DOINGS AND HAPPENINGS THAT MARK THE PROGRESS OF THE AGE

WESTERN

The 127th General Assembly of the Presbyterian Church in the U. S. A. ended in Columbus, Ohio, with the moderate faction asserting that if its actions are nullified by the church body generally, a split in the denomination is inevitable.

Helen Keller, noted blind-deaf woman, demonstrated to a large gathering at the First Congregational Church in San Francisco that she could "feel" music from a radio by placing her fingers on a specially constructed diaphragm connected with the receiving set.

Wayne Brennan, one of the two bank bandits captured after the robbery of the Kanorado First National May 12, pleaded guilty before District Judge Charles I. Sparks at Goodland, Kan., and was sentenced to a term of from ten to twenty years in the Kansas state penitentiary.

Tiny Town, the school children's city at Springfield, Mo., is on exhibition. This Littlepittsburg city, built, run and governed by the city manager-commissioner form of government, and by the school children themselves, is receiving the attention of educators, business men and all interested in youth.

Edward E. Smith and his son, Ernest E. Smith, local agents for a nationally circulated magazine barred from newsstands in San Francisco on orders of Chief of Police Daniel J. O'Hara, filed in Superior Court an action to restrain the police chief from interfering with the sale of the magazine. The plaintiffs set forth that the magazine is distributed through the United States mails and that the police chief's order has caused them monetary loss.

Saltair resort, located on the shore of the Great Salt Lake, twenty miles west of Salt Lake City, Utah, and recently damaged by fire, will not be rebuilt as a municipal enterprise. The city commission of Salt Lake City in a letter to President Heber J. Grant of the Mormon Church said it was a question of limited finances for the next year, and the church offer to deed the resort remains and railroad facilities to the city was declined with thanks.

H. H. Love, president of the United States Sugar Manufacturers' Association, in reporting to his organization in convention in Chicago, stated that the production of beet sugar last year exceeded the production of any other year, not excepting the war period, by over 10,000,000 pounds. The aggregate production was nearly 22,000,000 100-pound bags. Colorado still led, Mr. Love said, with over 7,000,000 bags and Michigan moved up to second place with 3,000,000 bags.

WASHINGTON

Italy is going ahead with preliminary negotiations looking to settlement of her debt to the United States and to doing so without seeking to condition funding proposals upon any action to be taken by France.

The government's policy not to become entangled in international affairs was reaffirmed at the White House a few days ago. It was stated officially that President Coolidge does not see how the United States can participate in the proposed European security pact now under discussion abroad.

Power needed to reform rules of the Senate rests alone with the voters, Vice President Charles G. Dawes said in Birmingham, Ala., in an address before the annual meeting of the Associated Industries of Alabama. He is in an unenviable task and he is not "in search of contest or trouble," Vice President Dawes asserted.

Newspapers which publish lists of income taxpayers and the amounts they paid last fall were upheld in doing so by the Supreme Court. The court declared the newspapers were not guilty of a violation of the law in publishing income tax lists made available to the public inspection in the offices of collectors of internal revenue.

A nation-wide defense muster of American man power will be held under direction of the War Department next July 4. The date was selected definitely after President Coolidge had disapproved the department's selection of Armistice Day and had suggested that Independence Day be substituted. A conference of general staff officers to begin work on plans for the muster has been called.

Alterations in freight rates on wheat, oats and flour, moving eastward from Arizona, California, Mexico, New Mexico, Nevada, Oregon and Utah which railroads propose to commission will Sept. 23 to await an investigation. The changes proposed would abolish the commodity rates now applying on wheat, oats and flour when moved via the Los Angeles & Salt Lake or via the Union Pacific route through Ogden, Utah, the commission said, would force shippers to take higher classified or combination rates.

FOREIGN

Jock Dempsey announced in Paris last week that he will be ready to meet the survivor of the four-cornered competition between Weinert, Wills, Gibbons and Tunney.

Germany has announced that she is ready to participate in any international conference agreement for the complete suppression of chemical and poison gas warfare.

Official, though incomplete, figures on the recent earthquake and fire in western Japan, places the dead at 318. There were 532 severely injured and many more slightly wounded.

The French parliament showed itself solid behind the government's defensive policy in Morocco in a five-hour debate that the Communists turned into a scene of turmoil for a time, causing President of the Chamber M. Herriot to accuse the Communist deputy, Doriot, of "treasonable utterances."

James Carrow, an employee of a shipping firm of Liverpool, won nearly \$75,000 by holding the coveted winning ticket of the Calcutta sweepstakes on the derby, the world's greatest racing prize. Carrow will have to give one-fourth of the prize money to a London firm that bought a quarter interest in his ticket on Manna, the winner, for £2,000.

King Boris of Bulgaria, an enemy of capital punishment, confirmed the death sentences of three men who took part in the Sveti Kral Cathedral bombing in which 160 people were killed. There are the first death sentences King Boris ever has approved. He declared the plot justified the court-martial's extreme judgment.

Dispatches were received in Tokio from the Nihei Nishi correspondent at Kagoshima report the explosion of Mount Suwayachima, volcano on Okinawa island. The eruption sent huge rocks tumbling down the mountain, crushing a number of dwellings at the base. The inhabitants fled to Naka-ahima island.

Russia's production of vodka tripled last year and yielded the soviet government the largest revenues in its history. The government maintains 341 national distilleries working at full blast. Having found prohibition in Russia a failure, it has announced that the government next October will increase the strength of vodka produced by the national distilleries to an alcoholic content of 40 per cent, which is only 5 per cent below its pre-war strength.

Ambassador Herriot in presenting the group of gold star mothers who are visiting France to President Doumergue in Paris, made a speech for the first time entirely in French. It was short but correct, being simply, "Dear Mr. President, I desire to present these American mothers who have been decorated with the golden star." President Doumergue replied that the love of all France goes out to the mothers who came to visit the land where their sons made the supreme sacrifice.

GENERAL

Gar Wood, driving his motor speedster Baby Car IV Tuesday, beat the time of the crack Twentieth Century Limited between Albany and New York City.

Harry K. Thaw, whose re-entry into the night life of Manhattan for the first time since the evening he killed Stanford White in the present sensation of the white light district, said in New York that he might remain in the city "half an hour or three weeks." He was found at the Hotel Roosevelt and admitted his identity.

A gigantic plot for distributing liquor as an lobster and herring has been unearthed in Boston. Sixteen persons are under arrest, liquor valued at between \$350,000 and \$450,000 has been seized in Boston and in New York and the existence of a New England rum route from Canada to Maine seaports has been revealed. Two million-dollar liquor rings are involved.

Albert B. Fall, Edward L. Doheny and Harry F. Sinclair, whose indictments as a result of the oil scandal recently were dismissed on a technicality, have been reindicted by a District of Columbia grand jury.

Feeding of cows with food containing vitamins and iodine to eliminate malnutrition and gaffler among persons who drink their milk was described by Prof. George W. Cavanaugh of Cornell University and Dr. W. S. Donnelly of Brooklyn before the annual conference of the American Association of Medical Milk Commissioners and the Certified Milk Producers' Association of America at Atlantic City, N. J.

Secretary Jardine left Washington a few days ago for a seven weeks' tour of inspection of the department's work in the West. He was accompanied by F. M. Russell, his assistant. Mr. Jardine will deliver an address at commencement of the Agricultural College of Utah at Logan; at the opening of the Wendover road, a cutoff link in the trans-continental route from the East to San Francisco; to the National Electric Light Association at San Francisco.

Tennessee law prohibiting the teaching of the theory of evolution in its public schools was attacked as being inimical to the progress of science and the public welfare in a resolution presented at Atlantic City to the house of delegates of the American Medical Association.

John T. Scopes, high school science teacher, was indicted by a Rich county grand jury at Dayton, Tenn., on a charge of teaching evolution in a public school in violation of the Tennessee law. The judge set July 10 for the trial.

NEW MEXICO STATE ITEMS

John Wells, colored, was shot and killed by his wife, it is alleged, during a family quarrel at Raton.

The Woman's Improvement Association of Las Cruces is planning to erect a library building and club house.

The Gypsy Oil Company, drilling on its 4,000-acre lease near Farmington, struck a flow of gas which the drillers estimate at over 10,000,000 feet per day.

Announcement has been made in Las Cruces by the Dona Ana County Fair Association that R. H. Buvens, Jr., has been appointed manager of the fair to be held next fall.

Nadine Coen, 8 years old, was killed, and her mother, Mrs. Lydia Coen, was wounded in their home at Madrid, N. M., when a masked man entered their bedroom and fired one shot at them.

A class of forty was graduated from the University of New Mexico at Albuquerque, June 5. Thirty-four received the degree of Bachelor of Arts and Science and six the degree of Bachelor of Science.

At a meeting of the City Board of Clayton, held last week, an average reduction of 15 per cent was made in the water rates to consumers. This was done to stimulate the growing of lawns and trees in Clayton.

The state convention of Business and Professional Women's Clubs was held in Santa Fe in the women's room in the new Museum with an attendance of some fifty delegates from the various New Mexico clubs.

In spite of the fact that most of the farmers in that part of the state are holding up the planting of cotton, due to the lack of rain, work on the big cotton gin at Mimbres is going forward rapidly. In the event that Fort Sumner does not get a gin this season, the farmers will be able to bring their crop to the Mimbres gin at a lower cost than to ship it elsewhere.

Reports from Roswell state that the state of New Mexico, through Dillard Wyatt, district attorney of the Fifth judicial district, has dropped the last charge of embezzlement against Ben C. Davison, former treasurer of Chaves county. The attorney, in discussing the case, said that Davison was now serving a sentence in the state penitentiary for the same charge.

According to information given out recently about \$10,000 will be provided to purchase 4,500 additional volumes for the library of the Montezuma College at Las Vegas this summer in order to meet the requirements of the North Central Association. The institution has already secured 4,500 volumes and with the additional supply will have ample references for all departments.

Another disastrous forest fire swept through the timbered district along Big Dry Creek, sixty miles northeast of Silver City. More than 5,000 acres were burned over, according to reports received in Silver City. Hundreds of men were pressed into service to fight the blaze. The black range fire in the Gila National forest was brought under control after burning 4,000 acres of timber.

Two new professorships will be included in the faculty of the Normal University at Las Vegas during the school year of 1925-26. There will be a full professorship in college work in science, and a professorship of public speaking and dramatics. These are necessary to meet the requirements of standardization of the North Central Association of Colleges. The two positions have not yet been filled.

Bones of a man about five and a half feet in stature, believed to be 2,000 years old, were unearthed recently at mining camp in Cottonwood Gulch two and a half miles from La Madera in Rio Arriba county, according to Prof. Fayette A. Jones, mining geologist who inspected the remains.

According to the annual report of the State Cattle Sanitary Board a total of 525,000 cattle were shipped out of the state during the year of 1924, bringing the five-year average up to 447,000. During the first four months of 1925 the cattle movements was 149,000, compared with 64,000 for this period in 1924. For the month of April the movement was reported at 57,523, which is more than double the movement for April, 1924. Of the April movement Texas took 15,872; Kansas, 12,272; Colorado, 5,997; Arizona, 5,514; Oklahoma, 2,753; California, 2,459; and 5,370 were moved intra-state. The remaining cattle were sent to eleven other market centers of states. Eddy county shipped 7,441; Roosevelt 6,604; Union 5,160; Quay 3,603; Chaves 3,333; Curry 3,283; Otero 2,763; and Hidalgo 2,622.

Albuquerque was chosen as the 1925 convention city of the New Mexico Mineral Society at the forty-third annual meeting in Clifton. Dr. C. E. Benson, Russell, was elected president; E. M. Smith, Las Vegas, vice president; C. M. Yates, Roswell, secretary; and at the annual election of officers.

The sixth annual Farm Bureau Day of Dona Ana county was held May 23 at State College, and a big program was given, the central feature of which was the address of John Fields, noted agricultural leader of Oklahoma City.

DOHENY'S CONTRACT FOR OIL HELD VOID

PAYMENT OF \$100,000 TO FALL AGAINST PUBLIC POLICY IS RULING

ELK HILLS LINE IS CANCELLED

SETTLEMENT IS ORDERED ON PRODUCTION OF OIL IN NAVAL RESERVE

Los Angeles, Calif.—The Doheny oil interests, in a decision rendered by Federal Judge Paul J. McCormick, was ordered to give up for cancellation their lease in naval oil reserve No. 1, Elk Hills, Calif., and contracts for construction of all storage facilities at Pearl Harbor, Hawaii.

The decision, covering ninety-two points of fact and fourteen conclusions of law declared, the reason void for two reasons: first, owing to the "fraud upon the United States," involved in E. L. Doheny's payment of \$100,000 to Albert B. Fall, then secretary of the interior, and, second, because former President Harding's order transferring discretionary authority in the matter of leases from the Navy to the Interior Department was in excess of his power as President.

Judge McCormick ordered a settlement for all oil taken by the Doheny companies from Elk Hills and a credit to them for storage facilities work done in Hawaii, and empowered a master in chancery, to be named later, to effect these settlements.

Findings of fact included one to the effect that Fall "did not" make any false representations of fact to President Harding for the purpose of inducing the making of the executive order of May 31, 1921.

Fall also is held responsible for the conduct of the oil lease and Hawaii contract negotiations with the Doheny interests, while former Secretary of the Navy Edwin Denby was declared to have been "passive" through out all the negotiations and signed the contracts and leases under misapprehension and without knowledge of the contents of the documents.

It is held that the proposed contract for the work in Hawaii was kept secret "in order that Congress and the public should be kept in the dark as to what was being done, and not for military reasons."

Disast in Army Funds Discussed
Washington.—The army general staff has been directed to make a study of the effect upon the military establishment of further progressive reductions in army appropriations should that be ordered under the administration's economy program. The study is understood to have been ordered on the basis of a White House communication to the War Department.

Whether other government departments have received similar budget economy suggestions has not been disclosed. At the Navy Department Secretary Wilbur would not say whether naval budget officers were engaged in a study similar to that of the War Department.

Foodie Accepts Rockefeller Pastorate

New York.—Dr. Harry Emerson Fosdick, noted liberal leader in the church, has accepted the pastorate of the Park Avenue Baptist Church, known as the Rockefeller Church. It was announced a few days ago. Dr. Fosdick's occupancy of his new pulpit will become effective in the fall of 1926. The acceptance was made public by Dr. Cornelius Woolfson, resigned pastor of the church. Dr. Fosdick's conditions of acceptance, including that of "inclusive membership," were approved by the congregation, the trustees announced.

Protests Cost of Dieckada

Washington.—The rum blockade is described in a statement published by the Associated Against the Prohibition Amendment as a "throwing away" of millions of dollars of the taxpayers' money "in less than 1 per cent of the flow of liquor in the United States." Figures compiled by Dr. Rufus S. Tucker, special agent of the Department of Commerce at the direction of the department show that imported liquors to the value of \$40,000,000 were smuggled into this country in 1924, said the statement.

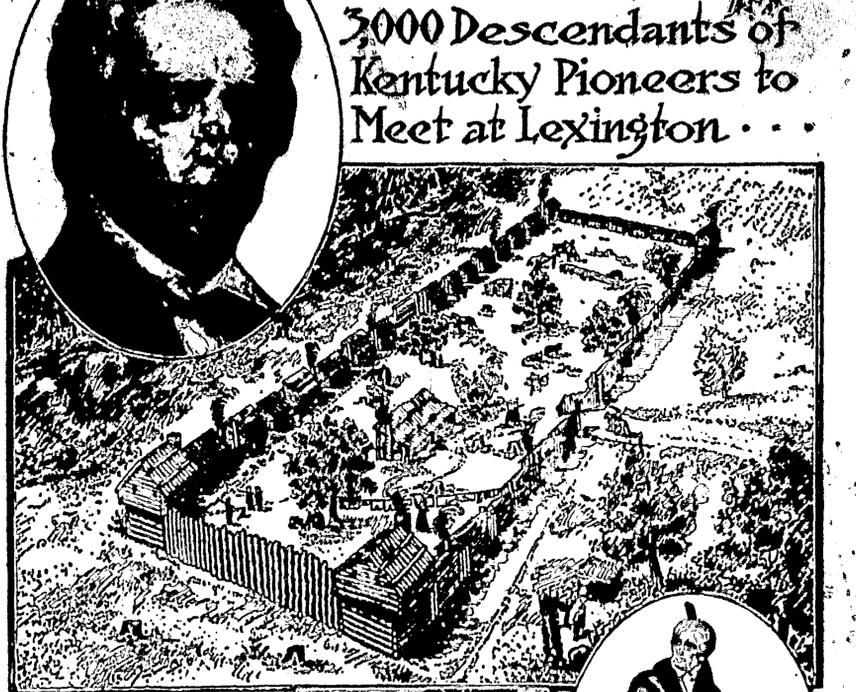

Speech Against Alcohol in Germany

Berlin.—If the youth of Germany indulges in athletics and outdoor sports generally and avoids the use of alcohol, Germany can dispense with military aid, declared Minister of Defense Dr. Otto Gansler, during a speech before the administration of his department before the Reichstag. Other countries, he said, substitute their youths in military training, and Germany, therefore, was fairly entitled to encourage its rising generation to go in for the production of brains and muscle.

Denver Sheep Trade Makes Record

Denver.—A 40 per cent increase in receipts of sheep and lambs of the Denver market so far this year over the corresponding period of 1924 has furnished proof of the phenomenal development of the live stock industry in this city. Sales up to May 27 amounted to \$5,000,000, compared with \$3,000,000 in the similar period last year, according to the Denver Union Stockyards Company. Receipts have been 806,127 head this year, compared with 573,220 up to May 27, in 1924, an increase of 232,907.

Daniel Boone Centennial

Earl Boonesborough

By JOHN DICKINSON, OHERMAN

HOUSEHOLD word in the United States is the name of Daniel Boone. And this year Daniel Boone is a name to conjure with in Kentucky. For 1925 is a sort of centennial of the settlement of the Blue Grass state. And Daniel Boone has come down to us as the central figure of the migration from the seaboard colonies across the mountains into the "Park and Bloody Ground."

Anyhow, the Boones—and their name is legion—have planned a celebration with headquarters at Lexington for the week June 1 to 7. That city is properly the center about which the celebration revolves, for it was founded and named June 3 by a party of hunters who had just heard of the battle of Lexington, "The eighteenth of April, Seventy-five."

The purpose of this "first centennial of the Boone family" are thus set forth in an announcement by William Boone Douglas of Washington, D. C., acting president of the Boone Family association, which says in part: "His excellency, William Jackson Fields, governor of the commonwealth of Kentucky, invites the Boone Family association and all persons of Boone lineage to hold the first Boone family reunion and convene in memorial to Daniel Boone in the city of Lexington, in connection with and as part of the sequentennial celebration commemorating such of the national events as the signing by Daniel Boone of the first way from the Atlantic coast through the wilderness to Kentucky and the establishing of Boonesboro, as the capital of the colony of Transylvania, of the first western legislature. Thus, in 1776 Kentucky became the Mother State of the West and over the Boone Wilderness roamed the pioneers of the West. President Theodore Roosevelt, in 'Hero Tales From American History' says: 'Daniel Boone will always occupy a unique place in our history as the archetype of the hunter and the wilderness wanderer. He was a true pioneer and stood at the head of that class of Indian fighters, game hunters, forest fellers and backwoods farmers who, for generations after generations, pushed the western border of civilization from the Alleghenies to the Pacific. As he himself said, he was an 'instrument of God to settle the wilderness.'"

His coming will be a pilgrimage to the grave of Daniel Boone at Frankfort and the placing of a wreath by his kinmen. Furthermore, a pledge will be made at the grave to honor his memory by placing his bust in the Hall of Fame at New York university, and an incense drive will then be begun among his relatives for funds. Governor Fields, from whose window the capitol at Frankfort may be seen the tomb that marks the last resting place of Daniel Boone, closes his hospitable invitation to the Boone family with the tribute: "Although the body of the great pioneer Boone sleeps in our city of this day, here he loved so well, his great spirit still lives in the hearts of our people."

William Boone Douglas has formally accepted Governor Fields' invitation and has notified all persons of Boone lineage throughout the United States to assemble at Lexington and register June 2 and 3 ready to take part in an elaborate program to be carried out the five days that follow.

Eyesight of Children

Children with normal eyesight or with moderate defects see better as they grow older. Sheller's eye test, given to 2,213 children, showed that the percentage of children with normal vision increased as the children grew older and the percentages of those with minor defects decreased. The number of children with markedly defective vision increased, however, with age. Of all the children tested

3,000 Descendants of Kentucky Pioneers to Meet at Lexington

Boone Family Over His Sons' Body

From the Boone Family

Notable among the events that compose the week's program is a pilgrimage to the grave of Daniel Boone Wednesday, June 3.

Thursday the members of the association will participate in the sequentennial parade at Lexington, a military, patriotic and civic demonstration with floats representing Kentucky pioneer scenes, decorated automobiles, Kentucky thoroughbred horses and a presentation by Transylvania university commemorating the visit of Lafayette to Lexington in May, 1825.

A feature of the Boone reunion will be a trip to Boonesboro, where the first "legislature" in the West was convened in 1775 and where Daniel Boone established his fort. The Boone Family association will be assisted in the program at Boonesboro by officials of Winchester, Ky., where they will be entertained the remainder of the day, returning to Lexington at night for the sequentennial carnival costume ball at the University of Kentucky.

The dedication of tablets to the pioneer who founded Lexington and "open house" receptions by various patriotic organizations will occupy the attention of the Boone delegates Friday and Saturday morning, while the sequentennial historical pageant in the University of Kentucky stadium, seating 20,000, will feature the week's celebration on Thursday, Friday and Saturday afternoons.

Boones attending the reunion, as well as those back home, will arrange for special "Pioneer Sunday" services in the churches June 7, which will commemorate the date Daniel Boone first reached Kentucky in 1763.

This home-coming of the Boones should be quite a celebration in itself, even if only the family take part. Mrs. James Randolph Spraker of Buffalo, descended from one of Daniel's brothers, has compiled a genealogy which lists 5,104 descendants of George and Mary (Maugridge) Boone, grandparents of Daniel and founders of the American Boone family.

Here are facts bearing on the references in the Douglas announcement.

George Boone, the family's founder, came with his wife and eleven children from Exeter, England, in 1717, settled in Pennsylvania and joined the Society of Friends (Quakers). His son Squier (given name, not title) married Sarah Morgan, Daniel, son of Squier, was born February 11, 1735, near the site of Reading and died September 6, 1820, in St. Charles county, Missouri. It was not until 1843 that Boone's body was removed to Frankfort.

Boone founded Boonesborough April 6, 1775, as the agent of Richard Henderson of North Carolina, who had bought a vast area of land from the Cherokee—who had no ownership, Kentucky being without resident Indians and the common hunting ground of tribes to the north and south. Henderson organized the Transylvania company, established the colony of Transylvania and sent Boone ahead to blaze the "Wilderness road" through Cumberland Gap and also to build a fort.

May 23, 1775, eighteen delegates, representing the four settlements of Transylvania—Boonesborough, Harrodsburg, Bowling Spring and St Asaph—drew up a compact between the proprietors and the settlers. It provided for "perfect religious freedom and general toleration, militia and judicial systems," etc. This was the "first western legislature." The opposition of Virginia, of which Kentucky was then a part, and the outbreak of the Revolution, which put an end to proprietary governments, caused the downfall of Transylvania. Boonesborough is now only a memory.

Public-spirited citizens have perfected plans to take over the home of Daniel Boone in "Van de Fenne Oase" in Missouri. The old stone house still stands, and beside it the famous "Judgment tree," under which Sydnie Boone settled all controversies between him and the Golden Rule—even if he had to settle the matter to a suit. For the Spanish honored Boone with office and with land—most of which he lost when the United States made the Louisiana purchase in 1803. This "Nimrod of the Yadkin" hunted almost to his dying day. In 1818 he planned a trip to Indian territory (Oklahoma)—and may have taken it, for all anyone knows to the contrary.

What gave Daniel Boone his fame? He was neither the first explorer nor the first settler of Kentucky. His service was of much less importance than that of George Rogers Clark, his fellow backwoodsman. Figure it out for yourself. But as a hero of Young America he is surpassed only by his grandson—Kit Carson!

WRIGLEYS
"after every meal"

Parents encourage the children to care for their teeth! Give them Wrigley's. It removes food particles from the teeth. Strengthens the gums. Combats acid mouth. Refreshing and beneficial!

Prominent People

Dirigible Ready to Aid the Arctic Flyers

Here's a brand new portrait of Lieutenant Commander R. E. Byrd, bureau of aeronautics, U. S. N., who is making final organization of the naval aviation section of the MacMillan Arctic expedition under the joint direction of the navy and the National Geographic Society. Lieutenant Commander Byrd is giving particular attention to the aerial navigation features. He was assigned to this phase of preparation for the trans-Atlantic flight in 1910.

When the airplanes leave their northern bases they will be the most completely equipped and self-sustaining aircraft that ever set out on a mission.

Plans have been made to dispatch the dirigible Los Angeles, or her sister ship, the Shenandoah, from Lakehurst to Etah, Alaska, should an emergency call be raised by the men while mapping the unknown region between Alaska and the North pole. The availability of radio intelligence and the ability of the navy to rush a dirigible to the rescue lends an element of safety to this expedition.

John L. Reinartz will serve as the expedition's radio operator. Reinartz was chosen from more than 2,000 amateur operators, who applied for the post from all parts of the world. It has been decided to broadcast daily progress of the party on a twenty-meter wave length because of light conditions. Reinartz is one of the few men in the United States who has any experience with the short wave length.

Muriel Vanderbilt to Wed Bostonian

Confirmation of the reported engagement of Miss Muriel Vanderbilt to Frederic Compton Church of Boston has been made by her mother, Mrs. William K. Vanderbilt, Sr. The official announcement of the engagement was being kept back, Mrs. Vanderbilt explained, to permit Mrs. O. H. P. Belmont, grandmother of Miss Vanderbilt, who was then abroad, to be informed of the engagement before it became publicly known. The report, however, was circulated in Boston and confirmed by Mr. Church.

Miss Vanderbilt is a great-granddaughter of Commodore Vanderbilt and a granddaughter of the late Senator James Fair. She is, therefore, heir to two large fortunes. Her father, William K. Vanderbilt, Sr., is a well-known sportsman, and her mother is the owner of a racing stable headed by Harzen.

Mr. Church, who is twenty-seven, is a member of a prominent but not wealthy Lowell (Mass.) family, and in business with his father as Fred C. Church & Co., insurance brokers. He was graduated from Harvard in 1923 and was president of the class in his freshman year and captain of the freshman football team.

Culbertson Gets a Job That Is Difficult

Appointment of William B. Culbertson vice chairman of the tariff commission, as minister to Rumania formally announced at the White House, fills a diplomatic assignment involving particular responsibilities at this time in view of the relief debt and other negotiations now pending with that country. It is assumed, in this situation, that the Bucharest post will not be vacated by Minister Jay until he has completed his duties as ambassador to Argentina until the arrival of his successor. In fact, it is expected that Mr. Jay will remain at the Rumanian capital until he has received some definite reply to the Washington government's recent note urging a refunding agreement for Rumania's relief debt to the United States. Mr. Jay is conducting negotiations with the Rumanian foreign office urging that it be settled in a refunding agreement similar to those Rumania already has made for payment of similar debts to other powers and has presented a note setting forth the desire of the Washington government that Rumania take early action in the matter.

Would Fill Her Dead Husband's Seat

Mrs. Edith Nourse Rogers, widow of Congressman John Jacob Rogers, has announced that she would become a candidate for election as representative of the Fifth Massachusetts district to succeed her husband.

"My intention and wish have been to return to my work among the disabled veterans of the World War but there seems to be a desire for a continuance of the policies established by my husband and for which he worked so hard," Mrs. Rogers said. "I believe that the residents of the district are entitled if they wish it, to have me carry on the work and I also believe that under the circumstances he would wish me to continue this work if called upon. I have, therefore, concluded to comply with the apparent wish of the residents of the district and hereby announce my candidacy for the balance of the present term."

Mrs. Rogers is the third woman to seek election to the house of representatives to succeed her husband upon his death.

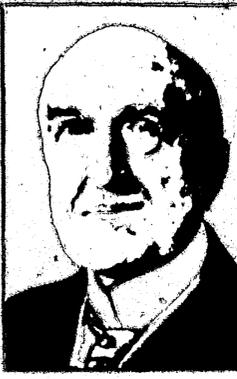

Depew, 91, Would Stay as Long as He Can

Chauncey M. Depew has become so much of a landmark that New York keeps track of his birthdays. His ninety-first birthday was celebrated the other night by a dinner at the Montauk club in Brooklyn, the thirty-fourth successive Depew dinner to be held at that institution. Thirty-four years ago 600 guests gathered to honor the veteran orator. Of these originals now only 18 are left.

Mr. Depew was, of course, the chief speaker. His address, which was broadcast, dealt largely with the progress of world affairs during the last thirty-four years, and wound up with the conclusion that this is a mighty good world after all.

"I have come to the conclusion," said Mr. Depew in the latter paragraphs of his speech, "after a long experience and many large observations with various judgments, properly tested, and properly buttressed, that the only sure guides to success are character, health and happiness. I receive many inquiries of how to be happy, how to be healthy and how to live long."

THIS WOMAN'S REMARKABLE RECOVERY

Entirely Due To Lydia E. Pinkham's Vegetable Compound

Forest City, Iowa.—"My first child lived only a short time and I was sick for a year after. When I bent over and raised myself up again I could not breathe and I was in pain in my back. One day I was so bad that I had to leave my washing and get ready to go to the doctor. He gave me medicine but it did no more good than if I drank just water. Once when we had been in town a little book telling about Lydia E. Pinkham's Vegetable Compound was left in our car. I have taken five bottles of the Vegetable Compound now and do all my housework and help with the milking and taking care of chickens and garden. Besides I have a fine baby girl eight months old, just the picture of health and I am feeling fine myself. You may use this letter as a testimonial and I will send you any letters calling about the Vegetable Compound."

—Mrs. OGGIE E. BONDGLEN, Route No. 5, Forest City, Iowa.

Lydia E. Pinkham's Vegetable Compound is for sale by all druggists.

Don't be annoyed by ugly blemishes, when red, irritated, blotchy skins can be quickly cleared by

How to build up your Weight

To BE under weight often proves fighting-power in the body. It often means you are minus nerve-power, minus red-cells in your blood, minus health, minus vitality. It is serious to be minus, but the moment you increase the number of your red-blood cells, you begin to become plus. That's why 8 H. S. since 1820, has meant to thousands of underweight men and women, a plus in their strength.

You are a body like to the point of power, your flesh becomes firmer, the age lines that come from thinness disappear. You look younger, firmer, happier, and you feel better. All over your body. More red-blood-cells! 8 H. S. will build them.

8 H. S. is sold at all good drug stores in two sizes the larger size is more economical.

8 H. S. The World's Best Blood Medicine

The longer a man is married the less he judges when his wife throws things.

The world deals good-naturedly with good-natured people.

Water and Salt Needed for Health of Sheep

Keep plenty of fresh water and salt before your sheep at all times, and provide shade in hot weather. It is not essential that your barn be so very warm, except at lambing time, but it is very necessary that they be kept and pastured in a dry place. The saying that the ram is half the flock is very true, as if a scrub is used, no improvement can be expected in the lamb. If the industry is to improve, the scrub must be eliminated. Flocks of inferior breeding demand much more care and feed than a well-bred flock, and the shepherd finds no enjoyment in caring for this type of stuff when he could, with the same amount of feed and care, be raising a much better grade of stock. So in every case where possible, secure the services of a pure-bred ram, and even the most biased breeder will agree that the results are surprisingly favorable.

Sheep Industry Is Due for Some Big Fat Years

"Government statistics show that in 1900 we had five sheep to every eight people, in 1910 we had four sheep to every eight people, and in 1923 we had only three sheep to every eight people," was a statement made by H. E. Reed, professor of animal husbandry at the Kansas State Agricultural college, in a discussion of the history and development of the sheep industry. "Such a condition as this, in addition to the inability of the range to increase its present production and the improbability of over-production among farm flocks, should make the sheep man's life a pleasant one for several years to come."

Live Stock Hints

Treat sheep for stomach worms.

Many a good-tempered colt is spoiled by a bad-tempered owner.

Water horses and mules both before and after feeding, but never when they are very hot.

Remember that the hind legs of a horse are his propellers, and that poor shoe fitting causes much lameness.

In the management of all classes of live stock, there are times when careful, watchful attention is required. That time is when production is the lambing season.

Give sows suckling pigs a liberal grain ration.

Feed lambs grain in a creep so that they will be fat and ready for the market when they weigh 60 to 80 pounds.

The weaning pigs weighing from 50 to 100 pounds may be fed from 50 to 80 parts corn, and 15 to 20 parts tankage, or instead of this ration you can use 75 to 80 parts corn, ten parts wheat middlings, and ten to 15 parts tankage.

The lamb that does not nurse readily may often be started by getting a spoonful or two of milk in its mouth and then trying it on the ewe again.

An animal infested with parasites cannot produce the best results any more than an automobile can run its best when handicapped by a flat tire.

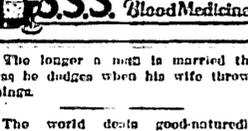

Whether the stock be grade or pure bred, it will pay to place the eye and feet in a bath of lime in a small pen by themselves for at least two days after lambing.

CORNS

Lift Off—No Pain!

Don't hurt one bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers.

Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the foot calluses, without surgery or irritation.

FOR OVER 200 YEARS

harliest oil has been a world-wide remedy for kidney, liver and bladder disorders, rheumatism, lumbago and uric acid conditions.

GOLD MEDAL MARILEM OIL

correct internal troubles, stimulate vital organs. Three pills. All druggists. Insist on the original genuine GOLD MEDAL.

PASTURE FOR PIGS MEANS BEST GAINS

A common practice among commercial hog men is to have the sows farrow in the spring as early as possible. Under such management, there is less tendency for the feeder to neglect the sow and her pigs as spring work has not yet started. During the first few weeks the sow and her litter usually receive excellent care and attention but when the pressure of spring work comes there is a tendency to slight the sow and litter. If a pasture is provided, the sow and litter are then under ideal conditions for the saving of both time and labor.

The best results in raising hogs are always obtained upon pasture. The pigs will be induced to take plenty of exercise and be out in the direct rays of the sun, which is a stimulant to growth. This fact is not thoroughly appreciated by all hog men. Upon pasture they will make greater gain at a 15 per cent cheaper cost than under any other conditions. The healthy pigs are the pasture grazed pigs, for the pasture affords ideal sanitary conditions. If the weather is very hot shade should be provided.

Pasture for sows' suckling litters during the winter will be beneficial. There are many warm days when the sow and litter could be turned upon a winter pasture of rye or some other seed crop.

A permanent pasture like blue grass and comes in handy during muddy spells when other pastures are short, also before other pastures have started growth in the spring. Some feeders attempt to have their pigs finished for an early fall market. It is very easy then to start them upon pasture as early as possible and while they are still nursing. The finishing of spring pigs upon the corn field is a practice of growing popularity. Experience has taught us that the pig which will economically hog off a field will the grow grown pasture fed pig.—B. W. Fairbanks, Extension Service, Colorado Agricultural college.

Expensive Cup of Coffee

The first cup of coffee made in France was drunk by Louis XIV about 280 years ago. The price then was about \$25 a pound.

A FEELING OF SECURITY

You naturally feel secure when you know that the medicine you are about to take is absolutely pure and contains no harmful or habit producing drugs.

Such a medicine is Dr. Kilmer's Swamp-Root, kidney, liver and bladder medicine. The same standard of purity, strength and excellence is maintained in every bottle of Swamp-Root.

It is scientifically compounded from vegetable herbs.

It is not a stimulant and is taken in teaspoonful doses.

It is not recommended for overeating. It is nature's great helper in relieving and overcoming indigestion, liver and bladder troubles.

A correct statement of purity is with every bottle of Dr. Kilmer's Swamp-Root.

If you need a medicine, you should have the best. On all at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to try this great preparation, send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing to care and mention this paper.

Soft Coal Consumption

Less than 1 per cent of the estimated original deposits of soft coal in the United States has been consumed.

Cuticura Soap for the Complexion.

Nothing better than Cuticura Soap daily and Ointment now and then as needed to make the complexion clear, clean and hands soft and white. Add to this the face-lifting, fragrant Cuticura Talcum, and you have the Cuticura Toilet Trio.—Advertisement.

Goats make no discreet exceptions to the maxim that publicity is a good thing.
