Subscription Price, \$1.50 a Year

Will Hunt for Ancient Aztec City

Gen. Melville Boynton, mining engineer and soldier of fortune, has left San Francisco with 24 adventures of that city to hunt for the fabled Aztec city of Aztec in Mexico and its treasure. The city will be found within a hundred miles of Culiacan, according to the general, and will disclose a civilization older than that of King Min-Ah-Ah-Ah. Above are shown Boynton and Miss Mayne Williamson, artist and former army nurse, who is the only woman in the party.

Five Simple Rules for Bonus Claims

Finger Prints Ordered as Safeguard Against Fraud.

Washington.—Printing of the blanks on which more than 5,000,000 veterans of the World War will make application for adjusted compensation as recently enacted, is well under way.

The blanks will be distributed among the veterans through newspapers, the Post Office department, the American Legion and other patriotic societies in touch with the veterans. Within a comparatively short time many veterans are expected to have received a blank and made application for the bonus.

Although a drive will be made to get the application immediately, no cash payments will be made before March 1, 1925. Adjusted service certificates will be dated January 1, 1925, if the application is made prior to that date. If it is made after that date, the certificate will be dated the first of the month following the application.

As soon as the bonus bill has passed over the veto of the President, the War department issued instructions as to the proper method in applying for the bonus. Finger prints will be used on the applications as a method of identification.

This is done to protect veterans and their dependents from fraud, and to provide identification in the future.

Five Rules Established.

Rules formulated by the War department in connection with application for a bonus read:

"1. Do not write for application blanks. These will be distributed as soon as prepared, and unnecessary letters will only create confusion and delay.

"2. Read carefully the instructions which will be printed with the application blank.

"3. Do not pay fee other than a notary charge. The law prohibits any person for charging a fee for assistance in collection of the compensation.

"4. Do not write the War department for any information required by the blank. If the individual has not the information, supply it as best he can from memory. Inquiries to the department would only serve to delay the case by the double search of the records which would be involved.

"5. Mail application blanks in the envelopes which will be distributed at

How to Figure It.

How an ex-service man who receives a paid-up insurance policy under the bonus bill may figure the maturity value of his policy at death or at the end of twenty years follows:

First, total the number of days served at home and overseas and deduct 90 of those served at home, which are excluded as having been covered in the 90 bonus paid upon discharge after the armistice. Multiply

the same time. This will facilitate reports of applicants at the proper of age.

The scale of payment under the bonus bill is differentiated between home and foreign service, as is pay to the army and navy. The home service pay is based on a scale of \$1 a day, and that of foreign pay is based on a scale of \$1.25 a day.

Send Photographs Over Phone Lines

Device Successful in Cleveland-New York Test.

New York.—Transmission of photographs from Cleveland to New York city over long-distance telephone lines was accomplished in a demonstration by laboratory experts of the American Telephone and Telegraph Co.

The method, achieved after several years' work, was described by officials of the company as a "simple, rapid and accurate transmitting system."

It will be installed on the company's various long-distance lines. It was announced in accordance with the demand which arises for this type of service.

Cleveland was selected as the place for the transmitting station, so that pictures taken at the Republican national convention might be transmitted to New York within a few minutes.

Actual transmissions showed that photographs could be transmitted to New York and made ready for producing newspaper plates within ten minutes from the time the original photograph was placed in the transmitting machine.

NEWS TO DATE IN PARAGRAPHS

SAUGHT FROM THE NETWORK OF WIRES ROUND ABOUT THE WORLD

DURING THE PAST WEEK

RECORD OF IMPORTANT EVENTS CONDENSED FOR BUSY PEOPLE

WESTERN

Four men in an automobile held up two employees of Frederick & Nelson's department store in Seattle, Wash., obtaining funds for bank deposit said to be approximately \$20,000. The robbery took place in front of the Seattle National Bank.

An unidentified burglar was shot and killed by a negro chauffeur at the home of Walter W. Head, president of the American Bankers' Association and the Omaha National Bank at Omaha. Mrs. Head is in Europe and Mr. Head is in the Pacific Northwest.

Construction of a new railroad to cost more than \$15,000,000 and running from Casper, Wyo., to Craig, Colo., and thence to the Hamilton Colorado oil fields, will be started during the coming summer, according to John C. Hayes, Denver engineer, who is one of the incorporators and directors of the newly-formed company.

E. L. Talley of Arizona, Emmett D. Boyle of Nevada, and George A. Stahl of Denver were named a special committee to recommend expedients for stabilizing the mining industry. The action came at the conclusion of the annual meeting in Grand Valley, Calif., of the western board of governors of the American Mining Congress. They will report to the congress in Sacramento in September.

Six men and two boys, members of a fishing party, were pounded to death on the rocks of Newport bay, Calif., near Santa Ana, Calif., when the launch in which they were heading out to sea was smashed and capsized. Five others were saved. Except one, the six men lost all were well-known business men of Santa Ana. The two boys were sons of a Santa Ana merchant and died with their father.

Announcement at this time that the cause of cancer had been discovered and a "remarkably successful" cure evolved is premature, it was declared in a statement issued in San Francisco by Dr. T. J. Glover. The statement expressed regret that the announcement had found its way to the papers at this time. "Any further statement from me or any discussion of this subject will be before a body of men of my profession," it continued.

WASHINGTON
Ninety-three million bushels less wheat than last year was forecast by the Department of Agriculture from June 1 conditions. Winter wheat prospects declined 44,000,000 bushels in the month since May 1, due mainly to drought, cold weather, insects and disease in the principal producing states.

Officials of the Department of Commerce do not believe that the threatened boycott of American goods by Japan will prove to be of serious proportions. If boycotting takes place it will not affect the great bulk of the American export trade to Japan, of which the principal items are iron and steel and raw cotton, according to the view of authorities on the subject.

Former Gov. John C. Walton of Oklahoma failed to secure a review by the United States Supreme Court of his impeachment and removal from office by the Oklahoma Legislature.

Legal proceedings have been started in the District of Columbia Supreme Court to stop the soldiers' bonus. Benjamin Gathings of New York, who was not identified except as a "taxpayer," asked the court to get out an injunction restraining government officials from issuing the insurance certificates authorized for \$4,000,000 World War veterans under the new bonus law which Congress passed over President Coolidge's veto.

Appropriation among the states and Hawaii of \$70,000,000 for federal aid highway construction for the year beginning July 1, has been announced by Secretary Wallace. Prompt appropriation of the federal funds insures continuation of the work without interruption. Of the 170,000-mile federal aid highway system, 60,000 miles have been surfaced and 87,000 miles graded, leaving 110,000 miles to be surfaced, which will require an annual program of 11,000 miles to be completed by 1931.

Express rates throughout the country were ordered reduced by the Interstate Commerce Commission, which authorized partial increases in the Eastern zone approximating 8 percent and slight reductions in the West and South, effective Jan. 1, 1925.

President Coolidge does not feel that an extra session of Congress was made necessary by the failure of the Senate to pass the deficiency appropriation bill. The President directed government officials to take every step possible under the law to meet the emergency arising from the situation.

FOREIGN

Capt. Pelletier Dolsy, the French aviator flying from Paris to Tokyo, has arrived at Seoul (D. Hiresima) from Tokyo, Korea.

The American army around the world files have arrived in Hongkong from Amoy. The aviators made the 300-mile flight from Amoy in three hours and fifteen minutes.

President Obregon returned to Mexico City carrying the felicitations of thousands of Americans and native Mexicans who greeted him at Nogales, Sonora, on his visit to his home state since he assumed the presidential chair.

Lieut. Pelletier Dolsy, French long distance aviator, who set out from Villa Comblay, France, April 23, to fly to Tokyo, reached his destination June 9. Dolsy had flown from Shanghai with a borrowed Chinese plane, his own having been damaged in landing.

Two Japanese naval officers and three noncommissioned officers were killed and a fourth noncommissioned officer received injuries which are expected to prove mortal in an air disaster at the Yokosuka naval base on Tokyo bay. The six were aloft in a hydroplane when its fuel tank exploded. The craft fell about 600 feet, landing in the rocky hills above the naval base.

The Franco-Luxembourg temporary military was defeated in the French chamber of deputies by a vote of 229 to 214 on the adoption of a motion offered by Majority Leader Edouard Herriot not to open a discussion with a government not in conformity with the sentiment of the country. This action is considered equivalent to forcing President Millerand out of office.

Minister Baggi, of Precoia, Italy, has determined to put an end to immediate dressing and has had posters placed on the doors of all churches and also orders read during all masses, stating: "Ladies and girls are warned they will be expelled from the churches if they dare present themselves with naked arms and low necks; if, in other words, they are dressed contrary to modesty which any well-bred woman should feel."

Nogales, Sonora, Mexico.—Oil interests were upbraided on the "most formidable barrier" in the way of Mexico's desire for moral, social and political revolution, by President Alvaro Obregon in a statement issued a few days ago in Nogales, Mexico. "Material interests have constituted a real gravestone which prevented any movement of every noble idea," the president said, "and that gravestone is made of oil."

GENERAL
Jack Lawyer, Omaha prizefighter killed by Patrolman N. E. Nelson of the Omaha police department, was slain while trying to escape arrest after an attempt to commit robbery, a coroner's jury held. The verdict recommended execution for the offense.

The house of delegates of the American Medical Association in convention in Chicago adopted a resolution calling for the repeal of "those sections of the national prohibition act which interfere with the proper relations between the physician and his patient in prescribing alcohol medicinally."

Under sentence of life in prison for the murder of Mrs. Mary C. Davis, mother of the city's fall at Wilmington, Del., Anna Lewis, colored, was prepared for removal to the state penitentiary to start serving her term. The negroes killed Mrs. Davis during an attempt to escape from the jail.

A woman carrying a small infant in her arms and flourishing a revolver with the other held up a restaurant at South Dayton, Pa. Accompanied by two men the woman backed waitress and patrons into a corner. The trio then fired the cash register and escaped in an automobile.

Declaration of intention to file a suit asking \$100,000 damages for losses resulting from Nathan Leopold Jr. and Richard Loeb, held as slayers of Robert Franklin, was filed in court in Chicago by attorneys, who refused to discuss the suit other than to explain that it was "for an attack upon this woman."

Replying to the statements attributed to President Obregon of Mexico, attacking American oil interests, Guy Stovena, of New York City, director of the Association of Producers of Petroleum in Mexico, denied that oil companies were engaged in any conspiracy against the stability of Mexico's institutions.

A cordon of 150 policemen, fifty physicians and assistants effected a smallpox quarantine in Detroit, Mich., about a fifteen-block section of the East Side in a determined effort to prevent any new outbreak of the epidemic, which is now under control. No person is permitted to leave the district, which is a residential-buenaire section populated largely by foreigners, until he is vaccinated. Street cars are not permitted to stop.

That the United States Olympic swimming team this year will be composed largely of record-breaking performers was indicated when competitors for the team swam two more Olympic records in their final tryouts at Indianapolis, Ind. Lester Smith of the Olympic Club, San Francisco, broke an Olympic record of twenty years standing when he won the 400-meter free style swim in 6:21. The Olympic record of 6:44.23 was established by G. E. Hodgson of Canada at Stockholm in 1912.

COOLIDGE HEADS G. O. P. TICKET

FORMER U. S. DIRECTOR OF BUDGET WINS SECOND PLACE AFTER SPIRITED SESSION

DAWES IS NOMINATED

LOWDEN DECLINES TO ACCEPT REPUBLICAN NOMINATION FOR VICE PRESIDENT

CLEVELAND, O.—Coolidge and Dawes

is the Republican ticket for 1924. President Coolidge's nomination was completed with only a ripple of dissent from Wisconsin and North Dakota, but the nomination of his running mate came only after the convention had once chosen Frank O. Lowden of Illinois and been forced by his declaration to choose another—Charles G. Dawes, the "Hell and Maria" general. After a short race with Herbert Hoover, who came into the balloting after the declaration of Lowden, Dawes galloped off with the nomination.

Motions to make it unanimous and by acclamation were disturbed only from the dissent of Wisconsin and North Dakota.

The unofficial totals were: Dawes, 623½; Hoover, 234½; Kenyon, 63.

In a brief and spectacular fight in which William Butler, President Coolidge's campaign manager, had said to

CHARLES G. DAWES

Senator Reed of Pennsylvania, "It must be Hoover," and Senator Reed had replied, "It can't be done, it must be Dawes." The Dawes supporters, after the declaration of former Governor Lowden of Illinois, marshaled their forces and put the general across for the nomination.

Earlier in the day Mr. Butler's forces had passed the word that the administration men desired the nomination of Theodore D. Burton of Ohio, and in the voting which followed the supporters of Frank O. Lowden of Illinois ran away with the nomination for their man only to have him decline it.

Party managers, under the new regime who waited calmly on the platform for the votes to turn to Burton as they expected, saw the Lowden strength suddenly leap and grow and carry the convention off its feet.

Then a letter, written by Mr. Lowden, and addressed to the convention, to be read in the event that it persisted in nominating him was read from the platform. Still refusing to recognize his declaration, Senator Willis moved to lay it on the table and adjourn.

"While this has been done, it can't be read," he exclaimed. But there was opposition to that procedure and while the leaders were wrangling and wondering when to turn, prices dropped were leveled in the convention hall, direct from Chicago, Illinois. Mr. Lowden's home, returning his refusal to accept the nomination.

Then the Lowden people abandoned hope that the former governor would accept and each little group of leaders turned helplessly to the other wondering what to do next. In the meantime the convention hall was in the greatest disorder.

It was agreed on all sides that the only thing for the convention to do was to go on it again and begin balloting for vice president all over.

Belgium Releases German Prisoners
Danzon.—The Belgian government has ordered the release of fifty German political prisoners condemned for offenses in the Ruhr. The nation is intended to make easier the German government's acceptance of the Dawes reparations settlement report.

\$1,000,000 Lost From Mail Car
Chicago.—Forty packages of real-estate mail containing bonds and currency valued at more than \$1,000,000 were stolen by train robbers when they held up a Chicago, Milwaukee & St. Paul mail train near Mount Airy, N. C., and its first scheduled stop was at Allentown, Pa. Three of the robbers rode "blind baggage" or just back of the tender of the locomotive of the train.

NEW MEXICO STATE ITEMS

A class of twenty sturdy young men

was graduated from the New Mexico Military Institute at Roswell.

Wheat prospects are about the best in the vicinity of Roswell at the present time, that they have been at any time during the past three years.

Sheriff Joe Montoya of Sandoval county was shot in the left leg during a gang fight in the streets of Bernalillo. The wound is not serious.

Geno Perdue, one of four persons indicted for the murder of Fred Halvey, a rancher, was acquitted at Roswell on instructions from the judge to the jury.

Mrs. Turner Anderson and Mrs. W. T. Collier were both badly injured in an explosion while on a fishing trip to the Whitewater Creek country near Silver City.

The first crop of lettuce on the big Storrie project near Las Vegas, will be ready about July 4, when nearly 100 car loads will be shipped to the canton markets. The crop will be handled through the American Fruit Growers' Association.

Crop conditions are excellent in the Pecos valley, according to Santa Fe railway officials who recently inspected farms, livestock and industrial conditions in the valley. The country has taken on the appearance of a well-established, permanent development.

The Laton Carter Manufacturing Company will be the name of a new concern which has selected Laton as the site of a factory which is to be erected this summer. The new company will put on the market a new egg carton which was recently invented by D. L. Pitta.

The new fish hatchery at Jenks, Okla., on the West Fork of the Oklahoma river, has been completed according to J. P. Beagard, who has had charge of the construction. The capacity will be 500,000 trout fry annually and the output will be used in the streams of the Upper Oklahoma and Magdalena country.

A threatened "hock tie" party, which was planned by several men on an eastbound train near Las Vegas, according to Grand Jurors, was prevented by the police. The party, which was to be held at the home of a local woman, was broken up by the police.

Life Insurance companies paid out \$422,963.40 losses in New Mexico last year, which was \$23,934.41 more than they paid out in 1923, according to figures compiled by Walter H. Wagner, head of the state insurance bureau. The amount paid out in 1923 was \$447,701.03. In 1923 the number of claims paid was 23 and in 1923, 214.

Green premiums received by these companies from New Mexico policyholders last year totaled \$2,169,723.12; the year before, \$2,034,012.02—an increase of \$135,711.10 last year.

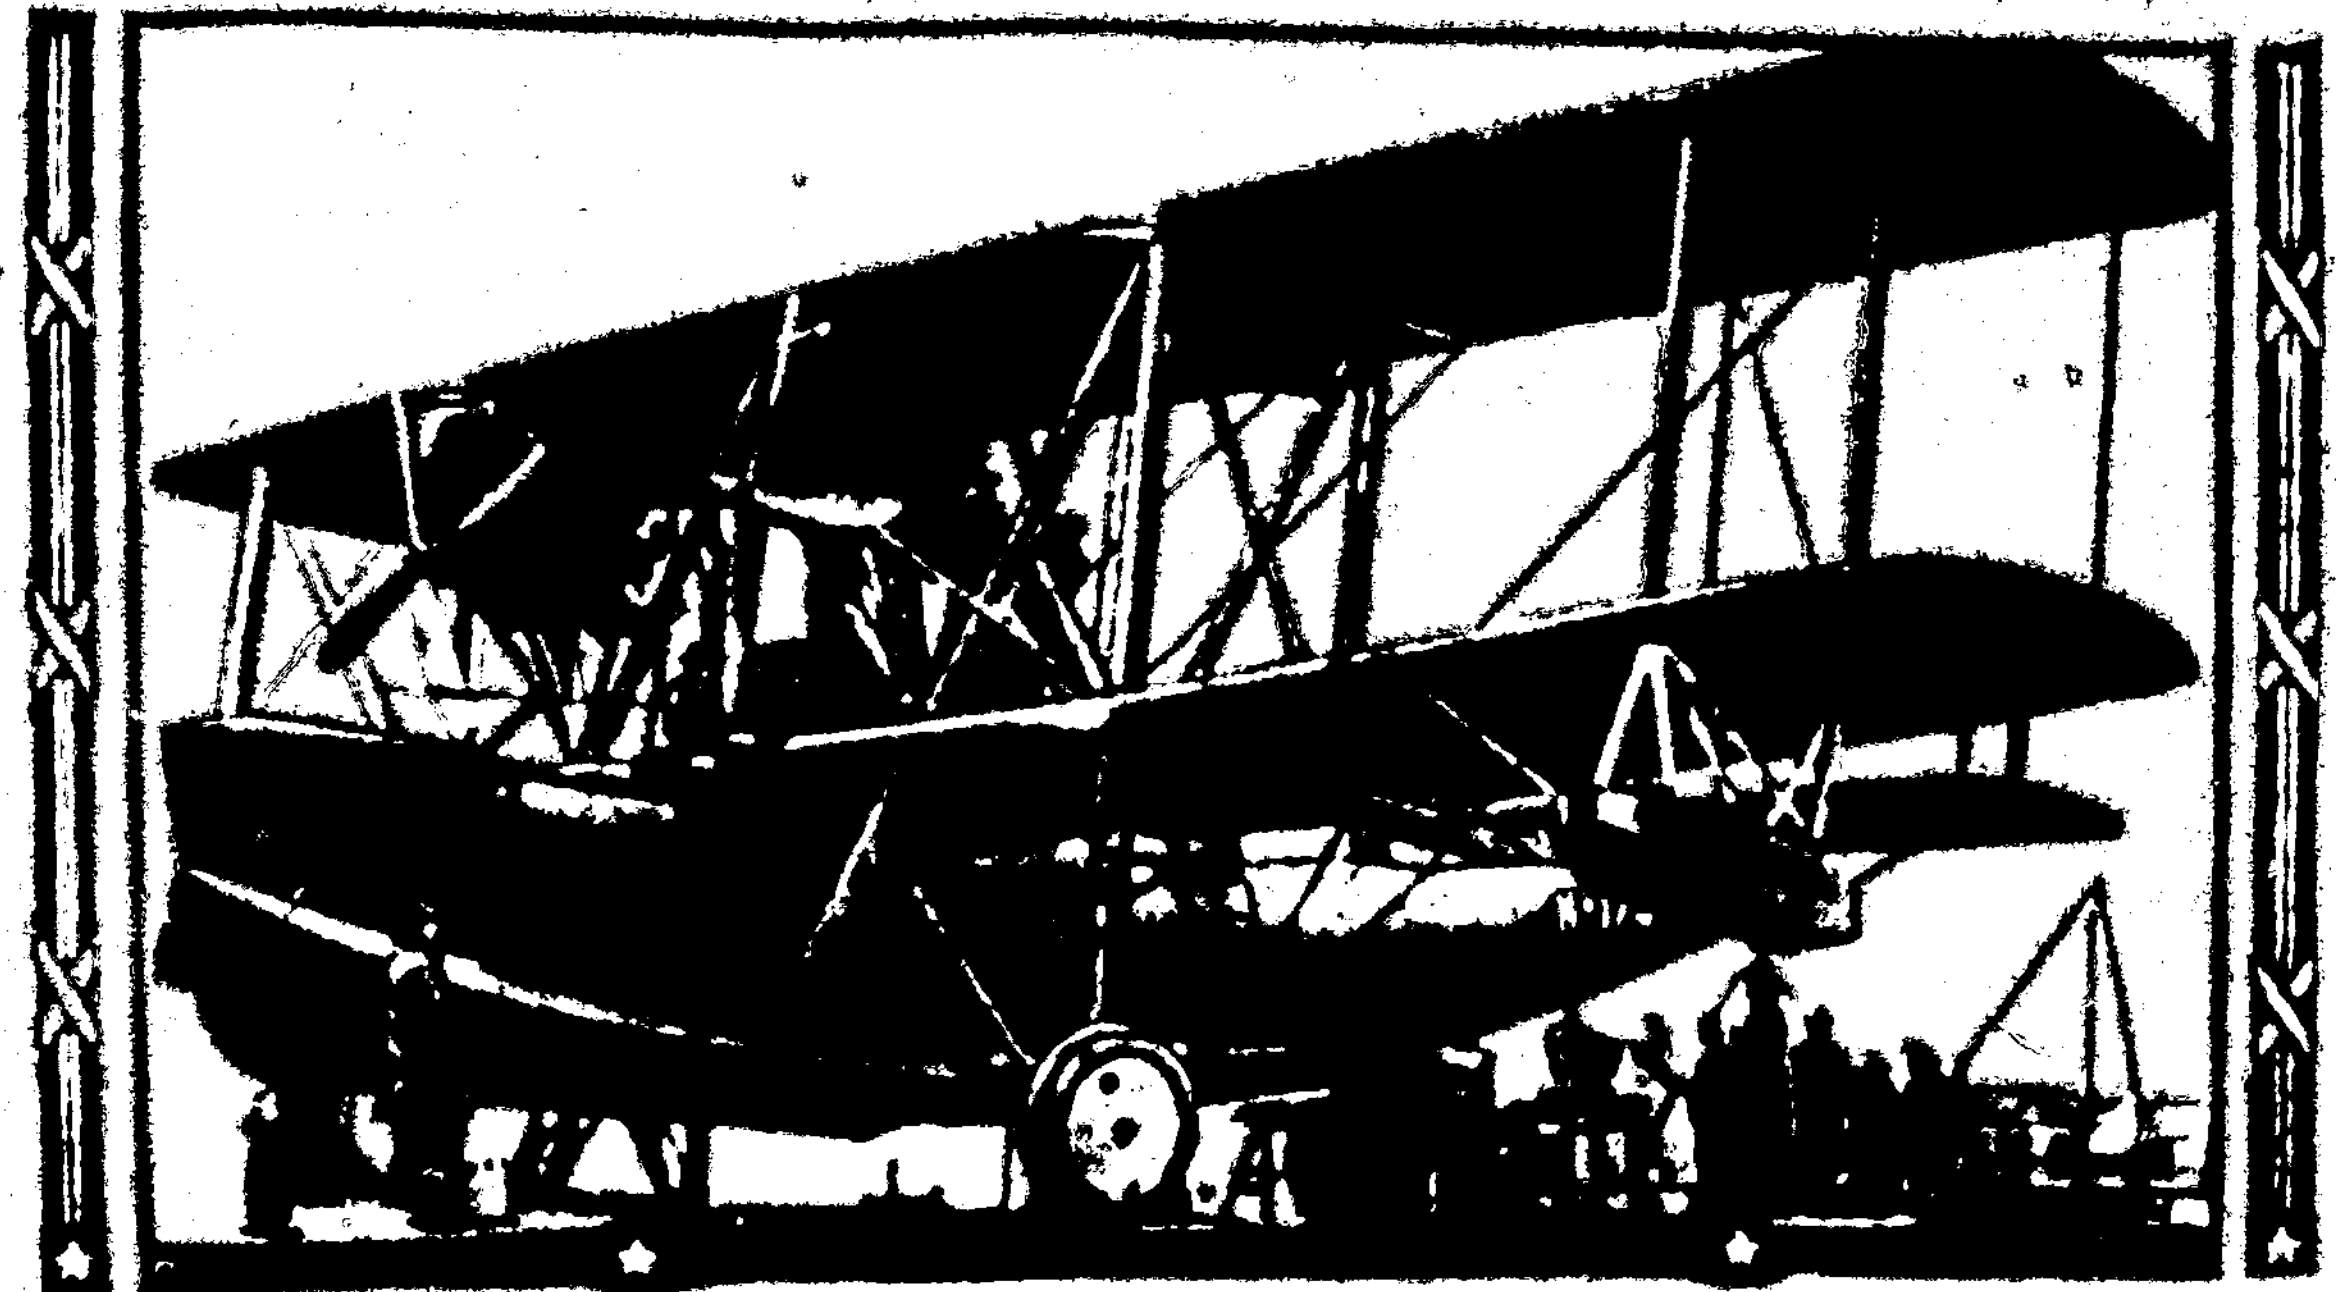

The officials of the Lincoln Forest and the McIntosh Indian reservation have formed an agreement for cooperation in preventing and suppressing forest fires. The forest service will maintain lookout firemen at Wefford station near Chandler, Gavilan tower on the Redwood and at White Mountain tower. The Indian service agrees to maintain patrolmen who will make observations from two high points in the Milk Creek, and to keep fire guards at the Redwood ranger station during periods of fire danger.

The \$100,000 bond issue voted some time ago at Las Vegas was paid by the school board at a premium of \$1,000 making the price slightly above 101. The bonds bear interest at the rate of 6½ percent. The money, which will be available at once, will be used for the building of a union district high school, plans for which are now being drawn. It is hoped to have the construction work on the new building under way in the next sixty days.

According to a report by District Engineer L. E. Barker, the new highway from Las Vegas to the Springs will be completed in the next sixty days. The road is to be graded, drained and surfaced as far as the available funds will permit and will be one of the best in the district. Work has also been started to complete the work on the new road through the Madra Valley and this will be finished this summer.

The United States Indian school at Albuquerque will accommodate 500 pupils this year, an increase from 400 pupils last year. The building is in charge of Edgar A. Morgan, publicity chairman of the Alameda County Commercial Club. "Cloudcroft has organized a commercial club which will boost that city as a winter resort as well as a summer playground."

New Type of Amphibian Plane Is Built in England

Above is shown the first twin-motored amphibian plane ever built and which recently passed all tests. The plane has been turned over to the British air ministry. It is fitted with two 300 horsepower Rolls-Royce "Merlin" engines and is one of the new type of planes being developed by the civil aviation department of the air ministry for commercial purposes. The amphibian is designed to carry 12 passengers, a pilot and an engineer. It is capable of taking off and landing on land or water.

Blow Blown Hand Hurt.

In an accident which occurred on the West March Tuesday, W. S. Jackson suffered a painful but not serious injury when he fell from a ditcher on which he was working.

The injured man had two or three ribs broken and his head badly shaken.

"Joy Makers" at Nogal.

Nogal, June 19.—The dance committee for the big, Lincoln County Picnic and Free Barbecue which is to stampede all the "joy hounds" in this direction on July 4th, wish to announce, in no uncertain voice that that aggregation of "joy dispensers" and "gloom dispellers," known as "Ferguson's Joy Makers," have been persuaded—and it took considerable of their favorite persuasion—to bring their four piece orchestra from Tucuman and play the wonderful music for which they are justly famous. These birds will be much in evidence during the gala day and night, and if you are a glutton for music and dancing this will be your opportunity to gratify the appetite.

The dance floor is such as to rival, if not far excel, any of its kind, in dimensions and excellence.

This committee disclaims any inference to the effect that they are a decrepit bunch of moth-eaten "has-beens," and wish it made clear that they are far from the age that is interested in monkey gland operations, and profess that it will make it the official function of the dance committee to see that all ladies have dancing partners even if they hunt a gallus and have to call in a bunch of bronc riders and steer and goat ropers to their aid. —LET'S GO!

Strayed or Stolen.

One bay horse about 4 years old this spring branded LAY H. (—) on left shoulder. Disappeared from my place Wednesday or Thursday night—the 6th or 7th of this month. \$5.00 reward for his return to me at my place 12 1/2 miles north of Capitán, C. H. HARR.

Pure Honey

OUR CHOICE HONEY will be on the market in a few days. We cater to particular people. Here are some reasons why you should buy the Hedstrom-Allen honey:

1st—We use Queen Bees. These separate the young bees from the honey. You get the pure honey with the true flavor.

2nd—We leave honey in the hive, and let the bees ripen it. This gives it the best flavor and it will keep its true flavor always.

3rd—We make prompt deliveries and our prices are low for this high-grade honey.

Be sure to put in your order early if you want some of this delicious honey.

FEED MORE SILAGE
TO DAIRY CATTLE.

Bulletin by New Mexico
College of Agriculture
and Mechanic Arts.

Alfalfa prices are high in most parts of New Mexico, and will probably remain so for the coming year. The Dairy Department of the New Mexico College of Agriculture, advises dairymen to cut down expenses by using more silage in feeding their cows.

This is particularly good advice in cases where alfalfa has been fed heavily, or where it has constituted the only roughage.

One of the several reasons why alfalfa is such good roughage for dairy cows is the fact that it is comparatively high in protein. A satisfactory substitute for alfalfa must consist of a cheap, low protein roughage like silage, together with enough cottonseed meal to keep up the protein content of the ration. Cottonseed meal, while it remains under \$70 a ton, is a cheaper source of protein than alfalfa at \$20 a ton, when fed in conjunction with silage.

In addition to cheapening the ration, silage adds succulence, and helps to keep cows in good condition for producing milk. In dry farming sections, silage is the most economical form in which corn and grain sorghums can be fed, and they can be preserved in this way throughout the year, and even from one year to the next.

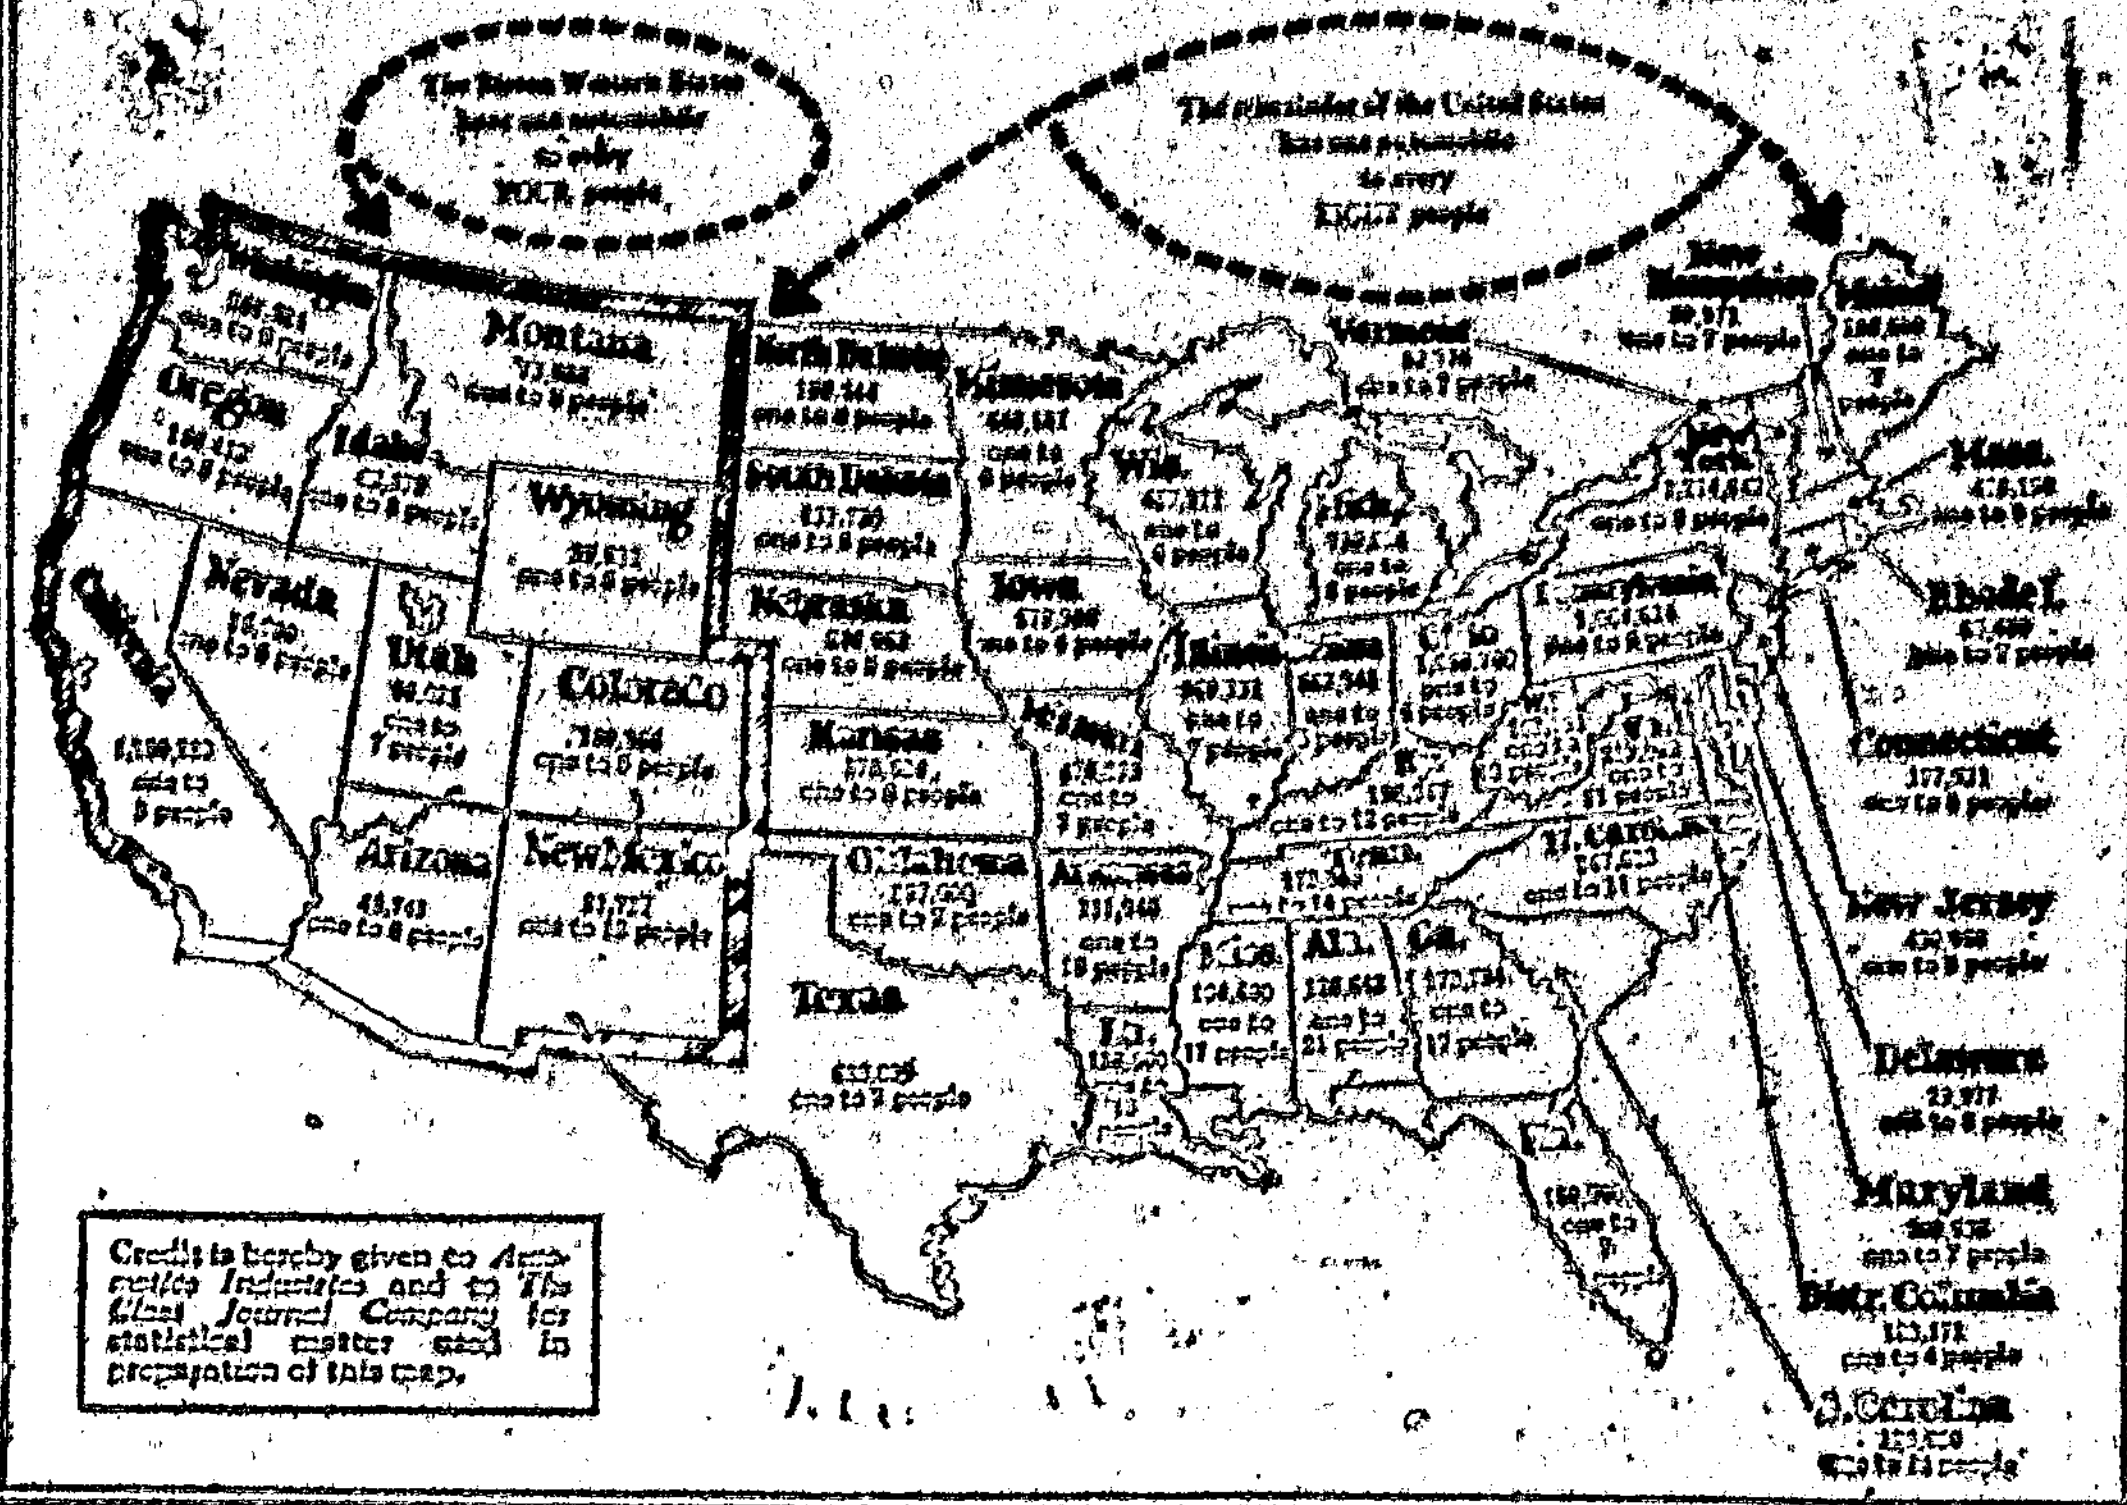

Fun and Foolishness.

E. P. & S. W. PREDICTS BENEFITS FOR NEW MEXICO FROM MERGER

TO THE PEOPLE OF LINCOLN COUNTY.

The authentic information has come to the local officials of the E. P. & S. W. Railroad Company since the last advertisement occupying this space, that the eastern stockholders of the company and the Southern Pacific Railroad Company have agreed upon a basis of merger of the two companies, under which the El Paso & Southwestern lines of railroad in New Mexico and Arizona will be operated as Southern Pacific lines, and the great resources of that railroad organization will, in the future, become interested in the development of the resources of New Mexico.

Under such arrangement, the present owners of the El Paso & Southwestern Company are to retain all of their mining and other interests in the southwest, including the Dawson coal mines, and also become the largest owners of stock of the Southern Pacific Company held in any one ownership, with ample representation upon both the Board of Directors and the Executive Committee of that company, in order to guarantee for themselves and for the people of New Mexico, West Texas and Arizona such railroad policy as will

best conduce to the interests of all.

This announcement is made as such information reaches the Public Relations Department, in the same spirit of fairness to the public with which we initiated the advertising talks which have been made in this space, and in order that the public may fully know.

This move has been made by our people not only because it will bring into the heart of New Mexico one of the strongest railroad organizations of the United States, capable of undertaking and carrying out any program of development which it may see proper to assist, but also because, under the laws of the United States requiring it so to do, the Interstate Commerce Commission has independently, upon its own authority and without the consent of any of such carriers, grouped various railroad carriers for consolidation in what it considers the most advisable way for offering the best transportation service they can give to the public at the lowest cost and has recommended that such carriers shall merge their ownerships with each other in order to effect such result and it is understood generally throughout the United States that un-

less such mergers are carried into effect voluntarily, that the same shall be compelled by law; and that the laws of the United States already existing point the way to such final result. Under such circumstances, it appeared to our people far wiser that carriers should voluntarily acquiesce in such progress as so recommended by the lawful authority, than to resist the will of the public in such matter, with the possibility of finally being compelled to acquiesce therein under far less advantageous arrangement to themselves and to the public in the southwest than has been obtained by this voluntary arrangement.

The effect of this contemplated change will be to greatly increase the number of operating employees on the E. P. & S. W. eastern division lines, as it seems a vast amount of freight which originates in California will be sent east over such division, instead of via the present routes. It also means that ultimately the Southern Pacific Company will change from its oil burning engines to coal burning engines, and supply itself with coal for a large part of its present line from the Dawson mines; which should greatly increase

the output thereof and the number of employees.

So from a New Mexico standpoint, it seems, at least, more money to be paid out for railroad operation in each E. P. & S. W. county in New Mexico, no matter what else it may mean; but the people can rest assured also that the El Paso & Southwestern ownership in the incoming company which is to be established by this arrangement, will see that the same liberal policy with reference to all interests, which they have inaugurated and to this time maintained, will be continued. The change so to be effected cannot be made for some time, and will not affect the policy of understanding and good will with the public in our country, which these advertisements are designed to effect.

Remember, we told you in the beginning that this space was not to be used for railroad propaganda, but for the purpose of assisting in the development of New Mexico. There will be no change in this regard under the facts above announced.

TO THE PUBLIC.

Through the courtesy of this
newspaper, this open letter to
the public is an appeal for as-
sistance in the prevention of for-
est fires.

The timbered mountain ranges
in Otero and Lincoln Counties
are in large part embraced by
the Lincoln National Forest.
This forest is public property
and constitutes one of the val-
uable resources of the state of
New Mexico.

Besides its value from a Nat-
ional and state viewpoint, it is a
decided asset locally and the
public in general and the people
of Otero and Lincoln Counties in
particular, have a direct interest
in its welfare and development.

A brief summary of the ad-
vantages of this forest to public
interests is hereby enumerated:

1. Under the present Govern-
mental policy the perpetuation
of the timber stands is assured.
This Forest supplies either in
whole or in part, sawtimber for
eighteen sawmills, besides serv-
ing the needs of local markets
and those at a distance for a
fuel wood supply. This indus-
try means both a labor market
and fuel and lumber for the
communities of this region.

2. The Forest acts as an im-
mense reservoir in conserving
the water supply on which is
dependent more or less direct-
ly, numerous irrigation projects
and communities and industries
dependent on the mountain
streams for a domestic water
supply.

3. It provides grazing for
thousands of head of livestock
under a system of administra-
tion which eliminates the bad
features incident to grazing on
the public domain. In the dis-
tribution of the grazing privi-
leges, first consideration is given
to local residents or home
builders.

4. Through special appropri-
ations by Congress extensive
improvement is being made in
the Forest road and trail sys-
tem. During the past five years
there has been an annual expendi-
ture of \$5,000 dollars, result-
ing in the construction or im-
provement of many miles of for-
est roads and trails.

As a place of recreation, the
Lincoln National Forest is be-
coming widely known. Under
the present policy of the Gov-
ernment in encouraging this
form of use, each season
brings an increase in the num-
ber of tourists and pleasure
seekers and is increasing the
demand for farm and other pro-
ducts of decided advantage to
the local settlers and commu-
nity interests.

5. In the administration and
development of the Forest there
have been expended on an aver-
age during the past five years,
\$7,000 dollars of Federal funds.
Practically every cent of this
money has been diverted into
local channels of trade through
this medium of administration
and development.

The greatest menace to the
perpetuation of these resources
and industries, is fire. In the
protection of the Forest from
fire, the Forest service employs
an extensive system of experi-
entiated during the dry season of
the year which normally extends
over May and June. The re-
quirements from the organiza-
tion personnel during this sea-
son are great and the law com-

Notice for Proving Claims.

State of New Mexico

County of Lincoln

In the District Court

State of New Mexico, Plaintiff

vs. The First State Bank of

Capitan, New Mexico, Defendant

No. 3389

By order of the above entitled
Court in the premises, I, C. E.
Patterson, Receiver, have been
directed to notify all persons
having claims against said bank
to present the same to me as
such Receiver, at my office in
Capitan, New Mexico, in writ-
ing, with full details, under oath,
before the first day of Septem-
ber, 1932, and those failing so to
do by the said date shall be bar-
red and forever estopped from
urging their claims.

All claims against the above
named bank which are not filed
with me, as aforesaid, will be
forever barred, and the holders
thereof forever estopped from
urging the same, except only
those claims for such amounts
as may be admitted by the Re-
ceiver herein to be owing by
said bank to creditors thereof
in the statement of assets and
liabilities of said bank filed by
said Receiver.

If any claimant is dissatisfied
with my decision with respect
to his claim, he may present his
petition to the Court, setting
forth his claim, and asking for
the relief to which he deems
himself entitled.

C. H. Patterson, Receiver,
Capitan, New Mexico.
A. H. Hudspeth,
Attorney for Receiver,
Carriazo, New Mexico.

the first thought of each individ-
ual.

Forest fires are divided into
two classes—"lightning and man-
made." The prevention of the
former is beyond control. The
occurrence of the latter class of
fires can be minimized by the
exercise of care on the part of
the public, the actual owners of
this vast property.

Seventy-five per cent of the
fires which occur on the Lincoln
Forest result from human agenc-
ies. If this class of fires can
be eliminated the menace to the
safety of the Forest will be
greatly reduced.

The present season opened
under exceptionally favorable
conditions due to heavy moun-
tain snow during the winter months.
The past two weeks have been
exceedingly dry and at the pres-
ent time the situation in regard
to danger from fires is probably
greater than it has been for a
number of years. If weather
conditions continue, the situa-
tion will become serious. Nor-
mally, rains are expected around
the first of July. In the mean-
time, through proper care on
the part of the public, our
chances of a serious situation
can be lessened.

The following simple rules will
aid you.

Be careful yourself and see
that the other fellow does like-
wise. If you discover a fire, en-
deavor to put out. If this is im-
possible, get word to the near-
est Forest officer. His headquar-
ters is well known in any local-
ity on the Forest.

O. FRED ALTHUIS,
Forest Supervisor,
Alamogordo, N. M.

CHURCH SERVICES
TO BE BROADCASTED

Station "KGO" to be Con-
nected With San Fran-
cisco Churches.

Sunday church services from
KGO, both morning and even-
ing, will now be a part of the
broadcasting service delivered
by the Pacific Coast Station, it
was announced today by officials
of the General Electric Com-
pany.

Connecting the studio build-
ing of KGO with several church-
es in San Francisco and Oakland
is an extensive system of ground
wire nearing completion. Two
pairs of wires into each church
are necessary. Music and voices
are carried on one pair, while
the other pair is used for quick
communication between opera-
tors stationed at the church and
the control room in the studio
building of KGO.

Wiring in a church is installed
in the usual manner to certain
positions where microphones
may be connected. Usually two
operators, working half a day,
can connect up the microphones
and the pick-up apparatus. This
is carried to the church in three
cabinets, each about the size of
a large suitcase. One cabinet
contains switching devices, and
the other two cases hold the am-
plifiers.

Two microphones are usually
placed before the pulpit. Some-
times three are used where the
speaker is likely to move around
much. One microphone is locat-
ed to pick up the congregational
singing. Another, in the organ
loft, picks up the organ music.
One or two microphones are
then needed for soloists and the
choir. Wires from each micro-
phone terminate in the switch-
box.

Considerable skill is required
by the operator at the church to
switch from one microphone to
another as the service progress-
es. Any change in the service
that is likely to be made, not in
any way mentioned on the pro-
gram, supplied him in advance,
must be anticipated that no in-
terruption may take place in
the output. With the ordinary
church service the problem is
comparatively simple. But when
special services are to be broad-
cast, then the operator has his
problems.

Recently in a test broadcast
of a Baptized Service from the
Tenth Avenue Baptist Church,
Oakland, one microphone was
placed near the baptistry.
Splashing and trickling of water
was distinctly heard by the
many listeners scattered over
several states. One letter from
a listener far out in a dry, hot
Arizona desert said that the
sweet musical sound of the
trickling water was almost too
much for his "hardened soul to
hear."
