## Lyric Theatre

R. A. Walker, Mgr.

FRIDAY & SATURDAY

C. Romero, Ricardo Cortez, Patricia Morrison, Cris-Pin Martin,

In

"Romance of the Rio Grande" Fiestas, strumming guitars, beautiful Senoritas and the 'tall dark and handsome brigand' with his latest boots and saddle opus.

ALSO

"Fishing Made Easy"

SUNDAY, MONDAY & TUESDAY

Alice Faye, Betty Grabble, John Payne, Jack Oakie & "Shadrach"

In

"In Pan Alley"

Stars, songs and more stars, romance, color, laughter and glamour, heart-break and melodies.

ALSO

Paramount News and "The Temperamental Lion"

WEDNESDAY & THURSDAY

Martha Scott, William Gargan,

In

"Three Cheers for Miss Bishop"

A picture for everybody who ever went to school and for everybody who didn't. All know a "Miss Bishop"

ALSO

"Alluring Alaska"

### Notice

The Carrizozo Municipal Board of Education will receive sealed bids for 6600 sq. ft. 1/2 x 16 x 82 Celotex, ship lap edges and all door hardware called for in specifications as drawn up by Kruger & Clark, Sena Plaza, Santa Fe, New Mexico for Carrizozo High School Building with Gymnasium. All bids must be received on or before 7:00 P. M. August 20, 1941. All bids to be F.O.B. Job Site. The Board of Education reserves the right to reject any or all bids.

Jane S. Turner, Clerk Municipal Board of Education

2t

### State Library Announcement

All citizens of New Mexico will be interested in the fact that a law was passed in the 1941 legislature creating the State Library Commission. The first meeting of the newly created Commission was held in Santa Fe, July 15th. The members are Mrs. Joseph Byrne, Mrs. Elizabeth McCoy Murphy, Mrs. Julia Brow Asplund, Chairman, Mrs. Burton Dwyre, Vice-Chairman and Mr. Raymond Huff, Chairman of the State Board of Education.

The duties and functions of the Commission are the administration of the State Library Extension Service, encouragement of professional training and raising of standard of service, supplying advice and information to existing libraries in the state, co-operation with other educational agencies, and the administration or grants-in-aid.

The Commission is most anxious to be of assistance to all libraries and to increase the supply of reading matter in the state. Members of the Commission will be glad to receive advice and suggestions for the betterment of service in New Mexico. Any communications may be addressed to the Executive Secretary, New Mexico State Library Commission, Palace of the Governors, Santa Fe, N. Mex.

(Mrs.) Irene S. Peck, Executive Sec'y. and Director State Library Extension Service.

### NOTICE

The Carrizozo Municipal Board of Education will receive sealed bids for four year contract for the transportation of school children in District No. 7. All bids must be received on or before 7:00 p.m. August 20, 1941. Bidders should see Mrs. J. P. Turner for particulars concerning transportation. The State Transportation Director reserves the right to reject any or all bids.

Jane S. Turner, Clerk Municipal Board of Education

Mr. and Mrs. Alfredo Nevarez, and Mrs. J. F. Nevarez of Las Cruces, and Mrs. Elvira Benavides of La Mesa, N. M. visited at the home of Judge and Mrs. M. C. St. John last Monday.

### Governor Miles To Keep Pledge

Santa Fe, N. M. August 5, 1941. Governor John E. Miles has declared his intention of keeping whatever pledges he has made to building or improve roads despite unforeseen difficulties.

"I know what promises I made", the governor told the press in Santa Fe recently "and I'm going to carry them out insofar as possible. I made none that was not conditioned on financial ability to get the work done and I am unmoved by criticism in a time of emergency like this."

Calling attention to the facts that the state has flood damages to bridges and highways, estimated at a million and a half dollars, to repair; and that the highway department is experiencing difficulty in getting priority numbers for materials needed by the defense industry in large quantities, Governor Miles said, despite these unforeseen problems, he was nevertheless hopeful of being able to have roads built or improved where he said the work would be done.

"I have promised no roads except where they were needed," he said. "Nothing could influence me to do otherwise, and I intend to make good."

### Rural Aluminum Drive a Success

Approximately 1500 pieces of aluminum were collected in the rural areas of Lincoln County. The Drive was sponsored by the County Extension Service in cooperation with the Local Defense Council, 4-H Clubs, Women's Clubs, and other organizations assisted with the Drive.

The Drive in the Hondo Valley was sponsored by Mrs. George Smith and Mrs. Glen Bradley of Friendly Club, of Tinnie; Mrs. B. J. Bonell and Mrs. Frank Beavers, of the Glencoe Women's Club.

The Lincoln 4-H Club conducted the Drive in the Bonito Valley, collecting 486 pieces of aluminum. Mrs. C. M. Luckey, of Nogal, together with her Sunday school class, sponsored the campaign in Nogal area.

In the Ancho community, the P. T. A. under the leadership of Mrs. Perry Melton conducted the Drive. The 4-H Club, assisted by other local organizations, collected approximately 400

### Snips Tresses For U. S. Defense

Kilgore, Tex.—Eight year old Mary Jo McCubbins is wearing her golden tresses bobbed these days—and its all for national defense.

Mary Joe cut off her braids and turned them over to the Longview County Red Cross chapter after she heard that blond hair hair was needed by the Government for national defense purposes. The Red Cross forwarded them to College Park, Md., where Government scientists will use them in making precision instruments for gauging humidity and atmospheric pressure for aviation and long range artillery.

### Picnic On South Fork

Mr. and Mrs. H. W. McMillan had as week-end guests, Mr. and Mrs. Virgil Hall, Mr. and Mrs. Bill Moore, and daughter Jeanette, and Miss Nellie Bost, all of Socorro; Mr. and Mrs. Claud Coffman, Tusumcari; All went picnicing on South Fork, Sunday. Others who joined the picnic crowd Sunday were Mr. O. Rosier and son, Walter Ray; Mr. and Mrs. Herman Rossier and baby daughter; Mr. and Mrs. Walter Cook and two children Bobbie and Tommy, all of whom were from Socorro.

### Former Residents Visit

Mr. and Mrs. Clay Van Schoyck formerly of White Oak, but now of El Paso, visited the Wayne Van Schoyck family at White Oaks Monday and visited Carrizozo friends Tuesday of this week. Mrs. Van Schoyck was Miss Irene Tinnon of Carrizozo, before her marriage, a sister to Miss Carmie Tinnon of El Paso and Mrs. Black of Deming. Mr. and Mrs. Van Schoyck are spending a few weeks at Ruidoso.

Carl P. Radcliff, County Extension Agent

### To Visit Canada

A card from Mr. and Mrs. G. T. McQuillen, who were in Kansas City, say they are enjoying their vacation and will go on to Canada before their return to Carrizozo.

Mr. Florencio Vega was in town from his ranch this week.

### New Manager for Local Standard Station

Mr. Phil Reynolds of Capitan has leased the Carrizozo Standard Oil station from Mrs. M. M. Ward, sales representative of Alamogordo. Mr. Reynolds and his brother, Emil have been in charge since August 1st. They invite all friends old and new to give them a trial; Dan Conley, Jr., is also an assistant there.

### Bible School Closed

The vacation Bible school at the local Baptist church was closed Wednesday of last week, with appropriate exercises. There was very good attendance and much interest shown all through the sessions. Teachers were Mesdames L. D. Cochran, R. E. Berry and L. L. Benton.

Mr. and Mrs. Andres Lueraz, Jr., and children and Mr. Andres Lueraz, Sr., of Trinidad Colorado are visiting here at the home of Mr. Ben Sanchez.

### Visitors From Texas

Mr. and Mrs. Reece Ferguson and little son, Tommy of Hubbard, Texas, were guests at the home of their cousins, Mr. and Mrs. E. M. Montfort. Mr. and Mrs. Ferguson are visiting the principal points of interest in New Mexico.

### Return From Missouri

Mr. and Mrs. W. J. Ferguson and children returned last Friday from a trip to West Plains, Mo., where they visited relatives for ten days. They also visited Kansas City, Springfield and other points in the state, on their trip.

Buy U. S. Defense Bonds.

### The Livestock Situation

There has been no material change in the cattle market since our last release. Hog prices continue on a satisfactory basis. We have had a wonderful run of North Coast lambs which sold at satisfactory prices and we appreciate these shippers who came from long distances to patronize the Los Angeles Market. It is a yearly event which we have enjoyed for several years, and a recognition of Los Angeles as a market for the best.

It is a little early to get a line on the Fall Stocker and feeder market, although California ranchers and feeders are beginning to figure where they are going to get their supply this fall.

We had a sale Monday this week of about 80 head of choice Guernsey cows, heifers and bulls which averaged very well. I mention this particular sale because it embraced the tops from many of the Dairy Breeders of Washington, Oregon and California and it is encouraging to see our breeders willing to share with others this good blood and essential seed stock.

In connection with this sale were representatives of many of the Latin-American countries who are looking more and more to this section for foundation stock and our purpose is to encourage in every possible way trade relations in that respect particularly with Mexico and other Americas. Our breeders, too are looking forward to the time when we will be called upon to furnish breeding stock to the European countries. All the cattle of such countries are being rapidly devastated, and this is the country that they will look to in due course for the rehabilitation of their flocks and herds.

The purpose of the Company conducting these sales is to make the Los Angeles Union Stock Yards the clearing house for all comers. Other sales of dairy breeds will undoubtedly follow the successful sale of the Guernseys because we are beginning to recognize that in all classes of livestock we are dependent upon pure breeds in order to carry on. The Dairy industry is a rapidly growing business, and highly competitive, conducted to a very large extent along scientific lines. The problem of the dairymen is to get one cow that will produce as much as two cows, rather than the old idea of producing two blades of grass where one grew before.

See Emil Reynolds and Dan Conley for check-up and car service.—Standard Oil Station.

### MEDICAL ASSOCIATION

More than five thousand low-income farm families comprising 27,281 persons working with the Farm Security Administration, U. S. Department of Agriculture, in New Mexico and parts of Texas, Kansas, Colorado and Oklahoma, are participating in a Group Medical Care Program.

This information, taken from a report for the fiscal year ending June 30, 1941, was received here this week by John Paul Jones, rural rehabilitation supervisor for the FSA in Lincoln County, from Wilson Cowen, regional director of this federal agency at Amarillo, Texas.

The Group Medical Care Program, sponsored by the FSA in cooperation with local physicians makes medical attention more readily available to low-income rural people at a cost they can afford. The plan operates on a voluntary basis.

The Group Medical Care Program is operating in 79 of the 120 counties served by the regional FSA office at Amarillo.

Participating physicians in the 79 counties received an average of \$10,000 a month in 12 months covered in the report at an average cost to participating families of slightly less than \$2 per month.

The Group Medical Care Program makes it possible for physicians, particularly in rural areas, to give essential medical care to needy farm families at the time it is needed. It also enables the participating families to safeguard their health and receive attention at a cost they can afford to pay.

This plan has been in operation in some counties in this region for four years. It is now operating in about 800 counties throughout the United States, serving approximately 800,000 farm families.

The leading authorities generally believe that this program is aiding materially in the present National Defense Program by protecting the health of many persons who usually are least able to take advantage of medical assistance.

Dr. Turner said today that the Group Medical Care Program for Farm Security Administration families in Lincoln County has been in operation since March, 1939 and that on the whole the doctors and families have been satisfied with the way in which the plan has operated.

Mrs. Jay McPherson is spending a few days at home with her mother, Mrs. Dan Conley, and her brother, Dan Jr.

35, Stetson x	2	R. Ewing Carter

The districts marked with an (x) were not bid on, just approved

### KNOW YOUR BANK

### How Can I Build Credit Standing?

There are several common-sense rules. Always pay bills promptly. Meet your obligations as agreed. Be constantly vigilant to uphold your reputation and standing among business and personal acquaintances. And—very important, become acquainted here at the bank. Banks, like people, have confidence in those whom they know and understand.

WHO'S NEWS THIS WEEK

By LEMUEL F. PARTON (Consolidated Features—WNU Service.)

NEW YORK.—The U.S.A. gets a quartette of political warriors on the job, to map and push forward a campaign of counter-espionage and aggressive propaganda. They are Col. William J. Donovan, J. Edgar Hoover, Brig. Gen. Sherman Miles, head of the military intelligence division of the war department, and Capt. Alan G. Kirk, head of the office of naval intelligence. All of them have highly specialized and unique schooling for the job. They will work together, the flying wedge of a quickening attack on spies and lies.

Captain Kirk, a veteran of 35 years' service in the navy, eases quietly into the picture, which is his usual procedure. It just happened the captain, a discreet and highly personable officer, was sent to London, as naval attaché, in May, 1930. His investigation and report on the sinking of the Athenia impressed the state department and, from his ringside seat, he was a keen observer of many important events of interest to this country. When the Germans were taunting the British about "Where is the Ark Royal?" Captain Kirk quietly reported that he had just had lunch aboard her.

WE MISS the garret inventor, but here's the penthouse inventor, doing just as well. Charles L. Lawrence, widening the bomber range by his tiny auxiliary aircraft engine, had what Elbert O. Hubbard might have put down as the handicap of wealth and social position, but he tinkered and schemed aviation over many a hump and now, crowding 60, he turns in another finished performance.

There are no loose ends or ravelings to anything he does. His "watch charm" engine is already in mass production for the navy. It is a supplementary power plant which will enable the bombers to venture high and far, as it takes care of the energy overhead of starting motors, feathering propellers, and powering head, light, radio and instrument board.

Mr. Lawrence, the first man to adapt air-cooled engines to air navigation, also contributed much to wing design. His is the Wright-Whirlwind motor and he was the designer of the engine that catapulted Charles Lindbergh to Paris—also the engines of the three Byrd polar flights, the Chamberlain flight and many other historic hops of airplane history.

When he was a Yale undergraduate, Phi Beta Kappa passed him by because he spent all his spare time scheming and dreaming about airplane engines. Out of Yale, he attended the Ecole des Beaux Arts in Paris, bringing through his first engine before he finished his three-year course. Returning home, he took up his profession of engineering and established the Lawrence Engineering corporation, of New York.

It was in 1917 that he perfected his first air-cooled engine. He is given to cautious understatement. When, in 1927, Adm. Richard E. Byrd said passenger planes would be flying the Atlantic in 10 years, he said we couldn't be too sure about that—mail possibly but not passengers, for a long time to come.

HARPER SIBLEY, newly elected president of the United Service Organizations, is the sign, symbol, and substance of unifying, and never of disruptive forces. If agriculture and industry seem to have divided interests, he has farms scattered here and there and everywhere, and he also carries a nice line of lumber companies, banks, loan societies and coal companies.

When the government and business are at odds, Mr. Sibley is the man in between, counselling a bit of give and take here. He was the successful intermediary in the automobile strike of 1937, and while, as a conservative business man, he was shelling the New Deal, he was backing up Secretary Hull's trade treaties and the President's foreign policy.

He has held forth steadily against class animosities. His career is a refutation of the philosopher Berkeley. He can see both sides of any object at a given instant. As a former president of the United States Chamber of Commerce, Mr. Sibley is an authoritative voice in American business and he is never happy unless he has 8 or 10 highly diversified jobs, with plenty of time for tennis and golf. He is a former Groton and Harvard schoolmate of President Roosevelt, and like the President an upstate country squire.

Scientific Gadgeteer

Above: Sun telescope made from an old auto axle. Murray is focusing the solar image on a paper receiver here. Right: At the eyepiece of this homemade telescope he checks up on a few stars. The instrument is made of old water pipes, wood and pieces of mirror. Note how the wood is bound with wire.

Keeping track of earthquakes and checking up on the weather are a few of the things that make life worth living for Martin G. Murray, assistant postmaster at Huntington Beach, Calif. Mr. Murray makes all his own scientific instruments out of pieces of junk. These photos take you for a call on the scientific gadgeteer.

At left Murray has the image of the sun accurately focused on the buff paper behind this blanchened tube. The pistol is part of his post office job. Below: From an assortment of discards Mr. Murray got this instrument, which accurately measures magnetic dip.

Shiver Record.—Here is the recording device of Murray's seismograph. Needles mark the lamplighted drum with every shiver of Old Mother Earth. It records about 15 major quakes a year, some as far distant as India. Mr. Murray has no less than six seismographs in his suburban home at Huntington Beach.

The hobbyist practices his seismograph records by giving the lamplighted chart a bath in shellac and alcohol. This makes his records permanent.

The seismograph timing device tells Murray to the split second when a quake occurs, but he uses this special microscope to dope out from his chair where it happened.

Part of gadgeteer of Murray's seismograph.

LEAVES from Uncle Sam's Notebook

Culture of Dahlias Although the dahlia is a tender plant, easily killed by frost, it can, nevertheless, be depended upon to flourish wherever tomatoes can be grown; provided only that the grower-give it suitable care.

HISTORY OF CULTIVATION This beautiful flower was introduced into Europe in the year 1789, when one Vicente Cervantes sent a set of dahlia roots from Mexico to the keeper of the Botanic Gardens of Madrid, Spain. Cavanilles, the director of the gardens, described the flowering of those roots in 1791. Later, from the Madrid gardens, the plants were distributed widely over the continent; an importation was made to England in 1798 but the plants all died because of a lack of knowledge of their proper culture. They were re-introduced, more successfully, in 1804.

From the beginning, these dahlias showed both the single and double forms and gardeners everywhere found great delight in breeding new varieties. Interest in dahlias received great impetus when, in 1879, the first cactus dahlia appeared. This variety has petals which recurve at the margins and show also a curious twisting of the entire petal.

METHODS OF PROPAGATION The dahlia is very easily propagated. One may either buy plants or young dormant roots, or he may plant seed and raise his own stock. It is a more interesting process to grow from seed since dahlias rarely breed true and there is always the excitement of watching for new, or striking, or better forms. The seed should be planted in flats, indoors, several weeks before the usual date of the last killing frost. They should be transplanted into pots as soon as they are large enough to be handled, and later transplanted again to permanent beds or borders.

Although dahlias are usually used in massed plantings, there is no good reason why they should not be interspersed with other plants and thus grown as specimen plants in borders. They must not, however, be crowded, as they respond best to freedom, with plenty of fresh air and good sunlight. They must be sheltered from high winds since their stiff, heavy-headed stalks break readily.

They do well in almost any kind of soil but, like all plants, do best in good garden soil—loam that is light, friable, and rich in plant food. A soil that is too light will produce only small and stunted blooms, whereas a soil too heavily fertilized will cause the plants to run too much to leaf and stalk. It is a good practice, in many sections, to give the plants a mulch of straw manure in mid-summer, which cools the soil and provides extra food. Potash may also be applied, if the plants show signs of ceasing to grow, but fertilizer of any sort must be applied with care since too much stimulation of growth inevitably results in increase of foliage rather than of bloom.

PROPAGATION BY ROOT DIVISION

When the time comes to set out dahlia roots, the clumps which were stored the previous season should be started into growth so that the location of all eyes can be noted. This can be done by putting them for a short time in some warm moist place, without any soil. As soon as growth begins, cut the clumps apart with a sharp knife, in such a manner that a piece of the stem, with the budding eyes, is attached to each root. The roots should then be planted in rows three to four feet apart, and rather far apart in the row. For a saving of space, plants in opposite rows may be staggered. The root should be laid on its side, with the growing shoot nearest to the stake which is ultimately to support the plant. The stakes should be already in place when the planting is done. If they are placed after the plant begins to grow, injury may result to the root system.

WINTER STORAGE OF ROOTS

When the plants have been cut down by frost they should be pulled, dried briefly in open air, and then stored in barrels of dry sand or sawdust, in a frost-free cellar. Care must be exercised in lifting the roots so as not to injure them, since injuries cause decay and the decay may spread to healthy roots, causing considerable loss.

For detailed information on dahlia culture, send five cents to Superintendent of Documents, Washington, D. C., asking for Farmers' Bulletin No. 1770.

THE TWIG CATERPILLAR

So well does the Twig Caterpillar simulate a twig of the shrub upon which he is feeding, that even a sharp-eyed bird can not recognize him. It is small wonder, then, that a person, walking through the wood, may sometimes reach out his hand to grasp what he thinks is a twig, only to have a caterpillar curve around his finger. At any sign of danger he clings with false legs and, holding his body rigid, he stands out from the branch at an angle with it, and thus looks exactly like a twig.

FIRST-AID to the AILING HOUSE

by Roger B. Whitman

(© Roger B. Whitman—WNU Service.)

Condensation on Walls QUESTION: My small bungalow is built on cinder block foundations. The edges of my floors along the walls have become spotted, and the inside walls to a height of three or four feet are continually damp. What is the cause and what is the remedy?

Answer: There are openings between the top of your foundation wall and the house walls, through which outside air blows in at the floor level. As this air is cold the edges of the floor and the lower parts of the inside walls are chilled and condensation occurs against them. You can probably feel the draft through the crack between flooring and baseboard, and if you lay a thermometer there, you will find that the temperature is low. The remedy is to close all open joints above and below the sill, and any other joints through which cold air can leak in at the level of the floor.

Smoky Fireplace

Question: My fireplace, which I just tried to use for the first time since occupying the house eight years ago, I find draws badly. Its dimensions are 22 inches deep, 35 inches wide and 24 1/2 inches high. Is this too small? Is it possible for a nest to be in the flue?

Answer: The size of the opening in a fireplace should be governed by the area of the flue. The opening should not be more than 10 to 12 times the area of the flue. There are many causes for poor draft in a fireplace, such as: two fireplaces connected to one flue; with this construction, each fire kills the draft of the other; an obstruction in the flue; lack of wind shelf and damper; improper construction of smoke chamber. For a good draft the top of the chimney should be at least two feet above the highest ridge of the roof and should not be blanketed by nearby tall trees or buildings.

Poor Plastering Job

Question: I paid \$55 for replastering a ceiling. The plasterer said he would not take down the picture moulding, for he could do a good job with it in place. It is now impossible to get a picture hook on, for the space is filled with plaster. Am I justified in deducting something from his bill? He also splashed plaster on a large mahogany bed. I have wiped it off and used polish, but I fear that when the polish wears off the damage will show.

Answer: By rights you should have the picture moulding taken off and replaced, charging the plasterer for the expense, or giving him the chance to do the job himself. As to the bed, if it is not in good condition, it will undoubtedly remain so, or can be kept in shape with occasional polishing.

Cistern Repair

Question: How can I refinish a cistern that has become rotted and soft from age and wear?

Answer: You should look forward to replacing the cistern; for any repair would be only temporary. One treatment would be to coat the interior with asphalt paint. You should do the job at a time when the walls are thoroughly dry, and should first brush off all loose particles. Get a kind of paint that will not give the water a taste.

Bathroom Wall Finish

Question: Our bathroom walls and ceiling are smooth plaster and have never been painted. How should we fill the cracks and then finish with enamel?

Answer: Fill the cracks with patching plaster; get it at a hardware store. Instructions are on the label. For the first coat, thin enamel undercoater with one-eighth as much linseed oil. Allow to dry thoroughly. Then apply a coat of undercoater, and finish with enamel.

Laundry Floor Surface

Question: What kind of flooring that will not be slippery when wet can be used to resurface a wood floor in a room used as a laundry? Linoleum breaks and wears through quickly.

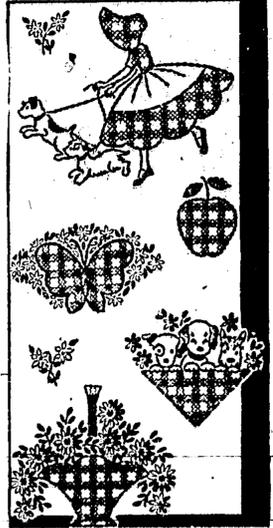

Answer: Asphalt tiling should be excellent, for it is waterproof and will not rot. You can get it from any dealer in linoleum. Linoleum should not be used in laundries or similar places where the flooring would be wet.

Worn Stair Finish

Question: My front stairs are oak finished in a "golden oak" shade. The finish in the center of the treads has worn, showing white spots, while the outer sides of the treads are still in good condition. How can I treat them?

Answer: Refinish the center parts with oak varnish stain. You can get a color sample card at a paint store to match the shades. Do not make sharp edges when you varnish; blend the new part into the old.

Things to do

Pattern 7004

LOOKS like applique doesn't it? But it's just easy cross stitch cleverly used and set off by other quick stitchery. Put these varied motifs on many linens.

Pattern 7004 contains a transfer pattern of 30 motifs ranging from 6 1/4 by 5 inches to 1 1/2 by 1 1/2 inches; materials needed; illustrations of stitches. To obtain this pattern, send your order to:

THE TRUTH SIMPLY

Today's popularity of Doan's Pills, after many years of world-wide use, surely must be accepted as evidence of satisfactory use. And a favorable public opinion supports that of the able physicians who test the value of Doan's under exacting laboratory conditions. These physicians, too, approve every word of advertising you read, the objective of which is only to recommend Doan's Pills as a good diuretic treatment for disorder of the kidney function and for relief of the pain and worry it causes. If more people were aware of how the kidneys must constantly remove waste that cannot stay in the blood without injury to health, there would be better understanding of why the whole body suffers when kidneys lag, and diuretic medication would be more often employed. Warning: scanty or too frequent urination, sometimes with a burning, itching, or stinging, persistent headache, attacks of dizziness, getting up nights, swelling, pain, under the eyes—feet weak, nervous, all played out. Use Doan's Pills. It is better to rely on a medicine that has won worldwide acclaim than on something you have never known. Ask your neighbor!

DOAN'S PILLS

One On the House

By GUY ROBERTS

(McClure Syndicate—WNU Service.)

"GIVE me 'n orangeade." The man behind the counter slammed the drawer of the cash register shut and whirled about in surprise. "Huh?"

"Orangeade," repeated the newcomer calmly, pushing a dime across the damp counter.

"Yes, sir," his hand slowly left his hip-pocket, and the color flooded back into his face. Sliding a glass under one of several faucets, he filled it with sparkling golden liquid. "Liquid sunshine; a glass a day keeps the doctor away," he said, placing the drink before the lone customer.

"Thanks. Say, your clock right, Bud?"

"To a second. Jus' four fifty-two in the A. M."

"State an' Madison sure is a quiet place this time o' the day," mused the stranger, sipping his drink slowly. "Just before dawn."

"You said it, mister," replied the man behind the counter. "Say—haven't I seen you 'round here before?"

"Well, now, I dunno—have you?"

"What I mean is, I wondered if you came by here very often."

"Oh, no, not very." He prodded the dime with his forefinger. "Here y'are, Bud."

"That's all right, mister. Keep it. That one was on the house."

"Say, aren't you afraid someone will spot you? For all you know I might be a spotter."

"Not much danger in that. No spotter would be about this time o' the day. It's early in the evening, and later when the theater crowd is out that they keep an eye on you. Hardly anybody ever comes in this time o' the night I know."

"Guess you've got long hours, haven't you?" spoke up the customer, slowly twisting the glass between his fingers.

"You hit it. From eight P. M. to eight A. M. the ol' sun sure looks good in the morning! And does the evening keep you on the jump? Work like lightning during the theater rush, and again at the intermission, and when the shows are out. Then about midnight the crowd starts thinning out, and after that all you get is once in a while a drunk or two, a chorus man or a drifter of come sort. You're all tired out, and you got to spend the rest of the night with nothing to do, and believe me each hour seems like four. Lonely?—no name for it."

"I should think there'd be a good chance of someone clicking you up."

"Huh?" darting a quick look at the other's face.

"I say, you ever been in a hold-up?"

"Just once—but that was plenty. Some guy comes in and starts talking, 'Jee' like, we're talking now. He buys a drink and we chins along. I wasn't noticing him particularly. He slides a dime across the counter, and I turn to open the drawer of the cash register, well—all of a sudden he puts a gun on me and snaps—'up wit 'em, fella.'"

"Yeah? An' what did you do?"

"What did I do? Say, I'm no fool, an' it wasn't my money. I just does as he tells me. He grabs the roll out of the open drawer, slams a gag in my mouth, ties me up and shoves me under the counter. Neatest thing you ever—"

"Would you know this guy again if you saw him?"

"Can't say for sure. He was about my height, I guess, an' he had dark hair. O' course I was pretty scared—to notice."

"That's him, all right. That was Ben Carters," the newcomer grinned, and held out his hand. "That's the bird I'm after. I'm a plain-clothes man, buddy. There's been so many stickups along this chain lately that the company's hired me to make the rounds."

"Say—now . . ." the face of the man behind the counter broke into a delighted smile. "Gee, now, that sure was one on me, all right, all right. Gosh, I thought you was—honest, mister, I thought at first you was a stickup fella."

The plain-clothes man set down the empty glass and wiped his lips with the back of his hand. "Well, I gotta be moving along, Buddy. Thanks for the drink."

"That's O.K. Mister."

He continued to nod pleasantly as the plain-clothes man ambled up the sidewalk and disappeared around the next corner. Then the smile vanished. He stooped swiftly, tightened the gag in the mouth of a roped and bound figure that lay helpless under the counter, rose, glanced cautiously up and down the street.

"Yes, sir," he mused, as he silently vaulted the counter, "that was one on the house."

Jackets! They Play Important Role in the Fashion Picture

By CHERIE NICHOLAS

ACCORDING to fashion's say-so, you must be smartly jacketed everywhere you go. Your play suits, your daytime ensembles, evening dresses and afternoon frocks are all supposed to have complementary jackets, with a few "extras" to be held in readiness to report for duty at the beck and call of time and occasion. So no matter how many jackets you have they will be none too many to include in a fashionable wardrobe.

In a program of interchangeable jackets the secret's out, as to how to go victoriously through the mid-season stretch between summer and actual fall with "flying colors" so far as keeping a well-dressed appearance is concerned. Every woman wants to maintain a refreshing up-to-the-moment look in summer hangover apparel until autumn styles are set. This is quite a "trick" in the art of dressing. Interchangeable jackets that flaunt "the latest" in styling details is an answer.

With the thought in mind that the attractiveness of the jacket fashions pictured might inspire you in a sewing spree venture, we are especially calling your attention to the several pen and ink sketches, selected because the numbers are really very easy to make. You can buy up such pretty remnants at this time of year, so reasonable and with the investment of a little time and effort you will find yourself the happy possessor of jackets that, ingeniously interchanged, will set new tempo for your frocks in keeping with every move of fashion.

Referring to the pen-and-ink sketches, the ones at top to right

and left, are of the casual type for town and travel wear. For these remnants of tweed will work up to good advantage and if you want to give them a "last word" touch, embroider a big scroll monogram somewhere about them—on pocket or sleeve or some other strategic point.

Outstanding on the season's program is the cleaveless long-torso jacket, known as the jerkin. It is the schoolgirl's idol and adored by sportswomen. The jerkin sketched at lower left, is easy to make, easy to wear! Use bright corduroy or suede cloth. Jerkin patterns are available anywhere they sell patterns.

Cooler coats, the popular choice for evening wear, are over so easy to make for they require little or no fitting. The "cooler" sketched at lower left, is a "perfect little treasure." The material used in this instance is prettily embroidered in quaint little poses. Handmade brocade or metal cloth yields beautifully to the cooler treatment. Women of discriminating taste love cooler wraps made of fine wool or silk crepe in subtle pastel greens, violet shades, or Chinese reds. The newest thing is to embellish them with a restricted amount of sequin or bead embroidery. Note the model in the lower oval inset. In this instance the sheer crepe is in a soft stone blue, the embroidery done in silver threads and beadwork.

(Released by Western Newspaper Union.)

Sun-Hat and Bag

Here is a practical sun-hat and bag that should interest beach strollers who want to protect their complexion from burning sun rays. The large sun hat worn so appealingly by the young lady as she poses in the picture at the top acts as a perfect "freckle tender."

In the pose below you see how this huge brim folds to pancake size so as to fit into the outer pocket of a made-to-match rubber-lined beach bag. This hat has a navy blue brim with red and white striped crown and the color combination is repeated in the bag.

Accent Is on Luxury Blouse Type for Fall

The blouse program as mapped out for fall and winter will use much luxurious fabric. Pastel metal cloth made up in classic simplicity is one of the happy outlooks. Matching the pastel of the metal weave with crepe in identical tone presents endless possibilities for achieving charming effect. In some instances a bit of the crepe used for the skirt is repeated in stylizing accents on the metal blouse.

Wide use will be made of deep-toned satins and they will be made up similar to the manner suggested above for metal weaves. Silk jersey is also a favored medium. Used in vivid reds, greens or blues to wear with black suits, the new jersey blouses are stunning.

Drastic Changes Seen In New Fall Silhouette

Here are changes you will find as the new silhouettes make their debut this fall. There will be very few if any set-in sleeves. The trend is to deep armhole effects in dolman sleeves, cut all in one with the bodice or blouse top. Bulk above the waistline and slimming of skirts is noted.

Everything is being done to accent lower waistlines, especially with inset belts. Beltless dresses are very new in style stressing sophisticated simplicity.

There will be hosts of pleated fashions that emerge from long-torso lines with pleats manipulated to retain slenderized lines.

Chiffon House Coats

Torrid days call for cool apparel, a need which is filled in very lovely house coats made of pastel chiffons. You can bring the summer to a very happy conclusion wearing one of the very lovely chiffon creations.

PATTERNS SEWING CIRCLE

HERE'S one of those very satisfying everyday dresses that's decidedly out of the ordinary in charm and practicality. The lines are really as good as those of your favorite afternoon dress. The skirt sweeps, from a high, small waistline, to a flare that ensures working comfort and looks pretty besides. You can draw the waistline in as slim as you please, by means

of the back-tied sash belt—and adjust it to give yourself plenty of leeway for reaching, stretching, sweeping, dusting and so on. This design (No. 1360-B) is simple to make and it really is necessary to a busy day.

Checked gingham, flowered percale, plain-colored chambray or seersucker all look very attractive made up like this, with braid and buttons to match or contrast. You'll enjoy following the pattern which includes a sew chart.

Barbara Bell Pattern No. 1360-B is designed in sizes 12, 14, 16, 18, 20 and 40. Corresponding bust measurements 30, 32, 34, 36, 38, and 40. Size 14 (32) requires 3 1/2 yards edging. Send your order to:

NOTICE OF HEARING OF FINAL REPORT AND ACCOUNT In the Probate Court of Lincoln County State of New Mexico

In the Matter of the Estate of Robert J. Hagee Deceased. No. 109

To Mary B. Hagee, his mother, and Thaddeus Alfonso Hagee, his father, George W. Hagee, Little E. Humphrey and William T. Hagee, and to all unknown heirs of the said decedent, and all unknown persons claiming any lien upon, or right, title, or interest, in or to, the estate of the said decedent, and to whom it may concern:

You, and each of you are hereby notified, and notice is hereby given, that Mary B. Hagee, administratrix of the Estate of Robert J. Hagee, deceased, has filed in the above entitled Court her final report and account as such administratrix, and the Court has appointed Monday, the 8th day of September, 1941 at the hour of 10 o'clock A. M., as the hour and day for hearing of objections, if any there be, to the approval and settlement of said final report and account, and the discharge of said Mary B. Hagee as such administratrix, and at the hour on the day named, the Probate Court will proceed to determine the heirship of said decedent, the ownership of his said estate and the interest of each respective claimant thereto and therein and the persons entitled to the distribution thereof.

The name and post office address of the attorney for the administratrix is John E. Hall, Carrizozo, New Mexico.

Witness the honorable Marcial C. St. John, Judge of the said Court, and the seal thereof, this 21st day of July, 1941.

Always With Us

There are two kinds of people—those who do things without making a fuss and those who make a fuss without doing things.—Washington

Tests Indicate 40-Knot Speed for Ocean Liners

Wallsend, England.—Liners which will cross the Atlantic at 40 knots—almost 10 knots faster than the Queen Mary—are foreshadowed by secret experiments now being conducted on Tyne-side.

A firm of shipbuilders is testing a model of a streamlined hull of revolutionary design. It has proved too fast for the Teddington tank of the National Research Laboratory, and to enable it to be tested at full speed, a special tank has had to be ordered.

If the tests are successful, the firm will place on the stocks an ocean-going yacht embodying the new principles.

Engineers believe that the next step will be to build a 40-knot Atlantic liner and destroyers doing up to almost 60 knots. A liner with that speed would cross the Atlantic in approximately three days, compared with the three days twenty-two hours fifty-seven minutes with which the Queen Mary won the record in August, 1938.

Recipe for Happiness One of the secrets of success in marriage is knowing when to keep your mouth shut.—Woman's Home Companion.

ROSWELL PRODUCTION CREDIT ASSOCIATION

The farmers and stockmen of Lincoln County helped swell the loan volume of the Roswell Production Credit Association for the first six months of 1941 to the largest half-year figure in the credit co-op's history, according to B. J. Bonnell of Glencoe, a director.

Reporting \$948,299.05 loaned during the first six months of this year, Mr. Bonnell said a good share of it went to finance seasonal operations of Lincoln County farmers and stockmen. The 1941 figure is \$103,108.37 over the 1940 figure of \$485,190.68 for the same period.

Some of the increase, he said, can be attributed to farmers' increasing production of certain farm commodities to aid the national defense program.

Reports from all over the nation, the production credit director declared, indicate that some time during July some farmer or stockman somewhere in the United States will receive the two billionth dollar to be loaned by a production credit association. Since the Roswell association was organized by farmers and stockmen in the spring of 1934, it has loaned \$8,578,105.00 to finance livestock and general farming operations in Chaves, Eddy, Lea and Lincoln counties.

(Reported by T. H. Boswell, Secretary-Treasurer.)

Service Men

To the men of Lincoln County, whose numbers were drawn in the National Lottery and who are inducted into the Military Services of our country; The American Legion, cordially invites you to avail yourself of every facility of the American Legion and Auxiliary of Post No. 11, Carrizozo. We wish to assure you of our heartiest co-operation and the services of this post are offered in any possible way that may be of benefit to you.

Albert Scharf, Commander, By: Dan Conley, Adjutant.

NOTICE

Several hundred engineering aids are needed by various governmental agencies, the U. S. Civil Service Commission announced today. These Engineering Aids will be needed throughout Colorado, New Mexico, Utah and Wyoming as well as in other areas.

In order to qualify applicants must have had certain engineering training or experience. The amount of training or experience varies with the grade and responsibility of the position.

Applications may be filed until further notice with the Manager, Thirteenth U. S. Civil Service District, 136 New Customhouse, Denver, Colorado.

Applications and the necessary forms for filing may be secured from the Secretary, Board of U. S. Civil Service Examiners at any first or second-class post office in Colorado, New Mexico, Utah, or Wyoming, or the Manager, Thirteenth U. S. Civil Service District, Denver, Colorado.

The Civil Service Commission does not desire applications from persons now engaged in national defense work either in private industry or in a government agency.

In Case of Burns

Medical science often takes time out to explain some of the less intricate curatives to the general public—curatives which anyone can safely use in case of emergency. Arlie L. Moon, M. D., tells in a recent article in Life & Health, the proper treatment for burns: "In the early treatment of mild burns a soothing burn ointment may be quickly applied on gauze dressing and placed over the affected part and held in place with a bandage. One of the newer remedies which is being applied to burns, with apparently very excellent results, is cod liver oil. The vitamins present in this preparation seem to have some effect on the skin, which hasten the healing process.

"If a burn is at all extensive or severe it is best not to apply ointment or any greasy material, as the physician may wish to make use of 5 per cent tannic acid spray, to the affected area, which forms a tough, dark coating over the skin and protects it from the air and hastens the healing process. This preparation is not effective when an ointment has been applied, and the greasy material must first be removed, which is a difficult, painful process. However, baking soda may be moistened with water, which has preferably been boiled, as this renders the water sterile and helps to prevent infection. The water should be warm, and the moistened baking soda should be placed on gauze dressings and applied to the affected area. This will give considerable relief. If the burned area covers a considerable portion of the body, the person may be placed in a tub of warm water, which will give great relief as an emergency measure."

In very recent years, the medical profession has made remarkable progress in the treatment of burns—many severe cases which would have proved fatal not so long ago, are now saved, and disfiguring scars are largely prevented. This is just one of the many chapters in the book of achievement of private medicine in this country.

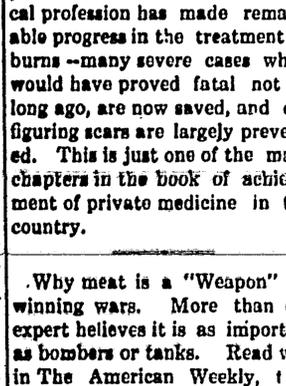

Why meat is a "Weapon" for winning wars. More than one expert believes it is as important as bombers or tanks. Read why in The American Weekly, the magazine distributed with next week's Los Angeles Examiner.

Women's Bureau

The women in industry service, under the jurisdiction of the Department of Labor, was established in July, 1918, as a war measure. In June, 1920, the bureau was given a permanent status by the passage of the creative act under which it now functions.

The Camp in the Valley BY ARTHUR STRINGER

Carol Coburn was a "bush-rat's" daughter, who left Alaska for an education. When her father died on the trail she headed back North, where a shadow had fallen on the claim that should have been here, though she returned primarily to teach in an Indian school. When the school burned, Carol moved to Matanuska Valley, sub-polar land of promise—the latest American frontier—where the government planned its settlement project. And here against this background of fantastic social experiment, Carol's affairs mount swiftly to climax. Sidney Lander, mining engineer, is in love with her, but is engaged to the daughter of his employer. Still another woman is in love with him. There are, indeed, a few threads to unravel, and the author does it skillfully. Don't miss this absorbing story of the Far North—

TRANSCONTINENTAL CABLE... A New Voice Highway for National Defense

A New Voice Highway for National Defense

Across Nebraska, Wyoming, Colorado, Utah, Nevada and California, work is proceeding rapidly on a new voice highway—an all-cable transcontinental telephone line.

Cable crews are equipped with mechanical plows hauled by large tractors. The cable laying train digs a trench about 30 inches deep, feeds the cable into it and back fills the trench in one continuous operation. Protected against ordinary hazards by being underground, the cable is also insulated against rodents by steel tape wound around the cable making it "gopher proof."

Increased facilities provided by this cable are designed to meet any demands that may arise for communication between centers of industry, railheads, troop concentration points and defense centers from coast to coast.

**Navy Competes With Draft Boards**  
**U. S. Civil Service Competitive Examinations**

Assuming that Congress will soon authorize the extension of drafted men for the duration of the emergency, a recent announcement by the Secretary of the Navy will be of interest to young men who are, or who may be, subject to call.

Secretary Knox said: "All men now enlisting in the Naval Reserves will be retained on active duty throughout the period of the National Emergency, but they will be released to inactive duty as soon after the Emergency as their services can be spared, regardless of the length of time remaining in their enlistment. This I will do when the proper time arrives." Signed, Frank Knox.

This means that men who enlist in the Naval Reserves and who do not wish to remain on active duty after the emergency, may expect to be released at approximately the same time that drafted men are released from active duty with the armed forces.

Volunteers for the Naval Reserves may enlist for training in one of the many trade schools operated by the Navy.

See the local Navy Recruiting Officer for particulars.  
 At Carrizozo August 7th, 14th and 21st.

**U. S. Civil Service Competitive Examinations**

The United States-Civil Service Commission announces open competitive examinations for Junior Purchasing Officer \$2000 a year, for employment in various branches of the War Department. Applicants must have had experience in all phases of purchasing work of general supplies in either of two options shown on the examination announcement.

Full further information and the necessary forms for filing may be obtained from the Secretary, Board of U. S. Civil Service Examiners at Fort Stanton, N. M., or from the Manager, Thirteenth U. S. Civil Service District 136 New Customhouse, Denver, Colorado.

Applications must be received in the office of the District Manager before the close of business on August 21, 1941.

How London's show girls really dress on nothing a week. Mr. Arthur "Bugs" Baer, witty commentator, bemoans the fact that they only have 60 clothes ration coupons a year but cheers perceptibly when he sees alluring photographs of how they manage to cling to glamour by making the most of a few beads, feathers and mosquito netting. See the same photographs yourself and read Mr. Baer's own characteristic way of giving these little girls a hand, in The American Weekly, the magazine distributed with next week's Los Angeles Examiner.

Mr. Henry Hoffman came down from Tucumcari and spent Sunday with the family.

**Local and Personal**

Mr. Leon Houston went to Lubbock last Saturday and returned Sunday, accompanied by Mrs. Houston and little daughter, Betty Jo, and their infant son, who was born in the Lubbock hospital July 8, 1941.

Mrs. May Jordan and her daughter, Elizabeth Jordan went to Lubbock last Saturday and visited Mr. and Mrs. Oscar Snow until Sunday afternoon.

Mr. and Mrs. L. L. Benton were Artesia visitors the first of the week.

Mr. Granville Richardson of Arabela was a Carrizozo business visitor this week.

Mrs. R. M. Storey, widow of the late R. M. Storey of Ancho was in town Saturday from her home in Noble, Oklahoma. She was accompanied by her daughter Mrs. Raymond Hobbs of Cedarvale. They left Sunday for Mountainair, where Mrs. Storey visited another daughter and a son.

Mr. L. J. Adams, who is firing at Tucumcari was here the first of this week.

Mr. and Mrs. Coffman, who were visitors at the McMillan home last week-end, were enroute to El Paso where Mr. Coffman was transferred in the Bridge department of the S. P. Railroad.

Mr. and Mrs. Krohme were guests of the Romero and Ted Purcey families the past week end Mrs. Krohme was formerly Miss Jae Romero.

Crawford Garrison underwent a tonsilectomy at the Turner hospital Monday of last week.

**Farm Income to Pass Ten Billion For Current Year**

**Elements Are Government Loans, Purchases and Consumer Demand.**

By FRANK GEORGE

(Released by Western Newspaper Union.)  
WASHINGTON. — Farmers have the best financial outlook in more than a decade. Prices of farm products are the highest since 1937, and farm cash income from crops and live-stock will be the largest since 1929. Costs of farm production also have risen, but in smaller amount than the rise in prices and prospective farm income.

Federal agricultural economists have estimated that farm income will exceed 10 billions of dollars this year. This compares with slightly more than 9 billions in 1940, and with more than 11 billions in 1929. The estimate for 1941 is more than twice the total of farm income of less than 5 billion dollars at the bottom of the economic depression in 1932.

Farm income prospects have been raised this year by the continuing high consumer demand for farm products, the large government purchases of farm products in the Food-for-Defense program, and by recent federal legislation increasing to 85 per cent of parity the rate of government loans on basic farm commodities.

Estimates are that the increase in government loans will add more than \$500,000,000 to farm income this year. This figure is included in the estimated \$10,000,000,000 of total cash income. The higher loans will raise the income of cotton growers by about \$225,000,000 this year over last, and of wheat growers by an equivalent amount.

**Cotton Income to Lag.**

It is pointed out, however, by federal agricultural officials, that whereas the income of wheat growers will be larger than it was in 1929, the income of cotton growers will be much smaller than it was in that year. Cash income from wheat marketed or put under government loan will total \$670,000,000 this year, as compared with \$727,000,000 in 1929. The addition of government conservation and parity payments will raise the income of wheat growers above the 1929 total.

Cash income of cotton growers—from marketings and the cotton put under government loan—may total close to \$900,000,000 this year. This compares with more than \$1,500,000,000 in 1929. Cotton growers also will receive government conservation and parity payments, but not enough to make up the difference between 1941 and 1929 incomes. The much smaller income of cotton growers is accounted for largely by the loss of export markets.

The United States department of agriculture reports that crops and live stock began the 1941 season in unusually good condition, then ran into a period of drought that seriously threatened the Food-for-Defense program, but recently have been doing better. Total farm production may be a little larger this year than last, even though the production of hogs, pork, and lard is smaller.

The federal agricultural expansion program calls for increased production of dairy and poultry products, of canning crops, and dry beans. For a number of months past, the dairy industry has been setting high production records in the output of milk and manufactured products. Poultry and egg output also will be much larger during the last half of this year, than in the same period of 1940.

**Beef to Increase.**

Hog producers are being urged to increase the breeding of sows and to feed hogs to heavier weights. The pig crop was smaller this spring than last, but a sizable increase is expected this fall in view of government assurances as to minimum prices and the favorable ratio of corn and hog prices. Cattlemen are being advised to increase the marketings of cattle this year, and an increase of about 5 per cent in the supply of beef is in prospect.

The latest federal analysis of economic conditions is that the demand for farm products continues to be influenced by the increase in industrial activity and the accompanying rise in consumer buying power.

The government specialists report that prospects are "good" for the production of feed crops this year, and that the total supply of feed may be larger this year than last. They look for a slight increase in production of fats, oils, and oilseeds, but the demand for these commodities is increasing, and prices are much higher this summer than last.

The supply of fruits may be slightly larger this year than last, but the money returns to producers likely will be larger in view of the steadily rising consumer buying power.

**Eastern Indian Uprising in War Dance**

"East Meets West" this month when 36 Indian tribes join in colorful pageantry, symbolic of their life before their white brother touched the shores of America. The redmen gather at Gallup, N. M., August 13-16, not in solemn conclave to smoke the pipe of peace with the "paleface," neither to prove that Mark Twain was wrong, but to don feathers and war paint for a championship Inter-Tribal Indian ceremonial contest. From out of misty American history, these bronzed phantom-like figures will again dance to the throb of crude war drums and the exhortations of their wiled medicine-men. This is the first challenge ever flung, by New York's historic tribe, the Iroquois, to the west and south tribes.

GALLUP, N. M.—Leading ceremonial dancers of the Six Nations of the Iroquois, New York state's historic tribes, have for the first time challenged the 30-odd Southwestern tribes to meet them during the Inter-Tribal Indian ceremonial to be held at Gallup, N. M., the Indian Capital, August 13-16, to compete before a group of Indian judges in any Indian ceremonial dances common to both East and West, for the title of Champion Indian Ceremonial Dancers of North America.

The Ceremonial board was surprised that any Eastern tribes would challenge the colorful ceremonies of Western Indians who have been influenced so little by white penetration of their country. Many of the Western Indians do not speak English and their point of view and customs are known to be strictly Indian as they were before the coming of the white man.

Chief Big Kettle of Buffalo, N. Y., declares that neither time nor education has interfered with the excellence of the steps, rhythm, song or costuming of the Eastern Indians who will show their ceremonies for the first time before the crowds at the twentieth annual Indian Ceremonial at Gallup.

Tribal leaders of the Zuni Indians, who many believe to be the most authentic and finished dancers of the West, and of the Navajos, Apaches, Lagunas, Hopis, Acomas and a score of other Western tribes are anxious to meet the Eastern Indians at the Ceremonial, which will decide the championship, before a competent Indian board of judges.

**Canada Represented.**

Chief Big Kettle will be accompanied by a group composed of Senecas, Onondagas, Mohicans, Mohawks, Iroquois and Cayugas from New York and Canada. Well-known dance leaders among the visitors will be Awl Breaker Cayuga, who is solo dance champion of New York and Canada, Chief Big Kettle, past champion, and Chief Corn Planter, Ceremonial chief of the Six Nations.

Each year the best and finest is presented at the Ceremonial in centuries-old games, arts and handicrafts, and all that is most beautiful and impressive in the spiritual and ethical life of the Indian tribes inhabiting the isolated mountain and desert reservations in the far Southwest.

Renowned Medicine men, dancers and singers of the 30-odd nomadic and pueblo tribes gather at Gallup to perform ancient ceremonial dances and rites of the various tribes.

Each year the Ceremonial association offers cash awards in a consistent effort to encourage Indian craftsmen to adhere to the best traditions of their race and to continually improve their workmanship and the entries for these awards are exhibited in the great Exhibit Hall.

Foot races, horse races, bucking contests, calf-tying, games and the presence of thousands of tribesmen and their families add to the interest in the event.

A roof has been added to the

**English Wheat Farmers May Use U. S. Process**

WASHINGTON.—Sir Quintin Hill of the British food mission, who has been in Washington for some months, is returning to London with full details of a newly discovered American process for separating grain seeds to determine their degree of fertility. If England's farmers should adopt the process, it is estimated that Britain's crop might increase as much as 27 per cent.

new steel stadium which was erected last year with a seating capacity of 4,000.

The program for each of the four days is as follows: August 13, at 8 p. m., Indian Dances, Ceremonial grounds; August 14-15-16, 10:30 a. m., Parade through downtown Gallup; 2 p. m., Games and other events, Ceremonial grounds; 8 p. m., Indian Dances, Ceremonial grounds.

**Grandmothers Club Grows Nationally**

CHICAGO.—One of the country's unique organizations, the "National Grandmothers Club, Inc.," has reached a membership of nearly 2,000, numbering its members either in branch clubs or at large in nearly every state in the Union.

Mrs. Marie K. Brown, for 18 years the head of the women's department of the Baltimore & Ohio railroad in Chicago, is the founder and national president. "To be a grandmother," says Mrs. Brown, "is a crowning experience of life." She, herself, has

Heading the women's department of the Baltimore & Ohio E. R. in Chicago, Mrs. Brown, shown above, also heads, as president, the National Grandmothers Club, Inc., with headquarters in the same city. They have a national membership of nearly 2,000. The members unite for educational and charitable work among children and for local civic enterprises. They also urge a more modern life for present-day grandmothers.

four grandchildren and she is giving all her spare time to extending the work of the National Grandmothers club. One of the chief benefits of the organization is the new zest for life which it has brought to many grandmothers, especially the modern grandmother who doesn't wish to sit all day long in an easy chair, but who in dress and general appearance, is more youthful and active than grandmother was.

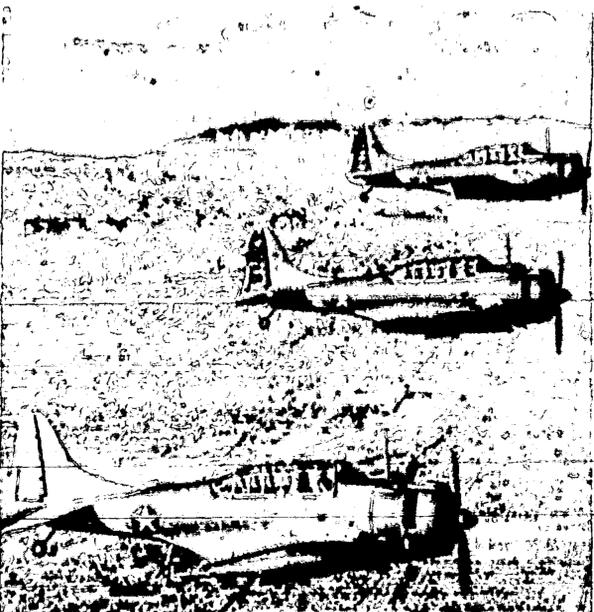

Wherever Grandmother clubs exist they participate in the work of their communities along civic lines and are non-sectarian and non-political. Mrs. Brown was speaking to a gathering of business women in Godfrey, Ill., in 1936, when a telegram brought the news that she was a grandmother. She asked for a showing of hands of the grandmothers present. Next morning she entertained them at breakfast. On two subsequent years they met again at breakfast and then the National Grandmothers Club, Inc., was organized.

**Safe After 12 Days Adrift in Atlantic**

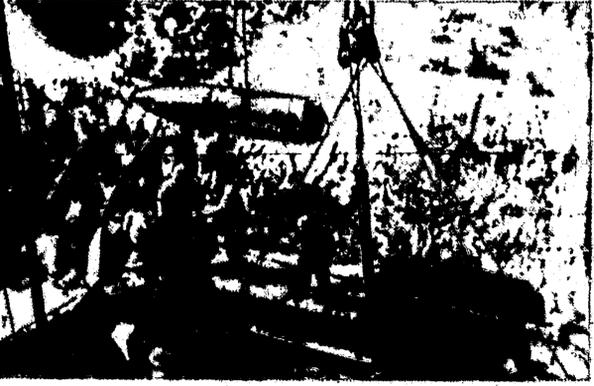

Their ship torpedoed about 400 miles off Greenland while en route to Britain, four Red Cross nurses (shown seated) were landed at Norfolk, Va., after spending 12 days adrift in an open boat in the North Atlantic. Picked up by an American destroyer, they were taken to Iceland for treatment before being returned to the States.

**Superior to German Stukas**

Pictured in flight here are three of the A-24 U. S. Army dive bombers which, army experts say, are better than the Nazi Stukas. The ships are rolling off the assembly lines of the Douglas company at Santa Monica, Calif. The A-24 is a two-place all-metal monoplane, nearly identical to the model SBD-3 dive bombers of the U. S. Navy.

**Torpedo? No, Sir! It's a Pin!**

As much as this might look like a projectile of war, the bullet-shaped gadget is nothing of the kind and is not at all explosive. It is a forged steel pin, 23 inches in diameter, to help hold together two spans of the FM River bridge being built over a future arm of the Shasta reservoir by the U. S. bureau of reclamation, at Sacramento, Calif.

**'V' Girl and 'V' Flag**

Marie Killey, selected as "V" Girl in New York, sitting on huge "V" flag, which bears Britain's victory symbols, letter V and Morse code equivalent, dot dot dot dash.

**Pup Saves Two**

When eight little boys went down to swim in the old swimmin' hole near Memphis they suddenly found themselves in deep water. The Mississippi had washed away a sandbar. Two of the rescuers were drowned. Harold Smith, 11, is shown here with "Poochie," a mongrel dog who saved the boy's life by dragging him out by the hair. The dog also saved "Bubber" Jones, 9, in the same manner.

**New Tin 'Derby'**

The U. S. Army's new "tin hat." It's green and resembles the German Army helmet. It will give better protection to the eyes and neck than old model.

# The Strumpet Sea

By BEN AMES WILLIAMS

© BEN AMES WILLIAMS  
W. N. S. SERVICE

CHAPTER XXI—Continued

"That one left New Bedford no longer ago than yesterday, ma'am. Or it might just be the day before. We're near home."

Mary nodded, dreaming. "We've been a long time shipmates, Mr. Corkran."

"Aye, ma'am, since the day you came aboard at Honolulu. And I was shipmates with himself before that." His eyes were warm. "There was a fine one! Oh, he was a sore trouble to himself, but fair and fine for all that. I loved that little man."

"He'd be proud of you now. You've changed, Mr. Corkran." She smiled. "You were a pagan, once, you know."

"Well, the sea has a way with a man," he reminded her. "It'll make him or mar him, one way and another. Give it long enough and it will show you what's inside him, every time. Look at Peter Corr, for one, ma'am, and himself for another. Not but what I knew from

"We've been a long time shipmates, Mr. Corkran."

the first that himself was a man under all."

After a little, she asked: "Corkran, what do you think Peter meant to do?"

"Meanness, ma'am. Any kind that offered. He was one would do anything for loot, if he could find the spine for it, or get other men to take the risk for him. No knowing now what all was in his black mind. It's sure he tried to talk Reverence himself into killing the Cap'n. With the Cap'n dead, all else would be in Peter's hands. He would have figured so."

"Do you think he meant Cap'n Corr to fall into the pit that day?"

"Like as not! He'd been up there in his own self the day before, after pig; and he must have seen many traps of the like sort in the tussocks. While we were hunting the Cap'n, we found a dozen pits like that one, or less, or maybe bigger; and there was a pig that had fresh fallen in, squealing and grunting in one of them. Aye, the mate might have meant it; but more like he just hoped it. If he'd seen the Cap'n standing on the very lip of the pit, I doubt he'd have had the heart to push him in. It was a trouble to that one that he had not the insides in him to do all the black things he could think of that he'd like to do. He's dead, rest him; but he was a bad one while he lived." He said in a sober judgment: "Let that one be for-

got by every decent man forever Amen. Himself is the fine one to remember, and us be the better for remembering."

"I always will," she whispered. "Aye," Corkran looked at her wisely; but then he said in a new tone: "Himself knew more than most, ma'am. A wise one, that. He knew always more than you might think."

"Well, for one thing, I'm meaning it was a fair fine word he said, to bid me go back and find Cap'n Corr that night; and a brave strong one he was to say it. If he had not bid me go, I'd not have gone; and well he knew it, for well he knew I was his man. And if I'd not gone, Mat Forbes would not. So it was himself sent us back to fetch the Cap'n, and him knowing what he knew about the true thing between the two of you. Aye, it was a grand fine thing for him to do."

She said quietly: "In my arms, at the last, he kept telling me that everything was all right."

"Aye, he would. A man, that." There was a movement aft and he looked that way. Richard had come on deck. Her eyes followed Corkran's, and rested on Richard, and Corkran added quietly beside her: "That was what himself meant, when he told you everything was right. I tell you, he knew."

"Did he, surely?" she asked. "Aye. He knew. When he told me we must go back, he paid the Cap'n a great compliment, ma'am; and yourself too. But you've deserved it, both of you."

She looked at him for a long moment. "How have we deceived it?" she asked slowly.

He smiled at her. "Has the Cap'n said yet one word to you of the thing you're both thinking every minute that you live?"

"No, Corkran."

He touched her arm. "That's how you've deceived the way himself rated you. But—let you not wait too long, nor the Cap'n either. Himself would not want you to wait longer than a fair decent time; and that you've done." And when she did not speak, he said quietly: "Be not uneasy, ma'am. If the Cap'n has not yet said his mind—and his heart—he will."

She met his eyes honestly, smiling a little. "Yes," she said. "I know he will. When we're home." Her eyes were warm and deep. "I know what he will say, Corkran."

"Aye," he assented. "And what you'll say, I'll be bound." He chuckled. "Not that words will be mattering to either one of you."

Richard came toward them, his eyes quickening on Mary as he drew near; but before he reached them, Big Pip called from the cross-trees: "Land ho, Cap'n!" Richard looked up, and Big Pip swung his arm to point. "Dead ahead!" he cried.

A great shout rose, and men went swarming into the rigging to see for themselves the dim blue line on the horizon. Corkran moved forward; but Richard stayed with Mary, and he looked down at her, not speaking. The parrot on Corkran's shoulder watched them standing together, their eyes embracing, forgetting all the world. Head on one side, the bird drawled:

"Mighty pretty."

Corkran lifted the parrot down, held it in front of him so that it would not see them. "And why not," he said in mild chiding; "and what right has a bird like you to peck and peer at them? Himself would have it as it is. Whose business is it an way, but his, and theirs? HUSH!—and ter be."

[THE END]

# Household Hints

by Lynn Chambers

GOLDEN-RIPE JUICY PEACHES FOR LUSCIOUS JELLY (See Recipes Below)

## IT'S CANNING TIME

With food taking on a greater than ever importance under the national defense program, you'll want to make a thoughtful selection for stocking a shelf of extra good jams and jellies for later use. When winter comes you'll glow with deep satisfaction over your canning efforts of the summer.

Since a record breaking peach crop, the third greatest in the history of the country, is expected, plan to put up many, many jars of this golden ripe fruit, not only as jam, jelly, or marmalade, but as conserve combined with other fruits.

### \*Ripe Peach Jelly.

(Makes 6 medium sized glasses)  
2 1/2 cups juice  
3 1/2 cups sugar  
1 box powdered fruit pectin

To prepare juice, pit and crush thoroughly (do not peel) about 2 1/2 pounds fully ripe peaches. Add 1 cup water, bring to a boil and simmer, covered 10 minutes. Add a few peach pits, crushed, to mixture while cooking. Place fruit in a jelly cloth bag and squeeze out juice.

Place the juice over a hot fire, and add fruit pectin. Mix well and continue stirring until mixture comes to a hard boil. Add the sugar, stirring constantly. Bring to a fully rolling boil, boil hard 1 minute, remove from fire, skim, pour quickly into glasses. Paraffin at once.

### \*Peach Marmalade.

(Makes 11 small glasses)  
4 cups prepared fruit  
7 1/2 cups sugar  
1 bottle fruit pectin

To prepare fruit, peel off the yellow rind of 1 medium orange and 1 medium lemon with sharp knife, leaving as much of the white part on the fruit itself. Put rinds through food chopper twice. Add 1/2 cup water and 1/4 teaspoon soda, bring to a boil and simmer covered 10 minutes. Cut off the tight skin of the peeled fruit and slip the pulp out of each section. Add pulp and juice and the juice of an additional lemon to the rind, simmer, covered 20 minutes.

Peel 1 1/2 pounds of ripe peaches. Pit, grind or chop fine. Combine with fruit. Mix sugar and fruit, place in a large kettle. Bring to a boil, boil gently 5 minutes. Stir constantly while boiling. Remove from fire, stir in bottled pectin. Then stir and skim by turns for 5 minutes to cool slightly and prevent floating fruit. Pour quickly and paraffin at once. Preserved pears make a good accompaniment either for the meat course or for muffins and rolls served at luncheon. You'll like:

### \*Pear Chips.

5 pounds pears  
4 pounds sugar  
1/2 pound ginger (preserved)  
4 lemons

Wipe pears, remove stems, quarter and core. Cut into small pieces. Add sugar and ginger and let stand overnight. Add lemons cut in small pieces, rejecting seeds and cook slowly 3 hours. Put into glasses.

### LYNN SAYS:

To test when jelly is done, dip in a clean spoon and hold it high. When the last drop sheets or flakes off the side of the spoon, remove from the fire. Another way which I like too, is to see if two drops drip off the side of the spoon simultaneously. If they do, the jelly will jell.

Fresh fruit which is ripe should be used for jams, jellies, conserves, marmalades, and preserves. Remove any spots or bruises as they may cause your whole batch to spoil. Cook them as short a time as possible so they will retain their lovely colors and look as though they were brought from garden to glass jars.

Pick a rainy day or a day before you start canning to look over your equipment and get it clean for use. Dirty jars should be boiled in soda water and washed in soap suds. Boil old lids 20 minutes in soda water using 1 teaspoon soda to 1 quart of water.

## FOR YOUR JELLY SHELF

- \*Ripe Peach Jelly
- \*Peach Marmalade
- \*Pear Chips
- \*Apple Butter
- \*Gooseberry and Raspberry Jelly
- \*Harlequin Conserve
- \*Recipe Given

seal, label and store in a cupboard. Apple butters have long been family favorites since they're so especially nice for children's lunches or snacks when they come in from playing or a hurry-up batch of filled cookies.

Thick and delicately spicy, apple butter fills the bill and uses much less sugar than jams and jellies.

### \*Apple Butter.

(Makes 6 pints)  
4 quarts cooked and sieved apples  
2 cups sugar  
1 teaspoon cloves  
1 teaspoon allspice  
1 1/2 teaspoons cinnamon  
6 cups sugar  
2 cups cider vinegar

Combine apples, 2 cups sugar, and spices; cook until thick. Add remaining sugar and vinegar. Cook until thick, stirring constantly. Pour into hot sterilized jars and seal immediately. This may also be cooked in a pressure cooker or in the oven to prevent sticking.

Since some fruits do not convert into jelly easily, a commercial pectin is usually employed to make the fruit jell properly. Often fruits which jell easily, that is, those which have sufficient pectin in themselves are used in combination with fruits which do not. Crabapples, unripe grapes, currants, gooseberries, cranberries, quinces, huckleberries, and blackberries jell well. If enough of them are not used in the combination, better use the pectin and play safe.

Here's a bright and quivery jelly which you'll like to have on hand for fair weather or foul. It's a grand accompaniment for chicken or hot breads:

### \*Gooseberry and Raspberry Jelly.

(Makes 11 medium glasses)  
1 quart ripe gooseberries  
1/2 cup water  
1 quart red raspberries  
6 1/2 cups sugar  
1 box powdered fruit pectin

Crush and grind thoroughly the gooseberries, add water, bring to a boil. Simmer, covered, for 10 minutes. Crush thoroughly the raspberries and combine with gooseberries. Place in jelly bag and squeeze out juice. This should make about 4 1/2 cups juice. If there is a slight shortage of juice add small amount of water to the pulp and squeeze again. Put juice into a 5 to 6-quart saucepan. Place over a hot fire, add fruit pectin, mix well and continue stirring until mixture comes to a hard boil. Pour in the sugar. Let boil hard for a half a minute. Remove from fire, skim, and pour into jelly glasses. Add hot paraffin immediately.

Conserves ought to have a place of honor on the canning shelf for there's nothing quite so yummy as these sweet, jamlike mixtures of several fruits delightfully enhanced by nuts and raisins. Serve them forth on relish trays or as garnish on meat platters and they'll make a delicacy of the most humble meal.

### \*Harlequin Conserve.

(Makes 15 6-ounce glasses)  
25 ripe peaches  
10 red plums  
1 fresh pineapple  
1 pound white grapes  
1 orange  
Sugar  
3/4 pound walnuts or pecans

Wash fruits thoroughly. Prepare peaches, plums, and pineapple; cut in small pieces. Halve grapes and remove seeds. Slice whole orange very thin. Cook fruits slowly over low heat until soft. Measure, add 1/2 cup sugar for each cup of fruit. Cook over low heat for 20 minutes, then add nuts. Cook slowly, stirring occasionally until thick and clear, about 1 1/2 hours. Seal in hot sterilized glasses.

(Released by Western Newspaper Union.)

## ASK ME? ANOTHER!

A quiz with answers offering information on various subjects

### The Questions

1. What South American country has a Colorado river?
2. What writer described the Broodingnagians?
3. What is the weight of a gallon of pure water?
4. What is believed to be the oldest city in the world that is still inhabited?
5. The bundle of rods on the back of a dime is called what?
6. What is the largest star known?
7. Is a pound of feathers heavier than a pound of gold?
8. How many names of U. S. Presidents begin with A?
9. If a boat is clinker-built, what is its distinguishing feature?
10. What is a canon in music?

### The Answers

1. Argentina.
2. Swift (in "Gulliver's Travels," the inhabitants of a country where everything is of enormous size).
3. One gallon of water weighs 8.355 pounds.
4. Damascus.
5. Fescues.
6. Antares (90,000,000 times larger than our sun).

## Business Was Going On As Usual Despite Repairs

He was an Englishman and a high-speed salesman who had joined the army, gone into action, and had been seriously wounded. For several days he lay delirious at the base hospital, but eventually he turned the corner, and slowly started the climb back to health.

On the first day of his recovery he was surprised to see all the nurses standing around his bed offering him money.

"Why, what is this for?" he asked. "I do not understand."

"This is for the radios, refrigerators and vacuum sweepers you sold us while you were unconscious," they chorused.

## Lockless Suez Canal

The Suez canal is a sea-level "ditch," requiring no locks. The narrow ditch in the sand runs for 104 1/2 miles through desert and marshy land from Port Said on the Mediterranean to Port Taufiq on the Gulf of Suez. Its channel depth is now 45 feet, and its narrowest width is 70 yards. Although it has been concreted at some places to halt erosion, the banks are chiefly sand or gravel.

The northern half of the canal cuts straight through the desert; the southern half leads through a chain of small lakes which act as "expansion chambers" to help take up the flow of the four-foot tide from the Red sea.

## Our Gold and Silver

Since 1910 the U. S. mints have coined \$1,574,609,149 in silver, and since 1920 they have coined \$4,526,210,470 in gold. The United States stock in gold at the end of the fiscal year in 1940 was \$10,963,030,669 in gold coin and bullion, and \$547,070,371 in silver dollars and \$402,260,015 in subsidiary coins.

7. Yes, Gold is weighed by the troy system, 12 ounces to the pound, while feathers are weighed by the avoirdupois measure (16 ounces to the pound).
8. Three — John Adams, John Quincy Adams and Chester Arthur.
9. Its planks or plates overlap.
10. A canon is a piece of music (usually religious), in two or more parts, echoing each other. An early specimen is "Non nobis, Domine," composed by Birde in the Fourteenth century.

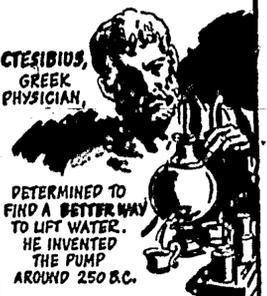

## THE CHEERFUL CHERUB

The wind blows over city streets  
From country mornings  
Fresh with dew.  
It carries songs from trees and birds  
And maybe thoughts from me to you.

WNU Service.

## WE FOUND A BETTER WAY

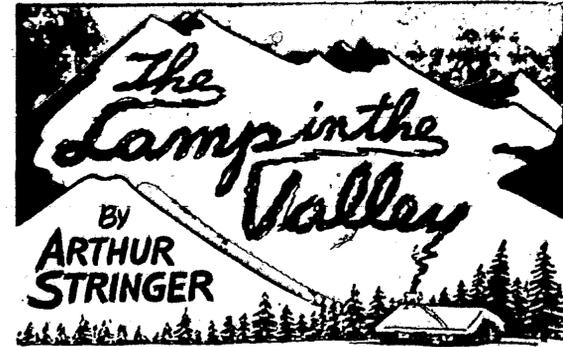

CTESIBIUS, GREEK PHYSICIAN  
DETERMINED TO FIND A BETTER WAY TO LIFT WATER. HE INVENTED THE PUMP AROUND 250 B.C.  
THE BETTER WAY TO TREAT CONSTIPATION DUE TO LACK OF PROPER "BULK" IN THE DIET IS TO CORRECT THE CAUSE OF THE TROUBLE WITH A DELICIOUS CEREAL, KELLOGG'S ALL-BRAN... EAT IT EVERY DAY AND DRINK PLENTY OF WATER.

Early Saving  
The habit of saving, so as to be beforehand with the world, if it is to be acquired at all, must be acquired early.—Earl of Derby, K.G.

Personal Confidence  
The confidence which we have in ourselves gives birth to much of that which we have in others.—La Rochefoucauld.

Carol Coburn was a "bush-rat's" daughter, who left Alaska for an education. When her father died on the trail she headed back North, where a shadow had fallen on the claim that should have been hers, though she returned primarily to teach in an Indian school. When the school burned, Carol moved to Matanuska Valley, sub-polar land of promise—the latest American frontier—where the govern-

ment planned its settlement project. And here against this background of fantastic social experiment, Carol's affairs mount swiftly to climax on climax. Sidney Lander, mining engineer, is in love with her, but is engaged to the daughter of his employer. Still another woman is in love with him. There are, indeed, a few threads to unravel, and the author does it skillfully. Don't miss this absorbing story of the Far North—

**Walter Narvel Storey, Jr.**

Last Saturday we received the following obituary for their son Narvel from Mr. and Mrs. Walter N. Storey of Lookingglass, Oregon. Narvel was very well known here, where he attended school; he was an employe of Mr. Rill at the City Garage for a long time. His young friends and the friends of the family are extremely-grieved at the tragic and untimely death of this popular young man.

**OBITUARY.**

Walter Narvel Storey, Jr., 21, was killed at Foltz sawmill near Tenmile, Oregon, at about 3:46 o'clock in the afternoon of July 25, 1941.

Apparently death came almost instantly when his body was brought against the turning saw by the carriage running in reverse.

He was born at Albuquerque, New Mexico, on June 27, 1920. He lived with his parents, Mr. and Mrs. Walter N. Storey, in Torrance and Lincoln counties. The family moved to Oregon two years ago.

He is survived by his parents, Mr. and Mrs. Walter N. Storey of Lookingglass; three sisters, Gladys and Irene at home, and Mrs. Gertrude Peters of Glorieta, New Mexico; one brother, Richard Storey of Lookingglass, Ore. He was a member of the Christian Church.

Funeral services were held at 2:30 P. M. Sunday, July 27, with Rev. John Barney officiating. Inurnment took place in the Tenmile cemetery.

"Unless we reject God's word, we must receive this truth, and should receive it with joy, for it is the blessed hope of the Church (Titus 2:13). He is coming again!"

**White Oaks News**

Mr. and Mrs. Clay Van Shoyelt of El Paso visited Mr. and Mrs. Wayne Van Schoyck this week.

Guests at the White Murphy Ranch this week are Mr. and Mrs. John Shipley, Mr. and Mrs. Fred Furman, Mrs. Ed Dickerson, Mrs. Thomas Inman and Mrs. Ned Watson, all of Midland, Texas.

Quite a few attended the Camp Meeting on Nogal Mesa.

Mrs. Winnie Roberson of Richmond, Calif., and her sister and brother-in-law of Bakersfield, Calif. visited White Oaks. Winnie and Mildred will be remembered as the Taylor girls.

Deputy Nick Vega and his mother, Mrs. Josefa Vega were in El Paso this week on business.

Dr. and Mrs. Blaney will leave tomorrow for Silver City to attend a meeting of the Associated Southwestern Chambers of Commerce. This will be a business and pleasure trip. He will be in his office here Thursday, August 14th.

Messrs. Floy Skinner and Marion Hust, Southern Pacific water service men, were in Carrizozo Wednesday.

Mr. W. R. Bates became a subscriber to the Lincoln County News last Wednesday.

Mr. Sears Crockett renewed his subscription last Tuesday.

Mrs. Lulu Lewis and daughter, were in town Wednesday buying supplies.

Mrs. Lillie Klagner of San Patricio was in town last Wednesday on business.

**IN THE PROBATE COURT OF LINCOLN COUNTY STATE OF NEW MEXICO**

In The Matter of The Estate of Ysidro Llamas, Deceased } No. 603

**Notice of Hearing of Final Account and Final Report and Determination Of Heirship**

STATE OF NEW MEXICO TO: Petra Marquez and to all unknown heirs of the said Ysidro Llamas, deceased, and to all unknown persons claiming any lien, right of title or interest in, to, or upon the Estate of Ysidro Llamas, deceased, and to all unknown persons claiming any lien, right of title or interest in, to, or upon the Estate of Ysidro Llamas, deceased, and to whom it may concern. GREETINGS:

Notice is Hereby Given, that Pablo Marquez, administrator de bonis non of the Estate of Ysidro Llamas, deceased, has filed his Final Account and Report as such with the Clerk of the Probate Court of Lincoln County, New Mexico, and has filed his petition seeking the determination of heirship and for discharge as such administrator, and the Judge of the Probate Court has fixed the 29th day of September, 1941, at 10:00 o'clock A. M. in the Probate Court Room of the Court House at Carrizozo, Lincoln County, New Mexico, as the time and place for the hearing of objections, if any, to said Final Report and Accounting, and that the said Probate Judge will at said time and place proceed to examine and inquire into said Final Report and Accounting and, if found to be correct, will approve the same and discharge the administrator de bonis non and will at the same time and place determine the heirship and ownership of said decedent's estate and the respective interest of each and all claimants thereto or therein and the persons entitled to the distribution thereof as is provided by law.

That A. B. Carpenter, whose post office address is Box 896, Roswell, New Mexico, is the Attorney for the administrator de bonis non.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed the seal of the Probate Court of Lincoln County, New Mexico, on this the 7th day of August, 1941.

Felix Ramey,  
Clerk of the Probate Court.  
(P.C. Seal)

**Summons and Notice of Pendency of Suit**

STATE OF NEW MEXICO TO Ben N. Coe, also known as Ben M. Coe, impleaded with the following named defendants against whom substituted service is hereby sought to be obtained, to-wit: Ben N. Coe, also known as Ben M. Coe, if living; if deceased, the unknown heirs of Ben N. Coe, deceased; L. A. Johnson if living, if deceased, the unknown heirs of L. A. Johnson, deceased; C. J. Roquemore, if living; if deceased, the unknown heirs of C. J. Roquemore, deceased; and all unknown claimants claiming any right, lien or interest in or to the premises involved adhere to Plaintiff.

GREETINGS:

You and each of you are hereby notified that W. A. Vickers has filed suit against you in the District Court of Lincoln County, New Mexico, in cause No. 4890 on the Civil Docket for the purpose of quieting title in said Plaintiff to the following described property in Lincoln County, New Mexico, to-wit:

The SW1/4NE1/4 and the NW1/4SE1/4 of Section 21, Township 10 South, Range 13, East. N. M. P. M.,

together with all improvements thereon and rights and appurtenances thereunto belonging, Plaintiff alleging that he is the owner in fee simple of said real estate, and that any right, title or interest in or to said property you, or any of you may have is inferior to his title.

You and each of you must appear and plead in said cause on or before the 10th day of September, 1941, or you will be in default and Plaintiff will proceed to secure the relief sought by his Complaint and you, and each of you, will thereafter forever be barred and estopped from claiming or asserting any right, title, lien or interest in or to said real estate.

Frazier and Quantius, 123 West 4th Street, Roswell, New Mexico, are attorneys for Plaintiff.

Witness my hand and seal at Carrizozo, New Mexico, this 24th day of July, 1941.

Felix Ramey,  
Clerk of the District Court.  
(D. C. Seal)
