Haiti, Black Republic

On Their Way to Market.

(Prepared by the National Geographic Society, Washington, D. C.)

AFTER a decade or more of supervision and assistance by the United States, the republics of Haiti and Santo Domingo, which share the same island in the Caribbean, have got pretty firmly on their feet. This is evidenced by the orderly election recently carried out in Haiti, and by the serious discussion of the withdrawal of United States marines from Santo Domingo.

The best general name for the second largest of the Greater Antilles on which the two republics are situated is that which Columbus gave to it after its discovery in 1492—Hispaniola. He christened his first settlement there "San (or Santo) Domingo."

As to a great extent the Spanish colonization of the island proceeded from this fortified town, now the capital of the Dominican Republic, "San Domingo" (to a great extent superseded Hispaniola (Espanola) as the name of the whole island. The French pirates and buccaneers generally called the island "Saint Domingue."

The aborigines seem to have lingered longest in existence in the northwestern parts of Hispaniola, and the name which they gave to their country, or to one of its districts, was Haiti.

This large island of 28,240 square miles is very sharply and definitely divided into the two states—the Republic of Haiti in the west and of Santo Domingo in the east. Santo Domingo speaks Spanish, either the classical Castilian or a slightly corrupted dialect, and Haiti uses French as its official language, while 2,000,000 of its negro peasantry speak a creole language, which, though founded on French, has become an absolutely distinct tongue. It is somewhat awkward, therefore, to give the name of "Haiti" or of "San Domingo" to the whole island. Hispaniola would be preferable.

It is highly improbable that the whole of Hispaniola ever will be under one central government. Santo Domingo will become a yellow or even a white state. Haiti will always be a land of the blacks.

Scenery is Beautiful.

The scenery of Haiti—and indeed of Hispaniola generally—when this island becomes better known, will take a very high rank among the beautiful and delectable regions of the world. The climate, though hot, is healthy, and for six months of the year, at least, delightful; while everywhere above 2,000 feet in altitude it is ideally temperate all the year round.

Haiti is extraordinarily mountainous, though its ranges or peaks do not reach to the altitudes attained by two or three points in Santo Domingo, where the highest peak—Monte de la Tina—possibly exceeds 10,000 feet in altitude. The highest point yet measured within the limits of Haiti is about 8,920 feet (the Saddle mountains, or Mont de la Selle).

Between the southern Artibonite range and the long sierra of southern Haiti is a narrow region of plain called by the French, originally the Cul de Sac. This stretches from the vicinity of Port au Prince, on the Gulf of Gonaves, to the Bay of Neiba, in southern Santo Domingo, and obviously represents an ancient delta of the sea which, a million years ago or less, cut off southern Haiti from the rest of the island.

At the present day this plain contains several lakes, one of which (Lake Limon) is fresh, one (Lake Azuey) very salt, and one (Lake Marquillo, the largest) brackish. Lake Azuey (called by the French Etang Sarrasin) is almost entirely on Haitian territory, but the basin and bed belongs to Santo Domingo. The other lakes are entirely on Dominican

territory. All of them offer scenery of the most remarkable beauty.

On the southern shore of Lake Azuey splendid mountains rise to the altitude of Mont de la Selle—nearly 9,000 feet—while along the northern bank they reach to at least 4,000 feet. All these mountains above 3,000 feet are clothed with superb forests of Georgian pines, though the British concessionaires and the Haitian peasants are rapidly and too recklessly felling these magnificent trees, the complete destruction of which will undoubtedly have a malign influence on the future rain supply.

The lower slopes of the lower Haitian mountains have dense forests of lignumvite, of fan palms, of royal palms, of mangroves, of logwood and mimosa.

The water of Lake Azuey is very blue, and this (as also in the running streams of Haiti) partly arises from a limestone bottom.

In the Haitian mountains. If the low-lying districts of Haiti are beautiful and attractive in their vegetation and bird fauna, what may not be said about the Haitian mountains. Veritable earthly paradises, perhaps in a way (though less interesting to the botanist) more attractive than the mountains of Jamaica, where there is too much vegetation. There has been rather reckless clearing away of forests in Haiti and Santo Domingo, but the result in some cases is pleasing, for it has produced great open spaces on the mountains, which are covered with a lovely carpet of turf, ferns, low shrubs, and lovely flowers.

Here, in an atmosphere which has all the crispness of temperate North America and the delightful sunshine of an English June, the eye is entranced with the beauty of the landscapes. From a painter's point of view, they are perhaps more wonderful than anything to be seen elsewhere in the West Indies.

One of the elements of delight in the mountain country of Haiti lies in the odor exhaled from these forests of Georgian pines—an odor that never seems to be altogether absent from the exhilarating air.

All this idyllic mountainous region is fairly well inhabited, and the little villages of negro peasants appear on nearly every spur or shelf where there is any level space for cultivation. Here their not-untidy, steep-thatched houses may be seen, generally surrounded with emerald green banana groves, for the banana will flourish up to about 5,000 feet.

Picturesque People. The mountain people are a vigorous and comely negro race. Their clothing is often picturesque; if they can only be induced not to wear a discarded military costume, the head is shaded with a large high-crowned, broad-brimmed straw hat, or rather a hat plaited from dried palm leaves. Very striking patterns of black or red are woven into these hats.

The clothes, affected by the Haitian men (putting aside the military uniform for which they all crave) consist of trousers and a rather becoming smock—derived, no doubt, from the French blouse, but completed and embroidered, and resembling very often the smock-frock once worn by the English peasantry.

The garments of the peasant women are usually long-skirted blouses, but in any degree of affluence these can be covered with turbans and hennep. A bright-colored handkerchief is wound tightly round the hair, and over this, for journeying, is posed a broad-brimmed, low-crowned hat which is held on by a leather strap passed under the chin. It seems to be a point of fashion that this leather strap shall terminate in two little twiddles of leather, so that the women often look like negro men with spurs, twisted goat's hooves.

Spurns \$175,000 for Man of Choice

Cleveland, Ohio.—Mary Kasnic, nineteen years old, grocery clerk, made known her decision to spurn a fortune of \$175,000 so she could marry the man of her choice.

In a will left by her uncle, who lived near Omaha, Neb., Miss Kasnic was bequeathed the money on condition that she marry Frank Doellnar, twenty-eight years old, of Omaha. She has two years to make up her mind.

The will further provides that if Miss Kasnic refuses to marry Doellnar the \$175,000 will go to him.

"I don't love Frank," Mary said. "I am in love with a young Cleveland man and all the money in the world doesn't tempt me."

FIRE MAN'S HOME TO SMOKE HIM OUT

Burned to Death After Fight With Posses.

Fayetteville, Ga.—Clint Brown, sixty, a bachelor farmer, was burned to death in his home when officers set fire to the dwelling to "smoke him out."

Brown barricaded himself in his house after officers had tried to arrest him and had been repulsed when Brown fired on them.

Brown was sought in connection with the slaying of Rich Neeley, negro, whose shot-riddled body was found on a neighboring farm. When Sheriff B. W. Adams and two county policemen attempted to arrest him, Brown opened fire and slightly wounded Officer Edward Dickson. The sheriff's party then withdrew for reinforcements.

Officers of two adjoining counties were summoned and the house was surrounded.

Sheriff Adams said that several shots were exchanged between the barricaded man and the officers.

The warrant for Brown was issued after George Thomas, a cousin and neighbor, had been arrested and was alleged by officers to have confessed to slaying Neeley and implicating Brown.

Gargles Molt Lead; Drives Nails in Body

Paris.—Paris is welcoming somewhat skeptically one Han el Geny, an Indian fakir, who says he can't be hurt because he doesn't want to be hurt.

The high point of the exhibition of Han el Geny, who has appeared before a company of savants and journalists as the first step toward gaining the fame necessary for a vaudeville run, is gargling molten lead. Dressed in the best of Oriental robes and feathered turban, he heats a bit of lead until it melts, takes a spoonful in an aluminum spoon and puts it in his throat. When the lead has cooled he takes a bite to show the imprint of his teeth. Then, taking out the lead, asks all doubters to examine it.

The skeptics point out that Han el Geny always breaks the spoon which transports the molten metal. Can there be substitution, ask the sophisticated Parisians? How can one be sure it is lead, query others. Objections and criticism multiply as the fakir drives nails into various parts of his body, lies upon burning glass while enthusiasts jump on his chest, and puts burning brands to his bare breast. No one seems to believe any more that fakirs are entirely justified for the substitution of an "I" for the "a" in the latter half of the word.

Jeweler Fails Bandits; Breaks Glass With Fist

New York.—Isadore Benner, owner of a jewelry store at 132 Livingston street, saved his daughter's life and jewelry worth \$75,000 by smashing the plate glass of his display window with bare fist, outwitting three robbers.

He, his daughter Tillie, seventeen, and his clerk, Max Glaser, were closing up when a man entered the store and said he wanted to buy a wrist watch.

Benner went to the window and took a tray of watches to the counter. The stranger thrust a long-barreled revolver against the girl's breast and said:

"One move and I'll plug your daughter."

Another man entered and started to drive Glaser into a rear room at the point of a revolver.

Benner turned and with his fist smashed the plate glass window.

The crash attracted hundreds of people and the bandits, pocketing their weapons, ran out.

Fortune Sewed in Dress of Dead Woman Recluse

Brooklyn, N. Y.—A small fortune in paper money was found sewed in the dress of Tillie Johnson, aged woman recluse, when she died here. The money totaled \$5,000.

WOMAN WANDERS 600 MILES AS HER MEMORY FAILS

Goes Shopping in Coffeyville, Kan., Comes To in Texas City.

Fort Worth, Texas.—A few days ago Mrs. Thelma Bachelder, age twenty-seven, was walking through the business section of Coffeyville, Kan., on some shopping errand. The next thing she knew, according to her story to the police, she found herself in the Fort Worth union station, with the incidents of two days entirely gone from her memory.

Old Story Retold. It was an old story to the police here, but heretofore there always had been an explanation, a wild party, intoxication, attempt to escape household drudgery, another man. But Mrs. Bachelder was not one of these types and was living happily with her husband and four children at Coffeyville, where her husband, H. N. Bachelder, is a railway employe.

The woman looked officers straight in the eye, told the same story with-

Told the Same Story Without a Break, out a break and they wired for her husband, who came to Fort Worth next day for her.

Bachelder was as much mystified as the police. He insisted there was nothing wrong with his wife, that she was home-loving, devoted to him, had never expressed a desire to leave and that she had never suffered from mental aberration.

Loss 440 From Purse. "I cannot recall one thing since I was walking down the street in Coffeyville until I suddenly seemed to awaken and say that I was in a railroad station," Mrs. Bachelder said.

"I could not recognize any one, saw that it was not the Coffeyville station and began to worry. I sought to return home and wondered if it would be late. Imagine my surprise when I learned I was in Fort Worth, 600 miles away and that the 440 I had with me was gone. If I was robbed, doped and put on a train I knew nothing of it. I don't recall getting on or off a train. There was only one thing I could do and I did it. I went to the police station for help."

When Bachelder reached Fort Worth he and his wife embraced when they met in the police station and he comforted her by saying "not to mind. Forget it."

Back Broken 14 Years, Weds Old Sweetheart

Hazleton, Pa.—Carried into the church at Trevorton, near Shamokin, Ben Braubitz, for fourteen years an invalid with a broken back, was wedded to Miss Anna Bordell, also of Trevorton.

Braubitz sat in the chair while the ceremony was performed and then was carried to the street again. He wheeled himself to his home where friends gathered to celebrate the marriage.

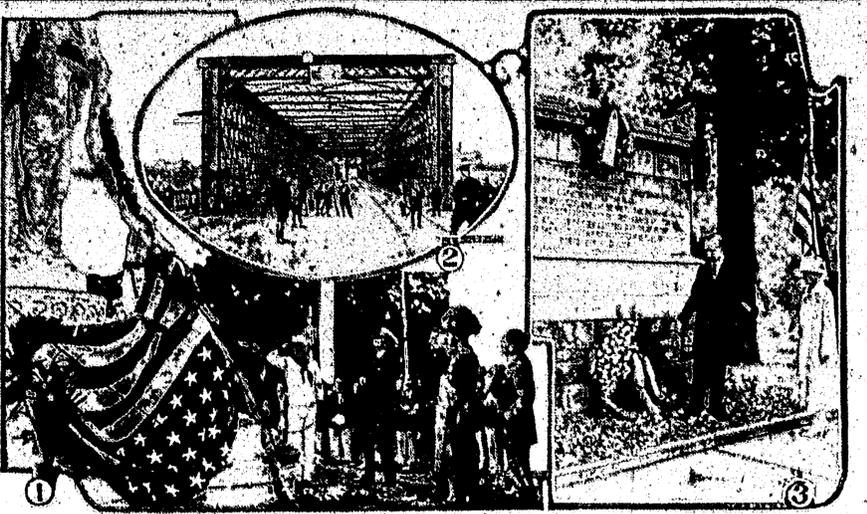

Braubitz was caught beneath a fall of coal years ago. Not long before the accident he became engaged to Miss Bordell. The wedding was postponed while Braubitz remained home with his mother. She died recently and then wedding plans were renewed.

Through War Unscathed, Killed by a Mosquito

London.—Another ironic case of a man going unscathed through the whole World war and dying of a seemingly insignificant happening has been revealed in the death of Major Yerbaugh.

Only thirty-three years old, wealthy, married to the daughter of an English aristocrat, he seemed one of the most fortunate young men in England.

He had gone through the war without the slightest wound. A few weeks ago he was bitten on the leg by a mosquito. Blood poisoning set in, and within a few days he was dead.

NEWS REVIEW OF CURRENT EVENTS

House Ratifies Settlement of French Debt—Egypt May Lose Independence.

By EDWARD W. PICKARD.

SO FAR as the house of representatives is concerned, the settlement of the French war debt to the United States (which) was reached by the foreign debt commission and Ambassador Boraher is accepted. The Burton bill ratifying the arrangement was passed by a vote of 236 to 112, after the house had rejected a motion to recommit with instructions to the ways and means committee to hold the measure until the funding arrangement is approved by the French parliament.

Eighty-eight Democrats voted in the negative on the bill, and were joined by twenty Republicans, two Farmer-Laborites and one Socialist. Fifty-one Democrats and one Socialist voted in the affirmative with 184 Republicans. The measure now goes to the senate, which, however, will await action by the French parliament. Unless this is forthcoming within two weeks the senate probably will not pass the bill before next winter, which would be a great disappointment to the administration.

The settlement, as ratified in the bill, is estimated by the treasury to be a 50 per cent settlement as compared with Italy and an 80 per cent settlement with Great Britain, the percentages being based on the proportion of the total principal plus interest at 4 1/2 per cent to be paid. The debt is to be funded over a 62-year period with no interest for the first five years, after which interest shall commence at 1 per cent, increasing to 3 1/2 per cent in 1935.

WITHOUT a record vote the senate passed the house bill designed to build up the army air service, and creating the office of second assistant secretary of war who would be charged with the supervision of the air corps and the coordination of its activities with other governmental agencies. The senate also passed the navy air expansion bill, and both measures went to conference.

WHILE the senate judiciary subcommittee was deciding that all prohibition measures should be shelved, there were two outstanding pronouncements on the booze question. Senator Borah of Idaho, addressing the Presbyterians assembled in Baltimore, came out so strongly in favor of prohibition and against the attempts to weaken enforcement that he was immediately hailed by the most enthusiastic drys as their national leader and a fit man to be nominated for President by the Republicans in 1928. Certain political speculators who have been trying to find signs of the waning of Coolidge's strength called attention to the fact that the Anti-Saloon leaders have kept away from the White House ever since the President made it clear he was not disposed to let Assistant Secretary of the Treasury Andrews be disciplined for his testimony before the senate committee, and made the most of this in their guessing that the drys were preparing to oppose the re-nomination of Coolidge.

Borah was unscathed in his denunciation of liquor and the liquor traffic, but, being a conservative constitutionalist, he made his strongest point when he said:

"Even a greater question than the liquor question is the capacity of the American people for constitutional government. The question of the hour is: Shall we live up to and enforce that provision of the Constitution which in the orderly method pointed out by the Constitution we see fit to change it? Can we enforce the law which we have deliberately made?"

It is perhaps as definite and specific a challenge of our love for the Constitution, our capacity for self-government, as could be presented to our people. I am infinitely more concerned about the willingness and ability of our people to meet that test than I am about the liquor traffic, brutal and ruthless as I know it to be."

ALBERT J. BEVERIDGE, former senator from Indiana, whose opinions on such matters are always worthy of consideration, severely criticized the recent order of President Coolidge empowering local officers to become agents of the government to help in prohibition enforcement. Mr. Beveridge was addressing the Historical society of Pennsylvania, and said in part:

"To make local officials also federal officials is in practical effect to destroy our political subdivisions, or, at the very least, to subject towns, cities, counties and state to a national control centralized at Washington. The former officer of our regular army who devised this change in the American system and who is in charge of the execution of it, tells us the constitutional pretext for this. He says that the hitherto exclusive police power of the states is now shared by the central government. If this military and bureaucratic exposition of constitutional law is sound, the planners and builders of American institutions wrought in vain.

It is obvious that if local officials can be made national officials to execute one national law, they can be made agents of a general and centralized government to enforce other national laws in every locality. If a careful President, like our present chief executive, would use wisely this unlimited and essentially autocratic power, a heedless President might use it recklessly."

The house judiciary committee has asked Attorney General Sargent for an extended opinion on the legality of the President's order, and also has requested Mr. Coolidge to give it an expression of the limits to be placed on the system if it is legal, the states in which it will be invoked and the salaries which will be paid to municipal or state officials drafted into the federal service.

REPRESENTATIVE TINKHAM of Massachusetts wants the house to investigate the Anti-Saloon league's capitol pay roll and to compel a disclosure of its congressional campaign expenditures. He more than intimates that the league pays congressmen for introducing or supporting bills. This Wayne B. Wheeler, general counsel of the league, flatly denies, and he declares the wet organizations are more in need of investigation than is the league.

CHARGES and counter-charges made exceedingly lively the closing week of the Republican senatorial primary campaign in Iowa. Senator Reed of Pennsylvania brought to the senate's attention the fact that Brookhart campaign literature had been inserted in franked envelopes with a speech which Reed had made opposing the unsealing of Brookhart, and mailed to Iowa voters. Brookhart and his campaign manager denied responsibility for this and the former declared it was a frame-up hearing the earmarks of the Daugherty gang.

Major Lund, campaign manager for Brookhart, sent this telegram to Senator Reed of Missouri:

"Reports that Cummins campaign forces using an unlimited amount of money, estimated at \$500,000, and backed by federal and state patronage. State now flooded with paid Cummins workers in districts, counties and even precincts. An striking contrast, we have Brookhart, a poor man, backed only by people of town and campaign committee laboring day and night to conduct a campaign with entire expenditure not exceeding \$5,000."

Managers for Cummins said their organization was large but that all the workers were contributing their time free.

EGYPT may soon lose its recently acquired independence and again become a protectorate of Great Britain. At this writing it all seems to depend on Zagloul Pasha, whose party won a great victory in the elections but whose return to the premiership will scarcely be tolerated by the British government. The situation is aggravated by the action of the Egyptian assize court which recently acquitted six out of seven persons accused of political assassinations and other crimes. Judge Kershaw, British president of the court, resigned in protest, and the British government has declared to the Egyptian government that it does not accept the court's judgment and reserves full liberty to take what steps it considers necessary to protect the safety of foreigners. As a precautionary measure a warship was sent from Malta to Alexandria. Official opinion in London was that the situation was "distinctly grave." The trouble goes back to the murder of Sirdar Sir Leo Stack in November, 1924, by Nationalists. Zagloul, a Nationalist leader, then resigned as premier. He always has been considered unfriendly to Great Britain. Some of the murderers of Stack were executed. Those recently acquitted also were accused of this crime and Lord Lloyd, British high commissioner, says the court was so influenced by Zagloul's electoral victory that it did not dare pass sentence on them, though the evidence of their guilt was complete.

MARSHAL PILSUDSKI didn't want to be president of Poland, after all. He was elected by the national assembly, but declined the honor because he had no confidence in the people who elected him. He still insisted that the constitution must be changed. Next day the assembly chose for president Prof. Ignacy Moscicki of Lomberg college, admittedly a simple instrument in the hands of the dictator. The situation in Poland is confusing and dangerous. The Warsaw correspondent of the Chicago Tribune says:

"Nobody in Poland, even Sfarahal Pilsudski's closest friends, can get an expression from him on his program or plans. Nobody in Poland knows from where to expect orders or instructions, nor where the ship of state is drifting. The police and public services are becoming demoralized."

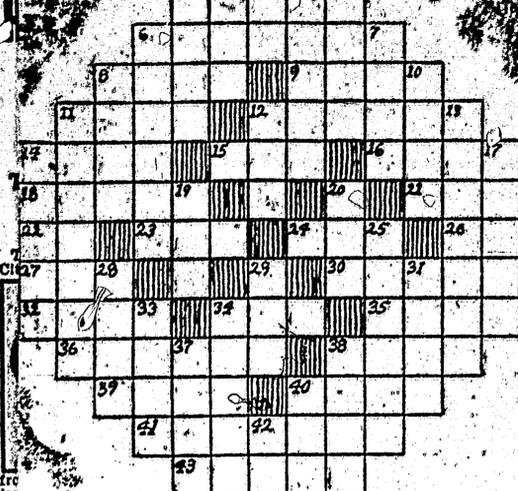

The opposition to Pilsudski is growing stronger and bolder daily, and he may be eliminated unless he stages another military coup.

WOMEN in attendance at the International Suffrage alliance convention in Paris had a lovely week of scrapping, the main result of which was the victory of the conservative element in the exclusion of the delegates from the National Woman's Party of America. The latter demands equality of all rights for women while the League of Women Voters of America, which work in the struggle, believes the women should be especially protected in industry by law. The Women's party representatives were supported by a number of liberals from other countries, and later these forced the adoption by the congress of two measures which amount to a demand for equality in certain forms of industrial legislation. The defeated women, headed by Mrs. Belmont, began laying the foundations for a new international association which, while not hostile to the alliance, will work solely for equal rights in everything.

FOR the first time in history a native-born American has captured the British amateur golf championship. Jess Sweetser accomplished this feat in impressive style at Muirfield, Scotland. Then the American Walker cup team, of which Sweetser was a member, went into action at St. Andrews, winning three of the four two-ball foursomes the first day. The second day the Yankees clinched the possession of the trophy by winning three of the eight individual matches. The British won four and one was all square.

MILITARY leaders in Portugal have accomplished a bloodless coup d'etat and the cabinet and President Machado have resigned. Commander Cabecadas, Gen. Gomez de Costa and Senator Carmoza now control the government.

UNDER most trying conditions the American balloon Goodyear III won the Gordon Bennett trophy race which started in Belgium. Another American entry got second place.

Solution will appear in next issue

Frank Fitzworth is suffering from an infection of the right ankle which has kept him away from his work for the past two weeks.

J. P. Heron Jr., spent Sunday with his parents at Roswell. It is rumored that Jeff is counting the present slow-moving days.

A gang of men are busy installing a gasoline storage station immediately east of the Continental Oil station, and we learn from good authority that the new station will handle Texaco Company products under the management of the Capitan Mercantile Company. It is also rumored that the same parties will install a modern filling station in the vicinity of the tanks.

At the regular semi-monthly meeting of the American Legion at the Bank building Wednesday evening, James Howard was elected to the place of Adjutant to fill the place made vacant by the resignation of Jesse Parker. Those present also discussed the projected Legion picnic to be held in July and finally decided to put it up to the next meeting on July 7. The Legion has ample funds on hand with which to pay for the picnic and it is predicted that it will be a good one.

Mrs. R. M. Hipp has returned from a several weeks' visit with relatives at San Angelo and other Texas points. Mrs. Hipp says the heat in that portion of the state are next to unbearable.

Jesse Parker has resigned his position at the Liberty Garage and has gone to Tucuman where he has accepted a similar position with Albert Rhodes.

Joe Evans has returned from a several weeks' visit with relatives at Abilene and Corsicana, Texas. As usual, it was the torrid weather which drove Joe home.

Wm. Hale and Carl Anderson of Port Stanton have just returned from a fishing trip on the Pecos.

Mrs. A. M. Andrews and children left Saturday for Houston, Texas where she was called by the death of a sister.

J. W. Ezell has leased the Mildred Sears house and moved in Wednesday of this week.

Bob Hale has resigned his position with the Capitan Mercantile Co. and returned to his ranch just north of town where he is rapidly gaining the reputation of "Eriole King."

Mr. and Mrs. Art Holland of Carrizosa were through here Friday en route to the north side of East mountains for an outing.

A number of people from Carrizosa were up on an outing last Sunday. The weather in the low levels is becoming unbearable in places and the populace are seeking cooler climes.

Rev. O'Neil was here the first of the week from Carrizosa. He will move to this place the 23rd inst. and take up his duties as pastor of the First Baptist church here.

Mr. and Mrs. Birdwell of the Stock ranch were here the first of the week. Mrs. Birdwell will go from here to Arizona for a two weeks' visit.

J. W. Ezell and Antonio Andrews made a business trip to Roswell Monday of this week.

Prosperity and Adversity
 So use prosperity, that adversity may not abuse thee; if in the one, securely admit no fears; in the other, despair will afford no hopes; be that in prosperity can forestall a danger can in adversity forestall a deliverance.

PRODUCE ASSOCIATION

POTATOES were a very profitable crop in 1925, according to a survey made by the Sears-Roebuck Agricultural Foundation. The average was the smallest since 1917 and the yield the lowest since 1917. Following four years of overproduction and very low prices, the 1925 season started off with a good price, which increased daily. The peak will be reached in spring shipments.

The annual consumption of 3 1/2 bushels per capita, including seed, is 370,000,000 bushels. The 1925 crop is estimated at 323,245,000 bushels or 40,757,000 bushels under normal consumption.

The 1925 crop is 25 per cent less than the crop produced in 1924, but the ratio of consumable potatoes for the two years may vary still more in favor of the 1925 crop.

With the acreage cut severely all over the country in 1925, the opening prices started out on a higher scale than the peak prices for 1924 and began to increase at a slower rate until they reached in some instances \$3.50 and \$4 per hundredweight at local shipping stations. Every grower should save seed for next spring, as all indications point to high-priced seed potatoes for 1926, with an exception that the acreage planted will be larger in 1926.

AMERICA LEADS NATIONS IN USE OF ICE CREAM

If any one food may be considered as America's national dish, it is ice cream.

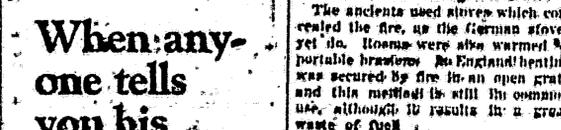

Ice cream is a food particularly adapted to the needs of individuals of all ages, giving as it does the best type of nutrients for the repair of bone, teeth, blood and muscles and for energy.

Today thousands of housewives make their own ice cream. As a consequence, the making of this highly nutritious food at a reduced cost, yet without in any way impeding the product, is of importance.

Home economists have found a means to this end in the use of evaporated milk. There are three important reasons why evaporated milk makes the best ice cream they could get. Because 60 per cent of the natural water in evaporated milk has been removed by evaporation, there is over twice the percentage of solids present in this type of milk than there is in ordinary market milk—and since it is the solids that give ice cream its pleasing flavor, this fact is of moment.

Then the evaporation of evaporated milk is constant, for the reason that it has been put through an homogenizing process, which breaks up the fat globules into tiny particles and distributes them evenly throughout the milk. This attribute makes for an ice cream mixture of uniform quality and no texture.

Finally, experts agree that the use of evaporated milk in ice cream contributes to its hygienic qualities, for the reason that evaporated milk is entirely sterile. Health authorities declare that milk and cream should be treated to a heat of 150 degrees F. for half an hour in order that a product may be produced free from infective organisms. Evaporated milk is processed at 240 degrees for 30 minutes, and, therefore, its introduction into an ice-cream mixture increases its purity in proportion to the amount of evaporated milk used.

When anyone tells you his motor car is "as good as Buick," ask him if it has:

A "sealed chassis"; torque-tube drive; mechanical 4-wheel brakes; 10-plate multiple-disc clutch; Fisher body; National-wide service facilities;

And more than a million enthusiastic owners.

Sunday School Lesson
Lesson for June 20
JUDAH'S PLEA
LESSON TEXT—Genesis 41:18; 45:15.
OLD TESTAMENT—A broken and contrite spirit, O God, thou wilt not despise.—Ps. 51:17.
PRIMARY TOPIC—Judah's Love for His Brother and His Father.
TUNIOR TOPIC—Judah's Unselfish Offer.
INTERMEDIATE AND SENIOR TOPIC—Standing True to Our Home Folk.—**YOUNG PEOPLE AND ADULT TOPIC**—Loving Devotion to Our Kindred.
 The lesson subject should not be, as suggested by the lesson committee, Judah's plea, but rather Joseph's forgiving love. The emphasis should not be primarily upon the stinging and penitent brother, but upon the magnanimous and forgiving brother, Joseph.
 The circumstances which led to his elevation from prison to the position of prime minister were:
 1. The dream of Pharaoh's butler and baker (ch. 40).
 These were two very important officers in Pharaoh's court. Their business was to provide the drink and food of the ruler and of his household. It was most important not only that proper food and drink be provided, but that the monarch should be protected against poisoning. These officers had disturbing dreams. He interpreted their dreams:
 2. Pharaoh's dream (41:1-33).
 For two full years Joseph remained in prison forgotten by the butler. Pharaoh's dream of the fat kine and the lean one and the full ear of corn and the blasted one brought to Joseph the great opportunity. The failure of the wise men of Egypt to interpret this dream caused the chief butler to remember what Joseph had done for him, whereupon Pharaoh brought Joseph out of prison, followed by seven years of famine, and suggested that a part of the produce of the land be stored up during the years of plenty, that there might be food for the people in the famine period. The plan appealed to Pharaoh as feasible. Therefore he assigned the task to Joseph and invested him with authority to execute it.
 3. Joseph's Marsh Treatment of His Brothers (42:1-4:17).
 Driven by sore need his brethren came to Egypt for food. To test them, Joseph accused them of being spies (42:19-27).
 He cast their into prison and demanded that their youngest brother be brought as a proof of the truthfulness of their words.
 4. He kept Simeon as a hostage, because he feared that he had beat the rest home with provisions for their families:
 5. Benjamin's perk (43:1-7). By a clever device Joseph's cup was placed in Benjamin's sack and was used as an occasion for bringing them back on the charge of theft. Convinced of their guilt, Judah pleaded for the release of Benjamin.
 6. Judah's Plea (43:8-15).
 1. For turning away of Joseph's anger (v. 18). He recited the history of the family and their coming to Egypt and appealed on the basis of the effect upon Jacob, their father, if Benjamin was not permitted to accompany them home.
 2. That he himself might be kept in slavery instead of Benjamin (v. 33).
 4. Joseph Reveals Himself to His Brethren (45:1-15).
 7. He declares his identity (v. 1-3). This act on the part of Joseph troubled them. It ought to have made them glad. This not only affords a beautiful example of forgiving love, but is most beautifully illustrated Christ's dealing with His brethren, the Jews.
 8. He bids his brethren come near (v. 4-7).
 When he revealed himself to his brethren, the remembrance of their sin pierced them through. Joseph's first question was about his father, showing that his desire was to put their thoughts far away from their crime. He invited them to come near to him and assured them that God had overruled their crime for their salvation.
 9. Joseph sends his brethren away with good news (v. 8-15).
 As soon as Joseph's brethren knew him and were reconciled to him, they were sent with the glad tidings to their father. As soon as the Jews came to know Jesus Christ as their Messiah, He will send them away to the ends of the earth with the good news of His saving grace.

Department of the Interior U. S. Land Office
 Las Cruces, N. Mex.
 June 9, 1926.
 NOTICE is hereby given that Gregorio Salas, of Picocho, New Mexico, who, on August 19, 1921, made Homestead Entry, No. 027137-049388, W1/2 Sec. 6, W1/2 NE1/4 Sec. 7, Township 11 S., Range 18 E., N.M.P. Meridian, has filed notice of intent to make final three year proof to establish claim to the land above described, before L. L. Beard, U.S. Commissioner, at Capitán, New Mexico, on the 3rd day of August, 1926.
 Claimant names as witnesses:
 Crescento Salas, Jose Maas and Perfecto Sandoval, these of Picocho, New Mexico, and Federico Montoya of Tinajas, New Mexico.

Department of the Interior U. S. Land Office
 Las Cruces, N. M. June 9, 1926.
 To Sam Dotson, of Abilene, Texas, Contestant:
 You are hereby notified that Paul K. Owen, who gives Corona, New Mexico, as his post office address, did on April 9, 1926, file in this office his duly corroborated application to contest and secure the cancellation of your homestead entry, Serial No. 027281-027481, made October 6, 1921, and January 19, 1922, for NE1/4 Sec. 35, and Ad1 for NE1/4 Sec. 21, T. 10-S., R. 16-E., and Meridian, and as grounds for his contest he alleges that said entryman has wholly abandoned said homestead for more than two years last past, and has not cultivated any part thereof during said period of abandonment. That he has failed to make any improvements of a permanent character upon his additional entry that will tend to increase its value for stockraising purposes, as required by the Act of Dec. 29, 1916.
 You are, therefore, further notified that the said actions will be taken as confessed, and your said entry will be cancelled without further right to be heard, either before this office or on appeal, if you fail to file in this office within twenty days after the FOURTH publication of this notice, as shown below, your answer, under oath, specifically responding to these allegations of contest, together with due proof that you have served a copy of your answer on the said contestant either in person or by registered mail.
 You should state in your answer the name of the post office to which you desire future notices to be sent to you.

To My Garden
 by O. Lawrence Hawthorne
 The time I spend on you each Spring
 Could well be used in other ways;
 I find my style of gardening
 Is not the kind that pays.
 I rise before the birds awake
 And labor on till breakfast call;
 Again at five o'clock I take
 And dig till all the dows fall.
 I spade a quarter-section patch
 And sow with care a million seeds;
 I pray that every one will hatch—
 Then let you go to weeds!

© 1926 O. Lawrence Hawthorne

Notice for Bids
 Bids for transportation of School Children in Districts 1, 2, 4, 11, 20, 21, 28, 36, will be let July 31.
 Send sealed bids to office of County Superintendent marked "Transportation Bids". Before bidding read contract which is filed with Clerk of School Board, County Board of Education, Mary C. Fritz, Sec.

Khedive's Ex-Chef Gives Cooking Tip

Great chefs are born, not made. Rarely, if ever, do they rise to the heights in their profession by a lot of perseverance. In Europe and the East a chef with the true gastronomic instinct is treasured and feasted. He expects and obtains the treatment of an ambassador. His dishes are the pride of his master, to be boasted of to his friends in the cafes and barns.
 Such a chef is Haroutoun Okeghian, sometime chef to the family royal of the Medival Egypt, now the owner of a luxurious hotel-casino, restaurant in Chicago. In his forty-three years as a chef, he has been in the kitchen of three Egyptian princes and one princess, the mother of the khedive. When Lord Kitchener was viceroy of Egypt, before the trouble in the Sudan, Haroutoun cooked for him.
 One of Haroutoun's favorite dishes, according to Haroutoun, was schich-kibbi, a dish made from milk-fed baby lambs. Prince Janini, brother of his master, was particularly fond of dried cream and honey preparation which is one of Haroutoun's specialties. Prince Saad Pasha was a keen admirer of a confection Haroutoun makes entirely out of sheep butter and nuts.
 In many of his delectable dishes, Haroutoun uses evaporated milk, which is simply fresh cow's milk sterilized in cans and with sixty per cent of the water removed. Because of its evaporating process through which evaporated milk is put, the fat globules in the milk are broken up into microscopic particles and distributed throughout the milk, where they remain in homogeneous suspension.
 This breaking of the fat globules gives a delicate butter flavor to every drop of the evaporated product, a flavor which ordinary market milk does not have. Haroutoun says he uses evaporated milk in preference to market milk in the preparation of all sorts of baked dishes, as well as in cooking.

Roman Coliseum
 The greatest length of the Coliseum of Rome is about 615 feet; the length of the shorter axis of the ellipse, 510 feet; the height is about 180 feet. The seating capacity was 87,000 people. The dimensions of the arena were 283 feet by 177 feet.

Meridian, has filed notice of intent to make final three year proof, to establish claim to the land above described, before Dan C. Savas, United States Commissioner, at Roswell, New Mexico, on the 10th day of July 1926.
 Claimant names as witnesses:
 Victor Pineda, Tomas Pineda, Lutarlo Cresquez, and Crescento Salas, all of Picocho, New Mexico.
 K. D. STOES, Register.
 6-11 to 7-9.

Department of the Interior U. S. Land Office
 Las Cruces, N. Mex.
 June 9, 1926.
 NOTICE is hereby given that, as directed by the Commissioner of the General Land Office, under provisions of Sec. 2455, R. S., pursuant to the application of John C. West, San Patricio, New Mexico, Serial No. 031372, we will offer at public sale, to the highest bidder, but at not less than \$2.25 per acre, at 10 o'clock A.M., on the 29th day of July, 1926, next, at this office, the following tract of land: SW1/4 Section 21, Township 10 S., Range 16 E., N. M. P. M., containing 40 acres.
 The sale will not be kept open, but will be declared closed when those present at the hour named have ceased bidding. The person making the highest bid will be required to immediately pay to the Receiver the amount thereof.
 Any persons claiming adversely the above-described land are advised to file their claims, or objections, on or before the time designated for sale.
 K. D. STOES, Register.
 6-11 to 7-9.

Platinum
 The geological survey says that most platinum is found native in placer deposits and in black sand. Some is found in veins in some of the mines in the yellow pine districts of Nevada, also in the Roubidoux mine in Wyoming. As much or more than 20 per cent of the platinum content is taken from the ore.
Concerts for Horses
 It is doubtful whether human eccentricity ever went further than in the case of Lord Hoffman who was contemporaneous with William the Third. It was his usual custom to regulate his stud of horses with a weekly concert. He had a gallery erected for the purpose, and he maintained that the music cheered their hearts and improved their tempers.—London Tit-Bits.
Good Business
 Trust people. Believe in people. Make a hobby of people. You'll be cheated—yes—many times. But in the long run you'll win all that the cynics and pessimists lose. The new definition of business is Personal Service. If you are pleased to do pleasant things for people, then you are a business man of the new school.—Foster.
Destroying Cat-Tails
 The application of chemicals in water in which weeds are growing is not considered a practicable way to destroy plants like cat-tails, whose roots are deeply imbedded in the mud. The pond may be drained and plowed, or if the pond is shallow the weeds may be held in check by mowing.

The Accounting
 God will not call you to account for the four or five talents you have not received, but He will ask a strict account for that one which He has entrusted to you.—The Maritime Baptist.
Selfishness
 Selfishness expects love and sacrifice from all, and gives love and sacrifice to none. That is why selfish souls complain so of life.—Young People.
Early Use of Sugar
 It is reported that the manufacture of sugar cane is older than history and that reference to it is found in the Sanskrit of ancient India. The Greeks and Romans used sugar at one time for medicinal purposes only, obtaining it from India at great cost.
Watch Your Change
 The largest denomination of Uncle Sam's greenbacks is the \$10,000 note, only a few of which are in circulation.

 The application of chemicals in water in which weeds are growing is not considered a practicable way to destroy plants like cat-tails, whose roots are deeply imbedded in the mud. The pond may be drained and plowed, or if the pond is shallow the weeds may be held in check by mowing.

The Accounting
 God will not call you to account for the four or five talents you have not received, but He will ask a strict account for that one which He has entrusted to you.—The Maritime Baptist.
Selfishness
 Selfishness expects love and sacrifice from all, and gives love and sacrifice to none. That is why selfish souls complain so of life.—Young People.
Early Use of Sugar
 It is reported that the manufacture of sugar cane is older than history and that reference to it is found in the Sanskrit of ancient India. The Greeks and Romans used sugar at one time for medicinal purposes only, obtaining it from India at great cost.

Department of the Interior U. S. Land Office
 Las Cruces, N. Mex.
 June 9, 1926.
 NOTICE is hereby given that Bryan E. Foster, of Hillrose, Colorado, who, on August 4, 1921, made Stock-raising Entry, No. 022421, for NE1/4 Section 10, NE1/4 Section 11, Township 4 S., Range 16 E., N.M.P. Meridian, has filed notice of intent to make three year proof, to establish claim to the land above described, before E. E. Day & Co., U.S. Commissioner, at Corona, New Mexico, on the 6th day of July, 1926.
 Claimant names as witnesses:
 Frank H. Armstrong and Henry L. Foster of Corona, New Mexico, and Ellis R. Omer and Milton G. Lestnett, of Roswell, New Mexico.
 A. M. BERGEBE, Register.
 6-4 to 7-3.

Department of the Interior U. S. Land Office
 Las Cruces, N. Mex.
 May 28, 1926.
 NOTICE is hereby given that Pablo Cresquez, of Box 16, Picocho, New Mexico, who, on March 1, 1921, made Homestead Entry, No. 025898, for W1/2 Section 21, NE1/4 Section 22, Township 10 S., Range 10 E., N.M.P. Meridian, has filed notice of intent to make final three year proof, to establish claim to the land above described, before Dan C. Savas, United States Commissioner, at Roswell, New Mexico, on the 10th day of July 1926.
 Claimant names as witnesses:
 Victor Pineda, Tomas Pineda, Lutarlo Cresquez, and Crescento Salas, all of Picocho, New Mexico.
 K. D. STOES, Register.
 6-11 to 7-9.

Department of the Interior U. S. Land Office
 Las Cruces, N. Mex.
 June 9, 1926.
 NOTICE is hereby given that, as directed by the Commissioner of the General Land Office, under provisions of Sec. 2455, R. S., pursuant to the application of John C. West, San Patricio, New Mexico, Serial No. 031372, we will offer at public sale, to the highest bidder, but at not less than \$2.25 per acre, at 10 o'clock A.M., on the 29th day of July, 1926, next, at this office, the following tract of land: SW1/4 Section 21, Township 10 S., Range 16 E., N. M. P. M., containing 40 acres.
 The sale will not be kept open, but will be declared closed when those present at the hour named have ceased bidding. The person making the highest bid will be required to immediately pay to the Receiver the amount thereof.
 Any persons claiming adversely the above-described land are advised to file their claims, or objections, on or before the time designated for sale.
 K. D. STOES, Register.
 6-11 to 7-9.

Platinum
 The geological survey says that most platinum is found native in placer deposits and in black sand. Some is found in veins in some of the mines in the yellow pine districts of Nevada, also in the Roubidoux mine in Wyoming. As much or more than 20 per cent of the platinum content is taken from the ore.
Concerts for Horses
 It is doubtful whether human eccentricity ever went further than in the case of Lord Hoffman who was contemporaneous with William the Third. It was his usual custom to regulate his stud of horses with a weekly concert. He had a gallery erected for the purpose, and he maintained that the music cheered their hearts and improved their tempers.—London Tit-Bits.
Good Business
 Trust people. Believe in people. Make a hobby of people. You'll be cheated—yes—many times. But in the long run you'll win all that the cynics and pessimists lose. The new definition of business is Personal Service. If you are pleased to do pleasant things for people, then you are a business man of the new school.—Foster.
Destroying Cat-Tails
 The application of chemicals in water in which weeds are growing is not considered a practicable way to destroy plants like cat-tails, whose roots are deeply imbedded in the mud. The pond may be drained and plowed, or if the pond is shallow the weeds may be held in check by mowing.

The Accounting
 God will not call you to account for the four or five talents you have not received, but He will ask a strict account for that one which He has entrusted to you.—The Maritime Baptist.

SHOULD HUSBANDS DO HOUSE WORK?

How Mrs. Dyer Solved the Problem.

Mrs. Mildred Dyer was lucky. She had a good-natured husband who helped her with much of her housework. One day she was ill for five years, it was often necessary for him to do this. But it bothered Mrs. Dyer. She felt that he had to work hard enough to support the family and she was not getting any credit for her work. She determined to find the road to better health.

She writes: "I think Lydia E. Pinkham's Vegetable Compound is simply wonderful. My health is better than it has ever been. I am getting stronger and gaining in weight. The time she has saved her problem and her household is happier. The Dyer's live at Jeddlands, Calif., Route A, Box 183. How often does your husband have to do your housework? No matter how willing he is, no woman feels comfortable about it. Perhaps you, too, will find better health through the faithful use of Lydia E. Pinkham's Vegetable Compound.

Ends pain in one minute CORNS

One minute—that's how quick Dr. Scholl's Zino pads end the pain of corns. They do it safely. You risk no infection from constant cutting, no danger from "drops" (acid). Zino pads remove the corn—preventing or rubbing off shoes. They are thin, medicated, antiseptic, protective, healing and "soothe" at your doctor's use of shoe dealer's—5c.

At All Druggists

Flying Is Subsidized

Despite the great fiasco of European flying routes, it is known that aviation abroad has not yet been brought to a profit making status. With eyes on the future the governments allow the air lines subsidies. A prominent example cited is that of the Dutch "K. L. M." lines that, while popular, are making less than 50 per cent.

In the old days people spent less money foolishly in a year than modern folks do in a week—Atchison Globe.

"BAYER ASPIRIN" PROVED SAFE

Take without Fear as Told in "Bayer" Package

Does not affect the Heart

Unless you see the "Bayer" logo on packages or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians over twenty-five years for

Cold, Influenza, Toothache, Neuralgia, Headache, Rheumatism, Pain, Fever

Unbroken "Bayer" package contains proven directions. Many boxes of twelve tablets cost few cents. Drug stores also sell bottles of 24 and 100.

NOTE: BEWARE FROM IMITATIONS. The name "Bayer" is on the wrapper and on the tablets. U.S. Pat. 1,144,000.

THE VAMPIRE NEXT DOOR

By MARY B. WOODSON

(© 1929, Western Newspaper Union.)

CRISSA Crane did not look quickly from the window as Crane looked up. Her eyes were hard and sharp. "It's a shame," she snapped, viciously. "We've never had anything like that before in these apartments—"

Crane moved uneasily. It was getting to be rather an old story. "Aw, shucks!" he grunted, after the fashion of husbands.

"I don't care," said Crissa Crane. "It's getting worse and worse. That woman is awful. Why, she must be forty if she's a day—"

"Supposing she is, can't she love all the same," Crane was facetious. But Crissa Crane's eyes were harder, her lips tighter.

"Well, if she's going to have a fall," she snapped, "she might at least choose men old enough to look out for themselves—"

"Men?" Crane smiled crookedly. "Why, they don't make 'em any older than they are at twenty or so—"

Crissa Crane dropped into a chair and rocked violently a minute.

"College boys! Every last one of 'em," she said. "Why they racket in their week-ends like they owned the place, and they stay all hours, and one of 'em camps there all the time—"

"Aw, for Pete's sake!" Crane smoked hard suddenly. "I've never seen anything out of the way. She always seems just jolly to me—the sort of woman boys would like to frill with—college widow stuff. She's awfully good-natured, always smiling—except once when I caught her crying in the hall, accidentally. She wasn't pretty then and it hurts yet. Let's let her alone—"

"Let her alone?" Crissa Crane stormed. "Of course we won't let her alone. She's a married woman and—well, we've simply never had people like that without tangible husbands and we're not going to now. Even if there's no harm in what she does it looks bad, and either she gets out or we do, that's all—with her bold hair and her painted face and fixing herself up like she was twenty—"

"And looking it," interposed Crane. "Well, yes, and looking it. But that makes it worse than ever. Fooling those boys, romping around like a high school kid, and forty if she's a day. As soon as I know she had a mystery and was an actress, I said look out—"

"And did," grinned Crane with a swift glance at the window where Crissa had stood and peered.

"A hard, bright red burned in Crissa's face.

"Somebody's got to look after the morals of this place," she said stubbornly.

Ostentatiously, Crane relighted his cigar and opened his paper, but Crissa was only started.

"Alice Moyer was here yesterday when this certain boy that stays came," she said acidly. "And she recognized him at once. He's young Gordon Hargrove—you know. His father's the millionaire. Just as I thought. He's supposed to be at college and here he's running into town week ends to visit this—woman. Probably she got her clutches on him because of his money—"

Crane turned a page.

"He came yesterday—and he's still in there," continued Crissa Crane, insistently. "And you know the Hargroves. There never was a good one in all the world. Remember the scandal all the old men got into? They are a wild lot. His own wife couldn't stand him and he turned her out without a single cent to shift for herself, with all his money. Don't you remember?"

"Aw, for heaven's sake, Crissa!"

"I can't help it, Fred. I've got a boy of my own. It makes my blood boil to see a woman of her age vamping children like that—especially a youngster who looks as—dear as this one does. I feel like telling the landlord. I feel like writing his father—"

"Oh, you wouldn't do that—"

"Why wouldn't I? I'd thank anybody if he was my son—"

"Oh, Crissa, for goodness sake mind your own—"

"Look here, Fred, this is more serious than you think. Why, I'll bet right this minute—"

Suddenly Crissa Crane sprang up and went to the window. "Fred, if you'll look into that room right now you'll be convinced. You'll see for yourself. And if you do you will admit it, and for Junior's sake do something about it—Come here, quick."

Hasting himself, but knowing Crissa Crane reluctantly let himself be dragged to the window to eavesdrop. Inside his neighbor's room it was pretty and attractive. It was honey, cherry, welcoming. His neighbor, herself, wore a charming feminine at-

tractiveness. And at the moment she was clipping to young Hargrove with all her heart in the earnest!

Evidently, he was just leaving for college. And his boyish face beamed with a deep look of sweetness as he held the woman in his arms and kissed her tenderly. This followed a playful tap, a romp around the room and then the opening of the outer door.

Again and again Crane saw his neighbor call young Hargrove back. Again and again he saw her cling to him and kiss him and dash at her eyes with the back of her hand. And finally when he had gone racketing down the stairs after a last bearish embrace, Crane saw his neighbor wring her hands and cover her face and weep.

"You see," triumphed Crissa Crane. "You see, don't you?"

"Yes—and I saw—once before."

There was a certain pitiful struggling against conviction in Crane's voice as he turned abruptly away. He didn't want to believe, for his neighbor had lifted her head and in a shaft of harsh light her anxious, loving face had looked every day of his forty years. But suddenly she jerked open the door and Crane, with disgust, heard her calling in their common hallway.

"Good-by, darling," young Hargrove's voice came back.

"Take care of yourself!"

"Right!"

"And come back soon—oh, Gordon—soon, soon, darling!"

"Next week."

"For as long as you can—"

"Sure thing."

Young Hargrove's voice was far down the stairs.

"Gordon," the woman's voice, full-throated and tender, rang clearer: "Don't forget me."

"Couldn't."

"I love you."

"You better."

"Oh, Gordon—wait—"

And then Crane heard the sound of her flying feet on the stair. Another faraway!

Crissa Crane looked, with triumph on her face, at Crane, with regret and anger on his.

"Well," she said, grimly, "is that your idea of what's good to have going on under our noses—"

With a complete surrender, Crane's frown came down darkly. It was proven, Crissa—was right. He, the father of a son, had judged his neighbor. He had found her light, at least, and God knew what more. There wasn't much doubt and he was willing enough to help put her out for the sake of that kid—

Angrily, Crane opened his lips to say so, when his neighbor's feet came running up the stairs again.

"Good-by, darling, good-by," she was calling shamelessly, as she ran, and with a reluctant pang, Crane somehow knew there were tears on her cheeks.

And then and then. Suddenly Crissa Crane's hard, meaning look wavered, stared, grew ashamed, fell, and Crane felt the sting of deep flushing in his own face. Suddenly they both gasped. And suddenly they both sat down, weakly.

For into the harsh, grim, judging, convulsed little silence in Crane's prim apartment there had come the sound of smothered sobs on the other side of the door, and young Hargrove's voice, loyal, tender, reassuring, had cut in.

From the foot of the stairs it had shouted with a wealth of deep but very illal love:

"Good-by, mom. Good-by, dear. Good-by, good-by."

Wet Night, Indeed

He turned the water into the boiler of the furnace and, going upstairs, left it running. The boiler sputtered, did everything else connected with it that was fitful. In the night he and his wife heard the water dripping and supposed it was raining.

"By Jove," he exclaimed as he leaped to the floor, "I turned on the water in the furnace and went away and left it running."

He didn't have to guess twice on that one. He found a foot and a half of water on the floor of the cellar, to say nothing of the moisture all through the house. It was a wet night—Berkshire Eagle.

Accident Film

The German Red Cross has produced a popular film on first aid in accidents. It is 1,500 meters long and takes 55 minutes to run. The film shows how to treat cuts, scratches, burns, fractures and sprains, and those apparently drowned or suffering from exposure. It is to be shown not only in public moving-picture theaters, but also to illustrate lectures for factory workers, policemen, members of ambulance corps, nurses and schools and colleges.

Powerful Teeth

Measuring only 18 inches in length, the wrasse, a fish found in British waters, has such strong teeth that it can crack the shell of a crab of quite a size.

Was Only Carrying Samples in Pockets

Wary Willie dived away from the hospital lady's door and started back in fright for outside the gate a policeman stood tall, darkly looking individual, obviously waiting for Wary Willie.

But, Wary Willie linger no longer and he was gone.

"What was he doing at that hospital?"

"Nothing, sir," replied the tramp innocently.

"Nothing, eh? Well, we'll see about that! Turn out your pockets!"

College Rowing

The first collegiate boat races were between boats owned by Yale students in Boston harbor in 1814, the contestants being an eight-oared gig and a sculler. The first intercollegiate race was rowed by Yale and Harvard crews in eight-oared barges over a two-mile course in Lake Umbagog, N. H., in 1828.

Inconsiderate Barber

A shudder ran down the spinal column of many persons living in one of the Cleveland suburbs when they noticed a funeral wreath hung up behind the "You're Next" sign in the window of the local barber shop.

Women Income Primp

A healthy barrier for the benefit of women incomes has been opened in the City of New York. The city has just passed a law that will allow women to receive income from their own property without the need of a trustee.

ATWATER KENT IGNITION for Fords

A Tonic for Fords, Old and New

Motors run smoother, start easier, and give more power with the Atwater Kent Type LA Ignition System—proven on thousands of Ford Cars.

More than a timer, in fact it's a complete scientific ignition system with twenty-six gears of precision in making scientific ignition systems behind it.

It's of the same general design, material, and workmanship as the Atwater Kent Ignition Systems furnished as standard equipment on many of America's foremost cars.

It may be installed in less than an hour. It's overwhelmingly dependable. It costs but \$10.80.

Type LA Price \$10.80 Including Cable and Fittings

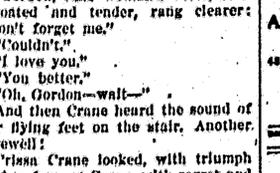

ATWATER KENT MFG. CO. An Atwater Kent, President 4859 Wineshick Ave., Philadelphia, Pa. Dealers of Atwater Kent Receiving Sets and Radio Speakers

Fiddle From Beer Keg

John Shreiner, old-time fiddler of Portland, Ore., is using a fiddle made from a beer keg to provide music for square dances. It is a small keg, with two slits in the side for a sounding board. Strings are stretched along this and over a finger board about three feet in length, making the instrument about the size and playing range of a cello.

PRICE

Only such a vast production as 40,000,000 spark plugs a year could build Champion superior quality at such low prices as 60 and 75 cents.

Champion 24—specified in the Red Box 60c
Champion 30—specified in the Blue Box 75c

CHAMPION

Dependable for Every Engine Toledo, Ohio

Dust Explosions Bad

No less than 45 were killed, 28 injured and \$3,000,000 property damage done by dust explosions in the United States in the last year. The explosions occurred chiefly among manufacturers of wood and aluminum wares, starch, feed, cocoa, spices, sugar.

What happier achievement than to be paid for what one likes to do?

On their own merits modest men are dumb.—Coleman.

NELLIE REVELL Says:

AFTER a fleet of doctors, operations, consultations, play-of-paris casts, every kind of surgical corset and, as an afterthought, plenty of leather and iron braces, at one time it began to look as though my cure would have to be effected through a good stone mason. The bed, which was prescribed for me, was of molar and had to be built around a core, which was me, while the mixture was soft. When it dried it held me more rigidly than a Puritan conscience. Even Houdini, who dropped in one day when I had a new form-fitter on, admitted that he was nonplussed.

It looked a great deal like a vindictive me and I felt like nothing less than the Lincoln highway. "Why couldn't some nice, kind outfit have told me in the beginning that it was a hodge-podge of a doctor, a doctor, the walking delegate, however, was a good Elk and did not call a strike with the job half finished, leaving me suspended just after getting the cornerstone laid.

But one misgiving did I ever have concerning Dr. Reginald M. Sayre, who has been in charge of my case for five years. It was when I learned he was not only coach for the American pistol teams competing at the Olympic games and other international contests, but that he is also America's crack revolver shot.

It is gratifying, of course, to know that one's surgeon is the possessor of such steady nerves, but as shooting was the only thing they hadn't tried on me I was the least bit apprehensive. For a long time I wondered if my cast, composed though it was of steel and concrete, was really bullet-proof. If it had just one vulnerable spot, perhaps I wasn't so lucky in having a sharpshooter for a doctor.

It is strange how long it takes people to recover from an education. It is a significant fact that the older doctors in a hospital never use anything but the simplest language in discussing a patient's case with him. But the younger ones, just fresh from a thorough inoculation with technical terms, take them out for an airing at the slightest opportunity. If one has the mumps the veteran physician calls it "mumps" and not a "specific, infectious, febrile disorder, characterized by a non-suppurative inflammation of the parotid and other salivary glands," whereas the interns has not been born who can resist saying "an inflammation and a swelling of a small membranous sac, buraco mucosae, usually occurring on the first joint of the great toe," when he means it is a bunion.

"The most important thing in the hospital is the patient," runs the slogan of every well-regulated hospital. And next in importance, supposedly, are the visiting doctors.

Maybe so. But all of the patients and doctors, rolled into one, assay perhaps as high as 50 per cent of the importance felt by some of the sub-junior internes I have met. In my travels I have known admirals, generals, statesmen, diplomats, big business men and famous artists, and in my years in the hospital I have talked with great specialists, men of world repute in their profession. Yet none of them has assumed the pompous dignity that in some cases seems to go with the awesome responsibilities of a medical student gaining a summer's experience as a sub-junior interne.

CHILDREN CRY FOR FLETCHER'S CASTORIA

MOTHER—Fletcher's Castoria is especially prepared to relieve infants in arms and Children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; Alleviating Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep.

To avoid imitations, always look for the signature of *Dr. J. C. Fletcher*. Absolutely Harmless—No Opium. Physicians everywhere recommend it.

Wall Built to Last. Workmen excavating the site of the old Astor house, New York, were unable to tear down the brick and cement wall of two cisterns which had been sunk beneath the hotel to store rain water. A huge steam shovel could make no progress against the cisterns. Compressed air drills were necessary to tear the masonry apart.

Burns "Last Poem" Found. What is supposed to have been Bobby Burns' last poem has been found in Waikato, Matiti, Otago, a remote settlement in New Zealand. It is addressed to "Miss Jessie Lewars," the girl who nursed him in his illness just before he died, and who later married and went to New Zealand to live.

No More Sore Feet! Corns and Bunions Gone—

WHY suffer from tired, aching, swollen and sweating feet, painful corns or bunions, when you can get instant relief with Allen's Foot-Ease? Shake it into your shoes in the morning—then walk all day in comfort. For those who like to dance, hike, play golf or tennis, Allen's Foot-Ease is indispensable. It will increase your enjoyment and efficiency. Sprinkled into the foot-bath—relief for your tired feet is immediate. Trial package and a Foot-Ease Walking Doll sent Free, address ALLEN'S FOOT-EASE, Le Roy, N. Y. Sold by all Drug and Department Stores

"Balloon" Tires for Giant Aerial Liners

When "balloon" tires first began to make their appearance on the roads, much comment was excited by their size. But they are midguts compared with the huge rubber tires which are now being manufactured for use on the new giant aerial liners.

These tires are seven and a half feet in diameter, and weigh nearly two hundredweight each. They are of the "wired" type, and a breaking load of 18 tons on each bead can be withstood by their bead wires.

The inner tubes are about 33 pounds each in weight, whereas the ordinary inner tube of a light car tire only weighs about one pound and three-quarters. The wheels of the air liners to which they are to be fitted have hubs 20 inches long and weigh nearly a quarter of a ton apiece.

Hasty Explanation. His wife had a steely glint in her eye. "What is this you are writing? A sonnet to May?" "The month of May," explained the poet hastily, "the merry month of May."

The Cuticura Toilet Trio. Having cleared your skin keep it clear by making Cuticura your everyday toilet preparation. The Soap to cleanse and purify, the Ointment to soothe and heal, the Talcum to powder and perfume. No toilet table is complete without them.—Advertisement.

First Reader. Father—The leaves of your science book aren't cut. Son—I was in a hurry when I read it.—Outlook.

Reputation is what people think you are; and it is even pleasant to be overestimated.

Wyoming Great Game State

Wyoming this year has shown one of the greatest increases in game of any state in the nation. A census of game in the state taken by the fish and game commissioners shows at the present time 26,770 elk, 28,100 deer, 19,900 antelope, 4,275 moose, 2,800 mountain sheep and more than 2,000 bears. The annual increase in elk is so great that the game commissioner says 4,000 more bull elk should be killed during the hunting season of 1928 than were slain last year.

Slam! Wham! An' words that end with—!!

ENJOY days and nights free from flies and mosquitoes. Drive them from your porch. Destroy them indoors. Spray Flit.

Flit spray cleans your home in a few minutes of disease-bearing flies and mosquitoes. It is clean, safe and easy to use.

Kills All Household Insects.

Flit spray also destroys bed bugs, roaches and ants. It searches out the cracks and crevices where they hide and breed, and destroys insects and their eggs. Spray Flit on your garments. Flit kills moths and their larvae which eat holes. Extensive tests showed that Flit spray did not stain the most delicate fabrics.

Flit is the result of exhaustive research by expert entomologists and chemists. It is harmless to mankind. Flit has replaced the old methods because it kills the insects—and does it quickly.

Get a Flit can and sprayer today. For sale everywhere.
