GARRIZOZO, NEW MEXICO, Friday, January 27, 1950

Outlook, Vol. 40, No. 38

Public Invited To Inspect Hospital On Saturday

The board of trustees and the staff of the new Lincoln County Municipal Hospital at Carrizozo will enact the roles of hosts at its formal opening on Saturday, January 28.

It will be inaugurated by a Silver Tea which will be served from 10 A. M. to 5 P. M. A dance is also planned for Saturday evening at the Carrizozo Country Club. The silver tea and dance are being held for the benefit of the hospital landscaping fund.

The trustees and hospital staff invite the citizens of Lincoln County to attend Saturday's opening and inspect the modern plant and its carefully planned features and technical equipment, which their efforts have been instrumental in creating.

This beautiful new building is a credit to the Gilchrist Construction Company of Las Cruces, who were the prime contractors for its erection. Inspection will reveal the careful attention to detail and the quality work done on the building by this company. It is desert tan in color with terra cotta trimmings.

The visitor, upon entering the small but charming lobby at the center section of the main entrance, has an immediate impression of restraint gained from the attractive furnishings and harmonious colors that have been used throughout the building. To the left is the hospital proper and on the right are the offices, kitchen, laboratory and general storage.

Immediately across the hall is a small waiting room with comfortable furniture and a large picture window, where the sun streams in to give a very cheerful effect.

An inspection of the right wing discloses a small but compact laboratory where, according to Dr. W. J. Hadley, the superintendent, is possible to perform any necessary experiment. At the end of the corridor by the door of the second ambulance entrance is a general storage room and directly across the hall are two wash-up rooms for the convenience of the maintenance personnel.

All sorts of gadgets for aiding in the dispatch of meals have been provided for this workroom. A small dinette for the service of meals to the staff is located across the hall and will accommodate eight persons. The tables have beige plastic tops and the chairs are walnut colored brown with tan plastic seats and backs.

The offices of the superintendent and the admittance clerk have been equipped with the finest steel office furniture available on today's market, according to the Wentworth Company of Albuquerque, from whom it was purchased. They report that it is premium equipment and will be in service for many years. There is no doubt that the selection made here will greatly facilitate the efficient and accurate maintenance of the necessary hospital records. Any stenographer would like to work in this super de luxe office.

Along the surgical corridor is the X-ray room, the door and walls of which are lined with lead to prevent any ill effects from radiation. On this corridor are the surgery, delivery and sterilizing rooms, as well as the wash-up rooms for the doctors and nurses.

At the end of this corridor, on the left of the main ambulance entrance is the dressing room for doctors. Directly across the hall is the emergency room which is equipped to handle preliminary examination of any emergency cases. To the left of this room is the corridor containing the patients' rooms and nurses' station and dressing room. The nursery is on the main corridor back of the

(Continued on Last Page)

Dr. Turner Gives History Leading To New Hospital

By DR. J. P. TURNER

The need for better hospital facilities in rural areas and small towns has long been recognized. Most hospitals are not self supporting financially. As a result, many communities and small towns have either been without hospital facilities or have been served in most instances by private hospitals, operated by physicians. Frequently a residence has been converted into a hospital and operated with a skeleton staff of trained personnel with the result that the quality of hospital care offered has been of a low standard.

For the past few years there has been a growing interest among the citizens of our county to improve the hospital facilities of our community. Local civic minded organizations have functioned well in moulding public opinion. The very practical problem of how to obtain money for building and equipping a modern hospital was the first to be tackled. It was believed that if the county and city could combine their financial resources, that enough money could be raised to do the job. Due to the increased cost in construction, it was evident that bonds would have to be floated. Further investigation revealed that a law would have to be enacted in the State Legislature to allow cities and counties to combine their funds for hospital building purposes.

Daniel Brenton and the late Andrew H. Hudspeth were of the greatest help in drafting this instrument, and having it presented to and acted upon by the State Legislature. Also, we were ably assisted by Will T. Coe, the representative from this district.

The bill passed and the next step was a vote in the county on the bond issue to raise money. In the meantime a federal law, the Hill-Burton bill, was passed to provide money to assist in building and equipping hospitals in needed areas. A statewide hospital survey was made by Leo Schwartz, who recommended that Lincoln County build two hospitals, one at Carrizozo and one at Ruidoso. Mr. Schwartz based his recommendation on the distribution of population in the county, its limited highway facilities, and the nature of its geographical structures. Lincoln County was given a high priority rating under provisions of the Hill-Burton bill, and by token of this same bill one-third of the total cost of construction and equipping the hospital was met by the federal government.

At the time a special election was necessary for a bond issue to be made, William W. Gallacher, Corbin Hester and Ramon Sanchez were county commissioners, and many thanks are due them for the efficient manner in which this matter was handled. Also for their subsequent interest and efforts in handling the many requiring details.

The Village of Carrizozo through its civic organizations and interested citizens, elected to raise its share of the money by popular subscription and gifts. The effective efforts of many people too numerous to enumerate attained this goal. It was a fine and thrilling achievement. The building site was donated by T. A. Spencer and his children, Jane E. Turner, A. N. and Truman Spencer Jr., and is part of the estate of the late Governor W. C. McDonald.

The county commissioners selected Truman Matthews of Santa Fe as architect. This was a wise selection. Mr. Matthews has taken a very personal in-

LINCOLN COUNTY MUNICIPAL HOSPITAL

NURSES' QUARTERS

STAFF

The staff, reading from left to right, Laura Jones, surgical nurse; Kay Warner, maintenance man; Fannie Girardeau, nurse; Corinne Atwood, assistant cook; Dr. W. J. Hadley, superintendent; and Mrs. W. J. Hadley, chief nurse; Other members of the staff, not shown here, include Lula Hayes, nurse; Mabel Vigil, bookkeeper, and Mrs. Ruby Powelson, cook. Photos by Tom B. Zamwalt.

terest in planning our hospital. He acquainted himself with our needs and solicited ideas from various interested individuals. He is a man who knows a great deal about how hospitals work, and has provided us a building which can be operated with a small staff, a comfortable building which is as nearly dustproof as could be provided, a building with plenty of storage, free of operating defects, and with all a beautiful building. He has also provided us with a very lovely and livable nurses' home.

The law provides that the hospital be operated by a board of trustees consisting of five members. Three to be appointed by the county commissioners and two by the Village of Carrizozo trustees. Members of the present board are Truman A. Spencer Jr., S. E. Grelsen, Corbin Hester, Vernon Petty and Dr. J. P. Turner.

The march of events was then interrupted by the great American institution—referred to as an election. Political whim and fancy brought about a change in the personnel of the county commissioners. Messrs. Harry Straley, Pat Farrar and Ramon Sanchez are now handling that important function of our county machinery. They took the torch from the outgoing members and have carried it forward efficiently and well. Contracting bids were called for and the low bid was submitted by Gilchrist Construction Company of Las Cruces. Again Lincoln County was favored. This company has done a fine job and throughout the construction of our building have taken a personal interest in it, and at all

times have shown a fine spirit of cooperation.

Wallace Ferguson was secured as purchasing agent. He has looked after our interests well, and has bought as much of our equipment locally as possible. Many thanks to Mr. Ferguson for a fine performance of duty.

The hospital is now completed and fully equipped with the best and most modern fixtures money can buy. It contains Simmons hospital beds, stainless steel tables, basins, cabinets and operating room utensils, a fine X-ray unit, basal metabolism machine and electro-cardiograph, the best in sterilizing equipment, operating table and lights, anesthetic machine and laboratory facilities.

The board of trustees, fully aware that such fine physical assets alone do not make a good hospital, have given a great deal of thought to the matter of personnel. The board is proud to announce that W. J. Hadley is the superintendent of the hospital and is in complete charge of all aspects of hospital management. He is experienced in this line of work and in addition is well trained in laboratory and X-ray techniques. For many years prior to coming to Carrizozo he was laboratory director of the Lovelace Clinic in Albuquerque. Carrizozo and Lincoln County are extremely fortunate in obtaining the services of a man of Mr. Hadley's qualifications.

The Lincoln County Municipal Hospital is the realization of ideals fostered by many people who have contributed unselfishly with their energies and means to make it possible.

Plans Made To Expand Corona Public Schools

By MRS. A. E. MULKEY

The Corona Board of Education plans to build a \$100,000 additional school building this year. They have \$40,000 to be applied toward its construction and expect to float a \$60,000 bond.

A special school bond election will be held February 17. If the bond issue is approved the building will be started in March, so it can be completed, or at least part of it, by August, 1950. We are told that \$60,000 of the total \$100,000 will be spent locally, and qualified local men will be able to secure employment.

In the past year our tax rate has been reduced by the paying off of the bonds on the high school, and the rate will be less due to this reduction and the increased valuation of the school.

The Board of Education is now ready to build this \$100,000 building if you in Corona will approve the bond issue. The board has been working on this program for about five years. Lots were purchased for the proposed building in 1946.

Additional rooms are needed badly at the grade school and high school, as both schools are overcrowded. This year we should have another first grade teacher, but lack of room prevented employment of one.

Our woodworking department has about one-fourth the space required. An art room is also needed. Our gymnasium is old, floor sagging, and so small our boys are handicapped in every game they play away from home, and visiting teams are handicapped here and do not like to play on our court. This old building will be converted into a modern auditorium and gymnasium for the girls, which can be used to good advantage.

Plans are made for a new gymnasium 100 feet by 100 feet with main court 90 feet by 50 feet, two courts for practice, 40 feet by 70 feet, and seating capacity for 1,000 people. There will be large and adequate dressing rooms and plenty of rest rooms and fountains.

An additional room, 30x40, and which will be heated separately from the remainder of the building, is planned for community use. It will be equipped with kitchen and dining room facilities. Thus, the community can always have room for meetings without disturbing the school activities.

In the next few years there will be many school consolidations. Corona can bring more of the schools into this district by preparing for them now. We should make the various districts desirous of joining us. Our school district has been increased three times its regular size the past year by consolidations and it can be increased to an even greater extent.

Extension Service Director To Be Here Feb. 6

St. Captain I. James Wycoff, service extension director for New Mexico and Arizona, will arrive in Carrizozo on February 6 to conduct the annual Salvation Army campaign for funds in Lincoln County, it was announced today by Marvin Roberts, treasurer of the local Salvation Army committee. Captain Wycoff was in Carrizozo last year for the first time following the late Barron James V. Auriemma who passed away two years ago.

The funds raised in this area are used throughout the year for local emergency welfare needs in relieving distressed humanity by the local committee. A portion of the funds is also used for the home and hospital activities for unwed mothers and statewide disaster emergencies.

CAPITAN

By ANN EARLING

Hugh Truitt has returned from the Veterans Hospital in Albuquerque. He has been under medical care there for over a month.

The Round Table Club held their monthly luncheon meeting and program at the home of Mrs. L. W. Clark Thursday, January 19. The club has made plans for a series of breakfasts to be held in the near future.

Mrs. Theophile Laramie left on Thursday, January 19, for a month's visit in Davenport, Iowa. Mrs. Laramie's father will celebrate his 80th birthday anniversary during her visit.

Mr. and Mrs. Carroll Anderson have left for Florida to spend the rest of the winter.

Mr. and Mrs. S. V. Harcrow have sold their El Centro Bar business to A. E. Lane. Mr. and Mrs. Harcrow now live at the corner of Stanton and Third.

Little Bobbie Earl, son of Mr. and Mrs. Dean Earl, is home and slowly recovering from a very serious fall.

Mrs. Carrie Earling is doing nicely as patient in the Fort Stanton Hospital.

Rev. Chester Bunch of the First Baptist Church left this week for Albuquerque to attend a three-day state Baptist pastors' conference.

Charlie Hilburn and Mr. and Mrs. John Parker of Alamogordo are here visiting old friends and neighbors.

Mrs. Sam Bigger is recovering from a recent illness. Her daughter, Marietta, a nurse at the Veterans Hospital in Albuquerque, has been personally attending her mother.

Mr. and Mrs. Rex Werner of Tularosa and Mrs. Werner of Roswell were weekend guests of Mr. and Mrs. Travis Werner.

The Capitan Womens Club held their regular monthly meeting Friday, January 20, with Vice President Mrs. D. O. Murphy presiding. During this meeting, reports of all Christmas committees were given and \$25 was contributed to the March of Dimes polo fund. After the business meeting the program was conducted by Mrs. Etha Merrill of Fort Stanton. Refreshments were served by hostesses, Mesdames L. W. Clark, Roy Morgan, H. C. Otero and William Ferguson Sr.

Mr. and Mrs. Warren Gaston are the proud parents of an 8 pound baby boy born Wednesday, January 18.

Corporal Roger Churbuck of the Air Force and stationed in Japan, visited with his aunt and uncle, Mr. and Mrs. Jack Earling, the past few days. Corporal Churbuck is on his way back to his station in Japan after a two months' visit with his family in Massachusetts.

A buffet bridge luncheon was enjoyed by the Thursday Bridge Club and their husbands at the home of Mr. and Mrs. Ben Leslie Jr. High scores were had by Miss Patsy Miller and Victor Bright. Low scores had by Miss Louise Primever and P. O. Murphy.

Messrs. Wilbur McNight and D. O. Murphy, members of the board of directors of the RRA, were called to attend a special meeting on Monday at Cloudcroft.

Mrs. Angela Pacheco and daughter, Marlene, of Fresno, Calif., are visiting Mr. and Mrs. Manuel Miller.

Paul Jones is now employed with the Game Department and is stationed in Roswell.

The Lions Club held their bi-weekly dinner meeting Monday, January 23, at the Hotel Buena Vista. Frank Taylor, tall twister, received the little white goat. Playful little fellow, says Mr. Taylor.

FORT STANTON

By FRANK SMITH

The "Stork" in the person of Dr. J. P. Turner came over from Carrizozo to present an 8 pound Democratic booster Douglas Arthur to his proud parents, Madeline and Warren Gaston, here at the Fort.

Jimmie Kellar, who returned last week from the East Coast for treatment, once was a clerk for Mr. Sears at the Fort Stanton Store.

Mrs. Lenora Stemmer returned from California with some beautiful colored movie shots of the "Tournament of Roses" parade in Pasadena. She managed to get all but three of the floats from her vantage point and in spite of intermittent clouds and sunshine. Those who have seen the film are enthusiastic.

Edward Penfield, who stopped by for a short visit Saturday, looked to be in the pink of condition.

The McClains of the Fort and Mrs. Martine of Lincoln went down to El Paso for some shopping and visiting.

Jack Gomez is taking a lot of kidding about Hobbs, his adopted town, and its mayor, from Herb Shields.

Deputy Sheriff Eddie Zamora and the Lincoln County sheriff's department want Owner Herb Totten and Manager Douglas Screws to know how deeply they appreciate the splendid cooperation they are receiving. The work of the law enforcement officers, both local and county, has been considerably lessened since Herb and Doug took over the Buckhorn Bar in Capitan.

Bobby Bassford of Alamogordo, formerly of Lincoln, is going "great guns" for the Alamogordo High basketball team. Bobby is high scorer for his team and acts very much like his brother Bill, who was a member of a state champion Capitan High team.

Harry Walthers, who was transferred to San Francisco's Marine Hospital for some surgery, is still awaiting the operation due to an almost continual cold.

Coe Ten Eyck, who made some very valuable additions to the li-

brary here at the Fort last year, has returned for further treatment. "Chinook," the name I tacked on him, is not looking too well and he is glad to be back in the Land of Enchantment.

"Pancho" Hernandez, an orderly here at the Fort, has certainly helped to make my stay in the hospital much more bearable by his courtesy, kindness, watchfulness and obliging manner.

Bill Shively is making good use of his enforced idleness by frame hand weaving scarfs and dollies.

Oscar (Ole) Olsen, patient librarian, was forced to come into the hospital for treatment and bed rest.

Miss Ann Mason left for California for two weeks January 22, accompanied by Miss Patricia Page, who is going as far as Yuma for a week or 10 days.

Mrs. Gladys Sutton is leaving for 12 days' terminal leave.

Infantile is increasing, according to Basil O'Connor, president of the National Foundation for Infantile Paralysis, so don't forget the "March of Dimes." The foundation's president said that only by "the most successful 'March of Dimes' campaign in history can uninterrupted research and patient care be insured." A financial crisis was created last year in the foundation's treasury by the many polio epidemics. "The pattern of polio in this country seems to be changing," Mr. O'Connor continued. "The dreaded crippler is on the rise and outbreaks are becoming more general than sporadic; polio is invading older groups."

A subscription to The Lincoln County News and Carrizozo Outlook is \$2 per year. See me for a new or renewal subscription. I'll be glad to take your money any time.

RUST IS DETRIMENT TO FARM MACHINERY

Rust is a thief that has stolen many pieces of farm machinery before they have served their useful life. The use of approved rust preventatives during the winter will help to preserve metal parts and bolts where adjustments are made.

White Mountain District Scouts Meet in Hondo

The monthly Scout leaders meeting for the White Mountain district was held January 19 at the Hondo Grade School. L. W. Clark of Capitan presided.

After the opening ceremony, led by McKinley McTeigue of Hondo, Clark headed the group in a roundtable discussion of activities in the council and the district.

It was announced Bob Perin of the National Scout office will be in Roswell January 26 to present a Scout leaders' training course.

The National Jamboree, to be staged next summer in Valley Forge, Pa., was discussed at length. All Scouts wishing to make the trip should make plans now.

Boy Scout Week will be February 5 to 12. Scout units are preparing special activities during that time. Jonah Washington announced his Mesalero troop will hold an open house for the parents.

The summer camp dates were announced by Clark. They are in one week periods starting on June 3 and lasting until July 8. A camp savings plan was suggested by the Scouts.

Mr. Coxens of Capitan led the group in Scout games.

Jonah Washington and John Clardy, field executive, presented a skit, "The God and Country Award," a religious award for Scouts.

The Hondo Scout Troop served refreshments.

Those present were: Robert J. Garvey and John Ferguson of Lincoln; E. H. Timmer, S. M. Coxens and Mr. and Mrs. L. W. Clark, all of Capitan; McKinley McTeigue and scouts from Hondo; Marclan Bucher, John Shendo, Jonah Washington, Frank Dorame and Percy Bismouth, all of Mesalero; Mr. and Mrs. John E. Clardy of the Roswell Scout office.

Woman's Club Holds Regular Session

The Carrizozo Woman's Club met Friday, January 20, at their clubhouse, with President Mrs. R. M. Shafer presiding. "America" was sung, with Mrs. Kelley at piano, after which pledge to the flag was given.

The standing committees gave their reports. Membership committee Chairman Mrs. Brown reported six new members, Elna Hadley, Laura Jones, Ann Kinard, Nellie Riley, Rose Sitton, Fannie Girardeau. One guest was introduced, Mrs. Douglas. Three directors were elected: Mrs. E. M. Shafer, Mrs. Winsell Rickerson, Mrs. L. P. McClintock. Mrs. Rickerson was in charge of the program.

Mellophone solos and duets, Paula Flores and Glenda King, with Mr. Snider at piano; trumpet solo, Glenn Thornton; Mr. Snider at piano; bass horn solo, Felix Guebara, Mr. Snider at piano; clarinet solo, Bobby Stearns, Mr. Snider at piano; violin solo, Mrs. William Nickels, Mrs. Jane Shafer at piano; piano solo, Roberta Key; song, Mary Nickels, Mrs. Nickels at piano; two songs, Charles Hodgins, Mrs. Kelley at piano; piano duets, Mesdames Brown and Shultz; piano solo, Ann Gallacher; vocal solo, Wanda Garrison, Roberta Key at piano; piano duet, Harry Rickerson and Ann Gallacher.

The hostesses, Mesdames Thornton, Spurlock, Snow, Radcliff, Webb and Miss Minnie Nellie, served refreshments of peaches with whipped cream, cake, ice cream roll and coffee.

Marbry Burns, Press Reporter.

Ruidoso Man to File For State Representative

L. S. (Heavy) Drake of Ruidoso stopped in The News-Outlook office this week. He stated that he planned to file for state representative, Sixteenth District, on the Republican ticket in the primary election.

He reported that his formal announcement would follow later.

Buy U. S. Savings Bonds and Stamps.

Carrizozo Has Chicken Pox Epidemic

According to Mrs. Bungardner, county nurse, Carrizozo has been having an epidemic of chicken pox which appears to have reached a peak. She said two clinics were scheduled during the month of January—one in Capitan on January 12, and the one for the Hondo Valley at Hondo on January 26. Dr. Larry Moore is the physician in attendance.

Mrs. Bungardner pointed out that the Well Child Conferences, which are being held regularly, are well attended, and much interest has been displayed.

Dr. Ehlers, district health officer, visited the Carrizozo and Corona offices on January 9.

Mrs. Ann Adams, clerk in the Health Department for the past four and a half years, has resigned her position and is moving to California. Mrs. Julia Sherrill is taking her place.

Roswell PCA Becomes Member Owned

On December 15, 1949, the board of directors voted to retire the remaining government investment in the Roswell Production Credit Association thereby making it fully member owned with no government investment in the association. The RPCA is the fifty-ninth of a total of 511 associations in the United States to take this action, the first in New Mexico and the second in the Ninth Farm District which is composed of Colorado, Kansas, Oklahoma and New Mexico.

The RPCA was organized in February, 1934. Seventeen farmers and ranchers subscribed \$85 of its capital. The Production Credit Corporation subscribed \$180,000. Since the date of organization, the capital stock owned by members has increased from \$85 to \$153,055.

Congratulations

Assignment New Mexico
 By G. WARD FENLEY
 New Mexicans seeking peace and quiet in the restful Land of Enchantment came in for rude awakenings last week.

A family argument in Albuquerque about whether to go to church or to town ended Sunday night with wife (Annabelle White) going to the hospital and husband (Parnell White) going to jail.

The life of a policeman, wrote Bill Bailey in the Santa Fe New Mexican last week, is made rugged by real criminals, night prowling husbands, irate wives, lost kids and pets, and family squabbles which add many a headache to the men in blue.

The Santa Fe New Mexican also ran a yarn about a young Phoenix couple who sought out both a marrying and a divorcing judge, as the young man explained: "I want to marry this girl but when I buy a lock, I always want a key."

And in a brain-teasing quiz feature, the Albuquerque Journal asked readers to complete a Christopher Marlow quotation which read: "Sweet — make me immoral with a kiss."

If mischievous human beings are not making life miserable enough, the Sandia Base operations officers have found animal life to be quite distracting.

A covey of 45 quail, nesting and spying on secret operations, has kept electric-eye alarms on the go continuously for some time and security officials want the game department to do something about it.

No Rest for the Weary
 Police Chief George B. Ray, says The Clovis News Journal, was called by a worn-out housewife to drop in her home and scare her "wild Indian" son into obedience. Chief Ray declined saying he was the father of girls only and knew nothing little Indian boys.

Along this same line, the Albuquerque Chamber of Commerce received a note from a youngster back East saying: "We are studying Indians in school and would appreciate it if you would send us one."

Stress Quality In Surgery

The stainless steel hospital equipment and the steel furniture for the patients' rooms were supplied by the Denver Fire Clay Company, and is made of the finest quality obtainable. The construction of this equipment and furniture is especially fine—the various parts are so perfectly welded as to appear seamless.

The operating room equipment that will be used in Lincoln County's new hospital is exactly the same as that used in the Michael Rose Hospital in Denver. The latter hospital has the reputation of being the most modern west of the Mississippi, and no money was spared in its construction or furnishing.

The following stainless steel equipment has been placed in the delivery room and in surgery: Mayo instrument stands (for most frequently used instruments); fingertip control lowers or raises stand easily and smoothly, and a device locks it at any height automatically upon release; anesthetist and operating stools; foot stools; kick buckets (these are grounded against electrical shock); wall utensil stands; irrigator stands; solution stands; instrument tables; anesthetist table; heated bassinets; instrument cabinet (specially beautiful pieces of equipment and offering the most sanitary storage of surgical instruments; waste receiver; and linen hampers.

The sterilizing room has a combination dressing sterilizer, a pair of water sterilizers, instrument sterilizer and glove drying rack. They are constructed of Monel metal, which is the most corrosive resistant material manufactured, as well as having a beautiful finish.

The dressing sterilizer has a positive action safety locking door, and it cannot be opened during the sterilizing process, thereby preventing anyone being hurt or severely burned by steam. Also, there is a special valve which permits the operator to

automatically dial for any desired function of the sterilizing process. In addition, there is a drying function which is exclusive and allows packs or instruments to be dried instantly right in the sterilizer, rather than waiting for the sterilizer to cool off in order to dry the packs.

The water sterilizers are practically foolproof. One contains hot sterile water and the other cool sterile water. The water is filtered as it enters the sterilizer, and, as pressure is brought up, steam is manufactured which in turn sterilizes the filters. There is a special bypass feature on these machines which conducts leakage directly into the waste, rather than into the sterile reservoir. The instrument sterilizer is also equipped to conduct any leakage into the waste, rather than into the water supply in the sterilizer.

The bed pan sterilizer provided at the hospital can sterilize five pans at one time. A special feature of this machine is the condenser vent valve whereby all steam coming from the sterilizer is condensed and taken into the waste, rather than permitting the steam to escape into the room.

The major surgical operating table is one of the most versatile tables to be perfected. It can be adjusted to practically any position and enables a surgeon to perform an operation from almost any angle. The representative of the Denver Fire Clay Company stated that surgeons request the use of this particular table in preference to others that may be available in the operating rooms of the various hospitals over the country.

The surgical light—a very important requisite to any operation—is the most shadow resistant light on the market, according to the representative of this company. An especially vital aspect of its operation is the fact that it may be controlled from outside the sterile field of actual surgery. As the surgeon performs the operation, the shadow cast on his work is barely perceptible. The light has three intensities of heat—high, me-

dium and low. It is reported that this is the only light on the market with these features. At a high intensity 20 inches below the light, the heat rise will not be over two degrees after a continuous hour's operation. Since the physician's head is approximately the same distance below the light, he is able to work in comparative comfort.

The light in the delivery room is controlled from either end outside of the sterile field, and is designed especially for delivery room use.

The steel furniture in the pa-

tient rooms is a soft grey that will harmonize with any of the various pastel-color schemes in use throughout the hospital. The company man stated that this color was designed to eliminate as much glare as possible and for the soothing effect it had on patients. All beds are equipped with Simmons inner-spring mattresses especially designed for hospitals. These beds are adjustable to a variety of positions for the comfort of the patient. There is a special bed for the use of fracture cases that has a most ingenious solu-

tion for the placement of the bed pan. The Balkan frame that can be attached to this particular bed is adaptable to all types of complicated fractures in furnishing the necessary tension.

In addition to the usual pieces of furniture that are found in most hospital rooms, those at Lincoln County Municipal will contain a bedside cabinet, an irrigator stand clamped to each bed (on which is placed the necessary equipment for giving intravenous feedings and blood transfusions), and an overbed

table. This table is another versatile piece of equipment. It slides over the lower end of the bed and an adjustable portion in the center may be used in three different ways. In a flat position, it is a tray for the service of meals, but raising it to an angle provides the patient with a book rest for comfortable reading. In the third position, which is entirely raised—there is disclosed a vanity mirror and immediately below a compartment for lady's toilet accessories.

Assignment New Mexico

By G. WARD FENLEY
New Mexicans seeking peace and quiet in the restful Land of Enchantment came in for rude awakenings last week.

A family argument in Albuquerque about whether to go to church or to town ended Sunday night with wife (Annabelle White) going to the hospital and husband (Parnell White) going to jail.

The life of a policeman, wrote Bill Bailey in the Santa Fe New Mexican last week, is made rugged by real criminals, eight prowling husbands, irate wives, lost kids and pets, and family squabbles which add many a headache to the men in blue.

The Santa Fe New Mexican also ran a yarn about a young Phoenix couple who sought out both a marrying and a divorcing judge, as the young man explained: "I want to marry this girl but when I buy a lock, I always want a key."

And in a brain-teasing quiz feature, the Albuquerque Journal asked readers to complete a Christopher Marlow quotation which read: "Sweet — make me immortal with a kiss."

If mischievous human beings are not making life miserable enough, the Sandia Base operations officers have found animal life to be quite distracting.

A covey of 45 quail, nesting and spying on secret operations, has kept electric-eye alarms on the go continuously for some time and security officials want the game department to do something about it.

No Rest for the Weary
Police Chief George B. Ray, says the Clovis News Journal, was called by a worn-out housewife to drop in her home and scare her "wild Indian" son into obedience. Chief Ray declined saying he was the father of girls only and knew nothing little Indian boys.

Along this same line, the Albuquerque Chamber of Commerce received a note from a youngster back East saying: "We are studying Indians in school and would appreciate it if you would send us one."

Some Ask for Trouble
The Tucuman Leader, speaking of the restaurant trouble in Tucum, said one restaurant had posted a sign: "As of this date all waitresses and dishwashers will be deducted from their salary for broken dishes."

Good stunt—but we'd like to see it done before we believe it.
We didn't know Texas allowed such things until we read in the El Paso Times: "Gandra Peterson observed her 8th birthday in jail and stops will be taken to prosecute her as an adult."

Upsetting the Peace and Quiet
Dr. Eddy Asrvatham, traveling Indian lecturer, took a stroll up Goat Hill in Raton and caused a frantic housewife to phone the cops: "A man's climbing the mountain in his underwear." Dr. Asrvatham was wearing his native Indian garb.

No upsets or changes in Taos reported Rev. J. Paul Stevens in the Star. No deaths or marriages in his church for an entire year.

And Melrose, even with 40 new homes, counts this year, as last, 851 souls. What? No births?

Yes, it's all peace and quiet—on certain fronts—but not in Santa Fe. Bill Harrison ran into a haymaker swung by the Santa Fe Ladies Auxiliary-Fraternal Order of the Eagles when he inadvertently said the lady Eagles had a bar.

Will apologized for mixing the Eagle Club with the Eagle Lodge by saying "There is quiet a difference." Yes, quite so.

A. L. (Pot) Bert relayed Was Izard's formula for achieving peace and a million dollars for old age: "Just \$122.55 of your weekly salary for 80 years."

Prediction of the Year
Caribad won't be so peaceful this weekend—what with a couple of hundred newshounds in the annual press convention. We're going to see what happens.

I saw an ad somewhere that

Stress Quality In Surgery

The stainless steel hospital equipment and the steel furniture for the patients' rooms were supplied by the Denver Fire Clay Company, and is made of the finest quality obtainable. The construction of this equipment and furniture is especially fine—the various parts are so perfectly welded as to appear seamless.

The operating room equipment that will be used in Lincoln County's new hospital is exactly the same as that used in the Michael Rose Hospital in Denver. The latter hospital has the reputation of being the most modern west of the Mississippi, and no money was spared in its construction or furnishing.

The following stainless steel equipment has been placed in the delivery room and in surgery: Mayo instrument stands (for most frequently used instruments); fingertip control lowers or raises stand easily and smoothly, and a device locks it at any height automatically upon release; anesthetist and operating stools; foot stools; kick buckets (these are grounded against electrical shock); wall utensil stands; irrigator stands; solution stands; instrument tables; anesthetist table; heated bassinets; instrument cabinet (specially beautiful piece of equipment and offering the most sanitary storage of surgical instruments; waste receiver; and linen hampers.

The sterilizing room has a combination dressing sterilizer, a pair of water sterilizers, instrument sterilizer and glove drying rack. They are constructed of Monel metal, which is the most corrosive resistant material manufactured, as well as having a beautiful finish.

The dressing sterilizer has a positive action safety locking door, and it cannot be opened during the sterilizing process, thereby preventing anyone being hurt or severely burned by steam. Also, there is a special valve which permits the operator to

automatically dial for any desired function of the sterilizing process. In addition, there is a drying function which is exclusive and allows packs or instruments to be dried instantly right in the sterilizer, rather than waiting for the sterilizer to cool off in order to dry the packs.

The water sterilizers are practically foolproof. One contains hot sterile water and the other cool sterile water. The water is filtered as it enters the sterilizer, and, as pressure is brought up, steam is manufactured which in turn sterilizes the filters. There is a special bypass feature on these machines which conducts leakage directly into the waste, rather than into the sterile reservoir. The instrument sterilizer is also equipped to conduct any leakage into the waste, rather than into the water supply in the sterilizer.

The bed pan sterilizer provided at the hospital can sterilize five pans at one time. A special feature of this machine is the condenser vent valve whereby all steam coming from the sterilizer is condensed and taken into the waste, rather than permitting the steam to escape into the room.

The major surgical operating table is one of the most versatile tables to be perfected. It can be adjusted to practically any position and enables a surgeon to perform an operation from almost any angle. The representative of the Denver Fire Clay Company stated that surgeons request the use of this particular table in preference to others that may be available in the operating rooms of the various hospitals over the country.

The surgical light—a very important requisite to any operation—is the most shadow resistant light on the market, according to the representative of this company. An especially vital aspect of its operation is the fact that it may be controlled from outside the sterile field of actual surgery. As the surgeon performs the operation, the shadow cast on his work is barely perceptible. The light has three intensities of heat—high, me-

dium and low. It is reported that this is the only light on the market with these features. At a high intensity 20 inches below the light, the heat rise will not be over two degrees after a continuous hour's operation. Since the physician's head is approximately the same distance below the light, he is able to work in comparative comfort.

The light in the delivery room is controlled from either end outside of the sterile field, and is designed especially for delivery room use.

The steel furniture in the pa-

tient rooms is a soft grey that will harmonize with any of the various pastel color schemes in use throughout the hospital. The company man stated that this color was designed to eliminate as much glare as possible and for the soothing effect it had on patients. All beds are equipped with Simmons inner-spring mattresses especially designed for hospitals. These beds are adjustable to a variety of positions for the comfort of the patient. There is a special bed for the use of fracture cases that has a most ingenious solu-

tion for the placement of the bed pan. The Balkan frame that can be attached to this particular bed is adaptable to all types of complicated fractures in furnishing the necessary tension.

In addition to the usual pieces of furniture that are found in most hospital rooms, those at Lincoln County Municipal will contain a bedside cabinet, an irrigator stand clamped to each bed (on which is placed the necessary equipment for giving intravenous feedings and blood transfusions), and an overbed

table. This table is another versatile piece of equipment. It slides over the lower end of the bed and an adjustable portion in the center may be used in three different ways. In a flat position, it is a tray for the service of meals, but raising it to an angle provides the patient with a book rest for comfortable reading. In the third position—which is entirely raised—there is disclosed a vanity mirror and immediately below a compartment for lady's toilet accessories.

Cinder Blocks Used in Hospital

Atlas cinder-concrete blocks were used in the construction of Lincoln County's new hospital. The following "concrete facts" may be of interest to our readers and are given for their information:

These blocks have come into general use as a building material during the past quarter of a century, and have proved to be so adaptable for general building purposes that their use covers all types of building construction. In addition, their durability and economy have made the use of them very popular. It is said that they have every structural requirement possessed by ordinary wall material.

Many thousands of years ago, active volcanoes existed in what is now southwestern New Mexico. During certain periods of volcanic activity, coria and lightweight cinder are produced. The company producing these blocks owns deposits of this cinder material and states that this volcanic product is very stable. The cinders are quarried and then delivered to the company's plant, where it is crushed, screened and carefully graded to three sizes. Every operation of the plant is mechanized, and, eventually, the materials are conveyed into an automatic machine that can make three blocks at a time. The blocks are transferred to racks and the racks to the steam curing kilns where every block is held to a timed schedule of about 12 hours of high temperature with a humidity of almost 100 per cent.

The following day they are moved to the "cubing" area where an air-lift hoist "cubes" them into cubes of 75-block, after which they are handled by a high-lift truck to the paved storage area. From this storage area they are ultimately delivered to the various building sites.

During the manufacture of these blocks—from the cinder quarries to the jobsite—they are not handled until the block mason sets the block in the wall. The values claimed for this product include: Strength, insulation value, soundproof value, acoustical value, availability value, waterproof value, lightweight value, fireproof value, modular sizes, and cost.

Space does not permit us to elaborate on each of these values, but added together, according to the company, they mean a better product at a lower cost to the construction industry.

MILK PRODUCTION UP

The economists figure U. S. milk production in 1949 was nearly 118,000,000,000 pounds. That's 2,500,000,000 more pounds than in '48 and 14,000,000,000 pounds more than the average before the war.

Insurance calls for foresight

Maybe it takes a pessimist—or at least a realist—to foresee the need for complete insurance protection. But there is nothing that will do as much to make an optimist out of anybody as insurance. For insurance absolutely wipes out many fears. For example: any boiler or hotwater system can pop its seams any minute... so a wise man, pessimistically imagines such a misfortune and optimistically purchases inexpensive America Fore insurance to protect himself against it. Let's talk this over.

America Fore INSURANCE GROUP J. G. Moore Phone 22 Carrizozo, New Mexico

Telephone Highlights of 1949

Improving and extending service made 1949 a busy year for us. Here are a few highlights:

More Telephones

By the end of the year were were serving 91,900 telephones in New Mexico—14,000 more than a year ago, an increase of about 18%.

More Voice Highways

During the year we added 25,000 miles of aerial wire and wire in cable in communities we serve in the state. This does not include many miles of additional long distance circuits.

More Building Space

Adding equipment required new buildings or building additions where growth was greatest.

More Dollars Spent

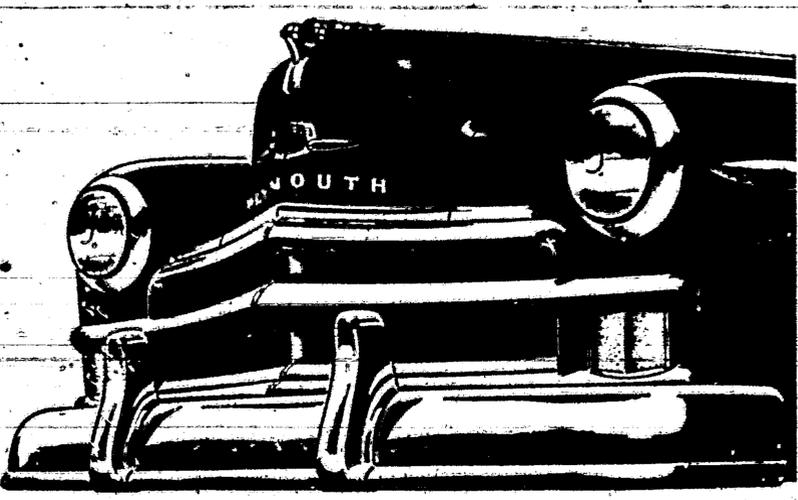

We spent more than \$4,000,000 on construction of telephone facilities in New Mexico in 1949. This does not include the \$6,000,000 of operating expenses such as wages, taxes, etc.

1950 will be another busy year as the 1350 telephone men and women in New Mexico continue to provide a steadily improving service.

Two Fort Stanton Patients Die in Auto Crash

By HELEN WHITEHEAD
Another traffic accident was chalked up to speed Thursday evening when two patients from Fort Stanton, Andrew Ebert and Harris Potier, crashed to their deaths when the auto in which they were riding careened off the road, overturned and landed in a deep canyon.

Apparently out for a ride, Ebert and Potier roared through Capitan at such a clip that the marshal swore out a warrant, but by the time he passed along the order to the sheriff, the sheriff replied: "I can't very well arrest a dead man."

Potier suffered a broken leg, multiple fractures and his skull was practically reduced to a pulp. Ebert, driver and owner of the death car, though less severely injured, was probably killed by a sharp blow on the head. Ebert had another close call with the grim reaper about a month ago when he fell asleep at the wheel. About four miles this side of Carrizozo, he hit a culvert, overturned and completely demolished the car, miraculously escaping with but a few scratches.

Thursday's accident occurred when the driver attempted to make the "S" curve in the road leading to the Fort from the intersection of highway 380, with full speed ahead. One might say that this spot, which has been the scene of several other accidents in less than two months, was just jinxed. Actually, one could only honestly say, that "S" curves and speed are incompatible and serve to remind us that this and the many other recent accidents in this area are increasing the already tremendous toll of American lives by speed demons and careless drivers.

If the drivers, who kill 32,000 people annually or at the rate of 90 a day or one every 16 minutes and injure over a million more, could go out on just one emergency call with a doctor and get a first-hand look at our modern slaughterfield, maybe they might revise their attitude toward society—which is their responsibility every time they take the wheel. If they helped or looked on only once, while a doctor and his assistants worked feverishly to extricate a shattered body from twisted steel before it was too late, they might become cautious drivers.

Numerous studies have been made to try to figure out the psychology of speed and to determine why people, who are usually stable and cautious, become either imbued with the sense of power the moment they get behind the wheel, or become so optimistic that they believe they have the right of way over everyone and hog the road, or think it adventurous to flirt with death by wild driving. Perhaps psychologists might sum it up this way—that it may be the only time they feel a real release from the curbs of everyday life, or it may satisfy a starved ego. Regardless of what the emotional reaction, everyone should pitch in and help by perfecting his own driving first. Junior isn't going to go light on the accelerator if he sees Dad or Mom bear down, whiz through town exceeding the speed limit and getting away with it. Tubeless tires, glareless lights and other mechanical safety devices aren't going to lower these appalling statistics unless these are in the hands of persons with a will to drive carefully. After all, only 10 per cent of the accidents involve mechanical failures, which leaves a glaring 90 per cent to be accounted for.

Cutting sharply into this 90 per cent is the new form of mass murder and self destruction, known as teen-age killers, who are responsible for about 7,500 traffic deaths due to frivolous or careless attitudes and which costs the government about \$600,000,000 or as much as the annual cost of all fires.

The triple A and other organizations are going about to combat the plague of teen-age auto accidents by getting at the root of it through a high school driving training program. They are also sponsoring a safety responsibility bill, intended to bar financially irresponsible drivers from the highway.

What are you going to do? Remember, "Drive Carefully. Death is So Permanent."

Order of the Rainbow Holds Installation

The Order of the Rainbow for Girls held its installation Tuesday night, January 10, at the Masonic Hall.

In an impressive service, Era Berry was installed as worthy advisor. The other officers installed included:

Worthy associate advisor, Juanita McSmith; charity, Shirley Morgan; hope, Norma Compton; faith, Shirley Ann McClain; recorder, Shirleen Barnum; treasurer, Betty Brewster; chaplain, Elaine Shults; drill leader, Peggy June Cathy; love, Connell Dean; religion, Grace Morriss; nature, Betty Moore; immortality, Wanda Garrison; fidelity, Roberta Key; patriotism, Jeanette Posey; service, Patty Stephenson; confidential observer, Louise Ryberg; outer observer, Katie Snodgrass, and choir director, Barbara Branum.

The Rainbow Dad is L. Z. Manire, and the Mother Advisor is Mrs. Gould, from Fort Stanton.

The installing officers were: Veda Morgan, installing officer; Francis Degnar, installing chaplain; Barbara Branum, installing recorder; Ann Eaker, installing marshal, and Roberta Key, installing musician.

The members of the advisory board were introduced. Talks for the good of the order were given, after which refreshments were served.

The Rainbow Girls wish to express their appreciation to Mrs. Shults, the past mother advisor, and Will Harris, former Rainbow Dad, for their faithful leadership and wise guidance during the past year.

Dancing Program For Fort Stanton Patients

By HELEN WHITEHEAD
The patients at the Fort were more than delighted with the entertainment presented here recently by the capable and skillful members of the Officers' Wives Club of Walker Air Base.

The group gave their interpretation of the all-time favorite—the Hula, the Can-Can and other dances, which revealed clever and artistic talents. The background music was arranged by "Red" Foster's orchestra and the audience rated it on a par with many radio name bands. The whole show had a professional quality and the enthusiastic audience gave every number a big hand.

Both the hospital staff and patients are appreciative of the efforts of this group which is under the able direction of Mrs. Dorothy McCreight and are hoping for a return engagement soon and often. Sometime during February Mrs. McCreight has promised another performance, which will be featured for bed patients.

Photography Hobby Of Tom B. Zumwalt

The pictures reproduced in The News-Outlet this week were taken by Tom B. Zumwalt, who, together with his father, Clifton B. Zumwalt, operates Zumwalt's Auto Service at Carrizozo.

Photography was more or less of a hobby with Zumwalt until he entered the University of New Mexico at Albuquerque. During his university days, he was appointed rawlins man and photographer for the University of New Mexico's Lobo, which positions he held from January, 1946, until January, 1948.

As staff photographer for the university, he had four assistants working under him. They were the official photographers for the various social functions at the university, and also made many pictures around the campus. In addition, they were required to cover the sports events of the university which were played at home.

Since leaving the University of New Mexico, Zumwalt has

done some occasional free lancing in photography, but is not sure at the present time that he wishes to make a career of it. However, he stated that he has sold some landscape pictures to out-of-town magazines.

A study of the pictures taken for the News-Outlet will reveal the care as to detail and lighting effects that was exercised by Zumwalt.

NEW MEXICO CROP PRODUCTION VALUE UP
As quoted in the New Mexico Stockman, the report of the U. S. Bureau of Agricultural Economics reports the crop production value for 1949 as \$90 million, as compared with \$87.3 million in 1948. The total acreage harvested was 1,830,000 acres in 1949, as compared with 1,646,000 acres in 1948.

Hospital Equipment Latest Developed

Housewives especially will be impressed with the kitchen and laundry equipment for the hospital, which was purchased from the Carrizozo Hardware Company.

Although the Frigidaire Model F-60 is a little large for the average family, nevertheless Mrs. America realizes the advantage and convenience it affords the dietitian and her assistants. It provides 60.6 net cubic feet of usable storage space, and 70.4 square feet of shelf area. In addition to this refrigerator, four other Frigidaires are provided for the hospital and nurses' home. Three are 6 cubic foot ones and the fourth provides 9.3 cubic feet of storage. All this adds up to a lot of storage space and ice cube capacity. Needless to say, all of Frigidaire's new improvements are incorporated in these refrigerators.

A Magic Chef Model No. 680 has been provided to handle the hospital's necessary variety of foods with speed and economy. The heavy duty range is 62 inches in width, 33 inches in depth and 34 inches in height. It features a griddle, two ovens and a broiler grid.

The lobby of the hospital is equipped with a Frigidaire pressure type water cooler which will cool three gallons per hour from 80° to 50 degrees F. when operating in an 80 degree F. room temperature. It has a storage capacity of one-half gallon of cool water for immediate use. Visitors and staff will especially welcome the installation of this cooler.

Pella venetian blinds in attic grey were chosen for the windows of the hospital and nurses' home.

The laundry will have all the equipment which most housewives are still dreaming of possessing. There are two Maytag automatic washers. The operator merely places the clothes in the machine, adds a detergent, sets temperature dial and auto-

matic timer, and then the machine goes to work. The clothes are gently but thoroughly washed, after which a spin-period removes the soiled water from the tub. The machine cycle further carries the clothes through two rinse periods and the final spin-dry period which leaves no hard-to-iron wrinkles. All this work is done automatically by the machine, leaving the operator to finish other duties.

After the clothes have been washed in the automatic washer, they will be popped into the Bendix automatic dryer and the time and temperature control set in accordance with the load requirements. The dryer will be turned off automatically by this time control. The temperature setting is determined by type of fabrics in the load.

Clothes may be removed damp for ironing, or dry for storage. Heat is turned off automatically five minutes before cylinder stops which makes for more comfortable handling of the clothes by the operator.

For a load of 12 pounds wet, it takes approximately 30 minutes to damp dry for ironing, and about 35 minutes to dry for immediate storage.

For ironing, the hospital laundry has a new Bendix ironer. When not in a motion roll, the ironer may be moved forward or backward which is convenient for feeding clothes and reironing heavily dampened parts of garments.

Design of machine permits material to extend beyond either end of roll, or closed garments may be slipped over roll and ironed around. There are two speeds which permits the operator to select a fast speed or a slow one (especially desired for over-dampened pieces).

The machine has two heating elements with thermostatic control for each, and the temperature control may be set for high

U. S. Civil Service Tests Are Announced

C. L. Edwards, regional civil service director, announces a civil service examination for the position of refuge manager, paying \$3,100 and \$3,825 a year.

Vacancies exist in the Department of Interior, Fish and Wildlife Service in the states of Arizona, Colorado, Kansas, New Mexico, Oklahoma, Texas, Utah, Wyoming and California (within a radius of 35 miles of Imperial Dam headquarters site).

All competitors will be required to take a written test of verbal ability (including paragraph reading, word meaning and English usage), arithmetic reasoning, and chart and table interpretation, and a test of supervisory judgment. Detailed information regarding the requirements for this position is contained in the examination announcement.

Applications must be on file with the office of the Thirteenth U. S. Civil Service Region, New Customs Building, Denver 2, Colo., not later than February 13, 1950.

(450 degrees) or low (250 degrees).

Following are some additional features which housewives will thoroughly approve: Lap board (prevents dampened pieces from contacting clothing of operator); adjustable knee control, fingertip control; the shoe of the machine may be tilted back for steaming and pressing; and the safety control (in cases of current failure, the shoe is disengaged by pushing the easily accessible red knob located directly above the back of the shoe).

The attractive Sheraton model of the Home Sewing Machine Company has been provided to take care of any mending or sewing necessary in the maintenance of the hospital and nurses' home. In addition to utilitarian purposes, it can also serve as a harmonizing piece of furniture. It is equipped with all the new famous features that make the operator's work a delight instead of a chore.

Congratulations

to the people of Lincoln County in their achievement in constructing such a nice hospital; also to the Board of Directors who so faithfully gave their services.

We are proud to have had the opportunity to furnish the following materials which were used in construction of the hospital:

By Thomas J. Mabry, GOVERNOR

"Democratic institutions are protected by the application of reason, intelligence to political problems."—Benjamin Franklin.

Everyone is anxious to have economy in the administration of government. We know that with expanded service we are using more manpower today than we used in former years. For example: because of the great expansion in the enrollment at our institutions of higher learning alone there are of necessity many more people drawing money from the state today than in 1943-44. In that year, our institutions of higher learning employed only 976 people. Today they employ approximately 3,000, an increase of more than 2,000 employees in five years in our universities and colleges alone.

In the general administrative and financial branch of the state government, however, the number of employes have increased by only 134 during that period. Only strictest economy measures could have held the increase down to this low figure.

At the present time several of our state departments are turning out more work than they did before the war and are doing it with fewer employes. One ex-

ample is the Motor Vehicle Department. This department now has 64 employes who work on motor vehicle registrations and this year the department registered 210,000 motor vehicles. By way of comparison, this department had 83 employes in 1942 and handled only 121,000 motor vehicle registrations. I believe we have made an excellent showing of saving here. The department is actually doing about 73 per cent more work and is doing it with 19 fewer employes.

When the present administration took office, the work of the Motor Vehicle Department was in very bad shape, especially the "certificate of title" division. There were almost 15,000 applications for titles which had not been acted on. The department was taking an average of over 90 days to issue titles on applications for the transfer of ownership of vehicles. By streamlining the various operations, fewer employes now turn out a greater volume of work than they ever did before.

This was an intolerable situation and I gave orders to have it corrected immediately. Twenty employes were put on an overtime basis and within a period of 90 days, the backlog of work had been cleaned up, overtime was discontinued and the department was put on a current operating basis with reduced force. The result has been that instead of letters of complaint, the department now receives letters of commendation.

The increase in the number of motor vehicles on our highways has been great during the last three years. In 1946 there were 140,435 motor vehicles licensed in the state. We now have about 210,000.

It might be interesting to turn back the clock 35 years. The records in the tax commission show that in 1914 there were 1,840 automobiles registered in the state. Chavez County boasted the largest number with 488, while Bernalillo County was second with 266. Taos County had seven and Sandoval County five.

Sheff of Ruidoso Candidate For State Representative

W. B. Sheff, Ruidoso clothing store owner and Lincoln County business man, has announced he

will file for the office of state representative on the Democratic ticket.

Sheff, who lives in Ruidoso, has resided in New Mexico for 18 years. He helped organize the Chamber of Commerce in Ruidoso, was area commander of the American Legion in southeastern New Mexico in 1943, and is a past commander of the local Legion post where he has held almost every office at some time or another. His Legion activities have won for him the honor of being a member of the "40 & 8" and he wears the 30-year pin for

continuous and actual service in the Legion.

Sheff graduated from Cumberland University in Lebanon, Tenn., and practiced law for 15 years before coming to New Mexico. At present he is vice-president of the Hollywood Rac-

ing Association and was the one who first started the race track at Hollywood Park, near Ruidoso.

The American eagle is shown on more varieties of early hand-made American glassware than any other insignia or portrait.

HOTTEST ENGINE NEWS of 1950

That's the word spreading about Buick's brand-new F-263 valve-in-head engine, already proving itself in the hands of new SUPER owners

CALL it if you will the biggest power-story of the year. Call it another triumph in Buick's long history of coming up with car performance beyond compare.

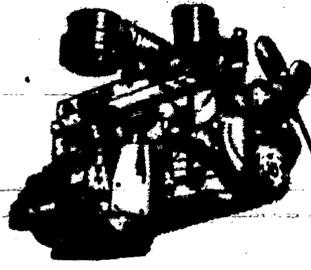

But, sir, when you step into the sleek-lined traveler pictured here—hang on to your hat.

For you'll be riding behind a power plant that is not only new but a major sensation of the 1950 season.

You'll be commanding the very latest word in valve-in-head power—the newest accomplishment of the organization with the country's longest stretch of experience in this engine design.

Here every fat-size fuel charge now delivers a huskier wallop. Shorter, lighter connecting rods mean that pistons flash with faster and livelier action.

Heavier crankshafts, boated on bigger,

more rugged bearings, take this greater load and transmit its stepped-up surge to the drive shaft and rear wheels.

And you, behind the wheel, wreathes your face in smiles at the lift you find! At the trigger-quick take-off—the mile-eating cruising stride—your easy disdain for the passing gas pumps.

You and your SUPER are really stepping out—and Buick's good name as "a sweetheart on the road" gains still more lustre.

Nor is road-thrill the only blessing this new power plant brings. Simpler design makes service easier, so upkeep diminishes as a problem. Hydraulic valve-lifters keep valves properly seated for efficient operation—and for

quiet unbroken by tappet noise.

And you can have this power either with Buick's easy-shifting Synchromesh transmission or the silken luxury of Dynaflo Drive.*

Either way, this SUPER is certainly something to see. To this top-notch new power it adds style and room, comfort and a wide outlook, soft easy stride and handier new over-all length.

Even the price justifies a prompt trip to your Buick dealer to learn more about Buick for 1950. You'll soon see why so many folks are already saying, "Whatever your price range—better BUY BUICK!"

*Standard on ROADMASTER, optional at extra cost on SUPER and SPECIAL models.

Features like these mean BUICK'S THE BUY

- HIGH-COMPRESSION Fireball valve-in-head power in three engines, five hp ratings. (New F-263 engine in SUPER models.)
- NEW-PATTERN STYLING, with bumper-guard grille, super-through fenders, "double bubble" taillights
- WIDE-ANGLE VISIONITY, close-up road view both forward and back
- TRAFFIC-HANDY SIZE, less over-all length for better parking and maneuvering, short turning radius
- EXTRA-WIDE SEATS cradled between the axles
- SOFT BUICK RIDE, from all-new springs, Safety-Ride tires, low-pressure tires, ride-steadying torque-tube
- DYNAFLO DRIVE standard on all ROADMASTERS, optional at extra cost on SUPER and SPECIAL series
- MINISTONE ROADS with Body by Fisher
- WIDE CHOICE OF EQUIPMENT adding flexibility to prices that bracket every price range above the lowest.

PUBLIC INVITED
(Continued From Page One)
nurses' station and has been done in a pastel green. Naturally, there is a glass panel in the wall so that the proud fathers may obtain a glimpse of their infants.

The hospital will accommodate 24 patient, including 18 adult beds, three pediatrics and five bassinets. The rooms are all done in pastel shades and neutral shades of floor coverings so that will harmonize with the furniture and drapes. Along this corridor also are the bathrooms, storage closets and the room for sterilizing bedpans.

The building has a circulating hot water system for heating which is fired by two automatic gas furnaces. An auxiliary pump forces the water through and eliminates any stoppage.

In case of a breakdown of one of the furnaces, the other is sufficient to maintain a comfortable temperature. The room containing the heating and laundry facilities is in the right rear wing and past it is a door leading to a walk which connects with the nurses' home across the yard.

This building is similar in architecture and coloring to the hospital. The entrance opens directly on the pleasant living room with its cheerful fireplace and enclosed bookcases of an unusual design in wood. The entrance wall is pastel green while the other walls are a soft grey.

A small compact kitchen will enable the nursing staff to fix snacks at the odd hours demanded by their schedules.

A service room is off the kitchen for their personal washing needs. In addition, there are two light and spacious bedrooms and a bath all done in soft pastel shades. The building is heated by an automatic gas furnace.

"DON'T BE A SUCKER"... When you contribute money to come worthwhile charity, make sure most of it doesn't go into the pockets of some professional fund raiser! Learn how the racketeers operate. This timely article can be found in the American Weekly, that great magazine distributed with next Sunday's Los Angeles Examiner. Adv.
