

MARKS HELP TO IDENTIFY AUTOS

Locking Devices Are Good Protection Against Depredations of Meddlesome Boys.

FEW CARS ARE WELL LOCKED

Professional Thief Discards License Plates, Changes Car and Engine Numbers and Obliterates Every Mark.

It is believed that at least one automobile out of every dozen manufactured and sold is stolen. How many stolen machines are ever recovered by their rightful owners is another question.

Good locking devices or thief signals are not to be despised. They are a sure protection against depredations by meddlesome boys, and will cause the automobile thief so much trouble that he will look for a car that is easier to take away. Where several cars are parked this will not be hard to find. Comparatively few cars possess left wheel locks, and many stand without being locked at all. Owners sometimes forget to take the switchkey with them, leaving it in the switch lock.

Work of Professional.

Should a professional automobile thief get your car, he will take good care that you will not recognize it should you see it again. You know it now chiefly by its license plates, car and engine numbers, and a few scratches, dents and slight peculiarities.

He discards the license plates, changes the engine and car numbers and obliterates every mark by which you might identify your car. Caution in his middle name. He likes to tear down several cars of the same make and reassemble them so that no two of their principal parts will be found in any one car together. He has looked everything over with great care to see whether your initials are hidden under a wicker, or whether there are pre-putty holes anywhere concealed. Next you identify some scratch or dent he may use new fenders and repaint the car.

Way to Secure Car.

If you could make a decisive identification of a body, frame, engine, gear case, rear axle, housing or front axle, you would stand the best kind of a chance to take that car away from a crowd of claimants, even if your markings could be found on but one of these parts.

How near can we come to a system of invisible markings, unlikely of chance duplication, and readily discoverable by the owner or someone authorized by him? There is safety in numbers. Several markings on each part make it less likely that all can be obliterated.

Notes of Secret Marks.

Take, for an example, the following memorandum of a secret mark: "73 in. horizontally to the left of center of the right engine suspension bolt, scrape off the paint and find a drilled hole filled with lead."

If you have several such marks, carefully recorded, on different parts of the frame, your identification will become more positive, as it is highly improbable that two or more of these marks would be accidentally duplicated by some other person.

Many other methods of marking the car will suggest themselves to the inventive owner. It must be remembered, however, that secret identification marks are worthless unless they are carefully and exactly recorded and a record of them preserved.—Henry H. Thayer in Popular Science Monthly.

TIRE PATCH IS FIRST AID TREATMENT ONLY

Permanent Repair Should Follow Soon as Possible.

Reckless Driving Over Glass, Into Curbs and Holes and Against Rocks is Largely Responsible for Loss of Mileage.

Trying to make a blowout patch do the job of a permanent repair is a good way to ruin tires. The tire patch is a first-aid treatment to meet emergencies, but as soon after the blowout as possible it should be removed and a permanent repair made. Unless this is done, the casing will have one weak spot that is constantly growing weaker.

A blowout patch does not unite itself with the tire casing in the tire. It remains a separate piece, and during the turning that takes place while the tire is in motion, chafes against the ragged edges of the cut in the casing. In time the hole reaches such proportions that it becomes difficult if not impossible to repair.

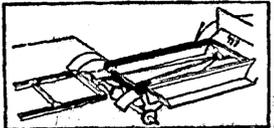

When a tread cut is responsible for the blowout, the result is usually a clean-cut hole. Severe bruises ordinarily produce a ragged hole. Where the fabric is raveled or torn apart, fabric separation is often the cause.

The standard make tires offered the motorist today will not blow out in their prime if they are treated with care. Driving over glass, into curbs, into road holes and against rocks is usually responsible for loss of proper mileage. The safest way is to have your tires inspected regularly by a tire man. He can eradicate the cause of future trouble before it is too late.

SAFETY AUTOMOBILE FENDER

Frame Presents Arcuated Front Members Disposed in Substantially Horizontal Plane.

The Scientific American in illustrating and describing an automobile fender, the invention of B. Kempler, 1007 Simpson street, Bronx, N. Y., says: "The invention relates to a fender comprising a rigid frame presenting

A Fragmentary Side Elevation of an Automobile Equipped With Fender.

arcuated front members disposed in substantially horizontal planes and spaced parallel from each other, rollers being mounted to revolve between the arcuated members, a wheel mounted to revolve in a horizontal plane associated with the frame so as to project ahead of the rollers in proximity to said wheel, and means for adjustably securing the frame.

AUTOMOBILE NEWS

It is estimated that automobile tourists entering Quebec in 1921 spent no less than \$35,000,000.

In many cars looseness of the engine bolts, those which hold the engine in place, may cause misalignment of the power plant, and serious trouble will be the result.

If upon examination the crankshaft or connecting rod bearings are found to be worn a little more on the ends than in the middle it may be taken as a sure sign that the crankshaft is not quite true.

MODERN BARN TO HOUSE 50 COWS

One-Story Building Designed for Successful Dairy Man.

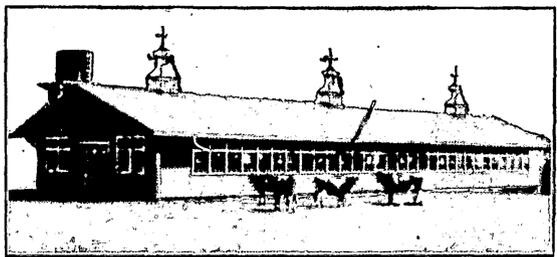

COMFORT MEANS EFFICIENCY

Everything Necessary to the Health and Productiveness of the Cows is Provided in This Design for Stable.

By WILLIAM A. RADFORD
Mr. William A. Radford will answer questions and give advice FREE OF CHARGE on all subjects pertaining to the subject of building work on the farm, for the readers of this paper. On account of his wide experience as Editor, Author and Manufacturer, he is, without doubt, the highest authority on these subjects. Address all inquiries to William A. Radford, No. 1277 Prairie avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

During the slump in the prices farmers are receiving for their crops, the value of a herd of dairy cows has been more and more apparent. Whether the milk is sold directly to the consumer, or to the creamery, cash flow in daily or weekly, and although the price of milk and cream is somewhat lower than it was two years ago, there still is a nice profit for the dairyman.

There is no profit, however, in scrub cows. Pure-breds or grades are the only animals which pay to feed and care for, as they eat little more than scrubs and take no more care

Such a dairy stable as this is not expensive to build, but it will be found a profitable investment in northern areas when the weather is cold and stormy. The cows will be kept healthy and productive and the work of caring for the animals can be done easily and at less cost for labor.

While no provision is made in this stable for the storage of roughage that the animals need, adjoining it one or two silos should be erected. These silos will hold all the ensilage a herd of this size needs during the months the animals are continuously in the barn. A hay storage shed nearby will protect the roughage from the weather.

ESTIMATE OF HORSE POWER

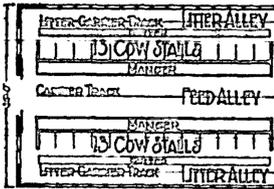

Scottish Chemist Has Made Probably the Best Definition Dealing With the Subject.

The point of man power and horse power was thus dealt with by Sir William Ramsay (1832-1916), the distinguished Scottish chemist, in his address as president of the British Association at Portsmouth, August 29, 1911: "The population of the British Isles is to round numbers 45,000,000; there are consumed in our factories at least 50,000,000 tons of coal annually, and it is generally agreed that the consumption of coal per indicated horse power per hour is on an average about 5 1/2 pounds. This gives 7,000,000 horse power per year. How many man power are equal to a horse power? I have arrived at an estimate thus: A human can carry 220 pounds, plus his own weight, in all 400 pounds, up a hill 4,000 feet high in eight hours; this is equivalent to about 1-25th of a horse power; 7,000,000 horse power are therefore about 175,000,000 man power."

Interesting Old Deal.

A penciled note, undated, nameless and cryptic of subject, was picked from a floor of the Library of Congress the other day. And as findings in keeping, here's a reminder you how times have changed since its words meant anything: "All along by the west side of

Delaware river—as far as a man can ride in two days with a horse, for and illustration, are used. This one-story, in hand-painted and numbered—20 numbered—planned for a herd of 50 cows. The building is equipped with a ventilation system that keeps the air fresh, the walls of the building dry and takes out the foul air.

FLOOR PLAN OF DAIRY BARN

This building is of frame construction, set on a concrete foundation and has a concrete floor. The floor plan shows that the two rows of stalls are arranged so that the cows face a feeding alley through the center of the building. The two rows are each divided into two sections for convenience in doing the work. Thus there are two sections of stalls that care for 15 cows each and two sections for 12 cows each.

The interior arrangement of this dairy stable, and the equipment specified on the floor plan, make this a comfortable and healthful home for the dairy herd. At the same time the arrangement is such that the owner may care for the animals with the least amount of effort. An overhead carrier track extends over the feeding alley and over the litter alleys in the rear of the stalls, making it a simple matter to carry the feed to the mangers and to remove the litter. The continuous windows admit sunlight to the litter alley, aiding in keeping the barn free from disease germs.

Such a dairy stable as this is not expensive to build, but it will be found a profitable investment in northern areas when the weather is cold and stormy. The cows will be kept healthy and productive and the work of caring for the animals can be done easily and at less cost for labor.

NUMERATION IN OLD TIMES

Both Greek and Latin Writers Were Careless About the Value of High Numerals.

In ancient times there was no peculiar carelessness about the value of high numerals. The later Latin classical writers differentiated more precisely, though even among them we find traces of the same looseness which the Greek authors showed, for instance, in the word "myriad," which meant either ten thousand, or a great multitude. So the Latin word mille stood for "a thousand" or "a large number," the sense being gathered sometimes by the cases employed in the governed word. However, the letter M was commonly employed to represent 1,000 in what is known now as the Roman numeration. M meant thousands loosely, or two thousand if intended to be used precisely. A dash over the M changed its value from a thousand to "a million" or probably to "an exceedingly high number." Two Ms with a dash over

DYED HER SKIRT, DRESS, SWEATER AND DRAPERIES WITH "DIAMOND DYES"

Each package of "Diamond Dyes" contains directions so simple any woman can dye or tint her worsted, baby dresses, skirts, waists, coats, stockings, sweaters, coverings, draperies, hangings, everything, even if she has never dyed before. Buy "Diamond Dyes"—no other kind—then perfect home dyeing is sure because "Diamond Dyes" are guaranteed not to spot, stain, streak or run. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton or mixed goods.—Advertisement.

DOGS GIVEN VICTORIA CROSS

Three Have Been Awarded Highest British Decoration for Bravery in Face of the Enemy.

The English in asking that the Victoria Cross be awarded to the cat which so heroically saved her young during the fire of the Printemps only follow an example given by the queen of England herself. To appreciate the value of this reward we must remember that the Victoria Cross is for a soldier, general or private, the highest military order.

In the last war at the utmost 50 dogs have been awarded. However, several dogs belonging to the British army have received this honor. These were: Bob of the Royal Berkshire, which in the Afghanistan war saved the life of several soldiers; Jack, which accomplished the same feat at the battle of the Alma; and Jerry, the hero of the Crimean war, which received from the city of Dublin a medal and a dinner. The odds are that the mess made the dog happier than the medal.—New York Tribune.

NAME "BAYER" IS ON GENUINE ASPIRIN

Take Tablets Without Fear, if You See the Safety "Bayer Cross."

If you want the true, world-famous Aspirin, as prescribed by physicians for over twenty-one years, you must ask for "Bayer Tablets of Aspirin." The "Bayer Cross" is stamped on each tablet and appears on each package for your protection against imitations.—Advertisement.

WHY SOME MEN LEAVE HOME

This Kind of Thing, Served Up Daily, Would Drive Almost Any Man From His Loved Fireside.

"George, dear," cried wife from the bedroom, "have you shut the dining room window?"
"Yes, love."
"Put the plate basket behind the bookcase?"
"Um!"
"Have you put the dog out?"
"Yes."
"Sure you bolted the scullery door?"
"Sure."
"Turned off the gas in the cellar?"
"Yes, precious."
"Wound the clock?"
"Yes, darling."
"Brought in the mat from the porch?"
"I have, my sweet."
"Have you locked up the wine?"
"Yes, yes, my sweetheart. I have done even that."
"Well, there's no need to get wild about it. Why can't you come to bed at some decent hour? What on earth have you been doing down there all this time?"—London Tit-Bit.

Dear to Entreaty.

"Are our girls ashamed of their cars?" asks Rev. A. M. Mitchell, vicar of Burtonwood, Lancashire, England, in the Excelsior, the Burtonwood parish magazine. "Why do they hide them? The fashion of 'bobbed hair' (why not 'bobbed') stands in need of some explanation. The car, even the feminine car, is not always pretty. But if not always as ornamental as could be wished, it should always be useful. Will 'bobbed hair' interfere with the car's intended service and usefulness?"
"If it does, this hair fashion is a sin against the body, a crime against society."

We get two full moons in one month about once in every two and a half years.

Don't depart too quietly after your best's surreptitious dawn, or who will think you noticed it.

WRIGLEYS

AFTER EVERY MEAL

Select your food wisely, chew it well, and—use WRIGLEY'S after every meal. Your stomach will thank you. It is both a benefit and a treat—good, and good for you. And, best of all, the cost is small.

TRY THIS NEW ONE

HAD NO "COMEBACK" TO THAT

Marine's Winterfield Uniform Coored Heavily on the Khaki Which Started the Controversy.

The marine's three uniforms hung side by side underneath his clothing chest: one winterfield, one blue and one khaki. Suddenly the khaki uniform grew critical. "You look pretty green," it said to the winterfield. "Wound the winterfield." The winterfield uniform made no reply. "And that outfit right next to you must be downhearted—it looks so blue," the khaki uniform went on. The winterfield then spoke up: "I might be green," it said, "and that outfit right next to me might have the 'blues,' but suppose your hide—your yellow!" The khaki uniform piped down.—The Leatherneck.

What Are Cymbals?

The novel of the future, according to Shaw Desmond, will be like his novels, not a novel at all but a symbolical. Mr. Desmond goes on in highly technical and polysyllabic terms to define what a symbolical is, comparing it to a kaleidoscope, and to a many-faceted diamond, but disregarding the spelling, one is very likely to think the name originated with the tinkling symbol and that the great difference lies in the introduction of one syllable for euphony's sake.

Proof.

"I am a philosopher," admitted the gentleman whose frontpiece was an elongated and solemn as that of a rare old fiddle. "What makes you think so?" we sleepily inquired. "Because," he answered, "although I am aware that I am not appreciated it does not hurt my feelings in the least."—Kansas City Star.

Really Something of a Mystery.

"Lawyers," said Uncle Eben, "mostly asks an unpleasant cross-examination folks that I can't see how so many of 'em gets popular enough to be elected to office."

His Deduction.

"Sister Amanda Ellen writes that Niece Geraldine, who is coming to visit us next week, has had eighteen love affairs," said Mrs. Hornbeck, looking up from the letter from her city relative. "Well, I sh'ud wonder!" interestedly ejaculated honest Farmer Hornbeck. "What in time can she do with eighteen imitation ivory toilet sets?"—Kansas City Star.

Really Something of a Mystery.

"Lawyers," said Uncle Eben, "mostly asks an unpleasant cross-examination folks that I can't see how so many of 'em gets popular enough to be elected to office."

Wishing for sleep is a poor way to get it

A LITTLE wisdom in the daytime is a better assurance of rest than any amount of anxious wishing when nerves are a-jangle at night.

What you do at noon often has more influence on sleep than what you want and hope for, at midnight.

Coffee's drug element, caffeine, whips up the nerves, and when its use is continued there's usually a penalty which no amount of mental effort can avoid.

The part of wisdom, as so many thousands have found, is to turn away from nerve-stimulation and adopt rich, delicious Postum as the mealtime drink. Postum delights the taste, but brings no disturbance to nerves or digestion. Even the little children can share in the enjoyment of Postum at any meal.

It's better to anticipate warnings than to be driven by them.

It's better to encourage and preserve sound nerves and complete health than to listen to the clock ticks at night and say, "I wish!"

You can get Postum wherever good food or drink is sold and served. An order today may be the beginning, for you, of the great satisfaction and comfort which so many others have found in Postum.

Your grocer has both forms: Instant Postum (in tin) made instantly in the cup by the addition of boiling water. Postum Cereal (in packages of larger bulk, for those who prefer to make the drink while the meal is being prepared) made by boiling for 25 minutes.

Postum for Health—"There's a Reason"

Made by Postum Cereal Co., Inc., Battle Creek, Mich.

ALL OF CUBA RUN ON ALCOHOL

Transportation in Cuba is done by alcohol, the forbidden gold being so plentiful that it has been found cheaper to fill one's tank with alcohol instead of gasoline. In fact, 50 per cent of the motor-driven vehicles of Cuba are run by alcohol. Note the price signs; they tell the story.

This is a scene from a fuel station in Havana, Cuba.

If Speedometer Indicator Vibrates. Vibrations of speedometer indicator is caused by loose connections, tubes of the drive shaft, the flexible housing for shaft bent at too sharp an angle, improper mesh of drive gears or, most commonly, lack of lubrication.

Wrong Adjustments.

To make the motor start easier in cold weather, do not change the adjustment of the carburetor. The mixture will become too rich when the motor heats up.

Ball bearings should be inspected at least once every six months, the rough or worn balls replaced with perfect ones and the ball run filled with graphite.

Three-wheeled types of motor taxicabs are now operated in Paris. The running costs are said to be very small.

More than 23,000 applications for 1922 automobile licenses have been accepted in Pennsylvania.

RESTORATION TO ENTRY OF LAND IN NATIO U. L. FOREST

Notice is hereby given that the lands described below, embracing 160 acres, within the Lincoln National Forest, New Mexico, will be subject to withdrawal and entry under the provisions of the homestead laws of the United States and the act of June 11, 1906 (34 Stat., 235), at the United States land office at Roswell, New Mexico, on June 21, 1922. Any settler who has actually and in good faith claiming any of said lands for agricultural purposes prior to January 1, 1908, and has not abandoned same, has a preference right to make homestead entry for the land actually occupied. Said lands were listed upon the applications of the persons mentioned below, who have a preference right, subject to the prior right of any such settler, provided such settler or applicant is qualified to make homestead entry and the preference right is exercised prior to June 21, 1922, on which date the lands will be subject to settlement and entry by any qualified person. Applications may be filed twenty days prior to the above date but will not be allowed until the day set for opening thereof. Ex-service men who served in the war with Germany will also have a preference right of entry for a period of ninety days prior to the above date. Such preference, however, is subject to the superior preference of settlers prior to January 1, 1908 and listers. The NE 1/4, Sec. 10, the NW 1/4 SW 1/4, Sec. 11, the NE 1/4 NE 1/4, Sec. 15, T. 9 S., R. 10 E., N. M. P. M., containing 160 acres. Listed without applicant. List 5-4478, February 23, 1922. D. K. Parrott, Acting Assistant Commissioner of the General Land Office.

Notice is hereby given that Sebastian C. Rasha, of Jicofilla, New Mexico, who, on Aug. 2, 1920, made Additional Block Mining Homestead Entry, No. 045443 for SE 1/4 Section 22, and SW 1/4 Section 23, Township 6 S., Range 13 E., N. M. P. Meridian, has filed notice of intention to make first three year proof to establish claim to the land above described, before C. C. Merchant, U. S. Commissioner, at Capitan, New Mexico, on the 20th day of April, 1922.

Claimant names as witnesses:
 John T. Haysman, Moen, Vesper, Lill Barrett, Albin H. Haysman, all of Jicofilla, New Mexico.

EMMETT PATTON,
 Register.
 for 18—April 15

Moving a Mountain Out of Rio de Janeiro, Brazil

One of the most colossal engineering feats ever undertaken is now under way in Rio de Janeiro, Brazil. The Morro do Castelo, a mountain in the heart of the city, is being removed and the substance of it is being used to make a three-mile extension to the city in the bay.

New Invention Aid to Airmen

Records More Accurately the Air Pressure of Certain Surfaces of Planes.

TELLS OF RESULTS ACHIEVED

Important Facts Determined by Use of This Device Will Prove of Great Value to Science of Aeronautics.

Washington.—A new manometer or instrument for recording air pressure on wing and tail surfaces of airplanes at different points simultaneously has been designed and developed by P. H. Norton, an engineer of the Langley Memorial laboratory at Langley field, Virginia. It was announced by the national advisory committee for aeronautics.

The first experiments were undertaken by the laboratory for the navy department in order to determine the distribution of pressure over the horizontal tail surfaces of an airplane and to analyze the relation of this pressure to structural loads and longitudinal stability and were conducted on full-sized planes in the air and on models in the wind tunnel.

Old Method Described. The old method consisted in using a horizontal tail surface inside of which rubber tubes, connected with a series of holes on the surface, led to a multiple liquid manometer. The several tubes of the manometer registered the pressure at each change of speed or air pressure and the results were recorded by an automatic camera which photographed the height of the liquid in the tubes every few seconds.

To study various pressures in accelerated flights or "stunting," it was impossible to use the old liquid manometer and consequently the new manometer was developed, substituting the deflection of metal diaphragms and a means of automatically recording their deflection for the liquid manometer and the camera respectively.

Tells of Results Achieved. Among the results achieved by the investigators are: That the low average load per

square foot on the usual type of tail plane doing steady flight is so small that it could not in any conceivable way cause failure.

That the records taken of the same pressure on tail surfaces in accelerated flights demonstrated that there was no large increase in these forces.

A complete manometer for making pressure distribution tests has been sent to the army air service engineering laboratory at McCook field, Dayton, Ohio, for experiment by army experts.

It was also learned that the Langley laboratory contemplates a further study to ascertain the pressure on different parts of wing and tail surfaces at very high speed, in an effort to learn, if possible, the causes of several accidents which occurred in aviation races, where the planes were making very high speeds and for which no cause has ever been determined.

HE LIKES HIS OWN POEMS BEST

Young Shah of Persia Seems to Make Hit With Himself.

Admits His Stuff May Be Little Better Than That of Omar Khayyam—Is a Something of Linguist—Also Good Tennis Player.

London.—The young shah of Persia who recently left his capital, Tehran, for another trip to Europe, is said to hold a high opinion of himself as a poet. In fact, according to a story told here, he puts himself in a class with Omar Khayyam and considers himself, if anything, a trifle better than his great countryman.

As the story is told by a London paper, a British minister at Tehran called on the shah at the request of English admirers of the great Persian poet and asked that better care be taken of his grave at Nishapur where, as Omar predicted, "the north wind still scatters roses on his tomb."

But the shah could not be impressed with this plea. Persia, he declared, had lots of poets and he, himself, was

Finder of \$7 in 1865 Now Makes Restitution

Connetquot, Pa.—Henry C. Moulthrop of Connetquot has received a most remarkable "conscience" letter from the neighboring town of Abilene. It is from a man who says he is a veteran of the Civil war and explains that on returning from the war in 1865 he was "broke," in a "grocery and beer shop" in Connetquot he found a pocketbook containing \$7 and a card indicating that it was the property of F. Moulthrop.

He now desires to make restitution to the son of the man who owned the pocketbook. He adds \$1 for interest, which hardly meets the interest requirements, but the recipient thinks he can stand the loss.

Jacksonville, Fla.—James Monroe, one hundred and six years old, arrested on a charge of being drunk and disorderly, was given a suspended sentence by Municipal Judge Breckham.

THE KITCHEN CABINET

To be bigger than circumstances, that's the acid test of character.—Honore de Balzac.

EASTER DISHES

At Easter-time many housewives prepare the time-honored dishes such as:

Easter Egg Rolls.—Scald and cool one-fourth of a cupful of milk, add one yeast cake broken in bits, mix well and add a cupful of scalded and cooled milk. Stir in two cupfuls of flour, beat well and set away in a warm place until light. Add the yolk of two eggs, half a teaspoonful of salt, half a teaspoonful of sugar, one-fourth of a cupful of melted butter and flour enough to make a dough to be kneaded. Knead until smooth. Cover and set aside to become light. Shape in small balls, cover on a board until double its bulk. Take a ball, press a cavity with the thumb and set into this half a teaspoonful of jelly; work the dough over the opening to enclose the jelly and have it just under the top crust. The roll should be shaped like an egg; let rise to double its bulk. Bake about twenty minutes in a hot oven.

Bavarian Easter Cake.—Cream one cupful of butter with one and one-half cupfuls of sugar; add the yolk of seven eggs, beaten until lemon colored, and then, alternately with three and three and one-half cupfuls of flour, stirring and beating well. Beat in the stiffly beaten whites of five eggs and one-half pound of suetana meringue. Grease one or more deep layer cake plates, spread them with the batter, which should be about an inch thick, dot over the top with small conifera and bake.

White and Gold Savorole.—Beat three-quarters of a package of gelatin in one cupful of cold water, add three cupfuls of hot milk, add two cupfuls of sugar mixed with the grated yellow rind of two lemons, then stir in the yolks of four eggs, beaten stiff and stirred into one pint of cream. Mix all well and let stand until cool. Beat with a large Dover egg beater until the whole is like yellow cream. A drop or two of saffron tied in a cloth, dipped in hot water and squeezed from the cloth, will deepen the tint if desired. Pour into a ring mold and when cooled all the center with whipped cream.

"I can teach sugar to slip down your throat a thousand ways."

A FEW DESSERTS

Do you enjoy the old fashioned cottage pudding, as many do? This is a good one: Take a tablespoonful of softened butter, one cupful of sugar, one well-beaten egg, a little salt and a grating of nutmeg, one-half cupful of milk with flour to make a soft cake batter—about one and one-half cupfuls—and one teaspoonful of baking powder. Beat well and bake in a shallow pan. Cut in squares or rounds and serve with:

Vinegar Sauce.—Take one-half cupful of sugar, mix with a tablespoonful of vinegar, add one-half cupful of boiling water and cook until the four is well cooked. Add one-half teaspoonful of grated nutmeg, two tablespoonfuls of vinegar and one tablespoonful of butter. Serve both cake and sauce hot.

Pear and Jam Dessert.—Cut small circles from stale sponge cake. Pour over some, arrange halves of pears on the cake, sprinkle with a bit of grated lemon rind and cover with raspberry jam and slice thickly with blanched and quartered almonds which have been slightly toasted in melted butter. Serve with a syrup, using the canned pear juice; slightly thickened, and flavor with grated lemon rind.

Cake Crumb and Cocoa Pudding.—Take a well-beaten baking dish and cover the bottom with a cupful of cake crumbs, sprinkle with cocoa and sugar with a grating of nutmeg; repeat until the dish is nearly full, then pour over cupful of milk and two well-beaten eggs, adding a pinch of salt. Place in the oven and bake until done.

Strawberry Punch.—Take one-fourth of a cupful of scalded milk, cover with two cupfuls of boiling water and simmer one-half hour. Wash three cupfuls of cranberries and add to the strained milk liquid; boil ten minutes, force through a sieve. Add one and one-half cupfuls of sugar, three tablespoonfuls of lemon juice and a pinch of salt. Proceed to a mash.

Orange Pie.—Make a rich pastry shell. Cool and fill with oranges that have been sliced and allowed to stand covered with sugar. Heap the sugared fruit into the shell top with whipped cream and serve. Or a meringue cooked in hot water may be heaped over the top.

Rhubarb Pudding.—Spread bread with butter on both sides, cut in small sized pieces, arrange in a buttered baking dish, add a cupful of dried fresh rhubarb and sugar to sweeten. Add a small amount of water and bake until the mixture is well cooked. Serve with a hard sauce.

The Beauty.

It is the word "rosary" is derived from the Latin "rosarium," which was originally a garland of roses and used to crown the image of the Virgin Mary. As a rosary in its present use it was instituted in honor of the Virgin by St. Dominic.

In the Vermont Legislature.

In Vermont the state senate is composed of thirty members, one from each county, and the lower house is made up of one man from each township in the state.

Longer Skirt Is Making Headway

Arrangement Is Combined With the Abbreviated Garment for Women Who Insist Upon Having the Now Waning Mode.

Harbingers of the spring season crowd upon us from all directions. From Paris come the cables of the opening there, while right here in New York, observes a fashion writer in the New York Times, we are being treated to fashion exhibits that are truly American in character. Only the best of America's fashion creators paraded their gowns for the fashion people to revel in and to take chiding examples from the clothes of American women this spring.

While the dresses designed for the street have a tendency to remain at a very moderate length—not to say short—those for afternoon and evening are creeping forward at no uncertain pace. And it is interesting to see how variously the different designers achieve their purposes by drapings and transparent soundings and panels and ruffings and underskirts and things.

For those women who will not accept the frankly long skirt (either because their figures are too short or because they want to remain youthful in appearance), there are gowns with trailing trains to make them look long, while, on other portions of their skirts the legs are allowed to show almost to the knees. This style will continue to please those husbands, too, who vowed

Late Creation in Pure White.

they would not be parties to the re-appearance of the longer skirts. It took them a long while to come around to a wholehearted acceptance of the shorter skirt, but having reached that point, they were—many of them—determined to remain there.

One evening gown at the National Garment Retailers' fashion show was made of a black beaded robe fast draped about the figure in classic lines, with straps of cut jet to hold it in place over the shoulders. On the left side of the skirt the draping was opened and made a short skirt line, almost to the knees, while on the opposite side the lines of its draping curled downward until it barely escaped the floor.

Simplicity Is Noticeable

The simplicity of the drappings of these gowns is their most noticeable characteristic. There seems to be only a suggestion of a gathering of the fulness at a certain point, or at various points, as the case may be. Not by the manner of that draping lies the center of interest in the frock, and around it the trimming and all of the lines of the gown are grouped to harmonize.

Generally gown illustrates that simplicity of beaded trimming which has proved itself so acceptable, and in this case the cross lines of bead tubes and circles follow the line established by the draping about the lowered waistline.

The gown from Martini et Armand had a somewhat higher waistline. That is, a second tier of velvet ribbon establishes a more normal line, while the lowered one remains there, no thought to demonstrate its willingness to be pushed from the center of interest, which it has held unalterably. This frock is made with an abundance of silver, that shows charmingly on the bodice under the arms.

Chanel's frock, all of two feet long, is used on the collar of some of the new evening wraps. It is heavily beaded the fringe being that it quite conceals the material of the garment under it.

EFFECT OF THE LACE BLOUSE

Popular Garment Aids Wonderfully in Freshening Up Wardrobe When Attention Is Needed.

The lace blouse is an excellent garment with which to freshen up the wardrobe. Dyed laces are especially effective for this purpose. A charming one is made of brown satin, is to be worn with a brown satin skirt or sleeveless slip, the combination forming a very smart afternoon frock. The low waistline is emphasized on this blouse, the fall of satin which forms the belt proper being placed well below the normal waistline. The blouse is a slipover, the belt fastening at one side.

Generally speaking, the very long tunic blouses are not as good as present as the ones that are merely hip length or a trifle longer. The brown lace blouse is just about half-figure length. This is a very good length for a lace blouse, especially one designed to freshen up an old frock, but some

Another of these very brilliant gowns was made of some soft and lustrous fabric of metal cloth—that is, one which had a color woven in with the silver threads. Its skirt was draped in one of those irregular ways that brought it very low on one side, where it spread out into a graceful train, and from the other side the fabric came from a higher point, to fasten under the drapery of the train. The interesting part about this gown was that when its lovely wearer stood still in one spot, it had every appearance of being quite amply full. When she stepped along the path the movement of her body transformed the lines of the skirt so that they followed her figure exactly.

All the evening frocks had simple straps for the shoulders, as much neck showing as possible, and was of red velvet, and the shoulder straps were composed of twisted velvet, making a cord of about half an inch in diameter. But the lines of the neck were mostly square across the front, with some divergence in the back, according to the design of the gown in question. What trimming there was appeared at the waistline in the form of a girde or, sometimes, a more elaborate sort of trimming, that spread beaded corditions on the waist or skirt.

The materials were soft velvets, plain metal cloths and heavy satins and, according to the inspiration received by each individual designer, the lines of draped evening gowns followed the characters of the fabrics used. Most of the colors were brilliant in the extreme, showing a marked tendency to get away from black, which has been so astonishingly popular during the last season. Yellow in the brighter shades appeared repeatedly, establishing a precedent for its use during the coming spring and summer.

Models for Different Types.

When the draped evening gown are considered, then there is a distinctly different type for the young and the slim woman. It is draped, to be sure, but it is extended in some way at the hip line, so that the gown assumes a distinctly bouffant appearance. It is made, more usually, of the thinner materials and of tulle, which, of its own accord, puts out into distinguished lines.

One dress of this type was made from heavy flowered tulle, the tight little colorful bouquets of flowers being scattered over a background of soft cream-colored silk. The skirt was laced with full panels over either hip and falling from that point, it reached the ankles. There was a short-waisted bodice and little, old-fashioned puffed sleeves, giving the effect of lovely maidenliness combined with a real old-time charm.

Some of the evening dresses were short, as far as the foundation material was concerned, and then had extra face of gold tulle flounces below that line, which made the skirt long, and yet not long. It was a compromise that many women will like, because it forms an easy transition between the long and the short and allows them to gradually become used to the longer lines.

From Paris we gather the first news of the spring openings there. Of course it is, as yet, only sketchy information transmitted by cable, but it serves to give an idea of what the Parisian couturiers will sanction for forthcoming styles.

Two frocks, which are the latest creations of Martini et Armand and Chanel, are not, of course, included in the spring showings of these two houses, but they are the sort of thing that led up to these openings, and for that reason they hold a real significance.

A Short Time Ago I Weighed Only 80 Pounds—Now I Weigh 112 Pounds and

TANLAC

is what built me up so wonderfully, says Mrs. Barbara Weber, 315 Van Ness Ave., San Francisco. She is but one of thousands similarly benefited.

If you are under weight, if your digestion is impaired, if you are weak and unable to enjoy life to the fullest measure, you should take Tanlac. At all good druggists.

Improvements. "The glad to note that father's muscular sense is improving," exclaimed Miss Curox. "But," protested her mother, "he slept through the entire concert." "That's what shows the improvement. He now sleeps serenely instead of making disagreeable remarks throughout the performance."

Important to Mothers. Examining carefully every bottle of GASTORIA, that famous old remedy for infants and children, and see that it bears the Signature of Dr. J. C. Williams. In Use for Over 80 Years. Children Cry for Fletcher's Castoria.

Jud Tunkins. Jud Tunkins says he wishes he could put as much patient endurance into some of his later undertakings as he showed on a boy when he was learning to smoke a pipe.

No Rubber but More Stretch

"The best tobacco-bargain I've ever found"

Here is the story of a man who wouldn't take anything for nothing.

1845 Holmes Road, Cleveland, Ohio. Isaac A. Conroy, Richmond, Virginia.

Edgeworth. About a year ago, in Richmond on a business trip, I was fortunate enough to be allowed to go through the factory where your famous Edgeworths are made. I saw the machinery and the way in which the tobacco is prepared, and I was very much impressed. I have since carefully studied the leaf tobacco used in Edgeworths, how exactly you blend and treat the various kinds of leaves, and how you cure them, and I have been able to pay for it because I consider it the best tobacco-bargain I've ever found.

Edging. During my visit I talked over with a man of Edgeworth from a pipe on one of the packing tables. I was looking for a pipe to pay for that one. I saw that there had been a gift of it to me, and I want to pay for it because I consider it the best tobacco-bargain I've ever found.

Edging. Well, I checked that package of Edgeworth from your factory and, to be told, it suited me down to the ground. It was a real find. I'm looking for Edgeworths that are just as good as the ones I've found. I have since carefully studied the leaf tobacco used in Edgeworths, how exactly you blend and treat the various kinds of leaves, and how you cure them, and I have been able to pay for it because I consider it the best tobacco-bargain I've ever found.

Army Tanks Used to Destroy Moonshine Stills

Prohibition officers in raids at Newport, R.I., captured a number of moonshine stills, and army tanks operated by state troops were utilized to destroy the illegal equipment.

1920 FARM LOSS IS VERY LARGE

Drop of \$3,650,000,000 From Previous Year Is Shown.

Agriculturists Earned Less in 1920 Than in Any of the Last Ten Years. Survey Shows—Suffer Heavily.

New York.—The American farmer who does to unprecedented heights of prosperity in 2019 and 2018, earned less in 1920 than he has earned in any year of the last ten, if his income is reckoned in dollars having the same purchasing power as in 1910, according to estimates made public by the official bureau of economic research. Reckoned in actual dollars paid to him in 1920, the farmer's income, as shown by the report, was less than in three previous years, but was greater than in the seven years from 1910 to 1919, inclusive.

The figures, taken from a detailed report of an exhaustive nationwide survey, showed that the country's 6,450,000 farmers in 1920 earned approximately \$7,500,000,000—a drop of \$3,650,000,000 from their income for the year before.

The farmers, who represent about 16 per cent of the gainfully employed, have fared during the last decade a share in the total national income varying between 12.8 per cent in 1911 and 17.4 in 1917 and 1918, and 1920, when it dropped to 10.9 per cent.

The final figures for the total income in 1920 can only be approximated, owing to the delay in publishing the income tax returns. "When these figures are translated into terms of the purchasing power of 1910," it is again seen that the purchasing power of the farmer was at its lowest ebb in 1920," says the report. An official summary of the report adds: "It will be seen that in 1920 the farmers felt poorer than the rest of

these gainfully employed. They had further to fall.

"What the results may have been in 1921 can not yet be determined, because, while farmers again suffered heavy losses, the rest of the country also ran into a period of severe depression."

LABRADOR ESKIMOS DYING

Have Been Exploited by Traders, Says Vice Governor of Northern Greenland.

Copenhagen.—Eskimos of Labrador appear to be dying, or at least to be deteriorating, says Harold Lindow, vice governor of northern Greenland, who has just returned from a visit to the Eskimo settlements on the eastern coast of Labrador.

Mr. Lindow said the Eskimos of Labrador did not compare well with the Greenland Eskimos and that they were in great need of protection. He asserted that they were being exploited by unscrupulous traders and driven further north year after year.

ASPIRIN

WARNING! Say "Bayer" when you buy Aspirin. Unless you see the name "Bayer" on tablets, you are not getting genuine Aspirin prescribed by physicians over 22 years and proved safe by millions for

- Colds, Headache, Rheumatism, Toothache, Neuralgia, Nausea, Earache, Lumbago, Pain.

Accept only "Bayer" package which contains proper directions. Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists. Aspirin is the trade mark of Bayer Manufacture of Monach, Germany of Bayer-Drugs.

Spohn's Distemper Compound

At this time of year horses are liable to contract contagious diseases—DIPHTHERIA, INFLUENZA, COUGHS and COLIC. As a preventive against these, an occasional dose of "SPOHN'S" is remarkably effective. As a remedy for cases already suffered, "SPOHN'S" is equally effective. Give it as a preventive. Don't wait. On sale at drug stores. SPOHN MEDICAL COMPANY, GOSHEN, INDIANA

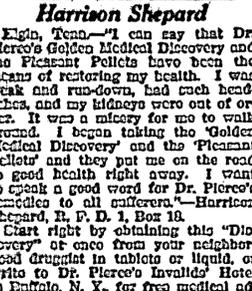

Reform Urgently Needed. Imagine living on a street without a name and in a house without a number! If you are a writer, imagine waiting for a check from a magazine in such a residence! That is the predicament that certain Parisians are in who live in such a street near the Gare d'Orly. The city government forgot to give it a name, and the only numbers on the houses are those put up by residents who sometimes duplicate each other's numbers. Now the natives are becoming aroused about it. The lot of the poor postman must be a difficult one as he gazes at a letter addressed to "Monsieur Pierre Bergaret, the third righthand house in the little street two blocks to the right of the Gare as you walk south."

A Carver. The new boarder ably took his seat at Mrs. Slimpkins' table. "May I ask, sir," said the old boarder, "what your occupation is?" "Oh, I am a sculptor," replied the newcomer. "You carve marble, do you?" pursued the veteran. "I do." "Then," continued the other, "I see you will be a valuable acquisition in this happy house. Do you mind coming up to this end of the table and carving the fowl?"

MOTHER, QUICK! GIVE CALIFORNIA FIG SYRUP FOR CHILD'S BOWELS

Even a sick child loves the "fruity" taste of "California Fig Syrup." If the little tongue is coated, or if your child is listless, cross, feverish, full of cold, or has colic, a teaspoonful will never fail to open the bowels. In a few hours you can see for yourself how thoroughly it works all the constipation poison, sour bile and waste from the tender, little bowels and gives you a well, playful child again. Millions of mothers keep "California Fig Syrup" handy. They know a teaspoonful today saves a sick child tomorrow. Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.—Advertisement.

Sentiment Vs. Reality. Post—"Alas! What boots this theory of true love? Unfortunate lover—"That's easy. Her father."

Harrison Shepard. Elgin, Tenn.—"I can say that Dr. Pierce's Golden Medical Discovery and the Pleasant Pellets have been the means of restoring my health. I was weak and run-down, had had headaches, and my kidneys were out of order. It was a misery for me to walk around. I began taking the Golden Medical Discovery and the Pleasant Pellets and they put me on the road to good health right away. I want to speak a good word for Dr. Pierce's remedies to all sufferers."—Harrison Shepard, R. F. D. 1, Box 18, Elgin, Tenn.

HOMENTA. Instantly opens your head and makes breathing easy. Fine for CATARRH COLDS COUGHS. 75¢ at stores or 85¢ by mail. Address: New York Drug Concern, New York.

M. MURTRY PAINTS VARNISHES. For the Home Use.

Western Canada Offers Health and Wealth. It has brought contentment and happiness to thousands of people who have settled on the fertile lands of Western Canada. They have established their own homes, and are enjoying the fruits of their own labor. The climate is healthy, the soil is rich, and the opportunities for advancement are almost every branch of agriculture. The advantages for: Dairying, Mixed Farming, Stock Raising, and more. For more information, write to: W. V. BARNETT, Room 4, Box 516, Omaha, Neb.

TALES FROM BIG CITIES

No Boring for Oil in Texas Graveyards

AUSTIN, TEX.—The railroad commission has declined the application of H. B. Kerstetter of Mexico to drill for oil and other minerals in the Hancock and Bennett graveyards in the Mexico oil fields. These two graveyards contain two and one-half acres of land. To grant the application, the commission announced in its decision, would amount to a desecration of graves on land which is admitted by all parties to be definitely located graveyards and would be contrary to "good order and propriety." At the hearing considerable opposition developed, not only by relatives of dead persons whose bodies are buried in these graveyards, but by oil companies whose holdings are adjacent to these graveyards. Anticipating adverse action on the application, Kerstetter filed a supplemental application with the commission to drill a well 170 feet from the line represented as the Hancock cemetery. As this location is not used as such and is sufficiently removed from the admitted graveyards, the commission granted permission to Kerstetter to drill at that place. In the opinion of Judge Hassell, as set forth in his recommendation to the commission, no person has a vested right to drill an oil well in a graveyard, and "assuming that the tract is in fact a graveyard, in my opinion the commission should use to the fullest its power to prevent drilling within 150 feet of a boundary line for the purpose of protecting a graveyard against such an invasion." It is within the police power of the state undoubtedly, since it is promotive of good order, propriety and decency, to prevent drilling an oil well in a graveyard.

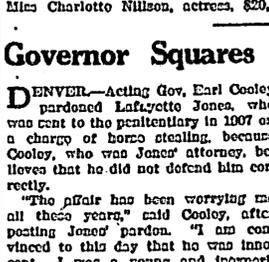

Confidence That We Are Past Worst Phases of the Agricultural Crisis. By PRESIDENT HARDING, Letter to Minnesota Farmers. I am glad to say that my utmost anticipations of useful results from the recent national agricultural conference in Washington were more than realized. I believe it has set a new mark in the aspirations not only of the agricultural community, but, indeed, of the entire country in behalf of a better understanding of our agricultural problem and of more effective measures for dealing with it. The fine spirit of co-operation among the farmers, and the disposition on their part to unite their efforts in every possible way with those of the government, augurs particularly well for our hope of accomplishment. The conference gave serious and thorough consideration to the problems before it, and presented practicable proposals for doing practical and worthwhile things. It avoided all extremism and adopted the wise course of making no excessive demands for special favors or class treatment. I am very sure that the wisdom of this course will be demonstrated hereafter. In the general industrial and business situation there is much to justify confidence that we are well past the worst phases of the agricultural crisis, that improvement is well begun, and that it will continue steadily from this time forward. This is not only a source of satisfaction to every friend of the farmer, but also to whoever is interested in any phase of American business, for we have all come to recognize the interdependence of all departments of the national industrial establishment. No one of them can prosper permanently if any other great branch of national activity is depressed. Therefore, in expressing my conviction, based on a wide array of information, that the worst is past as concerns agriculture, I am recording my firm belief that an era of better business and more prosperous times, for the entire commercial establishment of the country, lies just ahead of us. I feel, therefore, that we are entitled to look with much satisfaction upon what we have accomplished in the last year, and with all confidence to the future.

One a Minute Also the New York Rate

NEW YORK.—Ten women, prominent socially, who claim to have put more than \$500,000 into a mythical "pool" promoted by Alfred E. Lindzey, brother, were summoned to appear before a Supreme court grand jury and help piece together the details of a remarkable story of "high finance." The list of alleged victims of the missing money is headed by Mrs. Lillian N. Duke, divorced wife of James B. Duke, "tobacco king," who claims she contributed \$25,000 to the engaging Lindzey. Others on the list with their contributions to the pool include: Mrs. Dorothy Adams, \$27,000; Miss Catherine Adams, \$40,000; Miss Charlotte Nilsson, actress, \$20,000; Mrs. W. H. Arnold, \$50,000; Miss Margaret Bogart, \$18,000; Mrs. Helen Burnett, \$31,000; Mrs. Adelaide V. Rice, \$25,000; Mrs. Josephine A. Cornell, \$20,000, and Miss Florence James, \$5,000. Lindzey's favorite story, Assistant District Attorney Murphy declared, was that he was a fellow member with George F. Baker, Thomas W. Lamont, Charles E. Sablin, Percy T. Rockefeller, James A. Stillman and other giants of the financial district, in a millionaire domino club, where the time not spent in playing dominoes was given over to planning big "hills" in Wall street. This club was supposed to maintain secret rooms at a New York hotel. "I am telling you," he would say to each new dupee, "what I am pledged to reveal to no human being. The Domino club is the most powerful organization on earth. The members were all pledged to stand back of each other to the uttermost farthing, and, like the members of Balzac's 'Thirteen,' to carry out one another's enterprises by fair means or foul."

Governor Squares Himself as Lawyer. DENVER.—Acting Gov. Earl Cooley pardoned Lafayette Jones, who was sent to the penitentiary in 1907 on a charge of horse stealing, because Cooley, who was Jones' attorney, believes that he did not defend him correctly. "The affair has been worrying me all these years," said Cooley, after posting Jones' pardon. "I am convinced to this day that I was innocent. I was a young and inexperienced lawyer at the time and I am convinced that it was my poor defense of my client that sent him to the penitentiary. Jones was a cowboy in Aguilar, Colo., where he was known as Punch. One day he was riding a horse belonging to a certain Dick Smith when he met the county judge and district attorney. Accordingly, when Smith charged that Jones had stolen his horse, the cowboy found the officials ready to side against him. Jones pleaded that he was only using the horse temporarily and that Smith had given him permission to use it. He was convicted on September 25, 1907, and sentenced to five to ten years. On June 14, 1910, Jones made his escape from the penitentiary, but the district lawyer was his undoing. Acquaintances discovered his name on the books, and surrendered him to the officers for \$50 reward. Jones' sister had made two visits to Cooley asking her brother's release, and when she returned to Aguilar she had his promise it would be made. Since his return to the penitentiary Jones has been a model prisoner. He is noted there for his skill as a leather worker.

Three New Bird Sanctuaries in Texas. MERCEDES, TEX.—Three wild bird sanctuaries have been established in the Lower Gulf Coast region of Texas, under the direction of T. Gilbert Pearson, president of the National Association of Audubon Societies, who has been spending several weeks in this part of the country making a study of bird life. The reservations which have been taken over for the breeding and protection of birds are Green Island, North Bird Island and South Bird Island. These islands already are populated by many birds, some of which are to be found in no other part of the United States. During his research of the lower border region, Pearson says he discovered not only many practically unknown species of birds, but he found the wilderness alive with other kinds of wild animal life. He was especially interested in the Collared Peccary, commonly known in this region as "The Jayolina," or wild Mexican hog. These ferocious animals roam the chaparral by the thousands. Pearson said: "This region has a wild life found nowhere else in this country. The bird sanctuary and game preserve in need in this section of Texas because geographically conditions have made it the home of a large number of birds strange to the other parts of the United States. Because of the wonderful variety of game the territory is being hunted through extensively, and it will soon be extinct unless protection is given."

Rendering Even Greater the Splendid Isolation of the Big Boss Himself. By C. T. HUTCHINSON, in Mining and Scientific Press. In the old partnerships it was quite a thing to be a member of a firm in good standing. When the corporation came we had a president, a vice president, a secretary and a treasurer. Now the mere president is quite a distance below the actual throne. Over the president we have no less a personage than a chairman of the board of directors or, perhaps, a chairman of the executive committee. It is an insignificant executive indeed who does not have a group of assistants in various capacities. Whereas the vice president in the old days was supposed to be second to the president, we now have a whole flock of vice presidents in charge of finance, sales, production, engineering, etc. Then we have assistants to the president, vice presidents, and so on down the line. Again we have secretaries to these various scions of the industrial aristocracy, and worse yet, there is the secretary to the secretary to the president, rendering greater the splendid isolation of the big boss himself. Industrial life is indeed complex; in fact, as one might say, it is becoming "complex and complex."

Spent Half Her Time in Bed

Farmer's Wife Tells How Lydia E. Pinkham's Vegetable Compound Made Her a Well Woman

Carters Creek, Tenn.—"Three years ago I was almost an invalid. I spent half of my time in bed, being afflicted with a trouble which women of a certain age are apt to have. I took Lydia E. Pinkham's Vegetable Compound Tablets and used Lydia E. Pinkham's Sanative Wash. I am a well woman now and have been for two years. I can work as well as any one who is younger and as I am a farmer's wife I have plenty to do for I cultivate my own garden, raise many chickens and do my own housework. You may publish my letter as I am ready to do anything to help other women as I have been so well and happy since my troubles are past."—Mrs. E. T. GALLOWAY, Carters Creek, Tenn.

Most women find plenty to do. If they are upset with some female ailment and troubled with such symptoms as Mrs. Galloway had, the smallest fifty-cent-a-monthly fee will be the smallest fifty-cent-a-monthly fee. If you find it hard to keep up, if you are nervous and irritable, without ambition and out of sorts generally, give the Vegetable Compound a fair trial. We believe it will help you greatly, for it has helped others.

VICTIMS RESCUED. Kidney, liver, bladder and uric acid troubles are most dangerous because of their insidious attacks. Heed the first warning they give that they need attention by taking GOLD MEDAL HARLEM OIL (CAPSULES). The world's standard remedy for these disorders will often ward off these diseases and strengthen the body against further attacks. Three sizes, all druggists. Look for the name Gold Medal on every box and accept no imitation.

Good Transportation Facilities a Great Source of National Wealth

By COL. H. L. BOWLBY, Pres't Am. Road Builders' Ass'n. Good transportation facilities constitute one of the greatest of the sources of national wealth. We really do not need to search the pages of history to realize the vital part that highways have played in world development. In our day, I believe, the highway will become the great rival of the railroad. The passenger automobile and motor truck industries, two of the greatest in point of capital invested and output, are absolutely dependent for their stability and growth upon good roads. In establishing our highway systems and in building our roads the motor traffic of the future must be gauged and ample provision made for a rapid increase in the volume and weight of highway traffic. While highway improvement has made tremendous strides in the United States in recent years it is still in its infancy. Eighty-five per cent of American roads are yet to be improved. It is not now so much a question of raising the money required to build good roads as it is the problem of spending wisely the large sums available in every state for this purpose. The number of road engineers is entirely too small for the existing demand.

WOMEN NEED SWAMP-ROOT. Thousands of women have kidney and bladder trouble and never expect it. Women's complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease. In the kidneys are not in a healthy condition, they may cause the other organs to become diseased. Pain in the back, headache, loss of ambition, nervousness, are often times symptoms of kidney trouble. Don't delay starting treatment. Dr. Kilmer's Swamp-Root is the physician's prescription, obtained at any drug store, may be just the remedy needed to overcome such conditions. Get a medium or large size bottle immediately from any drug store. However, if you wish first to test this great preparation, write to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Advertisement.

Rendering Even Greater the Splendid Isolation of the Big Boss Himself

Not Ever. Rastus (to Sambo, in an undertone)—"I ain't the man I usester wuz. Time wuz when I could whip the ol' woman in a fair, stna-up fight. The Old Woman (overbearing)—"You a black liar, Rastus Johnning. Time wuzn't, time ain't, no time ain't gwine to wuz."—Nashville Tennessean.

We've Been Trying to Lift Ourselves by Our Boot Straps Long Enough

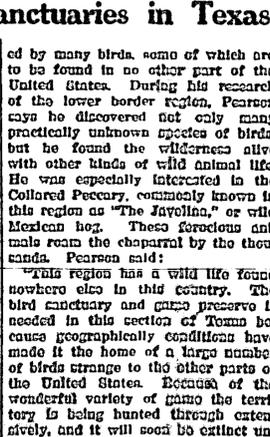

By GEORGE H. REYNOLDS, Chicago Banker. It is time to tear off the mask of false gaiety, halt the carnival of extravagance, and get down to brass tacks. We've been trying to lift ourselves by our boot straps long enough. Conditions in the United States have reached a point where federal reserve assistance and other major influences of tiding over the effects of the World war have been all but exhausted. Individual effort is required to save the situation. The clock has been turned back thirty years. This nation and other nations of the world must realize this fact and go to work as they had to do thirty years ago. All proffering must cease. Protection of labor or any individual class can no longer be obtained by legislation. These resources have been exhausted. I am not in favor of lending vast sums of money to European nations unless we know that the money is to be spent in the rebuilding of industries and the putting of the masses to work and not in false extravagance.

Copper's Motto: "Say It With Gloves"

CHICAGO.—No promotion in the Chicago police department ever caused so much joy among the rank and file as the elevation of Sergeant John McCann to a lieutenant. He is known from Hegewisch to Rogers Park as "Big John." He has been 20 years' service, 24 of which he was patrol sergeant. It is the duty of a patrol sergeant to keep close tab of the men traveling past and see that they perform their work satisfactorily. In the 24 years that John McCann served as patrol sergeant he never took one man before the civil service board. Instead of taking a man before the board McCann has a way of his own of melting out punishment. If necessary he will "go to the rear" with a recalcitrant copper and one lesson of this nature is all that is required. "Years ago we had a gymnasium at the old Harrison street station," said the new lieutenant. "There was a young copper who thought he could drink up all the booze in town. I told him if he came in with his chest full

I would go to the rear with him. He thought I was only kidding. I took him up to the gymnasium and made him put on the gloves. We went to it, and I gave him the nicest trimming a man ever got. From that day he never touched a drop of liquor. "Another fellow who had a wife and three or four kids was in the habit of playing the ponies. Sometimes he wouldn't go home for a whole week. I took him up to the gym and showed him the gold fishes. I just simply had to beat some brains into his head. After that he was all right."

Uncommon Sense . . .

By JOHN BLAKE

ANALYZE MISTAKES

WHEN you make a mistake, find out why you made it. Think it over a few minutes. Fix in your mind the manner in which it happened. Be ashamed of it, if it is a bad mistake. Fear yourself about it, if it is a dangerous one.

The child never forgets the mistake he makes when he puts his finger in the fire. That mistake he has to think about for a long time afterward. One of the kind is always enough for him.

Admiral Peary's Eskimo dogs made the mistake of eating all that was given them when they were encamped in the Arctic regions waiting for one of his dashes to the pole. Apparently they remembered that mistake when the food ran out and some of their number had to be eaten.

When the survivors of the pack returned to America they were very sparing of the food that was given them, and buried the remainder. More than that they secured the neighborhood for food to bury. They had had time to think over their mistakes.

Most people have much the same sort of work to do every working day. Those who do not think over their mistakes continue to make them and

for the most part they always stay where they are.

Men who make the same mistakes twice never get the confidence of an employer.

Those who think about their mistakes, and find out ways to eliminate them, are those who get along.

It is better to discover your own mistakes than to wait for the boss to discover them. Discover them early, and you can do without them the next time.

Go over your work. If it is not up to the mark that you ought to make, you have either made important mistakes, or wasted time, which in itself is an important mistake.

Think about that. Let it sink into your soul. Think how it held your work back, and what the repetition of it will do to your life's work.

This may not contribute to your reputation the night you are thinking about it, but it will make you sleep better for many a night to come. Perfection is the absence of mistakes. We cannot say of us achieve it, but we can all achieve a pretty fair substitute by cutting mistakes to the minimum.

YOUR HAND

How to Read Your Characteristics and Tendencies on the Capabilities or Weaknesses That Make for Success or Failure as Shown in Your Palm

THE FINGER NAIL

WHEN the "moon at the root of the finger nail shows a red color of mixed shading, it is an indication of a combative nature, which delights in contests of bodily strength or mental agility. Note whether the nail of the finger of Saturn, or second finger, bears a white mark. This is held by some authorities to indicate a voyage to be undertaken by the subject. If a nail shows black marks, it is an indication of sorrow and trouble. On the thumb nail, a black mark shows a faulty, passionate nature. On the nail of the finger of Mercury, the little finger, a white spot means a successful business enterprise, and a black spot means the opposite, a reverse or disaster in business.

If there is a white, star-shaped mark on the nail, it is a sign of affection that is not reciprocated, except when the mark appears on the thumb nail, when it means the opposite, or requited affection.

Nails of medium length and width, and of a bluish tint, show that the circulation of the blood is faulty, and there is a tendency toward extreme nervousness.

SCHOOL DAYS

GRANDPA'S BOOTSACK

In lying down to sleep, in waking and in motion, there come no regrets, no torments to torture a guilty conscience, no remorse that aches the heart and drives the soul to despair.

If it did nothing else, this charitable observance would serve at least to give you peace, make you a great-hearted and noble man or woman at all times to strike the nicest balance between right and wrong, and to hold the respect and love of the community in which you live.

And after all to find and done, what is there more to be desired in life than the good will of neighbors, whose hearts and hands are always warm and friendly?

KIDDIES SIX

By Will M. Maupin

LITTLE MAN

THE "Biggest Boy" has gone away. But "Little Man" is here.

I miss the "Big Boy's" heavy tread. But riding sweet and clear, I hear the "Little Man's" request: "When 'Daddy's' face he sees: 'I'm papa's sweetest little man— Give me a penny, please!'"

The "Biggest Boy" is not at home. And though his absence hurts At least there's comfort—I can find Clean collars, socks and shirts. And when I look about me too The "Little Man" is at play. That loomsome feeling in my heart Just somehow fades away.

The "Biggest Boy" has "hit the trail," But "Little Man" still stands Beside his "Daddy's" easy chair And stretches out his hands; He smiles and says with coaxing voice While eliciting on my knees: "I'm papa's sweetest little man— Give me some candy, please!"

One boy has gone to fight his fight; One boy remains with me— The "Biggest Boy" with me— The "Little Man" aged three, And may the one who's far away Miss his big hand and ear, Remain as bold of "Dad" as he Who stands beside my chair.

THE CHEERFUL OPERA

The rain plays music when it falls— I always have imagined that. It played a dandy tune to-day. Right on my brand-new Sunday hat.

Pan American Conference of Women

THE Pan American Conference of Women, to be held April 20-23 in Baltimore in connection with the third annual convention of the National League of Women Voters, will be an important gathering. Its purpose is to carry forward the movement initiated at the Second Pan American Scientific Congress in Washington in 1915 by the formation of a woman's auxiliary committee to develop closer co-operation between the women of the Western Hemisphere. The invitations to the conference were sent out by the United States State Department on behalf of the National League of Women Voters, which is the latter day form of the old-time National American Woman Suffrage Association. Early acceptances were received from seven Central and South American nations and at this writing official representation of virtually all the republics of Hispanic America seems assured, as well as of Canada. The attendance of delegates from women's organizations of various kinds is expected to be large.

The opening feature of the conference will be a series of round-table conferences on subjects of special interest to women. They include such topics as child welfare, education, women in industry, civil status of women and social hygiene. The sessions will be in charge of eminent writers, each an expert on his special subject. These experts have been invited to lead the discussions, but it is expected that delegates from the Pan American countries will play an active part.

The League of Women Voters has planned its program in the belief that not only will a Pan American gathering of women tend to cement a closer bond of fellowship between the American peoples, but that very definite results may be achieved through the round-table conferences. Thinking women everywhere are recognizing today the necessity of raising the standards for women in industry, of securing legislation that will guard the civil rights of women, and of protecting in every possible way those who need protection. To this end it is fitting that the women of the American continent should come together to discuss the best means to the desired end, and that they should have an opportunity to help one another through friendly conference and consultation.

Mrs. Carrie Chapman Catt, president of the International Woman Suffrage Alliance and honorary chairman of the National League of Women Voters, who is to lead a conference dealing with the "Political Status of Women," has said: "We know that women have particular desires, hopes which are peculiarly their own, ideals which their habits of thought and life have developed within them. It is of the utmost importance for all women to draw closely together, so that those who think and are able to formulate constructive programs may give to their groups, their communities, the highest interpretation of the woman's point of view."

The round-table conferences are to be held at April 20, 21, and 22. Sunday, April 23, a mass meeting is planned, which will be addressed by the Pan American delegates, the general subject being "Leaders Among Women." This topic should call forth not only inspiring stories of the women whose names are recognized in the history of the American, but those of the great women of our own day, pioneers of this generation, who are making the way clearer for the women and children who are to come.

On the evening of April 23 a banquet will be held. There will be speeches by eminent men and women of the United States and by the Pan American delegates. The general subject of these speeches is to be "International Friendship."

The next three days will be given to sessions of the annual convention of the National League of Women Voters. To these meetings the Pan American guests are cordially invited, and all the privileges of the floor will be accorded them except a vote.

The program for the conference will not close until April 23. Plans are being made for the entertainment of the delegates during the closing days, and many groups and individuals have expressed a wish to extend hospitality to the visitors. Miss Maud Wood Park has invited the league to bring its guests to the college for a day, when Dr. M. Carey Thomas, its president, will give them a luncheon. Gardner College, in Baltimore, also wishes to throw open its doors to the conference guests and extend a cordial offer of hospitality and co-operation.

Other special features that have been planned are a trip to Annapolis and a day in Washington.

The invitation to Annapolis, the capital city of Maryland, comes from the governor of the state, who will receive the delegates. A visit to the United States Naval Academy will be included in the program of the day.

The day in Washington will be given largely to visiting places of interest—the Capitol, the Pan American Union, and other public buildings. In the evening a mass meeting will be held, at which prominent speakers will discuss "What the Women of the American Can Do to Promote Friendly Relations"—a subject which embodies the guiding thought of the entire conference.

Mrs. Maud Wood Park, president of the National League of Women Voters, has said that women are instinctively ready to work together for the things that they wish to accomplish, because their interests are co-operative rather than competitive.

"Women's distinctive interests," Mrs. Park said, "are in common—home making, children, general welfare—whereas men's distinctive interests are sometimes of necessity conflicting and have to be settled by compromise. There is nothing about the ordinary occupations of women which is competitive. To illustrate, if the women of one nation are able to secure a child-welfare measure, and to develop and improve their work along these lines, their step is advanced in a way that is a hindrance to the women of all other nations. The occupations and interests of women are the occupations and interests of peace, and lead themselves readily to co-operation."

While the leaders of the round-table conferences will prepare outline programs covering the topics under discussion, they have agreed that these programs should be informal and elastic, offering ample opportunity for free expression of ideas.

Mrs. Julia Wade Abbott of the United States Bureau of Education, will be in charge of the conference on "Education." Speaking of the plan for this conference, Miss Abbott says: "It is significant that the women of the Western Hemisphere should come together at this time to discuss education in its relation to the welfare of women and children. This conference should help define what is meant by the term 'American education.' For the term American education should be applied not only to the 48 different state systems in the United States of America, but to the common goals and interests of the people of this New World: in Canada, in the countries of South America and Central America, and in the United States of America. On this side of the water we are more or less free from caste and class distinctions. As women, we have been the first teachers of the race, and with us education has always been related to life. It is too much to hope that because we bring an untrammeled point of view to this conference we may make a real contribution to education. In discussing educational conditions in the different countries the efficiency of the schools may be tested by the degree to which they are providing for the great objectives of education—health, practical efficiency, citizenship and the enjoyment of life."

Mrs. Mary Anderson, chief of the Bureau of Women in Industry of the United States Department of Labor, will be the leader of the conference on "Women in Industry." She says: "The conference will be interesting to the women in industry because of the large import and export of commodities produced in South American countries and in the United States. Women in the industries of all these countries are faced with common problems which must be solved in co-operation. Industrially the Americas are linked and the standards of one must affect those of the other. For instance, in both the South American countries and the United States we have common-

ties which are manufactured in the homes. Home work in these lines is not what it was before the development of industry when all the spinning, weaving and the making of clothes, shoes and gloves, and most of the food products which are now made in the big factories, were manufactured in the home. The difference in home work now and then is that instead of work going from the home out to the factories, the work is now collected in the factories and taken to the home, finished and carried back to the factory. The poor conditions which usually surround home work, the child labor which enters into it, the impossibility of regulation by law either as to limitation of hours of labor, and the competition of low wages, all militate against the health, happiness and efficiency of the individual, the industry, and the community."

The conference on the "Prevention of Traffic in Women" is to be led by Dr. Valeria H. Parlor, executive secretary of the Interdepartmental Social Hygiene Board. Dr. Parlor speaks of the plan as follows:

During the past three years the United States government has been expending generous sums of money for social hygiene purposes. The women of the United States have supported the government program actively. They recognize that much remains to be accomplished and are determined to make every effort to prevent the re-establishment of the vice districts closed during the war. There are many vexatious problems connected with the abolition of the evil vice.

Mrs. Grace Abbott is to lead a conference on "Child Welfare." Miss Abbott is chief of the children's bureau in the United States Department of Labor. She says of the conference:

Latin Americans interested in the problems of child care took the initiative in calling a Pan American Child Welfare conference in Buenos Aires in 1913. Its objects were to establish and cultivate a common understanding of these problems among those who are specialists in that field. A second meeting of the congress was held in May, 1915, in Montevideo. On both of these occasions students and workers in the field of child care in the United States failed to appreciate the opportunity which the conference offered for comparison and co-operation in the work, as well as for Pan American acquaintance and understanding. This invitation to the women of North and South America to join with the League of Women Voters in the discussion of child welfare and other common problems is therefore a particularly happy one.

The conference on Child Welfare will have before it the problem of public provision for (1) maternity and infancy, (2) child hygiene, (3) child labor and industrial problems affecting children, and (4) children in need of special care—the dependent, neglected, defective and delinquent children. It is hoped that formal papers can be all but eliminated and informal discussions and exchange of experience and plans can be relied upon to make the conference one of really practical value. It ought to be possible to work out as a result of these meetings what may be regarded as Pan American standards in these several fields of child welfare, which will be an expression of what the women who represent the young, rich and powerful republics of the New World, hope they may secure for all the children of the American republics. It may be that out of this meeting there will be developed a national reality in the care of children and, in consequence, of the quality of the citizenship. In such a reality there will be only rejoicing on the part of all as the standard is pushed higher and higher.

"The Civil Status of Women" will be the subject of a conference led by Mrs. Isabel Walker Whitehead, assistant attorney general of the United States.

Something to Think About

By F. A. WALKER

RESTRAIN YOUR SPEECH

WHEN inclined to speak of a person's faults, though he or she may be unfriendly towards you, restrain yourself, and think of your own shortcomings.

Then, if you are a charitable soul, you will turn your conversation into another channel where there are no hidden dangers and no calling under clear skies in joyous sunshine.

One thoughtless, impulsive, slanderous word spoken in the presence of others, and particularly in the hearing of those given to gossip and disposed to magnify what they hear, may ruin an innocent man or woman for life.

Clean your own house before you set about the task of cleaning the house of your neighbor.

Purge your own soul of shortcomings and you will find yourself so busy in doing it that you will not have time nor inclination to discuss the defects of others.

"Let him without sin," said the Master of Men, "cast the first stone." And the accusers of a hapless woman stole away, one by one.

Your faults and my faults have come down to us through the ages. So, let us always curb our speech, wherever we may be and think noble thoughts instead of the kind that debase others and ourselves as well.

Aside from the good policy of speaking no evil, there comes to the man or woman who may adopt it, a divine sense of serene happiness that cheers our way like the stars of night.

And another thing that accompanies such a course is the ability to make friends and hold them in all sorts of weather.

MOTHER'S COOK BOOK

by Nellie Maxwell

With weights and measures just and true. Oven of even heat. Well-buttered tins and quiet nerves. Success will be complete.

—Mary C. Upham.

GANDIES FOR THE CHILDREN

AT ALL times of the year the children dread cleaning for candy, but during the cold weather it is more frequently made in the home.

Opera Pendant.

Put two cups of sugar and one cup of heavy cream into a saucepan and stir until the sugar is dissolved and the boiling point is reached, then add one-eighth of a teaspoonful of cream of tartar and boil until the syrup makes a soft ball when dropped into cold water or until the candy thermometer registers 235. Pour at once into but crocheting the dish on to a marble slab or large platter lightly greased with butter. When cold wear with a wooden spoon or bread spatula until it forms a ball. Cover with a damp cloth and leave for half an hour. When knead and mold with the hands until smooth, adding such flavoring and coloring as desired and pack in a cellophane cover clearly and leave until wanted.

Opera Bonbons.

Divide opera pendant into several portions, flavor each and color, then

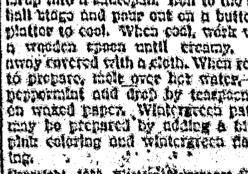

Cream Mints.

Put one and one-half cups of sugar, one-fourth of a cup of water and two tablespoons of corn starch into a saucepan. Boil to the soft ball stage and pour out on a buttered platter to cool. When cool, work with a wooden spoon until creamy. Set away covered with a cloth. When ready to prepare, melt over hot water, add peppermint and drop by teaspoonfuls on waxed paper. Wintergreen patties may be prepared by adding a bit of pink coloring and wintergreen flavoring.

(Copyright, 1918, Western Newspaper Union.)

INDIVIDUAL FARMING.

What a success! You call this a dandy farm! It's no bigger than a city lot. And you can see a feed store, a cow, a pig, a hen, a rabbit, and they give condensed milk.

THE rain plays music when it falls— I always have imagined that. It played a dandy tune to-day. Right on my brand-new Sunday hat.

AS A MARK OF HER APPRECIATION

Business Man Must Have Been Deeply Touched by Gratitude Shown by Female Client.

more, I want to show my appreciation by giving you a present."

"That is not at all necessary, Mrs. You can thank the bond market for your profits," said the broker.

"That may be, but it was your advice and work that produced the profits and I must be permitted to show my appreciation," she replied. The bond man decided to let it go.

A parcel was on his desk when he reached the office next day. It contained a rather lumpy package, together with the lady's card—Wall Street Journal.
