to put a framework of 2 by 4 under your present ceiling, but not touching it, supporting a layer of insulating board. The framework can be supported on the side walls.

#### Economy in Construction

QUESTION: We are thinking of building a six-room house, but do not know whether it should be one story or two. Which would be cheaper to build and to heat?

ANSWER: In house construction it is considered that the price is least when the roof that covers the rooms is smallest. This means that a two-story house should be less expensive than a house in which all the rooms are spread out on one floor. Another principle is that a square or rectangular house costs less to build than one with extensions or a more complicated outline. Also, the more compact the house, the less should be the heating cost.

#### Stiffening a Rug

QUESTION: A 9 by 12 foot rug, 10 years old, is in good condition except that it is limp. How can it be stiffened?

ANSWER: Turn it over, and apply a coat of shellac to the back. The shellac should not be applied so thickly that it will soak through to the front.

#### Kerosene Stain

QUESTION: A kerosene stove was tipped over on an Axminster rug and the oil made a large stain. What will take it out?

ANSWER: You can use clear gasoline. Take the rug outdoors, lay it flat, and pour gasoline through the stain. Do not attempt to do this indoors because of the great fire risk.

**Finds Rival's Love Notes, Then Kills Fickle Sweetheart**

**British Soldier, Suitor for Seven Years, Charged With Murder.**

LONDON.—After finding letters from a corporal on his sweetheart's dressing table, an army private, it was claimed by the prosecution, shot her dead.  
 "You have not been true to me," he is alleged to have told the girl. "I do not intend you to have another man to fool like you have me."  
 The soldier, Driver Edward George Beesley, 29 years old, of Oxford, England, British army private, was charged at Oxford with the murder of Miss Irene Sherry, 20 years old, whose real name was Irene Winifred Edwards, of Craven Arms, Shropshire, a domestic servant at Oxford, by shooting her with his service rifle.  
 Prosecutor E. G. Robey said Miss Sherry had been friendly with Beesley for a number of years, and it was obvious that he wanted to marry her.  
 In July of this year she became acquainted with Corporal James Fuller of Totnes road, Reading, and apparently they made up their minds to become engaged.  
 Rejected Admirer Calls.  
 On September 16 Beesley went to Oxford because he was anxious about Miss Sherry, not having heard from her for some time. He went to the girl's lodgings and waited in her room until she returned at 10:30 p. m. Shortly afterwards the fatal shot was heard.  
 Beesley, while waiting, had seen some letters which were written by Corporal Fuller. They were obviously love letters and they showed that Fuller and the girl were hoping to marry.  
 After reading the letters, alleged Robey, Beesley discharged his rifle, with the result that the girl was shot through the heart at close range while sitting in an armchair.  
 Counsel alleged that in a statement Beesley said:  
 "I waited until Miss Sherry came in. She seemed surprised to see me. I asked her why she had not written to me for nearly a month, and told her I knew the reason why."  
 "I asked her who Corporal James Fuller was, and she said she did not know. I produced some letters which I had found on her dressing table and she tried to grab them from me, but I pulled them back and put them in my pocket."  
 Treats it as a Joke.  
 "I said to her: 'You have not been true to me while I was in the army. It is about time you made up your mind after going with me for seven years. I do not intend you to have another man to fool like you have me.'"  
 "She then said she would please herself what she did, and laughed and treated it as a joke."  
 "I picked up my gun and pointed it at her as she sat in the chair. The next thing I heard was a shot. I thought I had missed her, and left the room and the house by the front door."  
 "I walked up Richmond road to the corner of Walton street and just wandered about. In the end I gave myself up at the Central police station."  
 Prosecutor Robey said that when at the station Beesley asked if the girl was dead. When told she was, he said he did not care what happened; he did not mean to kill her. Beesley was committed for trial at Oxford Assizes.

**Contributed**  
 The number of persons required to run the railroads of America increases or decreases according to railway traffic and earnings. When railway revenues were at their peak, in 1926, the Class 1 railroads employed an average of 1,779,275 persons. In 1933, the low year of the depression, when railway revenues were at their lowest, they employed an average of 971,196 persons. In 1939, the average number of persons employed was 987,943.

**Obituary**

Mr. Arthur Joseph Matthews well known citizen of White Oaks, passed away at noon, July 7, 1941 at the Turner hospital in Carrizozo.

Mr. Matthews was injured in an accident on July 11, 1938 in the White Oaks Coal Mine from which he never recovered. For the last three months he steadily grew worse until he answered the last summons. He leaves a wife and one son to mourn his going away.

Arthur Joseph Matthews was born October 2, 1875 at Lens, France. He came to the United States in 1902; was married to Fernande Belin, June 14, 1916 at Raton, New Mexico. The family moved to White Oaks in 1932.

The White Oaks Community extends deepest sympathy to the bereaved family.

**Local and Personal**

Mrs. R. C. Hemphill who has been here nursing her daughter-in-law, Mrs. Robert Hemphill, returned to Orogrande yesterday.  
 Mr. Robert Ellis Hemphill, who had been here since Wednesday, returned to El Paso Monday. He visited Orogrande enroute.  
 Richard Dow of El Paso is visiting his parents for a few days.  
 Miss Elizabeth Dow, daughter of Mr. and Mrs. Gene Dow, Sr. is at home from the Highland University at Las Vegas.  
 Mr. and Mrs. Larry Gomez of San Patricio were Carrizozo business visitors last Tuesday. Mr. Gomez was formerly County Commissioner from district No. 1.  
 Judge Numa C. Frenger spent Monday and Tuesday here trying some Civil cases. He was accompanied by the court reporter and interpreter, Mr. Viramontes.  
 Mr. P. M. Johnson, who has been critically ill at his home here for several months, became decidedly worse last Friday, but his condition has changed for the better, much to the joy of his friends. Mr. Johnson has been a well-known stockman of this section since the early days, and is a long time resident of Carrizozo; having lived here long before his retirement several years ago.

### Strategic Outposts for U. S. Defense

Placing U. S. troops in Iceland in occupation of strategic Atlantic outposts were taken "in order to forestall any pincers movement undertaken by Germany against the Western hemisphere," according to a statement by President Roosevelt. Above map indicates how this works. (1) Iceland occupation nullifies any Nazi threat from the north and occupation of Trinidad, and British Guiana (2 and 3) take care of the southern jaw of the pincer hinged on Vichy-French Dakar in Africa. Some sources contend taking over of Azores and Cape Verde Islands (shown in large type) would further greatly strengthen hemisphere defense.

### 'Good Neighbors'—Junior Style

Bobby Gallagher (left) U. S. "Boy-Ambassador" to Brazil and Roberto Andrade (right), Brazil's "Boy-Ambassador" who recently visited the U. S., are shown being greeted by crowds upon their arrival in Rio De Janeiro. This is the junior part of the Inter-American "Good-Neighbor" policy.

### Saga of a Sinking Ship

These dramatic photos show the end of the 7,700-ton Glasgow liner Kemmendine, in the Indian ocean. Made from the deck of the Nazi surface raider which sank the ship, the pictures show in order: (top) torpedo striking, (middle) vessel begins settling, (bottom) ship is broken in half and going down fast.

### U. S. Gets 'Protection' in Bagdad

Paul Kaabonahus, right foreground, wearing dark shirt, is pictured outside the American legation at Bagdad, as British soldiers took over the legation for protection and for the protective residence of British subjects, during the war in Iraq. Kaabonahus is U. S. minister resident and consul general in Bagdad.

### Exit Lawes

For 21 years Lewis E. Lawes was boss of Sing Sing and now he is leaving to be a writer and lecturer. He is shown taking a last look at his old domain, where as warden he became internationally famous as penologist.

### New Air Chief

This is Brig. Gen. Carl Spaatz, newly appointed chief of army air force, now operating as an independent division within the department of war.

### Baseball Smiles

Two happy baseball warriors are these: Ted Williams (top) after he hit the winning homer in the All-Star game, and Dixie Dean (bottom) the day he announced his leaving the sport for a St. Louis radio job.

### End of Dispute?

John L. Lewis, United Mine Workers chief, is shown signing a contract with Southern soft coal operators, that settled a five-month wage dispute.

## Operation of New Farm Parity Measure Puts U. S. Agriculture on 'Business' Basis

WASHINGTON.—When the history-making Farm Parity law went into effect the first of this month American agriculture began for the first time to operate like a gigantic manufacturing organization, with every farmer guaranteed a definite sales price for the things he produces—whether cereals, meats, fats, dairy products, tobacco, eggs, fruits, poultry or cotton.

What does parity mean and how does it operate?

Simply that from now on the American farmer will receive prices for his products that will give him a purchasing power equal to that which he held in the pre-World war years of 1909 to 1914. That was one of the most favorable farm price periods in history. The farmer is guaranteed a crop loan rate of 85 per cent, figured on a fixed valuation basis. If prices go above parity he reaps the benefit. If they fall below that valuation the farmer's crops go into the government's surplus bins and Uncle Sam takes the loss.

The parity law will add a billion dollars to American farm income this year, agricultural economists predict. It will generate a buying power that will be translated into expanding purchases of practically every commodity the farmer uses.

Manufacturers have usually been able to name the price at which they wished to sell the volume of their output. Now a floor has been placed under farm prices similar to the floor under industrial income. So the farmer can roll up his sleeves and pitch in with the knowledge that he has been placed virtually on an economic equality with industry. With the manufacturer such a program has required good judgment concerning costs, desired profit, supply and demand, competition and the volume of production. To all intents and purposes a similar responsibility has been placed on agriculture.

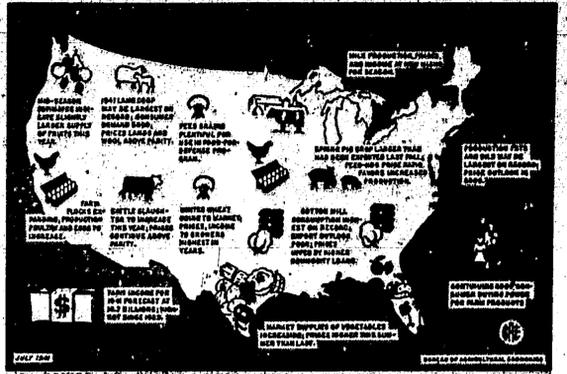

#### \$1.15 Wheat Assured.

In order to prevent price breaks due to overproduction, safeguards restricting the volume of farm output have been set by the new law. And to protect prices further, surpluses of the farmer's production are limited to quantities that can be easily absorbed by the Federal Surplus Commodity corporation.

Sponsors of the law believe it will assure farmers a return of at least \$1.15 a bushel for wheat, 57 cents a bushel for corn, and 18 cents a pound for cotton. With an increasing demand for farm products for defense purposes and the "Feed Britain" program under the lease-lend bill, prices may easily rise above these levels.

One thing is certain. Farm income and farm expenditures will be sharply increased by this new parity law. Last year agriculture received \$5,120,000,000 for its production. The 1941 income will mount well over \$10,000,000,000, according to current forecasts of the U. S. department of agriculture. History has demonstrated that when national farm income rises above \$7,000,000,000 a year, agricultural expenditures rise about as sharply as income.

Another favorable factor is that at the present time the farmer has a good deal of last year's production

The graph above, prepared by the bureau of agricultural economics, of the United States department of agriculture in Washington, illustrates the current farm situation in the nation today.

in storage under loan. He is therefore holding a good-sized equity in his last year's production which he can sell at better prices due to war conditions as well as the guarantee of parity prices. The farmer's last year's production is like money in the bank.

#### Labor Cost Is Up.

Increased taxes and higher costs for farm labor and for many of the products the farmer buys will siphon part of the income gain. The price the farmer pays for fertilizer, however, promises to be relatively lower than for numerous other products. Teamwork between science and industry has combined to cut the cost of soil improvement. A. L. Mehrling of the U. S. department of agriculture recently pointed out that American farmers now save \$200,000,000 a year due to reductions in the cost of fertilizer resulting from scientific research.

One of the almost inevitable results of increased farm income will be a rise in the value of farm land. The history of all past eras has shown that whenever farm products have risen in price for a considerable period, land has likewise risen in value. The rising trend may tempt many farmers to overexpansion. As a matter of fact the improved outlook for agriculture has already caused many farm folks to consider buying an extra farm.

If farmers will remember the aftermath of World War No. 1's farm expansion a good many future headaches can be avoided. During that first World war American agriculture was pushed to the limit. "Food Will Win the War" was the slogan. Under high pressure millions of new acres came under cultivation. Prices pyramided. But after the Treaty of Versailles, agriculture fell into difficulties. And many farmers to this day feel the hangover twinges of that speculative spree.

#### Improve Soil Program.

What is the alternative to the urge for more land today?

It lies in diverting any extra money that comes in from the farm parity law into lines that will bring more permanent security at less risk in the long run. For instance, paying off indebtedness, repairing old and putting up needed new farm buildings, improving livestock and increasing the fertility of the soil on the present farm.

This last is especially important, for on the productivity of the soil depends the farmer's ability to produce abundant crops for defense needs and to take advantage of the added income the parity law provides. And as a matter of fact, farmers can actually "enlarge" their farms without incurring the hazards of overexpansion.

"The secret lies in making the present farm acreage do a better production job," said a recent statement of the Middle West Soil Improvement Committee. "This means following a soil management program that will raise the land's total fertility level."

"Even in the most productive areas the average farm can usually be enlarged, so to speak, the equivalent of 10 per cent and sometimes as much as 50 per cent through intelligent soil treatment."

"In combination with other sound farming practices the use of fertilizer containing nitrogen, phosphorus and potash is essential in stepping up the soil's productive capacity. Such a practice not only has an immediate effect in increasing the per acre yield of crops needed in the nation's defense effort, but represents an important long range soil building program. It likewise means lower production costs and improved crop quality."

The soundness of this principle may be appreciated by a brief but detailed study of the performance of farm land prices from the pre-1914 days through the World war ex-

pansion and down to the depression.

#### Farm Values Rise and Fall.

In a group of middle western states the price of farm products more than doubled from 1910 to 1920. During this period land values also rose to record levels. After 1920 the reverse was true. But 1940 prices of farm products were only about one-half as high as in 1920 and land values were likewise cut in half.

Walter H. Ebling, a farm economist studying land values, discovered that a piece of typical farm land that was worth \$100 an acre in the first "parity" days preceding the World war had reached a selling price of \$171 an acre in 1920—an increase of 71 per cent. By 1930 it was worth only \$117, or a drop of \$54 from 1920. Then during the low ebb years of the depression, the value of this same piece of land receded to \$80.

With some improvement in the prices of farm products after 1933, the value of farm land rose slightly. By 1937 the piece of land Ebling studied would have been worth \$83—or \$9 more than during the lowest years of the depression but still \$11 less than its value before the World war. When the recession of 1937-38 carried the price of farm products down, farm lands again slipped in value. So by 1940 the piece of land would have been worth only \$84, or \$5 per acre less than in 1937 and \$18 less than it was in the pre-World war period.

## U. S. Civilian Blood Donors Asked by Army

NEW YORK CITY.—Civilians on the home front can fill a new and important role in the national defense program by donating blood for transfusions to produce 200,000 half-pint units of dried blood plasma required by the army and navy during the fiscal year beginning this month, the war department announced recently.

The aim of the blood plasma program, which is already under way on a small scale, is to build up a reserve not only to meet military emergencies but to succor the wounded in civilian catastrophes as well.

This is a defense enterprise involving the co-operation of five components of the national structure: Pre-eminent is the public, which will be asked to donate the blood. The American Red Cross and the division of medical sciences of the National Research Council share the responsibility of directing the program, while the Red Cross also enrolls the volunteer donors and provides the personnel and equipment to collect the blood.

Commercial concerns in various parts of the country will process the blood. The army and navy will maintain the plasma reserve for general and war use, with the army acting as purchasing agent to deal with the commercial concerns. A "pilot" project to procure 15,000 units is already under way. Donors are supplying blood through their local Red Cross chapters as fast as it can be processed.

#### Physicians Volunteer.

Plans for the larger objective of 200,000 units are still in their early stages. However, the American Red Cross and the division of medical sciences of the National Research Council have already enlisted the co-operation of leading physicians and surgeons in a dozen cities. These physicians, in co-operation with local Red Cross chapters, have promised to supervise the proper technique of drawing the blood from the volunteer donors.

The army and navy have each estimated their needs at 100,000 units.

The aim of the Red Cross and the National Research Council is to invite several drug and chemical concerns in various parts of the country to make bids for the processing work. In this way a strategic dispersion of the knowledge of preparing human blood in dry form will be accomplished and the chances of improving the technique are increased.

The medical departments of most armies of the world have recognized the value of dried blood plasma for transfusions and are building up a supply.

### Army Heads Are Endangered by Recent War Games

WASHINGTON.—Uncle Sam has discovered startling weaknesses in army personnel, brought to light by recent war games. Congressmen are studying a new promotion system based more on real ability, less on seniority. Underfit and over-age combat commanders are to give way to younger men.

Graduates of the new army school, which begins this month, will be selected for duty. Enrollment is based on army-wide competition.

Their slates will be the war-scarred face of Europe and their text-books will contain the summarized lessons of modern "blitz" methods of battle.

To the general public, official war maneuvers is a serious military game to train and develop fighting and tactical personnel and equipment. To the soldiers it is more than that. It is a grim test of their personal qualifications, and literally their heads hang beneath the "Daimon's" sword of necessity.

# The Strumpet Sea

By BEN AMES WILLIAMS

CHAPTER XVIII—Continued.

They stood together, the gun on the desk between them, its muzzle toward the bolted door of the main cabin. Mary was in the recess between the desk and the rack of muskets, George at the end of the desk nearest the companion.

If Mat Forbes were alive, he did not even groan. If someone watched the cabin companion, his feet did not shuffle on the deck. If Peter was preparing to break in the cabin door, his preparations moved without a sound. The very silence had terror in it.

George had the bomb gun under his right hand. He held the revolver in his left hand. His eyes were on the companionway down which at any moment an attack might come. He looked now and then at the skylight; but the men on deck took care not to show themselves there, and minutes passed, and nothing happened, and he said at last, appraising their situation: "Peter won't want to fight us unless he has to. And maybe he told the truth about Richard."

"No, no." "If he did, if they don't find Richard, they'll have to come back aboard and surrender. They can't get away from here without the ship. Peter could slip the anchor and get some sail on her and make out to sea and come back with a gunboat or something. So if they don't find Richard, Peter needn't worry."

"They will find him." "I'm afraid Peter killed Richard, Mary."

There was ice in her breast. "No, George," she whispered helplessly.

CHAPTER XIX

"If Richard is dead, then the ship is Peter's, and everything in her, and he'll be rich. Remember he was always thinking about how much money the ship and her cargo was worth, and the ambergris." He added soberly: "And—he may have known he was not Cap'n Corr's own son."

"How could he know?" "His mother might have told him, when he was a boy. If he knew that, he could guess that Cap'n Corr had left everything to Richard."

"Peter worked on me from the time we left the island to make me hate Richard. I suppose he saw I was naturally jealous. He kept reminding me—how you used to feel about Richard; and when he thought he had brought me to the pitch, he gave me that letter. At least he put it in the pocket of Richard's coat and made me wear the coat and hoped I would find it there." He asked: "I wonder why Peter kept that letter so long?"

"Peter has always wanted me, himself, George. He made love to me aboard here. Kissed me. Once Tommy Hanline saw him. Once I had to run and lock myself in. George, he even came to my cabin yesterday."

George said humbly: "I haven't been much protection for you, Mary." Mary touched his hand on the bomb gun, and his eyes met hers. He said slowly: "You've given me so much. I should have given you more."

Her eyes burned with tears. "I'm going to take such care of you, make you so happy."

"Yes." He smiled at his own thought. "After we got out of this mess, we will."

Her hand tightened on his, smiling with him. They had never been so close as in this hour. After a moment he asked:

"How many men are there aboard? Do you know?"

"Just Peter and Rannels and Gee and Willie Leeper. And Mat, of course, if he's not dead."

"Four of them?" He chuckled. "Well, any one of them could pick me up and throw me overboard. Even old Willie. But I've a gun—two guns—and they haven't."

She said wonderingly: "I think you're enjoying this!" She smiled. "Rejoicing like a strong man to run a race. Isn't that in the Bible?"

"I'm not running a race, Mary." He smiled. "Maybe I would if I could, but there's nowhere to run to."

"I wish we could know if they do find Richard."

George faced the companionway. He was not tired, not weak. The emergency had stiffened him; he meant to meet it if he could. But deep in his thoughts, George felt suddenly Mary's eyes upon him. His eyes met hers; and after a moment, gravely, not smiling, she came toward him. She came to him and kissed him. Then, while they both smiled, without words, they kissed again.

She returned to her post. Time passed. Mary kept her vigil at the window. George could see her leaning across the bunk, resting her hands against the vessel's sides, her face close to the small square pane.

George nodded, understanding, accepting the fact to which he could not be blind. But she and Richard, even if Richard were alive, would never speak to one another of their love; and they would take care that he should never guess. He knew this; and he vowed that so long as he lived, they must not know he knew the truth. Let them do their brave parts and think him blind.

Time somehow dragged itself away.

When Richard went ashore the day before, it was at Peter's suggestion. "Do you good to stretch your legs," the younger man urged. "You're going ship-crazy, Dick, the way you've acted since we passed the Rocks. What got into you? Mary?" He watched Richard shrewdly; but Richard without answering looked down at the boats preparing to leave the ship's side. "I'm going to try for some geese," Peter said. "Come along. Better bring a club. The pigs might jump us. They're ugly sometimes."

A walk ashore offered some outlet for his bottled energy, so Richard took that iron-bound club made out of a harpoon shaft, and went with Peter. While the men were hauling the floating casks ashore, he and Peter approached the little pond; but the geese were somehow alarmed, and they rose and flew up the slope and settled again far up the ridge. Peter called Gee, and the three men started that way.

The tussock grass, at first short and scattering, then taller and thicker, high above their heads, received them. Richard plunged through it headlong, welcoming its tough resistance, forcing himself into it, wrestling his way with his shoulders and his head bowed. His broken arm, secured to his side, made him awkward at the business. He dragged the heavy club behind him, bending his head, charging through the tough stuff with its interlacing luxuriance like a bull.

That which happened came with no warning. Richard, breaking

He realized suddenly that he was screaming like a maniac.

blindly through the grass, lunging and fighting through the mesh of it like a fish caught in a net, stepped into nothingness. He fell, turning over sickeningly in the air. He fell on his right side, shoulder and hip striking together, in shallow water and mud. The breath was knocked out of him, and he was stunned and shaken and for a little could not move. Then he rolled painfully on his back and felt something hard under his head and laid his hand on the shaft of the club he had carried. He got to his knees and stood up, gasping for breath; and his feet sank deeper in water and soft mire.

He looked up and saw the sky through a round hole five or six feet across, edged with grass, the long stuff broken by his fall hanging down into the hole. The hole was a full thirty feet above his head.

He called Peter's name, shouting it as loudly as he could with what breath his jolted lungs could catch; he shouted again and again, till he saw something move at the edge of the hole above him, saw Peter's head projected against the sky, heard Peter cry:

"Dick! Are you down there?" "Yes."

After a moment Peter asked: "How deep is it?"

"Thirty feet, anyway. Maybe more."

"Can you climb out?"

Richard looked around, peering in the half-darkness of the pit; he walked two or three steps to one side, investigating. He tried for hand-holds, managed to climb a little; but he saw then, as his eyes became a little adjusted to the darkness here, that above his head the sides sloped inward toward the opening at the top.

He slid to the bottom again in a cloud of sooty dust. "No," he said. "It's shaped like the inside of a jug. The sides slant in to the top. You'll have to get a line, bring some men to haul me out."

"Sure."

"Be careful where you step," Richard warned him. "And make the men be careful when they come. Probably there are a lot of holes and pits around in the grass."

Peter repeated: "Sure." He said in sudden question "Hurt, are you?"

"No." "I can see you now. You can't climb out, that's certain." "No. Go ahead."

"That's not heavy enough. Bring some whale line from the ship."

Peter agreed. "Yes, I'd better. I'll be quite a while, Dick; but I'll make it quick as I can. Take it easy."

His head disappeared. Richard stayed where he was, looking up at that small opening so far above him, wishing Peter were still there. He could hear the grass rustling in the wind; but the sound was faint. He was wet, and he was cold. The shallow pool of water into which he had fallen was directly under the opening, in the deepest part of the pit. He sat down at one side of it, plucking at the powdery gray-black ash with his hand, rubbing it between his fingers. It broke into a light dust that rose into his face and made him sneeze; but it stuck to his wet hands in a slimy smear. He shivered with a sudden chill, and wished Peter would hurry. This place had an unpleasant odor, vaguely alarming. Twenty minutes for Peter to reach the shore, ten minutes to the ship, ten minutes back to the shore again; say an hour in all before help would come. Richard did not like his plight. There was something terrifying in this prison into which he had fallen; in the stale, sick smell of it. He tried to estimate how long Peter had been gone. Five minutes? Ten? He sought to count off sixty seconds, and caught himself hurrying the count; so he began to beat time with his hand, tapping his knee rhythmically. It took a long time to count sixty seconds. There were sixty minutes in an hour. To count sixty seconds sixty times would need an eternity.

It must be at least half an hour since Peter left. Richard warned himself to be conservative; he called it twenty minutes. In an excess of caution, he decided it was only fifteen. If he began to expect Peter too soon, waiting would be hard. A rain squall drifted across the sky, and a few drops pattered on the still surface of the pool with little tinkling sounds, almost musical. He liked them. They were company. They banished the dreadful silence here. Peter must have reached the boats by this time. Probably the men were just sliding a boat into the water, shipping their oars. Peter would drive them, make them hurry.

Richard sat down again, forcing himself to relax, to stop thinking about Peter. Peter would get here as soon as he could. Richard lay down on his back, his arm under his head, watching that hole above him, and the gray sky from which rain again descended. A man watching that hole, waiting and waiting for the head of a rescuer to appear, could go crazy. Richard dragged his eyes away from it.

He studied the inside of his prison, forcing himself to wonder about its origin. The fire which dug this hole in the peat must have burned for years, eating its way down and down till it came to hard pan. He asked himself, aloud: "Why didn't rain put it out?"

He wondered how long a man would live in this wet cold that bit his bones. The thought made him shiver, and he got up to warm himself again. Everywhere the soft soil under his feet was honeycombed by the little mice of fire that had eaten tunnels in it; and his feet sank into it halfway to his knees. He hated the feeling, stopped walking, beat his chest with his arm.

Richard thought he would be glad to leave Hoakes Bay forever.

Now and then, in the back of his mind, like a watching, beckoning figure, Mary appeared. He shut his thoughts against her. He must put her out of his mind, keep her out of his mind. Forever.

Peter would come soon. Surely he would come soon.

Richard decided they might even now be hunting for him, up there. He began to shout.

He realized suddenly that he was screaming like a maniac; and he stopped in shame at himself, and controlled his voice, and thereafter he hallooed almost decorously, at regular intervals.

But now he watched the opening above him without respite, never taking his eyes away from it.

It must be an hour since Peter left him here. He refused to admit to himself that more than an hour had passed. When the sky grew darker, he argued desperately that this was merely a thickening of the clouds.

That was not merely a thickening of the clouds above him. It was dusk. Night was coming on. It had been early in the afternoon when he fell into the pit; so now he must have been here five hours or six.

In any dreadful crisis, a man must make for himself a formula. Richard had no illusions about Peter; but to believe that Peter had returned aboard the Venturer and sailed away, leaving him here in this pit to die, would mean quick madness and despair. Richard was of that breed of man which does not despair, which does not surrender.

He found a formula. He decided to believe that Peter, on his way back to the ship, had fallen into a pit like this one. He decided to believe that Peter too was a prisoner. The men must be hunting for them now. Night was coming on; but good Mat Forbes would keep the men hunting all night.

SANDWICHES THAT REALLY TEMPT (See Recipes Below)

BUFFET SUPPERS

If there's one season of the year when you like to feel really free from the heat of the kitchen, then summer's that season. You can do it easily, too, if you'll plan and prepare C-O-O-L meals in the early hours of the day before the heat becomes sweltering. Then stay strictly out of the kitchen until supper-time.

Make mealtime during these months as simple as possible. Not only will you be the more charming for doing less work, but your family will enjoy the simplicity as a change. One of the answers to this is buffet service. An attractively arranged table on the summer porch is a tonic for hazy summer appetites.

"Sandwich Loaf."

For Chicken Filling use: 1 cup ground, cooked chicken 1/2 cup ground almonds 2 to 4 tablespoons chopped celery Salt to taste Lemon juice to flavor Salad dressing to moisten Mix chicken, celery and almonds. Season with salt and lemon juice and add enough dressing to give spreading consistency.

For Egg Filling use: 4 hard cooked eggs 1/2 cup chopped cooked bacon or 1/2 cup stuffed olives, chopped Salt to season Few drops Worcestershire sauce Salad dressing or cream to moisten. Chop eggs, add bacon and Worcestershire sauce. Moistened with salad dressing to give spreading consistency.

Remove the crusts from an uncut loaf of day-old white sandwich bread. Slice lengthwise to make three or four slices about 3/4 inch thick. It's a good idea to have the bottom slice thicker than the other three since it helps in placing the loaf when served. Spread slices, except top and bottom, with creamed butter, mayonnaise, then with different fillings. Use chicken filling between two slices; egg filling for the next and chopped vegetables moistened with mayonnaise for the third or tomato slices.

Stack and cover top and sides with soft cream cheese piled like frosting. Garnish with thin radish slices and dust with chopped chives. Chill in the refrigerator several hours before serving. It's better not to use lettuce because it offers slicing difficulties after the loaf is served.

For the cream cheese frosting use 1/4 to 1/2 pound of cream cheese. Add rich milk or cream to make a thick paste. Beat cheese and cream until evenly mixed and of good consistency for spreading. Spread over loaf to give a fluffy effect, as though you were swirling icing.

"Tomato-Cheese Salad."

(Serves 8-10) 1 can (10 1/2 ounces) condensed tomato soup 1 tablespoon butter 1 tablespoon grated onion 1/2 tablespoons gelatine 1/2 cup cold water 6 to 8 ounces cottage cheese 1/2 cup mayonnaise Salt to taste 1 cup chopped cucumber 1 cup chopped celery 1/2 cup sliced radishes 1/2 cup finely chopped onion

LYNN SAYS:

When you think the thermometer's going to burst, then think cool, eat cool, act cool, and you'll be cool. Drink plenty of water and cooling beverages.

Be gay and have your meals, casually out on the shady porch on a bright table cloth. Serve things buffet style for it'll make it easier all the way around: less table setting, less dishes, and less to do.

No one may feel much like eating, and people, generally eat less during summer months, but they must still have the proper diet. So bring out your crisp garden salad, chilled main dishes, and assorted fruits. Be Cool!

THIS WEEK'S MENU.

- \*Sandwich Loaf
- \*Tomato-Cheese Salad
- \*Honey and Nut Bran Muffins
- \*Spiced Rhubarb Jam
- Cool Beverage
- Chilled Assorted Fruit Plate
- \*Recipe given.

Lettuce Tart french dressing Heat the tomato soup, butter and grated onion. Soften gelatine in cold water and add it to the hot tomato mixture. Add the cottage cheese and mayonnaise, stir the mixture thoroughly and salt to taste. Let the mixture cool until it thickens slightly, then add the chopped vegetables. Pour into a large ring mold or individual molds and chill until firm. When ready to serve unmold on crisp lettuce. Use a tart french dressing with this salad.

A one-dish summer meal that will help you be a cool and collected homemaker is this tasty ham mousse which may be served as a salad main dish, heaped high with garden greens, tomato apple cubes, devilled eggs, carrot strips, peas marinated in french dressing, ripe olives, celery hearts.

Ham Mousse Salad Plate. (Serves 6-8) 1 tablespoon of plain gelatine 1/4 cup cold water 2 cups stock or bouillon 1/2 cup mayonnaise 1/2 cup diced celery 1/2 cup diced dill pickle 1/2 cup minced pimiento 1 cup chopped, cooked, smoked ham

Soak gelatine in cold water for 5 minutes. Heat stock or bouillon to boiling point and add gelatine which is soaked. Stir until dissolved. Chill until slightly thickened, then whip in the mayonnaise. Add remaining ingredients, pour into ring mold and chill until firm. Unmold on salad plate and garnish with accompaniments suggested above.

Muffins that will bake in a few minutes will give your meal a tang and zest that will bring cheers from the family. These are so good you'll want them often for any meal of the day. If made in the smaller muffin tins, they'll make a grand addition when you have the ladies in for luncheon.

\*Honey and Nut Bran Muffins. (Makes 10 large muffins) 1/2 cup honey 1 cup flour 1/4 to 1/2 teaspoon soda 1/2 teaspoon salt 2 cups bran cereal 1 tablespoon melted butter 1 1/2 cups milk 1/2 cup walnuts, chopped fine

Sift together flour, soda, salt, and mix with bran cereal. Add other ingredients. Place in greased gem pans and bake in a quick oven (425 degrees) for 25-30 minutes.

A jam spicy and delicious to go with your muffins is this one which needs only a few minutes' cooking and is therefore guaranteed not to make your kitchen unbearably hot.

\*Spiced Rhubarb Jam With Orange. (Makes 7 6-ounce glasses) 3 1/2 cups prepared fruit 4 cups sugar 1 box powdered fruit pectin

To prepare fruit, trim and slice fine (do not peel) about 2 pounds of small red-stalked rhubarb. Add 1 cup of sugar, mix, let stand for 15 minutes. (This cup of sugar is added in addition to the ones specified above). Add 1 teaspoon each of cinnamon and cloves, and grated rind of 1 orange.

Measure prepared fruit into a 5- to 6-quart kettle filling up last cup or fraction of a cup with water if necessary. Place over the hottest fire, add fruit pectin, mix well, and continue stirring until mixture comes to a hard boil. To reduce foaming 1/2 teaspoon butter may be added. Pour in the 4 cups of sugar, stirring, bring to a full rolling boil, and boil hard 1 minute.

Remove from fire, skim, pour quickly into glasses. Paraffin at once.

Mistakes to Be Avoided In Summer Care of Dogs

"DOG DAYS" are coming, but they needn't bother your dog. With simple, right summer care he'll be healthy and cool as a cucumber! Do not clip him, for he sheds his undercoat, leaving his outer coat to protect him against the hot sun, flies and mosquitoes. Comb and brush him regularly—but do not give him too many baths, as this removes the oil he needs to keep his coat healthy.

Our 32-page booklet gives the simple all-year-round care that keeps a dog healthy. Tells how to choose your pet, feed, house-break and groom him; how to train him to do clever tricks. Advises on dog sicknesses; has information on rabies. For your copy send order to:

Merit and Luck Our merit wins the esteem of honest men, and our lucky star that of the public.—La Rochefoucauld.

Watch Your Kidneys!

Help Them Cleanse the Blood of Harmful Body Waste

Your kidneys are constantly filtering waste matter from the blood of your body. If they become clogged, they do not act as Nature intended—fail to remove impurities that, if retained, may poison the system and upset the whole body machinery.

Symptoms may be nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—a feeling of nervous anxiety and loss of pep and strength.

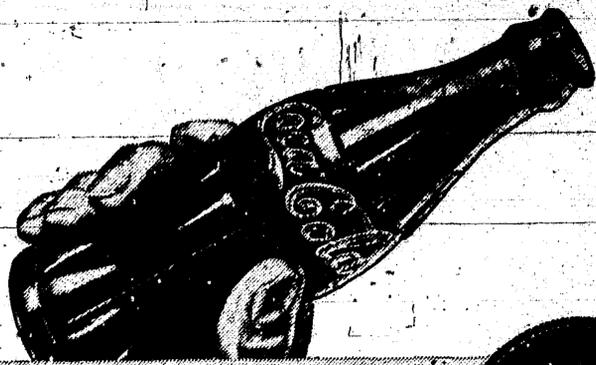

Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.

There should be no doubt that prompt treatment is wiser than neglect. Use Doan's Pills. Doan's have been winning new leads for more than forty years. They have a nation-wide reputation. Are recommended by grateful people the country over. Ask your neighbor!

DOAN'S PILLS

CREATING NEW WEALTH TO ORDER

Advertising creates new wealth by showing people new and better ways of living, and advertising creates new wealth by contributing to the prosperity of everyone touched by the flow of money which is set up. In this way, don't you see, advertising is a social life which is working in the interest of every one of us every day of the year, bringing us new wealth to use and enjoy.

**THE DRINK EVERYBODY KNOWS**

Whoever you are... whatever you do... wherever you may be... when you think of refreshment you welcome an ice-cold Coca-Cola. For Coca-Cola is pure refreshment—familiar to everybody... and ice-cold Coca-Cola is everywhere.

Thirty-two thousand rural mail carriers are now acting as agents in the sale of Defense Savings Stamps, postal officials have informed the Treasury Department. Demand for the stamps in sparsely settled districts caused the Post Office Department to authorize the carriers to act as salesmen.

The stamps range in value from ten cents to five dollars. Purchasers are given albums in which they can be mounted. When filled the album may be exchanged for Defense Savings Bonds.

Post Office officials recalled that rural mail carriers acted in similar capacities in 1917 and 1918 selling War Savings Stamps.

To have left Iceland open to Nazi surprise would have been folly. It would have been definitely an exposure of North America to aggressors. Mr. Roosevelt should have the support of the country in reaching his conclusion. -Ex.

**Local and Personal**

Mrs. Jay McPherson, nee Miss La Wann Conley arrived from Hereford, Arizona Wednesday to visit the home folks.

Mrs. Dan Conley and son, Jerry went to Tucumcari where they were met by Mr. Conley, and all three went on a trip to Clayton, Raton, and Taos. They will arrive home Saturday.

The "Santa Fe Tumbleweed," an interesting little weekly paper which has been coming to our desk since November ceased publication on July 11th.

Mrs. Nellie Reily and daughter, Mrs. Kittie Allen went to Carlsbad Sunday, where they visited Mrs. Herndon Baclaski.

Sgt. Robert Skinner of Fort Bliss spent the past week-end with his parents, Mr. and Mrs. Roy Skinner at Angus.

Mr. and Mrs. Roy Skinner and Mrs. Skinner's mother, Mrs. Maude Adams, were business visitors in Carrizozo yesterday. Mrs. Adams, who lives in El Paso is spending the summer at the Skinner ranch at Angus.

Mrs. Alvin Carl and son, Melvin came home from California last Monday where they had been spending the summer with relatives.

After a visit of two weeks with her parents, Mr. and Mrs. P. M. Johnson, Mrs. Sam Kelsey left this morning for her home in Ventura, California.

**Road Building Program**

State Highway Engineer Burton G. Dwyre is awaiting final word from Washington D. C., as to how much and what road building the state can do this year.

In accordance with OPM instructions, he has sent his program to the army corps area command at Fort Sam Houston, Texas. The army, after passing on it, will send it on to the OPM for final approval.

These steps have been made necessary because of the shortage of steel, cement and other materials, required by the defense industries, which some contractors have already experienced difficulty in getting.

Dwyre doesn't want to start any work unless he is sure of being able to finish it. A half-completed road wouldn't do any good and would be expensive to the state.

Mrs. Allie Greer of Tucumcari is here with parents for a few days.

The City Gas Company is now located next door to the Lincoln County News office.

Mr. Lee Stimmel who has been visiting his parents, Mr. and Mrs. Ben Stimmel left for his home in California last Saturday. Mr. Stimmel is much improved.

**Appreciation**

We wish to thank each and everyone including our two newspapers for their assistance they gave to help make the National Defense Day Dance a success. We especially wish to thank Mr. L. A. Whitaker who really made the dance a success by personally selling seventy-five tickets. Total amount of receipts \$99.00  
 Orchestra \$29.70  
 Misc Expenses 2.80

Total \$66.50

**Summons and Notice of Pendency of Suit**

STATE OF NEW MEXICO TO Ben N. Coe, also known as Ben M. Coe, impleaded with the following named defendants against whom substituted service is hereby sought to be obtained, to-wit: Ben N. Coe, also known as Ben M. Coe, if living; if deceased, the unknown heirs of Ben N. Coe, deceased; L. A. Johnson if living, if deceased, the unknown heirs of L. A. Johnson, deceased; C. J. Roquemore, if living; if deceased, the unknown heirs of C. J. Roquemore, deceased; and all unknown claimants claiming any right, lien or interest in or to the premises involved adverse to Plaintiff,  
**GREETINGS:**  
 You and each of you are hereby notified that W. A. Vickers has filed suit against you in the District Court of Lincoln County, New Mexico, in cause No. 4890 on the Civil Docket for the purpose of quieting title in said Plaintiff to the following described property in Lincoln County, New Mexico; to-wit:  
 The SW¼ and the NW¼ of Section 21, Township 10 South, Range 18, East, N. M. P. M., together with all improvements thereon and rights and appurtenances thereunto belonging, Plaintiff alleging that he is the owner in fee simple of said real estate, and that any right, title or interest in or to said property you, or any of you may have is inferior to his title.

You and each of you must appear and plead in said cause on or before the 10th day of September, 1941, or you will be in default and Plaintiff will proceed to secure the relief sought by his Complaint and you, and each of you, will thereafter forever be barred and estopped from claiming or asserting any right, title, lien or interest in or to said real estate.

Frazier and Quantius, 123 West 4th Street, Roswell, New Mexico, are attorneys for Plaintiff.  
 Witness my hand and seal at Carrizozo, New Mexico, this 24th day of July, 1941.

Felix Ramey,  
 Clerk of the District Court.
