

LINCOLN COUNTY NEWS

Official U.S. Land Dist. Paper

VOLUME XVII [Carrizozo News, Vol. 30]

CARRIZOZO, NEW MEXICO, FRIDAY, NOV. 28, 1941.

NUMBER 21

FRIDAY & SATURDAY

Gene Autry, Smiley Burnette, Mary Lee, Jacqueline Wells

"BACK IN THE SADDLE AGAIN"

A musical western which tells the story of a fight between copper miners and cattlemen.

"Publicity Stunts" & "Redskins and Redheads"

SUNDAY, MONDAY & TUESDAY

Mickey Rooney, Lewis Stone, Fay Holden, Polly, Kathryn Grayson.

"ANDY HARDY'S PRIVATE SECRETARY"

Andy finds himself in a maze of work and head of numerous committees as graduation time draws near-- and so he finds a private secretary.

Paramount News and "Of Pups and Puzzles"

WEDNESDAY & THURSDAY

Lloyd Nalan, Marjorie Weaver, Joan Valerie

"MICHAEL SHAYNE. PRIVATE DETECTIVE"

A mirth and melodrama mystery of race tracks, doped horses and a glib and nimble detective.

"All Aint Well" & "An Empire in Exile"

Holiday Merchandise On Display

Carrizozo stores are beginning to show their holiday merchandise. Petty's have a good line of appropriate gifts on display, as have other merchants.

The Carrizozo Hardware Co. is displaying a full line of dishes, rugs, furniture, pictures, gas ranges, heaters, and other things suitable for everybody. This is a Xmas for useful presents.

The Titworth Company, Inc., at Capitan have a complete line of Christmas goods now on display. Give them a call.

Calixtro G. Aguilar

Mr. Calixtro G. Aguilar, age 59, succumbed Monday night at the home of Mrs. Sam Farmer, from a heart attack. Mr. Aguilar recently returned from the Veteran's hospital at Albuquerque, he was a former resident of Carrizozo, but for the last two years he had resided in El Paso, Texas.

Mr. Aguilar was a World War veteran, he enlisted at Alamogordo, July 24, 1918 and was honorably discharged at Fort Bliss March 27, 1919.

He leaves to mourn his death, one daughter and one sister.

Funeral services were held at the Catholic church Thursday at 2:00 p. m.

The American Legion post took charge of the burial.

Pall bearers were: Albert Scharf, Homer McDaniel, Milr Lesnett, Marshall St. John, Joe West, Praxedes Maes and Isidoro Gutierrez. Mr. C.O. Brewster Blew taps.

Glencoe Woman's Club

The Glencoe Woman's Club is sponsoring a dance Saturday Nov. 29 at the Bonnell ranch. The Goe orchestra will furnish the music. The proceeds from the dance will be used to buy a Defense Bond.

The regular monthly meeting of the Glencoe Woman's Club will be held Wednesday Dec. 3, in the Club House.

Mesdames Elzy Perry and Storm will be in charge of the program. Hostesses will be Mesdames Geo Perry and A. J. Warner.

The officers of the club are: Mrs. Frances Hale, Pres.; Mrs. Leota Pfingston, Vice-Pres.; Mrs. B. J. Bonnell, Sec.; Mrs. Wilbur F. Coe, Treas.

Mrs. Roy Morgan, Publicity Chairman.

NOTICE

The Annual Bazaar of the Woman's Club of Carrizozo will be held Saturday, Nov 27, from 2 to 5, at the Carrizozo Hardware Co. Please Come!

Emil Reynolds of the local Standard Oil Station left last Monday for El Paso to attend the Standard Oil school for students.

Mr. L. P. Hall of Ancho was in town on business last Tuesday.

Carrizozo Woman's Club

The Woman's Club of Carrizozo met Nov. 21 in the Community Building with the president, Mrs. Snow, presiding.

The meeting was opened by singing the chorus of "God Bless America" with Mrs. Burns at the piano. This was followed by Salute to the Flag.

In the absence of Mrs. Jenne, Secretary, the minutes of the previous meeting were read by Mrs. Frank Richard.

Minutes were approved as read. Report of Mrs. Finley, treasurer, was read and approved.

Mrs. Snow announced that the material for Red Cross sewing was now on hand and all interested in the work should see Mrs. Degitz.

Mrs. Norman reported one new member.

The Annual Bazaar was postponed for one week. It will be held Saturday Nov. 29, from 2 to 5, at the Carrizozo Hardware Co. All members are urged to attend and bring aprons, needle work or baked goods: The president announced that the club is now sponsoring the sale of U. S. Defense Bonds.

Miss Madena Brady presented the following program:

Songs: "In the Little Red School House" and "School Days" by Elizabeth Jordan, Dorothy Ferguson, Dorothy Hoffman and Geraldine Dixon. Mrs. Kelley at the piano.

"Health" was the subject of a very interesting and instructive discussion by Mrs. Shilling.

Delicious refreshments were served by the hostesses, Mesdames Ralph Petty, John Paul Jones, Felix Ramsey, Edith McKinley, and Miss Bea Romero.

Club reporter.

Legion-Auxiliary Banquet

The American Legion Auxiliary banquet and covered dish luncheon last evening, was the biggest all-around success of the season. Fifty were present to enjoy the big turkey and all the trimmings including dressing, walnut salad, white cake, hard sauce; nut cups were decorated with turkeys. Mr. Brewster played piano selections, and everybody sang.

Protection Farmer

Re-Elected Director of Farm Credit Board

Wichita, Kan., Nov. 17-(Special) E. G. Sharp, Protection, was re-elected a director of the Farm Credit Board of Wichita for a 3-year term beginning January 1, Fred R. Merrifield, general agent of the Farm Credit Administration of Wichita, announced today.

Sharp was chosen by stockholders of the Wichita Bank for Cooperatives which serves Kansas, Oklahoma, Colorado and New Mexico. As a member of the Farm Credit Board, he will be one of the directors of the Wichita Bank of Cooperatives, the Federal Land Bank of Wichita, the Production Credit Corporation of Wichita, and the Federal Intermediate Credit Bank of Wichita--all units in the Farm Credit Administration providing credit in the four states in the Ninth District.

Deputy Celestino Vigil of Hondo was here Monday on official business.

Mr. Florencio Vega was in town this week from his ranch east of town.

CARRIZOZO SCHOOL NEWS

The Turkey day game of Football was a great success. The sportsmanship of the boys was of the very highest type. The gross proceeds of the game was \$181.20. The high school thanks all who in any way helped to make this event a success.

The Faculty of the Public Schools gave a Banquet to the Business men of Carrizozo Wednesday evening. This annual event is one of the many illustrations of the splendid, cooperative spirit between faculty and local citizens.

The public is cordially invited to two programs of Christmas season, December 19th at 11 to 12 Saint Rita schools presents Christmas program in High School Auditorium. On the same day at 2:30 p. m. Prof. Ripley with a select group of students will present a Dramitization in High School Auditorium.

Thursday the Primary department moved to the Methodist church as their building is being razed. The new building is nearing completion. All of this is but a part of the enlarged program of the growing Carrizozo School System.

Great interest is being aroused this week in the election of Queen of the Harvest Carnival. The six popular girls in the race are: Jane Gallacher, Dorothy Jones, Charlene Page, Ramona Holquin, Vina Fay Jones, and Jeanne Hall.

Prof. Clyde O. Brewster played taps and acted as one of the pall bearers with other American Legion boys for the funeral of the late Calixtro Aguilar Thursday.

Who's Who And Where In The Service

With the hearty cooperation of this news paper, the Local Board and the Citizens of Lincoln County, the American Legion Post No. 11 of Carrizozo will list each week a number of service men from Lincoln County giving their full service address, as follows:

Pvt. John Dee West 200th., C. A. (AA) Battery E. Fort Strotzenburg, Pampanga, Philippine Islands

Pvt. Joe R. Cooper 60th., Inf. Fort Bragg, N. C.

Senon Chavez Co. "I" 157th., Inf. Camp Barkley, Texas.

Herman Ingram 85th., Air Base A C B. F. S. Sherman, Texas

Therman Ingram 85th., Air Base A C B. F. S. Sherman, Texas

Sgt. Wilfred H. Kennon Det. Medical Dept. Sta. Hosp. Ft. Bliss, Texas.

We wish to share with those who have helped with this program, by mailing in the addresses of our boys who are in the service, the appreciation voiced by these boys who have received many cards and letters from their friends at home. Many of our Lincoln County boys are serving at far distant outposts, and a word from us means, appreciative recognition of the valuable service they are rendering our Country and a salutation of thumbs up to the morale of every Lincoln County boy. Lets give them the hand they deserve by writing them every week.

There are approximately 75 of our boys in the service whose addresses have not been mailed in. If you know one of these boys, we urge that you send these in to the American Legion at Carrizozo at once, so that their names may be included in this column.

Dan Conley, Post Adjutant.

Mr. Edward Penfield of Lincoln was in town Tuesday attending to business matters and visiting his many friends here.

Flood Assistance Program Formulated

A joint meeting the County Program Planning Committee and representatives of governmental agencies was held in Carrizozo, Monday, November 24 for the purpose of formulating a program of assistance for the people in flood stricken area.

The meeting was called by the County Extension Agent to determine the assistance that could be rendered by the various agencies, and to give the agencies an opportunity to work out a program of assistance jointly. 45 people attended the meeting consisting of members of the Program Planning Committee from the area involved, the Extension Service, Farm Security Administration, Soil Conservation Service, Bureau of Agricultural Economics, Disaster Loan Corporation, Fish and Wildlife Service, the Department of Public Welfare, Forest Service, Grazing Service, General Land Office, Indian Service, and Bureau of Reclamation.

Results of the meeting are: (1) Water Facilities Proposal accepted and ready to be submitted to the Washington office of final approval. (If and when approved by the Washington Office, money at the rate of 3 per cent will be made available through the FSA for the reconstruction of dams and diversion ditches. The construction of the dams to be approved and engineered by the SCS) (2) The Forest Service to cooperate in furnishing logs to reconstruct diversion. (3) Supervisors of the Upper Hondo Soil Conservation District designated to take initiative in securing available aid that was offered by the various departments during the meeting.

Carl P. Radcliff County Extension Agent

Hale-Bowie

Mrs. Edna Littleton Hale and Mr. John Bowie were united in marriage Thanksgiving day in Santa Rosa.

The bride is a daughter of Mrs. Mattie Littleton and was born and reared in Carrizozo. She is very attractive and has many friends here.

The groom is in Southern Pacific Signal service and is attentive to his work. He has many friends and is well liked. Everyone extends good wishes.

Mr. and Mrs. Joe M. Hicks went to Belen last Tuesday for a few week's stay.

KNOW YOUR BANK

We Ask Your Co-operation

BECAUSE of the tremendous number of checks used in the conduct of business there is a tendency to regard them as money. A check is merely an order for a bank to pay money and as such has no intrinsic worth. It must be converted into cash to be of use. Thus when a check drawn on another bank is deposited, we must send it to that bank to convert it into cash. The depositor therefore should not draw on a deposit of checks until we have had time to collect them. If we pay a check drawn on uncollected funds we actually make a loan without interest. This obviously is unfair to our other borrowers and depositors. We will be glad to tell you how long it takes to collect checks drawn on different points so you can know when you may draw on your deposited items.

No Dud Duds for Army

The best isn't good enough for Uncle Sam's army when it comes to clothing. That is why the army maintains a "House of Magic" in the quartermaster's department in Philadelphia. It is the duty of this "House of Magic" to check on the quality of all clothing equipment destined for the army, and many are the methods used in making such checks. Here are shown a few of the steps taken in the manufacture of uniforms for our ever-growing army.

Left: Testing the strength of fabric. The cloth must stand up under a pull of 120 pounds.

Picture Parade

Here on the roof of the quartermaster's department you see fabrics undergoing a weather test.

Trained eyes scan every inch of this bolt of cloth as it is unwound from one roller to another. A slight defect would cause rejection.

Thread count. Counting the number of threads per square inch in a fabric sample—one method of ascertaining quality.

Picture above (left) shows a sample being treated to a rain test. The cloth must be 100% water repellent.

At the right (above) is shown an ingenious gadget which subjects a sample of material to tests that equal many months of wear in rain and shine.

Right: A perfect fit. A completed master uniform is being fitted on a dummy by a master tailor. Once approved, thousands of counterparts are turned out by mass production.

Rubber and Tin In Malay States Are Rich Prize

Vital Area Controlled by British Supplies Important Products For U. S. Industries.

(Colorful Singapore, Britain's largest foreign naval base, is well known as the source of important world news. Less is known, however, of the vast Malay peninsula, at whose tip Singapore's wharves load hundreds of ships with large supplies of rubber, tin and other riches of Malay, the Netherlands, Indies and Thailand. Because this section of the globe is now more than of vital interest in the news of the day the article below was prepared.)

(Exclusive to Western Newspaper Union and Copyrighted by National Geographic Society, Washington, D. C.)

On land which 50 years ago was a dense, tiger-infested jungle, plantation owners in the British-protected Malay States of southeastern Asia are producing more than a third of the world's rubber supply.

Much of the output is sent to the United States, for this country is not able to grow the rubber which its factories turn into tires, hose, mats, balloons, and a thousand-and-one other articles.

Why does rubber flourish in the Malay Peninsula?

Geography gives us the answer. Rubber trees need plenty of rain and hot weather. The Malay States are just north of the Equator, and their climate is one of the hottest and dampest in the world. Similar climate makes rubber production profitable also in the near-by-Netherlands Indies.

Supply From Brazil.

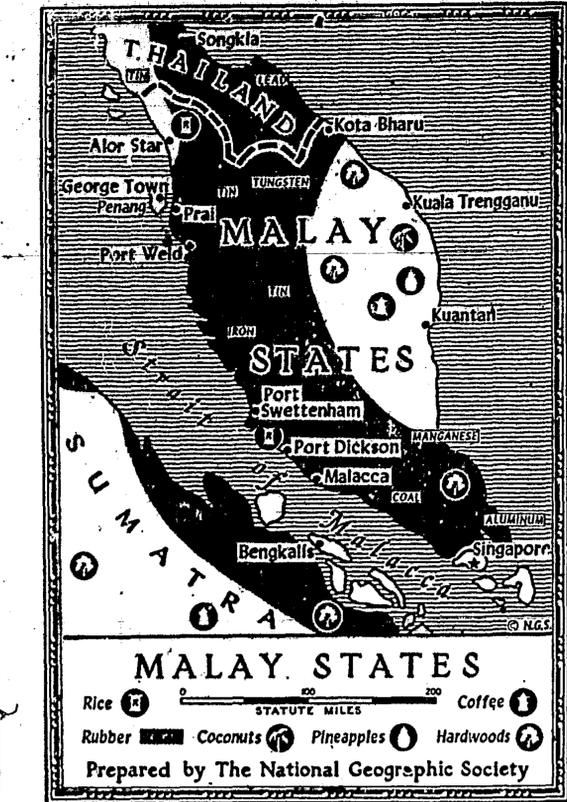

The first rubber plants were brought to the Malay States from Brazil about 60 years ago, and it soon became evident that they would grow well there. Now the Malay region far surpasses Brazil in rubber output, partly because its plantations are readily accessible to railroads and seaports, while Brazil's rubber trees are far inland in wild country.

It was no easy job to clear mile after mile of underbrush and 60-foot trees from the Malay jungles so that plantations could be developed. Snakes and wild animals—tigers, elephants, buffaloes, and rhinoceroses—were a constant menace, and aboriginal savages threw poisonous darts at the workers. Large jungle areas, however, never have been cleared; some parts have not even been explored.

Long before plantations were laid out to grow rubber, pineapples, and other tropical farm products, the Malay Peninsula was an important source of tin. From its mines still comes about a third of the world's tin supply. Some of the tin cans in your kitchen cupboard were made from this Malayan ore, for the United States mines virtually no tin.

Tin From Mountains.

The tin ore is found in the heavily wooded mountain ranges which rise like a backbone along the Malay

The above map explains in detail the source of the important products obtained on the Malay peninsula. Most important of these supplies as indicated are, rubber, tin, pineapples and other tropical farm products. Japan, already entrenched in French Indo-China, reportedly could use many of the products now going to the United States and Great Britain.

Peninsula. The ore is dredged from tremendous open pits. Along with tin, miners dig for smaller amounts of gold, iron, manganese, lead and tungsten. The latter is vital for making the filament used in electric light bulbs.

The laborers who first mined the tin and who did much of the work of clearing the jungles were not the native Malays, but Chinese. The latter came to the region in large numbers, and now make up about two-fifths of the Malay States' population of some 4,900,000.

The Malays, short, brown-skinned and thick-set, with straight black hair, are a clever people, but like many residents of hot countries, they are not overly industrious. One reason is that food, clothing, and shelter are not hard to obtain. Many of the Malays wear only a jacket and a skullcap, live in clusters of bamboo or thatched huts built on piles, and eat little besides rice and fish.

British Development.

Development of the Malay States has been in the hands of the British ever since Sir Stamford Raffles, an Englishman who envisioned a great future for the region, founded the port of Singapore in 1819. Its site on an island at the southern tip of the peninsula was then part of the jungle, but now Singapore has grown into a colorful, cosmopolitan city, one of the world's leading ports.

Its importance as a shipping center is derived from its situation.

Ships traveling between the Pacific and the Indian oceans pass it. Singapore's wharves handle not only Malay rubber and tin—the latter is smelted in the city—but the riches of the Netherlands Indies and Thailand. The British have fortified the port as their largest foreign naval base.

Fatal Horse Malady Studied for Effect On Human Beings

New fears that horse "sleeping sickness," which has already killed tens of thousands of American horses, may also be transmissible to human beings were indicated in reports of a recent study by the American Foundation for Animal Health.

The reports are based on deaths in Minnesota, Texas, and Eastern seaboard states, in areas where equine encephalomyelitis (sleeping sickness) has been prevalent. In one of the eastern states two individuals who were handling horses afflicted with sleeping sickness were stricken with a disease that was identified as human encephalomyelitis. One man died and the other recovered.

In 1938 a number of acute cases were reported among children along the East coast, with an extremely high rate of mortality. Examinations revealed the presence of a virus which was believed to be the "eastern" strain of horse sleeping sickness. This was followed in the same year by the discovery of human cases of equine encephalomyelitis in Minnesota. These, however, were traced to a different strain of the virus, the "western" strain. Still later, similar reports were received from the Pacific coast—and this year fresh reports of cases in human-encephalitis have come from Minnesota, Texas, and other states.

As a result, authorities are warning that horse sleeping sickness may be transmissible to man, although they are unwilling to say that this is definitely the case. In fact, horse sleeping sickness is still a highly baffling disease. It kills thousands upon thousands of valuable horses every year, yet veterinary scientists are still not sure of the exact means by which it is transmitted. They believe it is passed on by the bites of mosquitoes and other insects. The only known protection for horses, to date, is by immunization. This year veterinarians are vaccinating horses against the disease with a new concentrated form of a vaccine developed from chick embryos, and report better than 95 per cent immunity in field usage. However, vaccination of this type should be done before a horse is stricken by the disease, it is said.

Authorities are urging that in areas where horse sleeping sickness is raging, persons working with horses should exercise care in handling the animals, and should be particularly watchful against mosquitoes and other biting insects.

Camouflage Takes Shine From U. S. Army Truck

WASHINGTON.—It's farewell to the shiny army truck. In fact, it's all right even to allow some dust to stay on the surface. Old army chauffeurs who spent hours brightening up paint until it glistened may think there's just a laxing of work, but the new system was developed for better camouflage. Lustreless paint now used on army vehicles makes it difficult to see a truck from the air or from distances on land.

Resources of Nature Offer Opportunity For 'Unlimited' Production in United States

By WHEELER McMILLEN

(Mr. McMullen is president of the National Farm Chemurgic Council, which has as its objective the advancement of the industrial use of American farm products through applied science. He explains below some of the principles of chemistry in relation to the future of the United States.)

There is a single fact in science that has far-reaching significance for the future of the United States. I refer to the fact that of the entire composition of nearly every plant growth, whether it be a pumpkin, an ear of corn, or a walnut tree, roughly 93 per cent of the substance is manufactured by nature from atmosphere and moisture. Only about 2 per cent, on the average, is actually extracted from the soil. In other words, the resources we say are derived from the soil are actually derived, by the miraculous action of sunshine, from the atmosphere and moisture.

Within the borders of the United States may be found nearly every known combination of the attributes of plant growth—of temperature, of soil characteristics, of rainfall and humidity, of altitude and length or intensity of sunlight.

We have air and rain and sunshine available in illimitable and inexhaustible quantities.

The significance of this fact is that there need be absolutely no upper limit to the potential production of the United States, except the limit imposed by human ignorance of how to take full advantage of the

laws of nature. These superabundant possibilities for the production of raw materials from air, moisture, sunshine and soil, are unlike those of mineral production.

Conceivably the stores of wealth nature had deposited underground may in some distant century become exhausted, or become too inaccessible for economical use. Plant growth, on the other hand, is renewable, usually annually, with each cycle from seed to harvest.

Within the Twentieth century, two important new tools have been developed for the utilization of our plant raw materials.

The art of the organic chemist, a Twentieth century art, has added enormous importance to plant substances as industrial raw materials. With this art crops need no longer be regarded merely as sources of food, clothing and shelter. The chemical industries take the crops for their cellulose, proteins, starches, sugars, and oils, and convert these compounds into innumerable superior products for every-day use.

Alongside the organic chemist is the plant geneticist, with his art of improving plants for specific purposes. He has made it possible for the first time to grow crops to industrial specifications, as is actually being done with cotton, soybeans and other plants.

U. S. Woman Has a Job In Democratic World

COLUMBIA, MO.—U. S. women need better training for housewifely and motherly duties of tomorrow was the gist of the conclusions reached at a huge forum of sociologists, economists and feminine leaders held at Stephens college here. Called at the suggestion of Dr. James Wood, president of the college, the forum decided that the essential points of training were health,

character and finances. All of these, it was felt, are fields in which "our education system can contribute."

For twenty-nine years Dr. Wood has been a student of education's duties in helping women to understand their responsibilities toward democracy. Need for education, to do something about this has been present since suffragist days, he believes, for since that time, the U. S. has emphasized women's opportunities in democracy rather than their responsibilities.

Teach Yourself to Type With Aid of New Booklet

Good Touch Typist Wins Jobs.

TYPING away with never a glance at the keys! It may look tricky to you, if you're a job-seeker without such training. Really, touch typing's so simple you can teach it to yourself, with a keyboard chart like the one in our sketch.

Prepare for a job with the aid of our new 32-page booklet. Has keyboard chart, exercises, speed drills to train you in touch typing. Includes rules for typing English, business, social and official letters, tables of figures. Send your order to:

Lincoln's Wit

Lincoln didn't like the tone of a business letter inquiring about a man he knew. He reply was short, pointed:

"Yours of the 10th received. First of all, he has a wife and baby; together they ought to be worth \$500,000 to any man. Secondly, he has an office in which there is a table worth \$1.50 and three chairs worth, say \$1. Last of all, there is in one corner a large rat-hole, which will bear looking into."

Delicious Recipes Free

We Can All Be EXPERT BUYERS

● In bringing us buying information, as to prices that are being asked for what we intend to buy, and as to the quality we can expect, the advertising columns of this newspaper perform a worth while service which saves us many dollars a year.

● It is a good habit to form, the habit of consulting the advertisements every time we make a purchase, though we have already decided just what we want and where we are going to buy it. It gives us the most precious thing in the world: the feeling of being adequately prepared.

● When we go into a store, prepared beforehand with knowledge of what is offered and at what price, we go as an expert buyer, filled with self-confidence. It is a pleasant feeling to have; the feeling of adequacy. Most of the unhappiness in the world can be traced to a lack of this feeling. This advertising shows another of its manifold facets—shows itself as an aid toward making all our business relationships more secure and pleasant.

PATTERNS

"All the Traffic Would Bear"
There was a time in America when there were no set prices. Each merchant charged what he thought "the traffic would bear." Advertising came to the rescue of the consumer. It led the way to the established prices you pay when you buy anything today.

LEAVES from
Uncle Sam's Notebook
By HARRIET MAY WILSON

Paint It Yourself

There is no great trick to putting on paint. Almost anyone can do it, with a little practice, and few things add so much to the appearance of the home, inside or out, as does a coat or two of fresh paint. You can give your house and other buildings new life with a few simple strokes of the brush. Here are some pointers on how to begin.

If the surface which is to be painted is of new wood, it will need little preparation to receive the paint. It should be brushed to remove dust or loose dirt, or, if speckled with mortar or cement or similar material, it should be scraped until it is clean. If, however, it contains pitchy knots, such knots should be charred to kill the pitch. Yellow pine or other very resinous wood should be brushed with turpentine just before painting; cypress, with naphtha or benzol.

If the surface to be painted has been painted before and has begun to scale, all old paint must be removed. This is usually done with a wire brush. If nail holes show loose putty, this, too, must be removed. The holes may be refilled with putty after the first coat of paint has been applied.

A surface that has been enameled or varnished should be rubbed with an abrasive until the gloss is removed. Painted or varnished walls in kitchen or bathroom must be washed in soapy water, thoroughly rinsed, and dried before applying paint. A shingled roof or outside wall that has been creosoted can not be painted unless it has been weathered for several seasons, nor can a whitewashed surface be painted until the whitewash has been completely removed.

Any brick surface that has once been painted can be repainted if the surface is gone over carefully to remove any loose paint, but if the bricks have never had a coat of paint it is advisable to apply an undercoat of some sort—either a prepared undercoat or kettle-boiled linseed oil—to close the pores before painting.

Before applying either oil or water paints to a plastered surface, all old coats of calcimine, cold-water paint or whitewash, or wall paper must be removed. Unless a surface has previously been coated with oil paint or sized, such coverage must be made before applying calcimine or cold-water paint.

ESTIMATING THE AMOUNT

A recent government bulletin offers the following general estimate: "For a two-coat repainting job on a house of moderate size and in good condition, it is fairly safe to get as many gallons of paint as there are rooms in the house. For a three-coat job, about half again as many gallons may be required. For a three-coat job two-thirds of a pint of turpentine and 2 1/2 pints of linseed oil for every gallon of paint bought, will be required for thinner."

MIXING YOUR OWN PAINT
Mixing one's own paint is not a very difficult job, provided one has time to do it and the necessary containers and utensils. Home-mixed paint is, naturally, considerably cheaper than prepared paint. In the bulletin to which reference is made at the end of this article, will be found careful recipes for mixing inside and outside paints, for whitewashes, for implement paints and shingle stains.

NECESSARY BRUSHES

Amateur painters often try to "get along" with cheap brushes. This is a mistake, since cheap brushes usually make cheap work. On the other hand, good brushes are expensive and when bought must be given good care. Professionals use a 4-inch flat bristle brush for applying oil paints to flat surfaces; the beginner will find it easier to use a slightly smaller one—say, 3 1/2 inches. For trimming and small surfaces, it is advisable to have a flat brush from 2 to 2 1/2 inches wide. A flat or oval sash brush, 1 to 1 1/2 inches wide is also necessary.

Paint should never be allowed to dry on a brush. When painting is halted for an hour or more, put the brush in raw linseed oil; a brush that has been used in flat-finish paint should be put in kerosene. During long intervals between painting jobs, brushes should be suspended in raw linseed oil, in closed containers. If the brushes are not supported, they will get out of shape.

Calcimine or whitewash brushes should be washed thoroughly in water, after each day's use, and hung up to dry, bristles downward.

For further information, send five cents to Superintendent of Documents, Washington, D. C., asking for Farmers' Bulletin No. 1452.

MOLES AS LAWN PEST

Sometimes a large portion of the lawn is undermined with mole runways, the grass above such runways turning brown because of the cutting of its roots. Often repellents are used successfully to combat moles, the runs being opened with a stick at intervals of 10 to 15 feet, and insertions made of moth balls, snake naphtha, or lye. The holes should then be carefully closed with soil. Sometimes the moles may be drowned by inserting the garden hose in their runways.

Jewels and Beads Glitter on Dresses for Every Occasion

By **CHERIE NICHOLAS**

FLATTERING in the word for the charming dresses that are given a new loveliness with artful touches of gay embroidery and go glittering through the style parade with a wealth of nailheads, sequins, jewels and beadwork. Indeed, this is a season when it is every woman's duty to look her prettiest in gowns designed to "do something for you."

Now that sparkle for daytime frocks as well as evening gowns is the vogue the new fashions are playing up glitter for all it is worth. Every woman should yield to the call of black with a dash of color and the gleam of beadwork and jewels. A dress or suit of this description will prove your standby for almost every occasion. Pictured are several eye-appealing fashions selected from a collection of daytime modes designed and displayed by the style creators of Chicago at a recent winter preview.

The good looking black crepe tunic dress shown to the right emphasizes its molded shoulders and hipline by means of steel nailheads. Shown with it is a high and handsome hat of colorful feathers. You will make a well-dressed appearance in this dress wherever you go.

To the left a dressier type sparkles with rhinestones. The slim fitted jacket has rhinestone pockets and is worn over a dress with a sheer yoke outlined in rhinestones.

Speaking of sheer yokes, they are a new styling detail that is being worked in fascinating and versatile ways. The latest dresses have yokes of the sheerest black lace, and for extreme flattery designers are styling wools and crepes in black or browns or the new deep

"black cherry" tones with pastel chiffon yokes, some of which are beaded in matching colors, while others are joined to the dress top and the beading is concealed under sequin bands and bordering.

The figure seated in the center wears a dress of velvet trimmed with revers. There is a double peplum on the pert jacket. The dress is finished off at the neckline with a deep rhinestone necklace and a glittering rhinestone buckle fastens the jacket. Curly feathers cut out of black felt make the pompadour hat, which is graced with a floating veil.

The dainty young lady in the background to the right is wearing a delectable gown which follows the new trend toward colorful beadwork on black. You can get this model with light blue or dusty pink accents. Here is an apt illustration of the new trimming effect achieved with a bordering of embroidery outlining the seams of the sleeves, which have the new wide armholes. The midriff belt in matched beadwork balances the color inserts.

Very smart dresses are shown with all-round pleated skirts, the bodice top being of the long-torso, fitted type with an all-over sprinkling of beads or sequins or tiny gold nailheads. The spray of flowers worked in metal threads and beads is placed so as to take the place of the usual bodice clip or ornament. Black jet beaded sweaters of the middie type are also in smart fashion.

(Released by Western Newspaper Union.)

Smartly Styled

Here is a perfect gown to wear under your winter coat. It gives you color. It gives you chic. And this sleek town dress designed by Joseph Whitehead is in the best American tradition of perfect workmanship. It is of ravishingly colored striped wool with velvet touches at neck and waist. The "pinch" beret has bright coq feathers.

Like a Cape

An English idea borrowed for our sport coats: Ribbon bands to slip your arms through when you just toss the coat over your shoulders, like a cape.

Wear a Scarf or Shawl

Over Your Formal Gown
An avenue for expression in romance and feminine allure, there is no accessory that surpasses the witchery of a picturesque scarf or dainty shawl. That is, perhaps, the reason for the preference this season for flattering scarf or lacy shawl instead of a bolero or jacket to wear with evening clothes. This new acceptance of evening shoulder covering is further noted in the capelet shawls of self fabric, or long tulle scarfs matched to the dress. The vogue also accounts for the appearance of ostrich neck ruffs in the formal evening picture.

'Down in Back' Hems

Herald New Silhouette
In the very newest sophisticated dresses something happens to hemlines that give skirts an entirely new aspect. That "something" is that hemlines are made to plunge down in the back achieving a most graceful, pleasing new silhouette. For the most part the new "lines" are seen in slim black dresses for smart afternoon wear, and in narrow, seductive evening skirts. In the formal air the narrowness is relieved by a slit at the side that reveals your beautiful evening slippers.

Handkerchiefs

Fur fashions lead the way in novelty handkerchiefs with 22-inch chiffon squares bordered with genuine ermine. "Naughty Nineties" handkerchiefs are reminiscent of the era when every taffeta dress was the background for a big, bold-cabbage rose. Brilliant colors and effusive floral patternings are featured in this group.

For you to make

Pattern 7114.

BE up-to-the-minute in gay slippers you've crocheted yourself! Both these smart styles are done in afghan yarn and have

simple pattern stitches. They're good bazaar items, too.

Costly Guard

The war department has spent large sums of money to maintain guards at the graves of Presidents and ex-Presidents until their mausoleums were completed and civilian watchmen provided by a memorial association, says Collier's. The military guard, consisting of one officer and twenty-five enlisted men, that watched over the temporary tomb of the late President Harding for almost five years, cost the government nearly \$135,000.

AROUND THE HOUSE

If food burns in a pan, shake a generous amount of soda into it, fill with cold water and let stand on back of stove until pan can be easily cleaned.

A teaspoon of baking powder in the water in which meat and vegetables are cooked will help make them tender.

When pressing men's suits always press over a damp cloth.

Crocheted bedspreads can be washed, but they should be carefully spread out on a clean sheet to dry and not hung on a line.

Directly under the skin of potatoes is a valuable nutritional layer, so, whenever possible, cook potatoes in their jackets. The skin can then be peeled off easily without loss of food value.

Often a coat of paint is saved by first washing the walls before repainting them. This removes the coll and stains and assures a better job and takes less paint.

Leftover mashed potatoes can be fashioned into small cakes and used for holding creamed foods, shaped into flat cakes and browned, or then can be used for covering meat, fish or vegetable "pies."

The little tots will enjoy soup when they have tiny toast animals on top. Cut out small animals from thinly cut slices of bread. Toast and pass or place on top of each soup serving.

Keep in mind that rubber darkening silverware, so never let anything with rubber on it remain in the silver drawers. Use cord or ribbon to hold silver together in its case—never fasten with rubber bands.

LaGuardia, Penniless, Came to the Right Place

A few years back, Fiorello LaGuardia, New York's peppery mayor, was addressing a group of Salvation Army workers before a large audience. The mayor gave a long and fiery speech in praise of the organization. At the finish, the plate was passed. When it came to LaGuardia, he reached into his pocket for money. A blank look came into his face when he could not find any. He fumbled desperately in all pockets. Sensing his predicament, the commissioner of the Army said in a loud voice: "That's all right, the Salvation Army is the right place to come to when a man hasn't a nickel!"

Harm in Excess

The desire of power in excess caused the angels to fall; the desire of knowledge in excess caused man to fall; but in charity there is no excess, neither can angel or man come in danger by it.—Bacon.

Best for Juice
and Every use!

More "health" per glass in California juice
The deeper color and more delicious flavor of California orange juice come from extra richness.
Science proves this means more vitamins C and A, and calcium in every glass!
Seedless Navel oranges are easy to peel, slice and section for recipes, lunch boxes and all-round eating.

TRUTH about ADVERTISING

By CHARLES B. ROTH

WHAT ABOUT PRICE?

"A WOMAN," once remarked the famed Hoecier humorist Abe Martin, "will buy anything she thinks the store is losing money on." That was merely a funnyman's way of saying that in all our buying price is a most important consideration—the one thing with which we are concerned every time we spend a cent.

Charles Roth

Now what really constitutes price and how are prices established? Without getting too deep into economic principles, we know that prices are established by what is called the law of supply and demand.

This law teaches us that when the demand for anything exceeds the supply, prices go up. Conversely, when supply is plentiful but demand is light, prices go down. But how can we as customers know that this law won't be tampered with and men, shrewd, scheming and selfish, step in and raise prices and gouge us by making us pay them? They could, you know, and we would not be any the wiser.

Our safeguard against this is the advertising we see in the newspapers. That protects us. Under our competitive system of buying and selling, one merchant vies with another merchant for our trade. Each

comes out publicly in the newspapers with his price. We consult these prices before we buy. Seen in this light, advertising becomes the informant that prevents dishonest sellers from taking advantage of us and our ignorance of prices we might have to pay.

A recent mystery drama has the villain contriving to plunge the city into complete darkness for one night, so that he and his henchmen can dash in and make away with their loot. "We who have something dastardly to put over," he observed, "must needs fear the light."

High prices, skimpy quality, egg products also must needs fear the light. That is why they are cloaked in such phrases as: "We don't advertise. We pass the savings along to you." "Why pay the high cost of advertising? We put it into our goods," etc., etc.

But the merchant who advertises uses the light of advertising, and asks you to compare his goods and his prices and to find out before you buy. You can always pay his price, because it is the right price. That you know because the protective power of advertising has told you that it is.

And this protective power of advertising is working for you every time you unfold your newspaper and read an advertisement. That black print on white represents a buying guide which is worth several hundred dollars a year to you and your family.

Hill Warns People Against Nazi Tactics

"It is stupid beyond all expression for us in America to think we can escape a conflict with Hitler," declared U. S. Senator Lister Hill (Dem-Ala), in a radio broadcast to the American people. "Other nations thought the same thing, and today they toil in bondage," Mr. Hill said.

Warning the people against the method used by conquerors, Senator Hill declared. "Divide and Conquer is the rule they follow for today and they have been very clever at their task. The plodding German mind has measured our strength and our weakness. They apply themselves to the weakness in our armor. They know that a nation divided against itself cannot stand."

"Division in America is in large part the result of German penetration," Senator Hill said. "It is easy to see that now they stir up racial hatreds in the United States. They foster strife between capital and labor. They play upon the hearts of the weak sentimentalists. They encourage the delusions of the isolationists. They would make of America a nation of warring creeds and factions."

BINGHAM BREVITIES

Mr. and Mrs. Ted Mayer and family were in Socorro Saturday on business.

Mr. and Mrs. Hunter Long and daughters, Bettie and Anna Lou, spent part of the vacation in El Paso visiting Mrs. Long's sister.

The teachers returned from the Thanksgiving holiday, reporting very pleasant vacation. Miss Lizzy Story spent the holiday with her family at Bosque, and visiting friends in Socorro, Miss Anabell Howell made a trip to El Paso spending Thursday and part of Friday with her brother there. She also visited with friends near Deming until Sunday evening, returning to Bingham by bus Monday morning. Miss Juanita Kennedy spent the vacation at her cabin at Bingham.

Mr. E. C. Williams was hurt rather seriously when a cow kicked him on the ankle.

Mr. John Harless is recovering from a bad attack of the flu.

Mrs. G. Ortega, her son, Leandro and wife and baby returned to their home recently from a trip to Dexter, New Mexico.

Mr. and Mrs. J. W. Morris of Capitan were visitors at the N. F. Hefner home Thanksgiving.

Mr. Wayne Kennedy made a trip to Socorro on his bicycle last Thursday, returning Saturday.

Miss Anabell Howell spent part of her vacation with friends at Deming, Mrs. T. B. Tigner and Mrs. F. C. Tigner. She found the former in the hospital convalescing from a very serious major operation, but reported her much improved.

Mrs. Juanita Kennedy has been suffering from an infection in her hand. She reported to school Monday morning but still has very little use of her arm.

Mr. and Mrs. Mike Shaw and sons were guests at the Harless home Sunday.

Mr. Ira J. Kennedy, who has been away for several weeks, is spending a few days here before returning to Claunch where he is employed.

Everyone at Bingham is happy to report that the temporary bridge over the Rio Grande at San Antonio has now been completed, and traffic has once more assumed its natural course.

Rollands' Drug Store.

They would reproduce in America the conditions which devitalize France and made her an easy prey."

"And we in America have played into their hand," declared the Senator.

Reminding the American people that we have leaders of our own choosing and to give them a chance to lead, Senator Hill said, "This is time for sacrifice. It is time for unity of purpose. We have 130,000,000 people, who should be willing to give their all to the salvation of America."

"The fate which has overtaken the people of Europe is worse than death. That fate unless we become one nation, united in heart and purpose, resolved to make every sacrifice in order that Hitler may be destroyed and we may continue free."

Local and Personal

Mr. Bennie Cox is confined to his home with a seriously injured knee.

Mr. and Mrs. S. E. Greisen were in town the 26th. Mrs. Greisen attended the Rebekah Lodge.

The Woman's Club will hold their annual bazaar at the Carrizozo Hardware Co.'s store tomorrow.

Mr. and Mrs. C. M. Luckey and daughter were here Wednesday.

Jack Adams spent last weekend with the Ayers family at their Jake Springs ranch.

Mrs. Gilbert Dow of Roswell visited the Larry and Gene Dow families here last Friday.

Mr. Murray Morgan of Alamogordo was a business visitor here last Monday.

Emil Reynolds, operator of the local Standard Service Station left last Sunday for Carlsbad where he attended a special school for all Standard employees. During his absence Ben Leslye, Jr. of Capitan assisted Dan Conley.

Gene Hines of the S. P. Clerical Department in El Paso spent last weekend home.

Verber Jones of El Paso spent the week-end with Colonel Jones here.

Dr. M. G. Paden was a business visitor here from White Oaks Monday.

Mr. and Mrs. Tom Bragg of Nogal Mesa, were here on business this week.

Miss Dixie Lee Doss spent Thanksgiving at the home of her cousins, Mr. and Mrs. Herbert Teat in El Paso, then came up to Orogrande where she spent the remainder of the week at the home of her friends, Mr. and Mrs. R. C. Hemphill.

Mr. Willard Ripley, coach of the local school, was a guest of Mr. and Mrs. R. C. Hemphill at Orogrande last Sunday.

Messrs. Walter La Fleur and Lesnett Anderson, employees of the State Highway department spent last Sunday here with relatives.

1300 N. M. Pupils Enrolled In Spanish Project

Las Vegas, N. M.,—Studying best ways of teaching Spanish in New Mexico's elementary schools under a plan set up by the last State Legislature, Dr. Antonio Rebolledo, head of New Mexico Highlands University's Spanish Department, reported today that 1,300 school children are enrolled under the research program.

With Dr. Edward Eyring, President of Highlands, as supervisor and Dr. Rebolledo as director, the program was set up to discover an approved plan for elementary school instruction in Spanish. An eventual enrollment of about 4,000 is expected.

Two Mayors cheaper than one and the town's troubles vanish. When opposing candidates came out even in the election, both took office without pay and kept right on Mayoring when their term was up to save election expenses. Read of this simple way of curing municipal headaches, as told in The American Weekly, the magazine distributed with next week's Los Angeles Examiner.

Why people who hate are unhealthy. A prominent New York City Psychiatrist explains why it is impossible to be normal while carrying around a load of ill-will for your fellow citizens. Read this interesting article in The American Weekly, the magazine distributed with next week's Los Angeles Examiner.

Civilian Defense Week

Civilian Defense Week, beginning Tuesday, November 11 and extending through Sunday, November 16, was properly observed in our community by our leading merchants and organizations.

Tuesday, being Armistice Day and the opening day of Red Cross Drive, was celebrated by a Parade featuring the Red Cross, assisted by the High School band floats representing Woman's Club and different business houses. Concluded by American Legion members halting parade and facing the east and everyone standing in silent reverence for 1 minute. On this day Rolland's Drug Co. prepared a very attractive Red Cross Window.

Wednesday, War Against Waste Day, was assigned to the Business Men's Club, and speeches were made at their 6:15 dinner. Windows, demonstrating war against waste, were arranged by the B. & M. Dry Goods and T. & G. Grocery.

On Thursday afternoon, which was Sign Up for Defense Day, the American Legion Auxiliary held their regular meeting and invited Mrs. Selma Degitz and Dr. J. P. Turner to address the members and visitors. Both speakers were very interesting and the subjects of discourse were the type all parents and teachers should have heard. The Carrizozo Hardware Co. prepared an appealing window on "Sign Up for Defense".

Health and Welfare day came on Friday. Supt. J. M. Carpenter called assembly for 11:15, at which time the band rendered several selections and Mrs. Blanche Shilling gave a very interesting talk on Welfare. Also Mr. Carl Radcliff spoke on conservation of food. Both addresses were instructive and very interesting. On Friday, Elmer Eaker of the Paden Drug Co. prepared the display window on the theme "Health".

Saturday was "Civilian Protection Day." The Boy Scout exemplified this by enforcing the "Stop" signals recently installed by the city. By charging each transgressor 25 cents, their fund increased by about \$12. At sundown, the flag was lowered by the Boy Scouts and members of the American Legion. Mr. Petty exhibited the Boy Scout equipment in his window as display.

Sunday, Freedom Day, finished the week by all Churches using this as their topic for services.

The Local Defense Council takes this means of thanking all organizations and business men and our local speakers and the School for their aid in carrying out this program.

Arming of Merchant Ships

President Roosevelt signed the legislation to repeal the three key sections of the Neutrality Act. The President also requested from Congress a new \$380,050,000 appropriation for the Navy, including \$120,000,000 for "defense installations" on merchant ships. Navy Secretary Knox said the first armed U. S. merchant vessels will be plying the seas within a week. He said ships plying both the Atlantic and Pacific will be armed. The arming of the ships will require three to four months to complete. The Navy will put gun crews of from 12 to 18 men on all ships as fast as they are armed.

The Maritime Commission reported the keels of 21 Liberty ships were laid during October to bring the total to 76. Four of these cargo ships were launched in October, compared with three in September, and three more are scheduled to be launched this month. The Commission added four ships to its six-ship training fleet to help turn out 15,000 trained seamen for the deck, engine and steward's departments during 1942 and 1943.

WHO'S NEWS THIS WEEK

By LEMUEL F. PARTON
(Consolidated Features—WNU Service)

NEW YORK.—There was once a hill-billy girl who walked 10 miles over the mountain to borrow a hammer. She said her pappy was figuring to build himself a house next fall. It was an act of faith, not to be cynically regarded, in spite of small beginnings and remote eventualities, and quite comparable to the brave hopes and contrivances of aundry men of good will today.

Little Candles Still Burn in a Darkening World

Paul Van Zeeland, former premier of Belgium, is one of them. He sees a world of decentralized power after the war, with small, autonomous states of economic and political groupings, associated in regional collaboration—diverse enough to allow a "localization of function" in world economy and compact enough to form a stable political equilibrium.

He presented his plan to the New York conference of the International Labor organization, and, simultaneously, there issued from the conference a proposal for a bloc of nations, comprising Poland, Czechoslovakia, Yugoslavia and Greece, for post-war rebuilding and for collective defense.

M. Van Zeeland, holding both earned and honorary degrees from Princeton university, is widely and favorably known in this country both as a political philosopher and banking economist. He was a soldier in the World war, and in the ensuing years was an experimenter and innovator in financial theory and practice in a desperate effort to avert a doom which he thought might well end Western civilization.

Here in 1937, as an unofficial envoy of Europe, he tried to sell the United States a bigger cut in the bank for international settlements, with the quite plausible idea that a freer flux of money throughout the world would cure bellicose nationalism. Nothing came of this, but M. Van Zeeland keeps on hunching.

The son of a prosperous merchant of Soignes, he was educated at Louvain and Princeton, returned to Belgium to practice law and won eminence as an economist and banker—a director of the Bank of Belgium and professor of law at the University of Louvain.

BACK in the days of the militant suffrage campaign, this reporter asked several of the leaders whether they intended to maintain a political solidarity of women after getting the vote. They said they would do just that. The emphasis was on the effective pressure group, rather than on widely diffused social responsibility among women.

Considering that that is the history of pressure groups, of both genders—how to get power, rather than its social uses and implications—there is news interest in the simultaneous arrival of two distinguished women leaders of foreign countries each of whom has stressed social responsibility, along with the "liberation" and political education of women. They are Miss Caroline Haslett of Great Britain and Senora Ana Rosa S. de Martinez Gorrero of Argentina.

Miss Haslett is an engineer and advisor to the British ministry of labor, somewhat comparable in her career and achievements to our Lillian Moller Gilbreth of Montclair, N. J. She will study the participation of American women in the defense effort and will deliver some addresses on the technical and industrial mobilization of British women in the war.

She is president of the Women's Engineering society, director of the Electrical Association of Women, founder and editor of the Woman Engineer and the Electrical Handbook for Women. With many variants and on many occasions, she has said: "Women once asked for equality of opportunity. Now we ask for equality of responsibility."

The career of Senora De Martinez Gorrero has been a close parallel to that of Miss Haslett in its repeated stress on social responsibility. She came to Washington to attend the annual meeting of the Inter-American Commission of Women of which she is chairman. A spirited evangel of Western hemisphere solidarity against totalitarianism, she tells the meeting that the mission of women is to "rekindle the flame of a living faith in democracy." Senora De Martinez Gorrero is the wife of a wealthy gentleman and the mother of three children.

As Neutrality Act Was Revised

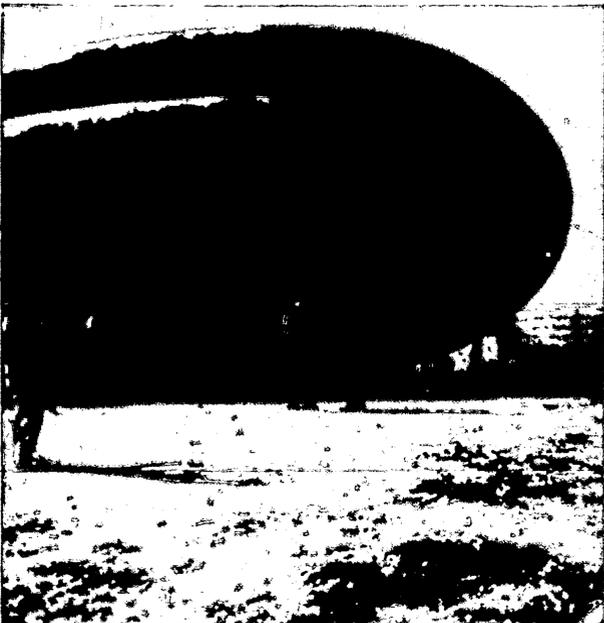

Revision of the neutrality act in the house was one of the hardest fought battles to come before that body in years. These photos, taken on the day the bill was repealed, show (top), left to right, Speaker Sam Rayburn and Majority Leader John McCormack, examining letter from President Roosevelt declaring that a vote by the house against repeal would "cause rejoicing in the Axis countries." Below: left to right, Rep. James P. Richards (S. C.) floor leader for the Democratic opposition, congratulates Rep. Sol Bloom (N. Y.), leader of fight for passage.

Strengthening Burma's Defenses

A Burmese longshoreman, clad only in breechcloth, aids in unloading Bren gun carriers from a British freighter at Rangoon. Burma is very much in the spotlight as the gateway through which passes British and American supplies to keep the Chinese fighting. One of Japan's threats was she would cut the Burma road.

Breakfast of Helium

A long tube is feeding helium into the barrage balloon of the U. S. marine corps in a process known as "topping off," at Parris Island, S. C. The balloon is made of neoprene, a synthetic rubber, while London balloons are made of real rubber. The purpose of the barrage balloon is to keep the enemy flying too high for effective bombing.

Conference on Civilian Defense for Women

Mrs. Roosevelt, assistant director of civilian defense, presided at a conference on women's activities in civilian defense. Sixty-seven women's organizations were represented. Left to right, Paul V. McNatt, Elsie Davison, assistant director of women's activities, Mrs. Roosevelt, and Civilian Defense Director LaGuardia.

Enrolls in Red Cross

Miss Adelaide Whitehouse, of Washington, D. C., enrolls the President in the American Red Cross as its annual membership drive begins. Miss Whitehouse wears the new volunteer uniform. She is assistant director of volunteer services of the national organization. Photo shows the President receiving his membership button.

Chilean Resigns

President Pedro Aguirre Cerda, popular front head of the Chilean government for three years, who resigned in favor of Geronimo Mendez, head of the radical party.

Crossing Dnieper

A rubber boat is used by an advance party of German forces to cross the Dnieper river. A photographer was on hand to greet the landing party. In the background is the gaunt skeleton of a destroyed bridge.

New Jap Premier

Lieut.-Gen. Hideki Tojo, Japan's new premier, shown speaking to the nation after his installation. His selection marked a new turn in the Japanese foreign policy.

FIRST AID to the AILING HOUSE

by Roger B. Whitman

(Released by Western Newspaper Union.)

Painting Doors
IT IS not always easy to paint doors when hanging normally, for the paint is likely to streak along the edges of the panels and in the moldings. The job is much simplified by taking the door off its hinges and laying it flat on boxes or on something else that will bring it to a convenient height. In taking off a door, it should first be opened, so that the outer corner can be blocked up with pieces of wood or books to relieve the hinges of the weight. In all modern hinges the two parts are held together by pins, which can be driven out to separate the hinge halves. The lower hinge should be the first to be separated. If the upper hinge is separated first, and the door should tilt, the leverage would be so great that the lower hinge would be bent or even broken. In replacing the door, the upper hinge should be the first to be put together.

With the door laid flat, paint or other finish goes on smoothly and evenly, with little chance that "tears" or "boards" will form.

Attaching Wood to Concrete.
It is often necessary to attach shelves or other woodwork to concrete walls, and the job may be something of a problem. One sure method is to drill holes an inch or two deep in the concrete, making use of a star drill, which can be had at a hardware store. The hole is then plugged with a piece of soft wood, into which a screw can be driven. In place of the wood, the thread of the screw can be wrapped with a thin piece of sheet lead. Hardware stores carry prepared plugs for the purpose, usually sold with a drill. These plugs and drills come in different sizes. For a thin wall, as in the case of concrete block or lath and plaster, bolts with hinged ends, known as toggle bolts, can be had. The hinged end is pushed through the hole, and turns at right angles, which gives a cold support when the nut is screwed down.

New Floor Over Old.
Question: Can a new hardwood floor be laid over an old floor? Or should the present floor be removed and the new one laid on the sub-floor?
Answer: The new one can be laid on top of the old one, which will save labor. The old floor should first be made smooth; protruding nails either driven in or pulled out, and roughnesses of the floor planed or scraped down. At lumber yards you can get flooring intended to be laid over an old floor; it comes completely finished, so that no further finishing will be needed after laying. It is thinner than ordinary flooring, for it serves only as a finish.

Sound-Proof Door.
Question: What is the simplest way to sound-proof a door between two apartments, or at least to deaden the sound?
Answer: Sound can be deadened by hanging two or three thick portieres over the door. For a better job, get four or five pieces of 1 by 2 across the door opening, from side to side, not touching the door. On these set a sheet of insulating board, cut to fit the opening. The joint between the door and the frame, all around, should first be packed with moth-proof felt, soft rubber strips, or something similar, for much of the sound comes through the joint.

Cleaning a Cellar.
Question: What is the best way to clean an old cellar in which there is a hot air furnace?
Answer: Everything in the cellar is probably coated with coal and ash dust, and the first step should be to loosen this by brushing. Then followed with a vacuum cleaner. Concrete floor and walls should be scrubbed with a strong solution of washing soda in water, followed by rinsing. All wood parts should be finished by painting. For masonry walls use cement paint, while the floor should have a kind of paint that is proof against injury by lime. For the wood parts you can use casein paint.

Noisy Road.
Question: We live on a road intersection that is very noisy. Is there any kind of sound-proof glass that could be put in the windows of our living-room?
Answer: Glass in two thicknesses, separated by a quarter-inch or more, might do the trick, but would require new window frames. Double windows would give you the same effect. Metal weatherstrips around the window should do quite as well. Another method would be to equip each one of the windows with an electric ventilator of a kind that admits air, but keeps out sound. These can be had from dealers in electrical equipment.

ASK ME ANOTHER?

A General Quiz
The Questions
1. In what sport do three kinds of animals take part?
2. What is the diameter of the moon?
3. What was Ty Cobb's lifetime major league batting average?
4. The stamp act of 1765 imposed a duty on what items used in the American colonies?
5. What animal has a bull for a father, a cow for a mother, and is known as a pup?
6. What city is known as the Pittsburgh of the South?

The Answers
1. Fox hunting (the fox, horses and hounds).
2. The diameter of the moon is 2,160 miles.
3. Ty Cobb's average is .367.
4. Paper, vellum, and parchment.
5. A fur seal.
6. Birmingham, Ala.

What to give the men in Uncle Sam's services for Christmas is already solved for you by surveys made in the Army, Navy, Marine Corps, and Coast Guard. Cigarettes and smoking tobacco head the list of gifts the men want most. This naturally places Camel Cigarettes and Prince Albert Smoking Tobacco in the forefront, since actual sales records from the service men's stores, afloat and ashore, show the favorite cigarette is Camel, and the big favorite among smoking tobaccos is Prince Albert, the National Joy Smoke. Dealers are already featuring "Send him a carton of Camels" or a "Pound tin of Prince Albert" for Christmas.—Adv.

The Lamp in the Valley

BY ARTHUR STRINGER

Sidney Lander, mining engineer, is engaged to Barbara Trumbull, but apparently loves Carol Coburn, Matanuska school teacher. Salaria Bryson, a big outdoor girl, also loves him. Carol's father died with an unproven claim

which Trumbull is contesting. Lander quits his employ, becomes field manager for the government's Matanuska Valley project. But all is not smooth in the great valley experiment. Eric, the Red, makes an inflammatory

speech. Carol also speaks up and Eric stops her. A shot rings out and Sock-Eye Schlupp, an old "sourdough" friend of the Coburns, pistol in hand, orders Eric to dance. Sock-Eye is ordered arrested but vanishes. Salaria also has gone.

Salaria didn't come back that night. By the following noon, her father became alarmed. He even appeared at the Administration Building and asked for help. And it seemed the most natural thing in the world that Lander and his lean-nosed Sandy should be among those who hurriedly made ready and trailed out into the surrounding hills in search of her. Why Lander headed out past the Happy Day I don't know. But I do happen to know that when Barbara Trumbull intercepted him on the outer trail and offered to join him in what she termed his gesture of gallantry, he promptly and firmly declined her companionship. This, apparently, plucked the lady from the superintendent's lodge, for she later visited Katie's tent office and made inquiries as to the character and appearance of the missing Artemis. And it obviously didn't add to her questioner's happiness when Katie informed her visitor that Salaria Bryson was the most superb specimen of vital and lawless womanhood she'd ever clapped eyes on.

It was unfortunate, I suppose, that Lander should have been the searcher who eventually found Salaria. He succeeded in locating her, late the second evening, half way up the slope of Big Indian Mountain, in an impromptu camp behind a wind-break. For she was woodsman enough to take care of herself in the open. When Sandy nosed her out, in fact, she was quietly broiling bear steaks over a campfire. But she had been unable, apparently, to resume her homeward journey because of a hurt ankle, incurred when she had a hand-to-hand encounter with a wounded black bear. There may have been some question as to the extent of her injury, but the bear carcass was there to substantiate her story of the encounter.

They had to rest and make camp on the way, which took up a night and a day. The ankle, I gathered, grew worse, and for some of the distance Salaria surrendered her independence of spirit to the extent of permitting her rescuer to carry her. At other times, by clinging to his shoulder, she was able to hobble along at Lander's side. And I could imagine how the forlornly primitive heart of that dusky Artemis went pit-a-pat against her ribs when she felt those sustaining arms about her. But the final portion of that safari wasn't as harmonious as it might have been. For it happened to be John Trumbull's car that picked Salaria up, just beyond the Happy Day, and carried her to her father's door. Lander, for quite discernible reasons, declined to ride in that car with his charge. And Trumbull's openly expressed view of the adventure in no way added to Sam Bryson's peace of mind.

"The first thing," I suggested, "is to have Doctor Ruddock look at that ankle of yours."

Salaria, however, promptly declined the services of Doctor Ruddock. She agreed, in the end, to let me bring Katie and her first-aid kit to the shack. And it wasn't long before that expeditious nurse had the ailing member looked over and strapped up.

"Will she be all right?" I asked as Katie's Black Maria went lurching back to Palmer.

Katie's Celtic gray eyes met mine. "It's not her ankle that needs strapping up," announced the Red Cross nurse. "It's that many-hungry heart of hers that needs attention."

Katie smiled at my small and meditative, "Chi!"

"Isn't it a bad sprain?" I inquired.

"There's something there all right," conceded Katie. "But I've seen girls dance half a night on a foot worse than that."

This gave me something to think about.

"You mean," I suggested, "that Salaria wasn't as helpless as she pretended?"

Katie's laugh was slightly enigmatic.

"Such things," she observed, "have been known to happen. She probably saw him coming, and thumped herself with a stone."

When I stopped at the post office for my mail I saw Lander's truck there. A moment later Lander himself came out, with an open letter in his hand. He looked harried and haggard.

Just then the Trumbull car swerved in and shuddered to a stop close beside the truck of battleship-gray. Alone in the driver's seat was Barbara Trumbull, with her face pale and her eyes flashing fire.

"I've just seen the heroine of your mountain adventure," she said. "She seems less ashamed of the situation than you do. She was, in fact, barbarously frank about it all."

Lander stiffened.

"Then there's nothing much for me to say."

That brought a vibrato of passion and hurt pride into Barbara Trumbull's voice when she spoke.

"I suppose not," she cried. "Especially as it isn't the first time

you've indulged your penchant for nocturnal romance."

I made no response to that oblique thrust. But Lander's movement as he stepped between us seemed almost a sheltering one.

"That's about enough," he said in a voice as hard as nails.

"I'll say it is," cried the lady to whom life must have brought very few frustrations. And it was all so futile and foolish that I felt vaguely sorry for her. For with a shaking right hand she drew a ring from her finger and with a little gasp of anger flung it at Lander.

She flung it badly. It went past the tight-lipped man and landed in the road dust a dozen paces away. But Lander disregarded it. He merely stood there, rather gray of face, studying the woman in the driver's seat who so abruptly threw in her clutch and roared off down the long-shadowed roadway.

I picked up the ring and held it out to Lander.

"You'd better keep this," I said. "It'll all straighten out in time."

But Lander didn't seem to hear me. His eyes remained on the vanishing car, even when I forced the ring into his hand. Then he looked at me, like a sleepwalker suddenly awakened.

"Do you believe that rot?" he challenged.

I tried, quite without success, to laugh the tragedy out of his face. "I

His eyes remained on the vanishing car.

went through much the same thing, without any apparent peril," I reminded him. "I've always rather banked on your honesty."

"Then you trust me?" he asked in a disturbingly lowered voice.

I tried to keep my heartbeats steady under the questioning gaze that rested on my face. The barriers, I felt, were finally down between us. It was only my woman's pride, I suppose, that made me fight back the impulse to comfort him in his unhappiness.

"Of course," I answered.

"Then you'll have to keep on at it," he grimly asserted.

"Why?" I asked with a creeping sense of disappointment.

That sense of disappointment sharpened as he reached for the letter which he had thrust into his coat pocket.

"Because I've just had word Trumbull's putting through his cancellation of your Chakitana claim. He's to head through to the mines there as soon as a plane can pick him up."

It failed to stir me as it should have. There was a cloud on my heart, I remembered, more important than mine claims. But men, I also remembered, too often preferred facing a hard fight to uttering soft words.

"It's not easy to understand," he patiently explained. "But your father's patent was granted and recorded. There's no dispute about that. But the Territory has a large area of unsurveyed land, land remote from any center of population. The Chakitana falls under that heading. So the field notes of a survey for any claim there, where the survey is not tied to a corner of the public survey, has to be tied to a location or what they call a mineral monument, something showing definite adjacency to some recognizable landmark, such as a creek or a river or a mountain. Is that clear?"

"I think so," I dubiously responded.

"In the case of the Chakitana claim," he proceeded, "the anchoring landmark is the Big Squaw Creek. But the Trumbull plat shows the Big Squaw to be where he wants it, and not where your father first found it. And Trumbull's intention is to fly in with the Registrar of Mines and a couple of official sur-

voyors and have his plat reading confirmed."

"Then what are we to do?" I asked.

"I want you there as owner," was his answer, "when that official survey is made."

"But how?" I asked, trying to speak calmly.

"We'll go by plane," he explained, "as soon as I can get one in here to pick us up."

I found something consoling in my thoughts during the tumult of packing and making ready and saying an abrupt good-by to my schoolchildren, who faced their midsummer vacation a few days earlier than they had expected.

I hurried on to explain to Katie. But Katie, when I found her in Doctor Ruddock's new surgery surrounded by crates and boxes, didn't seem greatly interested.

"Why the sudden grandeur?" I asked that tight-lipped lady as I watched her hanging curtains in the wide-windowed living room that still smelled of fresh paint.

"Then you haven't heard?" queried Katie. "It's that boss of mine, getting the nest ready for the new ladybird."

"You don't," I demanded, "mean the nurse from Seattle?"

"Of course I mean the nurse from Seattle," was Katie's even-toned reply. "She's sent up her silver and linen. And the lady herself lands at Seward on Friday." Katie adjusted a curtain pin and stepped down from her chair. "They're to be married on Saturday at Anchorage. And Ruddy wants everything shipshape when they swing back to Palmer on Sunday."

Katie endured my stare without flinching.

I studied the line of Katie's brawny shoulders, dark against the window light.

She smiled a little, at my gasp of protest, but deep in those Celtic eyes of hers I could see the light of tragedy.

CHAPTER XX

It's odd how destiny can hinge on small and unforeseen things. In this case it was nothing bigger than a safety pin that proved the god from the machine.

For our flight in to the Chakitana wasn't as prompt as Lander had expected.

"I can't get a plane in today," he explained. "Every ship within flying distance seems either chartered or spoken for. And in that I detect Trumbull's fine Italian hand."

So, having no choice in the matter, I waited. The Project was like a propector's pan: what seemed like foolish agitation was really a sorting out of the true metal, with the weaklings and the rubbish slowly washed out over the rim of the North.

Week by week, the real workers were taking root and making their half-finished homes a little more livable, or building fences and sheds, or clearing and draining and seeding more land—and discovering it to be incredibly rich land, land that could grow thirty-pound cabbage-heads and Climax oats that would run sixty-five bushels to the acre.

The twenty-hour summer day breathed warmth into that black bowl, touching the dead silt into life, steaming, abundant, explosive life. It brought growth that one could almost see with the naked eye, hay that could hide a team of horses, a tropical prodigality of growth, rank and arrogant, gargantuan vegetables, grain as high as a man's head, too rank with straw, peas and vetch that smothered themselves in their own luxuriance sweet-peas that could over-run a cabin and smother it in bloom before frost cut the mad growth short, berry-brambles that became a forest, muskeg-surfaces that turned into a choked tangle of grass and alder and cranberry, tilled gardens where potatoes grew as big as footballs, where carrots were like war-clubs, where one strawberry could fill a teacup.

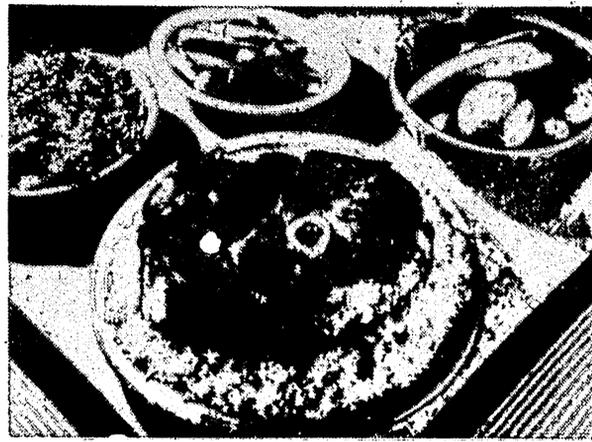

The tillers of that soil may have wondered where their ultimate markets were to be. But they tapped its richness and were stunned by its rewards. And much of the glory, I also knew, went to the women who worked at their side.

They had waited so long to get into homes of their own that there was some excuse for the noisy and foolish way they kept celebrating every escape from tent life. Each one of those rough-and-ready housewarmings had meant an all-night party, with mouth organs and accordions and much to eat and drink. Yet now and then a more gracious note had struck through the roughest noise. When the Saari family, se date Finns from Wisconsin, commemorated their accession to their five-room bungalow of spruce logs, they first sprinkled salt on the doorstep and then conducted a service of prayer in the living room where the carpenter's shavings still littered the floor.

Household Hints

by Lynn Chambers

Meet the Pot Roast—Juicy and Tender (See Recipes Below.)

Savory Meals

Pep up the personality of your meals by serving meats more often as the weather becomes frost-nipped and colder. Meats are synonymous with good, wholesome, hearty meals because they're satisfying and filling. Meat sets good tone to the meal and rounds it out to give you a sense of completeness when you've finished eating.

Meat is honest and straightforward both in flavor and purpose. Its abundance of vitamins and minerals really come through and give you sustaining energy. All in all meat contains nine out of the thirteen food essentials of a normal diet.

First is protein and meat's proteins are complete. They help to build or repair body tissues which you wear down every day and keep you on good maintenance level. It has iron the oxygen carrier, copper, iron's partner and the builder of hemoglobin.

Meat has phosphorus that helps calcium in building good teeth and bones and helps give you energy. Meat has fat, too, producer of more energy and heat.

As for vitamins, meat is an important source of four: vitamin A, the resistance and growth vitamin; thiamin (vitamin B1) which helps the body translate sugars and starches into energy; riboflavin, of which meat is the top source, that helps prevent nervous disorders, and finally nicotinic acid, which prevents a nervous digestive disorder known as pellagra.

Fortunately for economy's sake, the lower-priced cuts of meat are just as good for these minerals and vitamins as the higher-priced ones. Today's column gives you tricks and tips on how you can use them for savory meals and have them juicy, tender, and full of flavor.

First call is for pot roast which you can make just as desirable as the best steaks and chops:

***Pot Roast With Vegetables.**

Wipe meat with a damp cloth. Brown in hot fat and add one or two small onions sliced to meat while it is browning. Season meat with salt and pepper. Combine 1/2 cup catsup with 1 cup hot water and add to meat. Place in a roaster or cast-iron skillet or pot, cover tightly, and allow to simmer gently 45 minutes to the pound. Add more water if necessary. Whole carrots and onions may be added to the meat and cooked with it the last 45 minutes of the cooking period.

LYNN SAYS:

You're going to sell nutrition to your family not just because of its virtues but by attractively garnished, well-cooked food. Here's how:

Whenever possible serve the vegetables with the meat, as browned potatoes, whole carrots, browned onions. These can be placed around the meat for effective coloring.

Radish roses with parsley brighten almost any kind of meat platter.

Spinach, chopped, seasoned and mixed with white sauce can be made into nests or mounds and served around meat.

Baby beets may be scooped and filled with green peas served around the meat or on a platter by themselves.

Ham can be scored in circles for a change by using a small cookie cutter and a maraschino cherry placed in each circle. Circles look best if they overlap.

Bananas or pineapple slices broiled make a tantalizing accompaniment to baked ham, roast beef or lamb chops.

Slices of orange topped with a smaller slice of jelly is excellent for meat platters.

THIS WEEK'S MENU

- *Pot Roast***
- Carrots
 - Apple, Celery, Raisin Salad
 - Bread and Butter Beverage
 - Baked Custard, Strawberry Jam
 - Sugar Cookies
- *Recipe given

Veal is tender and delicate and deserves careful cooking.

Breaded Veal Cutlets. (Serves 6)

- 2 pounds veal steak, cut in 6 pieces
 - 1 egg
 - Cornflake crumbs
 - 1 small onion, chopped
 - Salt and pepper
 - 4 tablespoons lard
 - 1 No. 2 1/2 can of tomatoes
- Dip pieces of meat into the egg and cornflake crumbs which have been seasoned with salt and pepper. Brown in hot lard on both sides, using a heavy frying pan or skillet. Add tomatoes and chopped onion, cover and cook slowly for 1 hour.
- Variation: Make as above omitting tomatoes and onion. Add 1 cup of sour cream after meat is browned and cook for 1 hour. Thicken the sour cream gravy with flour and water and serve.

A cut which you may not have used in lamb chops, but I assure you they are simply delicious when braised. They'll be a good food dollar stretcher for you this season:

Braised Lamb Shanks. (Serves 6)

- 6 lamb shanks
- 2 tablespoons lard
- Salt and pepper
- 1 cup celery
- 1 cup carrots, cut fine, if desired
- 1 cup green beans, cut fine, if desired

Brown the lamb shanks in hot lard. Season with salt and pepper. If you're using vegetables, place them in the bottom of the casserole and add a small amount of water. Put in the lamb shanks. Cover and cook in a slow oven (300 degrees) 2 hours.

Kidneys are right up there among the top-notchers as a source of riboflavin, preventer of nervous digestive diseases. They're good broiled with bacon and good also in this delicious savory loaf:

Kidney Loaf. (Serves 6)

- 1 pound of beef kidney
- 1 cup milk
- 2 slices bread
- 1/2 cup bacon drippings
- 3 slices bacon
- 1 small can pimientos
- Salt and pepper
- 2 tablespoons grated onion
- 1/2 teaspoon powdered sage, if desired

Wash kidney in cold water. Drain well and grind, using internal fat. Pour milk over bread and cook. Combine all ingredients except bacon and mix thoroughly. Line bottom of pan with uncooked slices of bacon, add meat mixture and pack firmly. Bake in a moderate oven (350 degrees) for 1 1/2 to 2 hours.

What could be better than spare-ribs with barbecue sauce as a tasty meat dish on a cold night? Bake the spare-ribs brown and crispy and brush them with the sauce for a dish you'll long remember and enjoy looking at!

Barbecued Spare-ribs. (Serves 6)

- 5 pounds spare-ribs
 - Brown spare-ribs under broiler. Cover with the following sauce and bake about 2 hours in a covered pan in a slow (325 degrees) oven.
- Barbecue Sauce.**
- 1 small onion chopped
 - 2 tablespoons lard
 - 2 tablespoons vinegar
 - 2 tablespoons brown sugar
 - 3 tablespoons lemon juice
 - 1/2 cup catsup
 - 1/2 cup water
 - Salt and pepper
 - 1 teaspoon paprika
 - Dash of ground cloves and cinnamon

Brown onion in lard and add remaining ingredients. Brush over spare-ribs.

(Released by Western Newspaper Union.)

JUST

Trimmed 'Em!
"I just heard him say he was in close touch with the heads of several big organizations!"
"Yes, he's a barber!"

Entreating Now
Diner—I would like to change my order.
Waitress—Yes, sir, what would you like to make it?
"I think I'd better make it a petition."

The Truth
First Actor—I played Hamlet once, in the West.
Second Actor—Did you have a long run?
First Actor—Seven miles.

Never mind if old So-and-So's forgotten more than you'll ever know. It doesn't do him any good either.

That Counted
A little girl of four was entertaining two visitors while her mother was getting ready. One of the visitors remarked to the other with a significant look. "Not very p-r-e-t-y," spelling the last word.
"No," said the child, quickly, "but awfully a-m-a-r-t."

America's favorite cigarette gift package is now making its appearance in the windows and on the counters of local dealers. It is the famous carton of Camel Cigarettes, all dressed up in gay, colorful, Christmas wrapper—complete and ready to give even to the gift card printed on the wrapper. Camels also are featured in an attractive gift of four "flat files"—200 cigarettes—packaged in a snow-covered Christmas house. An ideal gift for all smokers—including the men in the service with whom Camels are the outstanding favorite.—Adv.

Serves **TEN** DAILY NEEDS

10. Dry nostrils
11. Sore throat due to colds
12. Jars or bumps

MENTHOLATUM

Wonder and Admire
The longer I live the more my mind dwells upon the beauty and the wonder of the world. I hardly know which feeling leads, wonderment or admiration.—John Burroughs.

DON'T LET CONSTIPATION SLOW YOU UP

When bowels are sluggish and you feel irritable, headachy and everything you do is an effort, do as millions do—take FEEN-A-MINT, the modern clearing gum laxative. Simply chew FEEN-A-MINT before you go to bed—also without being disturbed—castor oil gels, through relief, helping you feel well again, full of your normal pep. Try FEEN-A-MINT. Tastes good, is handy and economical. A generous family supply costs only

FEEN-A-MINT 10¢

Ready for Good
Be always at leisure to do good; never make an excuse to decline the offices of humanity.—M. Aurelius.

Relieves distress from MONTHLY **FEMALE WEAKNESS**

Lydia E. Pinkham's Compound Tablets (with added iron) not only help relieve cramps, headache, backache but also weak, cranky, nervous feelings—due to monthly functional disturbances.

Taken regularly—Lydia Pinkham's Tablets help build up resistance against distress of "difficult days." They also help build up red blood. Follow label directions.

WATCH the Specials

You can depend on the special sales the merchants of our town announce in the columns of this paper. They mean money saving to our readers. It always pays to patronize the merchants who advertise. They are not afraid of their merchandise or their prices.

I. O. O. F. Notes

At the regular meeting last Tuesday evening the Oddfellows held an election of officers for the next term. Those elected were: Noble Grand, Rev. Klaseen; Vice Grand, Marvin Burton; Secretary G. H. Dorsett; Treasurer, Calvin Carl; two trustees were Roy E. Kent and Bradley Smith.

Members present enjoyed a short social meeting before adjourning.

Visitors from Nogal this week were Mrs. A. B. Zumwalt, Mrs. Pfingsten, Mrs. Hust.

W. H. Hart of Ruidoso was a visitor here yesterday.

Mr. and Mrs. Simpson of Corona were here on business yesterday.

Mr. Brack Sloan was in from his ranch north of town attending to business matters Thursday.

Mrs. Henry Hoffman and children went to El Paso last Saturday on business.

Mrs. Paul Mayer was a business visitor in Tularosa last Saturday.

Mr. and Mrs. Allie Stover entertained their daughter from Las Cruces for a few days this week.

Rainbow School of Instruction

Mrs. Laura Z. Becker, Supreme Deputy of Rainbow for Girls accompanied by Mrs. Linberg, Mother Advisor of the Belen Assembly came here Sunday to hold a school of instruction for the Carrizozo Assembly of the Rainbow Girls. Luncheon was served at 12:15 by the Advisory Board assisted by the members of the Assembly. Twenty eight persons sat at table.

The Assembly meeting was called to order at 1:15 in the Masonic Hall, and the work exemplified for the benefit of the visitors. A few mistakes were made and were corrected by the Supreme Deputy. Mrs. Becker praised the girls for the enthusiasm shown and the way in which they put on the work. She promises to make a return visit early next year, and hoped that the membership would be doubled by that time.

Mrs. R. E. Blaney.

In the Probate Court of Lincoln County State of New Mexico, ss. County of Lincoln,

NOTICE

TO WHOM IT MAY CONCERN: Notice is hereby given that an instrument purporting to be the Last Will and Testament of Daniel D. Tiffany Deceased, has been filed for probate in the Probate Court of Lincoln County, New Mexico, and by order, the 5th day of January, 1942 at the hour of 10:00. A. M., at the court room of said court in the Village of Carrizozo, New Mexico, is the day, time and place for hearing proof of said Last Will and Testament.

Therefore any person or persons wishing to enter objections to the probating of said Last Will and Testament are hereby notified to file their objections in the office of the County Clerk of Lincoln County, on or before the time set for hearing.

Dated at Carrizozo, N. M., this 27 day of November, 1941.

FELIX RAMEY, Probate Clerk. By Otho Lowe, Deputy.

Local and Personal

Mr. Roy E. Kent of Oscura was in town last Tuesday evening and while here attended the regular meeting of the Oddfellow Lodge.

A letter from Mr. and Mrs. Robert Ellis Hemphill, who are now stationed at Chilquin, Oregon, states that it is only 12 above zero there. Well, personally, we prefer New Mexico weather.

County Assessor Larry Dow was at Lincoln on official business last Tuesday.

Mr. M. F. Barnett of Hollywood was in town on business Wednesday. While here he was a caller at this office.

Mrs. Johnie Walker entertained the Baptist Missionary society last Wednesday. A good crowd attended. Refreshments consisted of pumpkin pie, apple pie and coffee.

Mrs. Robert Lewis and son, Robert Jr., went to Hobbs the last of the week for a visit.

Mrs. Nellie Rely has returned from Carlsbad, where she visited her daughter, Herndon.

All the students who came home for Thanksgiving have returned to school.

Mr. Mack Brazel was here from Tularosa last Wednesday, to visit his sister, Mrs. Albert Snow and his mother, Mrs. Brazel.

Mr. and Mrs. George Goodson were in from Luna Wednesday.

Mr. and Mrs. B. L. Moore of Jicarilla attended the American Legion Auxiliary party last evening.

The Woman's Club will hold their annual bazaar at the Carrizozo Hardware Co.'s store tomorrow.

Rolland's Drug Store has a wonderful line of Christmas gifts.

When Tomorrow Comes

"How are we going to find jobs when this emergency is over?"

That's a thought in the minds of millions of men and women who are now working in defense factories all over the country. What will happen to them when America beats its swords into plowshares?

Industry is tackling that problem right now, along with the dozens of other problems created by defense production itself. It's laying plans for a speedy change-over to increased civilian manufacturing when this emergency is ended.

Even while they're busy turning out more and better armaments, many companies are studying defense inventions, trying to figure out peace-time application for them. At the same time they are continuing their customary research on civilian articles. They're developing new products of every description-- developing them right up to the point where they can be put on the market. Only, instead of putting them on the market now, they're storing them away on the shelf. When this emergency ends, those new products will be taken down and put into production immediately.

Facts like these indicate that industry, as usual, is doing its job today and planning ahead for its job tomorrow. And when tomorrow comes, it will have many new articles to manufacture. In manufacturing them it will be able to create new jobs and give us all more of the comforts and conveniences of life that we Americans want.

Chevrolet News Service Program

DETROIT, Nov. 18 -- Field operating programs for an army of more than 29,000 Chevrolet service men in 8,400 dealerships from coast to coast, previewing plans and policies for 1942, will be next month under the direction of Ed Hedner, national director of service for Chevrolet.

A complete review of 1941 service advances and a reinterpretation of the service man's role under the new conditions imposed upon motorists, will share the attention of 45 zone service managers, eight regional product representatives, and the dozens of recently appointed military service managers now working directly with army personnel throughout the country.

WE'VE FOUND SOMETHING!

Thermo-Charged

No Pennsylvania, Mid-Continent or Western oil can equal **ALL ITS 9 ADVANTAGES**

- THERMO-CHARGED** (Patents Pending) is a new scientific discovery that enables "RPM" to stay put at higher temperatures than motor oils have stood before. Other oils actually run uphill to escape scorching hot surfaces which Thermo-Charged "RPM" will protect perfectly!
- 1 Thermo-Charged "RPM" is outstanding in its power to spread over and lubricate super-heated surfaces.
 - 2 It cuts wear by keeping a better oil film on engine parts running either hot or cold.
 - 3 It keeps your engine cleaner than other oils.
 - 4 It ends carbon, sludge and varnish trouble.
 - 5 It keeps your oil rings free -- and unclogged.
 - 6 Thermo-Charged "RPM" prevents corrosion.
 - 7 Keeps your oil filter cleaner than ever before.
 - 8 Gives mileage -- as good as, or better than any other oil.
 - 9 This astonishing new oil definitely lengthens the life of your engine and enables it to deliver more of the thrilling performance built into it.
- Try Thermo-Charged "RPM" -- the one motor oil that other oils can't match!
