The recent completion of the Nintu Epirion has enabled the public to take the measure of this incomparable work and place it in contrast with other Cyclopædias. The result has been to establish beyond question its unqualified superiority. It is a giant where others are pigmics. It stands, the noblest work in literature; the one, only adequate representative of the advanced thought and scholarship of the world. Its high cost \$125,00 to \$200 has heretofore placed it beyond the reach of the majority. This bar to its popular-use we now happily remove.
