GOLD AND SILVER ORES.

Successfully Treated By The Mc-
Arthur-Forrest Process.

From Sedalia (Colo.) Mail.

For years mining experts have
been endeavoring to secure a pro-
cess for the successful treatment of
refractory ores. The richest wealth
of the mountains is contained in
these ores and hitherto they have
baffled the most persistent efforts
of the miners.

The McArthur-Forrest process
does the work. A multitude of
tests have been made with the
most refractory ores and the most
skeptical have been convinced that
this is the process so long sought
for. The Gold and Silver Extrac-
tion Mining and Milling Co. has
been organized to introduce this
process. The officers of the
company are, Hon. H. W. A. Ta-
bor, president; Leonard Gow (Glas-
go), vice president; M. Ed Werner,
general manager; Peter McCourt,
treasurer, and T. L. Wiswall, sec-
retary. The company's offices are
at 14-18 Tabor Grand Opera house
block, Denver, Colorado.

The manager of the company has
paid the MAIL the compliment of
giving us the following announce-
ment of the company for first pub-
lication. It is a circular to the
public and we take great pleasure
in presenting it for the careful
consideration of miners and mine
owners:

THE GOLD & SILVER EXTRACTOR)
MINING AND MILLING CO.,)
DENVER, COLO., JUNE 28, '90.

DEAR SIR:—We take pleasure in
informing you of the formation of
the Gold and Silver Extraction
Mining and Milling Company
under the laws of the state of
Colorado.

The object of the company is to
introduce the McArthur-Forrest
process.

This purchase was made after a
very careful examination into the
legal standing of the patents, which,
according to the most able authori-
ties, are absolutely secure.

As for the practical working of
the process, we have a mill in
operation in Denver for the testing
of samples and for the treatment of
small lots of ore from 500 to 2,000
pounds.

If you desire an experimental
test send us a small, average
sample, from two to five pounds.
We will be pleased to test it free
of charge, and give full particulars
of these first laboratory tests.

If the results of this trial are
favorable we will then make ar-
rangements to treat a quantity of
1,000 to 2,000 pounds in Denver.

If you desire a further treatment of
one hundred tons or more we can
work that quantity in mills we
have especially constructed for this
process and have in successful
operation at Crestone in Saguache
county, and near Baker City,
Oregon. We will be pleased to
make arrangements after we have
thoroughly demonstrated the suc-
cessful treatment of your ores.

We are fully prepared to grant
royalties to mine and mill owners,
or rights covering different districts
and counties.

The process consists of pulveriz-
ing the ores to a fineness of about
fifty mesh, and the subjecting the
same to the action of a very dilute
solution of solution of cyanide,
a few tubes especially constructed
according to our diagrams, for
trituration, settling and filtering is
all that is required extra in con-
nection with any kind of pulveriz-
ing stamps or rolls.

The total cost as a rule does not
exceed \$5 per ton.

The most desirable class of ores
for this process are the so-called
refractory ores, pyrites, hemitites,
manganese and tellurium. We
have also treated successfully dry
silver ores.

We will be pleased to answer
any inquiries and furnish any de-
sired information.

Yours Very Truly,
M. ED. WERNER.

Harriet Beecher Stowe the au-
thor of "Uncle Tom's Cabin" says
the New York correspondent of the
Manchester Examiner, has become
hopelessly insane. Only a few
days ago she escaped from her keep-
er, and was found wandering about
the streets of Hartford, Connecti-
cut, with her hair dishevelled, her
shawl dragging on the ground and
a crowd of roughs and boys jeering
and shouting at her as they follow-
ed. The poor white haired old
lady smiled and talked to herself
as she tottered weakly along, mur-
muring, "Only a little way further."
Fortunately a gentleman, who had
happened to come along, with
some difficulty got her away from
the crowd, and back to her home.
She is perfectly harmless, and has
hitherto been permitted to wander
about the house without restraint.
Most of her time is spent crooning
old church hymns, which were
popular fifty years ago.

D. C. Nowlin, county sheriff, Geo. Curry, county clerk, Wm. Rosenthal, merchant, and J. K. Byers, county superintendent, all of Lincoln, were in Roswell last week. They assisted at the instituting of the K. of P. Lodge at this place.

A dentist has at last put in an appearance. Dr. Bearup, of White Oaks came in last week, and has opened his office two doors south of the Texas House. The Dr. is a first-class dentist and those who are in need of his service will find him a pleasant and courteous gentleman.

We regret to announce the illness of Col. H. Milne. His kidneys are diseased and there is but slight hopes of his recovery. Dr. Skipworth and Dr. Sutherland are tending him.

The following is an extract from a letter from A. Greene, an old-time resident of White Oaks, and now residing in Sonora, Cal. We have no doubt that it will be of interest to many of our readers, for which we are indebted to the courtesy of J. B. Slack, to whom it was written:

Sonora, Cal., July 1, 1890.
DEAR FRIEND:

I presume that by this time you think we all have forgotten you, but not so, we often think of you and White Oaks. Times are dull here, but we have plenty of vegetables and fruit and most everything we want to eat, but it is hard to get ahead in money matters, not much mining going on, in fact none except quartz, to speak of. The country is all taken up in ranches and men can not mine like they used to. You would not know the country if you were here again.

I will tell you what I can about Tommy Hawkins; I have been trying to find out all I could or I would have written you sooner. About the time of his death, he and I had made arrangements to go prospecting. He was to go out three or four miles from town to get a burro to pack our provisions—he left town early in the morning and as he did not return, I waited a week and as I could hear nothing from him I went and got the burro and went prospecting in the mountains alone, supposing that he had changed his mind and gone somewhere else. I was gone quite a while in the mountains and when I got back he had been found, it had been a little over three weeks from the time he left. He was found close to town in an incline tunnel probably 20 or 30 feet underground—he could easily walk down though the tunnel was low. He was as far back in the tunnel as he could get, lying with his feet close to the face of the tunnel lying partly on his side and back, his gun partly under his shoulder and his shoes off, his hat lying three or four feet from

his head. From all appearances he had just laid down and stretch-out. As to his effects I can find nothing except what he had on him and his blankets. He had \$9.00 and a specimen worth about \$9.00 and his gun with him. His grip-sack, I can't find out anything about and he ought to have had more money unless he had sent it home to his people. If you can find out where his people live let me know and who I can write to. Perhaps Dr. Paden or Jim Brent, or Charley Bull would know.

This leaves us in tolerable good health and hope it will find you well. We extend our best regards to all our old friends in White Oaks.
Fraternally Yours,
A. GREENE.

While gold is being exported from the United States, a fact used by the anti-silverites with the Eastern public to the prejudice of legislation in favor of silver—it is to be noted at the same time that the Bank of England is also losing her gold, while the Bank of France has increased in the last week her stock of gold as much as \$878,150, in a single week coupled with an increase of \$5,211,000. In other words, if our gold chances to be leaving us, it is going to a country whose people at this time have daily use at least \$18 per capita of silver for every man, woman and child.—Financial and Mining Journal.

Sugar cane, according to Mr. D. Morris, is nowhere found wild, and it has been supposed to have lost its power of producing seed. In specimens at Kaw Gardens, however, seeds have been found. This discovery is important, as it is anticipated that cross fertilization and selection of seedlings may greatly improve the plant.

The grippe, though it destroys fewer lives than some other epidemics, is one of the most distressing plagues that ever afflicted human beings. The work of the malady is yet visible. Thousands of people are still suffering more or less from the lingering effects of its dread hold upon them, and many curious results due to it are coming to light.

Why The Tiles Were Large.

The houses of ancient Rome previous to the war of Pyrrhus, were covered with boards, but afterwards with tiles; and, according to Vitruvius, and what remains of ancient monuments, these must have been of a large size, not less than two feet broad. Seneca speaks of a garret covered with one single tile. In the war against Marc Antony, the senators were taxed at the rate of ten asses (about twenty-five cents) for every tile on their roof; hence it was, of course, desirable to have tiles of as large dimensions as possible, thus reducing the amount of the taxes.

The Democrats at Lincoln, held a love feast at that place last Monday evening. Speeches were made in English and Spanish, and were well received; especially the speech of Ysidoro Chavez, the war horse among the Mexican democrats of Lincoln. He forcibly reminded the Mexican voters of the wrongs they had received at the last Republican Legislature, in the passage of laws touching their educational qualifications to hold office, while at the same time defeating the best school law ever offered to improve their scholastic condition. Our Mexican fellow citizens were made aware of the sophistries with which the republicans were endeavoring to mislead them, by supposing them ignorant and incompetent, and the old saw that they were priest ridden and held down by their Church. The church racket of the Republicans, the Mexican voter proposes to once for all place their condemnation upon. The meeting was a successful one and the old fashioned Democratic vote will be heard from in November. The Democratic party in Lincoln county will recognize our Mexican fellow citizens, by a good disposition of the offices upon the ticket; they are entitled to it and the Democrats propose to give them a fair representation.

BISHOP POTTER ON PENSIONS.

His Address to the Phi Beta Kappa of Harvard.

Proceeding upon the assumption that the Government can afford to pay the money necessary to carry out even the wildest of pension schemes, he then considers the most serious effect of the present system upon the National character by reason of its pauperizing tendencies. Among other things he said:

"Never was there a phariseism of philanthropy in which personal aggrandizement more impudently masqueraded in the garment of a grateful patriotism, than schemes so grotesque that they should long ago have been laughed out of our political experience. Indeed, far apart in time as are Rome and America, we must needs own that the resemblances of history are at once tragic and significant. It was a huge military organization, re-

member, which once put the Roman empire up at auction and proposed to knock it down to the highest bidder. To-day it is in the air that the party which bids highest to a precisely similar constituency that is to be rewarded with the symbols of National primacy and authority. And out of that it has come to pass that not alone some scarred and honorable veteran, brave and maimed survivor of an heroic charge, but every skulking camp follower and deserter, every fraudulent and tainted claimant who has the effrontery to demand his bribe, can have it, if only his vote shall thus become a commodity within the control of partisan dictation, and he himself a lackey to do his political master's bidding."

Certainly, if anything could rouse the public conscience on this most important of public questions, such strong and bitter words as these should do their part.—New York Commercial-Advertiser, June 28th.

The Republican leaders of this legislative district held a conference at Roswell a few days ago. The session was behind closed doors and drawn curtains. The gentlemen present were Hon. Frank Lesnet, Sheriff Nowlin, Chairman, Ulrick and Hon. W. S. Prager, of the firm of Jaffa, Prager & Co. The all absorbing topic was whom to drive forth to the slaughter. It was finally determined that Nowlin and Prager will undertake the race, and that the convention to nominate will be called at Roswell at an early date. The old war-horses of the Republican party in Lincoln county must give way to the young bloods who will take the "bit" in their teeth and run the machine, and this movement looks very much as though the Ryerson, Riley & Co. element who started in first will be relegated to the rear. There is a prospect ahead for a settlement among the G. O. P. people that will be interesting to the outsiders. The slates being prepared are liable to be smashed both in and outside of Republican ranks. We will await with pleasure the antics of our Republican brethren. Every day democratic prospects are being more fully assured for a sweeping victory at the forthcoming election. With a united harmonious front the democrats will go forth and whoever the Republicans nominate it will matter but little to democrats, the Democrats will make a determined and a winning fight for every candidate from the head to the tail of the ticket, and thus the ball keeps rolling.

The much advertised blow-out of the local Republican League held at Raventon on July 4th, at which none but republicans were invited

to attend, was a dismal failure so far as the scheme went to subvert the National holiday and prostitute it to political ends. The native population cannot be fooled by any such sophistry, and their well known hospitality was grossly insulted by the effort to make the affair a political picnic. The effort by one of the orators to make himself understood in Spanish was laughable. The listeners, among whom were men of intelligence repudiate the idea that they were to be instructed in the nativity of Columbus, or that they were so ignorant as to be made to believe he was a "Spaniard and a Republican" as one of the speakers asserted. A few more fiascos of this character will so effectually disgust our Mexican fellow citizens that it will not be necessary for democrats to perform missionary work in that quarter. Among the promises held forth, was the indifference heretofore manifested by the Republicans toward the Spanish speaking people will not occur hereafter, there will be nothing too good for them. The crowd gazed upon the forlorn hope from White Oaks and quietly went their way laughing at the taffy the politicians were endeavoring to give them.

It is simply foolishness for statehooders to say that so and so will be the case if New Mexico becomes a state, when they cannot produce a color of fact to sustain their position. Simple statements from such unreliable a source as our contemporary will have no effect upon the intelligent voter when there are no facts or arguments that will go to prove the assertions especially when people know that the statements emanate from the paid "organ" of certain politicians of uncertain political color. If New Mexico as a territory cannot maintain a decent public school system, or at least one that would compare favorably with the school systems of other territories when admitted, no improvement can be looked for under a state government, when the same men who are the obstructionists will have greater power within their grasp. First throw off the yoke of the Santa Fe corruptionists and then talk of statehood. The southern portion of New Mexico has been paying taxes for years to enrich members of the Santa Fe ring, and it is not our intention to increase the burden by erecting a state government and increase our taxes for the benefit of the ring.—Socorro Advertiser.

The Las Vegas Optic for the past few weeks, has been giving the answers of republicans on three questions of a political character. Among the many, the following very thankful communication of L. P. Browne, of Browne, Manzanares & Co., the leading wholesale merchants of the territory:

Las Vegas, July 3d, 1890.

Editor of the Optic:

Replying to your question, I suggest: Frank Springer, if he would accept. Elias S. Stover, Trinidad Romero, and several other republicans could be named capable of filling the office creditably.

But our delegate has no vote, and for industry and faithful attention to the interests of the whole Territory, I don't believe we can improve while remaining a Territory, on our present delegate, Anthony Joseph.

Republicans can afford to be just.

There are two or three serious defects in the proposed constitution which I wish to see corrected, and, under present circumstances, I think it would be bad policy to nominate candidates for state officers. "Be sure you're right and then go ahead."

L. P. BROWNE.

This is worth at least a few thousand votes for Joseph next fall—a few more republican opinions of the same character will be in order. The Optic is candid in publishing it.

The Federal Election bill passed the House last Wednesday by a vote of 155 to 149. About a dozen elected Democrats had previously been unseated and their places given to non-elected Republicans in order to secure a sufficient Republican vote that could be controlled for the passage of the bill when wanted. Yet, after that infamy, Reed could muster but six majority for his bill. A week's debate would have defeated the bill. Its passage in the Senate is doubtful.—Headlight, 5th.

The Denver News says that "New Mexico is inferior to California in no respect, except that the latter has the advantage of being bordered by the Pacific ocean. But the lands of New Mexico are as productive as those of California, and her wealth in minerals, yet undeveloped, is not inferior to that of the golden state. Had the land grant titles been settled in New Mexico when those of California were settled, and had that territory been admitted to the union at the same time, in no respect would California to-day be enabled to prove its superiority."

Warden Wynkoop has moved his family away from the penitentiary, though the territory provides elegant apartments and a table for the warden and his family. But he cannot be blamed. Miss Ada's bagnio is hardly the place for a reputable family to reside in.—Democrat.

The American Geologist states that the largest gold mine in the world is in Alaska. It is lighted throughout by electricity, and is worked day and night. An offer of \$16,000,000 for this mine has been refused.

The World Enriched.

The facilities of the present day for the production of everything that will conduce to the material welfare and comfort of mankind are almost unlimited and when Syrup of Figs was first produced the world was enriched with the only perfect laxative known, as it is the only remedy which is truly pleasing and refreshing to the taste and prompt and effectual to cleanse the system gently in the Spring time or, in fact, at any time and the better it is known the more popular it becomes.

Denver, July 5.—A News special from Tin Cup, Colorado, gives an account of the most wonderful discovery of gold ever reported. The find is six miles from Tin Cup on Cross mountain, and is owned by McCormic and Lewis. Between two lines there was 10 feet in thickness of ore, the lower six feet of iron manganese, the upper four feet of gold-bearing quartz of free gold. The lowest assay from this rock is \$440 per ton, and there are specimens, which put through a common mortar, returns \$20,000 in gold to the ton. The men are now taking out \$5,000 each per day. If this streak is only one yard in depth and extends the full length of the claim of 1,500 feet, there is \$563,000 in it. If the dip goes down 1,000 feet it is worth \$187,479,000. The average value is placed at \$1,000 per ton. The excitement over the discovery is intense, and thousands are rushing into the camp.

It is very pleasant to taste, soothes the child, softens the gums, allays pain, relieves wind, regulates the bowels, and is the best known remedy for diarrhoea, whether arising from teething or other causes. Mr. Lee. "Why, Adella, you needn't cry about it! I only said Mrs. Allen was a very well-informed woman, and I wished you would follow her example."
 Mrs. Lee. "Yes, and last week you said you wished I could manage to look as stylish as Mrs. Allen, and she makes all her own clothes. But she has what I haven't."
 Mr. Lee. "What is that?"
 Mrs. Lee. "Well, she gets all her information from the Magazine they take. I admit that she knows all that is going on, and is bright and entertaining in conversation; but I could do as well as she does if I had the same source of information. She lent me the last number of her Magazine lately, and I learned more in one hour's reading, about various social matters and the topics of the day, than I would pick up in a month by my occasional chats with friends. It certainly covers every topic of interest, from the news of the day down to the details of housekeeping; and everything is so beautifully illustrated, too. Every time Annie goes over to the Allens' she comes back and teases me to get you to take Demorest's Family Magazine, as the stories are so good. Even the boys watch for it every month, as a place is found for them all in its pages; and Mr. Allen swears by it. It is really wonderful how it suits every member of the family!"
 Mr. Lee. "Well, perhaps I had better send for a Specimen Copy; for, if it is anything like what you say it is, it will amuse and instruct the whole of us."
 Mrs. Lee. "I see that W. Jennings Demorest, the publisher, 15 East 14th Street, New York, is offering to send a Specimen Copy for 10 cents, so we can't lose anything, as each number contains a 'Pattern Order' entitling the holder to any Pattern she may choose, and in any size—which alone makes each copy worth 30 cents; and I just want a jacket pattern like Mrs. Allen's. The subscription price is only \$2.00 a year; and I must say I can't see how they can publish so elegant a Magazine for so little money."

"AGE CANNOT WITHER HER,"
remarked an old gentleman, as he gazed fondly upon the comely little woman by his side; "but frankly," he continued, "at one time I was afraid cosmetics would. The silly little woman, in order to appear youthful, plastered her face with different varieties of whitewash, yolept balms, creams, lotions, etc." "Yes," interrupted the little woman, "I did, until my skin became like parchment and so pimply and coarse." "Well," said the listener, "what do you use now?" "Oac," was the reply, "nothing but common sense and Dr. Pluro's Golden Medical Discovery. Common sense told me that if my blood was pure, liver active, appetite and digestion good, that the outward woman would take on the hue of health. The 'Discovery' did all those things and actually rejuvenated me." If you would possess a clear, beautiful complexion, free from blotches, pimples, eruptions, yellow spots and roughness, use the "Golden Medical Discovery." It is guaranteed to do all that it is claimed to, or money paid for it will be promptly refunded.
