Order Changes Draft Status of Fathers

Col. John P. McFarland, New Mexico director of Selective Service calls attention to the fact that fatherhood, as such, will no longer be ground for deferment.

The President's Executive Order of July 11, 1953, provided that men deferred as fathers before August 25, 1953, will continue to be deferred, but beginning August 25 registrants not now deferred as fathers, cannot use fatherhood as a basis for attaining deferment unless they can show that their induction would result in extreme hardship and privation to their dependents.

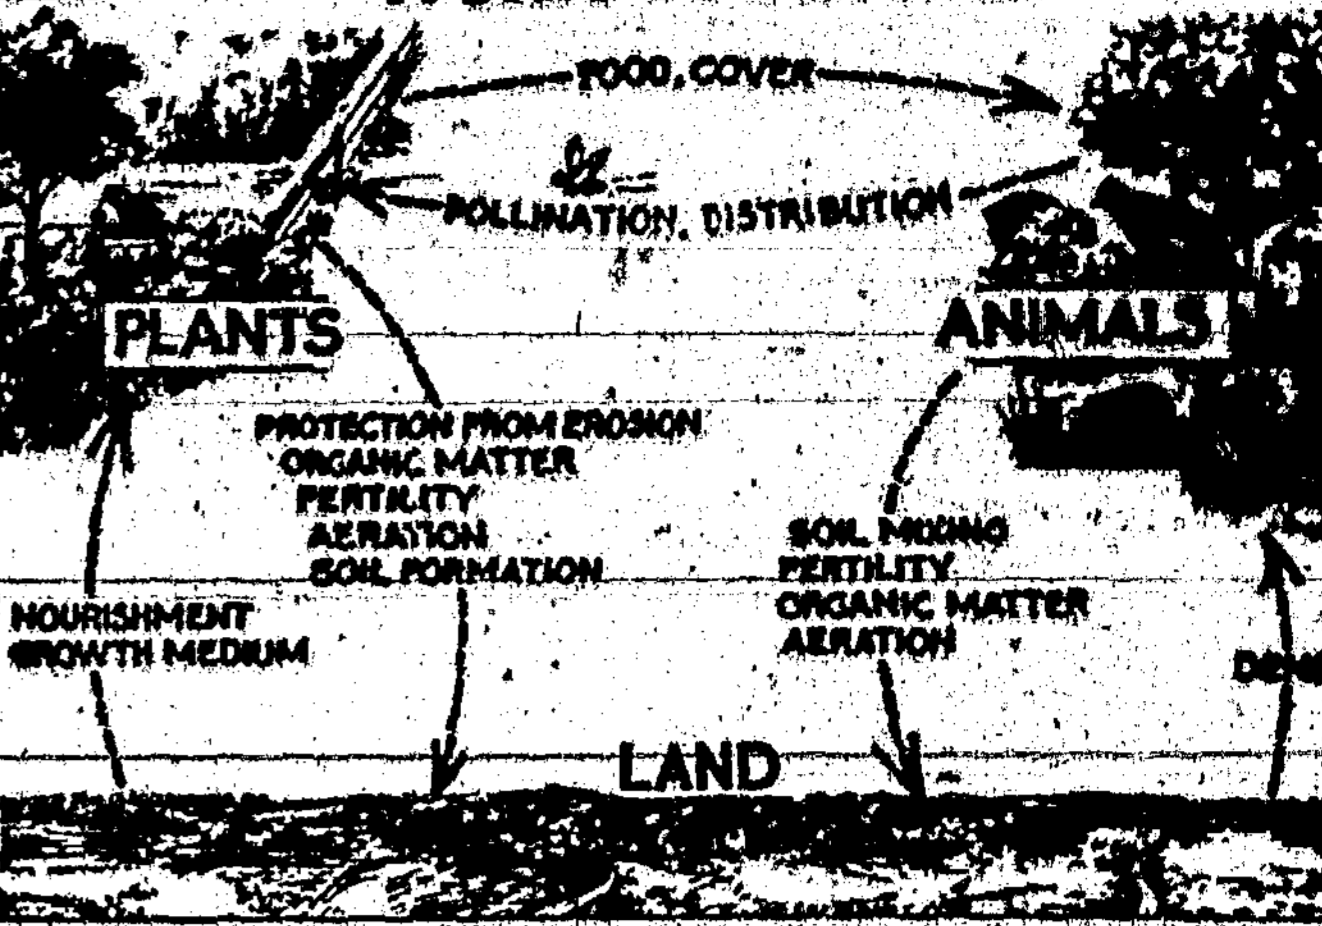

In the past, some of the temporarily deferred registrants acquired dependents during the period of their temporary deferment and thus gained a virtual indefinite deferment from service. This additional deferment as a result of fatherhood constituted an injustice, the State director said, and it has resulted in the calling up for duty of many younger registrants earlier than they normally would have been called.

It was revealed that the number of dependency deferments in New Mexico has been increasing at a rate of 41 monthly, which is 9% of the total monthly registration in New Mexico. On July 1, 1950, New Mexico had 4,697 men deferred on dependency grounds and on July 1, 1953, there were 6,301 in this category.

Registrants who filed evidence of fatherhood before the August 25 deadline must maintain a bona fide family relationship with their children in their homes to be eligible for continued deferment. Failure to maintain this family relationship removes the cause for continued deferment.

Although men who became fa-

thers before the Aug. 25 date will continue to be deferred, this does not constitute a permanent classification. Colonel McFarland pointed out that these men have had their age of liability extended from age 26 to 35 and they could, by a change in regulations, be made available for induction in event that conditions require the services of these registrants to maintain the strength of our Armed Forces.

SUSPENSION PEDALS make braking and clutching easier . . . allow more clear floor space . . . eliminate dusty, drafty floor holes. This feature, exclusive to Ford in its field, permits dash-mounting of brake master cylinder for easy accessibility.

FOAM-RUBBER CUSHIONS over non-sag springs in Ford's sofa-wide seats make even long trips a treat. And you'll find that only Ford in the low-price field offers this fine-car feature as standard equipment on both front and rear seats in all models.

FORDOMATIC DRIVE—an optional extra—is really two automatic drives in one. It has a fluid torque converter for smooth, steady power flow. It has automatic gears for greatest "get-up-and-go." Ford also offers you Overdrive and Conventional Drive.

MASTER-GUIDE POWER STEERING—an optional extra on V-8 models—gives you the natural "feel" of steering on the straight-away yet takes the work out of turning. Absorbs road shocks before they reach the steering wheel—adds to safety.
