Mr. Wright Announces
The Lincoln County News has been authorized to announce the candidacy of Mr. John E. Wright for County treasurer on the Republican ticket. Mr. Wright has a wide acquaintance in Lincoln county, having been here many years, and in business the entire time. He was a stockholder and bookkeeper in the New Mexico Light and Power Company and after its reorganization and renaming, he held the same position with the Lincoln County Utilities Company. He is a good bookkeeper; is upright, honest and his middle name is efficiency. Accuracy, honesty and attention to the smallest details render him without doubt a thoroughly qualified and competent aspirant for the office of Treasurer. He requests your consideration and vote.
Adv

The following candidates were nominated at the Primary Election held September 12th, 1942. Your consideration, support and votes respectfully solicited:
For State Representative, 16th District: L. P. Hall.
For District Judge, 3rd Judicial District: Numa C. Frenger.
For County Commissioner, 1st District: Manuel Corona.
For County Commissioner, 2nd District: H. L. Hancock.
For County Commissioner, 3rd District: S. Dewey Stokes.
For Probate Judge: Marcial C. St. John.
For County Clerk: Felix Ramey, [Resigned] Otho Lowe appointed.
For Sheriff: Harry Straley.
For Assessor: L. H. Dow.
For County Treasurer: James Brister.
For County Superintendent of Schools: Ola C. Jones.

Lincoln County Primary Results

The following figures show results in the Primary Election held the 12th. A very light vote was polled, both by Democrats and Republicans.

DEMOCRATS	REPUBLICANS
For United States Senator:	
Carl A. Hatch..... 463	J. Benson Newell..... 246
Robert E. Putney..... 33	
John J. Clark..... 59	
For Congress	
Antonio M. Fernandez..... 76	Reese P. Fullerton..... 180
Clinton P. Anderson..... 369	Wm. A. Sutherland..... 187
William W. Nichols..... 129	
C. e Howard..... 113	
Robert Valdez..... 130	
For Governor	
John J. Dempsey..... 416	Joseph F. Tondre..... 247
Bryan G. Johnson..... 176	
For State Representative 16th District	
L. P. Hall..... 485	
For District Judge 3rd Judicial District	
Numa C. Frenger..... 393	George A. Shipley..... 238
E. G. Shannon..... 173	
Commissioner 1st District	
Manuel Corona..... 486	Max C. Sanchez..... 248
2nd District

Toribio Mirabal..... 74	

WEDDINGS

On Saturday, Sept. 19th, Lt. Milton Brady and Miss Doris Hahn, both of Denver, Colorado, were united in marriage in Carrizozo. Witnesses to the ceremony were Mr. and Mrs. G. Edward Brady also of Denver.
On Thursday 17th, Pvt. Daniel G. Abila and Miss Juanita Archuleta, both of Piecho were married. Witnesses were Pillar Gallegos and Mr. Manuel Ortiz. Both ceremonies were performed by Probate Judge, M. C. St. John.

County Clerk Resigns

Mr. Felix Ramey, who has been the efficient county clerk here for two years tendered his resignation this week to become a member of the Federal Immigration force. Mr. Otho Lowe will serve as county clerk in his place.

Rev. Klassen to visit Dallas

Rev. John Klassen has planned to be away, on a visit to Dallas, Texas, for two Sundays, September 20 and 27. During his absence Supt. L. Z. Manire and Attorney John E. Hall will have charge of the regular morning services, with Mrs. Margaret English in charge of the music. You have often heard the preacher's viewpoint of religion, now hear what Christian laymen have to say of this vital force in your life. There will be no evening service for those two Sundays.

Undergoes Appendectomy

Dick Bowlin, son of Mrs. Joy Bowlin underwent an emergency operation at a Roswell hospital Monday night for appendicitis. He is convalescing nicely. His mother is in Roswell at his bedside.

AN APPRECIATION

I wish to take this means of expressing to the Democratic voters my sincere appreciation of their confidence in me as shown by the returns of the Primary Election. The vote cast for my nomination as District Judge is the more gratifying considering that I did not solicit nor have the backing of any political machine or organization.

NUMA C. FRENGER.

We Are Lucky

Fuel oil will be rationed this winter, but if it is rationed in this state there is no necessity for any one here to suffer from cold, or discomfort. Our mountain sides have lots of dead wood and our mines are full of high grade coal.

For County Commissioner, District 3

Mr. S. Dewey Stokes has authorized us to publish announcement of his candidacy for commissioner of District No. 3 in Lincoln county. This is a position which Mr. Stokes held one term, and served with utmost satisfaction. At the close of the first two years, he withdrew stating that outside interests would prevent him from giving the time he should to the duties which the office required.
Mr. Stokes is a ranchman—one of the county's leading and most substantial citizens. In the discharge of duty he will be competent, thorough and impartial. He requests your fair consideration and will appreciate your support.

Rainbows to Install

The Rainbow for Girls will hold a public installation next Thursday, September, 24 1942 to which the public is invited. After the ceremonies there will be a social hour and refreshments will be served.
Shirley Rea Phipps, W. A.

Moves to Estancia

Mrs. Ladd Embry, nee Louisa Degner, has gone to Estancia to make her home with her husband's family. She has accepted a position as bookkeeper with the Estancia Valley Supply Store. Ladd was recently inducted into the Army and is now stationed at Fort Benning, Georgia.

Attend Rodco

Mr. and Mrs. Claude Branum and children were in El Paso last week. While there they took in the Southwestern Kids' Rodco, which has become a very popular attraction in the last several years.

NOTICE!

The Carrizozo Woman's Club has its first meeting Friday, Sept. 18th at 3:00 p. m. Mrs. Paul Mayer has charge of the program "Past Presidents Day".

Local and Personal

Mr. L. J. Adams was a business visitor in El Paso the first of this week.

Mr. M. Dearing left Wednesday night for his return trip to Evansville, Indiana.

Mrs. O'Belmito left last Wednesday on No. 3 for her home. She had been in Baltimore, Maryland to visit her brother, Daniel and came here via New Orleans and other Southern cities.

Pvt. Eusebio Baca, former popular employee of Rolland's Drug Store who was recently inducted into the armed forces of our country is now stationed at Tacoma, Washington.

Albuquerque, Sept. 16. Jo Lane Kunkle daughter of Dr. and Mrs. G. M. Kunkle of Fort Stanton, has been initiated by Chi Omega sorority at the University of New Mexico. She is a sophomore this year and is majoring in biology.

Dr. Blaney has been distributing some of the excellent cucumbers he raised in his yard amongst his friends.

INDUSTRY AND BUSINESS AFTER THE WAR

Every American knows that the manufacture of automobiles has ceased for the duration of the war. The great automobile industry which in 1940 produced and sold more than 3 1/2 million cars, has been re-tooled to produce airplanes, guns, tanks and munitions of war. Where will these companies get the money necessary to resume the manufacture of automobiles when the war is ended?
The automobile industry happens to be important, and there are thousands of smaller industries which will also face the same problem.
What will the millions of workers do when the demand for war machines stops?
What will happen to the domestic market for farm products when those millions of war workers no longer have jobs?
The stage seems set for an even worse depression after World War II than we suffered after World War I unless right now we start to plan about these purposes.
It is comforting to learn that Congress is now considering some plan to prevent, or at least to ease, any after-the-war depression.

War Profits for Peace-Time Recovery

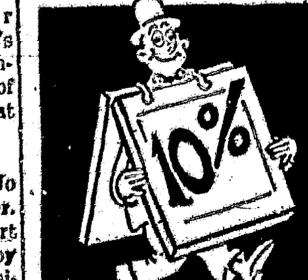

The best plan seems to contemplate the dedication of a portion of war profits for the purpose of providing industry with the ready cash on hand to quickly change to peacetime activity and thus keep the check to manufacturing and agricultural purposes when the war is ended.

A Recovery Bond program has been suggested whereby each industry, big and little, will be required to invest at least 20 per cent of its war profits in Recovery Bonds which do not bear interest until the war is ended and which cannot be sold by the purchaser until peace is declared.

Such a plan would build, at the rate of almost a billion dollars a year, a huge recovery reserve to convert war industries to peace production, launch new products and maintain employment. It would place this reserve immediately and automatically in the hands of those businesses and industries with the greatest after-the-war needs.
The moment peace is declared the "time lock" automatically releases this recovery reserve, the bonds become negotiable and begin to draw interest. Purchasers holding them will then treat them like any other Government bonds, to be sold or used to borrow money. There would be no waiting for a post-war Congressional appropriation, no red tape, and no delay in launching the business and industry offensive that may turn threatened depression into unrivaled prosperity.
The plan is simple, practical and fair.
During late years science and research have discovered many new uses for present major farm crops and many new crops which can be used in industry. A plan of this character placed immediately in the hands of industry the resources which can be used to finance further research and to plan for the conversion of surplus crops, surplus factory buildings and the employment of war workers in new and useful enterprises whenever the war shall cease and normal peacetime industry, business and agriculture shall be resumed.
This problem deserves the thoughtful consideration of every American. If we can have the assurance of reasonable security in the after-the-war recovery period we can throw ourselves into an all-out effort to win the war and feel that by so doing we have secured "the blessings of liberty to ourselves and our posterity."

Mr. M. Dearing left Wednesday night for his return trip to Evansville, Indiana.

Mrs. O'Belmito left last Wednesday on No. 3 for her home. She had been in Baltimore, Maryland to visit her brother, Daniel and came here via New Orleans and other Southern cities.

BANKS AND THE WAR
Red-White-And-Network
Stretching out over the United States is a great network that is helping win this war. It is the American Banking system. Here is a vast array of specialized experience and ability, housed in some 16,000 banks, peopled by a trained staff numbering over 250,000 men and women, working endlessly to hasten Victory. As separate units and as a system, banks serve by keeping the economic machine running, financing war production and providing a host of financial services to the government and nation. Can we help you?

Heap High the Cookie Jar!
(See Recipes Below.)

That Sweet Tooth

"Mom, may we have some cookies, please?"

That question asked in a childish voice with real pleading is going to be as daily as the sunrise and sunset these days as your younger members of the family feel the snap of fall in the air. School days with their demand on youthful

energies will perk up summer's lagging appetite too!

Very few of you can say "no" to a request for cookies. Far from spoiling the appetite for dinner, a cookie or two with a glass of milk will help the child get gracefully through the late afternoon hours until dinner time.

Keeping the cookie jar full may have been your major problem in former years. This year it will be that plus making cookies with a ration of sugar. But you'll do it, I know, and these recipes will help you:

Oatmeal Crispies.

(Makes 4 dozen)

- 1 cup shortening
- 1/2 cup sugar
- 1 cup dark corn syrup
- 3 eggs, beaten
- 1/2 cup sour milk
- 3 1/2 cups sifted flour
- 1/4 teaspoon salt
- 1 teaspoon soda
- 1 teaspoon baking powder
- 3 cups oatmeal
- 3 cups raisins

Cream sugar and shortening. Add corn syrup. Blend. Add beaten eggs. Mix together dry ingredients. Add alternately with corn milk. Stir in oatmeal and raisins. Drop by spoonfuls on an oiled baking sheet. Bake in a moderate (350-degree) oven for 15 minutes.

Ginger Snaps.

- 1 cup molasses
- 3/4 cups sifted flour
- 1 teaspoon salt
- 1/2 cup butter
- 3 tablespoons sugar
- 1/2 teaspoon soda
- 1 1/2 tablespoons ginger

Heat molasses to boiling point and pour over fat. Add sifted dry ingredients and fat. Mix well and chop dough into a long, thin roll. Wrap in waxed paper and place in refrigerator to chill overnight.

Cut into thin slices with sharp knife and bake in a moderate oven until lightly browned. Remove from pan while hot and store in tightly covered container to keep crisp.

That can of yours may be grown-up now and in the service, but my guess is that some of these good,

Lynn Says:

Preserving Food: Eat and can whatever you can from your Victory garden. But you still may have some left, you say?

There are several methods to take care of the surplus. First, investigate to see whether your community has one of those storage lockers where you can rent space in the freezing locker. Cleanliness and speed are important factors in this type of storage. Food must be well selected to warrant the expense of this type of preserving.

Drying at home is another excellent way and one of the oldest methods available. Driers can be bought for a reasonable sum and used to advantage for drying and storing fruits and vegetables.

Other foods such as root vegetables, pumpkins and squash have good keeping qualities if stored in their natural state under well regulated temperatures such as in attic or cellar. Dried beans, peas and cut-up onions may be stored in an attic. Squash and pumpkins require a relatively warm place with free circulation of air.

This Week's Menu

- Apricot Juice with Lemon Slice
- Macaroni and Cheese
- Tomatoes Baked with Chopped Green Pepper Center
- Shredded Green Salad
- Rye Bread
- Butter
- American Prune Pie Beverage

homemade cookies of yours will be mighty welcome to him at camp: Honey Fruit Bars; (Makes 3 dozen)

- 2 eggs
 - 1/2 cup honey
 - 1/2 cup sifted flour
 - 1/4 teaspoon salt
 - 1/4 teaspoon baking powder
 - 1/2 pound pitted dates, sliced
 - 6 ounces mixed, candied fruits
- Beat eggs and honey to blend. Add sifted dry ingredients and fruits and mix well. Turn into a greased, wax-paper lined pan. Bake in a moderate-to-slow (325-degree) oven for 45 minutes. Remove paper. Cool and cut into bars. Roll in powdered sugar if desired. Store in covered jar for several days to mellow.

Chocolate Chip Cookies.

(Makes 3 1/2 dozen)

- 1/2 cup butter
- 1/2 cup honey
- 1 small egg
- 1 cup sifted flour
- 1 teaspoon baking powder
- 1/4 teaspoon salt
- 1/2 cup semi-sweet chocolate chips
- 1/4 cup nuts
- 1 teaspoon vanilla

Cream butter and honey until light and fluffy. Add egg and beat well. Sift dry ingredients twice, and add to butter mixture. Add vanilla and blend well. Fold in chocolate chips and nuts. Chill, then drop by spoonfuls on a greased cookie sheet. Bake at 375 degrees for 12 minutes.

Can you spare a cup and a quarter of sugar? I think you can if you know that you will spread that sugar over eight dozen cookies as in the following:

Vanilla Nut Ice Box Cookies.

(Makes 8 dozen cookies)

- 2 cups sifted cake flour
- 1 1/2 teaspoons double-acting baking powder
- 1/2 teaspoon salt
- 3 tablespoons butter or shortening
- 1/4 cup brown sugar, firmly packed
- 1 cup granulated sugar
- 1 egg, well beaten
- 1 cup chopped nuts
- 1 1/2 teaspoons vanilla

Sift flour once, measure, add baking powder and salt. Sift again. Cream butter and sugars gradually, creaming thoroughly. Add egg, nuts, vanilla and mix well. Add flour gradually, mixing well after each addition. Shape into rolls, 1 1/2 inches in diameter and roll in waxed paper. Chill overnight or until firm enough to slice. Cut in 1/2-inch slices. Bake on ungreased baking sheet in a hot oven (425 degrees) 5 minutes or until light, golden brown.

A fruity, unusual pie is this one combining prunes and bananas with cornflakes and coconut. A sugar-saver, too:

American Prune Pie.

(Serves 6 to 8)

- 3 cups cooked prunes
- 1 1/2 cups whipping cream
- 1/2 cup honey
- 1 cup sliced bananas
- 1/2 cup sliced salt
- 2 cups uncrushed corn flakes
- 1/2 cup shredded coconut
- Baked pastry shell (9-inch)

Cut prunes from pits in small pieces. Whip cream. Measure one cup and blend with honey. Add fruit and salt and stir to blend. Add cornflakes and blend lightly but thoroughly. Pour into baked pie shell and sprinkle with coconut. Top with remaining cream and serve soon after preparation.

What problems or recipes are most on your mind during these fall days? Explain your problem to Lynn Chambers and she will give you expert advice on it. Address your letters, enclosing a self-addressed stamped envelope for your reply, to her as Miss Lynn Chambers, Western Newspaper Union, 216 South Dearborn Street, Chicago, Illinois.

Wide Wale Corduroy Is Given New Importance by Designers

By CHERIE NICHOLAS

WATCH corduroys as they take the lead in the fashion parade this fall. As front page fabric news corduroy is "it" this season and, no mistake. Ask any college-bound girl. She knows!

Not only our campus enthusiasts "rushing" corduroy for all it is worth, but through the season is yet young this material is proving so much of an out-and-out choice the fabric eclectics are booking orders one fast following after another.

To be sure, the fact that corduroy is free from priority rulings is in itself a sufficient reason why our enthusiasm for it is running high. However, seeing the stunning coats and suits designers are turning out made of corduroy puts an irresistible desire in one to acquire a whole wardrobe of corduroys. The amazing adaptability of corduroy to all phases of fashion is enough to inspire one to do just that. Certainly corduroy serves as an all-purpose fabric with amazing versatility. You can find in the shops everything from sleek to the smartest sort of town suits and stunning tapcoats to satisfy the most exacting and discriminating taste.

Wide wale corduroy is the important news in stylish corduroys this season. The new wide wales are making such a dramatic and spectacular appearance in all costume collections you can find everything from knee-length shorts outfits to daytime sexy jackets and coats that are so craftily styled they really cut-style everything in corduroy that has gone before.

A tailored suit of wide wale corduroy of the hollow-cut velvet type as pictured to the right in the above illustration is a prize possession

to include in a 1942 collegian's wardrobe. It's the suit of a hundred uses, dressy enough to wear to faculty teas, sturdy enough to wear to class, of a weight that is comfortable for spring (looking ahead) and just-right for fall wear. For town wear add a casual hand-crocheted chambray hat (note its towering tall crown) and handwoven double-oven cotton gloves.

Off to town for a big week-end the young lady chosen centered in the above illustration chooses to wear a hollow-cut velvet coat, for it's going to look over so smart when she goes tea dancing or to the matinee with her colder. This corduroy velvet is not only glamorous, but being cotton and sturdy, it has plenty of common sense back of it.

The fingertip coat pictured to the left will prove a friend indeed come rain or storm. Here is an outfit that shows judgment, common sense and high fashion instinct combined. This two-piece which mounts a reversible corduroy-lined coat over a corduroy skirt is typical of what college girls will be wearing this fall.

They will also be lazing idly in corduroy slacks and in cotton made of corduroy. The favorite color in corduroy is a rich beige. College girls also like coats made of bright red corduroy, and forest green corduroy lined with quilted red cotton is another college favorite.

Released by Western Newspaper Union.

Gabardine Jumper

Keeping close watch on the clothes preferences of women as they lead a life packed to the brim with activity, designers have laid much stress on practical clothes. The present revival of the jumper dress as a smart and much-needed fashion is recognized in the practical outfit pictured above—a model displayed at the Merchandise Mart of Chicago as an advance showing of fall styles. It is made of red gabardine, will wash and is altogether practical. Its gay color catches it as right up to the minute.

Lace Blouse

Dressy afternoon styles place emphasis on the velvet suit worn with a blouse fashioned of lace. This is a fashion that is destined to become of outstanding importance as the social season gets into swing.

Lace Adds a Touch of Feminine Charm

For memorable evenings what better choice than lace—that lovely non-priority charmer that makes women appear at their loveliest. Lace is being partnered with fabric and other media in effective ways. Especially new in the dress that has a full lace skirt topped with a fitted long-torso bodice of black velvet. It is the sort of gown you will want to wear for your man in a pretty who wants you to look pretty and feminine.

The emphasis placed on dressy formal afternoon suits is in a call for lovely blouses of feminine type made of dainty lace. Three richly jeweled buttons add to the gracious attractiveness of a beaded cotton lace charmer that is warranted to add distinction to winter suits. The lace is an exclusive heavily corded pattern, and with lace on the non-priority list one can feel well dressed and patriotic at the same time.

Gloves, Hat, Shoes and Bag All Dyed in One Vat

Hats, gloves, bag, shoes in fine denim dyed in one vat have been made possible through the teamwork of those who are working together to achieve a new color formula for smart accessories.

Your gown is smart black and your accessories, are carried out in a vivid one-color technique. There is a new red that is wonderfully effective for monotone accessory ensembles. Green is a favorite, also, and the new fuchsia shades are stunning with black.

Black Velvet

The black dress sleeved in black velvet with a huge bow of black velvet at the waistline of the wrap-around skirt is very distinguished. Coats of the dressy type are also trimmed with black velvet.

FIRST AID to the AILING HOUSE

by Roger B. Whitman

Roger B. Whitman—WNU Features.

SIZE AND DEPTH OF RETAINING WALLS

A RETAINING wall supporting a terrace or bank of earth is under pressure from the earth behind it, and must be correspondingly strong and solid. The higher the bank behind it, the stronger and heavier the wall must be. The base of the wall should go to or below the front level to avoid trouble from the heaving of the earth due to freezes and thaws. The exposed face of the wall should be vertical, and to gain strength, the back surface should be sloping so the wall is much thicker at the bottom than at the top. Should water be allowed to collect behind the wall, the earth will become soft and mushy, and in settling, the pressure against the wall will be greatly increased. This can be avoided by providing half-inch holes in the lower part of the wall through the mortar joints, by which water can drain out. If the wall is low, a few holes will serve, but for a higher wall, there should be many of them.

Frozen Leaders.

Q: Due to the last heavy snowfall, the leaders over my open type front porch froze, and when the snow melted, caused a downpour of water to leak through the floor of the porch and into the cellar. Three weeks ago I used a roofing compound of tar and filled in all the cracks possible under the porch. This evidently was not sufficient. Could you suggest a method that can waterproof the porch floor?

A: One method is to fill in all cracks, crevices and openings with roofing cement, especially the joint between the wall and the surface of the porch floor (not the underside). Leader pipes can be kept from freezing by the installation of a half-chapter unit in the top opening. Your roofer should be able to supply it.

Linoleum Table Top.

Q: In my kitchen I am using a gate-leg table for a work table. I covered it with linoleum, using a black linoleum paste, but find that the edges have become loose. Can you recommend a glue that will be waterproof?

A: Instead of a glue, use metal edging, which are intended for securing linoleum to the tops of tables and cabinets. You can get it through a hardware dealer. For a waterproof glue you could use roofing cement, thinned by gentle heating. If this is smeared on the linoleum surface, wipe it off with turpentine while it is still wet.

Moths in Upholstery.

Q: I find moths in my davenport. Would it be advisable to call in a professional exterminator, or should I have the davenport upholstered? Maybe it would be better to discard it entirely.

A: If the davenport is badly infested, the moths may have gone through to the padding. In that case, you can have it fumigated by a professional who is equipped for that service.

Wall Board Cracks.

Q: We are building a breakfast nook in our attic flat, using three-quarter inch wall board. The ceiling slants, and its corners have an extra slant. How can we fill the joints between the sheets of wall board? Plaster does not do, and we hate to put strips all over.

A: Consult the maker of the wall board as to the method that he recommends for that particular job.

Cleaning Asbestos Shingles.

Q: We have white asbestos shingles on our house. They are getting very dirty and we were wondering if there would be any way to clean them.

A: Scrub the walls with a long handled brush, using a handful of trisodium phosphate in a bucket of water. Grocers sell this chemical under various trade names. Rinse off with your garden hose.

Racks Pull Out.

Q: My bathroom racks will not stay up, as the walls are plaster-board. Would you tell me how I can keep the screws from falling out?

A: Instead of screws, get what is known as "toggle-bolts," which are intended for just your purpose. Get them at a dime or hardware store. They will grip well in the plaster-board.

Smelly Tobacco Pipe.

A friend makes a suggestion for getting rid of the smell of a rank tobacco pipe. Pour a cup of boiling hot water through the barrel. This washes out the nicotine and softens the residue, which can then be scraped out. With a little denatured alcohol to follow, the pipe, he says, becomes as good as new. This tip should make life easier for troubled housewives.

J. Fuller Pep
By JERRY LINK

Talking to a fellow the other day, I couldn't help thinking that lots of folks claim they have an open mind when the fact of the matter is it's only vacant.

Which reminds me that if you really think straight about vitamins, you'll see why I keep telling folks about KELLOGG'S PEP. It's that because this well-cereal is extra-rich in the two vitamins most often short in ordinary meals—B and D. And believe me, PEP is a mighty alkali-tasting cereal. Why don't you try it tomorrow?

Kellogg's Pep

A delicious cereal that supplies per serving (1 cup) the full minimum daily need of vitamin B₁ and the daily need of vitamin B₆.

How to stump your friends: Ask them what is the first bugle call of the day in the Army. It's ten to one they'll say "Reveille." They'll be wrong. It's "First Call." Most of your friends know, though, that the cigarette that gets first call with Army men is Camel. And Camel is the favorite of the service—Navy, Marines, Coast Guard, too. (Based on actual sales records from service men's stores.) And a carton of Camels is their favorite gift. Local dealers are featuring Camel cartons for service men now.—Adv.

Don't Neglect Them!

Nature designed the kidneys to do a marvelous job. Their task is to keep the blood clean and free of all the waste of the body. If the kidneys fail to function as Nature intended, there is retention of waste that may cause backache, dizziness, and many other annoying troubles. Persistent backache, after an hour of rest, is a sure sign that the kidneys are not doing their job. Don't let this go on. Get Doan's Pills at all drug stores.

DOAN'S PILLS

WHO'S NEWS THIS WEEK

By LEMUEL F. PARTON

NEW YORK.—The Boller-makers' union of Oakland now admits women to full fraternal membership. It wasn't our fault, but our Women With Nice Sense of Rhythm Fit in War Work

The chorus girl is Dora Salvi... She juggles 24 dice and shifts a lot of levers, for a full eight-hour stretch, bringing through laskinamb suits for army and navy pilots and bombardiers.

Miss Salvi was decorating the front line of "Crazy With the Heat" not so long ago, and before that she was in the World's fair patriotic spectacle, "American Jubilee."

There is a cadence in machine operations in which the conditioned rhythms of music and dancing would fit nicely. This no doubt was one of Dora's assets in winning the production award.

IN THE Bible phrase, one would have to go to and fro on the earth to find a team like Henry J. Hughes, the demon ship-builder, and Top Go-Getters

At the age of 10, young Mr. Hughes, now 37, inherited \$17,000,000, along with the Hughes Tool company of Houston, Texas.

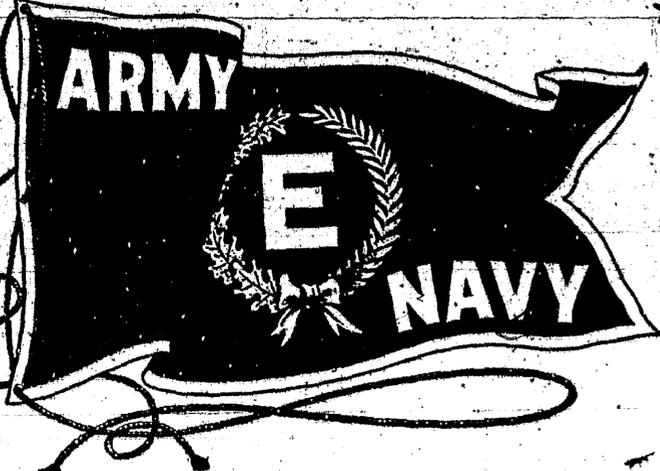

He kept right on with his tool-making, but in July, 1935, he highlighted it around the world in a plane in less than four days.

Born and brought up in Houston, he attended the fashionable Peabody school of Boston, the Fletcher school of Ojai, Calif., and Rice institute of Houston.

He is six feet, three, loose-shouldered and lanky, with dark, stringy hair, and he is an absent-minded dresser who never worries about the crease in his pants.

We noted here recently Donald Roehling, up to his knees in folding money, who hid out in the Florida swamps for seven years and brought through the marvelous amphibian tank for the marines.

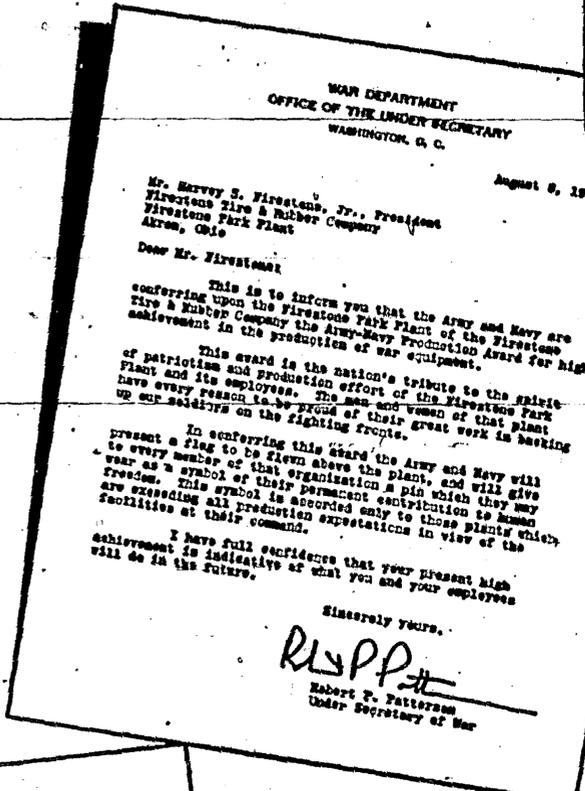

All Out FOR VICTORY AT Firestone

To the men and women of the Firestone organization, whose loyalty, skill, and efficiency have won the nation's highest industrial tribute, we extend our sincere appreciation of the fine spirit and whole-hearted cooperation which merited these Army-Navy Production Awards.

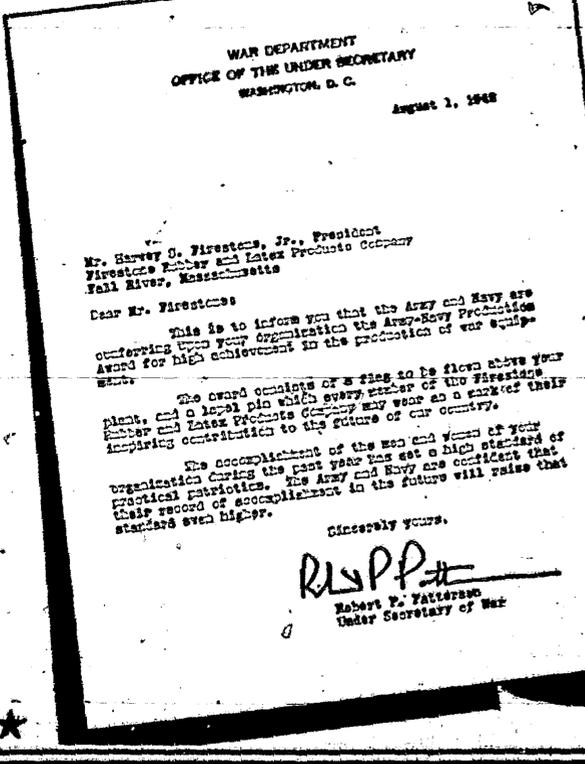

To our fellow Americans, we of the Firestone organization affirm that we regard this high honor as a challenge for the future as well as a reward for the past. It shall serve as a continuing inspiration to all of us to strive for increased quality and quantity of production in further contribution to the war effort and to final victory.

Harvey S. Firestone, Jr.

FELIX RAMEY, Clerk

IN THE PROBATE COURT OF LINCOLN COUNTY STATE OF NEW MEXICO

In the Matter of The Last Will and Testament of Louise Virginia Shelton, Deceased. No. 551 Virginia Shelton, Deceased.

NOTICE

To Whom It May Concern:

Notice is hereby given that an instrument purporting to be the Last Will and Testament of Louise Virginia Shelton, Deceased, has been filed for probate in the Probate Court of Lincoln County, New Mexico, and by order, the 5th day of October, 1942 at the hour of 10:00 A. M. at the court room of said court in the Village of Carrizozo, New Mexico, on the day, time and place for hearing proof of said Last Will and Testament.

Therefore any person or persons wishing to enter objections to the probating of said Last Will and Testament are hereby notified to file their objections in the office of the County Clerk of Lincoln County, on or before the time set for hearing.

Dated at Carrizozo, N. M., this 2nd day of September, 1942.

FELIX RAMEY, Clerk
By OTHO LOWE, Deputy.

Sept. 4-25.

V-Mail Service

On June 5, 1942, the Post Office Department inaugurated the V-Mail Service. This provides a safe means of communication with American soldiers overseas as well as giving the most expeditious dispatch available. Because of the small space taken up by the film, they can be carried on ferry planes of bombers.

Simply call at the post office for a V-Mail envelope. You then write your message in the space provided on the envelope, address it, place your return address on it, fold, seal, stamp and place in the mail box. It is then sent to a post office where it is photographed on micro-film and the micro-film dispatched in a sealed penalty window envelope to the member of our armed forces.

Any person may obtain a maximum of three at the post office in any one day.

Herman E. Kelt, Post Master.

NOTICE
STATE ENGINEER'S OFFICE

Number of Application 2444, Santa Fe, N. M., September 11, 1942.

Notice is hereby given that on the 8th day of September, 1942 in accordance with Section 26, Chapter 49, Irrigation Laws of 1907 R-Bar Ranch, Inc. of Carrizozo, County of Lincoln, State of New Mexico, made formal application to the State Engineer of New Mexico for a permit to appropriate the Public Waters of the State of New Mexico, to be made from Springs in Nogal Canyon of Tularosa Closed Basin, by means of low rock diversion works at points: N. 700 E., 2250 feet distant; S. 870 E., 1830 feet distant; S. 670 E., 1850 feet distant, all from the SW corner of Section 32, Township 8 S., R. 13 E., N. M. P. M., being in the SE 1/4 SW 1/4 of said Section 32, and in NE 1/4 NW 1/4 of Section 5, Township 9 South, Range 13 E., N. M. P. M., and 3 cu. ft. per second, and 120 acre feet are to be conveyed to 40 acres of land described as SE 1/4 SW 1/4, 12 acres; NE 1/4 SW 1/4 16 acres; SE 1/4 NW 1/4 12 acres, all of Section 32, Township 8 S., Range 13 East, by means of open ditches and there used for irrigation purposes between the dates of January 1 and December 31 of each year.

Any person, firm, association or corporation deeming that the granting of the above application would be truly detrimental to their rights in the water of said stream system shall file a complete statement of their objections substantiated by affidavits with the State Engineer and serve a copy on applicant on or before the 10th day of November, 1942, the date set for the Engineer to take this application up for final consideration unless protested. In case of protested applications all parties will be given a reasonable length of time in which to submit their evidence in detail or arrange a date convenient for a hearing or appoint a referee satisfactory to all to take testimony. Appearance is not necessary unless advised officially by letter from the State Engineer.

Thomas M. McClure,
State Engineer.

U. S. Treasury Official War Bond Quotas for September

September Quota for State, \$1,250,000

BUY WAR BONDS

Washington, D. C., Sept. 2.—September War Bond Quotas for the 32nd counties in the nation were announced today by Henry Morgenthau, Jr., Secretary of the Treasury, to make up the national September total of \$775,000,000.

The September quota for the State of New Mexico is \$1,250,000.

In fixing the county quotas, the Treasury has continued its announced policy of setting the monthly quotas in line with the seasonal distribution of income with the billion-dollar monthly national average as the annual goal.

The national quota for May, when the nation went on the billion-a-month annual basis, was \$600,000,000. For June the quota was \$600,000,000 and for July it jumped to \$1,000,000,000. The August quota was \$515,000,000, so to maintain the billion-dollar annual monthly average, the quotas for the Fall and Winter months must necessarily be stepped up considerably to reach the objective set.

U. S. Treasury Dept.

What You Buy With WAR BONDS

Essential in the equipment of every Soldier, Sailor, Marine or Flyer is a first aid kit, consisting of bandages and antiseptics for instantaneous use. These materials are packed into a compact box and cost about \$1.80 each.

We need millions of these first aid kits for emergency treatment. They are also used by Red Cross workers, in field hospitals and wherever needed until hospital treatment may be obtained. Even a child could buy one or more of these kits through purchase of War Stamps. Buy War Bonds and Stamps every pay day and invest at least ten percent of your income in these government securities.

A Plan to Protect Agriculture After This War

For years the tragic results of the expansion of food-producing acreage during World War I has haunted American agriculture. Every farmer, as a matter of patriotism, interrupted his rotation of crops to produce food and more food for our armies and our Allies. Now again in World War II, to feed our soldiers and our Allies and to serve the special demands of our industry, we are dislocating our normal production as a matter of patriotic service.

It seems plain that by the end of this war American farms will have created a tremendous surplus production power which ordinary peacetime requirements will not absorb. By the end of 1942 our overall average increase production over the average for the last 10 years will be more than 21 per cent. How then can American agriculture side-step a post-war farm tragedy even worse than that following World War I?

Experiments in Rubber and Other Products.

Our Government is now experimenting with domestic sources for rubber. Some sixty thousand acres are devoted to the production of guayule and its possibilities as a source of domestic rubber. Emergency plants for the production of thousands of tons of synthetic rubber from oil and alcohol are now springing into production.

We have learned how to make paper from slash-pine and starch from potatoes. We are learning how to raise medicinal herbs which we formerly imported.

Denied the use of kapok which was imported from the East Indies and used in life preservers, we have discovered that the flots from mill-wood makes better life preservers than kapok ever did. Factories have been built and several thousand acres are now devoted to raising mill-wood intensively.

Already we are producing tung oil successfully. Thousands of acres will be needed before we can supply even our present domestic market.

Luckily, we have at hand the National Farm Chemurgic Council, an organization of research chemists from our several industries who compare notes and gain new enthusiasm in the research for new uses of old crops and new crops which can be cultivated in America. Our government has established regional research laboratories.

More than fifteen thousand different kinds of plants grow in the natural state in the United States. We use less than three hundred of these plants. Farm chemistry will not be complete, nor the post-war problem of agriculture solved until every plant is re-examined in the light of modern science and made to serve its part in contributing to the comfort, happiness and security of our America of the future.

A Plan That Deserves Support.

The United States Senate is considering a plan which will require the use of 29 per cent of war profits during the war for the purchase of Recovery Bonds by each company in order to have available the necessary cash to quickly change their business and industrial plants back to peacetime activities at the close of the war and to adjust the employment of their normal number of factory workers.

This percentage of war profits could also be used in a broad plan of research by industrial chemists to develop new uses for products of the farm by our domestic industry. If our industry has the knowledge and the money in hand to convert an all-out war effort to peacetime production, maintain employment and launch the new products discovered by science, we have a reasonable chance to absorb our farm surplus even in the post-war period.

Depression hit our rural areas longer and harder than our industrial areas. Our hope for the security, happiness and prosperity of Rural America is at stake. If we can develop this practical plan for taking care of our surplus in the after war period, we can go forward unafraid in an all-out production effort for the winning of this war and in providing the food necessary for starving people in the after war period. We will know that we have provided an ever-expanding America with new crops and new uses. Worth thinking about.

Agriculture and Labor

"Agriculture has excellent reasons to take concern for the welfare of labor," says Wheeler McMillen. "The situation after this war is over will be of particular importance to farmers. Men earning good wages full time are much better customers than men without jobs. Men steadily employed under satisfactory conditions are far less likely than men without work to become the prey of men who agitate for strange kinds of government. Agriculture ought not, therefore, to develop hostility toward labor and toward labor organizations as such. A wiser course would be to try to use agriculture's influence for correction of those abuses which do no good either to laborers, farmers or the nation."

America's Real Stimulant

"In the United States, every man's value is determined by his activity, and every man is given the opportunity to develop his abilities. An American's real stimulant and pride consist in being a self-made man, in fighting, and in winning the fight."—Javier Prado.

Corporal Roy Clark of Fort Bliss visited friends here this week.

Mrs. W. S. Norman and daughter, Mrs. Edith McKinley visited Mr. and Mrs. Jimmie La Rue in Albuquerque last Sunday.

Mr. and Mrs. George Simpson of Corona were business visitors in Carrizozo last Monday.

Mrs. Louise Hughes, daughter of Mr. J. M. Shelton returned to her home in California last week. Mrs. Hughes had been at the bedside of her mother, at Waco and Stephenville, Texas for several weeks. Her mother passed away Aug. 20. After the funeral she came home with her father and staid a few days.

Mrs. Andy Padilla returned Monday from Albuquerque after spending a week there, visiting her sister, Mrs. Sam Martinez.

Eddie Johnson of Santa Fe came home last Saturday to cast his vote in the Primary election. Eddie was far more interested than the people who were right at home; The majority howled their heads off for a primary and now they have it they really should take advantage of it. Voting all over the state was extremely light. No one was enthusiastic and few were even interested. Of course the war comes first, but the importance of voting for the right man during war times should not fade completely out of the picture.

Dr. M. G. Paden was in town Wednesday from White Oaks. □

Cattle Growers to Meet at Albuquerque, Sept. 30

(Special to: Lincoln Co. News)

Albuquerque, N. M., Sept. 7. The next Quarterly Executive Committee meeting of the New Mexico Cattle Growers Association will be held at Albuquerque, during the State Fair, on September 30th, Tom Clayton, President of the organization announced today. A brief meeting will be held the evening of the 29th at the Hilton Hotel. Approximately 300 key ranchers of the association 1900 members are expected to be in attendance at the meeting, Clayton said.

The entire program will be devoted to floor discussions on the many problems and new conditions on the effect the livestock industry, resulting from reorganization of Government plans and policies as a result of the war.

Clayton said that Albuquerque had been selected as the site of the meeting as the State Fair would be in progress during the meeting, and because Albuquerque can be easily reached from every point in the state by train or bus.

What You Buy With WAR BONDS

The power of the greatest Navy in the world, our own two-ocean fleet, rests in large measure on its battleships—the Battleships of the Line. They displace approximately 35,000 tons and cost up to \$70,000,000. We have something like a score of these huge ships in the Atlantic and Pacific.

Eight huge battleships are under construction and more are contemplated. To man these modern giants of the sea it is necessary for every American everywhere to buy more and more War Bonds. We can do it if everybody does his share. Invest at least ten percent of your income every pay day to help your country go over its Bond Quota. U. S. Treasury Department

Pacific Fleet's Cincus With Jap Sword

Adm. C. W. Nimitz, commander in chief of the Pacific fleet, holds the samura, sword of the Japanese commander at Makin Islands, after the recent successful raid by U. S. marines, in which Maj. James Roosevelt was second in command. Others to Admiral Nimitz' left are, Commander J. M. Haines, USN; Lieut. Col. E. F. Carlson, U. S. marines corps; and Lieut. Gen. D. C. Emmons, USA.

Spy Gets 30 Years

Herbert Karl Bahr, convicted German spy, is led away to start his 30-year sentence in a federal prison. He was sentenced at Newark, N. J., by Federal Judge William F. Smith. Bahr, former Rensselaer (Ind.) student, was arrested while posing as a Jewish refugee on the diplomatic exchange liner Drottningholm last June.

American Housewife's Part in The War Is an Important One

Keeping Her Family Well In Wartime Is Her Special Task.

By JANET CUPLER Released by Western Newspaper Union. One of Uncle Sam's best soldiers is the American housewife. Her uniform is a kitchen apron, her ammunition a bright smile and the capable hands with which she does the proverbial million and one things that make hers a 64-hour, seven-day week.

She is usually content with the only reward she really wants—the love and gratitude of a happy, healthy family. But once in a while you hear her say, "I feel so guilty. I'm not doing anything to help win the war. Of course I keep house and save scrap and buy war bonds, but I'd like to feel that I'm doing something definite, like joining the WAACs or working in a defense factory."

We can't all join the WAACs. And we can't all work in defense factories. But we can do an important job right in our own homes. The war will finally be won only with the help of the American housewife, and the better job she does, the sooner she will be able to rejoice in the victory she helped to win.

When government reports recently showed that only about one-third of the families in the United States have diets that are adequate to maintain health, it became apparent that one of the important factors in winning the war would be proper nutrition (the right food as well as the right amount of it), for, although

Women in rural communities, faced with a shortage of farm labor, are learning to care for poultry and livestock. Rural health programs include the study of nutrition.

Women in rural communities, faced with a shortage of farm labor, are learning to care for poultry and livestock. Rural health programs include the study of nutrition.

our soldiers are the best fed in the world, the men and women who keep them equipped, those employed in our war industries, are sometimes very badly fed indeed. A survey conducted among employees of one large aircraft company revealed that about half showed definite signs of vitamin deficiency. Healthy workers are good workers, and it is up to the American housewife to see that the members of her family are properly fed.

WHAT TO BUY

Proper nutrition begins with the food you buy. Although there is much to be learned about these mysterious substances called vitamins, the fact is that we need them, as well as minerals, fats, proteins and carbohydrates. A balanced diet must include them all. The amount of food each person requires depends largely upon how active he is. One who sits all day will, of course, require proportionately less food, particularly of the muscle and tissue building and energy producing types, than one who is doing hard physical labor.

Each normal person, however, needs—every day—some milk; whole grain or "enriched" bread or cereal; green or yellow vegetables; oranges, or other citrus fruit, or tomatoes; meat, fish, or poultry; eggs (at least three or four a week); butter or other fats rich in vitamins; and a limited amount of sweets. These foods can always be supplemented with additional vegetables and fruits. Experts also recommend that peas, dried beans, nuts and peanut butter be included from time to time.

Under normal circumstances it is best to use all fresh foods, especially vegetables, as soon as possible. Long exposure to the air deprives them of some of their value. But

Don't spurn the lowly peanut! On the way to your table by way of the peanut butter jar, these peanuts are rich in food value. Experts recommend that peanut butter be included regularly in your diet.

today, with gas rationed in many parts of the country and with the housewife eager to do her part by saving her tires, she may find it necessary to do her marketing only once or twice a week.

HOW TO KEEP IT

Then proper refrigeration becomes more important than ever. But putting foods in the right place in the refrigerator is just as important as keeping them there at all. They must be kept cold, but not too cold. And they must have the proper amount of humidity, neither too much nor too little.

Frozen foods need extreme cold with no humidity. Vegetables and greens need mild cold with lots of humidity. Milk, butter, staples and prepared dishes other than frozen ones need only mild cold. Meat requires a slightly lower temperature than vegetables, and more humidity.

In general, 40 degrees is considered a safe temperature for most foods. At that temperature the growth of bacteria is usually retarded. Cold air travels downward, so the coldest places in your refrigerator will be the freezing chamber and the spot directly under it. Put frozen foods in the freezing chamber, meat and fish directly under it. Milk and cream and other beverages to be chilled should be placed on the shelf next to the freezing chamber.

Staples, butter and left-overs will keep satisfactorily in the middle section, as they require moderate cold but no special care. Vegetables, too, and most fruits can be kept there, but they require more humidity. Some refrigerators have special compartments for them, but if yours does not, one of the vegetable bags or a covered dish will do.

Canned foods that will not be used right away, salad dressing and pickles need not, and bananas must not, be put in the refrigerator. On the other hand, bread, coffee, shelled nuts and chocolate keep better there.

SPARE THAT VITAMIN

Even when she buys the proper foods and plans her meals to include them, the housewife's job has only begun. Vitamins are perishable. Minerals can be washed away. By improper preparation and cooking she can lose much of the value for which she so carefully paid at the market.

Here are some suggestions that

Women all over the country are taking courses in nutrition, first aid and home nursing to fit them for the important task of keeping their families healthy. These women, part of a class of 30, are taking an examination in nutrition.

SAVE SCRAP When you save scrap, kitchen grease, tin cans or paper, you are really helping to clothe our soldiers and send fighter planes to bomb the enemy. The grease you save is processed to secure glycerine, which is then used in the manufacture of TNT for shells. Waste paper can be used for shell containers; 25 pounds makes eight shell containers. One hand iron contains enough metal for two helmets. Fifty feet of garden hose will make four raincoats. Thirty-two toothpaste tubes contain the tin needed for a fighter plane.

will help you get the most from the food you buy:

- Don't keep vegetables long at room temperature. Wash them and put them in the refrigerator.
- Pare potatoes as thinly as possible. Scrub carrots with a brush instead of scraping them.
- Don't shell peas until you are ready to cook them.
- Don't soak vegetables in water for any length of time.
- Cut carrots and other long vegetables lengthwise.
- Cook frozen vegetables without thawing first. Some vitamin content is lost in thawing.
- Don't handle vegetables any more than necessary.
- Don't squeeze oranges until you are ready to use the juice.
- Don't chop salad vegetables and greens until you are ready to use them.
- Then add the dressing immediately after chopping them. The dressing acts as a protective covering and helps to prevent the destruction of valuable vitamins by exposure to the air.
- Don't handle vegetables any more than necessary.
- Don't use soda in cooking green vegetables. That lovely, vivid green color it gives them is a danger signal.

Then add the dressing immediately after chopping them. The dressing acts as a protective covering and helps to prevent the destruction of valuable vitamins by exposure to the air.

Don't handle vegetables any more than necessary. Don't use soda in cooking green vegetables. That lovely, vivid green color it gives them is a danger signal.

HOW TO COOK IT

Last year, impressed with the importance of proper cooking, Home Economics Institute of Westinghouse Electric and Manufacturing company sponsored a program of research conducted by scientists to determine the exact amount of vitamins lost in improper cooking. Four typical vegetables were chosen—potatoes, carrots, fresh peas and broccoli—and the results of the tests demonstrated conclusively that water, heat and air, used improperly, can destroy as much as 83.7 per cent of the precious vitamins.

Water, heat and air are essential to cooking, and some vitamin content will be lost in all cooking, but the following procedure helps to reduce this loss to a minimum:

USE LITTLE OR NO WATER. Steaming is preferable to boiling, so use just enough water to produce steam. Wash leafy vegetables thoroughly just before cooking. The amount of moisture that clings to the leaves will be sufficient to produce steam.

START FAST, COOK QUICKLY. When the boiling point is reached, turn your fire down and let the vegetables simmer. Continuous boiling is destructive. Be sure the heat is evenly distributed. For this purpose a flat bottomed pan with straight sides is best.

COOK IN COVERED UTENSILS. The cover keeps the steam in, the air out. Be sure the cover fits tightly.

DON'T STIR. Again, this lets in additional air. If the heat is evenly distributed, stirring is unnecessary.

U. S. Signs Aid Pacts With Great Britain

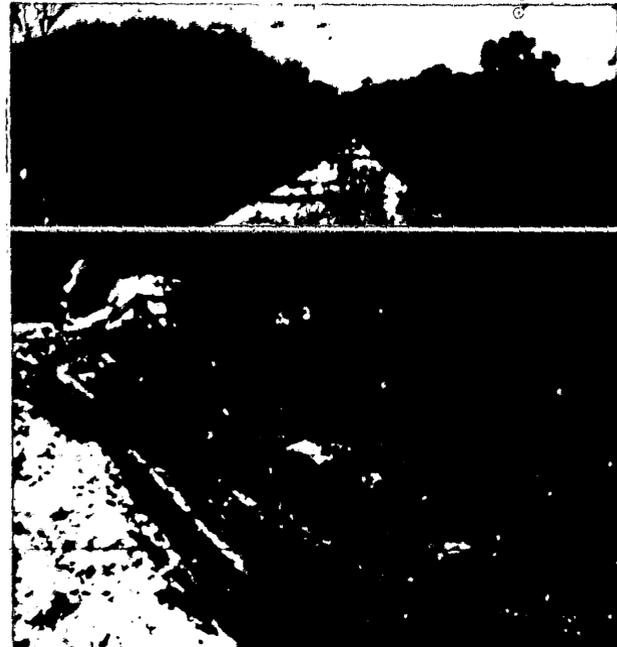

In a move designed to strengthen the bonds of unity between the U. S. and four of its Allies, a series of agreements was signed with Great Britain, Australia, New Zealand and the Fighting French. Shown, left to right, are: Sir Owen Dixon, minister of Australia; British Ambassador Halifax, Secretary Cordell Hull and Walter Nash, minister of New Zealand.

Dependent's Check

Mrs. Thelma Greer, 24, of New York city, wife of Pvt. Matthew Greer, receives her first \$154 check from Uncle Sam. She is the first of the first group of 12,000 to receive serviceman's dependent's allowance.

Brazil's New Strategic Highway

At the top is a completed section of Brazil's 4,113-mile highway, running north and south from Fort Alexa to Forte Alegre. The portion shown here is between Rio de Janeiro and Petropolis. The highway was started in 1936 and will not be finished until 1944. The bottom picture is a construction scene in a hill section of the country.

Take This, Benito!

A Sunderland plane of the British coastal command surprised an Italian submarine cruising on the surface of the Mediterranean, and attacked. At top the sub is completely hidden by bursting bombs. Below, the damaged sub makes frantic efforts to escape.

They Met the Enemy—and He Was Theirs

Up to the time this picture was made, U. S. Flying Fortresses had made 100 daylight raids on Europe without the loss of a plane. This one was attacked by a flock of German Focke-Wulf 109's while returning from an assignment. A cannon shell hit the ship, killing the co-pilot. Two of the engines were put out of action, but the ship came home safely. Crew members here examined the rear turret.

Torpedoed Twice

Submarines in the Caribbean sank two ships from under Cornwallis Ben Keton, (above) within six days. When his own U. S. ship went down he was picked up by a British ship, which also was sunk. After spending nine days in an open boat Keton was rescued by a destroyer.

Are YOU a Good Housekeeper? Try This Test . . .

If you can answer "yes" to all these questions, you probably are. If you answer "no" to any of them, better make a note of it. Because it's patriotic to be careful of your household appliances. You may not be able to replace them for the duration.
DO YOU remember never to pour grease into the kitchen sink?
DO YOU always repair rips and tears in upholstery immediately?

DO YOU brush the crumbs out of your toaster before putting it away?
DO YOU remove stains from all clothes and linens before putting them in your washer?
DO YOU wipe the inside of your refrigerator every week with water and soda?
DO YOU have worn out washers replaced if your faucets drip?
DO YOU keep the bottom of your iron clean?

DO YOU empty the dust bag of your vacuum cleaner after each use?
DO YOU always remember to disconnect electric appliances carefully, without yanking on the cord?
DO YOU drain all the water from your washing machine after each use and remove all soap curds and lint?
DO YOU remove food spilled on your stove burners?

BOMBS BURST ONCE

By GRANVILLE CHURCH

CHAPTER I

Arriving at Cabeza de Negro was like coming home. Neither Curt nor Lee had ever visited the one-time small fishing port in the old days, but that was the way it hit them now as it rose up out of the sea. Once it had been only a collection of manaca snacks on stilts, cut off from inland by fever-ridden marshes. An unhealthy spot for white men. Today all that was changed—or fast changing.

They were up at dawn for the early docking and to watch the long, low blur on the horizon which slowly became the Tierra Libre coastline. Lee caught her breath as that blur took shape. Her memories of it were precious.

True, she'd been happy since, and now she had the boys. But no happiness, not even the children, could ever erase from her mind those first years here with Curt. Hard working days for him, in a job for which he was born, romance and beauty in the tropic setting for her.

Unconsciously she snuggled closer under Curt's arm as they stood at the rail staring landward. Unconsciously, too, Curt was scowling, but Lee did not see this.

Meanwhile, Buddy and Chuck were clamoring and tugging unnoticed at the ends of their split leash—they couldn't be allowed free run of the deck.

"Anuvver dog wace, Daddy," begged Chuck in the fuzzy tones of a four-year old.

He didn't yet have Buddy's clarity of speech, for Buddy was all of six and quite a man.

Curt obligingly called, "One, two, three, go," and the children scampered down the deck on all fours, barking and pulling their leashes taut.

This play brought Curt and Lee to the vessel's stern where their eyes caught the flat black smudge in the distance. A lean, low gray vessel was cutting in toward the coast farther to the north.

"Headed for Soledad," Curt muttered, and the frown returned to his forehead.

Leo clutched his arm. "It's a destroyer! One of ours, Jeff! Must be. And it's racing! Do you suppose . . . there wasn't any word on the bulletin board . . ."

Curt patted her hand and smiled down at her.

"Don't be getting any ideas," he said, and was immediately conscious he'd taken a second or so too long in replying. "There's no revolution here. Uncle Sam's just paying a courtesy call. We're doing more of that than we used to throughout the Caribbean."

"But it's speeding! See how the smoke lays flat from the funnel!" "That's caused by the wind from around Punta Cauca, honey. Our smoke would look the same if we were in that position."

Once more, as he stood against the rail with Lee, Curt went over in his mind the string of events leading up to their presence here on the Pisces—as he'd done so many times these past several nights, lying awake in the dark.

He started with the proposition itself. He and Leo had been dawdling over a late breakfast, while the children played on the lawn within range of the open windows. He had the morning paper folded to handy size and propped against the coffee urn, and was sunk in a roving reporter's column purporting to give the progress of bomb-proofing the Panama Canal.

It took Leo several efforts to break through to him. It was the final "Jeff Curtist!" that did it, and he looked up to discover she'd been running over the morning mail. There was a storm signal in her eyes and she was tapping the knuckles of one hand with a long, flat envelope.

"Who do I know in Cristobal?" he said easily. "Why, no one, I guess. There's old Jim Bragg over on the Pacific side. Letter? Gimme."

"Some day, my fine lad," she began promisingly, "when you bury yourself in the paper—oh, what's the use?"

She gave up and handed him the letter. He ripped it open, slid out the several sheets of enclosure.

"Only mailed from Cristobal," he read aloud the letterhead: "Compania Agricola Tropical, San Alejo, Tierra Libre. Port, Cabeza de Negro. Cable, CAT. Hoh. Who do you suppose they are? Cabeza's that little fishing village down the coast from Soledad, but I never heard of San Alejo." He glanced at the end of the letter. "Signed, Apolonio Montaya, President and General Manager. Never heard of him."

He ran his eye down the first page and looked up to exclaim: "Why, honey, it's a new banana outfit! Opening up twenty thousand hectares between the rivers Masica and Negro. But that stuff's all swampland! You remember, Lee, that big stretch of swamp across the Negro, dotted with a few spots of jungle?"

"And the mosquitoes!"

Curt grinned and skimmed over the rest of the letter hurriedly. Lee saw his growing excitement as he straightened in his chair.

"Lee! They're offering me the job of Chief Engineer!" He took a deep breath and went on more slowly, soberly. "But they say the offer's contingent upon residence with family for term of contract. Three years. Of course, if I had the job I'd like to have you and the kids with me, but—"

Leo rose and went around to him, pushing back the table to sit on his knees and look him gravely, misgivingly, in the eyes. Here was a situation to be handled, one to be nipped in bud. It took her a moment to find the right words.

"You'd like that job, wouldn't you, darling?"

It was more, statement than question. He lowered his eyes. "Well, I'd— I'd—yes, sure I would! That'd be a real job! Just think, Lee. Drainage, levees, floodgates, railroad, power plants—all kinds of projects! And honey," his eyes flamed, "a chance to work on that overhead irrigation system I missed out on when we came north."

He broke off again and his eyes went blank to hide, or try to hide, how much this could mean to him.

"Well," he went on carefully, "it'd be something more than this kindergarten stuff I'm doing now. Twenty thousand hectares is quite an order."

"Yes, I know. But you'll leave it to me to decide, won't you?"

"Well, yes, Lee," he faltered. "I guess I'll have to."

She looked a long moment into his eyes, then pushed a forefinger in circles through his thick, curly hair before kissing him lightly.

"It will hurt, dear," she said guiltily, "but you'll have to forget it. There are Buddy and Chuck. We can't take them to a malaria swamp—and with Buddy ready for school this year."

"But, Lee, they cover that here! They say—"

"They say they have excellent accommodations halfway up the Quebrado Mountains, including school, hospital, clubhouse, swimming pool, tennis courts. They claim there's no fever in their settlement—San Alejo, they call it—and Lee, we ought to like it as well as we liked Puerto Soledad."

"We were happy in Soledad, darling. Don't think I can ever forget. But we left Tierra Libre because we wanted children and thought this country and climate best for them."

"I know," he answered unhappily. She got up and stood at the window, hands locked behind her.

At length, without turning, Lee asked, "How do you know they're responsible people?"

"I wouldn't accept without investigating them!"

"The letter is headed San Alejo, Tierra Libre, but it's mailed in a plain envelope from Cristobal," she mentioned.

"Oh, that's explainable. They put their mail aboard an Associated ship at Soledad, no doubt, whose purser dropped it at Cristobal for faster air service. It came by air, you know."

"And the plain envelope?"

"Well, I . . ." Curt sidestepped. "I don't think that means anything. Maybe they were out of printed ones. Or perhaps," his voice quickened, "in mailing it on an Associated vessel they were being wary of Associated finding out too much

about them. They're rivals, Lee. "I have a feeling, I can't explain, but—"

She bit her lip. "No, that's a woman's trick, that's not fair." Finally, with reluctance, she said, "Well, at least it wouldn't do any harm to find out more about these people."

"Sweetheart!" Curt shouted, and jumped for her.

Her next words were muffled against his shoulder: "Well, I hope I'm not a sugar-and-water wife." He didn't see the tears in her eyes.

And that was the first step that led to their being here on the Pisces. The second?

Curt had put in a short-wave phone call for Jerry McInnis, his closest friend during the years he'd worked in the tropics. McInnis was now Chief Engineer for the Associated Fruit Growers at Puerto Soledad. The call came through later that morning. Greetings were quickly over. Then:

"Jerry, what do you know about the Compania Agricola Tropical? Claim to have that swamp between the Negro and the Masica—"

"Yes, I know, only it won't be a swamp much longer. They're doing a swell job of reclamation. Curt. Well, I don't know much about them. Guy called Montaya heads the outfit. There's a whisper around he was hooked up with Cedillo in Mexico and got out by the skin of his teeth when that revolt failed. But that's only gossip, take it for what it's worth. Seems to have plenty dough behind him, but I don't know where it comes from. Old Man Moore probably has the lowdown, but you know how tight-lipped he is."

Moore was General Manager in Tierra Libre for Associated Fruit Growers.

"Who's in with this Montaya?"

"Don't rightly know, Curt. Montaya seems the only top man so far I can see. There's a couple of Swedes I don't know anything about—except they hold their liquor and don't talk. Youngish guys. And a Dutchman—Hollander, I mean—a chemical man. Panama disease has shown up over on our side and if they're going to raise bananas they'll have to find some means of combating."

"Yes, sure. But how come Associated didn't have that piece tied up? Never heard of anyone getting ahead of Old Man Moore before."

"Well, we've already got plenty of good land, all we can handle now or in the reasonable future. And this piece'll cost real money to develop. Why all these questions, Curt?"

"Under your hat, Jerry, they've offered me the job of Chief Engineer. Wanted to know more about them. Think they're reliable?"

"Well, yes, Curt, they are, so far as I know. But I'd hate to have you make a decision on my say-so."

A wary, reluctant note had crept into McInnis' voice.

"Who's been handling the job?" "Chigger Mitchell."

"What! Old Mitch? He's a good man. What happened they need another?"

"Well, you know how Mitch was kind of tough on labor. A driver and all that. And he could sure find a guy's weak spot and dig under the skin. He didn't get the name 'Chigger' for nothing. Well, his must've made an enemy over there who wanted a souvenir. Anyway, his cars were missing when they found him—just a few days ago, it was—and they had to use a basket for the rest of him. These machetes are bad stuff, as you know well enough."

Early in the morning Curt wired his acceptance to the C. A. T. people's New Orleans office. Back came, overnight, a contract for signature. And things moved fast.

The freighter Pisces, one of a small fleet of Norwegian vessels chartered to the C. A. T. outfit, would be held over a day in New Orleans awaiting them. Loaded with rails, cement, lumber, machinery, it was bound for Cabeza de Negro, the new C. A. T. port at the mouth of the Rio Negro.

Curt had less than twenty-four hours to wind up all his affairs in the States, store the car, arrange for care and lease of the house through an agent, for forwarding of their mail.

Their mail! The first batch, re-addressed and sent by air to New Orleans, caught up with Curt just before they sailed. Busy with details of baggage and boarding ship, he hastily stuffed the handful of letters into his pocket.

It was hours before he thought of it and hauled it forth for inspection. The ship had reached the mouth of the Mississippi; they'd dropped the pilot and were headed out into the Gulf. One letter was a small plain envelope, postmarked Puerto Soledad, Tierra Libre.

Inside was a brief note.

"Mr. Curtis. Don't bring your family to San Alejo, don't come yourself. Don't corner Zera Mitchell."

Small 'Big' Men

It is a strange but true fact that we are living in an age of big men who are under medium height. Hitler is below average height, and so is Stalin. Churchill is by no means tall, although he is taller than Little Franco. Mussolini is well below average, and he has always been rather achmed of it. Until the Munich crisis very few people in this country had seen a photograph of Mussolini standing next any medium-built men. He was always photographed against the skyline, with the camera at a low angle, to give him height and that imposing jaw line.

The great Napoleon was only an inch over five feet, and his two most implacable enemies, Horatio Nelson and the duke of Wellington, were very little taller than he was. Wellington could never mount his horse without help or without a cotone to stand on.

ASK ME ANOTHER?

A General Quiz The Questions

1. Of how many states is the Mississippi river a boundary?
2. How long has Peru been an independent nation?
3. What type of instrument is the ancient lute?
4. What color has the small silk threads in American currency?
5. How many shots make up a round of ammunition?
6. What were the last words of Socrates?
7. In classical mythology Acolus is described as the god of what?
8. What curious thing happens when a game shark loses a tooth?

The Answers

1. Ten: Minnesota, Wisconsin, Illinois, Iowa, Kentucky, Missouri, Tennessee, Arkansas, Louisiana, Mississippi.
2. Since 1621.
3. Stringed instrument.
4. Red and blue.
5. One shot discharged by each soldier, gun or cannon of a command.
6. "I owe a cock to Asclepius; do not forget to pay it," were Socrates' last words.
7. The winds.
8. Another tooth slides forward to replace it from a "oparo" back row.

HONEY WANTED

HIGHEST PRICES paid—cons furnished—any quantity. Write for further details. SIOUX HONEY ASSOC., Sioux City, Iowa. Lima, Okla.

Serviceman Took Words Out of Burrough's Mouth

While Firestone, Edison, Ford, and Burroughs were touring, a light bulb and a tire on the car went wrong. Mr. Ford went into a store and said to the proprietor: "What kind of lights do you have?" "Edison," was the reply. "And tires?" "Firestone." "You may be interested to know that Mr. Edison and Mr. Firestone are in my car, and that I am Henry Ford." As the man was putting on the tire, Mr. Burroughs, with long white whiskers, leaned out of the car, and the man, looking at him, said: "Yeah, I know, you're Santa Claus."

Kinds of Knowledge

Knowledge is of two kinds. We know a subject ourselves, or we know where we can find information upon it.—Samuel Johnson.

Miss Dinger of St. Paul, Nebraska, who taught in the Carrizozo school last year, passed through here last Friday enroute to Wilcox, Arizona where she has been employed to teach this year.

Mr. T. A. Spencer was in town last Tuesday from his Quatro Amigos Ranch, which is located at Three Rivers.

Mrs. Manuel Marquez returned this week from Alamogordo after spending a few days visiting her mother-in-law, Mrs. Frances Marquez.

Sam Dow of the Naval reserves who was called for training recently is now stationed at Great Lakes, Ill.

JUST RECEIVED CAR CEMENT.—The Titworth Company, Capitan, N. M.

Details of the scrap and junk rally to be held here in October, will appear in next week's paper.

Aided in Marketing Produce

A recent survey made by the Extension Service reveals that approximately 125 truckers will operate in Lincoln and other counties of New Mexico in buying produce which farmers and ranchers have for sale this year. Taking into consideration that the average trucker will operate two to three trucks, this means that prospects are good for marketing fruit and vegetables and livestock in Lincoln County.

The Extension Service is aiding with the marketing problem by sending semi-monthly reports to approximately 300 truckers in adjoining states, keeping them informed as to the time, the amount and the type of produce that is available in Lincoln County.

Carl P. Radloff, County Extension Agent

WHY YOU SHOULD TRADE WITH ME

BLOW YOUR OWN HORN In The Advertising Column OF THE NEWSPAPER

TOOL USERS AND TOOL OWNERS

In a recent advertisement signed by a well-known business concern, this statement appeared: "My boss has 14 Grand tied up in me."

What that slangy use of words meant was that the average employee in industry represents a capital investment—in property, plant, machinery and equipment—of \$14,000. In other words, labor has jobs only when some business man, or group of investors, puts up the money necessary for the creation of jobs.

It was well said recently, by a student of economics, that men in governmental authority too often forget that while the rights of workers are being considered, the owner of the tools used by workers must also have some consideration.

After this war is over, the plants now devoted to military needs must be re-converted to peace-time activity; must be re-tooled for the kind of production they were engaged in when it became necessary to tool up for war. Labor will expect peace-time jobs then, but somebody must provide the money for re-converting and re-tooling. That money cannot be forthcoming unless enough profits or capital can be stored up to meet such requirements.

The First Job Americans are impatient people, says the Farm Journal. Impatience never won a war. Soundly planned action, backed by enough power, wins victories. The job now is not to remake America, but to save it.

What You Buy With WAR BONDS

Essential in the equipment of every Soldier, Sailor, Marine or Flyer is a first aid kit, consisting of bandages and antiseptics for instantaneous use. These materials are packed into a compact box and cost about \$1.50 each.

We need millions of these first aid kits for emergency treatment. They are also used by Red Cross workers in field hospitals and wherever needed until hospital treatment may be obtained. Even a child could buy one or more of these kits through purchase of War Stamps. Buy War Bonds and Stamps every pay day and invest at least ten percent of your income in these government securities.
