The great Aurora just a stratosphere "Strip Tease." Lots of queer ideas about what makes the spectacular northern lights, but they're only the sun tearing the clothes off atmospheric atoms miles over our heads. Don't miss this popular science article in The American Weekly, the magazine distributed with next week's Los Angeles Examiner.

Sister Aurelia and Sister Leonardina, who are collecting Sisters for the Albuquerque orphanage, were in Carrizozo Tuesday, on their regular rounds. While here they were guests of the Sisters of Mercy at Santa Rita School.

### Install New Stop Signs

Carrizozo is small, but she keeps abreast of the times. The latest improvement is the new stop signs installed by the City Council at all cross streets and intersections. This is indeed a move in the direction of safety for motorists.

The city has also arranged for an inhalator to be purchased as equipment for the fire department. Mr. Fay Harkney was installed as fire chief after Mr. Beck's departure.

### New Mexico Payrolls Mounted

Albuquerque, Oct. 17 — Indian summer brought a bountiful harvest of dollars to New Mexico as payrolls mounted in all major industries, a report released today by Benjamin D. Luchini, chairman of the Employment Security Commission revealed.

Even the moving picture industry moved into the state to provide employment for hundreds of Indians and add a touch of happy reality to the golden harvest of the season.

While damaging floods cut deeply into the profits of agriculture, those losses were offset by mounting commodity prices and livestock thrived on the bountiful feed that resulted from record rainfall.

The mining industry headed the list of steady payrolls and lumbering stepped up its production pace in an effort to supply mills with ample raw materials to keep them humming through the winter.

Coal mines in the Gallup area increased their payrolls and were operating on greater scale than for many years. Monero coal mines were producing at full capacity, and a slight increase in production was reported at Raton.

All mines in the Silver City area, rushing to fill huge defense orders, were operating at full capacity and the only layoff in that vicinity was on the construction end. New development continued, and prospective new expansion promised to give employment within the month to the 35 men involved.

Mining companies operating near Silver City established a new advanced training system which will upgrade workers more rapidly and make for greater utilization of the local supply of labor and add to the younger workers' earning capacity.

### Birthday Party

Last Saturday afternoon, Mrs. Henry Hoffman entertained in honor of her daughter, Mildred's birthday. The honoree received a number of pretty and useful gifts. Games were played and prizes were given the winners. Prize for girls was won by Joy Dawn Bigelow. The boys prize was won by James Baxter. The birthday cake was baked by Mrs. R. J. Richard. Refreshments were elaborate and delicious.

Following guests were present: Janet Shafer, Hope Snow, Adelin Stokes, Donna Betty and Dick Brewster, Patricia and Joy Dawn, Patricia McCall, James Baxter, Janis Jenne, Betty Jo Houston, Dorothy Ferguson, Betty Lou and Kathleen Ward, Margaret Shrum, Era Berry, Betty Mosk, L. D. Cochran, Bertha and Sonny O'Kelly, Helen Jean Kelt, Clara Louise Ervin, Frances Degner.

### Name Stamp Foods For October

Announcement of the U. S. Department of Agriculture's blue stamp food list for October marks the 17th month of food stamp plan operation in New Mexico.

During October, according to Jennie M. Kirby, State Welfare Director, approximately 7,555 families receiving or eligible to receive public assistance will purchase \$115,057.00 of orange food stamps and receive \$57,528.50 of blue food stamps free.

The blue stamps are exchangeable at retail food stores for any of these commodities listed on the October list. Corn meal, shell eggs, raisins, dried prunes, hominy (corn) grits, dry edible beans, wheat flour and whole wheat (graham) flour, enriched wheat flour, enriched self-rising flour, fresh apples, fresh oranges and all fresh vegetables, including potatoes.

Orange food stamps are also exchangeable at retail food stores for any and all foods for human consumption.

"Increased food consumption made possible through the food stamp plan guarantees a present and future domestic market to farmers everywhere," said Donald F. Clark, Acting Area Supervisor of the Surplus Marketing Administration. "In addition it helps the nation attain the defense goal of 'make America stronger' by placing healthful, nutritious foods in the homes of under-consuming families."

New reasons why people still believe in "Vampires." Arsenic eating, which preserves corpses in life-like semblance, found to be the basis of stories of the "Undead," who sleep all day in their graves and steal out at night for their Satanic meals. Read this surprising and scientific explanation of an old myth, in The American Weekly, the magazine distributed with next week's Los Angeles Examiner.

The Rainbow Girls are giving a box supper at the Community Center Building tomorrow evening. Supper at ten p. m. Dancing, Chinese checkers and other games can be enjoyed by the visitors. Bring your boxes ladies as this is to be the premier entertainment of the season.

Committee. Mrs. R. J. Richards was an El Paso visitor Tuesday.

### HIGH SCHOOL NOTES

Grade cards for the first six week period were issued Wednesday. Throughout the grade school grade cards were issued under direction of teacher of the grade. In high school grade cards are issued under direction of class sponsors as follows: Freshmen, Mr. Clyde O. Brewster; Sophomores, Miss Nina Lee Cavener; Juniors, Miss Lou Collins; Seniors, Mr. Frank Martinez.

Parents and other interested parties are invited to visit school. Often the work of student would be greatly improved if both parents and teachers would cooperate in planning the students work.

Minnie Pino a popular sophomore is seriously ill in Ft. Stanton Hospital. We hope for her speedy recovery and return to school.

Clarence Brookhart of Tularosa high school who received a minor injury in the Tularosa-Carrizozo Football Game has fully recovered and returned to school.

School will be dismissed for the New Mexico State Educational Association. Miss Lou Collins represents the Class room teachers of Carrizozo in the State Educational Council.

The First grade of Santa Rita School under the able direction of Sister Mary Pauline R. S. M. presented a splendid program Monday at 2:30. The program commemorated the coming of Columbus to America.

The All-School Carnival under direction of Mr. Ripley and Mr. Martinez is taking form and will be staged last of November. This will be the time to begin Christmas shopping because the committees are securing the finest list of goods that was ever used at such an event.

Our Music Department continues to be called upon for service to the various clubs of the community; Wednesday evening when the Business Men banqueted the Teachers and again Friday at the Carrizozo Women's Club.

Since the recent Hondo floods, the Rev. and Mrs. John L. Lawson are residing in Nogal.

### Notice for Publication

Department of The Interior

General Land Office at Las Cruces, New Mexico, October 10 1941.

Notice is hereby given that Abram B. Helms, of Oscurro, New Mexico, who, on December 10, 1936, made homestead application, No. 050599, for S 1/2 NE 1/4 NW 1/4 NE 1/4, SE 1/4 NW 1/4, S 1/2 Section 29, Township 7 S., Range 6 E., N.M. P. Meridian, has filed notice of intention to make three year Proof, to establish claim to the land above described, before Wayne Zumwalt, Notary Public, at Carrizozo, N. Mex., on the 28th day of November, 1941.

Claimant names as witnesses:

S. H. Dillard, Jess Dillard, Elmer Wood, Albert Wood, all of Oscurro, N.M. act. 12/29/16 to Gr. Service 10/10/41 Paul A. Roach, Register.

APPLES Stark's delicious Apples \$1.00 Per Box BRING BOXES See L. R. Hunt at Nogal, N.M.

### Who's Who And Where In The Service

With the hearty cooperation of this News Paper, the Local Board and the Citizens of Lincoln County, the American Legion Post No. 11 of Carrizozo will list each week a number of service men from Lincoln County giving their full service address, as follows:

K. 67663, George Strauss, No. Demonstration Platoon, Canadian Training School, Borden, Hants, England.

Pvt. Saturnino Chavez, Hq. & A. C. R. C. T. Sheppard Field, Wichita Falls, Texas.

Irl Hemphill, Naval Academy, Annapolis, Maryland.

Gene Dow, 37th., Sch. Sq. Ft. B. Bldg. 412, Chanute Field, Rantoul, Ill.

Bradley Moberly, Co. 41-118 U. S. N. Training Sta. San Diego, Calif.

Nick Torrez, 180th., Inf. 45th, Div. Ragley, La.

Lellon Barnes, 200 Coast Anti-Aircraft, Bat. E. Coast Artillery, Fort Stratsburg, Pampanga, P. I.

Cpl. Jack Claunch, 65th., Air Base Sq. (Special) Ellington Field, Texas.

2nd., Lt. Carl A. Freeman, Camp Roberts, Calif.

Robert Bowlin, Tr. A. 91st. R. C. N. Sq. Ft. Bliss, Texas.

Let all of us show our appreciation for the services these boys are rendering our country by writing to them regularly. The boys who hear from the folks at home have an interest in life, in their work and are encouraged to do their best. The efficiency of any armed force is dependent on the moral support of those it would defend. Let's give ours this support. We ask that friends or relatives of any of our boys who are in the service send their correct service address to the American Legion, Carrizozo, so that their names may be included in this column.

Dan Conley, Post Adjutant.

### Notice

STATE ENGINEER'S OFFICE

Number of Application 2423, Santa Fe, N. M. October 14, 1941.

Notice is hereby given that on the 14th day of October, 1941 in accordance with Section 26, Chapter 49, Irrigation Laws of 1907 The Village of Capitan, County of Lincoln, State of New Mexico, made formal application to the State Engineer of New Mexico for a permit to appropriate the Public Waters of the State of New Mexico.

Such appropriation is to be made from Padilla Springs by means of two 4 inch steel pipe lines and concrete collection gallery at a point which bears South 74° 45' West, 2.8 miles to the North 1-16 corner of NE 1/4 of Section 34, T. 8 S., Range 15 East, being in the NE 1/4 NW 1/4 of Sec. 30, T. 8 S., R. 16 East, N. M. P. M. and 0.72 cu. ft. per sec. to be conveyed to The Village of Capitan by means of two 4 inch pipe lines and there used for Municipal uses between the dates of January 1st and December 31st of each year.

Any person, firm, association or corporation deeming that the granting of the above application would be truly detrimental to their rights in the water of said stream system shall file a complete statement of their objections substantiated by affidavits with the State Engineer and serve a copy on applicant on or before the 18th day of December, 1941, the date set for the Engineer to take the application up for final consideration unless protested. In case of protested applications all parties will be given a reasonable length of time in which to submit their evidence in detail or arrange a date convenient for a hearing or appoint a referee satisfactory to all to take testimony. Appearance is not necessary unless advised officially by letter from the State Engineer. Thomas M. McClure, State Engineer.

Oct. 17-Oct. 21.

## \$400,000 For Highway 54

According to press reports, Highway 54 has been included in the state program for grading and drainage of 33 miles, between Carrizozo and Tularosa. This project has received the priorities approval of the Federal Bureau of Public Roads, and will cost approximately \$400,000.

Mr. Burton Dwyre, State Highway Engineer has just returned from a National Convention of Highway Officials held in Detroit Michigan. He said that he did not think that the new policy decree issued by the Supply Priorities and Allocation Board would have much effect upon the states program. He also said that bridge construction where much steel is required would probably be curtailed.

Under a proposed distribution of \$218,600,000 by the Federal Roads Administration as announced Monday, New Mexico would receive \$3,600,000 for strategic roads projects. The Government would provide approximately 90 per cent of the cost in states where public lands still exist. This money would come from \$267,000,000 of unused or unapportioned funds on hand for distribution among the states in December.

This is the time to act if we are to get our share of this \$3,600,000 for the improvement of Highway 54. All civic organizations should contact the proper officials, or write letters stressing the advantages of Highway 54 as a strategic access road.

Frank A. English is among some 5,000 students who have enrolled at Syracuse university for the fall semester of the University's 72nd academic year. A junior in the College of Medicine, English is a graduate of Carrizozo High school.

Mr. and Mrs. Noel McDaniel went to the mountains Tuesday fishing, and returned home yesterday.

Sgt. Robert Skinner came up from Fort Bliss and spent the weekend here and at Angus.

Mrs. Frances Payne came up from El Paso Tuesday and returned Wednesday.

Jimmie Payne came down from Angus and spent the week with his aunt, Mrs. Winzell Riekerson.

Mr. Louis Laws night yardmaster is being relieved by crew dispatcher Cody of El Paso this week. Mr. Laws will vacation in California.

Last week's Alamogordo News contained a notice of the death of Mr. M. I. Hunt, age 70, who was a former teacher in the Carrizozo schools. Mr. Hunt is survived by his widow, Mrs. Mabel Hunt who was also a teacher here. Funeral was held in Alamogordo Wednesday, Oct. 8th by Rev. W. H. Martin of Fort Stanton.

### KNOW YOUR BANK

## How Important is a Bank to its Community?

Picture a "bankless" community... no safe place for funds, no place to borrow, no way to transfer money quickly, none of the countless conveniences provided by modern banking. Obviously, a progressive community must have a progressive bank. Our basic policy is one of supplying services that will adequately meet the community's needs. We would like to have you make our bank your bank.

DiMaggio Scores Winning Run in Series

Joe DiMaggio, San Francisco's stellar contribution to "murderer's row," is shown sliding into the home plate with the winning run in the Yank half of the ninth inning of the fourth game of the world series, at Ebbets field, Brooklyn, N. Y. Henrich, who scored before him, stands by as umpire Goetz calls the play. Dodger catcher Owen got the ball too late. In this game the mighty Yankees beat the Brooklyn Dodgers 7 to 4.

Governor Weds

Arthur H. James, 58-year-old governor of Pennsylvania, is shown with his bride, the former Mrs. Emily Radcliffe Case, 48, widow of a member of the Cornell university staff, after their marriage in Doylestown, Pa. Only 150 guests attended, in line with the governor's desire for a quiet, unpretentious ceremony. The Rev. William Steckel of New Ipswich, N. H., married them.

Europe Looks To U. S. Farms For Food in '42

To Ask Increased Production Of Most Farm Products Over 1941 Record.

By L. G. ELLIOTT  
President, LaSalle Extension University

NEW YORK CITY.—"Arsenal for the Democracies" is the role which is being enacted by the United States in the present world conflict. The far-flung industrial activity which has resulted has made itself felt in every section of the country and in every type of enterprise. So far, the effect felt by the farmers has been principally the indirect result of increased purchasing power created by the up-swing in industrial production.

Prospects for the immediate future, however, are that the American farmer will be called upon to contribute just as directly as do the munition makers today. According to the department of agriculture estimates, 10,000,000 persons abroad will be dependent upon exports from the United States for their sustenance. In 1942, farmers will be asked to increase production in certain crops even beyond that of 1941, one of the most productive years in history.

With the exception of certain crops such as cotton, wheat and tobacco, which will continue to be curtailed because of large surpluses and loss of some important foreign markets, most major crops will be needed in larger quantities. The leaders will be livestock, dairy products, eggs and vegetables—the very products which have been adding most to the increased farm income of 1941. With the gains experienced during the first six months of this year and the estimated \$1,000,000,000 increase in farm income estimated for the last six months, the total farm income for 1941 will exceed \$10,600,000,000 compared with only slightly more than \$9,000,000,000 for 1940.

It is expected that present price levels will at least be maintained if not increased to some degree. Even based on today's prices, the increased production schedule will boost the farm income in 1942 to a higher figure than any year since 1920. Dairy farmers have been averaging 20 per cent more income this year than a year ago and the goal for 1942 in this branch of agriculture is a still further 8 per cent increase. The schedule for 1942 hog production is for better than 11 per cent increase over 1941, or 80,000,000 head as compared with the 71,000,000 pigs slaughtered this year. Seventeen per cent more cattle are now on feed in preparation for the new increased markets.

It is not expected that the new demands for farm products will result in the dislocations which are bothering some lines of manufacturing and some communities where manufacturers have had to curtail operations because of their inability to secure certain raw materials. The industrial picture as a whole is decidedly favorable. The national trend is still upward and payrolls as well as production are steadily rising. Many industries such as steel and machinery are not only operating at close to present capacity, but are constantly adding new plants. The effect of industrial prosperity is felt directly in the cities and the resultant better markets still further increase the demand for manufactured items as well as farm products.

At the present time, approximately 20 per cent of the income received by all persons emanates from defense spending. This now aggregates more than \$1,000,000,000 monthly and the next few months will see this increased to a still higher figure.

U. S. 'Non-Combatants' Corps in England

The above picture shows a group from the first American civilian technical corps as they arrived "somewhere in England," recently, for non-combatant duties in the British armed forces. They are all trained automobile and radio technicians, and seem happy, despite the rain which falls frequently in the British Isles.

Soldiers Depend on Quartermaster For Food, Shelter and Transportation

ATLANTA, GA.—The army has a name for the vast, intricate and vital Quartermaster corps activity. They call it logistics. For the man on the street, the term is readily understandable when translated as a design for living.

How soldiers live, are quartered, supplied and, in this day of mechanized warfare, how they are transported is something John Q. Citizen can comprehend when he puts it on the same plane which he designs for his own comfort and ability to move about.

What the Quartermaster corps does for more than a million and a half soldiers John Q. Citizen must do for himself. His design for living is only multiplied by the army but somewhere in the multiplication the army tacked on the term logistics, which the dictionary defines as "that branch of military art which embraces the details of transport, quartering and supply of troops."

So John Q. Citizen begins to understand logistics when he compares it to the possession and operation of his motor car; tenting and furnishing of his home; supplying his family with clothing, groceries, meats, vegetables and other necessities of life, even down to the ice box in summer and filling the coal bin for the winter.

Not many citizens who maintain and own their own automobiles could orient their daily lives in these times to a new design for living which did not include control of their motor cars. The housewife, to whom the Quartermaster corps often has been compared, recognizes the necessity of having the automobile ready for instant use when it comes time to meet the 5:15 bringing hubby home from the office. Mrs. Citizen isn't at all in favor of calling her neighbor on the telephone and asking use of the neighbor's motor car to fulfill a responsibility which she has long recognized as her own.

The army in its plan of logistics calls for a simplified system on the service of supply to the front lines with Quartermaster corps not only responsible for assembly of supplies, but to insure their arrival responsible also for transportation.

Motor Service Station. To meet this motor transport problem the Quartermaster corps is moving with tremendous speed in establishing regional motor maintenance districts throughout the country. Facilities are being installed at a central point in interlocking hundred mile circles to keep each motor vehicle in first class condition and uphold the Quartermaster corps slogan, "Keep 'em Rolling."

Like the housewife who demands her automobile be ready when she wants it the Quartermaster corps has pledged that no motor vehicle shall remain out of service because of damaged or worn out equipment. Instead the quartermaster will remove the damaged part and install in its place a new one, sending the damaged equipment to the regional depot for repair but keeping the motor truck in service for the troops and live up to the demand to "Keep 'em rolling."

Logistics, or design for living, so closely links the operation of the transportation with the service of supply that there is scarcely a citizen who does not see the parallel to his daily life in the activities of the Quartermaster corps.

Variety of Duties.

The quartermaster not only is the ice and coal man, but he is the haberdasher, the restaurant man and the hotel keeper. He runs the taxi service and operates the trucking, transfer and storage business as well. He is the garage man and the operator of the gasoline filling station; the railroad ticket agent in addition to being the train dispatcher. He is the garbage collector and the second hand salvage dealer. He operates the laundry and shoe repair shop in addition to conducting the clothing store and managing all the live and tens.

All of a city's public utility facilities the Quartermaster corps furnishes for the colder much in the manner which a city manager, or the mayor and board of selectmen or aldermen of a city, conduct those functions in a community. He provides the water supply, and the sewage disposal; he runs the electric light plant, paves the streets in camp, builds parkways and operates the fire department.

Only the war-time essentials of these duties does the Quartermaster corps take with it in providing the design for living for troops in a theater of action. To execute behind the lines these requirements of transport, quartering and supply the army always has selected the highly trained Quartermaster corps and given to the duties demanded under that selection the term logistics which comes from the Greek word "logistikos" which has as its root the word "logo" which means to select.

Claim Gifted Child Neglected by Schools

EVANSTON, ILL.—Is there a young genius in your home? There could be, whether your income tax is thousands of dollars a year or you don't know where the next month's rent is coming from.

This is the report of Dr. W. Drayton Lewis, assistant professor of psychology at Murray State Teachers college, Murray, Ky.

Dr. Lewis studied 50 of the most brilliant children in a group of 50,000 selected from schools all over the country—each a "one-in-a-thousand" child on the basis of intelligence tests. All had IQ's over 145—100 is "normal."

"It is tragic," Dr. Lewis said, "that these gifted children are so mistreated in the schools. Our educational system neglects the most promising students. Only one boy in five and two girls in five of the outstanding group were characterized by their teachers as being precocious or mentally quick. Two of them were even called dull or mentally sluggish. These children, who rate one in a thousand among their classmates, are not even recognized by their teachers as bright, because the educational system keeps them down to the level of the average."

The economic status of the children's homes, Dr. Lewis reported, varies from poverty to affluence, and the social status is equally divergent.

"These exceptionally intelligent children," he said, "can be expected in any type of home. The fathers come from all levels of society. They are high school principals, army officers, doctors, ministers, mercantile men, government employees, farmers, barbers, truck drivers, mill hands, factory workers, and common laborers." In fact, they are from all walks of life.

Navy Secretary Visits Bermuda Outpost

Secretary of the United States Navy Frank Knox recently visited Bermuda, an important U. S. naval base in the Atlantic. This official navy photo shows the secretary reviewing the sailors aboard the U. S. S. Augusta.

Confer With President

Sir Ronald Campbell, left, acting British ambassador, and Sir Shanmukham Chetty, head of purchasing commission of India, pictured as they called on the President.

Brawn and Co-ordination for Flying Men

It might be just another physical ed class on another college campus, but this time it's aviation cadets at the "West Point of the Air," Randolph Field, Texas, who are building muscular co-ordination and body control. An hour a day of callisthenics and outdoor games keeps these prospective flying officers in trim.

1941 Infantryman

Sergt. Dan Rosser of Fort Benning, Ga., poses as the U. S. infantryman of 1941, with new type steel helmet that combines the best features of the British and German types. Loose fitting breeches and comfortable puttees are worn.

Guarding the Life Line to British Shores

A striking photo is the above, taken somewhere in the Atlantic, and showing the guns of the British destroyer Heiderman on guard over a convoy of British supply ships as they make their way across the sublimated waters of the Atlantic. These ships with their holds laden with war supplies and food are the lifeline of the British.

Defense Volunteer

Mrs. Franklin Roosevelt walked to work in the DuPont office building in Washington, where she began work as assistant director of civilian defenses in charge of women's activities. Mayor LaGuardia of New York (shown) inducted Mrs. Roosevelt into office.

Farm Conditions Improve

LaSalle Map of Business Conditions

Plans for increased farm production, in all major products, except cotton, wheat and tobacco, which will lag due to surpluses and present lack of market, are prevalent over the entire country. In the front rank will be livestock, dairy products, eggs and vegetables, present chief source of farm income.

Plan Shops to Repair Army Clothing and Equipment

WASHINGTON.—Clothing and equipment repair shops designed to serve from 20,000 to 40,000 men and operated by 50 civilian experts soon will be opened at 26 army camps.

Divided into five sections, the standard repair unit will handle clothing and textiles, leather footwear, rubber footwear, mattresses and pillows, and tentage.

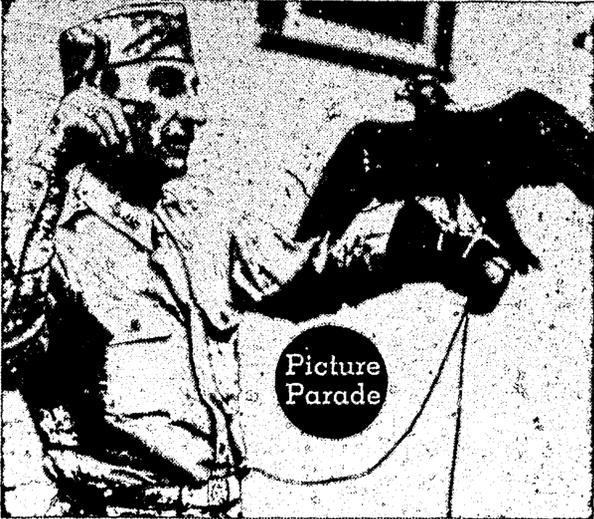

Most of the shops will be established in existing structures at the army camps where they are to be used, and floor layout plans will vary. To make the necessary adjustments as easy as possible, all items of machinery to be used at the shops will be equipped with individual motors.

The repair of shoes is one of the biggest jobs for the new units.

Next in amount of repair work to be done is the clothing and tentage section. The repair of overcoats, tentage, mattresses and pillows, will demand relatively small space.

## Feathered Fighters for U. S.

Falconry, one of the oldest of the world's sports, is to be given a try-out as a military weapon of the United States. There is little doubt that peregrine falcons, properly trained, could be used as ideal interceptors for carrier pigeons used by the enemy. To handle these feathered draftees a number of soldiers are being trained as falconers, under Lieut. Thos. MacClure. These photos were made during a falconry demonstration at the Bronx Zoo, New York.

Lieut. MacClure "gentles" (gets it accustomed to being handled) "Thunderbolt," the first falcon to join the U. S. army signal corps. Falconers are found in big cities roosting on ledges.

A keeper at the Bronx zoo is about to hood a golden eagle. The leather hood is to keep it from seeing until the falconer wants it to see. Then it is taken off. Each day the falconer must spend an hour or so with the hooded bird on his wrist. Stout leather thongs called "jesses" are attached to the bird's legs.

Above: Hood removed, the zoo eagle is shown in flight here. The bird is returning to the keeper's wrist. The light rope attached to the "jesses" is to keep the bird from going after pigeons and sea gulls. Right: A closeup view of the hooded eagle. The plume in front is just an ornament.

The eagle has made his perch and is about to rest. For army use it would be difficult to train enough eagles, even if there were enough.

## New Date Frocks Add Rhythm To College Girl's Wardrobe

By CHERIE NICHOLAS

PROBABLY "full credit for chic" won't be listed on college report cards this fall, but it's one course that is getting plenty of "cramming" the country over, as college girls settle down to the routine of classroom and campus life.

According to a recognized authority who annually advises hundreds of college girls on how to buy and how to wear clothes, as part of the functionalized "how to live" curriculum on a Midwestern campus, grooming has a significant influence on the adolescent girl. There is a relationship between success and a feeling of well-being which springs from the knowledge that one's best self is being expressed through the proper habits of posture, dress and general bearing.

"Wardrobe rhythm" is the way this authority describes the proper assemblage of clothes that are adequate for all occasions. Being well dressed on a modest budget is a matter of wardrobe integrating. One of the weaknesses of the average American girl is that she buys a one-occasion dress or an eye-appealing number on the spur of the moment without giving any thought to how it will fit into her general wardrobe scheme.

The girl who wants to assemble a wardrobe that will be adequate for all occasions should decide on a color scheme for the season and stick to it. She should select frocks, ensembles, suits, coats and accessories that are interchangeable, meanwhile being sure that a dress or ensemble is suitable for wear on a variety of occasions. Variety can be achieved with bright belts, bags

and carefully selected costume jewelry.

If you are planning a basic fall and winter wardrobe on a limited budget you might include a gray or tan herringbone tweed man-tailored jacket with a matching bias-cut skirt, a campus coat of bright red and gray or tan and green wool plaid lined with gabardine for general utility wear, a wool "dressy" dress for dates and those "special" occasions, a wool reefer in gray or brown to harmonize with the skirt of the suit or to be worn over the wool dress and a separate blouse-and-skirt dinner dress. These items, with a collection of sweaters and blouses, will keep you looking smart on all occasions.

Three simple "date" dresses that will major in chic for all more or less dress-up occasions are shown in the illustration. For "five and after" the "good little black dress" is ever a loyal standby. The tea dress of black crepe, left, with its long torso line accented by scallops and its American beauty red velvet bow at the neckline, should win high honors. The tricorn hat adds just the right note of dash.

Off to the movies? Wear the "date special" shown to the right and you'll steal the show. It's tan with brown passementerie across the square neckline and around the waist. And the skirt—well, it looks as though the dirndl is here to stay. A characteristic feature of this season's fashions is the importance attached to light wool daytime dresses in oatmeal, tan, beige, muted greens and dusky browns. The emerald-green tulle dinner dress in the center, above, should be a "come" signal for the stagline. The frock with its slimming torso line ending in a peplum will be voted an ideal basic evening dress. (Released by Western Newspaper Union.)

### Feature Ensembles In Costume Jewelry

It is a season of pretentious, important-looking costume jewelry. The massive sort predominates, such as huge wide bracelets with massive necklaces. Great clusters of colored stones or rhinestones form spectacular lapel pieces. Topaz and amber are in high fashion, to wear with autumn browns.

The newest effect comes from three separate pieces, varying in size but otherwise identical, that clip to dress or coat lapel in groups. Matched to these are earrings, bracelets and often finger rings.

### Jet Gives New Sparkle To All Black Ensemble

For the sophisticate who likes to "say it" in terms of smart apparel there is an avenue of approach that leads directly to heights of modernism. It is the "black as a crow" ensemble that is being exploited this season among the ultra fashionable. To achieve this your black crepe or jersey dress is flecked with jet, intensified with jet passementerie at throat and sleeves. A tiny jet hat with a snood at the back or a drape carries out the theory of seductive black. Gloves are black, and wispy sheer black silk hose are worn with black suede shoes. The hand bag is either jet embellished or of classic suede to match the shoes.

### Use Lace Trim

Now that peplums and tiers and flounces and overskirt effects are in fashion, designers are enhancing them with edgings of either black or white lace. Lace yokes are also being featured. Removable, very sheer lace gumpes are sold at the neckwear counters.

### Campus Favorite

Blouses! You can't have enough of them! Here is a beauty. It is one of the most stunning campus originals brought out this season. It has long full sleeves, a round, high neck, fly-front fastening and double button-over pockets that are very new. It carries a convincing message of "style" told in terms of sophisticated simplicity. The colors are luscious pastels to contrast with dark fall clothes.

### Little Folks to Wear

No more winter chill for little folks, the latest news being to the effect that long stockings in bright colors will be worn again. They are arriving in bright attractive colors that will make appeal to little girls who have an eye for pretty, as well as practical apparel

## PATTERNS SEWING CIRCLE

### Ton of Scrap Iron

According to an estimate by army ordnance officers, a ton of scrap iron collected in this country could be made into: One 75-millimeter field-gun, or the carriage for such a gun, or 12 machine guns, or nine 500-pound demolition bombs, or one 2,000-pound, 10-inch battleship-piercing shell.

If you have a relative or friend in the service and have any doubts about what to send him as gifts, your problems are over. The service men have solved it for you by naming tobacco as their first choice in gifts. Actual sales records show the favorite cigarette with men in the Army, Navy, Marine Corps, and Coast Guard is Camel. Prince Albert is the popular smoking tobacco. With these preferences in mind, local tobacco dealers feature Camels by the carton and Prince Albert in the pound tin as ideal gifts to the men in the service from the folks back home.—Adv.

NOTICE OF ELECTION  
of Supervisors To Be Held  
For The Upper Hondo Soil  
Conservation District**

To all owners of land lying within the boundaries of the UPPER HONDO Soil Conservation District, notice is hereby given that on the 25th day of October, 1941, between the hours of 9:00 A. M. and 4:00 P. M. an election will be held for the selection of 3 supervisors for the Upper Hondo Soil Conservation District of the State of New Mexico. Voting places will be opened within the said district at the Capitan Grade Gymnasium, the Glencoe Community Building and the Hondo Gymnasium.

The names of all who are nominated according to law, by petition of at least 10 landowners, before the 11th day of August, 1941, will be placed on the ballot.

All persons who own lands lying within the boundaries of the said district are eligible to vote. Only such persons are eligible to vote.

Owners of land in the UPPER HONDO Soil Conservation District who cannot appear in person to vote at one of the polling places may receive absentee ballots by requesting same from Mr. O. B. Shook, Election Supervisor, Capitan, New Mexico.

State Soil Conservation Committee.

**Auxiliary Notes**

The regular monthly meeting of the American Legion Auxiliary was held at the community Center Building, October 11, 1941. Dinner was served at 7:00 o'clock to the Legion by the members of the auxiliary.

The business meeting thereafter consisted in the reports of various committees. The Benjamin I. Berry, No. 11 Unit of the Legion and Auxiliary were the first in the state to submit the quota of members to the State Headquarters.

Reports were made on various donations contributed by the music department of the High School, and to needy families during recent flood in Ruidoso.

After a general discussion of various activities, the meeting adjourned. All meetings in the future will be held at the community Center Building.

On October 9, Mrs. Dewey Stokes held a tea in honor of Mrs. Roy L. Cook, National Vice-President, Western Division. The Auxiliary ladies attended and spent an enjoyable afternoon with Mrs. Cook discussing problems pertinent to the work of the American Legion and Auxiliary.

ORDINANCE NO. 14 AN ORDINANCE DECLARING THE NECESSITY OF ISSUING BONDS OF THE VILLAGE OF CAPITAN, NEW MEXICO, IN A PRINCIPAL AMOUNT NOT EXCEEDING \$45,000, FOR THE PURPOSE OF ACQUIRING, BY PURCHASE, AN ELECTRIC LIGHT AND POWER SYSTEM FOR SAID VILLAGE AND ITS INHABITANTS, SUCH BONDS AND THE INTEREST THEREON TO BE PAYABLE SOLELY FROM THE NET INCOME OF SUCH SYSTEM AND PROVIDING FOR THE ISSUANCE AND PAYMENT OF SUCH BONDS AND THE INTEREST THEREON.

WHEREAS, The Board of Trustees of the Village of Capitan, New Mexico, deems it necessary and advisable, and for the best interest of said Village and its inhabitants, to acquire a complete electric light and power system (hereinafter called the System), by purchasing, improving and extending the system now operating in said Village, and to issue bonds of the Village, payable solely out of the net income to be derived from the operation of such System, for such purpose.

NOW, THEREFORE, BE IT ORDAINED BY THE BOARD OF TRUSTEES OF THE VILLAGE OF CAPITAN, LINCOLN COUNTY, NEW MEXICO:

Section 1. That for the purpose of protecting the public health, conserving the property and advancing the general welfare of the citizens of the Village of Capitan, Lincoln County, New Mexico, it is hereby declared necessary that the Village of Capitan issue its revenue bonds in a principal amount not exceeding \$45,000, payable solely out of the net income to be derived from the operation of the proposed electric light and power system of said Village, and that said Village pledge, irrevocably, such income to the payment of such bonds and interest thereon, the proceeds thereof to be used solely for the purpose of acquiring by purchase, an electric light and power system for said Village and its inhabitants at an estimated cost not exceeding \$45,000.

Section 2. That to provide funds for said purpose, Electric Light and Power Revenue Bonds of said Village are hereby authorized to be issued in a principal amount not exceeding \$45,000, pursuant to the provisions of Chapter 57 of the Session Laws of the State of New Mexico, 1933, as amended by Chapter 4 of the Special Session Laws of New Mexico, 1934, and Chapter 61 of the Session Laws of New Mexico, 1937, and Chapter 83 of the Session Laws of New Mexico, 1939, and Chapter 18 of the Session Laws of New Mexico, 1941, Chapter 6 of the Special Session Laws of New Mexico, 1934, as amended, and all other acts thereto enabling.

Section 3. That said bonds shall be dated October 1, 1941, and shall be numbered from 1 to 45, inclusive, and shall be in denominations of \$1,000 each, and shall mature on October 1, as follows:— \$1,000 in each of the years 1944 and 1945; \$2,000 in each of the years 1946 to 1950, inclusive; and \$3,000 in each of the years 1951 to 1961, inclusive. On the 1st day of October, A. D. 1946, or on any interest payment date thereafter, the Village may redeem any of said bonds by paying principal, accrued interest and a premium of six (6%) per cent of principal. Thirty days' notice of any redemption prior to maturity shall be given to the First National Bank of Santa Fe, and shall be published once in a newspaper of general circulation in Santa Fe, New Mexico, and all redemptions prior to maturity shall be made in inverse numerical order.

Said bonds shall bear interest at the rate of 4 1/2% per annum, payable semi-annually on the 1st day of April and October of each year. Said bonds shall be payable, principal and interest, in lawful money of the United States of America, at the First National Bank of Santa Fe, in Santa Fe, New Mexico, shall be negotiable coupon bonds payable to bearer, and each of said bonds shall contain a recital that it is issued pursuant to the provisions of the Constitution and Laws of the State of New Mexico, and particularly under the terms and provisions of Chapter 57 of the Session Laws of the State of New Mexico, 1933, as amended by Chapter 4 of the Special Session Laws of New Mexico, 1934, and Chapter 61 of the Session Laws of New Mexico, 1937, and Chapter 83 of the Session Laws of New Mexico, 1939, and Chapter 18 of the Session Laws of New Mexico, 1941, Chapter 6 of the Special Session Laws of New Mexico, 1934, as amended, and all other acts thereto enabling; shall be signed by the Mayor and attested by the Clerk of said Village, with the seal of said Village of Capitan affixed thereto, and the interest coupons thereto attached, shall be authenticated by the facsimile signature of the Village Treasurer.

Section 4. That said bonds and the coupons thereto attached and each of them shall be in substantially the following form:

UNITED STATES OF AMERICA STATE OF NEW MEXICO COUNTY OF LINCOLN VILLAGE OF CAPITAN ELECTRIC LIGHT AND POWER REVENUE BOND \$1,000 The Village of Capitan, in the County of Lincoln and State of New Mexico, hereby acknowledges itself indebted and for value received, promises to pay to the bearer out of the special fund hereinafter mentioned, and not otherwise, ONE THOUSAND DOLLARS on the 1st day of October, A. D. 1946, and to pay interest thereon at the rate of four and one-half (4 1/2%) per centum per annum, payable semi-annually on the 1st days of

April and October in each year until maturity, upon surrender of the annexed coupons as they severally become due. Both principal and interest of this bond shall be payable in lawful money of the United States of America, at the First National Bank of Santa Fe, in Santa Fe, New Mexico.

On the 1st day of October, A. D. 1946, and on any interest payment date, the Village may redeem this bond by paying principal, accrued interest and a premium of 6% of principal.

Thirty days' notice of any redemption prior to maturity shall be given to said First National Bank and shall be published once in a newspaper of general circulation in Santa Fe, New Mexico, and all Bonds of this issue which are redeemed prior to maturity shall be redeemed in inverse numerical order.

Payment of this bond and the interest thereon shall be made solely from, and as security for such payment, there is pledged a special fund created by Ordinance No. 14, of said Village, adopted on the 16th day of October, A. D. 1941, identified as "Electric Light Revenue Bond Fund", into which the Village of Capitan covenants to pay, from the revenues to be derived from the operation of its electric light and power system, after provision only for all reasonable expenses of operation, as provided in said Ordinance, sums sufficient to pay, when due, the principal and interest on the bonds of the series of which this is one, and to create and maintain a reasonable reserve for such purpose, and the Village of Capitan agrees with the holder of this bond and with each and every person who may become the holder hereof, that it will keep and perform all the covenants of said Ordinance.

The principal of and interest on this bond are payable and collectible solely from the net revenue derived or to be derived from the operation of said light and power system, and the holder hereof may not look to any general or other fund of said Village for the payment of said principal or interest.

This bond is issued for the purpose of providing funds to acquire a complete electric light and power system by purchasing, improving and extending the system now operating in said Village, and is issued in strict compliance with the Constitution and Laws of the State of New Mexico, and particularly under the terms and provisions of Chapter 57 of the Session Laws of the State of New Mexico, 1933, as amended by Chapter 4 of the Special Session Laws of New Mexico, 1934, and Chapter 61 of the Session Laws of New Mexico, 1937, and Chapter 83 of the Session Laws of New Mexico, 1939, and Chapter 18 of the Session Laws of New Mexico, 1941, Chapter 6 of the Special Session Laws of New Mexico, 1934, as amended, and all other acts thereto enabling.

Section 5. Said bonds, or so many of them as may be necessary for the purposes herein specified, shall be sold for cash, at not less than par, at either public or private sale, as may be determined by the Board of Trustees of said Village. The proceeds of said bonds shall be deposited in a trust fund account at the First National Bank of Santa Fe, New Mexico, and shall be expended solely in payment of the purchase price and expenses incidental to the acquisition of a municipal light and power system and in paying interest on said bonds prior to the time when the said system is in operation by the Village, but the purchaser of said bonds shall not be required to see to the application of the proceeds thereof.

Section 6. The Board of Trustees of said Village shall establish such rates for services rendered by said light and power system as will create an income sufficient to pay all reasonable expenses of operation and create a net revenue which shall be sufficient to pay interest coupons on said revenue bonds as they shall mature, and to create a reserve fund for the redemption of said bonds, and to provide a sinking fund which shall be adequate to discharge said bonds as and when they shall mature, and it shall be its duty to maintain such rates continuously until such bond issue has been fully liquidated. In the event of its failure or refusal to do so, each and all of the members of said Board of Trustees shall be liable to the penalties provided in Section 7 of Chapter 57, Laws of New Mexico, 1933, and any bondholder shall have the right to apply to the District Court of Lincoln County, New Mexico, for a mandatory order requiring the establishment by such Board of Trustees of rates which shall be adequate to meet the requirements of this Ordinance.

Section 7. That there is hereby established and created a fund to be known and maintained as the "Capitan Electric Light and Power Fund," to be derived as follows:— All gross revenues from the operation of said electric light and power system; all funds arising from the sale of by-products; all funds arising from the sale of materials and equipment removed from the system and no longer required for operation; interest on moneys invested from funds belonging to said "Electric Light and Power Fund," and all other funds derived either from the operation or ownership of said electric light and power system.

Section 8. That the Electric Light and Power Fund hereby established and created is hereby irrevocably pledged for the purposes and payments herein set forth, to-wit:

(a) The legitimate expenses of operation, and the reasonable cost of maintaining said system in good repair, including the expense of carrying adequate insurance thereon.

(b) After the payments and deductions specified in sub-paragraph (a), immediately preceding this paragraph, there shall be paid into a separate fund, to be known as the "Electric Light Revenue Bond Fund," in approximately equal monthly installments during each fiscal year, amounts sufficient to meet the aggregate interest and principal requirements for such fiscal year of the bonds herein authorized, and, in addition thereto, an amount equal to twenty (20%) per cent of said amounts as a reserve fund to meet possible future deficiencies therein. If in any month, or for any reason the Village shall fail to pay into said fund the full amount above stipulated, then an amount equal to such deficiency shall be added to the amount otherwise required to be paid into such fund in the next succeeding month. The moneys in said fund shall be used solely and only for the purposes herein specified.

(c) After the payments and deductions specified in sub-paragraphs (a) and (b) hereof, immediately preceding this paragraph, there may be paid into an "Extension and Betterment Fund" not exceeding eight (8%) per cent of the gross revenues of the plant, which said fund shall be expended only for extensions and betterments of said plant.

(d) All excess remaining after the payments into the funds hereinabove provided for shall be paid into the "Electric Light and Power Fund" provided for in sub-paragraph (b) above, as additional to the reserve therein provided for, until such time as such reserve fund shall amount to the sum of \$10,000. So long as said reserve fund amounts to said sum of \$10,000, no further payments into said reserve fund need be made under this paragraph, but the 20% payments provided for in sub-paragraph (b) hereof, shall thereafter be continued. Such reserve fund shall be used for the payment of interest on and principal of said bonds, in the event that deposits are not promptly made for such payments. With the approval of the Electric Light and Power Committee, hereinafter mentioned, and the original purchaser of said bonds, the moneys in said reserve fund may be invested in United States government, state, municipal or municipal revenue bonds. The interest from such investments shall be considered as net revenues from the operation of the system.

(e) Any surplus moneys remaining in any month in said Electric Light and Power Fund, after all payments have been made as required by this Ordinance, as hereinabove set forth, may be used for redeeming Bonds and paying the premium thereon prior to maturity, or used as the Board of Trustees may provide.

When the amount in the reserve fund, together with all other deposits, shall be sufficient to pay all bonds then outstanding, interest thereon, and all charges incident thereto, no further deposits need be made, and thereafter the disposition of said revenues shall be subject to the order of the Board of Trustees of said Village.

Section 9. The said Village of Capitan hereby irrevocably covenants and agrees with each and every holder of said revenue bonds as follows:— (a) That it will continue to operate and manage its electric light and power system in an economical and efficient manner, and supply electric current to the inhabitants of said Village and all others who may be lawfully served thereby.

(b) That the Board of Trustees of said Village will appoint a non-partisan Board to consist of the Mayor of said Village, during his term of office, and two responsible resident owners of real property in said Village, to be known as the "Electric Light and Power Committee." The members of said Committee, other than the Mayor, shall be appointed for two and four

years, respectively, and when the term of each shall expire, a successor shall be appointed for a four-year term. Such Committee shall act in an advisory capacity and shall assist the Board of Trustees in every way possible to insure efficient and economical management of said System.

(c) That it will appoint a Manager of the system satisfactory to the Board of Trustees and said Committee, who shall have full and complete control of the System and its operation and maintenance, subject only to the supervision of the Board of Trustees and said Committee. Such Manager shall have had at least five years experience in the operation of electric utilities and shall be competent and fitted for the responsibilities of such position. The salary of the Manager shall be commensurate with that paid by private utility companies to persons in similar positions of experience and responsibility, and shall be charged as an operating expense.

(d) That so long as said Village shall use electricity for street lighting and other municipal purposes, it shall pay monthly into said Electric Light and Power Fund a fair and reasonable amount for such services and in determining what shall be a fair and reasonable amount, the Board of Trustees shall take into consideration what it is now paying for street lights and other municipal services, and what other cities in New Mexico, similarly situated, pay for like service. In no event shall the Village pay a greater amount than would be charged a private consumer for the same amount of electricity furnished. The Village shall include in its annual appropriations and budgets, amounts sufficient to pay for all municipal service from said plant.

(e) That so long as any of said bonds remain outstanding, said Village will, once each quarter, file a report with the original purchaser of said bonds, showing the receipts and disbursements of said Electric Light and Power System during the preceding quarter, and at least once each year it will cause an audit to be made of the books relating to its electric light and power operations, such audit to be made by a certified public accountant, and a copy of said auditor's report shall be filed with said purchaser and said First National Bank of Santa Fe. The cost of said reports and audits shall be considered an expense of operation.

(f) That it will not sell or alienate said System or any necessary part thereof, unless and until arrangements are made satisfactory to the owner or owners of said bonds then outstanding for the payment of the principal of and the interest on said bonds.

(g) That said Village will carry fire, workmen's compensation and public liability and such other forms of insurance on said system in such amounts as shall properly protect the System and its operation, the cost thereof to be considered as an operating expense. In the event of any loss or damage to said System, the insurance money shall be used for restoring, replacing or repairing the property lost or damaged, and the remainder thereof, if any, shall be placed in said Electric Light Revenue Bond Fund.

(h) That other than as provided by this Ordinance, there are no liens or encumbrances of any nature whatsoever on or against said system or the revenues derived or to be derived from the operation of the same.

(i) That the holders of any of the bonds herein authorized to be issued shall have the right at all reasonable times to inspect the System and all records, accounts and data of the Village of Capitan relating thereto.

(j) That bills for electric service shall be rendered to the consumers monthly, and shall be and become due and payable on or before the 5th day of each month; and if not paid within ten (10) days thereafter, electric service shall be discontinued.

Section 10. If it should ever be legally determined that any legislative or any other body, commission, or authority has power lawfully to prescribe a lower schedule of rates than that contemplated by this ordinance, and if such lower rate should be prescribed, then the payment of the interest on and the principal of said Electric Light and Power Revenue Bonds issued pursuant to the provisions of this Ordinance, shall constitute a first and prior charge on the revenue received from said electric light and power system, anything in this ordinance contained to the contrary notwithstanding.

Section 11. All incidental costs and expenses incurred in connection with or incident to the acquisition of said Electric Light and Power System and the issuance of Revenue Bonds, as provided by this Ordinance, shall be paid exclusively from the proceeds of such Bonds, or from the revenue of said System, and in no event shall any of such costs or expenses be paid out of or charged to the general funds or tax levies of said Village.

Section 12. If any one or more sections, sentences, clauses or parts of this Ordinance shall be for any reason questioned in any court and shall be adjudged unconstitutional or invalid, such judgment shall not affect, impair or invalidate the remaining provisions of this Ordinance, but shall be confined in its operation to the specific sections, sentences, clauses or parts of this Ordinance so held unconstitutional and invalid and the inapplicability and invalidity of any section, sentence, clause or part of this Ordinance, in any one or more instances, shall not affect or prejudice in any way the applicability and validity of this Ordinance in any other instance.

Section 13. All ordinances, or parts thereof, in conflict with this Ordinance are hereby repealed. After said bonds have been issued,

IN THE THIRD JUDICIAL DISTRICT COURT OF THE STATE OF NEW MEXICO WITHIN AND FOR LINCOLN COUNTY R. F. BROWN, Plaintiff vs MRS. MOLLIE RICHARDS, Implored with the following named Defendants, against whom substituted service is hereby sought to be obtained, to-wit: FRED RAWLINGS, PEARL RAWLINGS, BONNIE RAWLINGS, BERTHA V. POTTER, Ancillary Administratrix of the Estate of Theophilus W. Allen, deceased, BERTHA ALLEN NAFZIGAR, C. Y. ALLEN, WILLIAM MONROE HAYES, if living, if deceased, the unknown heirs of WILLIAM MONROE HAYES, deceased, LILLIE F. HAYES, if living, if deceased, the unknown heirs of LILLIE F. HAYES, deceased, HAROLD G. RAWLINGS, if living, if deceased, the unknown heirs of HAROLD G. RAWLINGS, deceased, UNKNOWN HEIRS OF T. W. ALLEN, deceased, UNKNOWN HEIRS OF ROBERT L. OWEN, deceased, UNKNOWN HEIRS OF MRS. ZEB OWEN, deceased, and ALL UNKNOWN CLAIMANTS OF INTERESTS IN THE PREMISES ADVERSE TO THE PLAINTIFF, Defendants.

NOTICE OF PENDENCY OF SUIT THE STATE OF NEW MEXICO: To each of the above named defendants against whom substituted service is hereby sought to be obtained, GREETING: You and each of you are hereby notified that a certain cause wherein you and each of you are defendants, and R. F. Brown is plaintiff, being Civil Cause No. 4923 on the Civil Docket in the above named Court, is now pending against you.

The general object and purpose of said suit is to establish and quiet plaintiff's title in and to the real estate and property described in the Complaint in said cause, the same being in the County of Lincoln, State of New Mexico, and in Sections 9, 10 and 15, Township 2 South, Range 14 East, N. M. P. M.

Given under my hand and the seal of the Third Judicial District Court of the State of New Mexico, this 11th day of October, 1941. (D. C.) FELIX RAMEY, District Court Clerk. First publication Oct. 17, 1941. Fourth publication Nov. 7, 1941.

NOTICE! The Carrizozo Municipal Board of Education will receive sealed bids for Light Fixtures and Hardware as called for in specifications of new High School Building with Gymnasium as drawn up by Kruger & Clark, Architects, Genoa Plaza, Santa Fe, New Mexico. All bids must be received on or before 7:00 P. M. November 4, 1941. All bids to be F. O. B. Job Site and to include the approximate date material can be delivered. The Board of Education reserves the right to reject any or all bids.

Jane S. Turner, Clerk, Municipal Board of Education. O17-24.

this Ordinance shall be irrevocable until said bonds and the interest thereon shall be fully paid, satisfied and discharged in the manner herein provided. IN WITNESS WHEREOF, this Ordinance was adopted by the affirmative vote of two-thirds of all the members of the Board of Trustees of the Village of Capitan, New Mexico, and, after due examination, approved by the Mayor of said Village, and attested by the Clerk and the corporate seal of said Village affixed on this 16th day of October, A. D. 1941. F. H. HALL, Mayor. (SEAL) ATTEST: MARY F. WELNER, Village Clerk. Published Oct. 17, 1941.

Local and Personal Mrs. Larry Dow and son Greta were El Paso visitors Tuesday. They were accompanied home by Josephine Dow who has been attending El Paso Technical Institute the past month. Mr. G. H. Dorsett returned last Monday from Gallup where he had been in attendance at the 52 Grand Lodge meeting of the Independent Order of Oddfellowa, State of New Mexico. Mr. and Mrs. Phil Laramie, of Lincoln, were visitors in Carrizozo Wednesday. Mrs. Laramie is the now Notary Public, of Lincoln. Sheriff Stover and Manuel Chavez were in Socorro the early part of this week attending the district court term at that place. Ex-Senator Perry Sears of Capitan was a Carrizozo business visitor yesterday. Mr. W. J. Hooten, Editor of the El Paso Times was here Tuesday taking pictures and gathering news for a write up of Carrizozo and Lincoln County. The article will appear in an early issue of the Times. The many articles appearing in the Times describing the progressive activities of the cities and towns of this great Southwest shows the enterprize of the publishers of the Times and the co operation of El Paso with other communities in this district. Mrs. Browning who was a teacher in this county in the twenty's and lived on the Ruidoso, has been visiting Sheriff and Mrs. Stover for several days. While here she visited at the home of Mrs. R. E. Blaney and renewed an old and lasting friendship that they enjoyed when Mrs. Blaney was County School Superintendent and Mrs. Browning was a successful teacher in the county. Mrs. Browning is living now in Prescott, Arizona. Deputy Nick Vega, Mr. Melvin Richardson, and Mr. Leo Sanchez were at Las Vegas on business Monday. Mrs. Laramie, entertained the ladies of the Capitan Unit of the American Legion Auxiliary with a covered dish luncheon, Thursday Oct. 9th, 16 members and guest were present. The members spent the afternoon sewing for the Red Cross. Mrs. Mary F. Werter, Secretary of the Village of Capitan was in Carrizozo on business last Tuesday. Mr. Charles N. Goldenberg, consulting Engineer of Santa Fe was a Carrizozo-Capitan business visitor several days this week. Mr. Sam Welsh of the Triple A office has been ill several days this week. Important Notice There were a number of families made homeless in the recent floods in Lincoln County, who are in immediate need of clothing, food and medical aid. The American Red Cross through the Lincoln County chapter will make every effort to re-establish these families, and will need the cooperation of all the citizens in the County who are in position to assist. If you have clothing, blankets, mattresses and other items that may be used, please leave at the Library, or contact Mrs. G. T. McQuillen, Chairman of First A'd. Any one wishing to make cash donation for this purpose please contact Frank Adams, Chapter Chairman, Chapter Chairman, BUYER MEETS SELLER IN OUR AD COLUMNS

# The Lamp in the Valley

BY ARTHUR STRINGER

W. N. U. Service

Carol Coburn, Alaska-born daughter of a "bush rat" who died with an unimproved mining claim, returns North to teach school. Sidney Lander, mining engineer, rescues her aboard ship from annoyances of Eric (the Red) Ericson. Lander is engaged to

### THE STORY SO FAR

Barbara Trumbull, whose father heads the company fighting Coburn's claim, Lander breaks with Trumbull and moves to Sock-Eye Schlupp's shack. One of Carol's pupils is Salaria Bryson, a big, out-doors young woman, also

### INSTALLMENT X

I was, for a minute or two, quite forgotten in the tumult of those crowding figures. Then I was startled by Sock-Eye Schlupp, who cried out as he accosted me with an approving thump on the back: "You're good leather, girl! You're good leather!" And I was equally startled when Olie, without saying a word, crept rather shyly up to me and tightened his arms about my waist. I simply pressed his head against my breast, in my happiness, and held it there for a silent moment or two.

I realized, as I heard them talking of all going back to the Eckstrom house for hot coffee and schnapps, that I was very tired.

"I've a horse for you here, teacher, if you want to ride," Sam Bryson suggested with an unexpected absence of truculence.

"I'd rather go home," I said from some mysterious trough of depression following after my wave of exaltation.

Lander pushed through the crowd and stood beside me.

"Sandy and I'll see you get home safe," he said as he linked his arm in mine.

Neither of us, for some reason, had much to say. And in that silent partnership of a peril confronted and conquered I felt unexpectedly close to the man at my side.

"Can I come in?" my companion quietly inquired.

A wave of recklessness went through me as I stood looking up at him.

"Of course," I said, conscious of something portentous in the midnight quietness about us. We only live once, I told myself as I stared up at the star-strewn sky.

I had to fight back the impulse to let my two reckless arms creep up about his stooping shoulders. I could even feel surge through me a secret hope that he himself would be ruthless and reckless, that those two strong arms of his would reach out and draw me so close all thought of our yesterdays and our tomorrows might be forgotten.

Then I drew up, abruptly, with a little gasp of surprise. For plainly, in the midnight quietness, I heard the nicker of a horse.

A moment later, in the shadow of the shack front, I could make out the uncertain figure of a man.

"That you, Sid?" challenged the man standing beside the horse with an empty saddle.

"Yes," answered Lander in an oddly flattened voice. The intruder, I could see, was Sock-Eye. And for all the darkness I could feel something accusatory in his stare as he confronted us.

"You forgot your horse," Sock-Eye explained.

"That was all he said. But to me it seemed to carry a hint, as I realized we weren't so alone in the world as I'd imagined.

### CHAPTER XII

The breakup, this year, meant more than the coming of spring to Matanuska. Along the railway siding at Palmer great piles of lumber were being unloaded. Train after train brought in a mountain of machinery and supplies. Federal engineers in khaki and high-tops went about consulting blueprints and driving stakes and aquinting through the odorous. Then a little colony of tentites began to dot the roadside, and two or three trim cabins of speckled spruce logs appeared out of nowhere.

That meant, I was told, the ground was being laid out for the two hundred families to be brought in from the Middle West, the new settlers who were to show the outside world that Alaska was something more than "Seward's Icebox."

But nothing seemed ready for that incoming army. Not one-tenth of the land was cleared and fit for cropping. There was no shelter for livestock, no homes for women and children. The only solid habitations appeared to be a string of old bunk cars which had been pushed down the valley siding. In these the CCC workers were to sleep and eat, like navvies, until a tent colony could be established. And three days later the toilers themselves put in an appearance, a whole trainload of them, promptly making the quietness of the valley a thing of the past.

They were like children turned loose on a holiday, romping and singing and hillying, quarreling and drinking.

Sock-Eye, viewing them with a morose eye, reported that they'd been raising hell all the way up from Frisco and Seattle. He further announced that the first banjo-strumming cheechako who made a crack about his shooting irons would get three ounces of lead in his larynx.

"They won't listen to us," snorted Sam Bryson as his S'lary and I dined on yak meat after a two-hour school lesson. "But before summer's over they'll be belyaching about everythin' goin' wrong."

"I tell you, Pop, they're just a

bunch o' half-wits," averred Salaria. "They're yapping about not usin' any old-timers. But before freeze-up next fall they'll find swingin' in a hammock don't git no houses built. They're hot-airin' about town halls and administration buildin's when they ain't even a road built or a well dug of shack logs ready for a wickypup."

"What," demanded her father, "kin you expect from fruit-tramps and dock-bums? And what'll we git from that shipload o' broken-down sodbusters when they're dumped in this valley? From a lot o' silk-shirt cake-eaters who'll be askin' the government to drop around ev'ry mornin' to do their milkin' for 'em?"

"But won't it mean something," I ventured, "to start a settlement that's really going to take root here? Isn't that what Alaska needs, settlers who bring in their women and children and stay on the land?"

"They won't take root," contended Salaria's father. "They'll just whimper around for more relief and then head for outside agin. And down in the States they'll be sayin' Alaska's only fit for Eskimos."

It was then that Salaria presented me with a surprise.

"I can't see," she said, "why a squarehead like Sid Lander should be wantin' to swing in with them."

"To swing in with them?" I echoed.

"As sure as sundown," proclaimed Salaria. "That misguided hombre seems t' feel this is the biggest thing

"Where are you going?" he asked.

"To my home," I answered.

"That's in the Jansen shack down the valley."

"Get in," he said, "and I'll take you there."

"Do you belong in the valley?" he asked as he picked his way along the puddled ruts.

"I'm the teacher here," I explained. That brought his eye quickly back to my face.

"What's your name?" he questioned, in a voice too well modulated to be called curt.

"I'm Carol Coburn," I answered. "So you're Carol Coburn," he said with meditative quietness. "I rather thought we'd be coming together soon."

"Why?" I asked.

"Because I'm the new owner of the Happy Day Mine," he said. "My name's John Trumbull. But I'm not quite what your friend Lander is trying to make me out to be," he added. "I've never tried to steam-roller orphans out of their rights."

I felt, all things considered, the need of caution.

"Then you acknowledge I have rights?" I asked.

"Where?" he inquired, obviously fencing for time.

"In the Chakitana," I answered.

"Have you ever been there?" he questioned.

I told him that I hadn't.

"Then you don't can't understand the situation," he said with a fatherly sort of deliberateness.

"There may be mineral in that claim. But what good is a claim when it's out on the edge of nowhere and road-building costs more than your mine could produce?"

"Whose mine?" I asked in a slightly sharpened voice.

His cool and not unkindly eye considered me for a moment.

"That's a decision, apparently, neither you nor I can make. It all goes back to vested rights and the records. And since we've come together in this friendly way, I don't even want to talk about it."

"But it will have to be talked about," I reminded him.

"There's been too much of that," he announced, "especially from Lander. Are you in love with that man?"

It was plain that he didn't believe in beating about the bush.

"I'm quite heart free," I said, meeting his side-glance without a flincher.

"You know my daughter's going to marry Lander?" he finally observed.

"So she told me," I retorted.

"This whole mix-up is something we've both inherited," he asserted, after another moment of silence. His tone, I thought, was more friendly. "Neither of us asked for it. And there ought to be some reasonable way out of it."

"What would you suggest?" I quietly inquired.

I had the feeling of being weighed on a pair of invisible scales.

"I'd suggest that we leave Lander out of it," he said, "and go at the thing without rancor or prejudice. Lander's bullheadedness hasn't got you anywhere. And it won't get him anywhere."

"I've never had any cause to question his loyalty," I asserted.

"Well, I have," was the prompt response. "And if you'd fly out to the Chakitana and actually look over the ground you'd understand the situation a little better."

in love with Lander. She can hunt a bear easier than read and write. When little Frieda Engstrom gets lost, Carol sends for Sidney, Carol finds the little girl. A nerve wracking ordeal is past.

I realized, as he came closer, that his face was strange to me. I lost no time in wrenching my arm away from Ericson's clasp and signaling the stern-eyed traveler.

"Will you help me?" I called out.

"What's wrong here?" asked the driver, without getting down from his seat.

"This coward," I cried, "is threatening me."

"Threatening you with what?" inquired the stranger, still impartial. But he swung down from his seat.

"I don't know what," I had to admit. "But it's not the first time he's annoyed me."

"Has he any claim on you?" inquired the still noncommittal stranger.

"Of course not," was my quick retort.

Then he turned back to Ericson, who was advertising his composure by lighting a cigarette. But in doing so, I noticed, my enemy quietly backed a step or two off the road.

"I think, son, you'd better be on your way," the tall and grizzled stranger announced in a disappointingly casual voice. Then he turned to me and once more looked me over. I didn't like the assessing way that glacial eye inspected my person. He was, I could see, very sure of himself.

"Where are you going?" he asked.

"To my home," I answered.

"That's in the Jansen shack down the valley."

"Get in," he said, "and I'll take you there."

"Do you belong in the valley?" he asked as he picked his way along the puddled ruts.

"I'm the teacher here," I explained. That brought his eye quickly back to my face.

"What's your name?" he questioned, in a voice too well modulated to be called curt.

"I'm Carol Coburn," I answered. "So you're Carol Coburn," he said with meditative quietness. "I rather thought we'd be coming together soon."

"Why?" I asked.

"Because I'm the new owner of the Happy Day Mine," he said. "My name's John Trumbull. But I'm not quite what your friend Lander is trying to make me out to be," he added. "I've never tried to steam-roller orphans out of their rights."

I felt, all things considered, the need of caution.

"Then you acknowledge I have rights?" I asked.

"Where?" he inquired, obviously fencing for time.

"In the Chakitana," I answered.

"Have you ever been there?" he questioned.

I told him that I hadn't.

"Then you don't can't understand the situation," he said with a fatherly sort of deliberateness.

"There may be mineral in that claim. But what good is a claim when it's out on the edge of nowhere and road-building costs more than your mine could produce?"

"Whose mine?" I asked in a slightly sharpened voice.

His cool and not unkindly eye considered me for a moment.

"That's a decision, apparently, neither you nor I can make. It all goes back to vested rights and the records. And since we've come together in this friendly way, I don't even want to talk about it."

"But it will have to be talked about," I reminded him.

"There's been too much of that," he announced, "especially from Lander. Are you in love with that man?"

"Well, I have," was the prompt response. "And if you'd fly out to the Chakitana and actually look over the ground you'd understand the situation a little better."

### LEAVES from Uncle Sam's Notebook

By HARRIET MAY WILSON

### Growing the Basket Willow

A basket willow may be any one of about 200 species of willows which produce long straight rods suitable for weaving into baskets although of course some species have been found superior to others. In Europe the basket willows have been cultivated as a farm crop for many years but the industry has not yet reached full proportions in America, although American manufacturers say that they prefer American-grown willows whenever available since they are heavier and more durable than are the imported stocks.

### CHOOSING THE SPOT

In spite of the fact that willows will grow almost anywhere, except in soils extremely alkaline or extremely acid, it will pay the prospective grower to locate his holt with some care. The following considerations should be kept in mind:

1. Plant, if possible, where the water table lies from two to six feet below the soil surface. Such location will provide the necessary moisture yet will supply a surface dry enough for cultivation.

2. Do not plant along a stream bottom, sheltered by other tree growth. Willows require a free circulation of air to minimize the attacks of fungi and insects. The most successful holt are placed where they receive the full sweep of the winds.

3. Do not plant near waste lands which are heavily infested with weeds. It is absolutely necessary to keep the willow planting free of weeds from the start since the young plants are not strong enough to keep the weeds down without help, and it is a difficult matter to keep a holt clean which is being continually reseeded from nearby wasteland.

4. Place the holt in a convenient location, both for ease in handling and also that it may be under constant supervision to discover possible insect or fungous attack.

### PREPARATION OF THE SOIL

An excellent procedure, if now land is to be used, is to break it, seed it to corn or potatoes or some other closely cultivated crop, plow again in the fall, manure richly and leave it to weather during the winter. The following spring it should be plowed, disked and harrowed, and leveled so that it will not harbor pools of water. If the land is likely to be too wet for early spring handling, all preparation should be made in the fall since it is important that willow plantings be made early.

### WHAT STOCK TO PLANT

A bulletin from the U. S. department of agriculture offers the following suggestions as to varieties to plant:

"In small holt, where insects and fungous pests can be controlled, American green is recommended. In large holt, however, it would be safer to plant the Lemleys, since there would be much less likelihood of loss by epidemic. In places where the cost of peeling would not be great, the purple willow, which produces very high-class material, might be profitable."

### THE CUTTINGS

All basket-willow holt are started from cuttings from shoots or branches. To secure such cuttings, it is a good plan to visit some nearby holt to study the methods used and to inspect the stock. If no willow holt is near enough for inspection, send to growers of stock for samples of rods of the varieties desired.

The proper time to make cuttings depends, naturally, upon whether the planting is to be done in fall or in spring. If planting is to be done in the fall, the best plan is to delay making the cuttings until several sharp frosts have ripened the wood.

### HOW TO PLANT

A sharpened stick, or a sharpened iron rod may be used to make the holes. The rod should have a blunt point rather than a long, tapering one, to prevent leaving an air space below the cutting when it is placed. The cuttings, when set in the holes, should rise not more than two inches above the surface of the ground. Every cutting should have one or two buds near or above the surface. Set the cuttings in a vertical position and see that the hole is no deeper than necessary to receive it. Planting should be done as soon as the holes are made, before the soil has had time to dry out and the soil must be firmly packed about the cuttings.

For further information, send five cents to Superintendent of Documents, Washington, D. C., asking for Farmers' Bulletin No. 622.

### POULTRY HOUSE FLOORS

Is it ever advisable to use dirt floors in poultry houses? If the soil is light and porous, and if there is good drainage, an earth floor is sometimes satisfactory. The chief objection to such floors is that they make the poultry house very dirty, and are frequently subject to rot-burrowing. A wood floor, raised 8 to 10 inches off the ground is to be preferred, and the most sanitary and durable floor is made of concrete. In the long run this floor is the most satisfactory.

### FIRST-AID to the AILING HOUSE

(© Roger E. Whitman—WNU Service.)

### Sunlight on Furniture

QUESTION: What are the effects of sunlight and steam heat on furniture? Does a steam radiator standing one foot away from the side of a chest of drawers, and giving off heat, have any adverse effects on the furniture?

Answer: Sunlight on some varnished surfaces may cause them to turn white. In other cases the heat of the sun may cause hair-line cracks in the varnish. It is best to protect the furniture from direct sunlight, whether it be through glass or an open window. Furniture placed close to a steam radiator may become very dry, causing the joints to loosen. It may also damage the finish by drying out the oils in the varnish. Eighteen inches or more between the furniture and the radiator would be more advisable.

### Too Much Heat

Question: My living-room radiator is too large for the apartment. Can you suggest a method of cutting down radiation without taking out any of the sections? Would cardboard or any other material inserted in the air spaces cut heat radiation by blocking free air circulation?

Answer: A radiator cover with all sides closed except the front, will do it. I would not advise cardboard. If a radiator cover is out of the question, go to your local tinsmith shop and get a man to bend the ends of a piece of sheet metal for you so that it will enclose the back and sides of the radiator. The sheet metal can be painted to match the walls. An open window near the radiator will also temper the heat of the radiator.

### Hot Water Heat

Question: My house has hot water heat, with a single loop in the cellar supplying all radiators. Something seems wrong with the insulation, for on a cold day with the temperature of 105 degrees at the boiler, our living rooms were only 65 degrees. What do you suggest?

Answer: For one thing, a boiler temperature of 105° is too low; it should be 120 degrees, or even higher. This is especially necessary because of the long cellar main. You will find it a great advantage to put in an electric pump of the kind called an impeller or booster to force hot water through the radiators, instead of depending only on gravity. Any good plumber or steamfitter will know how to do the job.

### Frostproofing a Leader

Question: My recollection is that last year you described a gadget that could be placed in leaders to prevent freezing. Could you describe it again and inform me where it may be purchased?

Answer: The gadget is a metal ball containing a chemical, with a wire support. The ball is installed just above the opening in the top of the leader pipe, the purpose being to prevent the formation of ice around the pipe opening. The name and address of the manufacturer can be furnished by the Architects Samples Exhibit, 101 Park avenue, New York.

### Water Heaters

Question: I have a choice of either a tankless water heater with my oil burner unit, or a regular boiler-burner unit with a storage tank. In your experience, which have you found to give greater satisfaction?

Answer: The tankless type of water heater might have a slight preference over the storage type, but you must make sure the boiler is plenty large enough to furnish the necessary amount of heat for the house as well as sufficient capacity to heat water for your household needs.

### Crusting Kettle

Question: Noting an inquiry on hard water crusting in a kettle, "An Old Cape Codder" recommends keeping a small clamshell in the kettle. "The crusts form on this, and the kettle remains white and clean. A new shell can be put in when the other is discolored." Many thanks for that. Another remedy is to cut a piece of linen to fit the size of the bottom of the kettle; the crust will deposit on the linen, which can be renewed when stiffened.

### Hiding Scratches

Question: I am looking for a compound in stick form to hide scratches on maple and mahogany before waxing. Do you know of any such thing?

Answer: Dealers in radio supplies use a stick for taking out scratches on radio cabinets, which is what you are looking for. You may be able to get it at one of the 25-50-75 chains. Your radio-dealer should be willing to get one for you if he does not carry the sticks in stock.

"They'll jus' whimper around for more relief."

that's happened since the Children o' Israel hit out for the Promised Land. He thinks it's as dog-goned stiff as the Pilgrims Fathers' landin' on Plymouth Rock. And he reckons it ain't too late for the right man t' step in and git things organized."

"What can he do?" I asked, wondering at the small thrill that went through my body.

"He can't do nothin'," retorted Sam Bryson. "He's got a fool idea that if them Federal bureaucrats make him field manager up here he kin straighten out a tangle that was started wrong from the first. He contends the whole scheme should be took out o' the hands o' the War Department and give to a practical-minded worker."

I thought over this on my way home. I was still thinking over it as I swung through Palmer and stopped for a moment to watch three CCC workers languidly throwing baggage into a truck backed up to the railway siding.

"Look who's here," I heard a slightly mocking voice observe.

I detected, in that voice, an unpleasant ring of familiarity. And even before I glanced about I knew it was my soapbox orator known as Eric the Red.

"So you've swung in with the cattle," he said as he dropped to the ground. Then he laughed. "Matanuska's no longer the mudhole it was!"

I felt sorry that in the last few weeks, I'd given up the habit of going about with Sock-Eye's old six-gun swinging at my hip.

Eric swung out from the truck and came striding along beside me.

"I don't think you're going to like this valley," he had the effrontery to proclaim. "Something tells me you're likely to get what I got on the Yukon."

"Is that a threat?" I demanded.

"No, it's just a reminder," he said with a venomous sort of bitterness.

"You had your innings, and I'm going to have mine. And d'you know what's going to happen to you?"

I essayed no answer to that challenge. But I felt less defenseless as I noticed an open car pounding and lurching along the deep-rutted roadway. In it I could see a man, a wide-shouldered man, wearing a leather coat and a leather-tipped cap.

### These Spooky Games Fun At Your Halloween Party

### MYSTERY! Thrills! That's what you want at your Halloween party.

So have your guests enter by a dimly lit hallway—where wicked witches ride broomsticks, where black cats prowl. (You cut these out of black paper, fasten to walls.)

You'll find many lively games in our 32-page booklet. Has games for all kinds of parties—ice-breakers, team games, brain ticklers, a kiff of jolly stunts. Send your order to:

NEW YORK.—It has been only in the last year or two that this country began to realize that the Germans had done a vast amount of research and organization work, **Blueprinting Ways And Means of Dictators His Job** over many years, in preparing for their world aggression. Devising ways and means to meet it on many fronts, military and political, our government belatedly discovers Dr. Calvin Bryce Hoover, dean of Duke university, who was away out in front in studying dictatorships, trying to understand them and find out what to do about them.

Dr. Hoover is an important member of Col. William J. ("Wild Bill") Donovan's new diplomatic brain trust, which recruits men of specialized knowledge who have disclosed a timely awareness of the more or less declared war against civilization.

Colonel Donovan's title of coordinator of information does not reveal the exciting character of his bureau which is in reality a somewhat mysterious ideological and political Scotland Yard, studying the origins and techniques of Nazi power, evolving plans to meet it in its under-surface penetration everywhere in the world, recruiting against the dictators some of the same psychological forces which they employed.

So far as the public record shows, Dr. Hoover scored a clean beat on our lavishly staffed state department in trying to understand dictatorships and to make an accurate appraisal of their intentions and possible outreach. It was in 1931 that he wrote "The Economic Life of Soviet Russia"; in 1933, "Germany Enters the Third Reich"; and in 1937, "Dictators and Democracies." Through the pre-war years of planetary complacency, he was writing, in his books and articles, an outline of Adolf Hitler as "genius and fanatic."

These studies were not philippic against Nazism. They were searching and studious inquiries into the origins and inducements of dictatorship. They now provide invaluable analyses of the Nazi cultural, economic, military formula for world conquest.

Dr. Hoover, born in Berwick, Ill., in 1897, was conditioned to patient, methodical work by working on farms and railroads in his youth. He attended Monmouth college and received his Ph.D. degree at Wisconsin university in 1925. When he was an undergraduate at the former school, he joined the National Guard and served two years in France in the World war, taking part in two battles. He joined the Duke university faculty in 1925, becoming a full professor of economics in 1930.

In the above clinical studies, Dr. Hoover does not find dictatorships blue-printed in any patterns of social evolution. They can be fended off if we're "up and at 'em" without losing too much time—but, above all, they must first be understood.

CALEB S. BRAGG, manufacturer of the new plastics-and-mahogany airplane, which meets successful tests at Roosevelt field, was the **Once Cut Records of early-day In Airplanes, Now auto racing Cats Cost of 'Em** and aviation. A handsome chap, rich, venturesome and a Yale man. In 1912, he won the Fourth International Grand Prix automobile race, and was awarded the Vanderbilt cup, by covering 409 miles at 69.3 miles per hour. In that day, a mile a minute had been put down as the limit of safety for automobiles.

Newspapers threw a fit over Mr. Bragg gassing this deadline and living to tell the tale. **Time Rivers on.** In 1918 he left the country breathless by flying from Dayton to Washington, 430 miles, in 2 hours and 54 minutes. In 1919 he set a new altitude record of 24,000 feet for seaplanes.

He was born in Cincinnati in 1886, the son of a manufacturer and businessman, and was graduated from Yale in 1908.

He is a former head of the Early Birds, an organization of aviators who flew before 1916. At one time he beat Barney Oldfield in a race in California. He had the crowds whooping for him whenever he entered a race. In 1920 he helped finance the Glenn L. Martin company and moved into less exciting but no less exacting details of scientific plane-building. He and many engineers think he has pioneered new strength and economy in airplane construction with his soybean job—whatever it is.

NEW DESIGNS FOR YOUR COOKIE JAR  
(See Recipes Below)

**COOKIE SURPRISES**

All crisp, crunchy, and some slightly nutty, all of today's recipes are so fashioned as to send you on a real cookie-baking spree. Fill that lovely cookie jar of yours until the sides are fairly bulging with goodies so you can have cookies a-plenty to put in the children's lunch boxes, to serve as afternoon snacks, and as a pick-up for mealtime.

If you're doing some baking for a bazaar, there's nothing quite like plates of yummy cookies to put on the sales. Remember, you can sell a lot more, if you give out some samples. These can be set on plates with white paper doilies, for sampling, and those to be sold put in boxes already fixed. Cookies can be sold by the dozen if they're fancy and somewhat elaborate, by the pound if they're small drop cookies or squares.

Here's an interesting variation of the filled cookie, both dainty and delectable.

**Corn Flake Filled Cookies.**  
(Makes 30 medium-sized cookies)  
1 cup shortening  
1 cup brown sugar  
3 1/2 cups flour  
2 teaspoons baking powder  
1/4 teaspoon salt  
1/2 cup water  
1/2 teaspoon vanilla  
2 cups cornflakes

Blend shortening and sugar thoroughly. Sift flour, baking powder and salt together and add alternately with water and flavoring to first mixture. Stir in coarsely rolled corn flakes. Chill. Roll dough to 1/2 inch thickness. Cut with cookie cutter. Spread one round with filling, put on a second round and press edges together with a fork. Bake on a greased baking sheet in a hot (425 degree) oven about 12 minutes.

**Filling.**  
1 1/2 cups chopped dates  
1/2 cup sugar  
2 tablespoons water  
2 tablespoons orange juice  
1 tablespoon orange rind  
Combine all ingredients together and cook until soft paste is formed. Cool before filling cookies.

These little butter balls make good nibbling and smart additions to your teatime table. Made with butter, their flavor will be something you'll long cherish and remember.

**Butter Rolls.**  
(Makes 7 dozen small cookies)  
1/2 cup butter  
1 cup brown sugar  
1 egg  
2 cups sifted flour  
1/2 teaspoon salt  
1 teaspoon vanilla  
1/4 cup granulated sugar  
1/2 cup finely chopped nuts

Cream brown sugar and shortening. Add beaten eggs and vanilla. Add flour and baking powder. Roll into balls the size of marbles. Mix the granulated sugar and nuts and roll the balls in the mixture. Place on a greased baking sheet and bake in a hot (400 degrees) oven 10 minutes. These cookies will flatten slightly.

**THIS WEEK'S MENU**

- \*Meat-Macaroni Casserole

- \*Recipe Given

Your cookie jar problem can be solved very neatly with toothsome oatmeal cookies with flecks of chocolate in them:

**Oatmeal Cookies.**  
(Makes 4 dozen)  
1/2 cup butter or shortening  
1 cup brown sugar  
Grated rind of 1 orange  
1 egg, unbeaten  
1 teaspoon vanilla  
1/4 teaspoon salt  
1/2 cup sifted flour  
1 1/2 cups fine rolled oats  
7 ounces chocolate pieces

\*Cream butter and sugar. Add orange rind, egg, vanilla and beat well. Add salt and flour which has been mixed with the oats. Add chocolate pieces and work into batter. Drop by spoonfuls on greased cookie sheet. Bake 15 to 20 minutes in a moderate (375 degrees) oven.

Recommendations are in for the old favorites of which you never tire. If you want to make a pretty and at the same time, a very successful platter, you might try alternate rows of both these Ginger Cookies and

**Brownies:**

**Soft Ginger Cookies.**  
(Makes 6 dozen)  
1 cup shortening  
1 cup sugar  
1 egg  
1/2 cup molasses  
1/2 cup evaporated milk  
3 cups flour  
2 teaspoons soda  
1 teaspoon salt  
1 teaspoon each, ginger, cinnamon

Cream sugar and shortening; add egg and molasses. Beat well, add milk and blend well. Mix dry ingredients and add to batter. Last add soda, dissolved in 2 tablespoons warm water. Drop by spoonfuls on greased baking sheet. Bake 15 minutes in a hot (375 degrees) oven.

**Brownies.**  
(Makes 2 dozen)  
1/2 cup butter or shortening  
1 cup sugar  
2 eggs, well beaten  
2 squares unsweetened chocolate, melted  
1/2 cup flour  
1/2 teaspoon baking powder  
1/2 cup chopped nuts  
1 teaspoon vanilla

Beat eggs and sugar together. Add to this melted butter and chocolate and blend. Add flour, baking powder, nuts, and beat well. Pour into a greased pan and bake 30 minutes in a 350-degree oven. Cool and cut in squares.

For a delicious variation of the brownie recipe, you'll like the addition of 1/4 cup of bran cereal in place of the chopped nuts. They'll give you a slightly different flavored cookie, but guaranteed to please you just as well.

**\*Meat-Macaroni Casserole.**  
1 package macaroni  
1/2 cup salad oil  
1 pound hamburger  
1 dry onion, minced  
1 green pepper, minced  
1 clove garlic, if desired  
1 can tomato soup  
2 cups peas  
2 cups corn  
Salt and pepper

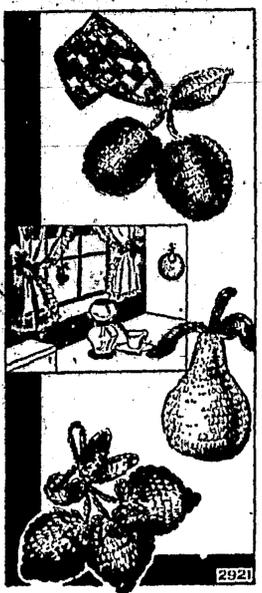

Cook the macaroni in plenty of boiling salted water and when tender, put in a sieve and rinse with cold water. Meanwhile fry the hamburger in the heated oil, stirring it occasionally to separate it. Skim out the meat and in the same fat cook onion, pepper and garlic till tender, but not browned. Garlic may be omitted entirely, and it is usually removed after the onion and pepper are cooked. Combine all ingredients and simmer 20 to 30 minutes to heat thoroughly and blend flavors, then serve.

**LYNN SAYS:**

An assortment of cookies, freshly baked and packed in tins with waxed paper between layers makes a delightful present for youngsters away at school and for friends you seldom see. When your own cookie jar has been filled to bulging, pack a few boxes from what you have and spread cheer to others, too.

Careful packing in tins with waxed paper will keep even small dainty cookies fresh for a long time. Some flavors like chocolate improve after they stand for some time. Chewy, nutty cookies are the more chewy and delicious after several days. Spicy cookies become moist and well flavored after standing.

**Gay Crocheted Accessories**

Pattern 2921 contains directions for making accessories; illustrations of them and stitches; materials required. Send your order to:

Sewing Circle Needlecraft Dept.

**Rather Far-Fetched Was This Relationship**

"You say, madam," said the barrister to the woman in the witness box, "that the defendant is a sort of relation of yours. Will you explain what you mean by that—just how you are related to the defendant?"

"Well, it's like this. His first wife's cousin and my second husband's first wife's aunt married brothers named Jones, and they were own cousins to my mother's own aunt. Then, again, his grandfather's on my mother's side, were second cousins, and his step-mother married my husband's stepfather, and his brother Joe and my husband's brother, Henry, married twin sisters. I've always looked on him as a sort of cousin."

**DON'T LET CONSTIPATION SLOW YOU UP**

When bowels are sluggish and you feel irritable, headachy and everything you do is an effort, do as millions do—chew FEEN-A-MINT, the modern chewing gum laxative. Simply chew FEEN-A-MINT before you go to bed—sleep without being disturbed—next morning gentle, thorough relief, helping you feel swell again, full of your normal pep. Try FEEN-A-MINT. Tastes good, is handy and economical. A generous family supply costs only **FEEN-A-MINT 10¢**

**Meeting Trouble**  
Never meet trouble halfway. It will come soon enough; and then you will meet it where God meant you should meet it, and where He will help you to bear it.—C. H. Spurgeon.

**Relief At Last For Your Cough**

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you are to have your money back. **CREOMULSION** for Coughs, Chest Colds, Bronchitis

IN THE THIRD JUDICIAL DISTRICT COURT OF THE STATE OF NEW MEXICO WITHIN AND FOR LINCOLN COUNTY MARSHALL D. ATKINSON AND PEARL ATKINSON, husband and wife, Plaintiffs, vs. ERNEST KEY, as Treasurer of Lincoln County, New Mexico, Impleaded with the following named defendants, against whom substituted service is hereby sought to be obtained, to-wit: ELIZABETH GALLAGHER JONES, widow of John Gallagher, deceased, ALLINOIS STOKES MEDICINE COMPANY, A CORPORATION, JOSEPH T. INGRAM, if living, if deceased, the unknown heirs of JOSEPH T. INGRAM, deceased, ANGIE LACEY, if living, if deceased, the unknown heirs of ANGIE LACEY, deceased, MAE LACEY, if living, if deceased, the unknown heirs of MAE LACEY, deceased, ROBERT LACEY, if living, if deceased, the unknown heirs of ROBERT LACEY, deceased, JAMES H. CURRENT, JR., if living, if deceased, the unknown heirs of JAMES H. CURRENT, JR., deceased, PETER WILLIAMS, if living, if deceased, the unknown heirs of PETER WILLIAMS, deceased, UNKNOWN HEIRS of LELLA INGRAM, deceased, and All Unknown claimants, of interests in the premises, adverse to the plaintiffs, Defendants.

**NOTICE OF PENDENCY OF SUIT THE STATE OF NEW MEXICO:**  
To each of the above named defendants against whom substituted service is hereby sought to be obtained, GREETING:  
You and each of you are hereby notified that a certain cause where-in you and each of you are defendants, and Marshall D. Atkinson and Pearl Atkinson, husband and wife, are plaintiffs, being Civil cause No. 4917 on the Civil Docket in the above named Court, is now pending against you.

The general object and purpose of said suit is to establish and quiet plaintiffs' title in and to the real estate and property described in the Complaint in said cause, the same being in the County of Lincoln, State of New Mexico, and is in Sections 16, 24, 25 and Township 9 South, Range 19 East, and in Sections 3 and 10, Township 7 South, Range 19 East, and in Sections 17, 18, 19, 20, 21, 28, 30 and 31, Township 9 South, Range 14 East, N. M. P. M. against the adverse claims of you and each of you, and anyone claiming by, under, or through you, of any of you, and to forever bar and estop you and each of you from having or claiming any lien upon, or right or title to, or interest in said real estate and property.  
You are further notified that unless you enter your appearance in said cause on or before November 22, 1941, judgment will be rendered in said cause against you and each of you by default.  
That the name of plaintiff's attorney and his postoffice address is John E. Hall, Carrizozo, New Mexico. Given under my hand and the seal of the Third Judicial District Court of the State of New Mexico, this 4th day of October, 1941.
