Motor Car and Good Roads

Reflections Suggested by Recent Automobile Shows

By JOHN DICKINSON SHERMAN

UTOMOBILE shows in several big American cities recently have been huge successes. These shows attracted enormous attendance. They were informal and were marked by the sale of many cars of all kinds. They were especially informative for the reason that they showed what has been accomplished in the quarter of a century during which the automobile industry has grown up from an exceedingly modest beginning to its present enormous proportions. Reading between the lines of the facts brought out at these shows, it is to grasp with amazement at the changes that have been wrought in the industry itself and in American life through the motor vehicle—the automobile, the motor truck, the motor bus. It was approximately twenty-five years ago—as I well remember and doubtless many of you do—that the first automobile made a journey by highway from Detroit to New York City. And what a trip it was! There were no service stations, so a complete set of replacement parts was carried. The tires usually deflated at 15-mile intervals. Horse power often had to drag the car from mudholes. And it took a whole week to make the trip! Today the same trip is made comfortably in three days.

The other day a car—no; never mind the make, this is not an advertisement—was driven from New York City to San Francisco—3,423 miles—in exactly 102 hours and 45 minutes—elapsed time, not running time! This was within 6 hours of the fastest train schedule. The route was over the Lincoln Highway—a highway that 25 years ago was not in existence.

The point of the foregoing is that motor cars and good roads are inseparably bound together.

Everywhere the traveler with eyes sees the truth of this. Take the scenic West as an illustration. It was only a few years ago that the tourist traveled by railroad and then got into a horse-drawn vehicle—the old stage-coach was the thing. Now the scenic West is alive with motor cars from every state in the Union—and with public motor buses. There were 302,212 private cars admitted to the national parks last season. Everywhere are seen road gangs in the mountains, which were only foot and horse trails before. Rocky Mountain National Park has a highway over the Colorado Continental Divide that climbs up to 11,707 feet. The cog road up Pikes Peak used to be considered a marvel; now there is an automobile road to the very summit.

New York City has a breathing space in the Interstate Palisades Park. Highway after highway on both sides of the Hudson has been constructed to take care of the motor traffic—and even a suspension bridge over the

BARGUE "CHROMO" IS SOLD FOR TRIFLE

Dealer Thought Art Expert Was "Stung."

New York.—An art dealer here who thought he got "stung" in buying a "retouched lithograph" which he tucked away in a corner of his shop, only to sell cheaply later, is wondering whether he was right or wrong.

The "chromo," as he called it, now is claimed to be "An Arab Dealer Among His Antiques" by Charles Bague, who died in poverty in Paris. It will be shown in a Bague exhibition at the Fearon galleries.

Carl Loevenich, an art expert, discovered the painting. When he found it, the dealer deceived by its minute detail, told him it was not worth considering.

"I like to get stung," said Loevenich. "What will you take for it?"

The dealer named and got \$200 as his price. Other paintings by Bague have sold for \$25,000 and \$30,000, so Loevenich took it.

Bague produced only about twenty oils, partly because originally he was a lithographer and started painting late in life, and partly because he was so painstaking in his work.

Even though he got good prices during his lifetime, his income was not sufficient to live over between pictures. He died in a charitable institution after falling in a fit at the door of a Paris art dealer's shop, to whom he had applied unsuccessfully for a loan.

SAYS FORECASTING QUAKE IS FUTILE

Italian Scientist Declares Instruments Useless.

Fraenza, Italy.—The ghastly list of casualties resulting from the instability of the earth's crust has reached appalling figures in the first 20 years of the twentieth century. This is more than sufficient to give a right idea of the vast, important and complex problem of seismic forecasting, and the necessity and usefulness of solving it.

This statement was made by Raffaele Bendandi, Italian carpenter-actant, who has made many accurate predictions of earthquakes.

America has taken the initiative by starting a vast work of preparation, tending greatly to reduce the appalling consequences that would result from an earthquake in populated areas.

Investigation is Authorized.

Carnegie institute at Washington is carrying out the most minute researches concerning earthquakes and appropriating large sums toward establishing a chain of geophysical observatories in southern California.

The United States coast and geologic survey was empowered by congress to start an accurate investigation of the causes and the effects of the telluric movements. The engineering economic foundation is making preparations in case of a disaster in any of the large American cities. Special classes on seismology have been instituted in many universities of the New World.

All these plans, however, though carried out with the abundance of means of which America alone is capable, cannot be productive of a precise forecasting of earthquakes.

Telluric movements, which still constitute a puzzle to science, persist in being as impenetrable a mystery as ever. As the most powerful modern telescope is of no use in forecasting an eclipse or any other celestial phenomenon, likewise the most sensitive recording machinery is of no avail to the seismologist in predicting earthquakes.

The earth has a precise history which dates back for centuries. Grandiose events followed each other in succession in prehistoric ages, and their traces can be found everywhere. The earth has its laws and habits but they cannot be traced with mechanical apparatus, as so many erroneously believe.

The earthquake is not an outbreak of blind forces, but an unavoidable and foreseeable, movement of the earth, regulated by precise laws. The forecasting of earthquakes, an often, has been demonstrated. It is a possible fact, but it is necessary to start from a new theoretical conception as to the origin of these phenomena. Researches being carried on in the seismological field are following the wrong track.

The forecasting of earthquakes is possible, but it is indispensable to admit in advance that the telluric activity, wherever it occurs, is closely connected by an inter-continental link and that volcanoes and earthquakes have a common origin, even though forces endangering the centers wherefrom such phenomena originate are of different and manifold character.

Quakes Are Predicted.

Think of the wonder that will be aroused the day in which my new seismographic theory, finally announced and duly expounded, will be a most clear and unmistakable way prove that the most tremendous disasters, such as those at Charleston in 1886, Martinique 1902, San Francisco 1906, Messina 1908, Yokohama 1923, and the recent one at Santa Barbara, could have been predicted a considerable time in advance, as I publicly proved in connection with the earthquake at Santa Barbara, for they all came from the same origin and cause.

To this great conception, whereby it is possible to explain and predict earthquakes, is connected the perennial sliding of the poles, a fact that has aroused such tremendous interest in the scientific world.

This cause, unique and profound, which makes the unexplored underground ferment and threaten, is positively the same one from which the orogenetical corrugation of the earth's crust originates, a corrugation that shreds the mountains throughout the centuries by means of earthquakes, bursts, eruptions and similar outbreaks, whereas those which now terrify us are but episodes.

The forecasting of earthquakes is possible only by treading along this path. But as long as the American offensive against earthquakes, though involving the expenditure of huge sums, is confined to founding observatories, installing apparatus, studying effects, rather than causes, it will not cause the saving of a dollar or a human life, nor will it help in forecasting the repetition of the frightful phenomenon.

CABLE REPAIR AT SEA IS THRILLING

Broken Strand Calls Out Shtp in All Weather.

New York.—Stretching out and away, like a tiny thread of life itself, the transatlantic cable from Cape Cod to Brest usually connects the Old world with the New.

But sometimes it breaks!

When this happens there is much concern in the offices of the French Cable company—a breathless suspense, while delicate instruments are locating the break. Often it is near the middle of the ocean, and when the break is located the cable repair ship Edouard Jeramec is dispatched to the scene.

A marine oddity, the Jeramec is one of the finest cable ships afloat. Huge tanks below decks house 250 miles of deep-sea cables. Grappling hooks of all descriptions, weighted to sink them three miles below the surface, are stowed properly away. Buoys to mark the ends of cable when located, are lashed on deck. Powerful winches, fore and aft, are ready to roll in or out the heavy strands.

It is heart-breaking work, this locating the broken ends of a deep-sea cable. Capt. Julien Le Martelu and his crew will assure anyone. In Europe and America, cable transmission is hindered while the Jeramec steams slowly back and forth, groping about the ocean floor. Howling winds and lashing seas must be disregarded. Huge lights transform night into day, and the work continues.

Often the cable is located and the business of bringing it to the surface, a matter of eight hours' work, is begun. And after it almost reaches the deck of the ship, only to break again and slide mockingly back to its resting place in the mud and slime of the bottom.

SLEW SWEETHEART TO KEEP SECRET OF HIS MARRIAGE

Philadelphia Cut Woman Body Into Pieces; Then Tried to Hide Them.

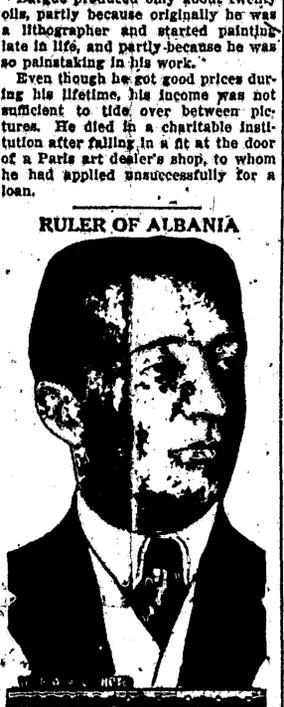

Philadelphia.—A man's desire to himself of his sweetheart, who demanded that he give her money to keep her romance a secret, has resulted in one of the most brutal murders to occur in the eastern part of the United States in years. The man is David J. Marshall of this city. He is charged with the slaying of Miss Ann Dietrich, thirty-four-year-old spinster. Marshall is reported to have confessed the crime.

Four days before Marshall made his confession the body of Miss Dietrich, with the legs and head cut off, was found in a clump of weeds at Media, near Philadelphia. Two days later the woman's head was found wrapped in newspapers, under a rail road trestle not far from the place where the body was found.

Gruesome Mystery.

The head and legs had been severed by a person with some knowledge of surgery, police said. The woman

RULER OF ALBANIA

Now portrait of Ahmed Zogu, the youthful-looking President of the republic of Albania.

"Bronze Lily" Newest Freak in Flower World

New York.—Henry W. Becker, foreman in charge of greenhouses at the New York botanical garden in Bronx park, announced he has developed a bronze lily, unique among lilies native to the tropics. He has named the new variety the "Frederick S. Lee," after the president of the board of managers of the garden.

Produced after three years of effort, the lily bears bronze stripes on its leaves, which in the growing season are from nine to fourteen inches across, or about the size of other tender lily plants. It is mottled underneath with purple, red, yellow and green. The flower is a light sky blue, nine to eleven inches wide, dimensions said to be normal.

The stem is about twenty inches long, corresponding in size to any large lily of the tropical variety. It grows all the year around, according to Mr. Becker, while most tropical lilies are dormant during the winter months.

Two Sparrows Destroy 500 Caterpillars in a Day

St. Paul, Minn.—When English sparrows bring to their nest 500 destructive caterpillars in one day, as one pair did, they are entitled to consideration as a most useful bird, says Prof. A. G. Ruggles, Minnesota Agricultural college entomologist.

A second pair brought 500 insects of various kinds to their young in one hour. Besides, Professor Ruggles estimates, many insects were eaten by the adult birds. The birds frequently consume insect eggs equivalent to one-half of their own weight.

Twins Not Propagates Always, Prof. Holds

Seattle.—Working on the hypothesis that twins may be divided into two classifications—dissimilar twins and duplicate twins—Stevens Smith, professor of psychology of the University of Washington, is examining 100 pairs this year. He is undertaking to determine in what degree they are dissimilar both mentally and physically.

The custom of dressing twins alike, Professor Smith explained, tends almost irresistibly to the belief that the children are alike. Parents find, however, if they clothe their paired offspring differently, individuality of personality is cultivated.

Use Bamboo in India to Make Paper Pulp

Philadelphia.—The successful issue of the experiments carried out for some years in India by William Hatt is now reported, says the Edinburgh Scotsman. The Indian forest records contain a summary of the investigations on bamboo and grasses for the paper pulp by Mr. Hatt, who is officer in charge of the paper pulp section of the Forest Research Institute and college at Dehra Dun.

There were many difficulties to be overcome: (1) A method to be evolved of pulping bamboo so that the percentage of bleach required was reduced within economic limits; (2) a reduction in quantity of caustic soda required to reduce the raw material to pulp, and (3) the preparation of the raw material to a fit state for digestion.

It is stated that the economy in the case of bamboo amounts to 15 per cent, on present manufacturing charges for materials and chemicals only. Mr. Hatt, however, says that if the saving in recovery, coal, labor and fixed charges up to the bleached pulp stage are taken into account, the total reduction in cost will be well over 20 per cent.

Fish Fossils Yield Ichthyol in Texas

Dallas, Texas.—Fossilized remains of prehistoric fish, from which is produced the strange chemical called ichthyol, are to supply Texas with an ultra-modern industry.

In what is believed to be an ancient ocean bed, pushed to the surface by geological action, near Burnet in west Texas, has been discovered a particularly rich source of ichthyol, which is extracted. This substance is a fossil fish oil used in medicine, especially in ailments and in treatment of skin diseases.

An ichthyol corporation has been organized and has leased 900 acres near Burnet. The chemical has sold as high as \$30 a pound.

Blarney Stone Changes Hands; Old Owner Dies

Blarney, Ireland.—The Blarney stone has changed owners. Sir George Colthurst, who had owned the famous old Blarney castle for many decades, is dead, and his elder son, who now becomes Sir George, has taken over the historic ruin. The new owner, a keen sportsman, will make his home on his ancestral property.

Elastic Dresses Foil Ban on Short Skirts

Athens, Greece.—Elastic dresses are being worn here, to foil the authorities, who have banned short skirts.

The elastic dress reaches to the knees ordinarily. But a woman wearing it may, by an ingenious system, lengthen the skirt to her ankles in an instant.

One-Fifth of Austrians Live at State Expense

Vienna.—One-fifth of the population of Austria is living, partly or wholly at the expense of the state. The government has on its pay rolls the names of 190,000 federal employees, 122,000 federal pensioners, 80,000 war invalids, and 162,000 unemployed persons receiving government aid. This is a total of \$24,000.

Official figures show that an average of two persons are dependent upon each of the \$24,000. The estimated total consequently is 1,872,000, or considerably more than one-fifth the population.

Algerian Asses to Wear Silk Hose of Flappers

London.—The silk-stocking trade is to be taken up by the donkeys in Algeria. Mrs. F. K. Hossall, who has been carrying on humanitarian work among the donkeys, mules and camels in North Africa, is in London making a collection of stockings to take back with her.

She says the animals in Algeria, especially the donkeys, suffer from fly bites on their legs, and she desires to obtain worn-out stockings which will be used to keep secure bandages on the legs of the beasts.

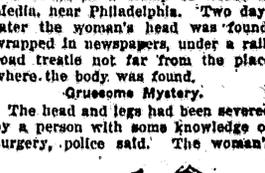

She has authority from the governors of Algeria, Tunis and Morocco to seize any unfit animal and give it treatment.

"Love Farm" Denied Pennsylvania Permit

Allentown, Pa.—Charles Garland, New England's eccentric millionaire, will not get a charter for his April farm, Lehigh county's alleged love colony. This report of Examiner Stewart, in which he recommended that the charter be denied, has become effective. April farm today is blanketed with snow, making life in the frail shack uncomfortable. With the exception of Garland, Miss Hovey and the Scotts, there has been a general exodus to cities by the other colonists.

Parfumers on Scent

London.—Perfume experts are advising the police in seeking a female robber. It is very important to know which she has taken clothing of, in order to make the same exact scent been noted.

Dismembered Her Body.

body showed no marks, nor did examination of her organs reveal any trace of poison. So the slaying became a gruesome mystery.

Finally Marshall, a chiropractor, who was known as a friend of the woman, was arrested. After 12 hours of questioning, he declared that Miss Dietrich had committed suicide in his office and that he had dismembered her body and hidden it because of his own wife and twelve-year-old daughter.

Police refused to believe the suicide story, however, and continued questioning Marshall. Finally, his face showing his exhaustion, the man broke down, police say, and made a new confession.

Argued With Woman.

Marshall said he had killed the woman following an argument when she attempted to extort money from him. Miss Dietrich, he said, tried to obtain money from him under threats of exposing his double life to his wife. He told how he and the woman had been out together and later went to his office, where she choked the woman to death and then went to his home. The next day, he said, he cut up the body with hacksaw and knife and hid it and the head. Marshall is held on a charge of first-degree murder.

Wise Old Mahomet

"If the mountain will not come to Mohammed, Mohammed must go to the mountain." This well known phrase is often used of one who, being unable to have his own way, bows to the inevitable and does the best he can under the circumstances.

The saying originated with the prophet himself near the beginning of his career. The Arabs wanted a proof of his miraculous powers, whereupon

LOCAL NEWS ITEMS

Easter will soon be here. Take a look at the ads in this issue and you may see what you need.

John Bryan, formerly county surveyor, made a quick trip to the county seat Monday on business, returning to his home in Baco Canyon same day.

John W. Walker, who conducts a barber shop here the past six months, left for Roswell last week, where he will conduct a similar business.

The Roswell basketball team, who won the state championship at Albuquerque last week, will represent New Mexico in the national tournament in Chicago at the end of this month. Good luck.

The farmers are busy putting their lands in shape for spring planting. They expect a large harvest if conditions remain favorable till then.

While the weather clerk has been dealing out zero weather in the eastern and middle states, he has been favoring the western states with the finest of spring weather.

Wednesday was the "Seventeenth of Ireland" and was generally celebrated by the "wearing of the green." Thanks to Mrs. G. W. Hoover, who personally presented her friends with a sprig of shamrock to remind them of the day that "we wear green" with distinction, the general atmosphere was one of joy.

Everett Robertson and J. W. Talley have purchased the interest in the barber shop adjoining the Sunshine Pharmacy, and will endeavor to merit a continuance of same. They will also conduct a clothes-cleaning and pressing parlor in connection. Talley will have charge of the clothes pressing and tailoring, and Robertson will be "knight of the razor and shears."

Roswell Basketball to Represent New Mexico at National Meet

The Roswell high school basketball team, champions of New Mexico, will attend the eighth annual interscholastic basketball tournament to be held at Chicago on March 30, 31 and April 1, 2 and 3.

Other teams which have represented New Mexico at the national tournament in the past are Hagerman, Menaul and Albuquerque. Hagerman made the journey on two occasions.

The funds for the trip must come from Roswell businessmen. It will take about \$1,000.

It will be a liberal education for the teams whether they win any games or not. Contestants will be the guests of the university while in Chicago.

PAINTS, Varnishes, Plaster Brushes, Lime Cement, Beaver Board, Heating Stoves, etc., at the Fisher Lumber Co.

up for discussion, and was well received. Another meeting to form plans and draft a code of general by laws will be called later. Those present seemed much enthused with the proposition.

Billy Ferguson, the road contractor, spent a few hours in Capitol Tuesday. When it comes to grading and repairing a dirt cut piece of highway, Billy's eye is almost as true as an engineer's with a transit. The job he recently finished on Nagal Hill, for instance, would establish the reputation of any road builder. As he very forcibly put it, "a road, like a pair of shoes, when repaired, only last for a certain length of time. A road to remain good, needs repairing at regular intervals—weather conditions, heavy traffic and other things may play hell with the best of road construction in a short time."

In the Probate Court of Lincoln County, State of New Mexico.

In the Matter of the Estate of **SANTOS R. LOPEZ, Deceased, No. 207**

NOTICE

Notice is hereby given that the undersigned, on the 31st day of March, 1924, appointed Administrator of the Estate of Santos R. Lopez, deceased, by the Hon. W. E. Kimball, Judge of the Probate Court of Lincoln County, New Mexico.

Therefore, all persons having claims against said estate are hereby notified to file the same with the County Clerk of Lincoln County, within one year from the date of this notice, as provided by law, or the same will be barred. Done at Arabela, N. M., this 31st day of March, 1924.

T. PACHECO, Administrator.

PORT STANTON

Miss Price in the newest addition to the nursing staff. She comes from Phoenix, Arizona.

Mrs. P. Manning from Miami, Florida, is visiting her husband, who is a patient here.

Several of the patients and persons attended the dance at Carrizosa Saturday night.

A number of the personnel attended the play and dance at the Honda school at Hondo Saturday night.

Mrs. Gensler spent the week-end at the home of the Edes at Lincoln.

Mrs. Fagan entertained at bridge at her home Saturday afternoon. A lovely three course luncheon was served. Mrs. Hobert and Miss Kane won the prizes.

Mrs. Lee Hudgens of Los Angeles is here visiting her sister Mrs. A. V. Rogers. Mr. Hudgens, construction boss for the E. P. & S. W., will have charge of the construction of the pipe line they are laying in the mountains this summer.

Capitan School Notes

At the last meeting of the Student Organization it was decided to have a party for the members of this organization at the school building, March 19th.

The boys and girls of the high school are going to begin practicing "Track." We hope to be ready to compete with the new second schools soon.

The Athletic Association is collecting funds to purchase a few necessary items for track practice. We will offer the public some form of recreation to aid in boosting our treasury. We need quite a sum more to get in shape for competition with schools in track and baseball.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL LESSON

Lesson for March 21

JESUS DIES AND ARISES FROM THE DEAD

LESSON TEXT—John 19:17-20; 20:1-7

GOLDEN TEXT—Therefore hath my Father love me, because I lay down my life that I may take it again.—John 10:17

WITMAN'S TOPIC—Jesus Dies and Rises From the Dead.

JUNIOR TOPIC—Jesus Dies and Rises From the Dead.

INTERMEDIATE AND SENIOR TOPIC—Jesus Dies and Rises From the Dead.

YOUNG PEOPLE AND ADULTS TOPIC—Christ Dying for Our Sins and Rising Again for Our Justification.

1. Jesus Crucified (vv. 17-20).
2. The Place (v. 17).
3. It was a hill called in Latin Calvary, in Hebrew Golgotha, which in shape resembled a skull.
4. His companions.
5. Two malefactors (v. 18, cf. Luke 23:32).
6. This shows how completely Jesus was identified with sinners.
7. The inscription over Him (v. 20, 20).
8. It was customary to place an inscription over the cross stating the crime for which the victim suffered.
9. Gambling for the garments of Jesus (v. 23, 23).
10. This is an exhibition of how men's hearts may be so glib as to plan and act for present gain under the shadow of the cross of Christ.
11. Utterances from the cross (v. 23-30).
(1) "Behold thy son"—"Behold thy mother" (v. 26, 26).
In this crucial hour He forgot His own bitter anguish and interested Himself in those He loved. Though He was leaving the earth and its struggles, He made provision for the dear ones left behind!
(2) "I thirst" (v. 27).
As the slayer's representative, He suffered not only mental agony of mind, but of body as well.
(3) "It is finished" (v. 30).
While no one can fathom the depth of meaning in these words, they do no doubt indicate (a) that the calumnies and indignities heaped upon Him were at an end.
(4) His death (v. 30).
His death was voluntary. With full consciousness that all things which He had come to do had now been accomplished, He dismissed His spirit.
12. The Resurrection of Jesus (20: 1-7).
1. The empty tomb (v. 1-3).
(1) The testimony of Mary Magdalene (v. 1, 2).
This woman, out of whom Jesus had cast seven demons (Mark 16:9; Luke 8:2), announced the fact of the empty tomb to Peter and John.
(2) Personal investigation by Peter and John (v. 3-10).
The news of the empty tomb which Mary brought with breathless haste moved John and Peter that they both ran to investigate.
(3) The manifestations of the risen Lord (v. 11-20).
(1) To Mary Magdalene (v. 11-18).
(a) Mary weeping at the empty tomb (v. 11).
Peter and John went home, but Mary could not—she stood weeping. She should have been rejoicing that the grave was empty, for the empty tomb was an eloquent proof of His resurrection and deity.
(b) Mary questioned by the angels (v. 12, 13).
She viewed through her tears angels at the tomb, who inquired the cause of her sorrow.
(c) Jesus reveals Himself to Mary (v. 14-18).
She first saw angels, and then her eyes lighted upon the Lord. She did not recognize Him in His resurrection body but His voice was familiar to her. As soon as her name was called she recognized Him and worshipped at His feet.
(d) Jesus forbids her to touch Him (v. 17).
This shows that she was now coming into a new relationship with Him. Hence there was no time for such familiarity with the disciples who were in darkness. "Go tell my brethren," was the message for her to carry.
(e) Mary's testimony (v. 18).
(2) To the disciples (v. 19-20).
(a) When Thomas was absent (v. 19-20).
It came to them with the message of peace (v. 19), showed His hands and sides (v. 20) and commissioned them (v. 21) and bestowed upon them the Holy Spirit (v. 22).
(b) When Thomas was present (v. 24-29).
Verily over Thomas' skepticism was realized by the sight and touch of the Lord!

To Make True the Dream

The most valuable possession which Christianity holds for me is this conviction: That the task is unfinished, that the combat is still on, and that it is my business to invest my life in such a way as to make true the dream of the Son of Man.—Edward A. Steichen.

Depend on Jesus.

Never let earthly things, not even the bitterest sorrow, blind you to the presence of Jesus.

Bursum Contest

Washington, March 17.—The question whether ballots cast in the New Mexico election, on which the Bursum-Branton contest is held, will be brought to Washington for an official recount, was discussed in executive session today but no conclusion was reached.

The committee will meet again Monday to resume deliberations on the subject.

So far the investigation has been confined to written briefs and pleadings.

The New Election Code

Governor A. T. Hannet last Monday granted the republican senate majority ten days more time in which to submit an amended election law, which corrects the "errors" existent in the draft submitted by the special commission, properly remarking that it is so important a matter as this it were wise to take all time necessary. Which is good politics and good citizenship, since it places the success or defeat of a proper statute squarely up to the republican senate majority. A great many observers, the Dispatch among them, are utterly skeptical of the intent of the Benehan warriors to meet the problem in a conciliatory and proper spirit, but it is certainly the part of good sense to give them the opportunity to do so, the situation thus developing so that if the whole plan fails the blame must rest with the republicans. So far as this paper is concerned, we have not altered our original belief that the law as submitted by the commission was just and right, and along the only line possible to secure honest elections in New Mexico, or rather that part of it west of the mountains.—S. W. Dispatch.

MICKIE SAYS—

SURE! YOU CAN GET ALONG WITHOUT SUBSCRIBING TO THE MOUNTAINEER! A PELLER WHO LIVE WITHOUT RAILROADS, AUTOS, TELEPHONES OR ELECTRIC LIGHTS OR BATH TUBS, BUT WHO WANTS TO?

WHY BE A SCORNER—BUY A SUBSCRIBER!

Meedy on Enthusiasm

Enthusiasm means "in God"; and I can't understand how any man can realize his standing before God and not be on fire 300 days in the year. Any man who goes into business and doesn't throw his heart into it doesn't succeed. Now, why not go into the Lord's work as earnestly as into anything.—D. L. Meedy.

Purpose of Prayer

The purpose of prayer is to get God's will done.—D. D. Gordon.

A lovely party was given Monday evening at the home of Mr. and Mrs. Coombes when Mesdames Coombes and Will Tibb worth entertained at bridge in honor Mrs Lane who left Thursday morning for Chicago.

The play was enjoyed during the evening, Mrs. G. A. Tibb worth making high score. At a late hour the guests gathered around the large dinner table to partake of delicious refreshments.

Those attending included Mesdames Lane, Jim Howard, Gardentire, Garrod, G A Tibsworth, Boone, White, Beard, and Miss Belger. Messrs. Howard, Coombes and Lane.

The Robert A. Hages Post of the American Legion met in regular semi-monthly meeting Wednesday night at the Bank Building. A large number of comrades were present and took in new members. The total membership now amounts to twenty-two and indications are that before the Post is a month old the membership will be in the neighborhood of forty.

The Post Commander appointed a number of committees to cover several departments of the organization and all registered considerable enthusiasm in their work. Comrade J. M. Cavataugh addressed the meeting and Comrade Townsend of Roswell, Senior Vice Commander of the district was again with us to advise with us in the conduct of the local organization.

Fort Stanton will journey to Roswell Monday to play the first game of the season with the New Mexico Military Institute, Stanton has some very likely material from which to select a team this year and great hopes are prevalent that it will equal the team they had in the field during the early part of last year.

Notice is hereby given that Manuel T. Bonavidez, of Roswell, N. M., who, on Dec. 18, 1920, made Additional H. E. No. 026321, old number 048706, for NE 1/4, NE 1/4, Sec. 13, T. 2 S., R. 16 E., N. M. P. Meridian, has filed notice of intention to make final three year proof, to establish claim to the land above described before L. L. Beard, U. S. Commissioner, at Capitan, N. M., on the 17th day of April, 1926.

Claimant names as witnesses: Ygnio Salazar, Jose Salazar, Christoval Zamora, these of Lincoln, N. M. Ramon Torres, of San Patricio, N. M.

K. D. Stoes, Register.

Health and Home

WHAT IS EVAPORATED MILK?

Did you ever stop to figure out the exact meaning of "Evaporated Milk"? The word "evaporated" may give you the idea that in the process of evaporation the milk has lost some of its valuable qualities. It hasn't. It has lost only water. Sixty per cent of the water is evaporated from the milk after it comes fresh from the cow.

The first step in processing the milk is the evaporation, when a portion of the water content is removed. The second step is the homogenization, which insures the cream being distributed evenly throughout the milk. The third is the canning. The fourth is sterilization, which takes place in the can when the milk is subjected to sufficient heat to destroy the bacteria. Thus evaporated milk remains as pure and fresh in the container as when it foamed into the pail in the farmer's barn.

Evaporated milk is now generally recognized as the freshest milk available to those not living on farms and producing their own milk. For freshness in milk means purity.

Transportation of milk from the dairy country to the city is well systematized and rapid and yet owing to the immense quantities of milk that must be rushed in daily, much of it must be obtained at considerable distances and a large per cent is necessarily some days old when it is delivered by the milkman.

Evaporated milk, on the other hand, is fast night's and this morning's milk. From the dairy barn, always under rigid inspection, it is hurried by farmers to factories located in the heart of the dairy country and delivered when it is fresh. Evaporated milk is canned just at its "fresh moment," when it is in its finest state. It is never allowed to get old. The whole process from cow to can requires only a few hours. It may be interesting to know that the process of sterilizing takes place after the milk has been sealed in its containers. Once in its sterilized containers, there is no possibility of deterioration.

The sterilizing of evaporated milk insures its purity—it makes a safe milk for the children. Evaporated milk is bottled milk and this makes it more digestible.

It may be used for any milk need with safety and economy.

For ordinary cream needs, use it just as it comes from the can. When a rich milk is desired, add an equal part of water. For cooking and baking, two parts water and one part milk will usually suffice.

Notice is hereby given that Carmelita T. Sabedra, formerly Carmelita Presqueux, of Tinnie, N. M., who, on Feb. 28, 1920, made additional S. R. H. Entry, Nos. 026882, 048602, for NW 1/4 Section 14, Township 10 S., Range 17 E., N. M. P. Meridian, has filed notice of intention to make final three year proof to establish claim to the land above described before L. L. Beard, U. S. Commissioner, at Capitan, N. Youth of Nation Tops Death List in U. S. Auto Fatalities

AUTO DEATH RATE HIGHEST AMONG YOUTH

Age Group	1915	1916	1917	1918	1919	1920	1921	1922	1923	1924	1925	1926
Boys	1750	1500	1200	1000	800	600	400	300	250	200	150	100
Girls	1000	800	600	400	300	200	150	100	80	60	40	30
Total	2750	2300	1800	1400	1100	800	550	400	330	260	190	130

YOUTH pays the heaviest toll in annual automobile fatalities. From five to fifteen years in the period when the greatest number of fatal accidents occur, for both sexes. The chart shows the age distribution of automobile deaths for men and women as given in the latest mortality figures prepared by the government. These figures, says the Stewart-Warner Safety Council for the prevention of automobile accidents, emphasize the need for more playgrounds and increased safety education among school children.

Complete statistics are not possible, as only 85 per cent of the United States keeps mortality records. About 22,000 a year is generally conceded to be the annual number of automobile fatalities. For 8,621 males known to have been killed in one year there were only a third as many women, or 2,845, in spite of the fact that the male population is only 4 per cent greater than the female.

This chart does not take into consideration the 600,000 Americans who are injured annually by automobiles. Such figures are not available except in certain states, but that boys and girls again make up the bulk of such casualties is indicated by the records of New York state kept for the first nine months of 1925. Here 77,769, or practically one-third of the 38,302 injured were under fifteen years of age.

GLAD TO SPREAD GOOD NEWS

Helped by Lydia E. Pinkham's Vegetable Compound

Cleveland, Ohio.—The friends of Mrs. M. Kowalczyk of 6819 Hope Avenue were glad to hear that she had regained her health. For quite some time Mrs. Kowalczyk was quite ill and it was impossible for her to work. She took Lydia E. Pinkham's Vegetable Compound and I feel stronger already and sleep sounder. I am very glad to spread the good news of how it has helped me.

Detroit, Michigan.—I heard of this medicine through an advertisement in the 'Detroit News' and wrote to Mrs. Grace Gillett, whose letter was published. Then I started taking the Vegetable Compound and got the best results. I am really happy if I can advise women to take your medicine. —Mrs. M. E. McFarrier, 12103 Washburn Ave., Detroit, Mich.

Lydia E. Pinkham's Vegetable Compound has been in use by women for over fifty years. It is a vegetable tonic made from root and herbs and is sold at all druggists.

DON'T BE GRAY
Turn your gray hair gradually to its natural color with the help of **Caban Hair Color**. It is a permanent color and does not wash out. It is sold at all druggists.

HEROIC
The critic (laughing) "You're going to do something big for the theater and dramatic art."
The actor "I'm not, but you are going to stop writing play reviews."

It seems to be easier for a rich man to pass through the eye of a needle than it is for a wayward boy to keep out of a poolroom.

A Business of Your Own
The George F. Cram Company, an old-established corporation, desires the services of a man with car to cover local territory handling a new approved, highly recommended and greatly needed equipment for schools. This is an unusual opportunity for the right man to establish a business for himself. Write for particulars, giving references, to The George F. Cram Co., Dept. 58, 111 N. Market St., Chicago, Ill.—Adv.

The Dear
First Lady—Your husband's an awful liar.
Second Lady—Why? Has the brute been telling you you are the only woman he ever really loved?
First Lady—No—He said you were—
—Sydney Bulletin.

BEAUTIFY IT WITH "DIAMOND DYES"
Just Dip to Tint or Boil to Dye

Each 15-cent package contains directions so simple any woman can tint soft, delicate shades or dye rich, permanent colors in lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings—everything!

Boy Diamond Dyes—no other kind—tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.

A Wish
"Blank is all taken up with this New Thought idea."
"Good! I hope he gets one."—Life.

DEMAND "BAYER" ASPIRIN
Aspirin Marked With "Bayer Cross" Has Been Proved Safe by Millions.

Warning! Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians for 25 years. Buy "Bayer" when you buy Aspirin. Imitations may prove dangerous.—Adv.

When a man expresses contempt for money he has more of it than he can use.

The Cuticura Toilet Trio. Having cleared your skin keep it clear by making Cuticura your everyday toilet preparation. The Soap to cleanse and purify, the Ointment to soothe and heal, the Talcum to powder and perfume. No toilet table is complete without them.—Advertisement.

Concett often gets a small man into a large hole.

THE KITCHEN CABINET

To each man is given a day, and his work for a day; And once and as more he is given to travel this way, And woe if he fly from the task, whatever the odds; For the task appointed to him on the scroll of the gods. —Edwin Markham.

POP CORN WAYS
Is there any food more appetizing than fresh, tender, well-popped corn seasoned with butter? It is always welcome at any time. Corn to pop well should increase its bulk twenty times. If a wire popper is used for popping hold it far enough away from the heat to avoid burning. The right degree of heat should make good corn pop in a minute and a half. Do not throw away the old bachelors (those that won't pop)—they can be put through a grinder or mill and will make a good breakfast cereal served with top milk. Parched sweet corn is delicious ground and served with milk.

Pop corn is used as a garnish for corn soup. Pop corn with milk makes a delightful supper dish. For those who like chocolate the following will be enjoyed: To two cups of sugar, add one-half cup of corn sirup, two squares of chocolate grated and one cup of water. Cook until the sirup hardens in water then pour while hot over four quarts of freshly popped corn; stir well to insure the uniform coating of the kernels.

For sugared corn make a sirup by boiling two cups of sugar and one cup of water until the sirup hardens in cold water; pour this sirup over six quarts of corn and stir until the grains are well coated.

Pop Corn Jack—This is home-made cracker jack. Take a cupful of molasses, two tablespoons of water, one tablespoon of vinegar, cook until nearly brittle when tried in water, then add a tablespoonful of butter and a pinch of soda. Stir into four cupfuls of pop corn, adding a handful of shelled peanuts. Stir until all are well covered with the sirup. Puffed rice may be used in place of corn; pour out into a buttered tin to cool, break into squares when cold.

Pop Corn Balls—Take a pint of molasses, a pint of water, two tablespoons of butter and a teaspoonful of vinegar. Cook till the sirup will harden in cold water, add half teaspoonful of soda dissolved in a teaspoonful of water. Pour over four quarts of popped corn. Stir until the kernels are well covered, then press into balls quickly with buttered hands.

Maple Sirup Pop Corn Balls—Prepare the sirup using maple sirup or maple sugar just as for pop corn balls; the flavor is especially delightful. Served with maple wax, the children will have a rare treat.

What to Eat
This is the time of year when waffles for breakfast, waffles for luncheon and waffles for supper are a welcome food.

Waffles—Of the dozens of waffle recipes which are all good, this is the best, by far: Sift together one and one-fourth cupfuls of flour, one-fourth teaspoonful of salt, one-half teaspoonful of soda. Separate the whites and yolks of two eggs, beat well, add the egg yolks to one cupful of thick sour milk, stir in the sifted flour and other ingredients, add three tablespoons of melted butter and fold in the stiffly beaten whites. Cook on a hot, well-greased waffle iron.

Imitation Pate de Fois Gras—Cook in separate saucetins in enough water to cover one calf's tongue and one calf's liver and let stand a day in a refrigerator to become cold and firm. Cut the tongue into small triangular pieces to look like truffes. Put the liver through a meat grinder, using the finest knife; repeat the process. Into a large mixing bowl put the chopped liver and add one-fourth its volume in softened butter, working them together until smooth. Now add to the liver paste one tablespoonful of onion juice, one teaspoonful each of made mustard and Worcestershire sauce, one-fourth of a teaspoonful each of ground cloves, cayenne pepper, one-half of green grated, and salt to taste. Butter the glasses and pack the paste as firmly as possible, mixing the bit of calf's tongue with it. Cover with melted butter and set in the ice box. This will keep for weeks.

Ribbon Salad—Place a slice of pineapple for each service on lettuce. On the pineapple place sections of orange and grapefruit with membranes removed, in alternating colors, with a strip of red apple unpeeled, between. Serve with any desired dressing.

Corn Dishes—If we are to be loyal Americans we should at this time try to serve as much corn as possible. Make corn bread, corn meal, corn griddle cakes and corn meal mush. A kettle of well-cooked mush served with good rich milk is a dish which is both wholesome and satisfying. Serve with a few bits of shredded salt codfish for an appetizer and feel that you are pleasantly doing your duty by the corn crop that we are asked to help consume.

Nellie Maxwell
Onions Got Hot
"She used to get onions just before I arrived home at night so that I would think she was crying and then I would buy her a new hat or dress." was the testimony of a man in court in London in answer to his wife's divorce suit charging him with neglect.

Deadliest Wound
A wound from a tongue is worse than a wound from the sword; the latter wounds heal, the former never.

"Are you sure, Dorat?"
"Well, I won't marry him this week, anyhow."

Nature's own body builder

Tanlac is Nature's greatest tonic and builder. Made from roots, herbs and berries after the Tanlac formula it revitalizes the blood, tones up the digestive organs and puts the whole system in fighting trim.

Don't go about your work sickly and discouraged. Take the example of millions who have been helped by Tanlac. Stop at your druggist's today and get this wonderful tonic. You'll be surprised how quickly you improve. For constipation take Tanlac Vegetable Pills.

CORNS

Lift Off—No Pain!
FREEZONE

Doesn't hurt one bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers. Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the foot calluses, without soreness or irritation.

Green's August Flower
For Constipation, Indigestion and Torpid Liver
Relieves that feeling of having eaten too heavily. 30c and 70c bottles. AT ALL DRUGGISTS.

CHAPPING - SORES
One treatment restores the itching and stinging, healing if you use **Restinol**

FARM STOCK

GOOD PASTURE IS FIRST ESSENTIAL

A good pasture is the first essential for successful live stock production and one containing only the wild or native grasses will not increase the bank account on the basis of growing cattle since it will produce an approximate gain of only one pound per animal daily.

"Such a pasture will only pay about two per cent on the investment," says Prof. R. S. Curtis, of the animal husbandry department at the North Carolina State college. "A business man figures that he must have at least six per cent on his money. A good pasture seeded to tame grasses and properly made and cared for will return this amount. In other words, where the live stock man gets only one pound gain per day on native pastures, he should get, from two to three pounds gain on all tame pastures."

"It is time to plow up the old pastures, reseed them and make the investment pay. Some farmers who are getting about 125 pounds of gain per animal in a season by using old, native-grass pastures should remember that there are numerous instances where other farmers are getting 350 to 375 pounds of gain per season. This means that the live stock man who has a good pasture and is using it as a business man, is growing out a steer in one year, while the other man, not so business-like, is taking two or three years to grow out his steer. In the meantime, he has his money tied up and incurs the risk of carrying the animal."

Professor Curtis states that live stock growers must learn that a beef animal should be kept growing from the time he is born until marketed. There should be no lapse in weight during this time. Pasture plus feed is the way to do this. The live stock grower must grow pasture, use plenty of feed, with judgment, and place his animals on the market with the least delay possible. Money can be made in the growing of beef cattle but only on the basis of good pastures available.

Feed Ewes Liberally to Increase Crop of Lambs

The sheepman who makes brood ewes of his flock is likely to make more money than the man who helps only enough to perpetuate his flock. This fact is brought out by a survey conducted on 20 flocks by the Ohio State university.

Five flocks having the highest percentage of brood ewes and lambs were compared with the five flocks with the lowest percentage. In the flocks with the highest proportion of lambs, 48 per cent of the flock were bred ewes and 57 lambs were raised for every 100 head of the flock. In the five flocks of the lowest proportion of lambs, 53 per cent of the flock were bred ewes and 21 lambs were raised for every 100 head. Compared to this, high and low market, the average of all flocks showed that 36 per cent were bred ewes and 29 lambs were raised in every 100 of the flock. The high five flocks reported an average profit of \$2.04 on a sheep; the low five flocks 93 cents a sheep, and an average of all flocks of \$1.08 a sheep. The conclusion drawn by the university was that the difference of profit can be attributed to the higher percentage of lambs or the higher percentage of brood ewes in the more profitable flocks.

Clover Bloat Treatment as Favored by Kentucky

Some years ago the Kentucky agricultural experiment station made investigations as to the cause and cure of cattle bloat on clover. Their recommendations are as follows:

"When cattle are first pastured on clover they should only be kept in the pasture for a short time and should not be turned into the pasture until after the dew has disappeared. Further, clovers that have been frosted are much more apt to cause bloat than at any other time. After the cattle have become accustomed to clover, there is not so much danger of bloat as there is when they are first placed on this kind of feed. The treatment of cases that do occur consists of tapping or puncturing the pouch, which permits the escape of gas that has formed, also to drench immediately with a solution of one-half to one ounce of formalin to a quart of water. This may be repeated if necessary. It is always advisable to follow with a dose of salts."

Large Lamb Crop
The chief factors of a large lamb crop are prolific ewes, plenty of green feed at breeding time, vernal rains, good feed and plenty of exercise during cold weather, and good care at lambing time. Getters count on 100 lambs at marketing time for each 100 ewes in the breeding flock under farm conditions over a period of years. There is probably something wrong with the ewes or the management if the crop runs less than this for a number of years.

Signs of Cattle Scab
Common cattle scab occurs in all sections of the country, and hence it is wisdom on the part of cattle owners to be watchful for its appearance. Any persistent itching of the skin, manifested by rubbing, scratching and shaking on the part of the animal, which cannot be associated with lice, should be associated with lousiness, should induce one to make a more careful examination. The hairy places on the skin, such as that of the root of the tail, should be examined.

Don't Risk Neglect!

To Ignore the Early Warnings of Kidney Trouble Is Serious and Often Fatal

ONE'S health depends upon one's kidneys. The kidneys must filter every drop of blood. If they fail to properly do this work, there's a poisoning of the whole system. Then comes backache, dizzy spells, bladder irregularities and loss of vitality. Why wait? Why not use Doan's Pills? Doan's have helped thousands. Ask your neighbor!

A Colorado Case
A. A. Hill, 529 Eighth St., Alamosa, Colo., says: "Kidney trouble came on suddenly and my back became lame and caused much misery when I attempted to lift. Twitching pains in my back tormented me and I was all run down. Doan's Pills helped me quickly."
MORE THAN FIVE YEARS LATER, Mr. Hill said: "Doan's rid me of the trouble and I haven't been bothered since."

Doan's Pills

Stimulant Diuretic to the Kidneys

Build Up Your Health With DR. PIERCE'S GOLDEN MEDICAL DISCOVERY
If You Would Avoid COLDS, GRIPPE.

A Tonic which Dr. Pierce prescribed when in active practice 60 years ago. In Liquid or Tablets, at your Dealer's. Send 10c. to Dr. Pierce's Medical Hotel, Buffalo, N. Y., for trial size Tablets.

Piles Disappear Peterson's Ointment

"Please let me tell you," says Peterson, "that for instant relief from the misery of blind, bleeding or itching piles, there is nothing so good as Peterson's Ointment, as thousands have testified." Best for old sores and itching skin. All druggists, 60 cents.

Popular Art
The finest works of art can never be popular. . . . Popular art, even the best of its kind, owes its popularity to the fact that it deals with something apparent to the man in the street; art, however sublime, which goes beyond the apparent can never be popular. There is no reason, however, why the circle of appreciators should be restricted as at present—Percy Moore Turner, in "The Appreciation of Painting."

New One
A new excuse for the busy office man has been invented. Instead of replying, "He's in conference," a young lady secretary in Wall street coined a new "turn-away" phrase, "He's in a temper."—The Outlook.

"Those bilious headaches can be prevented"

"I know how agonizing they are. For years I was a chronic sufferer. And the headaches were not the worst part of it. The strong drugs I used to take to relieve the pain upset my stomach and slowly but surely undermined my general health. Finally I found out that my headaches were due to constipation. My doctor advised Nujol. After taking it regularly a few weeks the trouble disappeared. Since then I have never had another headache. There is no reason why I should, for the cause has been corrected."

Nujol Corrects Constipation in Nature's Way
Constipation is dangerous for everybody. Nujol is safe for everybody. Nujol simply softens the waste matter and thus permits regular and thorough elimination without overtaxing the intestinal muscles. Medical authorities approve Nujol because it is gentle, safe and natural in its action.

You can take Nujol for any length of time without ill effects. To insure internal cleanliness, it should be taken regularly. Unlike laxatives, it does not form a habit and can be discontinued at any time. Ask your druggist for Nujol today and begin to enjoy the perfect health that is possible only when elimination is normal and regular.

Children Cry for

Fletcher's CASTORIA

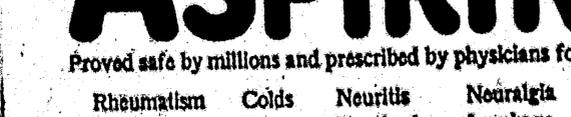

MOTHER—Fletcher's Castoria is especially prepared to relieve infants in arms and children all ages of Constipation, Diarrhea, Wind Colic and Flatulency; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep.

To avoid imitations, always look for the signature of **Dr. J. C. Fletcher** Absolutely Harmless—No Opium. Physicians everywhere recommend it.

So It Seems
"What a joy for daddy?"
"To give grandma their liberty"
—From Fletcher, The City of Mexico.

The hen should not be blamed if the egg is bad. It was good when she marketed it.
