Reproductions of Masters To Be Shown in Exhibit

Reproductions of works of artists of many generations will be on display at the Carrizozo High School Auditorium on February 10, 1939, from 2:00 to 5:00 P. M.

This collection consists of Masterpieces representing the French, Italian, Flemish, English, Dutch, Spanish, German and American Schools of Art. Most of these are the Masterpieces studied by the schools. Famous portraits, landscapes, marines, and pastoral scenes in the colors of the original canvases are on display.

There will be a small admission charged to defray expenses. This exhibit will be sponsored by the Carrizozo Woman's Club.

Notice of School Election-- District No. 7

To Whom it May Concern:

Notice is hereby given that a school election will be held in District 7, Lincoln County, New Mexico, Tuesday, February 14, 1939, for the purpose of electing two (2) members to the Municipal Board of Education, to fill vacancies thereon.

Poling place, Community Hall, Carrizozo, N. M. Poles open from 9 A. M. to 6 P. M.

The following judges and clerks have been nominated to conduct the election.

William J. Langston, Judge. Mrs. Pat Dollan, Judge. R. E. Berry, Clerk. Mrs. Shirley Phipps, Clerk. Called this 24th day of January, 1939, at Carrizozo, New Mexico.

MUNICIPAL BOARD OF EDUCATION.

Mrs. C. A. Snow, President. Carl E. Freeman, Secretary.

Rock Observatory For Monjeau Peak

A rock observatory will be built in Monjeau Park, eight miles northwest of Ruidoso, at an elevation of 10,000 feet by the U. S. Forest Service. The Forest Service also will make picnic grounds near the observatory and widen and surface the road to the peak during the spring program of building.

Monjeau Peak is in one of the most scenic areas in the Lincoln National Forest. The new road will make it more accessible to the public.

Highway No. 54 To Convene Feb. 9

Dr. R. E. Blaney of Carrizozo, president of the highway 54 association, announced today the annual meeting of the association will be held in Carrizozo, Thursday, Feb. 9 at 10 a. m.

All the cities along the highway are urged to send representatives.

BINGHAM BREVITIES

The Pie Supper at Bingham High School last Saturday evening was a big success, twenty dollars being taken in for the typewriter and sewing machine fund. Mrs. Pearl Pearson headed the committee that sponsored the affair and Pat Withers proved to be an excellent Master of Ceremonies. A huge chocolate cake was donated by Mrs. Sullivan to be given as a prize for the most popular girl. Lou Gaines was the fortunate lady and passed around the cake after a lot of fun.

In addition to consuming a record amount of pie and coffee, the crowd enjoyed games and music and wound up with an old fashioned spelling match in which the married folks challenged the single crowd, and won. The school greatly appreciated the community spirit that brought so good a crowd out in spite of snow and stormy weather, and induced the liberal spending that will provide us with the kind of equipment needed for up-to-date work.

The sewing class has added a new cutting table to their equipment and house coats, dresses, aprons and beautifully designed pillow tops are on display wherever one turns.

Basketball practice has been going on when ever the weather permitted this week. Jay Heffner is captain of the boys' team, Betty Long is Girls' captain.

The first Assembly of the new semester, was held last week and an interesting program discussing current events preceded the election of officers. A roll call asking for quotations with the authors caught some of us unprepared, but every one was a good sport and made an attempt to contribute something of interest to the program. A group of songs in Spanish and English closed the program.

The primary room has served hot lunches several times this cold weather. Mrs. Pino has enjoyed having some of the mothers visit the school. The children are

New Mexico Highway 54 Association

New Mexico Highway 54 Association will hold a meeting here on Thursday, February 9th, at ten A. M. All who are interested in good roads or in the future of our town are invited to attend. Delegates are expected from all towns along this Highway. Luncheon will be served at the Southern Pacific Hotel at 12:30, any one here who wishes to attend the luncheon will please notify Mr. J. M. Carpenter or Dr. R. E. Blaney.

J. M. Carpenter, Secretary.

Dance with the Juniors tonight.

While branding cattle last Friday, Brack Cornett was seriously injured when a cow thrust her horn through his leg tearing the muscles and ligaments. He will be confined to his bed for another week or more.

greatly interested in the study of transportation and are attempting some little models illustrating it.

Mr. Coker's room has been going in for art work lately with some very attractive results.

Delbert McSmith visited his grand father at Water Canyon last week.

The Bingham community was visited Saturday by snow, sleet, rain, and sunshine with a very chilly wind as a sideline. We also enjoyed some nice sand storms Sunday and Monday.

Mrs. P. H. Wrye and son Wm. are here this week from San Angelo, Texas, seeing after their ranch.

Mr. and Mrs. Harold Dean are visiting their parents in Lovington. Gerald Dean and Jay Heffner are managing the store in their absence.

Geo. Golf, from Colorado is in the Bingham community this week.

BANKING LOOKS AHEAD

Headquarters For Facts

Thousands of business decisions are made daily, many of them involving the success or failure of important undertakings.

Some decisions are sound. Others are not. The difference usually hinges on the presence or absence of facts.

Clear-thinking business men turn to their banks for business and financial information. They know that banks are headquarters for facts—local, national and international.

You will find it very helpful to work closely with this bank when making your plans for the immediate or distant future.

Listen for "Song and Story" over KOB Sunday evenings 8:45 to 9:00 P. M. Sponsored by New Mexico Banker's Association. 4-7-39

Americanization Week Program

Feb. 6th to 12th inclusive.

At the suggestion of the National Educational Association, we are selecting the above week in which Americanism will be emphasized in all departments of the Carrizozo Public Schools. The heads of service organizations of our community have offered to cooperate in making the week's program a great success, for which we sincerely thank them.

Monday, Feb. 6th.—Carrizozo Alumni Association, Community Hall, 8 P. M. Program and Social Hour. Community invited. No admission charge.

Tuesday, Feb. 7th.—C. C. C. Officers conduct Assembly Program in High School Auditorium, 11:45 to 12. Community invited. No charge. 8:30, Patriotic Program in I.O.O.F. Hall for Third Degree Odd Fellows.

Wednesday, Feb. 8th.—6 P. M.—Father-Son Banquet, banquet rooms of Southern Pacific Hotel. \$1.50 ticket good for a father and son.

Thursday, Feb. 9th.—11:15 to 12:00, American Legion and Auxiliary conduct Assembly Period in High School Auditorium (Aims and Purposes of Organizations presented to students.) Public invited. 7:30 P. M. Coronado Pageant, High School Auditorium, presented by the Junior High School, assisted by Music Department of Senior High. (A small charge will be made to pay for the costumes.)

Friday, Feb. 10.—2 P. M. "Art Exhibit." Colonial Prints, under Carrizozo Woman's Club. High School Auditorium, 7:30 P. M., Basket Ball—Hondo H. S. vs. Carrizozo H. S.

Saturday, Feb. 11th.—8 P. M. "Old Time Dance," Community Hall, under direction of American Legion and Auxiliary. One-half of proceeds to go for fund for glasses for poor children.

Sunday, Feb. 12th.—Special American Services at churches.

"First in peace, first in war; and first in the hearts of his countrymen."—February 22.

Federal Music Project

Mrs. Helen Chandler Ryan, Director of State of N. M. Federal Music Project, visited Carrizozo Saturday and Sunday. Mrs. Ryan was very much pleased with the progress of the boys in the local camp.

Mr. Lou Fink, Federal music teacher here, is located at Camp DG-40-N. Plans are under way to organize a Community band. Mr. Fink was a former member of the famous Sousa Band, director of 137th Inf. Band, A. E. F.; and director of Colorado Springs Municipal Band.

Lieutenant Sherrel is now second in command at camp, having been transferred from Magdalena. He has a very fine personality and has already made many friends among the boys.

The forest service has purchased five acres at Capitan upon which a house, garage and a workshop will be constructed. The house will be built of adobe in Spanish style.

"Ye Old Time Dance" Saturday, Feb. 11th

On Saturday evening, Feb. 11 the American Legion Post and Auxiliary No. 11, will sponsor an "Ye Old Time Dance" to be held at the Community Hall, Carrizozo. Good music will prevail.

It is to be hoped by the committee in charge that the people of Carrizozo and surrounding community will turn out in large numbers for this dance, as it goes to help a worthy cause. One-half of the proceeds will be donated to the "better sight" fund to secure glasses for our local needy children.

Let's all go and help these kiddies to see better.

First Methodist Church

J. M. Glazier, Minister
Sunday, Feb. 5th
Sunday School, 10:00 A. M., Mr. Frank Adams, Superintendent.

Sermon Themes:
11:00 A. M. "From Scapagoat to Saviour"

7:00 P. M. "Passing the Buck,"

We are facing Easter with certain goals, or objectives before us. We have set as a goal, 100 in attendance at Sunday School. Our church attendance is increasing. The choir is giving us some good musical service, and has begun work on a cantata, as a contribution to the service on Easter. Come and feel at home with us.

Music and Dancing at Fair

New York, Jan. 31.—The extensive music program of the New York World's Fair 1939, is to include opera, symphony, choral and religious musical presentations, light opera, folk music, ballets and the dances of this country and other nations.

Lyric Theatre

Friday and Saturday
George O'Brien, Kay Sutton, Walter Miller, in

"Lawless Valley"

Paroled from prison after a sentence for stage coach robbery, "Larry" returns to engage in a fight with the corrupt influences of the country who were responsible for framing him and murdering his father.

ALSO :-
"Hock Shop Blues" and "Berth Quaker"

Sunday, Monday and Tuesday

Sabu, Raymond Massey, Valeria Horson, Roger Livesey, in

"DRUMS"

A production of splendor and scenic-brilliance, with thrills and action, "intrigue and cruelty, and a polite note of romance.

ALSO :-
"Donald's Lucky Day"

Wednesday and Thursday.
The Marx Brothers in

"Room Services"

A touching drama spun of fragile dreams and hopes and romance. Don't stop here if you want to see the biggest comedy they have made yet. The sensation of a generation!

ALSO :-
Mickey Mouse Cartoon and "Bird Dogs," a short subject all sportsmen should see.

Sunday matinee 2:30 p. m.
Night show at 7:30

When Eyes Turn Westward

Year	Immigrants	German Immigration Since January, 1933
1933	1,524	
1934	3,510	
1935	4,411	
1936	4,623	
1937	11,127	
1938	17,521	

Until this year, Germany's annual quota of immigrants to the United States was 25,957, boosted to 27,370 since Germany took over Austria. As above figures show, this quota was never used up, though in the 12-month period ending last July 1, German emigration to America showed a decided upswing. In recent months this has become even more marked, and today every westbound boat carries more refugees. The current fiscal year's quota is already near exhaustion. Most immigrants have been Jewish people.

Refugees get their first glance at the Statue of Liberty, wondering what the new land holds in store for them. Once in New York, they are bunched off to refugee headquarters.

America owes many of its most prominent residents to German persecution. Above: Albert Einstein, famous scientist, who has taken out citizenship papers here.

Edouard Benes, resigned president of Czechoslovakia, who is now a visiting professor at the University of Chicago. He was known as "Europe's smartest little statesman."

Max Reinhardt, long an important figure on the stage, who came to the United States two years ago, and is now directing a Broadway play. He is becoming a citizen.

Lottie Lehman, star of New York's Metropolitan opera, is herself "Aryan," but has two "non-Aryan" step-sons. Her German and Austrian property seized, she became an American.

An American citizen (left) greets his Polish, Jew brother and nephew as they arrive in New York in search of a haven. But thousands of others (right) still huddle in concentration camps.

Where can these persecuted men and women find a home?

Plain Face Is Challenge to Personality

By PATRICIA LINDSAY

"I CAN'T understand it," wailed a stupid mother to me. "Jenny is so plain and her two sisters are so beautiful! I only hope some man will see something in her and marry her. I'll have no trouble getting the other two married but Jenny is going to be a problem!"

Jenny heard her mother and she just laughed. "It's too bad I am so plain," she said, "and if no man will marry me when I grow up I'll be a nurse!" Jenny was 15 then. Five years later I saw Jenny again. Her mother had written that Jenny was to be married and her two pretty sisters (still not married!) were to attend her. I was amazed at this turn of events.

When I stepped off the train there was Jenny with frank lovely eyes smiling me a welcome. Her rather angular figure was becomingly attired in a simply cut sports frock and her long straight black hair had been cut and waved. Now short curls haloed her plain face giving it the most fascinating piquant expression.

From that first moment it was fun to be with Jenny, to listen to her wedding plans, to meet her young friends and to watch her easy, delightful poise. "The Ugly Duckling's certainly made good," I murmured, and was curious to know what she had done during those five intervening years.

It seems that at an early age Jenny realized that beaux and parties and indulgence of whims were not going to be hers easily, because she lacked the beauty her sisters had, so she struck out for a life of her own and went to college. There she concentrated on school affairs as ardently as on her studies and soon won an enviable place in the hearts of her classmates. Not expecting much from life without effort she matured into an unselfish, thoughtful person and through study, quite unconsciously developed her personality. It was at a school dance that Bill, her groom-to-be, met her.

State of Mind Important

No, the girl over 30 who has let herself down must pick herself up. Perhaps she has to begin with thinking. She must think she is needed, that she is good at her work, that there is a job for her some place. Then she must make herself just as lovely looking as she possibly can within her means.

Any girl can exercise herself back to health, put color in her cheeks and a sparkle in her eyes. She can pamper her hair by brushing, shampooing it at home, drying it in the sun. She can keep her clothes clean, neatly mended and, if her funds are very low, rely on an inexpensive collar and cuffs to freshen the one dress she wears job-hunting.

She must approach each prospective employer with a feeling of assurance, an eagerness for the job and make him feel she is capable, experienced and a person he needs to have around. It can be done—you older girls—but if you don't take yourselves in hand your future is not rosy. Just think of the thousands of girls over 30 who are holding down jobs—how do you suppose they do it?

© East Syndicate.—WNU Service.

HINT-OF-THE-DAY

The Use of Face Powder
Face powder is perhaps woman's oldest beauty aid. In Egypt, China and Japan powders have been used for centuries. Rice, starch, clay, bismuth and almond meal were the prerequisites before the days of Cleopatra.

A high grade powder is a many-sided blessing. It protects the skin against strong sunlight, harsh winds and atmospheric dust. The woman who knows her beauty rules never grinds powder into the pores. She pats it on lightly, starting under the chin and not on the nose, as was the old-time custom. After its application she taps her face lightly with the finger tips. That tends to make the powder stick.

It's important to be fastidious about the powder pad, since germs lurk on even a clean skin. Absorbent cotton is more sanitary, though it doesn't spread the powder as nicely as lamb's wool. Rouge pads are frowned upon because they are usually given such long service.

Many of today's powders contain starch talcum, also oxide of zinc, which is an excellent antiseptic. To help powders to hold on lotions are used, some being compounded of stearate of zinc and a bland oil. They should be rubbed into the flesh until they disappear, as you would with a vanishing cream.

Silken Caracul is Valuable
The value of the silken pelts of caracul from an unusual breed of sheep in southern Russia is determined by the regularity and beauty of their lustrous moire markings. As in all furs, the quality of the skin is important, and the suppleness. But for caracul to achieve its greatest loveliness, the shimmering moire patterns must be carefully matched and harmonized.

WHAT to EAT and WHY

C. Houston Goudiss Touches Upon the Food Values of Fish and Shellfish; Shows How They Can Help to Improve Nutritive Quality of the Diet

By C. HOUSTON GOUDISS

A PRESENT-DAY nutritionist might easily quarrel with the traditional distinction between fish, flesh and fowl. For the flesh of fish, cattle, swine, sheep and poultry is commonly referred to as "meat," and the nutritive values of all these foods properly may be considered together. Their composition is very similar, consisting principally of protein, water and fat, with the chief variation occurring in the fat content. They also average about one per cent of minerals and contain some of the vitamins in varying amounts.

Fish vs. Other Flesh Foods

There is a wide variation among the different kinds of fish in the amount of fat they contain. In general, fish have less fat and more water than other forms of meat. Their tissue fibers are also shorter, which makes for ease of digestion. In many cases, their flavor is less pronounced because there are fewer extractives.

For this reason, fish is considered less stimulating, and that is also why it is often served with some sort of sauce, or with a lemon garnish to point up the flavor.

The proteins of fish are regarded as equally useful with other forms of meat for helping to build and repair body tissues. Most lean fish are richer in minerals than fatty fish; in this respect, they resemble lean meats.

Salt water fish are notable as a source of iodine, required for the proper functioning of the thyroid gland. It is desirable that this mineral be included in the dietary, to help prevent simple goiter.

The Cattle of the Sea

The most significant difference between fish and most other flesh foods is that with the exception of certain shellfish which are produced under government regulation, "crops" from the sea are neither planted by man, nor cultivated by him.

Unlike the farmer or the cattle man, the fisherman gathers his "harvest" without the previous effort of sowing seeds or cultivating plants, without the necessity of providing shelter or fodder.

To a man or woman who has never enjoyed the experience of catching fish for dinner, the sea may suggest nothing but an expanse of blue-green water. But to those who are familiar with the habits of its denizens, the sea is a fascinating place teeming with life. It contains many forms of vegetable materials, of which seaweed is the best known. These provide food for the lower forms of animal life which inhabit the waters. They, in turn, are eaten by larger creatures. In the final analysis, all forms of animal life in the sea, as on land, are dependent for their sustenance upon the sun, which stores up energy in green plants.

Fish as a Source of Vitamin D

The sun is concerned, too, with the production of vitamin D, as it is by means of sunshine that our

best source becomes available. Fish liver oils are the richest natural sources of vitamin D. This vitamin is necessary for the proper utilization of calcium and phosphorus in building strong bones and sound teeth. We prize highly the liver oils of the cod, halibut, salmon, swordfish and tuna for their fine amount of this precious vitamin.

The body oils of certain fish are also valued for their vitamin D. Some varieties that are notable in this respect are salmon, herring and sardines. It is agreeable as well as economical to obtain vitamin D by serving seafood, because fish supplies so many other valuable nutrients at the same time.

Fish is Universally Available

There are perhaps more varieties of fish than any other type of first-class protein food. A government bulletin has listed 40 kinds besides smoked and salted fish and the various shellfish.

Thus the use of fish provides ample opportunities for varying the menu. Moreover, though fish is more perishable than other flesh foods, it is available today in every town and hamlet, however remote from the waterways.

No matter where she lives, the homemaker can choose from a wide variety of canned, dried, smoked, salted and quick-frozen fish. And both transportation and refrigeration have been so improved that fresh-caught fish are distributed far inland.

The quick-frozen fish should be handled as carefully as fresh fish, kept under refrigeration, and used within a reasonable time after purchasing. Canned fish, naturally, requires no refrigeration, and a supply can always be kept on hand both for everyday use and for emergencies.

The most important canned fish, in terms of the amounts packed and sold, is salmon. This flavorful fish is an excellent and economical protein food which is also notable for its energy value; its calcium, phosphorus and iodine; and as a source of vitamins A and D. Other canned seafoods that are sold in volume include tuna, sardines, shrimp and clams. Canned crab and lobster meats and oysters are also to be found upon the shelves of most grocers, together with other varieties of seafood, some packed in tomato sauce.

When using canned salmon and other kinds of fish that have been put into the cans before cooking, it is advisable to conserve the juices which cooked out during the sterilization process, as these contain valuable nutrients.

Varieties of Shellfish

Clams, oysters, shrimp and scallops differ somewhat from other forms of seafood, chiefly in that they contain some carbohydrates.

They have very little fat. Oysters are rich in iodine and they might be compared to the glandular organs, such as liver and kidney, as a source of three vitamins, A, B and G.

Place of Fish in the Diet

The most important contribution of all forms of fish is their proteins, which as we have seen may be used interchangeably with those of beef, pork, lamb, veal and poultry. The iodine of seafoods and shellfish is also extremely important, and in some varieties, the content of vitamins A and D. The more fatty fish, including mackerel, salmon, eels, herring, catfish and shad are comparatively rich in energy values. The fuel value of cod, flounder, perch, smelts and haddock, which are low in fat, and halibut and whitefish which have a moderate amount, may be increased through the use of a rich sauce, or they may be cooked in fat.

Questions Answered

Mrs. M. McK.—It has been calculated that the amount of vitamin G now believed to be necessary for helping to maintain good health might be supplied by a pint of milk, one serving of grapefruit, one whole egg, five slices of whole wheat bread and one serving of turnip greens.

Mrs. L. C. A.—There is absolutely no basis for the old superstition that fish and milk should not be taken together. Some persons might have been made ill by taking fish and milk at one meal. But in that case, we must conclude that the individual must have been allergic to one of these foods; or possibly the fish was not fresh.

DO THIS

TO RELIEVE PAIN AND DISCOMFORT OF A COLD

Follow Simple Method Below Takes only a Few Minutes When Bayer Aspirin is Used

Starts to Ease Pain and Discomfort and Sore Throat Accompanying Colds Almost Instantly

The simple way pictured above often brings amazingly fast relief from discomfort and sore throat accompanying colds.

Try it. Then—see your doctor. He probably will tell you to continue with the Bayer Aspirin because it acts so fast to relieve discomforts of a cold. And to reduce fever.

This simple way, backed by scientific authority, has largely supplanted the use of strong medicines in easing cold symptoms. Perhaps the easiest, most effective way yet discovered. But make sure you get genuine BAYER Aspirin.

Fatal to Thought
Incessant scribbling is death to thought.—Carlyle.

BUY ADVERTISED GOODS

AROUND the HOUSE Items of Interest to the Housewife

Antique Candles.—Brush brown floor stain over white candles to obtain an antique effect.

Imitation Stained Glass.—Ordinary cloth dyes obtainable at drug and dry goods stores can be used to imitate stained glass. A color is selected and the dye is mixed with clear lacquer which is then applied to the glass. If transparency is required, one coat is enough. Successive coats reduce transparency. A coat of thinned clear varnish is then applied over the stain, permitting cleaning with a dampened cloth.

Heavy With Smoke.—If the living room is heavy with smoke after the party and yet you cannot retire leaving a downstairs window open, put a basin of water in the room and leave it over night. The air will be fresh by morning.

Hoboes of Today
According to Jeff Davis, a prominent hobo, there are 40,000 girl hoboes and 1,000,000 man hoboes on the road. Where these hoboes end up is a matter of conjecture. It is likely that some of them become disgusted with the life and go into some form of business or take up a trade. Others continue the life until they die a natural death or are killed in an accidental manner.

Kitchen Garden.—You can use your kitchen window sill as a place to grow chives, parsley, and watercress. Plant them in nicely painted buckets, and you'll find these flavoring accessories to next winter's dinners and appears as attractive as they are useful.

Large Pillow Cases.—Pillow cases wear out quickly when they are too small for the pillows forced into them.

Washable Pictures.—Pictures for children's rooms can be made washable by covering them with white shellac.

Remember Your Feet.—When you put cream on your hands at night, rub a little into your feet, too, to keep the skin soft.

For Baby's Safety.—See that rickety furniture is removed when baby starts to walk, as he will hang onto any article within reach and it may topple over on him.

Use Honey.—Fruit cakes, steamed puddings, cookies, and candies made with honey stay moist a long time.

Smooth Cornmeal Mash.—To keep cornmeal mash from being lumpy, mix the dry meal with a little cold water before adding the hot water.

The Livestock Situation

By J. A. McNaughton
Los Angeles Union Stock Yards, February 1. As the dates of the great Beef Cattle Show at Treasure Island, San Francisco, February 18 to 28 approach, interest in the show on the part of western cattlemen is mounting.

The Beef Cattle Show, the first major livestock event of the Exposition, will follow the convention of the American National Livestock Association, February 15 to 17, at San Francisco. The combined events are expected to attract the largest group of stockmen ever assembled in one spot in the United States.

Although many people are not aware of the fact, California is second only to Texas among western states in numbers of beef cattle. As the second largest range state in the United States, California offers an excellent market for popular type beef cattle.

It is my firm conviction that stock shows without sales, both at auction and privately, only partially answer their purpose. Primarily, stock shows are held as a means of comparing animals and establishing types, as well as arousing interest in breeding improved stock.

Although California annually imports many thousands of stocker and feeder cattle, more California cattlemen are becoming interested in establishing breeding herds and raising their own calves. Many stockmen believe that land values and taxes are too high to maintain a breeding herd the year around.

The adjoining states of Arizona, Oregon and Nevada have made tremendous progress in building up the quality of their cattle in the nation have gone to these states. In all probability, many of the excellent cattle that will be on display at Treasure Island February 18 to 28 will remain in the west to add their influence in increasing the quality of western cattle.

You and each of you are hereby notified that an action has been instituted and is now pending in the District Court of the Third Judicial District, sitting within and for the County of Lincoln, wherein J. H. Reynolds is Plaintiff and you and each of you are Defendants, said cause being numbered 4612 on the civil docket of said court; that the general object of said action is to quiet the title of Plaintiff in and to the following described real estate, lying and being in the County of Lincoln, State of New Mexico, to-wit:

Northwest quarter of Southwest quarter and South half of South half of Section Fifteen; North half of North half, South half of Northwest quarter, Southwest quarter of Northwest quarter, South half of Southeast quarter of Northwest quarter, and South half of Section Twenty-two; Southwest quarter of Section Twenty-three; also beginning at a point thirty feet East of a well located in the Southeast quarter of Section Twenty-five, Township Eight South, Range Ten East, N.M.P.M.; thence North, One Hundred Feet, thence West Four Hundred Twenty feet to the East line of the Southwest quarter of said Section Twenty-three, thence South Four Hundred Twenty feet along said East line of the Southwest quarter of said Section Twenty-three, thence East Four Hundred Twenty feet, thence North Three Hundred Twenty feet to the place of beginning, containing four acres; Also, the North half, North half of Southeast quarter, Southeast quarter of Southeast quarter, and South half of Southwest quarter of Section Twenty-seven; the West half of Section Twenty-six; the West half of Northwest quarter, the Northeast quarter and South half of Section Thirty-four; the Southeast quarter of Southwest quarter, and South half of Southeast quarter of Section Thirty-five; the Northeast quarter of Section Thirty-one; all in Township Eight South, Range Ten East, N.M.P.M.

Also, East half of Northwest quarter and South half of Northwest quarter of Section Four; Northwest quarter and Southeast quarter of Northeast quarter of Section Three; West half of Northwest quarter, Northeast quarter of Northwest quarter and Northwest quarter of the Southwest quarter of Section two; West half of Northwest quarter, the Southeast quarter of Northwest quarter, and the East half of Southwest quarter of Section One; West half of Southwest quarter and Southeast quarter of Southwest quarter of Section Five; Southwest quarter of Southwest quarter of Section Six; Northwest quarter of Northwest quarter of Section Seven; West half of Northwest quarter, Southeast quarter of Northwest quarter, and the North half of Southwest quarter of Section Eight; the Southeast quarter of Northwest quarter, West half of Northeast quarter, Southeast quarter of Northeast quarter, Southeast quarter of Southwest quarter of Section Nine; Southwest quarter, West half of Southwest quarter and Northwest quarter of Southwest quarter and Northwest quarter of Southwest quarter of Section Ten; all of Section Eleven; the East half and East half of Southwest quarter of Section Twelve; the East half East half of West half and West half of Southwest quarter of Section Thirteen; North half of Southeast quarter of Section Fourteen; the North half of Section Seventeen; the Southwest quarter of Northwest quarter of Section Twenty; Northeast quarter of Northeast quarter of Section Twenty-one; North half, and North half of Southeast quarter, and Southeast quarter of Southeast quarter of Section Twenty-two; West half of West half, North half of Northeast quarter and South half of Southeast quarter, of Section Twenty-three; Southwest quarter of Southwest quarter and Northwest quarter of Southwest quarter of Section Twenty-four; Southwest quarter of Southwest quarter of Section Twenty-seven; South half of Southeast quarter, and Southeast quarter of Southwest quarter of Section Twenty-eight; South half of Southeast quarter, Northwest quarter of Southeast quarter and Southwest quarter of Northeast quarter of Section Twenty-nine; Northeast quarter, Southwest quarter, Southeast quarter, North half of Southwest quarter, Southeast quarter of Southwest quarter and Southwest quarter of Northwest quarter of Section Thirty; Northwest quarter of Northwest quarter of Section Thirty-one; Northeast quarter of Northwest quarter and Northwest quarter of Northwest quarter of Section Thirty-three; the North half of Northwest quarter of Section

Thirty-four; all in Township Nine South, Range Ten East, N. M. P. M. Also, the Southeast quarter, the South half of Northeast quarter of Section One; the East half of Section Twelve; the North half, the Southwest quarter, and North half of Southeast quarter of Section Twenty-five; East half of East half West half of Northeast quarter, and North half of Northwest quarter of Section Twenty-six; North half of Northeast quarter, and Northeast quarter of Northwest quarter of Section Thirty-five; all in Township Nine South, Range Nine East, N. M. P. M. Also, North half of Northwest quarter, Southwest quarter of Northwest quarter, Southwest quarter of Northwest quarter of Section One; the Northwest quarter of Section Four; the South half of Northwest quarter, the Northeast quarter of Northwest quarter and East half of Northwest quarter of Northwest quarter of Section Eight; East half of Northeast quarter, and Northeast quarter of Southeast quarter of Section Ten; the West half of Southeast quarter and Northeast quarter of Southeast quarter of Section Eleven; West half of Northwest quarter, and Northwest quarter of Southwest quarter of Section Twelve; the West half of Southwest quarter of Section Thirteen; the West half of Southeast quarter, South half of Northeast quarter, and Northwest quarter of Northeast quarter of Section Fourteen; the Northeast quarter of Southeast quarter of Section Fifteen; the Northeast quarter, and East half of Northwest quarter of Section Twenty-three; West half of Northwest quarter, and South half of Northwest quarter of Section Twenty-four; all in Township Ten South, Range Nine East, N. M. P. M.

Also, the South half of Southeast quarter and Northwest quarter of Southwest quarter of Section Six; the Southwest quarter of Southwest quarter of Section Five; the East half and West half of West half of Section Seven; the West half of West half and Northeast quarter of Section Eighteen; the West half of Northwest quarter and Northwest quarter of Southwest quarter of Section Nineteen; all in Township Nine South of Range Eleven East, N. M. P. M.

Also H. E. Survey No. 253, embracing a portion of, approximately, section nineteen, in township nine south of range eleven east, N.M.P.M., more particularly described as follows: Beginning at corner No. 1, identical with the closing corner to sections eighteen and nineteen, township nine south, range eleven east, N.M.P.M.; thence N. 89 deg. 56 min. E. 20 chains to corner No. 2; thence S. 32 deg. 6 min. W. 317 chains to corner No. 3; thence S. 51 deg. 29 min. E. 3990 chains to corner No. 4; thence S. 32 deg. 6 min. W. 317 chains to corner No. 5; thence N. 55 deg. 33 min. W. 21.38 chains to corner No. 6; thence N. 89 deg. 56 min. E. 1296 chains to corner No. 7; thence S. 49 min. W. 1410 chains to corner No. 8; thence N. 87 deg. 21 min. W. 1970 chains to corner No. 9; thence N. 1 deg. 7 min. E. 26.53 chains to corner No. 10; thence N. 31 min. E. 39.81 chains to corner No. 11; thence N. 37 min. E. 74 chains to corner No. 12; the place of beginning, containing one hundred fifty-seven and 89/100 acres; according to the official plat of the survey of said land returned to the General Land Office by the Surveyor General, together with the water rights and ditch rights appurtenant thereto.

Also, Northeast quarter of Northwest quarter of Section Two, Township Nine South, Range Ten East, N.M.P.M. And to bar you and each and everyone of you from having or claiming any right, title, interest, lien claim or demand whatsoever in said real estate or any part thereof, adverse to the estate of Plaintiff.

You are further notified that unless you enter or cause to be entered your appearance in said cause on or before the 15th day of March, 1939, judgment will be rendered in said cause against you by default, and the relief demanded by Plaintiff will be granted.

You are further notified that Plaintiff's attorneys are Noble & Spiess, whose office and postoffice address is Las Vegas, New Mexico.

Year-End Moves By Tenant Farmers Cost County a Huge Sum

Year-end moves will cost Lincoln County tenant farmers more than \$1,995.00, and that is only the beginning of the cost to them and to the general public, it was stated by James W. J. Evans, County Supervisor of The Farm Security Administration.

The supervisor estimated that 35 farm tenants of this county move every year. The actual cash cost is around \$57.00 per family, he said, but the final cost to the tenant and to the public

is much greater.

Most of the tenants who move could be stabilized through leasing methods which would encourage them to remain upon the same farm and to improve it, the supervisor stated. He said that the FSA flexible lease form, now being distributed by his office is winning favor with both landlords and tenants and that a considerable number of farms in this county will be operated under it during the coming year.

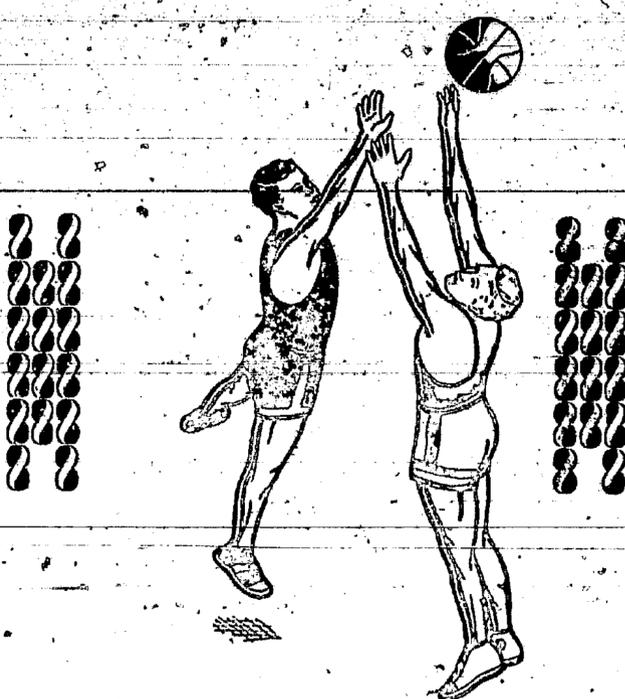

"A tenant who stays upon a given piece of land for only a year has no opportunity to build up that land and no incentive to do it," James W. J. Evans confid-

ued, "Instead, he is inclined to take out of it all he can. The land owner may be struggling along like the tenant on an inadequate income. He has his money invested in the land and taxes to pay, so he also is interested in having the tenant get the most possible out of this year's crop, letting the future take care of itself. In many cases, the landlord does not live in the county or the state and fails to realize what is happening to his soil."

The supervisor said that tenant families move during the winter after the crops are harvested, which means that the movement is made at a time when the children must be taken out of school. "They not only lose several weeks of school, they often stay out for the remainder of the school year. When they do go back to school they are likely to be set back in their classes, and become discouraged and disinterested. The same discouragement and lack of interest occurs with the tenant farmer himself, and with his wife, in regard to participation in community activities."

The estimate of tenant farmers moving in this county was based upon the state average of approximately 40 per cent of tenants moving annually, and the last census figures which show the number of tenant farmers in this county to be 87.

Music and Dancing at Fair

New York, Jan. 31.--The extensive music program of the New York World's Fair 1939, is to include opera, symphony, choral and religious musical presentations, light opera, folks music, ballets and the dances of this country and other nations.

TRY EVERY BRAND OF GASOLINE

I'm safe saying that. My own customers won't do it. That's what they're through doing. Maybe they thought it was just another one of their guesses the first time they drove in here for my Special Winter Blend Conoco Bronz-z-z. Now they know they've got the right one, and every cold morning tells them so, and they're getting owell mileage along with starting that never misses. I've even got one man that always had heat in the garage, but keeps it off now, and saves the expense, and tells me the car never used to start up near as fast as it does on Conoco Bronz-z-z. He's one of the ones that keep sending me in other people, which is a heap sight better than my trying to out-sell all the different brands of gasoline.

SPECIAL WINTER BLEND

News Notes of Carrizozo Schools

The basketball team played Corora here last Saturday.

An interesting assembly was given by Mr. Martinez and his chemistry students Tuesday morning at 9 o'clock. It was enjoyed by everybody.

Plans are being made for the School Carnival to be held in the High School building, Feb. 18, 1939. Proceeds will go to the different departments of the school.

The Baton Twirling class will make their first appearance next Tuesday in assembly. Everyone please remember they are not very experienced.

The Juniors are progressing very fast on their play, "No Account David." They hope to put it on in about three weeks.

The second year home economics girls made up a list of "do's" and "don't's" in their class this week.

Every class in the building this week are having a 15-minute period studying the flag.

The Americanization program is one of the biggest events of the year. Every organization in town is invited to participate. Our great Nation needs the cooperation of every individual in perpetuating the things which have America great.

The following is the schedule of basketball games to be played on our local court by the High

School:
Feb. 3, (tonight), Capitan.
Feb. 17, Tularosa.
Feb. 18, Honda.
Feb. 25, Harlem Hottentots.

ODDITIES AT THE FAIR

NEW YORK--Here are a few of the strikingly unusual things visitors will find at the New York World's Fair 1939:

A parachute tower from which visitors may "fall out" at an elevation of 250 feet and be sure of a "happy landing."

Revolving "magic carpets" from which you may look down as from a height of two miles upon "The City of Tomorrow" inside the 200-foot Perisphere.

A "Tree of Life" carved from the trunk and branches of an elm planted in Connecticut in 1781 by Revolutionary War prisoners.

"Steve Brodie" jumping six times a day from a reproduction of the Brooklyn Bridge.

The most valuable wheat field for its size in the world in full growth.

Five million dollars worth of diamonds, rubies, emeralds and other gems in one glittering display.

The steel-walled bathysphere in which descent has been made miles down in the black depths of the ocean.

"Rocket gun" by which passengers will be shot to the moon, or Mars someday--perhaps.

The model of a human eye so large visitors may enter it and look out upon the Fair's busy scene just as if the eye were doing the looking.

Two hundred blooded cows being milked daily on a revolving platform.

An orange grove transplanted intact all the way from Florida.

Automobiles with living drivers in hair-raising collisions and flying somersaults.

The largest opal in the world. An oil well in operation with real drillers in the "cast." The largest model railroad ever constructed. Puppets 14 feet tall dramatizing

the contents of the familiar bathroom medicine cabinet.

Displays of rare orchids, renewed every three days by plants flown to the Fair from Venezuela.

The tremendous discharge of 10,000,000 volts of man-made lightning.

A Brazilian exhibit building erected on stilts.

A floor made of cotton.

Ricksha runners from South Africa six and a half feet tall and clad mostly in feathers, horns and beads.

A waterfall cascading from the high roof of a building.

Mural paintings that change their colors while you're looking at them.

Fireworks set to music in related patterns of color and light.

A city entirely populated by midgeets.

An automobile speedway half a mile long on top of an exhibit building.

Mighty snowstorms sweeping down out of a clear Spring sky.

A building turned inside out with its roofbeams on the outside.

Moving chairs traveling around in a building so visitors won't have to walk.

A flight to Venus so real you'll swear you've been there and met the folks.

The tallest mural paintings in the world.

A model of New York City so large that the Empire State Building is reproduced 23 feet tall.

A sphere 200 feet in diameter seeming to revolve on jets of water, like the little silver ball in the shooting-gallery.

A fountain that sings.

Paintings that have to be destroyed every night and done all over again next morning.

A "Fountain of the Atom," with electrons and protons dancing around a pulsating shaft of light.

Scientific Age Just Starting, Savants Claim

Tomorrow's Farmer Will Guide Tractor From His Front Porch

Soapless soap, smokeless powder from cottonseed, iceless ice, fertilizer from the air, wool without benefit of sheep, rubberless rubber, sponges from cotton and wood—these miracles are today taking form in science's test-tubes and crucibles.

A myriad of other developments, equally spectacular, will soon take place in farming, home design, transportation, food distribution and architecture, if we take the word of the world's leading scientists and industrial engineers.

Stimulated by wide interest in the "world of tomorrow" these scientific gentlemen are doing extensive crystal gazing nowadays and their predictions, based on experience gained in America's efficient industrial laboratories, give a kaleidoscopic picture of our civilization a decade or so from now. Factory machinery, for instance, will "eat" more agricultural products than will be consumed as food, officials of leading chemical companies assert. The tremendous demands upon the farm which will be made by manufacturers of plastics, synthetic yarns and similar substitutes, will result in an entirely new concept of agriculture.

'Gasoline' From Potatoes. Alcohol motor fuel will be made from molasses, corn, Irish and sweet potatoes or from artichokes, Dr. W. L. Owen, a Baton Rouge consulting bacteriologist, has predicted. "We can establish," he declared, "an 'agrol' motor fuel industry that will enormously enrich the farmer without any imposition whatever on the motorist."

All Great Britain's food requirements could be produced on a small part of the soil of the British Isles in the light of even today's knowledge, Bertrand Russell, eminent British scientist recently wrote. The Sahara desert, he said, can be made fertile by preventing evaporation of the dew. "In a slightly more distant future," he said, "there is the possibility of synthetic food, which would destroy the necessity for agriculture, and thus transform politics and social life."

Picture the comfortable life of tomorrow's farmer, taking things easy on the porch while directing a tractor across his fields by pressing a series of buttons. Such a tractor system is being developed by Robert Mize, of Earlham, Calif.

With another set of buttons the farmer may be able to fertilize his acreage by passing electric currents through the soil. Experiments along these lines by the Boyce Thompson Institute have increased yields of corn, strawberries and cabbages by as much as 20 per cent.

A 'Glass Age' Ahead. Farm products will be hauled to city markets on glass highways, according to Dr. John F. Caton, director of research engineering for the Chrysler corporation. Glass springs for beds, glass radio sets, glass roof shingles and glass razor blades were also envisioned by Dr. Caton.

As a matter of fact, scientists refer to the coming era as the "glass age," particularly in respect to the home and architecture generally. Architects will specify glass walls for American homes—walls which may disappear into the floor at the turn of a crank. John D. Biggers, president of Libbey-Owens-Ford glass company last month told a convention of woodwork jobbers. Windows will be lowered and raised by pressing a button, he predicted, and the typical house of tomorrow will have a roof of the new heat-absorbing plate glass, which absorbs infra-red rays of the sun. The cult of light and sunshine apparently is spreading to automo-

Grandpa Was Right! Scientists Maintain Winters Are Warmer

Granddad wasn't far wrong when he said winter's weren't what they used to be. Figures of the United States weather bureau bear him out, as do practically all other researches compiled in recent years. Most important researches in this field have been made by Joseph B. Kincer, chief of the division of climate and crop weather for the weather bureau, who analyzed records at New Haven, Conn.; Copenhagen, Denmark, and other points whose temperatures have been read daily for many years. Graphed, the records show a constantly rising average temperature during the past 50 years. Several factors are responsible for the change but meteorologists know that weather, like most things in nature, goes by cycles.

Reading matter via radio? Here's the broadcasting apparatus used by a St. Louis experimental facsimile radio station to transmit specially prepared facsimile newspapers.

Is this tomorrow's world? Norman Bel Geddes, designer of the "highways and horizons" exhibit for New York's world fair, ponders a detail of a small metropolitan section of his 300,000 square-foot future city.

bile manufacturers, since 1939 models boast 18 to 30 per cent more window space. Subsequent changes, it is reported, will further increase driving visibility, with several manufacturers possibly following the lead taken by one producer in offer-

Cattle Go 'Round and Around And the Milk Comes Out Here

The cow will live at a dizzy pace in the world of tomorrow if a unique exhibit planned for next summer's New York fair is any criterion. There, supported by the Borden company, 150 outstanding cattle from all over the North American continent will live in quarters fit for a king. But when milking time rolls around these pasture-trained cows must jump on a veritable merry-go-round known as the "rotolactor," where to be milked mechanically while the public looks on.

Designed to be one of the fair's most unusual exhibits, the dairy world of tomorrow will show outstanding specimens from Guernsey, Jersey, Holstein, Ayrshire and Brown-Swiss herds, each breed represented by 30 cows and a herd bull. Calves and some outstanding champions will also be shown. Each breed association will select its own cattle.

While living in comparatively cramped quarters, the cattle are expected to thrive under these artificial conditions. A chief herdman, to be chosen by breeders, will be assisted by experts. Federal and state veterinarians will be in constant attendance and rigid health regulations will be enforced. Cows will be distributed through the barns in units of ten to a breed. Purpose of the exhibit is to educate the public to consume more milk, on the theory that visitors to the fair will be impressed by the favorable conditions under which milk is produced in the dairy world of tomorrow. A second factor is the popularizing of good cattle breeds

ing a sedan with a sliding panel in the top of the car. Improvements in safety glass manufacture, increasing even the present high ratio of safety, are in the immediate offing.

Flying Palaces Predicted. Airplanes carrying 150 passengers and tons of baggage will zoom through the air at a 500-mile-per-hour clip, according to an engineer of Lockheed Airplane company. Passengers will be carried in the wings. Propelled by six 2,500-horsepower engines placed so that traveling mechanics may make repairs at night, these flying palaces will have recreational facilities, promenade decks, and individual state-rooms.

Other developments in store for the next decade, described by authorities equally as prominent as the ones already quoted are:

Window shades or blinds in the farmhouse of the next generation may be placed outside instead of inside windows, because this is one of the less intricate methods being studied to cut the cost of home air-conditioning.

Water insulation will become prominent. As insulation against cold outdoors a layer of water on flat roofs will be allowed to freeze in winter, while in summer the layer would connect with a spray system cooling the air-conditioning unit.

The farmer's wife will have an easier life with a host of mechanical slaves at her beck and call, such as washing machines with two dials, one of which will select the proper temperature and the other will regulate the timing of the wash. These machines will give clothes a good soaking, scrub them, and then apply a fresh-water rinse.

Telephone Answers Itself. Telephone messages will be "parked" on a magnetized strip of steel until the absent party arrives to receive it, when the messages will be relayed in chronological order through a loudspeaker.

Of course, the rural areas of America will have the advantage which television will bring. Along with the growth of this marvel, however, may occur breath-taking advances in the field of radio itself, so that it may be possible to telephone while touring in your car.

So overwhelming to the mind are the scientific accomplishments just around the corner that Dr. E. Weidlein, past president of the American Chemical society recently declared that, stacked up against the future, the automobile is only 10 per cent developed, the radio is only a day old and television less than an hour old. Transportation, Dr. Weidlein said, has just begun to benefit from science, and modernization of homes presents a great industrial opportunity.

Above: The ingenious "rotolactor" on which cattle make a complete circuit during the milking process. Below: A model of the "dairy world of tomorrow" exhibit.

among domestic and foreign dairy-men attending the fair. Among committeemen working on the exhibit are Mark Keeney, manager of the Holstein herd at Essex county hospital, Cedar Grove, N. J.; Henry W. Jeffers, president of the Walker-Gordon farms at Pleasanton, N. J.; and Matthew Suddam, owner of an outstanding herd of Brown-Swiss cattle at New Brunswick, N. J.

Sponsors will pay all expenses of the exhibit, including construction of buildings, feeding and care of the cattle, testing and transporting the animals to and from the farms of the owners. Only expenses required of breed associations will be in selecting animals. Owners will be asked to donate the services of their cattle.

Color Is the Major Theme in Gay Spring Song of Fashion

By CHERIE NICHOLAS

IN CLARION notes loud and clear the spring song of fashion rings out the message of the importance of color for coming modes. That which is destined to prove a dramatic color program starts out in midseason with handsome woollens that are being tailored alluringly into smart suits and ensembles, also topcoats as attractive as ere the light of fashion shown upon.

If you are impatient to don color you do not have to wait for the actual arrival of spring, neither are you called upon to travel to sunny climes to wear one of the new bright woolen outfits, for at this very moment fashion-alert women are acquiring tailors of flashing, dashing gay wool weaves that forecast the color-glory of suits, ensembles, dresses and coats that will enliven the style scene throughout the coming months.

Early spring tweeds "say it" irresistibly via plaids and stripes that are superbly colorful. Playing up bright woollens in tris is one way of showing enthusiasm for the new novelty stripes, plaids and checks. In such instances a stripe, a plaid or check and a plain are so interrelated in color values as to make a stunning costume—such as any lady of fashion might covet.

The tailored suit of plaid woolen in the foreground of our illustration in softest shades of rose and green with wool jersey blouse of dusty pink would sound a triumphant high coloratura note under a fur coat in any clime where the thermometer persists in registering low or with light accessories it will prove ideal on a southern cruise.

From Paris comes the dramatic sport ensemble shown to the left in the group. Lucien Lelong creates this style-significant costume of multicolored stripe tweed. The blouse is in green jersey enhanced with a brilliant studded belt.

The oncoming rush for plaided or striped woollens is modishly told in

the two attractive models shown in the background. Crossbar plaid in blue and white imported tweed makes the topcoat and jacket for the costume shown to the left with matching blue monotone skirt. Bright yellow, red, blue and a natural beige blend harmoniously in the beautiful plaid topcoat of imported tweed at the right. It is lined with matching blue silk crepe.

The task that fashion sets before the designer of smart wool outfits for spring is to so inter-relate colors, that combined make a harmonious individualized entity of their own. It is not beyond the bonds of good taste to combine a stripe, a plaid and a plain. In fact, the working of novelty woollens in tris is one of the smartest newest moves among designers who notably lead in costume art.

The dominant note in early spring fashioning is, as it has been for some time past, the contrast jacket and skirt two-piece suit. The stripes and plaids and nubby wool weaves that go to make up these youthful suits are more fascinating than ever. In stylizing these popular numbers designers are making a big play on pockets. Sometimes the front of the jacket is fairly plastered with innumerable decorative as well as useful pockets.

Newest among woollens in use for spring are diagonal stripe effects such as a gray wool with wide white stripes running diagonally across. Prospects are that we will be seeing more of stripes this season than ever.

Bows and Beaux

It takes a bow or more to catch a beau. With bows at her waist, there's sure to be a beau to the fore for the girl in the portrait dress as you see here pictured. Naively draped off the shoulders, the dress in black velvet has as its only adornment a soft gold kid belt which was especially designed by Critterion to enhance its richness. Note the tiny bows frolicking 'round, adding a sophisticated air to this girle of gold. The wee velvet hat with its twin bows carries out the theme of this dinner gown.

Chic With Earmuffs. The clever, chic, favorite of schoolgirls the country over, returns this winter embellished with fluffy earmuffs and warmly lined with bright plaid flannellette. The earmuffs can be worn up or down.

Neckwear Means Accessories Also

Neckwear doesn't mean just pique and batiste or organdie collars. Neckwear (at least the items sold at neckwear counters) doesn't mean just pique and batiste or organdie collars. Neckwear in the modern interpretation of the word means ruchings, embroideries, stiff little Buster Brown collars, Irish lace-collars and silk ties, little bows for your neck, with little icy pockets to match. Neckwear may be in velvet with mother-of-pearl flowers and jewels. It may be of grosgrain ribbon or of chiffon, or it may be of velvet ribbon or of taffeta, satin, lame or kid. It may be an elaborate sequin bolero or it may be a wee jacket of ruffled net. At any rate neckwear is a most featured theme for spring.

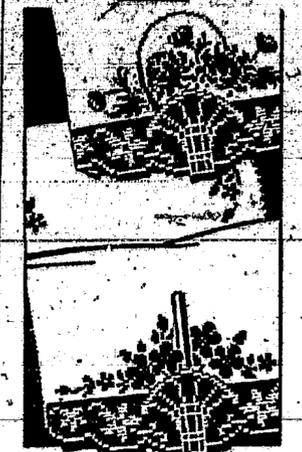

Squirrel Sets Off Spray of Orchids

For night wear, one of the more delicate things should be chosen. Squirrel will set off a spray of orchids like nobody's business. In undyed squirrel look for clear gray, untinted with brown, and a close, even pile. "Flank" squirrel is usually dyed brown, and coats less than gray.

Old-Fashioned Slips. Slips have gone old-fashioned—camisole tops with lace beading and baby blue ribbon. Lace ruffles and ribbon decorate the bottom of the slip, too.

For Winter Wear. A white chiffon blouse—banded with black val lace is shown in one collection for wear with a black tulle suit.

Cross Stitch and Crochet for Linens

Use this cross stitch and crochet on scarfs, towels and pillow cases and have linens you'll be proud of. Pattern 1872 contains a transfer pattern of eight motifs ranging from 5 by 13 1/2 to 3 1/2 by 7 1/2 inches; directions and chart for the flat crochet; materials required; illustrations of stitches. Send 15 cents in coins for this pattern to The Sewing Circle, Needlecraft Dept., 82 Eighth Avenue, New York, N. Y. Please write your name, address and pattern number plainly.

NEVER SLEEP ON AN "UPSET" STOMACH

Neutralize excess stomach acids to wake up feeling like a million

To relieve the effects of over-indulgence—escape "acid indigestion" next day—do this: Take 2 tablespoonfuls of Phillips' Milk of Magnesia in a glass of water—AT BEDTIME.

While you sleep, this wonderful alkaliizer will be sweetening your stomach... easing the upset feeling and nausea... helping to bring back a "normal" feeling. By morning you feel great.

Then—when you wake—take 2 more tablespoonfuls of Phillips' Milk of Magnesia with orange juice.

That is one of the quickest, simplest, easiest ways to overcome the bad effects of too much eating, smoking or drinking. Thousands use it.

But—never ask for "milk of magnesia" alone—always ask for "Phillips' Milk of Magnesia."

PHILLIPS' MILK OF MAGNESIA IN LIQUID OR TABLET FORM

Our Need My neighbor is the man who needs me, or whom I need, which is in the end the same thing.—Joseph Ernest McAfee.

NERVOUS?

Do you feel so nervous you want to scream? Are you tired and irritable? Do you worry these things to you? If your nerves are on edge and you feel you need a rest, rest your system with Lydia E. Pinkham's Vegetable Compound, made especially for women. For over 30 years one woman has told another how to get "nervous" through Lydia E. Pinkham's Compound. It helps nature build up more physical resistance and thus helps eliminate nervousness and leaves you free from annoying symptoms which often accompany female functional disorders. Why not give it a chance to help YOU? Over one million women have written us reporting wonderful benefits from Pinkham's Compound.

Heart to Heart A man cannot touch his neighbor's heart with anything less than his own.—G. Macdonald.

666 COLDS, Headaches and Fever. LIQUID TABLETS. SALVE, ROSE SHOPS. Try "Milk-My-Tam"—a Wonderful Remedy.

In columns are filled with important suggestions which you should read regularly.

CRUCIBLE

By BEN AMES WILLIAMS

CHAPTER XII—Continued

Phil watched Barbara, flushed and happy, moving easily about the court; and he thought, astonished: Mother doesn't seem to mind! She seems glad!

He said guardedly, "You think so?"

"Of course! And Dan's a fine young man."

"Well—I like him," Phil agreed. She smiled a little, wisely. "You're surprised at my—at the way I take it, aren't you, Phil?"

"Why, I know what you think of newspapers and reporters. And—I know you think marrying the right person is pretty important."

She nodded. "I've spoken my mind often enough, Phil," she asserted. "But I'm not at all sure my mind was right. You remember, Phil, I discovered something during your father's trial. He looked at her and she said: 'I realized that I loved him.'"

"Of course, mother."

"Not at all, Phil. There's no 'of course' about it." She said, half to herself: "I didn't love him when we were married. I lived down on the Cape, and his father had a cottage there. He was rather a splendid figure. I thought I was marrying well, marrying money and family and position. But almost at once after we were married I fell—passionately in love with him. Brides often do, you know. If their husbands are wise."

"And I loved him till seven weeks before Barbara was born," she said explicitly. "And I haven't loved him since, till— After a moment she said steadily, "Till I knew they would convict him and kill him, Phil."

He could not move or speak. He had only the vaguest understanding. He stammered something; and she said:

"It's curious, too, that there's no—desperation in my love for him now. At first the thought of what was to happen was terrible. And then it became unimportant. I have him now, and he has me; and no one, nothing, can separate us."

Phil said automatically, "Yes, mother!"

And she smiled like sun after rain. "So now nothing matters except that," she said. "But—I think when he is gone I shall join him pretty soon."

"Mother!"

"So I want Barbara to marry whom she loves," she said. "If it is Dan, it is Dan." She added, in a moment's weakness, "Only I shall need you both terribly for a little while."

"Good, mother—" He said that and no more; but suddenly he was afraid, thinking: She's lost weight lately. She looks—frail. Not tired. Strong—inside, but frail outside. He started to speak again, then saw her smile as she set end and Dan and Barbara, laughing together, came toward them here. They went into the house, and Linda arrived, and Mrs. Sentry left the four young people alone downstairs. They had tea; and talked idly for a while, and Barbara was more and more silent till Dan spoke to her.

"What's on your mind, Barb? Penny for your thoughts."

"I was thinking about Mac," she confessed. No one, for a moment, found anything to say; and she went on: "And about father. You all think he's guilty, don't you?"

She smiled a little, at their quick protestations. "All right, but I don't, you know," she said; and she confessed: "Oh, at first I did. I saw him come home that night, and I went into a sort of panic. We all did, I guess. I mean when he was arrested, and everything. We all lost our heads, believed all sorts of things."

"But I don't, now. I don't believe father would kill anybody! Not on purpose, anyway."

"Neither do I," Phil assured her, and she said:

"I don't see how the jury could think he did." But of course, I wasn't at the trial. And she asked directly: "What happened? Tell me about it."

Dan urged, "You'd better forget it, Barb."

But Phil said honestly, "Father admitted he killed her, Barbara. He said it was an accident, but the jury didn't believe him." And he urged: "But—there's no use talking about it. You'll just get yourself sick again."

Barbara half smiled. "You're both awful towards," she told them. "Like ostriches." And she appealed to Linda. "Linda, you tell me about it."

Linda shook her head. "I didn't even read the papers, most of the time, Barb. I just stayed here with you, or stood by in case Phil wanted me."

Barbara nodded. "I know." She smiled in affectionate derision. "You and your Phil!" She appealed to Dan. "You were there in court every day," she remembered, and she began persistently to question him, and Dan preferred to answer,

little by little she drew from him the whole dark tale. Except that he did not speak of the uglier part of Mr. Sentry's testimony.

She urged at last, acutely, "But Dan, if father did shoot her, and the revolver was touching her, he would have felt it, would he not?"

"He said he didn't feel anything."

"Then if he didn't, someone else shot her. She must have been already dead, before he got upstairs there."

Phil said unhappily: "Barb, father shot her all right. He said it was an accident, and—I think it was. I believe him; but the jury didn't, and they were the ones to decide. That's what juries are for."

"But suppose they found another bullet?" she argued. "Then everyone would have to believe him!"

Phil caught Linda's eye. "Linda and I have already looked," he said. We went over the place with a fine-tooth comb; but we didn't find a thing."

And suddenly it was June. In May, July had seemed far away, but now it was just around the corner.

On the third of June, Mr. Falkran telephoned to ask whether he could

ran explained: "that Mr. Hare agrees with me that an appeal to the Governor is justified. Mr. Flood, as I said, will not oppose it; and I have consulted a number of Mr. Sentry's friends."

And he went on, "The first step would be to have a hearing before the Governor and Council; to present evidence as to Mr. Sentry's life and character, and to call attention to some points in the evidence at the trial—the possibility of accident."

"A public hearing?"

"Yes." He added quickly: "But you would not need to attend that. Only afterward, you would want to make a personal appeal to the Governor."

"She passed her hand across her eyes. 'When?' she asked, in a whisper."

He said thoughtfully: "I should first lay the groundwork. Perhaps in two or three weeks. Say the third week in June."

Mrs. Sentry rose, clinging for a moment to the arms of her chair, then standing erect. She caught Phil's arm, supporting herself so.

"Very well," she promised. "If you advise it, I will do it."

But when Falkran was gone—she

Mrs. Sentry read the letter and handed it to Phil; and this time she did not protest when he threw it into the fire.

The days were gone like the fanned pages of a book, so swiftly that it was scarce possible to name them as they passed. Twice or thrice Falkran came to report that the foundations for the appeal to the Governor were being laid. Phil could see his mother muster strength for that ordeal.

Till at last the lawyer telephoned, late one afternoon, spoke to Phil. "Can Mrs. Sentry see the Governor tomorrow?" he inquired. "If she can, I will make the appointment, come to fetch her."

Phil asked dumbly: "What time?"

Falkran said: "At two, if that is convenient for both of them. Will that suit her?"

Barbara at the moment was upstairs; but Mrs. Sentry was in the living-room and Phil went to ask her decision. He saw her quiver at his words, as though staggered by a physical blow; but then she nodded.

"Will you go with me, Phil?"

"Of course," he assured her, returned to tell Falkran her answer. While he was at the phone, he heard the doorbell ring, wondered who was there, heard Nellie go to open the door.

When he came again to his mother, Mrs. Sentry said: "But I don't want Barbara to go with us. She need not even know. She must stay here. I will want to—come home to her, afterward."

Phil had time to nod, and then he saw Dan striding toward them through the hall. "Hallo!" Dan cried, and his eyes were shining. "Where's Barbara?" He snatched a telegram from his pocket, thrust it into Phil's hands. "Read that, old man!" he cried. "I've been working on it for two months, trying for that or something like it."

The message had been sent, Phil saw, from Cleveland. He read, aloud:

"Salary O. K. Start July 1."

"W. E. Robinson."

He looked at Dan. "What is it?" he asked.

"Plenty!" Dan told him exultantly. "It's the city editor's job on the Swift-Towne paper in Cleveland, and a salary to boot. Enough to get married on. Where's Barbara?"

"Barbara?" Mrs. Sentry spoke in a whisper.

"Of course!" Dan hesitated. "I'm sorry, Mrs. Sentry. I forgot you didn't know. I've been trying for weeks to land a job somewhere, so I could take her away from here."

"Away?"

"We're going to be married, Mrs. Sentry."

Mrs. Sentry seemed to sway a little. She extended her hand toward Phil, as though for support; but, misunderstanding, he gave her the telegram, and saw her read it dumbly, and saw her clasp her arms tight across her sickening pain, he turned again to the other man, arguing in an empty fulfury:

"But Dan—right now—What's the hurry?"

Dan gripped his arm. "Plenty!" he said soberly. "You know it, Phil." He looked at Mrs. Sentry. "You know what I mean. It's almost July. I've got to get Barbara away before that!"

And when they did not speak, he urged: "Come on, Phil, Mrs. Sentry. I know you're with me! Please!"

Mrs. Sentry smiled. "Yes, Dan," she said. "Barbara's upstairs. Go to her!"

Dan gripped her hand, raced away. Phil looked after him for a moment, not daring to look again toward his mother.

(TO BE CONTINUED)

"Read That, Old Man!" He Cried.

see Phil and Mrs. Sentry that evening. Mrs. Sentry bade him come.

Mr. Hare had suggested to Phil long ago that a commutation might save Mr. Sentry's life. Phil had not mentioned the possibility to his mother; but when she told him, on his return from the office that day, that Mr. Falkran was coming in the evening, and wondered why, Phil remembered Mr. Hare's remark months before.

"I expect," he said, "he wants to discuss asking the Governor to commute the sentence to life imprisonment."

Her pupils dilated; her eyes widened. "Oh!" she murmured.

He reflected: "We don't want Barbara here when he comes. I'll ask Linda to take her away somewhere, on some excuse." And at his mother's assenting nod he went to the telephone.

Linda was quick to do what he asked. So when at a little after eight Falkran rang the bell, Phil and his mother were alone; and Phil himself went to the door.

"During the trial, I did my full duty as I saw it," Falkran said. "I used every means I could discover to secure at least a disagreement. Regardless of a client's guilt or innocence, he is entitled to every legal protection. If his fate is in a jury's hands, then he has a right to expect that every possible means shall be used to create a doubt of his guilt in the jury's mind. I did all I could."

Mrs. Sentry nodded. "I know," she smiled. "I did all I could too, Mr. Falkran."

"Yes," he agreed. "We all did. Barring the possibility that higher courts might have found some error by the State, Mr. Sentry had every protection. But he didn't want to appeal on technicalities. And the jury believed him guilty."

He hesitated, then went on: "Yet there are grounds for asking mercy for him too. Not a pardon. We cannot hope for that. But a commutation is possible. District Attorney Flood will not oppose it. Of course, he cannot support our petition; but he will stand neutral. Mr. Sentry's character, his long and honorable life, all count in his favor. And—it is always possible that the tragedy might have been an accident, as Mr. Sentry testified."

Mrs. Sentry considered for a while, sitting very quietly; so that Phil came to her side and she held his hand while she faced the lawyer.

"What would we do?" she asked then. "What is the procedure?"

"I want you to understand," Falk-

had held fast to Phil, so that the lawyer went alone to the door—she said in a low tone, "Don't leave me, Phil."

"Of course not, I won't."

"I'm all right," she whispered, "as long as I have you and Barbara." She added, smiling weakly: "At least I think I am. But it will seem strange to me to beg!"

"Father wouldn't want you to, mother!"

"I think I shall be proud to do it," she replied.

They had another letter from Mary; this time from Paris, brief, defiant. She wrote:

Dear Mother:

This is just to keep you all in touch with my progressing career. Of course I have occasional news of you, via voice and in the well-known public prints; but I haven't broken into the newspapers yet.

I ran into Jimmy Endie the other day. He's not a bad chap unless you're married to him. Also Gus Loran is here. Mrs. Loran is treating herself to Paris diversions. I seem to fascinate her. My fat baby, he's cute. But of course, Argentine, my pretty little beef baron—did I tell you we were married—is terribly jealous. Maybe he'll take her home and make me get pampas and—long and—long—long—ever know whether you try them or not? Having a fine time. Wish you were here.

Mary.

Motions of Moon Are Proved by Modern Theory Developed After Lunar Research

Six automatic computing machines as large as pianos, operating for two years in Columbia university's astronomical laboratories, have verified the modern theory of the motions of the moon, which was developed after lunar research and calculations by Prof. Ernest W. Brown, Yale university astronomer and mathematician.

Professor Brown's theory has enabled astronomers since 1923 to make accurate predictions of eclipses and calculate the position of the moon at any instant. The Yale scientist collaborated with Prof. Wallace J. Eckert of Columbia, who supervised the system of automatic astronomical computation, in proving the original findings.

The machines, according to Professor Eckert, showed that Newton's law of gravitation had been applied accurately in the lunar theory and that the mathematical tables of the moon's position and motion, published by Professor Brown more than 15 years ago and used since then by navigators throughout the world, were entirely correct.

Operation of the machines, perfected two years ago by Professor

Eckert for exclusive use in intricate astronomical work, is based on the "punched card" method of tabulation, first devised by Herman Hollerith in compiling the United States census of 1890. Holes representing mathematical figures are punched into small cards, which are fed into a tabulating mechanism at the rate of 7,000 to 8,000 an hour. The cards move from the sorting machines to other machines which add, subtract, and multiply by means of electrical contact. More than 250,000 such cards were employed in the lunar research. The first 5,000 cards were hand-punched from Professor Brown's data, and the rest were perforated by the machines.

Whales Named for Appearance

The bottlenose whale and the humpback whale are named for their appearance, but the largest creature that ever lived on earth, bigger than elephant or prehistoric monster, is the blue whale or Sibbald's Rorqual, named after the Scottish naturalist, Sibbald, who first described it. It sometimes exceeds one hundred feet.

WHO'S NEWS THIS WEEK

By LEMUEL F. PARTON

NEW YORK.—Mrs. Ella A. Boole, the iron chancellor of prohibition, goes into action again, with Sen. Morris Sheppard of Texas and several other famous old-time dry leaders who think they see a new and arid day dawning. A friend of this writer, scouting material for a magazine article on a trip through the Middle West, says the dries are coming back like an army with banners. Too many saloons, too much educational elbow-bending, too many tangles between barkeepers and automobiles, too much cutting of corners to meet heavy tax and license costs—all this, and more, is rallying the dries for a return engagement, say the above and other detached observers.

The massive and deliberate Mrs. Boole is 80 years old and looks much less. In New York, she addresses the luncheon of the state W. C. T. U., commemorating the centenary of the birth of Frances E. Willard, founder of the W. C. T. U. Her firmly set spectacles with gold bows, her crown of abundant white hair, the stern godliness of her features all are as they were. Nothing whatever has been revealed in Mrs. Boole's person or ideas.

For more than 50 years she has been fighting alcohol. With her husband, the late William H. Boole, pastor of the Willett Street Methodist church, she waged war against the Bowery dives, away back in the eighties. She had come from Wooster, Ohio, an alumna of the University of Wooster, where, immediately after her graduation, she had taken up her life-work for prohibition. From 1903 until 1910, there was no important piece of anti-liquor legislation in which she did not participate.

In 1925, she became national president of the W. C. T. U., and, in 1931, world chairman. During the prohibition years and in the preceding years of strife, she was the head of the combined prohibition board of strategy, shrewd, resourceful, tireless. Fittingly, her citadel is still a little Van Wert, Ohio, hedge-bordered house, set down in Brooklyn, holding its middle-western ground far in the enemy territory. As does Mrs. Boole, still standing firm and unshaken in her battle-axe shoes,

IN THE last 14 years, Dr. Donald A. Laird of Colgate university has written 14 books and 500 articles, but has inspired many more than that. He has been— heaven's blessing to the make-up man, needing a snappy little box to dress a page. As Dr. Laird retires, to engage in research at the callow age of 41, here are just a few of his stimulating findings:

Horizontal thinking is best. It is quite possible that a new stage of evolution is setting in which will take us back to all-fours.

When you feel jittery, snay up some red meat.

Some cases of second sight are explained by an odorless scent which is almost, but not quite, well up into consciousness.

If you feel rotten today, you will be happy in just 23 days, as that is the life-ordained cycle of hope and despair.

The Dionne quintts are in danger of growing up to be maudliners—on account of women nurses and governesses.

Brains are sluggish in summertime.

Eat candy to fight off sleepiness at work.

Never count sheep to put yourself to sleep. It doesn't work.

Noise makes city people smaller than country people.

Women employees are more adaptable than men and stay longer on the job.

Many of these discoveries have been made by Dr. Laird in his research as a consultant for concerns in heavy industries, in which field he has been busy and distinguished. He is a world authority on noise and sleep. Farm-reared in Indiana, he was educated at the Universities of Dubuque and Iowa and taught at many universities before joining the Colgate faculty 14 years ago. He has been out in front in the above novel ideas, with the exception of the one about our getting back to all-fours. That has been evident for at least seven years, as revealed by prevailing trends in world politics.

Knitted Rag Rug to Make in Soft Colors

By RUTH WYETH SPEARS

HERE is news for those who have been writing me for more rag rug designs. A special Rag Leaflet has been prepared for you. It will be included free upon request with your order for the two books offered hereafter. If you already have these two useful books, send 6 cents in stamps for the Rag Leaflet.

Wooden knitting needles 3/8-inch in diameter are used for this rug. Cut or tear the rags 3/8-inch wide and knit them in strips 10 inches

wide, changing colors every 10 inches by cutting the material close to the needle and sewing a new color to it.

When three strips have been knitted with the colors arranged as shown here, sew them together on the wrong side with heavy carpet thread. Use a crochet hook of about the same size as the knitting needles for the edge of single crochet.

NOTE: Be your own decorator. Make new draperies; curtains; slipcovers; bedspreads and dozens of other things for every room. Mrs. Spears' Sewing Book No. 1—"SEWING for the Home Decorator," shows you exactly how, with step-by-step illustrations. Book 2—"Gifts, Novelties and Embroidery," shows you how to make fascinating things from odds and ends and will save its cost many times. Books are 25 cents each; if you order both books, the Rag Leaflet is included FREE. Address: Mrs. Spears, 210 S. Desplaines St., Chicago, Ill.

SAFETY TALKS

Crossing the Road

HERE'S the modern counterpart of the ancient chicken power:

Why does a pedestrian cross the road—at the wrong places and without looking?

That's what the National Safety Council is trying to find out after an examination of its records which proved that at least a third of the pedestrians killed in rural areas and 40 per cent of those killed in cities were crossing at places other than intersections.

In 1937, the loss of life from these classifications mounted over the 5,000 mark.

TRUE!

"Like lemons, Luden's contains a factor that helps contribute to your alkaline reserve. I prefer Luden's."

EDNA RIGGS, *Lecturer, Los Angeles*

WANTED -- Some fifty
to seventy-five pound
shoats. THE TITSWORTH
COMPANY, Capitan, N.
M. J 26-11

Mr. Manuel Corona, merchant
from San Patricio, and probate
judge from 1932 to 1936, was a
business visitor in Carrizozo last
Saturday, and while here renewed
his subscription to the News.

Buster Walker came over from
Artesia last Sunday to visit his
mother.

Mrs. Edith Beck of Alamogordo
visited in Carrizozo last Sunday.

Mrs. Lester Greer was a busi-
ness visitor here last Monday
from Three Rivers.

Mrs. Edgar Phillips underwent
a major operation at the Turner
Hospital last Friday.

Miss Judy Pilant entered the
Turner Hospital last Friday for
an appendicitis operation.

For sale or trade--1935 Chev-
rolet truck, long wheel base. Will
trade for light car. Ford or Chev-
rolet. See Buster Graves, No-
gal, N. M. 11-pd

Mike Doering has carpenter's
and painters working on his hotel
making it over into an apartment
house suitable for two families.
Mike intends to take life easy this
summer and do a lot of traveling,
first visiting relatives in Oregon,
then to the fair in San Francisco,
later going to the World's Fair in
New York City.

Mr. and Mrs. Dink Myers and
daughter were in Carrizozo Mon-
day.

Bradley Smith and Gene Dow
went to Roswell Monday.

Mrs. A. Howe and daughter,
Anna Res, of Hot Springs,
brought Mrs. Von Gleason over to
visit her daughter, Mrs. Jess
Dillard last Sunday. They re-
turned home Monday.

Mrs. Rys and Mrs. Kilgore, of
Bingham, were here Sunday.

Mrs. Gordon Wells, of White
Oaks, was in town last Saturday.

Just received -- Car of
cake. Special prices in
quantities. The Titsworth
Company, Inc.

A snow storm supplied some
welcome moisture for the valley
the last few days, and the
prospects are good for a
heavier snowfall. The mountains
around Ruidoso are furnishing
entertainment for a great many
who enjoy winter sports. An
estimated crowd of one thou-
sand was there last Sunday to
look on and to take part in the
sking which is as popular there
now, as it is at Cloudcroft.

Senator Carl A. Hatch states
that the Hondo flood control
project will likely be approved.
He is preparing a statement for
use by the interior department.

Rabekas, remember the regular
meeting tomorrow afternoon at 2
o'clock. Refreshments will be
served after the meeting.

Renewals for this week are
Mrs. Meda C. Haley of Albu-
querque and Mr. John Miller
who is spending the winter in San
Antonio, Texas. Mr. Miller in-
tends to return to Carrizozo
sometime in March.

The Lincoln County Chapter
of the American Red Cross has
received from Headquarters an
honor certificate for accomplish-
ment in the recent roll call.
Total, 163 members.

Mr. Roman C. Nunez of San
Patricio is a member of the jury
in the W.P.A. fraud trial which is
being held in Albuquerque.

Rev. Cochran, wife and baby
arrived last Monday and are oc-
cupying the Baptist parsonage.
Rev. Cochran is the new pastor
of the congregation.

Mrs. Mary Hice and daughter,
Miss Annette Stout, are visiting
Mrs. Holguin and family.

The Cedar Creek road is being
improved to the new ski-way,
which is becoming so popular;
also the Devil's Canyon road
from Bonnell's ranch to Ft. Stan-
ton is undergoing improvements.

Dr. F. M. Johnson and Mr. W.
F. Hart were here from Ruidoso
Monday evening, consulting with
the Chamber of Commerce in
regard to improving the road
between Ruidoso and the Nogal
cut off from Highway 380, also to
discuss plans for the Cuarto Cen-
tennial to be held in 1940.

ANCHO NEWS

Mr. and Mrs. Bryan Hightower
and son, John Allen, spent Sat-
urday and Sunday in Albuquer-
que visiting their daughter and sister,
Miss Miriam. They drove thru
in their new Chevrolet.

Mr. R. M. Clayton and son
were in from their ranch Tuesday
afternoon.

Mr. and Mrs. Jack Cleghorn,
of White Oaks, spent last Wed-
nesday night with the Goodsons
at Luna.

The addition which is being
built to the Barney Wilson home,
is nearly finished, and looks very
nice from the Jicarilla hi-way.

Mrs. J. W. Balow left Saturday
for Sweetwater, Texas, for treat-
ment by a specialist. We hope
for her speedy recovery and re-
turn home.

Mr. and Mrs. Fred Dale spent
most of the week at Socorro.

Mr. and Mrs. John Bell were
in from their Jicarilla home Wed-
nesday.

Mrs. Perry Melton moved to
town this week for the remainder
of the winter.

Mr. and Mrs. J. W. Hall and
Miss Harris are visiting in Texas
for several days.

Mr. and Mrs. Bill Nickles
spent last week-end in El Paso on
business.

Salamon Aragon had a break
down with his school bus Tues-
day morning.

Mr. and Mrs. Jap Lewis and
family moved from their ranch
near White Oaks, to the Chas.
Peters ranch for this year. We
welcome the new neighbors to
Ancho.

Mr. and Mrs. L. P. Hall were
in town from their ranch Wednes-
day on business.

Mrs. John Dale and son, Elmo,
were Carrizozo business visitors
Wednesday.

Mrs. Juanita Fausta's daugh-
ter, Catalina, is home after sever-
al weeks' visit in Alamogordo.

Large Rail Orders Placed By S. P. Co.

Southern Pacific Company has
placed orders for 40,000 gross tons
of steel rail, representing a total
of \$1,750,000, to fill its require-
ments for 1939, according to an-
nouncement by A. D. McDonald,
president.

The orders will be divided be-
tween Columbia Steel Company
Bethlehem Steel Company, and
the Colorado Fuel and Iron Cor-
poration.

For use with the rail, a large
tonnage of rail joints, tie plates,
track spikes, bolts and other fit-
tings, with an approximate value
of \$850,000, will be ordered short-
ly, it was announced.

Basketball

Last week the Carrizozo "Griz-
zlies" marked down two more vic-
tories. Friday the boys played at
Hondo; the score was 30-22,
Saturday night they won over
Corona by a score of 55-23.

Tonight the "Grizzlies" meet
Capitan on the local court and
we feel that this game will be a
"whopper." Coach Caton has
had his boys doing plenty of hard
workout as they are determined
to get revenge on the Capitan
team.

Saturday night the team goes
to Cloudcroft, where we again
hope to defeat them. The last
game with Cloudcroft was a good
one, and this one is bound to be
good too.
