## Capitan Tigerettes State Champions

The Capitan Tigerettes finished the 1978 volleyball season in a big way by winning the Class A State Championship in Silver City Nov. 17-18. The Tigerettes started the tournament off with a win over Navajo Mission - 15-13 15-6 - the greatest play of

the tournament came in the first game when Lisa Lamb saved a ball from far out of bounds with Navajo Mission ahead 13-11 - Debbie Castillo and Donna Cooper assisted on the play. The Semi-Finals saw the Tigerettes facing the Floyd Broncos.

The Broncos won the first game 15-2 and were ahead in the second game 6-0 before the Tigerettes came to life, scoring 15 straight points to win 15-6, the third game of the match was close all the way with the score being tied several times, but with the score tied 13-

13 the Tigerettes broke the Broncos serve and Sally Abercrombie served the 14th point. The Broncos again broke the Tigerettes serve. The Tigerettes arose to the occasion with Cathy Story spiking an ace. Lisa Lamb served the game and the Tigerettes

were in the State Finals 2-15 15-6 15-13. The final match was played against the Maxwell Bears, with the Tigerettes winning 15-5 15-11 the girls playing volleyball for the Tigerettes at state were, Donna Cooper, Lisa Lamb both seniors, Juniors - Sally Abercrombie, Debbie Castillo, Cindy Cline, Jackie Deweber, Becky Jones, Beth Long - Sophomores Sandy Cranwell, Regina Lobb, Cathy Story and Debbie Womack. The Tigerettes finished the volleyball season with a 20 win 5 loss record.

power El Paso Bel Air losing 14-16, 12-15. The Tigerettes played El Paso Ysleta for 3rd place in the tournament losing 4-15, 13-15.

The Tigerettes played the Dexter Demons one of the most exciting matches of the year in Dexter finally bowing to the 1978 AA runnerups 13-15 in the third game of the match. Capitan finished the regular season with a win over AAA Tularosa 15-17, 15-5, 15-4. The Tigerettes because of the experience gained from their regular season schedule were able to play through District, District Tournament, Regional Tournament and the first round at state winning all matches in two games. Floyd was the only class A team except for Mountainair to force a three game match. The Capitan Tigerettes volleyball team would like to thank all the parents who supported them all season and took time off to travel to the State Tournament in Silver City, the team would also like to thank the students and adults who greeted the team on Sunday afternoon in Capitan. From the Tigerettes - Thank You Capitan, New Mexico.

**We're No. 1 In The State!!!**

WE'RE NO. 1 IN THE STATE - Capitan Volleyball Coach Bill McVeigh is hoisted on the shoulders of Capitan

Volleyballers as they win the State title in Silver City.

### Pilgrims Pass Through

PILGRIMS COME THROUGH ZOZO - A Wagon Train passed through Carrizozo going south on US54. "Vision

Quest" sponsoring the train trip for these Pilgrims. (Story on Page 2)

## Desalting Pilot Plant in Operation at Carrizozo

On Thursday, November 2, 1978, a milestone in the history of the Tularosa Basin has been set by the activation of a mobile desalting pilot plant to perform the preliminary salinity control test work prior to the installation of the 250,000 Gallons per day Ionics, Inc. Desalting Plant, planned to be operated at Carrizozo in 1979. These tests are

performed by the New Mexico Research Institute (NMRI). The purpose of the use of the pilot plant under various salinity conditions, and on various locations important for salinity control in the Tularosa Basin. Since these tests produce considerable quantities of desalted water of high quality, such water can become available to acquaint the local population with the advantages of use of desalted water for domestic purposes. An Ionics, Inc. Aquamite I Electrolysis Desalting Plant has been successfully checked out by the New Mexico Research Institute at the Southern Pacific Transportation Company's Carrizozo Railyard. This plant has a processing capacity of up to 1000 Gallons per day (Gpd), depending on the degree of desalting desired. Target salinity of these tests is a

reduction of salinity of the three NMRI wells from salinities of more than 2000 parts per million (ppm) total dissolved solids (Tds) to 200 ppm Tds, with the average salinity of two combined wells after several weeks of operation gradually reducing to 1700 ppm. The lower salinity well of the two can be used during the beginning of the demonstration to simulate the combined desalting process of the two wells, if the proper point of starting salinity is used in the start-up of the desalting plant.

In fact, the tests completed on Friday, November 3, 1978 led to a product water (desalted water) salinity of only 1897 ppm Tds, about 6.5 percent below the target salinity of 200 ppm. The daily production of product water under these circumstances of the 100 Gpd processing capacity of the pilot was 592.8 Gpd, and the balance of the water processing capacity was 407.8 Gpd waste water. Correcting the deviation from the salinity goal of the desalting plant from 187 ppm to 200 ppm, would increase the daily product water capacity to approximately 639 Gpd and the waste water output to 361 Gpd. The product water quantity of the pilot plant can be further increased by reducing the degree of desalting to 500 ppm Tds, the upper limit of good drinking water. In this case, the amount of product water would increase to 798.

1 Gpd, and the waste water reduce to 207.9 Gpd. The ratio of product to waste water would increase from 1.71 to 1.0 to 3.8389 to 1.0. This result does not con-

sider the fact that with increasing salinity the electric conductivity of the feed water increased, or inverse. If the target salinity is lowered, the electric

conductivity of the product water decreases and requires more electric current to remove the same amount of  
Continued on Page 2

### Mrs. Pherigo To Be Honored

The Carrizozo Municipal School staff will honor Mrs. Pauline Pherigo with a Retirement Reception on Monday, November 27 at 7:00 in the evening in the school cafeteria. Friends and former students of Mrs. Pherigo's are cordially invited to attend.

### Mrs. Mary Spencer Meets New March of Dimes Child

MARCH OF DIMES National Poster Child Melanie Brockington, 8, of Lancaster, Texas, met Mary Spencer, a

March of Dimes volunteer. The regional meeting was held at the Denver Marriott on November 12-14. The goal of the March of Dimes since the cure of polio is the prevention of birth defects. A major emphasis of the March of Dimes is on improving maternal and newborn health care services.

Mary said, "As volunteers, we want to complement the services of physicians, nurses and other health professionals in improving the outcome of pregnancy. When you are fighting a health problem as serious as birth defects it is hard to see what one person can do alone. But March of Dimes volunteers are working with other community organizations to help guarantee a healthy birth for every baby."

Our Mothers March will be in Jaury and leaders for that community endeavor will be announced soon. Any person interested in helping with our March, please, call 648-2875.

### Health Clinic Makes Move

The Carrizozo Health Clinic has this week moved into their new building, which is situated in the old A.N. Spencer office.

The new clinic will officially be ready for business as of November 27th. With Doctor Nelson, Nurse Hanstean and (Dentist) Dr. Goad open for business.

Office hours and schedules will stay the same as before, also, phone number will not change.

Dedication and Open House ceremonies are scheduled for December 6, 1978, at 2:00 p.m. The center will be open to the public until 5:00 p.m.

### Fire Cancels

#### Classes at Capitan

School was cancelled yesterday for the children of Capitan due to a fire in the old gym. The fire was discovered by Mr. Abbot about 8:15 a.m. Wednesday morning and was extinguished by 9:00 a.m.

The cause of the fire is of yet unknown, but officials of the school feel that wiring may be the cause.

Classes will resume Monday as scheduled. The gym will be able to be repaired.

FHA-HERO Thanksgiving Dinner was greatly appreciated by Zia Senior Citizens at the Recreation Center. Pictured are some citizens with servers

from FHA-HERO. (Left to Right) Monica Herrera, Adela Sedillo, Francisca Villescas, Margaret Lueras,

Petra Lopez, Yolanda Samora, Charlotte Gallegos, Louise Montano, and Sara Herrera.

## FHA-HERO Sponsors Dinner

FHA - HERO - Sponsored a Thanksgiving dinner for ZIA Senior Citizens the girls decorated, cooked, and served the meal for the Seniors. They also ate & visited with the Senior Citizens. FHA - HERO state project is

bridging the generations, the girls will be working with the ZIA Senior Citizens staff to get to know & understand senior citizens.

The Womens Club graciously

donated the turkey & a floral centerpiece for the dinner.

The ZIA Senior Citizens would like to thank FHA - HERO, Woman's Club & all of the volunteers who helped.

# Desalting Pilot Plant at Carrizozo

Continued from Page 1

salt. With a higher target salinity therefore less current is needed to remove the same amount of salt.

However, if one plans to mix desalted water with non-desalted water of low salinity, as e.g. Bonito water, the quantity of water available for domestic uses can be increased substantially, if one uses 200 ppm Tds water. This is the reason, that the 250,000 Gpd desalting plant proposed for Carrizozo will be desalted to 200 ppm Tds and during periods of high water demand can be mixed with 250,000 Gal. 800 ppm water to 500 ppm, or about 750,000 Gals 450 ppm water can be mixed with 250,000 Gals 200 ppm water to obtain 1,000,000 Gpd 500 ppm water. Under these circumstances, the planned desalting plant can turn out very efficient to stretch water supply in cases of emergency, or to satisfy transient demands outside the hot seasons.

Since desalting plants become more efficient as these grow in size, smaller plants become more expensive with decrease in size, particularly since the necessary controls cost an ever increasing share of the overall cost of the plant. This is the reason, that the pilot plant is only a single stage plant, and therefore the waste water share of this plant is a substantial percentage of the total plant capacity. The plant for the final desalting facility in turn has four stages, and the waste water share is somewhere between 10 and 15 percent of the feed water or even lower, if lower salinity feed water than 2000 ppm Tds is used.

Due to continuous intrusion of brine into the Carrizozo well site, during periods of low pumping or during periods of excessive pumping, but for other reasons, substantial amounts of high salinity water are stored in the aquifers, underlying the

well site. When one now starts to pump, the initially apparent low salinity begins to increase to higher levels of salinity, often more than 1000 to several thousand ppm higher than initially observed. After the store saline water which is diluted brine coming from great depth is beginning to be depleted, and near equilibrium between brine recharge and low salinity transient water is reached, the salinity of the feed water drops again and reaches an equilibrium salinity much lower than the salinity at the begin of the pumping. As still remaining brine residues are being reduced, the feed water salinity continues to slowly drop. If the well field water pumps are not turned off and continue to remove salt, the quality of the unpolluted water will become stationary somewhere between 12-1300 ppm. At that time one will notice, that the salinity of downstream wells also has reduced since no longer the supply of polluting brine reaches the downstream aquifers.

This process in the case of continued pumping will achieve that most of the polluting brine is intercepted and no longer available to pollute downstream waters, an objective of the salinity control project, which is the parent project of the Carrizozo Desalting Plant. While NMRI has been showing that salinity control can effectively reduce highest observed salinities by 60 to 70 percent, increase of the wells in the Southern Transportation Company Railyard will most probably remove all vestiges of brine intrusion as greater quantities of water are pumped, and the observed salinity will continue to drop towards the lower numbers indicated above. With this event, the desalting plant will become able to process greater quantities of water than before, and the cost of desalting will gradually decrease except for reasons of inflation and increasing energy cost. Downstream water will become more suitable for farming, will require less water for irrigation, and increase yields per acre with the decrease of salinity. This change particularly will be noticed in the City part west of the Railroad tracks, which has been subject to increasing salinity for several years.

With every desalting plant, as you

noticed further up, the removed salt will leave the plant by way of the waste stream. The waste stream contains not only the 1700 ppm Tds this water carried into the desalting plant, but also the 1500 ppm the process removed from the product water. If waste stream and product water have equal flow rate, a waste water salinity of 3,200 ppm Tds will result, lower than quite a number of wells show near the railyard. If the plant carries more product water than waste water, the waste water salinity will be higher than 3200 ppm in case of a single stage plant, and two times as high if a two-stage plant is used. The Aquamite XX plant for Carrizozo will have 4 stages and carries only approximately 1/4 of the waste water percentage a single stage plant would have. Here the waste water will be concentrated to a waste water salinity of from 12,000 to 30,000 ppm Tds, depending on the concentrator system selected. It then will be discharged into a drying pond, in which most of the brine will precipitate and store for later processing. At this stage it will be decided, whether distilled water will be manufactured for industrial and automotive uses. At current cost of conventional distilled water, reclaimed waste water, properly processed, will pay its way, and will become a commercial product in Carrizozo. There are several options as to the final details of the waste disposal, and those will be adopted which promise the best longterm advantages. Since some of the commercially attractive waste ingredients become economically feasible only at higher capacity desalting plants, waste may have to be stored until this time arrives. Except for early operating phases, no salt will be returned into the aquifers, whenever available. Only in this manner progressive encroachment of salt can be avoided and eventually reversed.

Since the pilot plant produces substantial quantities of high value desalted water, this will become available wherever the pilot plant is operating. It is planned to make this water at cost available to those citizens, who are interested to try out the uses of this water as drinking water, for domestic uses, for cleaning and laundry purposes. For the time being the quantities per household will be limited to 10 Gallons per family or household. Notices announcing availability of the water will be made thru the news media in time. Any revenue from the operation of the pilot plant will be used to drill an additional well to accelerate conduct of the salinity control work, and select those wells which are needed for production of desalted water in the right range of initial salinities. This will call for changing between wells of different salinity as the salinity control progresses.

The plant will be taken in operation in the standard commercial configuration. However, there are under investigation a number of modifications, which adopted, will increase economy of the plant and will save electric energy, the cost item ad-

vancing fastest as time goes on. There needs will not permit installing such modifications, and other periods in which this may well be accomplished.

The operating plan calls for three phases of construction and activation of the Plant:

Phase A will be a program definition phase, during which the plant will be ordered (long lead time items), the options selected which do permit to complete activation of the plant on time, actions, which permit the most rapid activation of the salinity control phase, selection of the drying pond site, finalization of the waste control and disposal arrangements. Orders for leadtime items will follow as soon as the long lead time items are taken care of. Site plans will be completed and right of way negotiations will be consummated. With any decision, the balance of the plant facilities will be reprogrammed as long as this flexibility exists. Concurrent with Phase A.

Phase B will be inaugurated. It objectives are mainly the detailing of the plant facilities in agreement with the Ionics detailed equipment plans and its operational peculiarities, power supply, plans for pipelines, storage tank locations and tie-in into the City water plant. Since delivery terms depend on backlog of contracts of Ionics and the seasons involved, this period will determine when the plant can be started an taken into operation. Current plans call for dedication of the plant at half capacity prior to six months after awarding the purchase contract to Ionics Inc. Full delivery will start three months after plant activation. There will be a three to four months period, in which the salinity control system will be tuned and optimized such that the plant will discharge a fixed amount of salt per day, very probably from 1.5 to 1.6 tons of salt per day at a full production desalted water flow rate. During that period the variation of salinity of each well, if any other well is operating, will be monitored and during the process converted to remote operating status as soon as the circumstances permit. After initial monitoring all those functions which can be automated, will be automated. The plant will not need a man day per day for maintenance. However, three plant operators will be trained so that at any time personnel can be called in to assure full operation capacity at all times.

Scheduled maintenance plans will than be worked out to prevent that parts of the plant are operated longer without maintenance than the maintenance schedule is calling for. Several other plants, which showed initially excellent maintenance records, deferred necessary maintenance too long and later came into difficulties on account of decaying maintenance conditions. Proper attention to this aspect of the plant operation is vital, and will pay off in later years. The contract will have included clauses which warranty the average maintenance cost over five years. Such an arrangement has proven important and valuable at all the successful plants. Some cities, operating such plants, tried to save by not using their plants full time, only to find that

the plant can only operate at its greatest efficiency under near full load, since capital service needs to have the full capacity of the plant on line at all times. Pumps, not operating, will serve as observation wells to continuously monitor the entire well field and salinity control status.

Phase C is the second year operating period, during which the plant will run at full capacity even if not all pumps are running. A load distribution system will see to it that the required capacity is available and that the scheduled amount of salt is removed at all times. In this Phase, at all times, the full capacity of the plant will be on line, while all parts of the salinity control system, and waste water system will operate, and a longterm water management plan will be developed for the City of Carrizozo. At the end of this period NMRI will turn over the desalting facility to the City of Carrizozo, unless continuation of the demonstration period is desired.

Concerning cost of the water from the desalting plant one has to consider that there are plant operating costs caused by desalination, the cost of the waste water disposal, the cost of pumping of the feed water for the desalting plant, and its tie-in into the City Water Plant. The water to be desalted does not need a pretreatment, which cost will be saved, but will go through the filtration plant. Output of the plant will be supervised by the State Environmental Improvement Division. The cost of the Desalting, all aspects above considered, will be less than 75 cents per 1000 Gals. Using desalted water will save hidden cost of water, not reflected in the monthly water bill but paid for by the owner and operator of the household, in the form of needed soap, detergents, replacement of scaled or corroded water pipes, premature failing of water heater, and cost for

softening of water. Most of all of these costs will become substantially less or disappear. These generally, on an averaged basis amount to three to four times the monthly water bill for domestic water or 1000 or more ppm Tds.

The Carrizozo project has been greatly advanced by the perfect and bipartisan support, which it received from our regional legislators. The original bill, signed into Law, was presented to the N.M. House by State Rep. Maurice Hobson, and was unanimously passed by the House, and presented jointly by Senators Dunn and Convey to the State Senate, and also passed with full support. Persons who endorsed prior documentation were the Lincoln County Commission, the Otero County Commission, the City of Carrizozo and the Village of Tularosa. The person who most diligently coordinated all requests for support in favor of Carrizozo was Attorney Bill Payne. Substantial support particularly in kind was provided by former County Commissioner Bud (J.O.) Payne, and Johnson Stearns in his position as former Mayor of Carrizozo, and subsequent times, and former Mayor Bobby D. Crenshaw. At Tularosa, Mayor Walter Guilez provided supporting documentation, particularly in support of submission documentation for the Four Corners Regional Commission, which supported the Project by two preceding Grants and its encouragement to apply for a full-scale demonstration of the salinity control and desalting project. Currently, the contracting of the large desalting plant is awaiting a 60 percent total project cost Federal Appropriation to match \$200,000 existing State appropriations. An agreement between the City of Carrizozo and the New Mexico Research Institute has been consummated on August 30, 1978.

## Vision Quest Wagon Train to Assist in Youth Problem

In preceding months, delinquent youth from New Mexico in need of intensive treatment, have been referred to VisionQuest in Tucson, Arizona as an alternative to reform school. However, a specially designed Wagon Train expedition departed August 4th from Elfrida, Arizona which will return these youth home to a new VisionQuest facility based in Silver City, New Mexico, providing an additional dimension of treatment alternatives for the citizens of New Mexico. The New Mexico Human Services Department recently approved the initiation of this program as well as that of a Home-Steet program to be developed in Albuquerque for children not so severely disturbed as to require residential care, but who would benefit from treatment on an out-patient basis. Youth involved in the wagon train experience will undergo physical

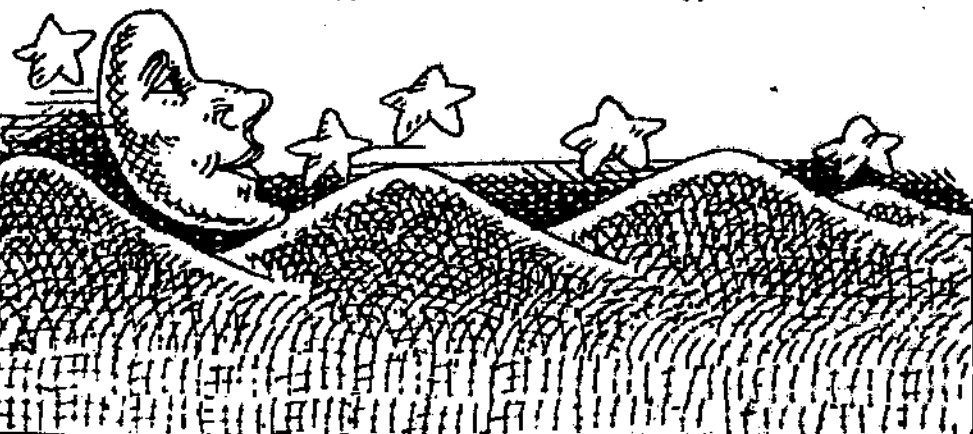

hardships and controlled "dangers" structured into the expedition for treatment purposes, as a "rite of passage" into adulthood and an opportunity for each delinquent child to earn his or her way back into the community. The rite of passage or "Vision Quest" is a concept adapted from the Native Americans who sent their youth into the wilderness to gain insight into their individual weaknesses and strengths and choose a purposeful direction as an adult, a "vision" earned through the loneliness and difficulty of the wilderness experience. As validated by the similar return home of Colorado's VisionQuest youth by wagon train last Fall during the program's expansion to that state, this event will have a tremendous therapeutic impact on youth, many of whom will later reflect on these months as the turning point in their lives.

**My Sincere Thanks**  
 To All That Supported ME  
 In The November Election.  
**Jim McEuen**

# Are you paying too much for your long distance calls?

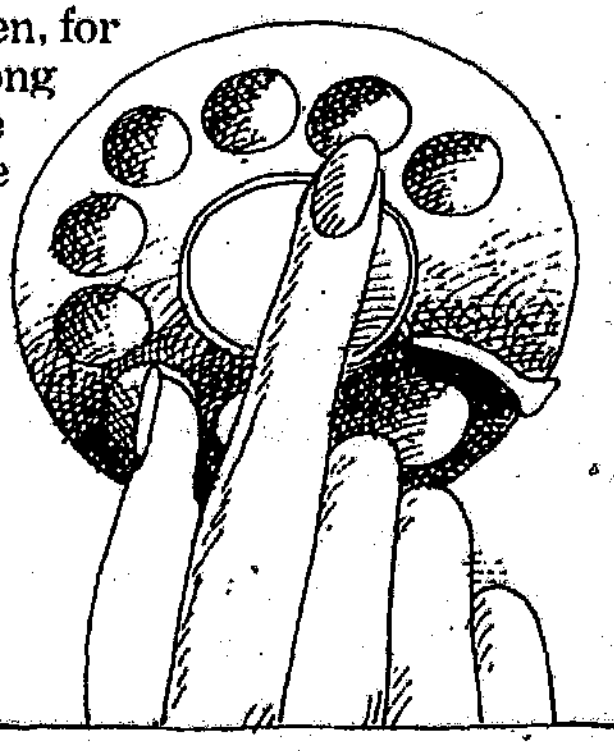

You may be if you haven't been paying much attention to when and how you place your calls. But here are three ways you can keep in touch with old friends and still keep your long distance charges to a minimum.  
**Dial direct.** Whenever an operator places your call, it costs more than if you dialed it yourself. So check the directory for the area code you need, dial the number yourself, and watch your long distance costs go down.

**Call during off-peak hours.** Perhaps you already know that long distance rates go down on weekdays after 5 p.m. But did you know that after that time you can dial direct to anywhere within the continental U.S. for 35% less than the normal day rate? You save

even more, a full 60%, if you call during the week between 11 p.m. and 8 a.m., or on weekends until 5 p.m. on Sunday. Check your telephone directory for information about similar discounts for holiday calls that you make without the operator's assistance.  
**Take advantage of the 60-second bargain call.** Perhaps you haven't heard that you no longer pay a three-minute minimum rate on your long distance calls. So now it will cost you even less for those brief calls you make to confirm reservations or travel plans—or just to give short messages to friends and relatives.

Remember then, for the best value in long distance calls, take advantage of these special rates. And always dial direct.

# Polly's Potpourri

## Around Town & Surrounding Areas

Happy Thanksgiving and Happy Birthday to Gary Hightower, Golda Ward and Robert Norman Whitham, today November 23!

Adelina Silva celebrated her birthday on November 15. Helping her celebrate were relatives Genieva Lueras, Angelita Salazar and Dolores (Jerry) Ortega. They were guests at Adelina's home where they gathered for cake and ice cream.

Other birthday people: Mary Crenshaw, Larue Wetzel Nov 24; Tad Lynch, Elva Wilson Nov 25; Eunice McBrayer Nov 26; Peggy Barnes Nov 27; Lena Chavez, Sally Ann Lynch, Pete Morales, Gabriel Chavez Nov 28.

Recent visitors in the home of Mr. and Mrs. Joe Ortiz were Mr. and Mrs. Ernest Sanchez. Ernest is the newly elected Lincoln County Sheriff. His wife Ora, is the former Oraliz Chavez, first cousin of Nena Ortiz, Polly Chavez and Rita Narvaez.

The Senior Extension Club met November 13 for their monthly meeting. Ethel Roberts and Earlena Tubbs were hostesses at the "Christmas Ideas" program presented by Mary Ellen Payne, Home Economist.

Mr. and Mrs. Paul Otero have a new grandson, Johnny Matthew, born Nov 3. He is the son of Mr. and Mrs. Johnny Otero of Albuquerque. The baby weighed 5 pounds and 5 ounces.

Bobby Vallejos son of Mr. and Mrs. Neo Vallejos was home this past weekend from school at Albuquerque. While here he got his deer.

Zachary, his brother Raphael and their Mom attended a class Nov. 17 at the Home Ec Building. Mrs. Lawson,

the teacher invited Polly to speak about breastfeeding and La Leche League. The students are in a class "Marriage and Family Living." They learned that women all over the world have advice and encouragement from La Leche League, a non-sectarian, non-profit organization. Everyone interested in breastfeeding is of interest to La Leche League. "La Leche," which is Spanish means simply "The Milk."

The Junior Extension Club met Nov 15 for their program on Christmas Ideas. Georgia Ortiz and Sharon Lueras were the hostesses. Next month their meeting will include a gift exchange and a talk on a foreign country by Ursula Hansteen.

Joel Derek Wells Ortiz is the latest grandson of Mr. and Mrs. Ray Wells and Mr. and Mrs. Paul Ortiz. Joel who weighed 7 pounds and 4 ounces is the son of Carl and Donna Wells and brother of April Dawn.

Ramona Ortiz returned home after a 3 week stay in Albuquerque Paul Ortiz and Mr. and Mrs. Ray Wells have been to Albuquerque to meet Joel.

Sacred Heart Catholic Church in Capitan is having a White Elephant sale with the proceeds to be used for the Youth of Capitan and for a scholarship fund, as well as emergency funds for needy people in Capitan. Items can be turned in at the Art Shop in Capitan.

A good crowd attended the Carrizozo Invitational Boxing last Saturday. Teams came from Socorro, Magdalena, Santa Fe, Grants, Las Cruces, as well as 2 teams from Albuquerque and 3 from Roswell including N.M.M.A. Zachary's brothers,

Michael and Gabriel were on the program of 26 bouts that evening.

Judges that evening were Danny Narvaez, Willie Vega, and Tommy Guevara. Don Means substituted for Dr. Craig Nelson, at ring side.

If there is one attitude that should be most native to a Christian, it is that of a thankful heart. Happy Thanksgiving to Lincoln County News readers from Polly's Potpourri and Zachary and all the rest of the gang.

# Inside the Capitol

By FRED McCAFFREY

SANTA FE—One thing seems clear after this year's elections: We need a new system for voting and counting ballots.

Within hours after the close of balloting on November 7, there were active rumors that there had been hanky-panky in populous Bernalillo county. Some people were coming right out and saying that some citizen unnamed (usually called an out-of-stater by the rumor mongers) had been given access to the warehouse where that county's voting machines are stored. Obviously there are, in a country like ours, any number of people who know how to bollix up voting machines, and suggestion was that this had been deliberately done.

Whether that's the case or not, there were enough strange happenings

to make anyone nervous. Included in these was the 'discovery' by the Bernalillo county clerk of more than 500 absentee ballots which had been mysteriously 'forgotten' in a closet. Then when they got to totting the numbers up, that same county found it had credited the Governor-elect with 1,100 too many votes—a sizeable difference in an election that was won by a gnat's eyelash.

We should recommend to the Legislature's interim Election Committee, established by the last session, that they look at systems now in use in other states which connect voting machines directly to computers, so that your vote is entered at a central headquarters as soon as you cast it. That means it goes directly into the record and doesn't have to be handled by half a dozen people, any one of whom can be less than honest.

Those of us who are old enough remember how paper ballots used to be voided by such systems as keeping a small pencil lead under a fingernail and making an extra X somewhere on the ballot which didn't express a vote you happened to care for.

Machines were supposed to make that kind of thing almost impossible, but they obviously haven't done that. At least this time, if someone did tamper with the machines in some locations,

they didn't do the ultimate dirty trick. That's just to adjust the machines so that any votes cast on it for a certain party or certain candidate do not register at all.

Those of us who report on elections have another gripe. In the old days, the news media used to set up a system of observers at key precincts to call in the results. That way you could tell, from early election night, how things were going in specific areas, chosen because they best represented the trend in the state, when taken all together.

Nowadays, the big TV networks have gotten into the act. What we have is a single national service, to which the wire services like Associated Press and United Press International subscribe. All you get from them is totals—just numbers of who voted for whom, with no indication of any kind as to where the votes are being reported from. So all night long, the radio and television stations just give you numbers, lots of numbers, with no possibility of discerning what any of the numbers mean.

Whether you're on the air reading them off or sitting home listening, that's very frustrating.

We'd like to see a return to the old-time system. It's more trouble and more expense, but it gives the audience a lot more meaningful information.

### THE CARTER ADMINISTRATION'S INFLATION POLICY: NO SOLUTION

The Carter Administration's new inflation policy is clearly inadequate. Unfortunately, it addresses the symptoms, rather than the causes of the most critical economic problems facing our nation.

The issues which must be addressed in a positive economic policy are government-created inflation, declining productivity, over-taxation, unemployment and over-regulation. Although these problems reinforce each other, there are common sense solutions and combinations of solutions to each problem.

The Federal Government's 5-year fiscal policy should be designed to reduce the net Federal deficit by at least \$15 billion per year, permanently reduce taxes on the productive portions of our economy by about \$15 billion per year, permanently reduce capital gains taxes to 25 percent, and reduce the rate of growth of the Federal budget until it falls below the rate of the growth of the GNP and the budget itself is below 20 percent of the GNP.

Tax policy should be designed to establish annual permanent decreases in personal and business taxes. Tax policy also should encourage saving and investment as the means of creating new goods, services and jobs as well as providing security for the individual investor. These policies in turn would encourage small business hiring and development, create increased long-term demand, and create investment in increased industrial production and employment.

Appropriate regulations and taxes should be reduced to create the incentives for production and efficient use of our vast domestic resources of oil, natural gas, coal, uranium, geothermal and solar energy. Thus, the inflation in energy costs can be driven down by competition and increased low-cost domestic supply.

Federal regulatory procedures must be improved so that Congress can review regulatory programs for their inflationary impacts on the economy before those regulations become law. Unnecessary regulations must be eliminated. Such regulations have become the fastest growing contributor to inflation.

Until Federal deficits, budgets, regulatory costs, and taxes are reduced, until we begin to produce our own low cost energy, and until we accelerate research and development so that innovation can provide new productivity and new markets, inflation rates will continue to climb.

Americans are asking for a responsible economic policy. The Administration and the Congress must provide the common sense necessary for such a policy.

## A THANKSGIVING Message

We hope you and yours sample all the happy times and warm feelings that this Thanksgiving holiday brings. Enjoy it to the fullest!

# Capitan News

The News, November 23, 1978 — Page 4

by Margaret Rench

Since the last writing we have had near two inches of moisture. At this time Wednesday November 10 it is snowing a wet snow and is truly cold with it. We have had lots of fog. Though it is very muddy and much to many persons discomfort the moisture is great for us and our country. We must count our Blessings.

I do wish everyone everywhere the Happiest and most grateful Thanksgiving. May God continue to Bless you.

The Capitan girls won the Regional in Volleyball. They went to State. We are proud of them and their coach Bill McVeigh. He was selected Coach of The Year in this District. May success follow you all of the year.

Bill and Carol Keating became proud parents of daughter Jennifer De Ann born Sunday November 5, 1978 weighing 3 Lbs. 4 1/2 oz. in the hospital in Roswell.

Vickie and Bill Bryson and son of Texahoma, Texas were guests of Mr. and Mrs. Hank Lacy and Sandra for several days last week.

Mr. and Mrs. Jake Burkett of Portales spent Tuesday thru Thursday with her brother Mr. and Mrs. Howard Wright.

Mr. and Mrs. Bob Herridon of El Paso, Texas visited her sister Mr. and Mrs. Jimmy Wright last Sunday.

Willie Hobbs who is employed at the Smokey Bear Museum is at this time on two weeks vacation.

Mr. and Mrs. Albert (Slim) accompanied by Mrs. Rench enjoyed last Saturday in Roswell. Started the day with breakfast at Sambo's. Which was delicious. Then a lovely day of business and shopping. We went via Ruidoso. It was raining hard to Picacho then heavy fog from Riverside the Fog was high. No sun that day but was nice. Raining as we were returning home. We should have a beautiful country when it becomes Spring. It was a great day.

Mr. and Mrs. Albert (Slim) accompanied by Mrs. Rench enjoyed last Saturday in Roswell. Started the day with breakfast at Sambo's. Which was delicious. Then a lovely day of business and shopping. We went via Ruidoso. It was raining hard to Picacho then heavy fog from Riverside the Fog was high. No sun that day but was nice. Raining as we were returning home. We should have a beautiful country when it becomes Spring. It was a great day.

Mr. and Mrs. Howard Wright made a business trip to Roswell Monday afternoon.

Dean Strickland of Lovington was a hunting guest of the Second hunt of Mr. and Mrs. Terry Strickland and family.

Each hunt this year has brought in many hunters and all seem in earnest. We have noticed that many were lucky.

Ruidoso. It was raining hard to Picacho then heavy fog from Riverside the Fog was high. No sun that day but was nice, raining as we were returning home. We should have a beautiful country when it becomes Spring. It was a great day.

Mr. and Mrs. Albert (Slim) accompanied by Mrs. Rench enjoyed last Saturday in Roswell. Started the day with breakfast at Sambo's. Which was delicious. Then a lovely day of business and shopping. We went via Ruidoso. It was raining hard to Picacho then heavy fog from Riverside the Fog was high. No sun that day but was nice. Raining as we were returning home. We should have a beautiful country when it becomes Spring. It was a great day.

Mr. and Mrs. Curtis Payne made a business trip to Roswell last Saturday.

At 10 A.M. in Chicago in a nursing home God called my dear little friend and neighbor of 43 years Maude Kingston home in a peaceful sleep. She had suffered pain, suffering and many strokes from March 30, 1978. To know her was to love her. God knows best. Her precious sweetness remains with us and will always. She now rests beside her husband Robert Dennis Kingston in the Angus cemetery. Funeral services were held Tuesday November 14, 1978 at 1 P.M. at the Angus Community Center with Rev. David J. Lynch officiating. A very beautiful service with Lisa Phillips singing "Goodness and Mercy" and "How Great Thou Art." with Hattie Phillips at the piano. Such beautiful music and singing. Long to be remembered, it did make us realize how happy and peaceful Maude is in her new home.

She was born in Goldthwaite, Texas May 28, 1900. Passed away November 10, 1978 in Elmhurst suburb of Chicago, Ill.

Pallbearers were Jim McEuen, Herbert Lee Traylor attended the funeral services of Pay Farrar in Roswell at 10 A.M. Tuesday November 14. Many will remember Pat in Capitan and Ruidoso. He had been in ill health for several years.

Cheryl King and Randy Strickland were married Saturday November 11, 1978 at 10 A.M. in a double ring ceremony. The wedding was held in the Sierra Blanca Suite at the Swiss Chalet in Alto. Officiating was Reverend

Kenneth Cole of Ruidoso First Christian Church.

The bride is the daughter of Mr. and Mrs. Glen King of Capitan, New Mexico and the groom is the son of Mrs. Jean Strickland of Abilene, Texas.

Given in marriage by her father, the bride wore a floor length candlelight gown with long full sleeves gathered at the wrist. The empire bodice was shirred at the waist which was accented with pearl buttons. Her quiana candlelight veil embellished with lace formed a train and was covered with seed pearls. She carried a colonial bouquet of yellow roses, white daisies and baby's breath accented with evergreen and trimmed with yellow ribbon.

"Something old" was her great great grandmother's necklace which was carried over the Santa Fe Trail.

"Something New" were her pearl earrings. "Something borrowed" was her sister's veil and "Something blue" was her garter.

The maid of honor was Carole King, sister of the bride, and the bridesmaid was Melinda Apodaca, friend of the bride. They both wore floral gowns and had flowers of yellow roses and white daisies. Glen King father of the bride served as best man.

Crista, age 9 months, lit the candles assisted by her grandmother. She wore a yellow dress trimmed in lace.

The bride's mother wore a floor length-long sleeved beige gown with a white and gold knit top. She wore a corsage of American beauty roses.

Marsha Adams sang and played her guitar. The songs were "Follow Me" and John Denver's Wedding Song.

Melinda Apodaca attended the guest book. Chuck, Patty and Ryon Woodell served the punch from a beautiful waterfall punch bowl at the reception which immediately followed the ceremony.

The couple went to Granada Royale in El Paso for the honeymoon. They will be residing in Ruidoso where the bride is employed at the Swiss Chalet Inn and the groom employed in construction.

## N. M. Wildlife News

SANTA FE, N.M. — When the weather's bad—that's best.

It's best, that is, for the serious and properly equipped deer hunters who "toughed it out" and have been bagging deer in good numbers throughout the state. For those who chose to stay in camp and play cards, the trip has been enjoyable, perhaps, but the hunting hasn't been nearly as successful, reports the Game and Fish Department. One hunt period, Nov. 15-21, remains in the general big game season.

"Cold, snowy weather is the best there is for deer hunting—or elk hunting, for that matter," said Game Management Division Chief Walt Snyder, "and the hunters who take advantage of it are doing well statewide, according to our field reports. The trick is to get out and hunt hard, back away from roads and well used trails."

Reports are that ruckey hunting has been good in the northeastern part of the state, especially on the eastern slopes of the Sangre de Cristos, on Mt. Taylor and in the Zuni Mountains in the Northwest Area in the Sacramento Mountains in the Southeast, and in the San Mateo and Gila Mountains in the Southwest, which had a very good turkey crop this year.

Bear are being taken occasionally in all regions, as well, but are taken incidentally by hunters whose primary quarry is deer.

Reports from elk and deer hunters afield with primitive weapons this fall indicated that hunters would be finding deer, including some good bucks, this season, and that this season, the deer harvest would probably be somewhat better this year than last.

Snyder said he still thinks that's true, "but the hunters are going to have to make it happen. The deer are there. They're there in pretty good numbers statewide, and especially in the southern mountain ranges, and in reasonably good numbers in the northern half."

Roads are most easily passable in the early morning, if they're frozen, and hunters can take advantage of that to get up into the hunt area and set up

camp, or to get up and hunt with plans to return to main roads or camp before roads thaw and become impassable.

"Vehicles equipped with chains can get around well on all but the worst of the roads," Snyder said, "and the hunter should use a pair of well-oiled boots to get him back into the deer country."

The combination of rough weather and the two first deer hunt periods have the deer pushed into deeper canyons away from the most closely hunted areas, according to field reports from officers and hunters.

He recommended that each deer hunter carry basic survival equipment including fire-starting material (wooden, strike-anywhere matches and hurricane candles); a Space Blanket or two large plastic bags; high-energy foods; water; extra clothing including woolen cap, gloves and socks; a scarf; a map; a police-type whistle for signalling; and the usual hunting equipment.

Vehicles should be equipped with mud and snow tires, tow and tire chains, axe, shovel, extra fuel and food, water, bedding, jack, spare tire, tool kit and spare parts kit.

**FISHING REPORT**  
FOR MONDAY, NOVEMBER 13, 1978

**SOUTHWEST AREA**  
Burns, Quemado, and Snow Lakes—Fishing is good using prepared baits and lures.

Wall Lake—Fishing is fair on all baits. Water is very muddy.

Willow Creek—Fishing is fair on all baits.

**NORTHEAST AREA**  
Murphy Lake—Fishing is good using cheese, fireballs, and marshmallows.

**SOUTHEAST AREA**  
Bonito Lake—Fishing is fair.  
Bonito River above Lake—Fishing is fair, best on worms.

Ruidoso River—Fishing is fair.  
Alto Lake—Fishing is fair using prepared bait.

Carlsbad Waters—Fishing has been good, using prepared baits, recently stocked.

Lake Van—Fishing is good on prepared bait for trout.

**NORTHWEST AREA**  
Abiquiu—Rainbow trout fishing is good on fireballs, corn and worms.

Navajo—Salmon snagging is fair to good, varying daily. Trolling for salmon is fair on the main body of the lake. Trolling for trout is fair up the Pine arm of the lake.

San Juan Quality—Fishing is fair on nymphs.

San Juan Regular—Fishing is fair to good on cheese and salmon eggs.

# A Bowl of Activities

From Nogal

## Robie's Box! Do you Know?

That Larry Caywood- besides spending many hours for Capitan, has time to pull old ladies out of the mud!

That there is a group meeting every other Wednesday that you might like to find out about!

The women club members ate with the Rotarians this last week and a new book was introduced by the Author.

## A Dash of Fact?

In Webster, Mass., is the lake with the world's longest name. It was so named by the Nipmuc Indians. "Lake Chaugogagoggmanchuggauggagogg haubunagungamau" means, "I fish on my side, you fish on your side and no one fishes in the middle."

The darkest hour has only 60 mins. Our faults irritate us most when we see them in others.

"Getting back to those interest rates, could you be a little more specific than it's going to cost a pretty penny?"

## HAPPY THANKSGIVING TO ALL OF NOGAL AND LINCOLN COUNTY!!!

Thanks giving is a time for neighbors, loved ones and friends, also for strangers to get to know one another and to give thanks for the beauty of the world.

Thanksgiving is the art of thanksgiving. It is gratitude in action. It is thanking God for the gift of life by living it triumphantly. It is thanking God for opportunities by accepting them as a challenge to achievement. It is thanking God for inspiration by trying to be an inspiration to others.

## Art Show Exhibit

ALBUQUERQUE—More than 260 artists and craftsmen from New Mexico and throughout the Southwest will display their latest work to the public in a pre-Christmas exhibition and sale.

Dirk Schneider's second "Festival of Artists and Craftsmen" is scheduled for three full days on December 7, 8 and 9. Like the first one in March this year, the holiday show will be held at the Civic Auditorium near St. Joseph's Hospital in downtown Albuquerque.

Among exhibitors expected to enter paintings and other art products are Doug and Pat Ballard, watercolorists; Richard and Susan Berquist, specialists in ceramic miniatures of saints; Pat Durgen, oil painter; Karen Bruggemann, oil painter of New Mexican still life, and Carl Farlinger, metal sculptor. Other wellknown exhibitors include Sharron Higgins, Kathy Gilmore, Pat O'Connell, Ann Olson, Betty Rice, Gladys Solomon, Irene Ricker, and Gary Wood.

About 150 artists and craftsmen exhibited at the first festival, which Schneider said drew crowds and sales exceeding expectations.

"As much as anything, I'm excited about the opportunity this gives many very good artists to have their product seen by large numbers of people," he said.

Many exhibitors will work at their specialty during the show, which will be open from 10 a.m. to 9 p.m. on Thursday, Friday and Saturday. Parking and admission are free.

## A Small Recipe for Giving

Take 5 percent (or for a richer mixture 10 percent) of your income, mix well with equal portions of Duty and Obligation, add a heaping cup of Serious Thought, blend with Conscience, and sprinkle with Prayer. Make in a heart warmed to the Degree of Love. When done, decorate with date, name, and amount and give to God often—(A parish bulletin)

## Is Your Smile Gone?

Try it for Thanksgiving. Solomon wrote in Proverbs 15:13 "A merry heart maketh a cheerful countenance." People are so involved in and pressured by the red tape of so many activities that we are physically worn out. Some schedules involve, constant timing in our personal lives, asside from constant threats of wars, nuclear attacks hurricanes, unemployment, increased taxes, and soaring prices. So, yes, it is hard to find smiles under all these pressures, but one smile calls for

another and another, they are contagious, lets get them started again.

## How about a new recipe?

Cranberry Tea Bread  
1½ cups sifter all-purpose flour  
1 teaspoon baking powder  
½ teaspoon salt  
1 Teasp. grated orange peel  
1 beaten egg  
¾ cup sugar  
½ teasp. baking soda  
3 tablessp. shortening  
¾ cup orange juice  
1 cup fresh cranberries, coarsely chopped

Sift together flour, sugar, baking powder, and salt. Cut in shortening. Combine orange peel, orange juice, and egg. Add to dry ingredients mixing just to moisten. Fold in berries. Turn into greased 8½ x 4½ x 2½ inch loaf pan. Bake at 350 for 50 to 55 min. Cool. Wrap store overnight.

Byetill next week Robie

## In Memory Of . . .

### Fannie L. Lacey

Mrs. Fannie Lalone Lacey, a native of Lincoln County, passed away on November 7, at the age of 101.

Fannie was born near Capitan on December 3, 1878. Her family moved to White Oaks when she was a small child.

She married P.E. (Dock) Lacey on December 14, 1898 and they lived in White Oaks, where their three oldest children were born and moved to Carrizozo in 1903.

In 1918 they moved to El Paso and later to California.

She is survived by her six children: Margaret Frederick, Florence Kearney, Birda Lacey, Lucille Waite, Frances Dawson and Herbert Lacey. Also fifteen grandchildren, 31 great grandchildren and 4 great great grandchildren.

Funeral services were held in Sierra Madre, California on November 11 and she was buried in the cemetery there beside her husband.

### Elmer S. Eaker

Elmer S. (Red) Eaker was born in Nogal, New Mexico July 8, 1901 and passed away in his home in Carrizozo Nov. 17, 1978.

He was a lifetime resident of Carrizozo and Nogal and was a retired Pharmacist and Railroad employee.

He was preceded in death by his father and mother, John and Anna Eaker. He is survived by his wife Catherine Eaker of the home, one son John Eaker of Albuquerque, two daughters Ann Stephens of El Paso and Alma Brooks of Alamogordo, two sisters Alma Evans of Oceanside, California, Carrie Bacote of Carlsbad, California, one brother Albert Roberts of Carrizozo, seven grandchildren and two great grandchildren.

He was a member of the First Baptist Church in Carrizozo and a member of The Masonic Lodge.

Services were held at 2 p.m. Monday, November 20 at the First

Baptist Church in Carrizozo with Rev. Robert W. Miller officiating.

Interment followed in Evergreen Cemetery.

Pallbearers were—Bob Curtiss, Sparkey Harkey, Jim Steinepreis, Don Means, Roy Harmon and Fred Lopez.

Honorary Pallbearers were J. E. Thornton, Roley Ward, Shorty Carl, Rick Coca and Duff May.

## Advent Season Observance

All people are invited to attend a special service of celebration and fellowship in observance of the Advent Season. The service, sponsored by two interdenominational prayer groups in Carrizozo, will be held in Trinity United Methodist Church at 7:00 p.m. on Tuesday, November 28th.

Father David Bergs, pastor of St. Rita Catholic Church in Carrizozo, will be the speaker. Special music will be provided by Scott Shafer and pastor David Lynch, with Jane Shafer at the organ and Beth Hightower at the piano.

A time for refreshments and visiting will follow the service. Babysitters for pre-school children will be provided.

## It Takes Money to Make Money

# Private Enterprises Want To Loan You Money

Borrow For Your Business Venture From Businesses That Understand Your Business

A new trend has been developed that makes investment money available on businesses like yours FROM lenders and investors that relate to businesses such as yours. Small and large companies alike are becoming reluctant to obtain expansion, investment and venture capital from lending institutions that will talk in their terms only.

Now, **WORLDWIDE FINANCE EXCHANGE** is providing a new concept in exposing you to new sources of capital that know and understand your business requirements. They talk money to you on YOUR terms!

### Four Basic Categories

More than 1,100 investment capital-heavy companies throughout the nation have been brought together by **WORLDWIDE FINANCE** that want to loan or invest money in four basic areas of business:

- BUSINESS EXPANSION CAPITAL**  
Excellent for revolving lines of credit  
Inventory financing  
Accounts receivable  
Factoring  
Equipment purchases  
Times sales contracts  
Rediscounting
- LEASING SOURCES**  
Office furniture  
Business equipment  
Computer hardware and software  
Construction equipment  
Transportation (airplanes, trucks, etc.)  
Farm equipment  
Electronic equipment  
Oil-field supplies-and equipment
- VENTURE CAPITAL**  
Long term & intermediate lending for general business expansion  
Manufacturing  
Construction  
Movies  
Oil & gas development  
Energy sources development  
Electronic development
- REAL ESTATE**  
Apartments  
Motels/hotels  
Shopping centers  
Housing developments  
Recreational facilities  
Business & office complexes  
Mobile home parks  
Agricultural  
Nursing homes  
Medical institutions

These four categories over a broad spectrum of business interests that represent loaning power into the billions of dollars. Loans from a few hundred dollars to long-term arrangements amounting to multi-million dollar agreements are available from interested individuals and companies who want to help you meet your growth and financial desires. In fact, in many transactions the bigger the loan requirement, the more attention you will demand.

### How You Find These Investors

**WORLDWIDE FINANCE** has been years in developing four portfolios of companies ready and willing to talk with you immediately about your financial requirements. These specialized portfolios contain names, companies, responsible persons, range of lending or investing power and most instances specific areas of business activities.

If your financial requirements are specifically suited to just one or more of the four general categories, send for that portfolio and allow it to open a new world of financial growth power for your business ventures. YOU choose the potential source of lending activities.

**WORLDWIDE FINANCE EXCHANGE**  
P. O. Box 2952 • 1248 East 49th Street North  
Tulsa, Oklahoma 74101 (918) 425-5547

### Finance Your Own Business

Individuals & Brokers —  
An Ultimate Source of Lending Power  
People Who Have Money Make Money

The **WORLDWIDE FINANCE EXCHANGE** portfolios have been years in growth and development, so you will be dealing with professional business executives just like yourself — people who want to get involved because they have the capital to do just that, and they understand that it takes money to make money.

The time and money you save with **WORLDWIDE FINANCE** portfolios will more than repay the small investment involved to obtain highly rated firms' (many are AAA rated). Further, your portfolios' cost is totally tax deductible as a business expense.

You can order your choice of one or any combination of the four portfolios at volume discount prices:

Any One Portfolio	\$25.00
Any Two Portfolios	40.00
Any Three Portfolios	52.00
Any Four Portfolios	60.00

Your bound portfolios will be forwarded to you by return mail.

 Vauna June Wheeler Powell, 603 Riley, Austin, Texas, 78746.

Sandra Lea Wheeler Bolinger, 1819 South Alamo, Pecos, Texas, 79772.  
 and to all unknown persons claiming any lien upon or right, title or interest in and to the estate of said decedent.

**GREETINGS:**

You and each of you are hereby notified that Geneva Lea Wheeler, surviving spouse of Lawrence D. Wheeler, deceased, has filed in the above entitled cause a Petition to Determine Heirship and ownership of certain real estate owned by Lawrence D. Wheeler, deceased, at the time of his death, on to-wit: January 18, 1971, there having been no administration of decedent's estate, but Petitioner having availed herself of the provisions pursuant to Section 31-12-22, N.M.S.A., 1953 Compilation; and the Court having designated Thursday, the 4th day of January, 1979, at the hour of 10:00 o'clock A.M., as the day and time, and the District Courtroom in the Lincoln County Courthouse, Carrizozo, New Mexico, as the place for a hearing to determine the heirship of said decedent, the interest of each respective claimant in and to the real estate involved, and the persons entitled to the distribution thereof.

A description of said real estate is: An undivided one-fourth (4th) interest in and to:

Lots 1, 2 and 3, Block 6, WINGFIELD HOMESTEAD SUB-DIVISION, Ruidoso, Lincoln County, New Mexico, as shown by the 1st Plat thereof on file in the office of the County Clerk and Ex-officio Recorder of Lincoln County, New Mexico.

The attorneys for the Petitioner are: PAYNE, MITCHELL & WILSON, Ltd., Drawer 39, Carrizozo, New Mexico, 88301.  
 WITNESS my hand and seal of this Court this 20th day of November, 1978.

(D.C.Seal) Margo E. Lindsay  
 District Court Clerk  
 By (s) Joey Leslie  
 Deputy.
