S. P. Celebrates Golden Jubilee This Month

This month marks the Golden Jubilee of the opening of the Golden State rail route between the Pacific Coast and Chicago, over which the Southern Pacific and Rock Island railroads operate their sleek "Golden State" streamliners through the Southwest, according to C. E. Peterson, passenger traffic vice president for the Southern Pacific.

It was on November 2, 1902, that passenger trains, then denigrated as "the handsomest in the world," were first placed in thorough service over the new route that linked the Southwest with Chicago and the Pacific Coast.

LINCOLN COUNTY 20 YEARS AGO

(Taken from the files of the Lincoln County News, November 11, 1932, issue.)

Tom Jones of Glencoe was in town Tuesday listening to the election returns at the Democratic headquarters.

Fred Greer was one of the lucky hunters, bringing in a 5-point buck.

The Beantown Baby Show was given by the PTA of Lincoln at the Old Courthouse Auditorium in Lincoln.

See what the "Well Dressed Red Is Wearing," at Ziegler Bros. Store.—Advertisement.

Will Rogers is starting in "Down to Earth" Saturday, Sunday and Monday at the Lyric Theater.

Excerpt from an editorial: "A change is always helpful, whether to individuals or nations. The most sweeping change ever witnessed by most of us was when the Democrats won the victory of last Tuesday."

New Mexico Has Land Plan
 New Mexico has 60 soil conservation districts, comprising 50,330,000 acres, or 72 per cent, of the State's 77,767,000 acres.

AT EL PORVENIR
 By Wm. Felzer

We were camped at El Porvenir away from the lowland August weather. The hour was rather late I fear. What does it matter? We were together. And fleecy clouds drifted over the moon. Spunky and white as a hillyow spume. And through a rift in the drifted spume a red star winked at me.

Your eyes were blue as a violet. Your hair the color of autumn fields. No matter we had only met. For on such a night convention yields. To the age old call of a million years. To times when we swung through the trees. When every pulsebeat only en-dears. The night's weird symphonies.

A bird gave voice from tall pine tree. So liquid and sweet, a compelling tune. While faint and far off mystery. A coyote yiped at the hidden moon. A wind crooned lullabies in the trees. While the waters murmured so sleepily. 'Twas like the sound of droning bees. Goodnight to you and me.

With we were back at Porvenir. Away from the sultry summer weather. No business cares to interfere. Just to talk o'er old times together! Forgetting all things that we had to do. Parcel and part of the daily measure. And just for a while our hearts speak true. The language of sweet pleasure.

Golden rule for safety with all farm machinery is: Never try to clean, oil, or adjust a farm machine when it is running.

State Guard Gets M-Day Assignments

For the first time in history anti-aircraft units of the National Guard have received specific M-Day assignments and men over the age of 35 may enlist for the defense of their homes, with most of them having a definite understanding that they will not be assigned outside the continental United States without their consent. Brig. Gen. Charles G. Sage, adjutant general of New Mexico has announced.

Units which are affected by this statewide service ruling of the department of the Army include all New Mexico National Guard anti-aircraft units except the 804th Anti-aircraft Artillery, Automatic Weapons Battalion. Under an agreement reached at high level conferences in Washington, New Mexico's Anti-aircraft Artillery Brigade will be assigned to the defense of important military projects in the State in event of a national emergency. General Sage said.

One of the most important agreements reached at the conferences was the ruling by the department of the Army that older men might don the uniform and do their part in the protection of their homes and military establishments in New Mexico.

The liberal age provisions apply only to non-divisional AAA units. All New Mexico National Guard, Anti-aircraft units will accept men 17 thru 44 years of age without previous military service for original enlistment. Re-enlistments may be made through age 55 provided the men have at least one year of previous honorable service in the Armed Forces of the United States, including the National Guard or Air National Guard of any state. General Sage continued. Military service physical requirements have not been relaxed.

The liberal age provisions. General Sage said, will serve to bring the Guard up to strength as an effective fighting unit in the shortest possible time. It will be written into the enlistment contract, except in the 804th units, the General continued, that no man who enlists after his 35th birthday will be required to serve outside the continental United States without his consent.

Captain William E. Marr is commanding officer of Battery "D", 120th AAA Gun Battalion in Alamogordo.

Fire is killing more people now than ever before. There were 12,518 deaths due to fire last year the greatest toll in history. Get rid of fire hazards and you protect yourself.

HIGHWAY SAFETY
 By DICK COLEMAN

In the first two articles appearing on Highway Safety we've tried to appeal to the common sense of the readers by pointing out the fallacy of driving carelessly and committing unsafe acts, when, in fact, unsafe acts are the direct and only cause of 90% of all motor-vehicle accidents, injuries and fatalities.

The most common unsafe acts are as follows: Driving too fast or too slow for conditions; failure to keep right of the center line, driving after drinking, disregard of traffic signs; failure to yield right of way; parking on a highway; improper passing; driving when tired; failure to signal and following too closely.

Most of that list speaks for itself. For an explanation as to why those are unsafe acts, it is only necessary to recall some of the accidents which occurred in Lincoln County in the past year.

For expansion on a few of the points, we have some unofficial excerpts condensed from the New Mexico Motor Vehicle Statutes, which were obtained through the courtesy of Elfred A. Jones:

(1) No vehicle shall be unnecessarily driven at such a slow speed as to impede or block the normal and reasonable movement of traffic:

(2) When two vehicles approach an intersection where neither has a stop sign, or where both have a stop sign, the driver of the vehicle on the left shall yield the right of way to the vehicle on the right. The driver of any vehicle traveling at an unlawful speed forfeits his right of way.

(3) Drivers shall yield right of way to pedestrians crossing a street or highway within any clearly marked cross-walk or at any regular intersection.

(4) No person shall park or leave standing any vehicle, whether attended or unattended, upon the main traveled portion of any highway unless the vehicle is disabled to the extent that it is impossible that it be moved.

It's in the book! It's also in the book that careless driving produces accidents, and careless driving is nothing other than the committing of unsafe acts. The major unsafe driving acts are listed above, as they were last week.

This is the last article on motor vehicle safety. We sincerely hope that the readers have benefited from the series, and that they may have prevented an accident, if only a minor one.

Schools to Take Part in Southwest Festival

School participation and approval of the Southwest Folk Festival was expressed by a general endorsement of the program by Tom Wiley, superintendent of public instruction for the State Education Department, and by the Rt. Rev. Msgr. William T. Bradley, superintendent of parochial schools.

"The idea of a yearly Folk Festival is a fine one," Mr. Wiley said. "Not only should it serve to encourage the preservation of folklore, but should help in inter-group relations in the state."

County schools, particularly those in Santa Fe, Sandoval, Valencia, Torrance and Bernalillo have all expressed interest and other schools are urged to write for permission blanks to Miss Sarah Gertrude Knott, director of the Southwest Festival program, San Felipe Hotel, P. O. Box 478, Old Albuquerque.

The program is scheduled for the Ice Arena, 129 Truman NE, in Albuquerque on November 18, 19 and 20.

The public is invited free of charge to pre-festival activities.

NO TWO-DAY RECESS IN BIG GAME SEASON

The State Game Department reiterates there will not be a two-day recess in the middle of the big game season. Some sportsmen confused the general big game season with the Vermajo Park dates when they were first announced. Dates of the general big game hunting season for New Mexico are noon, November 8 through the 19th, inclusive.

State Developing New Fishing Area

The State Game Department announces completion of a new dam and public recreational area on the site of the old Hopewell Dam, 23 miles northwest of Tres Piedras in the scenic Carson National Forest.

Impoundment of water has already begun and plans have been formulated to begin stocking the lake with trout next spring. Easily accessible by good roads, Hopewell Dam though remote from big centers of population promises to become one of northern New Mexico's most popular fishing and recreational sites.

A better deal because...
 Every Chevrolet truck is factory-matched to the job—with the right power, the right capacity, right engine, transmission, springs, axle, and tire to do its work at the lowest possible cost.
 Come in and see for yourself what a wonderful deal you'll get with a great new Chevrolet truck.

A better buy because...
 THEY LAST FOR LESS
 Production economies, possible because Chevrolet is the world's largest truck manufacturer, let Chevrolet trucks last for less than comparable models of any other make.

LOWER OPERATION AND MAINTENANCE COST
 Valve-in-Head engine design; strong and sturdy Hypoid rear axles; Flexi-Mounted coils; rigid, channel-type frames; single-walk rear axle housings; Unit-Design bodies and many, many other features reduce costs and increase the life of your Chevrolet Advance-Design trucks.

TRADITIONALLY HIGHER TRADE-IN
 Chevrolet trucks keep their value longer—proof of the greater value built into Chevrolet trucks and a wonderful plus at trade-in time.

CAPITAN H. S. ENDS SEASON UNDEFEATED

Scoring almost at will in the first period in a game at Capitan last Friday, Capitan's Tigers downed Tatum, 34-7, to complete their 10-game schedule without a defeat and to run their string of unbeaten games to 19 over a two-year stretch.

The Tigers have not lost a game since 1950, though they were tied by Tularosa in 1951. The 10-game stretch this season leaves them in high position for the New Mexico Class B Championship.

The first two times the Tigers got the ball in the opening period they turned it into 6 points. Tatum fumbled on the first play after Johnny Werner booted the kickoff into the end zone, and Werner covered the ball on the Tatum 8. On the first play Garth Hyde cut off left tackle for the touchdown and Wally Ferguson converted.

The Tigers held the visitors after the next kickoff and the punt was returned to the Tatum 30. Ferguson rifled a pass to Kenny Morris in the end zone on the first play. Ferguson again booted the extra point.

Again the visitors were forced to kick, and again Ferguson shot a pass, this one for 40 yards, to Noah Montoya for the third touchdown. Ferguson missed this one.

In the third quarter Ferguson pitched a 20-yarder to Morris who scored and Ferguson added the extra point. In the last quarter Ferguson punched through the line from the 2 and booted the point.

Tatum scored in the fourth period when Joe Black intercepted one of Ferguson's passes on the Tatum goal-line and returned it to the visitor's 40. On the first play Allen threw a screen pass to Black and the Tatum back ran 60 yards behind his blockers for the score. Billy James scored the extra point on an end-around.

Steers bought as feeders from herd owners using strains of bulls tested and selected for rapid gains by the U. S. Department of Agriculture have brought net added returns of \$30 to \$40 per head above feed costs.

Capitan Woman's Club Meets Friday, Nov. 21

By ANN EARLING
On Friday, Nov. 21, the Capitan Woman's Club will hold its regular monthly meeting at 2 o'clock in the afternoon. After the business meeting the club members will attend a special Americanism program scheduled for the high school assembly at 2:45. "Memories of 1918" will be presented by the students, under the direction of Mrs. Ruby Yarbrough.

Arvie Gunnels is home on furlough with his parents at Alto. Arvie is in the United States Marines service.

Mr. and Mrs. Billy Ferguson were hospitalized at Carrizozo this week.

Mr. and Mrs. L. T. Womack visited at the home of Mr. and Mrs. Happy Morris last weekend. L. T. is on Navy leave.

Mr. and Mrs. Joseph Murphy of Carlsbad and their daughter, Mary Elizabeth, and her fiancé, Pat Hannigan of Roswell, were guests at the home of Mr. and Mrs. D. O. Murphy last Sunday.

Our city clerk, Mary Werner, informs us that 1953 drivers' licenses will be on sale at the City Hall on December 1st.

Mr. and Mrs. Lloyd Absher have moved to Coalville, Utah. Lloyd has been with the local Soil Conservation Service for the past seven years. He has been transferred to Coalville.

The Capitan Sewing Club held its luncheon and sewing bee on Tuesday at the ranch home of Mrs. Ross Flatley. Mrs. Champ Ferguson was co-hostess.

About six hundred hunters had registered at the desk at Pearl's Cafe up to Tuesday. Reports on the hunter who was shot and in critical condition last Saturday night are that he is on the way to recovery.

CHARLES W. BOONE SERVING IN FAR EAST

Serving with the Amphibious Forces in the Far East aboard the attack transport USS Maryland is Charles W. Boone, electrician's mate third class, USN, son of Mr. and Mrs. J. J. Boone of Carrizozo.

The average cost to industry in creating a single new job today is somewhere between \$10,000 and \$11,000, according to the U. S. Chamber of Commerce.

ENCINOSO NEWS

Mr. and Mrs. Bill Edgar and Willis went to Roswell Tuesday after casting their vote at the Encinosa School.

Kenneth Lacy, son of Mr. and Mrs. John Lacy, left for the Army last week.

Mr. and Mrs. Grady Eldridge and Mr. and Mrs. Charles A. Jones were among several couples who were entertained by the Truman Spencers Tuesday night to listen to the election returns. Charles A. Jones was among the county candidates who won in the political race. He is the new commissioner from District 2.

Toke Foster has had a lovely hunting lodge built on what is known as the Hope place over here. Haven't seen it yet, but from all reports it must be beautiful.

On Wednesday Grady Eldridge delivered the heifer calves to Hugh Bancroft of Capitan that were contracted in the summer.

Judging by the number of cars on the road and the shots heard on the opening day of hunting season, there must be a couple dozen hunters for every deer in these mountains. Twenty cars in 19 minutes were counted going by the Walter Jones ranch Saturday morning.

Claudio Montoya was home Tuesday to help hold the election. He has been working in Roswell for the past few months. He reported that his daughter, Lupe, is still working in Roswell, too.

Mrs. Walter Jones and her sister, Mrs. Elsie Rogers, are staying with Patsy and Walter Jones while their parents, the Charles Jones, are in El Paso for a few days.

Our Capitan Tigers won their final game of the season Friday from Tatum. This is their second year to come through undefeated. We are surely proud of them.

The Seniors of Capitan High School, along with their sponsor, Edgar Lee, went to Carlsbad Caverns Tuesday. From all we can hear they had a BIG day.

The dance at Pine Lodge was well attended Saturday night by all the local people and hunters.

Mr. and Mrs. Nick Brill were in Roswell Thursday and visited with John Purcella, who is slowly improving.

A. Romero has been in the hospital at Fort Stanton. He had the misfortune to cut his hand while sawing wood and had to have one of his fingers amputated.

Mr. and Mrs. Earl Harrow were visitors at the McInnes ranch last week. Mrs. Harrow is the former Nettie Ruth McInnes.

Thought for the Week: Remember that today is the tomorrow you worried about yesterday.

Marriage Licenses

(From the County Clerk's Office)
Nov. 7.—Rosa Aragon, 22, Carrizozo and Fred V. Sweet, Jr., 28, Carrizozo.

Nov. 8.—Helen Wilson, 31, of Beaver, Okla., and Ernest Iverson, 40, Carrizozo.

Valencia County's Polio Total Reaches 41

BELEN, Nov. 10.—Two Valencia County first graders are the latest victims in the county's 1952 cases of infantile paralysis. Six-year-old Sharon Stubblefield became the 41st county victim of the year. Jose Vallejos, 6, a first-grade pupil, was the 40th victim last month. He is near complete recovery.

Sharon is the second polio patient in the Clarence Stubblefield home, north of Belen. Her older brother, James, 8, had an attack earlier this year.

FT. STANTON NEWS

By MRS. PERCY PARKER
Eric Williams of Albuquerque was a visitor at the station one day last week.

E. J. Bible of Dexter was a visitor in the Baker home over the weekend. He was one of the lucky hunters to get his deer this first day.

Mr. and Mrs. Jimmie Anderson of Albuquerque are spending several days in the Parker home. Jimmie and Percy are hunting.

Nancy Payman was home over the weekend from El Paso. Dr. McLeroy left Thursday for San Francisco.

Mr. and Mrs. Leonard Olsen of Las Cruces spent the weekend with Mrs. Olsen's parents, Mr. and Mrs. Burleson.

Joe Don Womack, who is a student at the University, was home over the weekend.

Emmet Womack Jr. and Rosa were home visiting their parents, the Womacks and Bingham. Emmet is hunting.

Mrs. McLeroy, Sailer and Fidler spent last Thursday shopping in El Paso.

Ray Baker got his deer three minutes after 12 o'clock noon last Saturday. It's a nice one, too.

The following hunters have bagged their deer: Burleson, Wo-

mack, Cox, Pierce, Ernest Sanchez, Baker, and Jimmie Thompson.

Bert Minter and Jimmie are spending a few days in Los Alamos with relatives.

Joe Barker has been busy all weekend, putting in new gas tanks and pumps.

The light snowfall as the hunting season opened was welcomed by the hunters, in spite

of the cold wind that came along with the snow.

Miss Tillatson spent the weekend in Albuquerque attending the dietitians' meeting.

Bill Wilson of Roswell was a

visitor in the Adolph Wilson home over the weekend.

Joe Hobbs and Dr. Miller were the lucky winners in the football guessing contest. How about a tip?

District Attorney-elect.

Answers to Questions About Buying Beef

With beef supplies large and more coming to market, you've probably been asking questions about buying and using beef. Here are some of the common questions which homemakers are asking, with answers furnished by the New Mexico State Extension Service:

Q—Are higher grades of beef more nutritious than the lower grades?
A—No. There is no relation between nutritive value and grade.

Q—How can I tell if beef will be tender?
A—Grade and cut give an indication of probable tenderness. Rib and loin cuts of U. S. Prime and Choice grades are ordinarily tender. Meat that has fine-textured lean, and red, porous bones; and that is well-marbled with fat will usually be tender. Tender meat comes from well-fed beef cattle that are slaughtered when young.

Q—What cuts, less expensive than round, are suited to grinding?
A—Cuts from the chuck, brisket, flank, plate, shank and neck.

Q—How can I reduce shrinkage, so that there will be more meat to serve?
A—Cook at low to moderate temperature all or most of the cooking time. Don't overcook.

Q—How long can I safely keep beef that has been roasted?
A—A few days in the refrigerator, covered, and separated from broth or gravy.

Q—Is it safe to eat frankfurters without cooking them?
A—These sausages contain both beef and pork. The consumer can be sure that they are safe to eat without further cooking if they were prepared under U. S. government inspection, which requires 157 degrees Fahrenheit, in processing. This temperature kills any trichinae which might be present in the

CITY OF DALLAS TO HIRE RAINMAKER

DALLAS, Texas, Nov. 12.—The Dallas City Council completed plans to hire a Denver "rainmaker" for six months in an attempt to ease the severe water shortage in the drought-ridden city.

City Manager Elgin Crull was authorized by the council to enter into a contract with the Water Resources Development Corp., headed by Dr. Irving P. Krick, meteorologist. The company does not use an airplane to seed the clouds but sets up generators on the ground below overhanging rain clouds.

The dwindling water supply at Lake Dallas was bolstered Sunday by rains which added approximately 160 million gallons in a three-day supply.

The city continued work on plans to drill new deep wells to supplement the Lake Dallas supply.

Q—How can I tell whether frankfurters or other link sausages sold in bulk were prepared under Government inspection?
A—A stamp or band label bearing the U. S. inspection stamp is required for each one and a half pounds.

Q—How long can frankfurters and bologna be safely kept in a home refrigerator?
A—These products keep better if unsealed—and they can usually be held safely for about a week. Sliminess and off-odors are signs of spoilage.

Magazine Poked Fun At President When He Was West Pointer

By PATRICIA HENRY
Asst. Editor, The Roundup, New Mexico A & M College

STATE COLLEGE, N. M., Nov. 12.—Have you ever known a president of the United States? Well, I haven't either, but after talking with Gen. C. H. Tenney, Col. A. W. Chilton and Col. G. R. Goethals, all instructors at New Mexico A & M College, I feel that I am a bit acquainted with "Ike."

You see, General Tenney was a classmate of the new chief executive and Colonel Chilton and Goethals had the new President as a student in their classes at West Point.

Yes, they all remember him. That "American boy" manner and outstandingly winning way was evident even when he was a plebe at West Point.

General Tenney, who entered the academy the same year as "Ike," and graduated with him and still corresponds with him, got down his 1915 "Howitzer" (the West Point yearbook) when I went to talk with him about his famous friend, and turned to the page where "Dare Devil" Dwight, the Dauntless Don, was pictured and humorously written up like this:

"... At one time he threatened to get interested in life and won his 'A' by being the most promising back in Eastern football—but the Tufts college game broke his knee and his promise. Now Ike must content himself with tea, tiddledy-winkles and talk, at all of which he excels."

Little did this yearbook writer know that he was teasing a future president of the United States about "getting interested in life."

All three New Mexico A & M instructors recall that he was not the top man of his class—he graduated 61 in a class of 124, but he was competent enough to remain in the top group as far as personalities were concerned. And what competition. Listed alongside of Ike on the roll sheet of the class of 1915 were such names as Bradley, Van Fleet, Stratemeyer, and many other notables.

Ike's main interest at that time in his young life was athletics. His football accident reduced him to a year or two of cheerleading. Ike's promise as a football player is recalled by Colonel Goethals who remembers that the Army coach, Charles Daly, made the statement that if the knee injury hadn't intervened, Ike's name would have most probably gone down with other Army immortals.

General Tenney says that of all their classmates, he knows of none who haven't retained their admiration and even affection for Ike through the years. His leadership and unusual ability to weld a group together as a team are especially remembered by these gentlemen.

Although Ike was popular with young and old alike and his leadership qualities were even then recognized by all these around him, he never got above the rank of color sergeant in the corps of cadets. And even then he got "busted" of this rank for a breach of West Point discipline.

may ensue. Comments may be sent to The Taxpayers' Association of New Mexico, P. O. Box 557, Santa Fe, New Mexico.

SUMMARY

In preparing this report the New Mexico Reorganization Committee has been guided by certain standards which have been developed during the past fifty years, and which have generally been placed in effect through reorganization programs in various states. These principles include, among others: (A) the location of administrative responsibility and authority with the chief executive; (B) a sound personnel system; (C) an adequate budget system; (D) a simplified fiscal system; (E) a well coordinated grouping of functions; (F) and an integrated structural organization.

A. Responsibility and Authority Given to the Chief Executive. — Executive responsibility and authority can best be established by reducing the number of executive officers; by reducing the number of small independent agencies; by establishing a few large departments and commissions whose heads are appointed and removed by the Governor; thus making the Governor the responsible head of the State.

1. It is recommended that a few departments be established, which will integrate many of the functions now belonging to numerous small boards, commissions and committees; and that the heads of the Departments be appointed and made subject to removal by the Governor.

B.—A Sound Personnel System. — A sound personnel system is the keystone of any administrative structure.

2. It is recommended that a comprehensive personnel system be established by law. All positions below the higher administrative offices should be filled on the basis of qualifications established by examinations and otherwise. Those qualified and appointed should have reasonable security in their positions. It is further recommended that a strong personnel department be established under the supervision of a Personnel Commission, which shall appoint a director to do the technical work of the Department.

C.—An Adequate Budget System. — Efficient and economical administration requires adequate planning of the revenues and expenditures of the State.

3. It is recommended that an act be passed, providing for a budget system and for an executive budget which will show in a comprehensive way all rev-

Summary of State's Reorganization Plan

New Mexico, like other states, found itself in the position of constantly increasing demands for government services and no new sources of revenue to look to. The answer was to try to increase services at the same level of expenditures by increasing efficiency of operation thru the reorganization and streamlining of State Government operation.

The 1951 Legislature provided for the Reorganization Committee and this is a summary and guide to the recommendations which they made after over a year of research and study into the State's administrative organization and operation.

"LITTLE ROOVER" REPORT
The 126 page printed report of the New Mexico State Reorganization Committee has been distributed from the office of the Taxpayers' Association of New Mexico. A limited number of copies are still available for distribution on request.

The statement of 20 pages includes a "summary" of the report with 11 general recommendations, and sets out 171 other recommendations, by chapters. These recommendations affect 150 State departments, institutions, boards, commissions, and other State agencies in a process of reorganization. Bills for enacting these proposals into law are now being prepared by the Legislative Reorganization Council for introduction to the next Legislature, meeting in January, 1953.

The Reorganization Committee has ended its labors, but its members will continue their interest in the activities which

"Engineers and Atomic Energy"

Following is a continuation of the speech on "Engineers and Atomic Energy" delivered by Rear Adm. George F. Kraizer, USN (Ret.), before the Northern New Mexico Section, American Institute of Electrical Engineers, at the Far Club in Albuquerque on Monday evening, September 29.

Any future building at Los Alamos will not approach in size that of the years since 1947, but we must anticipate that there will be some continuing requirements for construction.

It may be interesting for you to have also a picture of the distribution of our present staff at Los Alamos Scientific Laboratory. Of a total of 2,900 employees, there are 482 men holding degrees in science; there are 192 engineers. During the 12-month period ending June 30, it is estimated that a minimum of 170 new scientists and engineers will be required as new employees and that the following pattern will hold: 120 people in the sciences; about fifty engineering. Their principal employment interests are in the mechanical, electrical and chemical engineering fields. This number may be substantially increased during

the year. It is also highly probable that replacements alone will require a minimum of 75 to 100 persons annually—one-third of these being engineers.

Not all of Los Alamos' requirements are in the above categories. Right now, Los Alamos is recruiting a considerable number of mechanics.

The end goal of this rather tremendous weapons program is, of course, production of weapons. We are under a somewhat more stringent handicap in reporting our accomplishment than another industry is. A motor manufacturer can inform his people that they produced so many million units last year and just how well they sold. We have of course a ready market for all of our products, but we don't even discuss among ourselves how many units we produce. We have to deal in generalities, but they are very comforting generalities.

Commissioner Glennan summarized the weapons status recently, saying: "Fissionable material is in reasonably abundant supply and our supplies are becoming increasingly large at an accelerating rate. We know how to manufacture destructive bombs of many types on mass production schedules. We have substantial stockpiles of atomic bombs. We are expanding our plants for the production of fissionable materials and enlarging our manufacturing activities to enable us to make even more weapons. Our development centers are busily engaged in finding ways of better utilization of these still precious fissionable materials."

The Atomic Energy Commission is keenly aware that the results obtained in the weapons

program have been achieved by development of a resourceful, tri-partite team. Industry, educational institutions, and government are each playing an effective part in our progress. We are especially gratified by the interest of industrial corporations in becoming members of the weapons producing team, even though their fees are equal only to repayment of overhead or a minuscule fraction of the dollar volume of their activity.

From the start, the Commission has built its organization on a framework of Government financing and administration, with actual operations conducted by private institutions or corporations. Santa Fe Operations, for instance, has only 1662 direct AEC employees and of these 45,000 perform guard and other duties related to security. The others, numbering less than 1200, work in a headquarters office, eight field offices, and other specialized offices, to provide Government administration of essential activities such as procurement, finance, etc. for an extensive contractor organization, that now includes 61 direct contractors with slightly fewer contractors.

Private commerce and industry are used to the utmost. Sandia Corporation alone executes approximately 50,000 procurement contracts a year and has approximately 3600 regular suppliers.

Now I would like to speak to a question asked of me earlier last week. It is, "What is the future for the engineer specializing in atomic energy?"

Part of this question relates directly to the permanence of the program here in New Mexico. I can only answer that our Nation has invested many millions in building and equipping permanent laboratories and supporting facilities at Sandia and at Los Alamos. I cannot see ahead to the time when any development would remove the Nation's requirements for the scientific and engineering equipment, facilities, and skills developed at these two installations. Their rate of activity might be reduced, yes, but their concentration on the laboratory functions of development and design, and the very nature they are developing, indicate to me that there will always be a need.

Atomic energy work is usually interpreted in too limited a fashion. It is not only the counting of neutrons. Los Alamos and Sandia together delve into almost every field of scientific and engineering activity, and much of the time they are working with materials, with designs, with theories and practices which remain to be applied in the future to the civilian economy. Our engineers thus have always at hand the opportunity for basic education well in advance of actual industrial practice.

Those of us who are members of the Atomic Energy Commission eat regularly, but none of us—whether we work on a Govern-

ment payroll or for a cost-reimbursed contractor—finds his real reward in paychecks and bonuses. This Nation's leaders say, and they are confirmed by the leaders of other great nations, that our atomic readiness in stockpiled weapons and in the air craft for delivery is all that has so far prevented a third world war. This is the peaceful purpose for which we in the weapons program work—and that is our reward.

Anti-Freeze Should Be Changed Every Winter

It's anti-freeze time again for your car, truck, or farm tractor. And here are some facts about anti-freeze from farm engineering specialists at the University of Wisconsin.

Can anti-freeze be used for more than one season? The Wisconsin engineers, who have studied the question, intensively, point out that anti-freeze can become contaminated by leakage of exhaust gas while it's in use. Carbon and sulfur products from exhaust gas react, with compounds in the anti-freeze and form salts. These salts can cause corrosion when they are left in the radiator. To protect against corrosion the engineers advise that anti-freeze should be drained after one winter's use.

Under no circumstances should an anti-freeze solution remain in the engine's cooling system during summer, they add. Deterioration is much more rapid under summer driving conditions.

Know Range Plants for Winter Management

By knowing the growth habits of their range plants, livestock operators can winter their animals economically and with minimum losses, according to the County Extension Service.

In late fall and winter, some types of range forage are running low in such important nutrients as protein, vitamin A and phosphorus, while in other plants the amounts of these nutrients are building up.

Range grasses are low in nutrients at this time of year. For example the protein content of such important grasses as needle and thread, blue gramma and western wheatgrass decreases to about 3% by November 1, compared to about 15% around the first of June. The vitamin A and phosphorus content of these grasses follows about the same trend, but at lower percentages.

On the other hand, the shrubby type plants such as winter fat, greasewood, and saltbush are building up in nutrients at this time of year. Although the percentages of nutrients in shrubby range plants vary widely, greasewood, saltbush, or winter fat may contain as much as 8 or 10% crude protein in December or January.

In areas where these shrubby range plants are abundant, they will save ranchers a lot of money by furnishing the needed nutrients. On the other hand, in areas where grasses comprise most of the range forage, supplemental feeds will be necessary to provide livestock with adequate nutrients.

T & C Radio Station Sold to O. L. Dennis

Truth and Consequences, Nov. 10.—Radio station KCHS of this city has been sold by Len Trainer and associates to O. L. Dennis, pastor of the First Baptist Church.

In making the announcement Mr. Dennis said it will be the policy of the new ownership to continue operation of the station on a strictly business-like basis.

The average tax rate for 1952 for the State, including those for State, county, municipal and school purposes, is \$27.33 on each \$1000 of assessed valuation, as compared with \$26.66 for the previous year, an increase of 61c on each \$1000 of assessed valuation—New Mexico Tax Bulletin.

MORE U. S. ROAD FUNDS NEXT YEAR

SANTA FE, Nov. 10.—The State Highway Department will receive approximately one million dollars more in Federal aid money in fiscal 1953-54 than it received during the current year.

A spokesman for the department said today that the allocation of Federal funds for next year totaled \$7,601,130, compared with the 1952-53 figure of \$6,551,694.

The total will be broken down into \$4,003,539 for primary highways, \$2,749,711 for secondary roads, \$440,412 for urban projects and \$407,468 for interstate roads. The interstate allocation is new, being set up for work on cross-country highways 66, 80 and 85. In the past funds for construction on those highways came from the primary allocation.

The spokesman said that it would require about \$4,275,635 of state money to match the Federal funds, giving a total of about 12 millions for Federal aid road construction during the year.

In addition the department will have available about four millions for road building without Federal participation and will spend about six millions for maintenance and 3 1/2 millions for administration, engineering and equipment.

"Soil conditioners" should be used on an experimental basis. Buyers should limit their purchases to those materials that have been tested and on which reports have been released.

Sierra County Agent Resigns; Enters Business

The resignation of Bill Jackson, Sierra County agent, will become effective December 1st. He is to join the Agricultural Service Company at Deming as a part owner and stockholder. The firm handles insecticides, fertilizers and assists with various farm management problems.

Mr. Jackson was assistant county agent of Dona Ana county prior to taking the Sierra position in June of 1947.

There's nothing like a U.S. Bond!

Even the hard-bitten U. S. Army recognizes that. And so some lucky soldiers—patients at Brooks General Hospital—will soon enjoy golden-crusty, apple-rich, turnovers. Prepared with a woman's touch and a scientist's skill by these dietician interns. They're lieutenants in the United States Army—doing a woman's work in a man's world—doing their part to protect your world.

You're on the "defense team," too—when you save your money, and protect your family, with United States Defense Bonds. So why not start investing in Defense Bonds today... and get them regularly, through the Payroll Savings Plan where you work. Thousands say it's the only sure way to save—because it saves something out of every check before you have a chance to spend it. And you know, no matter how small your income you can't afford not to save something for yourself!

HERE'S HOW B BONDS NOW EARN MORE MONEY FOR YOU!

Now safe, sure U.S. Series E Defense Bonds pay an even better return than ever before... thanks to 3 brand-new money-earning features announced by the U.S. Treasury.

- Now every Series E Bond you get begins earning interest after only 6 months. It earns 3% compounded semiannually, when held to maturity. It reaches full maturity value earlier (9 years 6 months) and the interest it pays is now bigger at the start!
- Every Series E Bond you own can now go on earning interest for 10 more years after it reaches the original maturity date—without your lifting a finger!
- During the 10-year extension period, every un-matured bond earns at the new, higher interest (average 3% compounded semiannually). Your original \$18.75 can now repay you \$33.67. \$37.50 pays back \$73.36. And so on.

Start now! Invest more savings in better-paying Series E Bonds—through the Payroll Savings Plan where you work or the Bond-A-Month Plan where you bank!

There is for the strong... for peace and prosperity. Save with U.S. Defense Bonds!

The U. S. Government does not pay for this advertising. The Treasury Department thanks you for your purchase. Treasury Dept. Printing Office: 1952

LINCOLN COUNTY NEWS

PERSONALS
George L. Zimmerman, Carrizozo attorney, attended the Village Council meeting in Ruidoso Friday evening, Nov. 7.

W. H. Baker returned Monday from San Diego. He will make his home with his son and daughter-in-law, Mr. and Mrs. Paul Baker.

Mr. and Mrs. J. B. Howell of Portales are visiting this week at the home of their parents, Mr. and Mrs. Roy Shafer of Carrizozo.

Mr. and Mrs. E. A. Casey have moved into their new two-bedroom home in the new addition in north Carrizozo.

Wm. Gallacher Jr., U. S. A., is home on furlough. He is visiting his parents, Mr. and Mrs. W. W. Gallacher.

D. A. Giles of Lincoln was in Carrizozo Thursday. He came to the news office to claim his key which was advertised in the "Lost and Found" column last week. The key was turned in to the News office by Albert Roberts of the Monte Vista Service Station.

Mr. and Mrs. Floyd Smith and children of Lordsburg were visiting old-time friends in Carrizozo over the weekend.

Other successful deer hunters were reported to be J. D. Crawford, the Gene Garrisons, J. B. Close and Snooks McDaniel.

Mr. and Mrs. D. McDaniel of Deming have been visiting Mr. and Mrs. Homer McDaniel of Nogal and the Carl Degner family in Carrizozo.

Mr. and Mrs. Benny Sawyer and Mr. and Mrs. Leon Stanley Brown of Alamogordo were recent visitors of Miss M. Castorina, commercial teacher at Carrizozo High School. Mrs. Sawyer and Mrs. Brown are sisters of Miss Castorina.

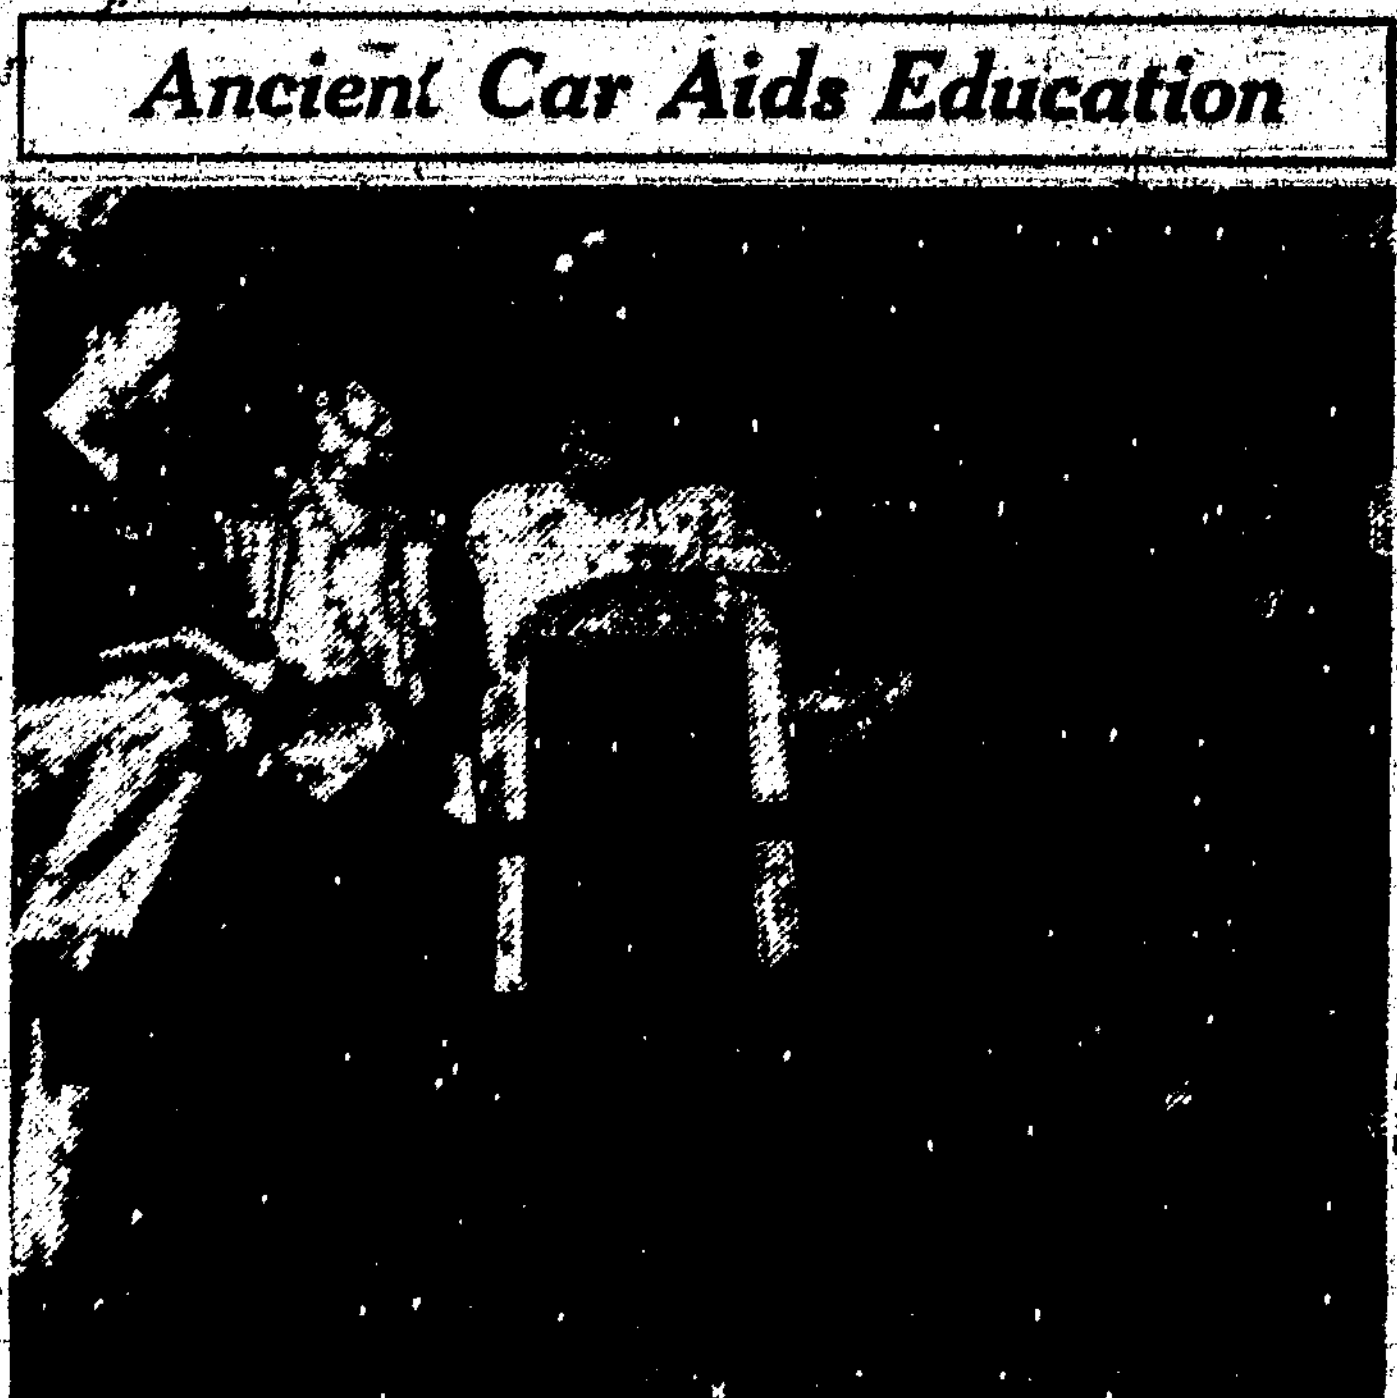

Word has been received from Mr. and Mrs. Les Kinnard that they have decided to return to the Southwest to make their home. Mr. Kinnard has already gone to work in the printing trade in El Paso. They plan to visit Carrizozo the first of next week.

Dewey Wooten, section foreman on the Southern Pacific, and Mrs. Wooten, were visiting at the home of their son, Ben Wooten, while taking part in the big game hunt.

Born to Mr. and Mrs. John J. Dolan of Tucuman, Saturday, Nov. 1, a baby girl. The child weighed 8 lbs., 6 ozs. at birth and has been named Fawn Renee.

A nationwide survey by the Chevrolet Motor Division of old cars on college campuses credits this 1924, four-cylinder coupe with being "most useful." The ancient vehicle is almost literally putting (L. to R.) Keith, Wayne and Norman Brown through school. It is their link between their farm home near Ames, Ia., and the educational facilities of Iowa State University. Week-ends the 28-year-old Chevrolet is employed on farm chores.

LINCOLN NEWS

By MRS. J. E. PHILLIPS
A run-away truck transport gave the residents of Lincoln some excitement this week. According to reports, the truck stopped in the vicinity of the Hernandez Cafe. When the driver got out of the truck to go into the cafe he evidently failed to set his brakes.

The truck began to roll, mowed down the fence posts and the fence in front of the house formerly owned by Lupe Baca and stopped just short of hitting the side of the house that Mrs. Sara Salazar lives in.

Apparently the only damage caused by the freak accident was to the fence, as the driver backed the truck out and drove off.

Holiday and hunting guests at the Bill Wilson home have been Mr. and Mrs. Jack Evans.

Juan Luna is just out of the Veterans Hospital in Albuquerque and is recuperating at home here in Lincoln.

Nasario Garcia, who has been at Camp Chaffee, Ark., is here on leave. He will go on to the West Coast from here.

After a very narrow escape, little Jerry Gomez is getting along nicely.

Donnie Purcell is here from Tucson, Ariz., visiting his grandmother, Mrs. Maggie Pfingsten, and other relatives. Donnie is taking Mrs. Pfingsten back to Tucson for the winter.

Mrs. Bess Cox of Brawley, Cal., has been visiting Mrs. Pfingsten while her daughter Irene and husband, Ted Tacker, have been hunting in the White Mountains.

Mr. and Mrs. Sam Welsh and children of Logan, N. M., were over for the week-end.

The school reports that Mrs. Ackerman of Capitan is doing a fine job cooking for the hot lunch project.

Mr. and Mrs. Ralph Gamero have returned to Lincoln to live after spending a few months in California.

Andy and Jack Wright spent a few days with Mrs. T. A. Wright and hunted for deer.

At a recent meeting of the Garden Club at the Old Court House, fifty were present.

REV. BURCH CALLED TO CLOVIS BY MOTHER'S ILLNESS

Rev. C. E. Burch was called to Clovis last week by the critical illness of his mother, Mrs. M. B. Burch, 83.

Card of Thanks

Our thanks and appreciation for your many kindnesses to us and to Delbert "Belleard" Rutherford in his illness and passing.
THE FAMILY OF DELBERT RUTHERFORD

does not have adequate power to control local financial authorities.

8. It is recommended that the Commission be given power to suspend or remove local officers for failure to obey the law or the regulations of the Commission in respect to the assessment of property.

b. Financial planning and overhead administration.

9. It is recommended that a Department of Finance and Administration be established, headed by a director responsible to the Governor. This department should have general control and supervision of expenditures, including the preparation of the State budget, the supervision of local budgets, the establishment of an accounting and reporting system, and the responsibility of furnishing certain central services.

10. It is recommended that the functions of the State Tax Commission in respect to passing on the budgets of local authorities be transferred to the Department of Finance and Administration.

c. Tax legislation.

11. It is recommended that the Legislature replace the present inadequate and confused tax laws by a well-organized tax code.

E. A Properly Coordinated Grouping of Functions. Good administration demands that the functions of government be so grouped as to prevent overlapping, duplication and the bestowal of incompatible duties and powers upon the same agency. Conversely, insofar as possible, related functions should be grouped within the same agency.

F. An Integrated Structural Organization. The existence of many diverse State agencies to perform functions which could be performed by a few integrated agencies make for confusion, needless cost, and inefficiency.

Reorganization Plan
(Continued from previous page)

d. The inadequacy of financial administration at the local level.

e. Extremely complicated and confused tax laws.

2. Several recommendations are made to simplify the fiscal system, as follows:

4. It is recommended a general fund be established, into which all revenues of the State are placed, unless specifically exempted by law; and from which most of the expenditures of the State shall be appropriated by the Legislature.

5. It is recommended a wide variety of funds which (1), are not of a contractual, trust, or suspense nature, and (2), are not the result of certain very specialized self-supporting or business activities, be abolished.

6. It is recommended that a constitutional amendment be proposed by the Legislature, to be assented to by the people and by Congress, providing for doing away with present constitutional income funds; and placing all current income (as distinguished from capital income which is derived from public lands), in the general fund, to be distributed to the different beneficiary institutions by the Legislature, according to their needs.

a. Revenue collection.

(1) At present there is a confusion of revenue functions with those of regulation.

7. It is recommended that all the chief revenue collecting functions be placed in a Department of Revenue.

(2) The State Tax Commission

IT STILL BURNS. Enrique Martin Moreno (left), director-general of the third Mexican Pan-American Road Race, Nov. 19-23, appears baffled by the engine of the 1917 Studebaker which greeted him on his arrival in El Paso recently where Moreno completed plans for the finish of the 2,000-mile race in Juarez.

The ancient car, used by a brewing company for promotional purposes, has been restored to perfect condition. Shown in the rear seat of the touring model are Mrs. Moreno and Captain Pablo Martinez Rioja, representing Mexico's Secretary of Defense, while in the front seat next to the car's driver is Antonio Cornejo.
