**OLD AGE.**  
Oliver Wendell Holmes—Atlantic.  
The feeling must of necessity come to many aged persons that they have outlived their usefulness; that they are no longer wanted, but rather in the way, drags on the wheels rather than helping them forward. But let them remember the oft-quoted line of Milton:  
"They also serve who only stand and wait."

This is particularly true of them. They are helping others without always being aware of it. They are the shields, the breakwaters of those who come after them. Every decade is a defense of the one next behind it.

At 30 the youth has sobered into manhood, but the strong men of 40 rise in almost unbroken rank between him and the approaches of old age as they show the men of 50, and sees behind them a row of sturdy sexagenarians. When 50 is reached, somehow 60 does not look so old as it once used to, and 70 it still afar off. At 60 the stern sentence of the burial service seems to have a meaning that one did not notice in former years. There begins to be something personal about it. But if one lives to 70 he soon gets used to the text with the three score years and ten in it, and begins to count himself among those who by reason of strength are destined to reach fourscore, of whom he can see a number in reasonably good condition. The octogenarian loves to read about people of ninety and over.

He peers amongst the asterisks of the triennial catalogue of the university for the names of graduates who have been seventy years out of the college and remain still unstarred. He is curious about the biographies of centenarians.—Such escapades as those of the terrible old sinner and ancestor of great men, the Reverend Stephen Bachelder, seem to interest him as they never did before. But he can not deceive much longer. See him walking on a level surface and he steps off almost as well as ever, but watch him coming down a flight of stairs, and the family record could not tell his years more faithfully. He cut you dead, you say? Did it occur to you that he could not see you clearly enough to know you from any other son or daughter of Adam? He said he was very glad to hear it, did he, when you told him that your beloved grandmother had just deceased? Did you happen to remember that, though he does not allow that he is deaf, he will not deny that he does not hear quite so well as he used to? No matter about his failings; the

longer he holds on to life the longer he makes life seem to all the living who follow him, and thus he is the constant benefactor.

**The Chinese Theory of Evolution**  
The rocks are bones of the divine body, the soil is the flesh, the metals are the nerves and veins; the tide, wind, rain, clouds, frost and dew are all caused by its respirations, pulsations and exhalations. Originally the mountains rose to the firmament and the seas covered the mountains to the tops. At that time there was, in the divine body, no life but the divine life. Then the waters subsided; small herbs grew, and in the lapse of cycles developed into shrubs and trees. As the body of man, unwashed for years, breeds vermin, so the mountains, unlaved by the seas, breed worms and insects, greater creatures developing out of lesser. Beetles in the course of ages became tortoises, earth worms became serpents, high flying insects became birds, some of the turtle doves became pheasants, egrets became cranes and wild cats became tigers. The preying mantis was by degrees transformed into an ape, and some of the apes became hairless. A hairless ape made a fire by striking upon a rock, and, with the spark struck out, igniting the dry grass. With the fire they cooked food, and by eating warm victuals they grew large, strong and knowing, and were changed into men.—Popular Science Monthly.

**Appreciate This World.**  
Nothing has so retarded human happiness as the inability of man to appreciate this world. He has never attempted to study it deeply and has railed at it more than he has loved it. All the great characters who have ever come to our globe with a message have brought the one inquiry: Oh child of earth why do you not appreciate more highly the spiritual side of your world? Every great poet, every great thinker, every great moralist has urged humanity to unveil more moral beauty and to dig out of the fertile ground more mental happiness. Lord Bacon said: "Why do you not develop your world?" Newton said: "Your world is infinite." Washington and Lincoln said: "Why do you not reach a more perfect liberty?" The poets all say: Why do you not walk upon greener grass and among sweeter flowers? Do your feet prefer thorns? The musicians says: Why do you not weave out of life a better song? And then comes the greatest messenger of all and he asks why your world is not covered over and over with peace for each nation and good

will toward men. Led by all these invitations from human and divine genius, you should all reach the assurance that the human family, coming from an infinite Creator, must be carrying a great happiness in its heart and must be marching through a rich world to a rich destiny.—Professor Swing.

**THE SANTA FE ROUTE.**

This is the short line to and from points east to White Oaks, Ft. Stanton, Lincoln, and all stage stations in Lincoln County. Close daylight connections are made by stages to and from above points with trains from Carthage, Engle and Las Cruces, which have through sleepers to Kansas City, Chicago, St. Louis, and New York, without change.

Connection is made at Albuquerque with through trains for all California points. These trains are unsurpassed in modern improvements with luxurious day coaches and emigrant sleepers, the latter under the management of the Pullman company, are furnished with elegant curtains and clean bedding at a small cost per night. Shippers will find it greatly to their advantage to consign all freight via. The Santa Fe route, a saving of from three to five days time will be gained from all eastern and northern cities.

Freight from Chicago and points west of Chicago is brought through without transfer, thereby saving breakage and delay.

Call on nearest agent for rates and information, or address C. H. Morehouse, Division Freight and Passenger Agent, El Paso Texas.

**Justices of the Peace,**

Justice courts are as old as the government, but their antiquity makes them none the less faulty, and there is a growing sentiment among lawyers to procure the abolition of the jurisdiction of these courts and restrict the justice to the mere issue of process returnable to the higher courts. With exceptional cases, the entire system of judicial proceedings before them is a mere travesty upon justice. This state of things does not proceed from any moral turpitude on the part of these men, whose duty it is to conserve the peace, but in the majority of cases, from downright, yet excusable ignorance. It cannot be expected that men who are not lawyers should, in this country, at least know the law, and it is ridiculous to see a lawyer before the majority of these courts, even in educational centers, making an argument on a proposition of law before "his honor," who has about as much idea about what the court should "rule" as a pig does about the manipulation of the electric telegraph.—Democrat.

**LINCOLN ITEMS.**

From the Independent.

E. W. Dow, who has the contracts for the new buildings going up at Fort Stanton, is pushing the work through in good style.

Miss Harriet Robertson, who spent last winter in this section, has returned from the north and is visiting friends at Fort Stanton.

Hon. Frank Lesnet, Receiver of the Roswell Land Office, returned to his post of duty yesterday, after spending a week with his family and friends in Lincoln. Jack Thornton took him back.

Our county treasurer, G. R. Young, came over from White Oaks last Friday, and was busy all day Saturday cashing county warrants and attending to other duties. He is always a welcome visitor to our berg.

Rev. Dr. Lane and family and Mr. Geo. Ulrich, of White Oaks, favored Lincoln with a visit Tuesday and Wednesday, of this week. On Tuesday night Dr. Lane delighted an audience of our people with a lecture, taking the "Sandwich Islands" as his subject. He resided in that interesting locality for two years, and his account of the manners and customs of the natives, together with a graphic description of the volcanic and other wonders, held his listeners spell bound, and made them regret that they could not have the pleasure of oftener listening to the learned orator. Whenever Dr. Lane chooses to visit Lincoln in future, he may always be certain of a cordial welcome.

**Territorial Items.**

From the Citizen,

There are 103 pupils in attendance at the public schools in East Las Vegas. The prevailing disease, la grippe, has compelled about fourteen of the pupils to remain away from school, but nearly all of them are well now.

The Agricultural college at Las Cruces, offers to the youth of New Mexico, a splendid opportunity to secure a practical education at less expense than any where else in the territory, and just as soon as the United States Experiment station is in operation, the poor but industrious young man can pay the entire expense while attending college by working on the government farm.

John King, of San Pedro, reports that in the tunnel of the Lucky, at a depth of 1,100 feet, a body of hard carbonate was struck which carries 100 ounces of silver.

General Meily, of Santa Fe, who was in Columbus, where his brother-in-law, Col. Brice, was nominated for the United States senate, sent an enthusiastic telegram to friends in Santa Fe.

Adna Lamson, will establish an office on the west side of the plaza, at Socorro, for the transaction of a general mining transfer business.

## A Manufacturer on the G. O. P.

A. B. Capron, a prominent New England woolen manufacturer writes the following letter to Wade's Fibre and Fabric, a Boston trade Journal which supported the Republican ticket last year, but now advocates free wool: "I am beginning to think that the vote I cast, up in New Hampshire, was a mistake. There are no signs, present or future, that the election of Harrison is going to be of any benefit to the woolen industry, and there is a clamor all along the line of the woolen men for almost the exact amount of 'free trade' Cleveland recommended in his 'free trade' message. The facts are coming to the surface, and they are the only things which have come out of this free trade eruption. The wool supply and perforce the number of sheep are rapidly diminishing year by year, in spite of protection. Bunching figures doesn't befog this fact. Now the question properly comes in. 'Where is the blame?' On the wool, on the sheep or on the protection?—which don't seem to protect enough to hurt. The things don't mix anyway. The pauper labor cry is a humbug. The difference in cost of labor between Europe and America is not the difference which enables those 'foreign cusses' to shut us off from making the class of goods they send over here. If we did not pay a blamed cent for labor, they could do just what they are doing all the same. We can make cheap goods just as cheap as they can, because our cheap wool is free. Perhaps you are a party man; I am not. Through my glasses I see nothing but humbugging on the part of the G. O. P. Through the mouths of its speakers it shield the truth like a son of a gun. I thought myself too old a bird to be caught with political chaff, but they stuffed it down my throat, and I was such a dogged fool I didn't choke. Which way shall we turn for wisdom? The doctors disagree, and the free trade and protection devil is after the hindmost man. Protection does not amount to much and free trade don't free anything up to date. Don't mistake me. I believe in protection that protects, but I don't believe in the kind of protection which lets the foreigners in on top of us. That kind of protection makes the 'gag' however much Republican tally there is in it."—National Democrat.

From the rumblings heard in all directions, we are encouraged to look for great developments in railroad construction during the year 1890, in this Territory, and we augur from them that White Oaks and Lincoln county is an objective point for some of them. The El Pasoans are making strenuous efforts to get the El Paso and White Oaks road started up again, and there are some well balanced heads who predict that the Santa Fe will be the first to deliver us from our isolation by railway communication with the outside world. We would welcome either, or any, with joyful acclamations.

It is not unreasonable to believe that before the expiration of the year, a railway, and may be two, will be well advanced on their way hither. We are satisfied that the resources and developments of Lincoln county demand and will receive recognition by the railway people. There is a growing demand for our coal, and none deny the immensity of our coal measures, and the more the gold mines become developed, the more productive they are. For the conservation of their own interests the railways must come.

Let us have honest politics. The American people declared in the first presidential election that they wanted higher duties and they ought to have them. When they change their minds and want free trade or free raw materials they can make this known at some future election. If there are Republicans who now want free wool or free coal or free iron, or any other free raw material, or reduced duties on such things, they forfeited by their vote in the presidential election any right to be heard now.—N. Y. Herald.

The editorial convention at Albuquerque was not a success in point of numbers, but it was not altogether a failure either. Eight great heads were present, not including the Albuquerque editors, who themselves, would make a very respectable convention in point of ability. We regret to note that both Gov. Ross and Max Frost declined to attend, each for fear that the other would be present.

## The Wars and the Tariff.

Even with this assumption, a less adroit disputant might be handicapped by the well known fact that the United States has never had free trade; but Mr. Blaine treats a tariff which is not so high as protectionists desire as in all respects equivalent to free trade for the argument. He ascribes the hard times which set in about 1819-20 to the low tariff of 1816, the panic of 1837 to the sliding scale of the tariff of 1832, the panic of 1857 to the low tariff of 1846.—When he reaches the panic of 1873,

he ascribes that to the loss and waste of the war. Singularly enough, one reason why the tariff of 1846 did not do its work earlier—in the opinion of Mr. Blaine—was the war with Mexico. We thus arrive at the conclusion that the war of 1812-15 had nothing to do with the panic which followed it; that the war with Mexico postponed the panic for a time, and that the last war was the sole cause of the panic of 1873. It is needless to say that, by such a method of treatment, the facts of history may be made to prove one thing as well as another.—Courier Journal.

The New Mexican of the 14th, gives the following interview, which will be of interest to our many readers, who are interested in statehood.

J. A. Erwin, esq., editor of the Roswell Register, is visiting Santa Fe to-day. He said to a New Mexican representative this morning Lincoln county could be relied upon as certain to send up a big majority in favor of statehood for New Mexico. The sentiment of the Democrats there is that they would rather see a Republican state than a Democratic territory. "I am not in favor, however," said Mr. Erwin, "of agitating statehood on party lines. It is a question of overtopping importance to the commonwealth and not of moment to either one party or the other—not a political question at all. In this way are the people of Lincoln county in favor of it, Democrats and Republicans alike.

I believe a majority of the people would vote to sustain the constitution already framed, but at the same time they have an abiding faith that congress at its present session is going to give New Mexico an enabling act, providing for a new constitution, and if this is done, it would be better all round, and the Republicans and the Democrats of Lincoln would ignore party lines and send the best delegation possible as representatives in the new convention.

## A NEW DISTRICT WANTED.

Mr. Erwin said there was another question of public note which Lincoln citizens were greatly interested in just now. They want a new judicial district, to be composed of the counties of Lincoln, Chavez and Eddy, the latter coming in as full fledged counties on January 1 next. Said Mr. Erwin: "Roswell is over 250 miles distant from the headquarters of the present district. This great stretch of travel deprives our people along the Pecos region of chancery business almost entirely. Clients can not pay attorneys for going to Las Cruces to attend to their business. Eddy is worse off than Roswell by at least 100 miles. The district as now constituted is overburdened with

work, and every reason exist why a new district should be established. The question of headquarters for the new district is one that can settle itself at home. We want congress to give us another judge and we believe we will succeed. I have spoken to Judge McFie on this subject and he is for it. I believe the supreme court will indorse it, provided the Bar association take up the question and recommend it at its meeting on the 20th inst. Mr. Joseph has promised to help us in congress, and we have other friends there. With that support at home which the exigencies of the case demand I believe New Mexico can secure from congress an additional justice at the same time that similar relief is granted Idaho and Wyoming, both of which territories are now agitating the question at Washington.

## Ohio's Governor is.

Columbus, Jan. 14.—Gov.-elect James B. Campbell took his oath of office at noon yesterday. The message is comparatively brief.—He strongly commends the system of ballot reform commonly called the Australian system, and sketches briefly the successes which it has met in other countries and states. The argument that it will be a hardship to illiterate voters is substantially answered.

It is strange that the Republicans have not thought of applying the Australian system to congressional elections in the south. If a fair vote and an honest count is what they want in the southern states why do they not suggest the system they favor for the Democratic city of New York? It is because they do not want a fair vote and an honest count. They want to fill the polling places with an army of Republican election officers who will declare the result wished for by the party leaders. An honest southern election is the last desideratum of the Republican party; they want the count.—New York World.

A New England clergyman is reported to have said that no newspaper which took truth for its standard would make a pecuniary success. The press might return the compliment by remarking that no minister who told the truth about his congregation, alive or dead, would not occupy the pulpit much longer than the Sunday afterwards. The press and clergy go hand-in-hand with the white-wash brush; rosy spectacles magnify little virtues, and kindly throw deformities into the shadows of oblivion. The pulpit, the pen and the gravestone are active partners in saint making.—Citizen.

Jas. J. Dolan receiver of the Las Cruces land office, has been censured by the senate.

The Supreme Court of Santa Fe, on Tuesday of this week, rendered judgment in the case of the Solitaire Mining and Milling Company, vs. J. M. Sigafus and others, in favor of the defendants, affirming judgment of the district court. This decision, (fortunately for the camp) settles, finally, one of the most famous mining cases of this Territory.

F. W. Tracey, president of the First National Bank of Springfield, Illinois, and Tingly S. Wood, the noted Colorado Mining expert, accompanied by judge W. A. Vincent and M. A. Otero, left last night for Carthage, from which point they go to the mining fields of Lincoln county to examine certain placer properties believed to be very valuable.—Optic 20th.

—The above mentioned gentlemen arrived here Tuesday and proceeded at once to the Jicarillas. They returned to White Oaks yesterday evening and left this morning for home, evidently well pleased with their visit. Page Otero came in with them.

TO MY PATRONS,

And the people of White Oaks and vicinity generally—When I first started in the grocery business in this place, I said that I would sell goods as low as any firm in White Oaks, would sell the same class of goods—and I believe that all my customers will testify, that I have kept my word—I will now repeat that no matter how they make their announcement, whether through mountebank cards in the papers, or the cheaper medium of tags on the articles to be sold,—that no firm in White Oaks, will sell goods of the same grade, any cheaper than they can be had by ordering from—yours truly.

JENKS' DREAM.

Jenks had a queer dream the other night. He thought he saw a prize-fighters ring, and in the middle of it stood a doughty little champion who met and deliberately knocked over, one by one, a score or more of big, burly-looking fellows, as they advanced to the attack. Giants as they were in size, the valiant pigmy proved more than a match for them. It was all so funny that Jenks woke up laughing. He accounts for the dream by the fact that he had just come to the conclusion, after trying nearly every big, drastic pill on the market, that Pierce's Pleasant Purgative Pellets, or tiny Sugar-coated Granules, easily "knock out" and beat all the big pills hollow! They are the original and only genuine Little Liver Pills.

Beware of imitations, which contain Poisonous Minerals. Always ask for Dr. Pierce's Pellets, which are Little Sugar-coated Pills, or Anti-bilious Granules. One a Day.

SICK HEADACHE.

Bilious Headache, Dizziness, Constipation, Indigestion, Eruptions, and all derangements of the stomach and bowels, are promptly relieved and permanently cured by the use of Dr. Pierce's Pleasant Purgative Pellets. They are gently laxative, or strongly cathartic, according to size of dose. Smallest, Cheapest, Easiest to take. 25 cents a vial, by druggists.
