ELLIS PARKER BUTLER-EDITORIALLY SPEAKING

I do not believe there are many people in this country who need an introduction to Elils Parker Butler, whose first fame arrived with a little story called "Pigs Is Pign." That fame has been growing steadily ever since with his books, short stories and moving pictures,

He has lectured, too, in all parts of the United States and is, perhaps, best known as one of our most popular humorists, though he writes fiction of a serious and interesting nature, also. He says he is one of the few American writers who did not begin his literary training on a newspaper.

He was born in Muscotine Is. and went East about 25 years ago. He is very modest about himself. It is difficult to get him to tell you anything, but I finally did extract that he is married-and thus fully qualified to write for the Star Author Berico of Matrimonial Adventurcs-has four children, two of whom are twins; and that when he is not writing he would like to be fishing; and that he is much interofted in the cultivation of tulipe.

You have an understanding when you are talking to him of the great popularity of his work, for he sees the little, kindly, human points of life in a humorous way that never hurts-and with such amazing insight, too. He is constructively entertaining.

"The Tenth Mrs. Tulkington" is a humorous story-yes, but ham't It a cortous side? MARY STEWART CUTTING, JR

My only excuse for throwing George Tithers into the lily-pool at midnight is that I thought be was my wife Susan. thoughtfully. "You can't grow new hair," she said, "but you might wear a wig occa-

"What ho, yes!" cried Tithers, Jumping from his chair excitedly. "When he stages himself as the Concelted Elderly Ass, what? A toupee, what? And white spain! And a monocle? No, not a monocle. A monocle con't be done."

But it was done. It was not a complete success, it would not stick in my eye, but I dangled it from a string and learned to swing it around my forelinger quite well. Exceedingly well, I may say.

As anything seemed preferable to divorce. Susan and I. after thorough consideration of the matter in company with George Tithers and his wife, agreed to appoint George and Amelia stage managers of our married life and I allowed them a liberal compensation. After a long commitation George and Amelia decided that it would be heat for George to be my personal manager while Amelia managed Susan. I agreed to everything in adrance, but I was surprised when George presented me with a sheet of paper at the top of which he had written "Cast of Characters." On this sheet were written six varieties of hus. I thought of her conduct and she bands all men of my acquaintance. and no two alike. At the head of the list was written "January-Self, prosperons banker." And following this was "February-II. P. Diggleton, club-"Whoa up!" Georgo cald then, "Stop man, heavy sport," and "March-Winston Bopple, flirt, lady-chaser," and so on down to "June-Carey S. Flick, concelted elderly fusier, etc." July I was orain to be "Belf, prosperous banker." And so on for the second six months. As the month was now August I was to be, not myself, but a person resembling as nearly as possible H. P. Diggleton. For the month of August 80san was to have as her husband not myself but to all intents and purposes some one equivalent to II. P. Dirgiton. George Tithers saw that I was fully equipped with manners and habits; when he could not be sure what IL P. Diggleton would do be invented something new for me to do instead.

I admit that as the day approached when I was to become a practically new and unknown husband to Busan became keenly excited. This was not because I was to be another man but because I knewd was to have in Susan an entirely new wife. I had never been so interested in anything in my life. When the thirteen tranks, containing the thirteen complete sets of contumes Busan was to wear in her thirteen impersonations came into the house and were carried to the store. room I actually trembled with excitement as I saw them and noticed the hugo white numerals painted on their sides. I say thirteen trunks because Amella Tithers had decided that, month by month, Susan should be thirteen women. She felt that Susan, being a woman, was equal to the task, and by letting Susan be a different woman each month for thirteen months while I ran, so to speak, in a cycle of the same wife. If, for example, Soran my II. P. Diggleton, there would be Alliler to my H. P. Diggleton the next "It's in us," sold Amelia placidly. August, because it Mary P. When Susan arrived she gave me one kiss and hurried to her room, but Amelia Tithers paused a moment.

"You'll be surprised!" she whispered. "Susan is doing it so wonderfully! And our little practice trip came off splendidly. You'll never again think of Susan as a stodgy, stupid marriedold-thing sort of person. You just wait!"

When Susan came down to dinner I was indeed surprised. I turned from Amelia Tithers, with whom I had been doing my best to flirt and gasped. Such—well, such lack of clothes; Such abundance of long earrings!

"The vampire-type!" breathed Amelia Tithers, "Doesn't she do it well?"

She did! For a few September days I did try to flirt with some of our female neighbors, but before a week was up I found I had enough to do in making love to Susan and in trying to crowd between her and the men who seemed to take her masquerading in carnest. We had one row, with Susan in alithy colls—so to speak—on the chaise longue, when I told her what called attention to mine, but we kissed and made up like young lovers. The next minute she was ramping old Horatio Pcabody, the silly old fool And I had to make eyes at his stuffy old wife in self-defence. It was, indeed, a hasty and hectic month, as George Tithers said.

"Thank Heaven," I said to George, on the last day of September, "this month is over. I hope Susan is to be something respectable in October."

"I say, you know!" George excluimed. "You don't know that wife of mine. Up and doing, what? Always a little bit more what? Spread a bit more sall—that's her motto, if you get me." "You mean to tall me-" I gasped.

"Well; rather!" exclaimed George "Upward and onward, so to Tithera EDCak."

He was right; Amelia must have told him. "Well educated show-girl who is not just sure she has married the right man," was what Amelia had cast Summ for in October. It was with the greatest difficulty that I was able to maintain my role of a man who regratted his past and was secking his solace in good books. It was indeed hard for me to alt with the second volume of Henry Exmond and see Susan making merry with ball a dozen brainless noodles while her clothes were practically an incliement to unseemly levily.

I was tremendously relieved, for admit now that I had been tremendously frightened. The tenth Mrs. Tulkington had upset me.

"Susan," I whispered firmly, for I was not going to let her come under the influence of Amelia Tithers another moment, "go up to your room and prepare for a journey—a journey with your own husband. Two Wives and Two Children Seem to Se the Limit of the Pygmy's Ambition.

A pygmy family rarely if ever combrises more than four to five persons, A husband usually has only one wife, and never more than two, while two children is the average number, three being considered too big a family to rear. The pramy makes a good husband and father, though he is not averse to giving his wife a sound beating when her behavior seems to him to merit drastic punishment. Particularly noticeable is the low opinion which most of the tribes outside the forest zone have of these queer little people whose thieving propensities have earned for them classification with pests like the hyena and the jackal. BOY SCOUTS FOREST AIDES

An important achievement of boy scouts in every part of the country is their work in forest protection. Numerous reports of active and enthusiastic work tell of these boys' prephredness, courage and training in conserving our forests, which mean so much to scouting, as well as to all the people of this land. Pennsylvania has recently awarded 100 medals for valor and efficiency in forestry conservation to boy scouts of that state. During the summer camping season in the state of Washington a small town was saved by scouts camping nearby from a terrific forest fire that was rapidly sprending to the edge of the town. In Idaho the scouts during their vacation manned observation posts in the forest's heart and signaled to the chief forester news of any conflagrations which they detected. Talks have been made by the boys in homes, schools, theaters and before business clubs giving facts about the damage from fire. Parades have been arranged and posters and leaslets distributed. Field tests also have been conducted to show the right way to build and extinguish

When it is realized that two-thirds of the original forests of the United States have already been culled, cutover or burned; that today we are cutting more of every class or timber than we are growing, and that we are using up three and one-half times as Inst as they are grown the trees too small for the sawmill, but upon which pur future lumber supply depends, the significance of the scouts' work in more fully understood.

In the state of New York alone, "the scouts have already planted hundreds of acres of trees and are ready to do more to reclaim idle land and to reduce forest fire hazard," says J. A Simmons of the New York State Forestry association.

Yonkers, N. Y., set on interesting record last spring when in a single aft ermoon 12 troops planted 5,000 trees on the city watershed.

In the fall on Columbus day the Albany (N. Y.) scouts planted 4,000 trees at their camp on Kinderhook lake. Another excellent piece of work was that accomplished by the 25 scouts of Malone, N. Y., who last spring planted 5,000 white pine trees in the Community forest.

BOY SCOUTS AID NEAR EAST

The Boy Scouts of America are cooperating with the Near East Relief committee in securing boy scouts to give their outgrown and east-off uniforms, parts, and any athletic equipment they may have in the garret closet cellar or elsewhere, sending it to the nearest Near East Relief station. Boy scouts who do not know the address of their state headquarters for the Near East Relief committee may send packages to one of the following Near East Relief stations

All scout leaders are asked to assist in this attempt to save 15,000 boys of scout age, who are starving and going without the necessary ciothing. Most of these 15,000 are practicing the scouting program and in many cases doing exceptional work.

SCOUTING AND SCHOOLS

Two of the latest development worth noticing in the close relations between scouting and public schools are that the "Detroit Educational Bulletin," which is the official publication of the board of education of that city, devoted its entire issue of Februnry to discussing in detail the official recognition that the board of education gives to scouting and th active co-operation which is given to the movement as part of the board of education work.

And in Atlanta, Georgia, another official publication of the board o education is a pamphlet entitle "Civic Course Atlanta Public School Boy Scout Lessons." This pamphlet outlines in five lessons the citizenship training of the Boy Scouts of America which is taught to all of the pupils of the public schools of Atlanta.

TO STAMP OUT ILLITERACY

State-Wide Effort in Progress in Oklahome Under Direction of the American Legion,

A state-wide effort for the stamping out of illiteracy in Oklahoma is now in progress under direction of the American Legion. Dr. Frank H. Mac-Gregor, chairman of the department of Americanism of the state Legion orgamization, is in charge of the work and has developed a novel plan to educate those unable to read or write in that state.

According to recent surveys, there are 56,864 illiterates in the state, of whom 5,403 are foreign born. It is hoped that it will be possible to include all persons coming under this classification in the Legion's plan for education. To this end the aid of educators, school organizations and o local officials has been enlisted through Doctor MacGregor's office.

The method to be used is known as the "Jones plan," so called from its introduction to the Green county schools by Will C. Jones, superintendent and a Legionnaire. The first step is the organization of "principals" clubs." whose members are the heads of all schools in the district. The work of Americanization is thoroughly outlined to these men, and they pay personal visits to every illiterate in their district, offering assistance through the Legion plan, tabulating notes and making suggestions that may be of use to volunteer workers. The volunteer workers are to come from the teachers and students in higher classes. One person is "udopted" by each of these workers. A course of rending, English, simple arithmetic, and as the illiterate progresses, civil government and American history is given. The plan is in operation in several schools of the state, but it will not be put into complete use until the terms open next fall. Doctor MacGregor declares that If the work is undertaken in every school within the next two years be

will be satisfied. Doctor MacGregor, who resides in Mangum, Okla., served for 22 months overseas, a portion of which was spent in England. He was regimental surgeon of the famous Scottish Highland division—the "Laddies from Hell" for several months. He was decorated by King George for "gallantry in action" during the second Mains campaign, and later became chief surgeon of the British base hespital at Calais.

DISABLED MAN AIDS BUDDIES

Hans Hunsdorf, St. Paul, Victim of Tuberculosis, Still Working for Fellow-Sufferers.

Disabled himself, perhaps no man in the Mid-West is doing more active work among disabled veterans of the World war than Hans Hunsdorf, now in the Aberdeen hospital at St. Paul. Minn. Hunsdorf has personally interested himself in the cases of his "buddies" who are suffering from the effects of their service in the World war and is endearing himself to these men by his splendid efforts in their behalf. Hunsdorf was born in Eldswold, Norway, in 1878. At thirty-nine he enlisted in the army at Fort McDowell. Cal., and went to France as a mechanic with the One Hundred and Eightysixth Aero squadron, where he made a splendid record. He received a certificute of disability in line of duty and is now totally and permanently disabled from the ravages of tuberculosis. This gave rise to a long period of hospitalization, during which time Hunsdorf has been in seven government institutions, beginning in France and ending at St. Paul, where he is now a patient.

Spurred on by conditions he sow in these hospitals among his companions, Hunsdorf set out by personal work to relieve the troubles of those about him. He has assisted hundreds in their claims for compensation and similar lines. He has attended every military funeral which has occurred in his locallty, and has placed "the poppy of remembrance" on every collin.

Recognizing the American Legion as one of the agencies for affording relief to World war veterans, Hunsdorf has put much effort into securing members for the organization. Since the opening of the 1923 campaign he has personally written the applications of 101. though this is probably the least of his service to the Legion. Without thought of the personal sacrifice involved, this man, of foreign birth, has given onstintedly for the country of his adoption, and now facing defeat because of the physical conditions brought on by his sacrifices, still devotes himself to the alleviation of suffering and anxiety among his former comrades-at-arms.

Forest Exhaustion Brings High Prices Denver, Colo.—Lumber production in the United States has been steadily decreasing for 18 years and this in the face of a need unparalleled in the history of the country. According to a bulletin just published by the U.S. Department of Agriculture, of 37 eastern and southern lumber producing states, 36 showed a decreased cut and only one a slight increase in 1020; while Pacific Slope States all report aubstantial increases, showing that the center of production is shifting to the Western States, the last of our softwood reserves. Thirty years ago after the depletion of New York and Pennsylvania white pine sections, the American lumber market was drawing its supply from the Great Lakes States, When the source in those sections became exhausted and the forests no longer able to supply the demand or furnish enough to keep the milis in operation, the industry moved to the Southern Yellow Pine region, and is rapidly duplicating the same procedure there. The inevitable result follows that within the near future we shall be wholly dependent upon this reserve of all-purpose softwoods, the Pacific Slope. Not only in this the only remaining domestic source of softwoods, but a recent survey of the world's supply of this commodity discloses the fact that there are no foreign forests of this character that we may draw upon

BYNOPSIS Disliking the prospect of a month's visit to her austers sunt, Lady Erythea Lambe. at Jarvaulz abbey, and her cousin, Alexander Lambe, Almee, vivacious daughter of the Very Reverend Viscount Scroope, meets a young man who laughingly introduces himself as "Billy," American. The two ride on his motorcycle, the "Flying Sphinx," and part. With Georgina Bernera, her cousin, Aimee sets out for Jervaulz. She forces Georgina to impersonate her at Jeryaula, and she goes on a holiday. Almee again meets Billy. He tells her his name is Spencer, and she gives hers as Amy Snookes, at present "out of a job." Billy offers to take her into partnership in selling the Sphinz. In a spirit of madcap adventure, she accepts. The two proceed to the town of Stanhoe, taking separate todgings in Ivy cottage. While Aimee is secretif visiting Georgins, at Jervaniz, the place is burglarized, and the famous Lambe emeralds are stolen. Aimee escapes. Police docide the thieves are "Jack the Climber" and "Calamity Kate." who travel on a motorcycle, Billy, Who has shadowed Almee to Jervauls, follows the thieves. He is knocked out, but emerges from the fight with the Lambe emeralds. He meets Aimee, with the police in pursuit. In a secure hiding place, a cave among the crag pits, Aimce tells him the whole story. He urges her that she make a trank confeszion to her father, but on reflection both realize Aimeo's good name has been compromised. Assuring Almoo he has a plea to save her. Billy leaves her in the cave and, proceeding to Jervaulk, remiores the emeralds to the antounded Lady Erythes. Billy tells a story that satisfies the police, refusor a roward and accepts a chauffour's job from Lady Erythea. Almos gets the piges of parlor

We all know the manne of Memorial day. We American assemble to commemorate our Natle saldler dead-to express our love and matitude for their service and devotion; is strowing flowers on their final resting places, by recounting their deeds of valor and patriottam, by seeking new and deeper un-

Worship unstinted and unashamed. We won our independence by fighting for it. We are not a warlike nation, but we are a fighting nation. There is no fighting man like the American fighting man. The Minr Spangled Banner has never been lowered in defeat. So we celebrate the deeds of our fightlng men.

But we do not assemble to awaken bitter mempries of battle and slaughter. We do not meet to rekindle the vengeful fires of hate and passion. We do not gother to exult over the defeated. We do not come together to glorify war or to exalt militarium. We meet rather to dedicate anew the power and wealth and strength of the nation to liberty, humanity and justice.

Rea lights and land-lights, grim and great. Fought to make and to save the State; Weary marches and sinking ships; Cheers of victory on dying lips; Days of plenty and years of peace; March of a strong land's swift increase; Equal justice, right and law: Biaisly honor and roverent awe, fign of a nation, great and altong, To ward her people from foreign wrong; Pride and lory and honor-all Live in the Colors to stand or fail.

This is part of what Memorial day means to the good American.

When Abraham Lincoln left his Illinois home for the White House he said to his neighbors, assembled to wish him Godspeed:

There has tallen upon me a task such as did not rest even upon the Father of His Country, and so feeling I cannot but turn and look for that support without which it will be impossible to perform that great task. I turn, then, and look to the great American people and to that God who has never forsaken thom.

He was a true prophet. All Christendom stood astounded at the magnitude of the struggle that followed, and the spirit of the combatants. It was American against American. Nor did the American people full Lincoln. Nor did God forsake the American people. The outstanding fact in American history is the hand of Providence in the affairs of the nation.

But the Civil war is over now and its wounds are healed. Recalling what were the issues of that war and remembering that Appointation settled those issues right and for all time, we can strew flowers allke for Grant and Lee, for Sherman and Jackson, for Sheridan and Stuart with:

> Love and tears for the Blue Tears and love for the Gray.

As for Lincoln-he stands beside Washington in the hearts of a reunited people.

It was this mighty struggle of American against American that give us Memorial day. And it was Gen. John A. Logan who, as commander in chief of the Grand Army of the Republic in 1808, establighed Memorial day. Logan has been in the tomb for 37 years. And now his widow has gone to join him. She was always his constant helpmest and inspiration; it is likely that she herself brought about Memorial day. Flowers for her grave; the memory of her works will live.

It was only 25 years ago this year that the Maine was blown up in Havana harbor. That meant war, of course. The summer saw it begun, fought and won. And it was an important war. It saw a reunited North and South ugain fighting under the Store and Stripes. It made the United States a world power over night. It showed the world that America would light for the cause of humanity and could forego the fruits of victory. It was notice to the nations that the 1898 American was the same old fighting man on land and sea.

Wouldn't you like to have been on "Fighting Bob" Evans Jowa at Santiago and seen the band perched on the forward turret, grimy and halfbaked, just as they came from the guns, and heard them blare out:

The bulletin issued by Mr. Bonar Law's physician said:

"In spite of his rest, the prime minister's voice still is unsatisfactory and we are unable to promise an improvement within a reasonable time. The state of the prime uninister's general health is not good."

Thus ends his brief but eventful administration, and it ends with important and perplexing problems, particujury Great Britain's relations with vegetable herbs. Franco and Russia, unsettled.

The king will summon one of the Conservative leaders to form a new enbluet. It is generally accepted that Marquis Curzon will be the next premier.

The crisis comes upon the government in the midst of the holiday. when parliament is dispersed and few members of the government are in London.

A few days ago, when the result of Mr. Bonar Law's consultation with physicians in Paris became known, this end was forseen, but the country was not prepared for it and will await developments with anxiety and regrets over the untimely dropping of a trusted pilot.

One consolution, it is generally conceded. Mr. Bonar Law will have, is that he has no enemies and that no one will withhold from him sympathy. He accepted his high office with reluctance: he leaves it amidst unfeigned regrets on the part of both supporters and opponents.

Mr. Bonar Law's resignation was taken to the king at Aldershot by Colonel Waterhouse, the prime minister's private secretary, and Sir Frederick Sykes, his son-in-law, who motored from London.

The tragedy of Bonar Law has affected Great Britain deeply. The news of his resignation will not be known to the country until the people read it in the morning papers. It will be no surprise, although few expected it so soon. From both political and personal standpoints it will be received with regret, from the political standpoint almost with consternation.

From the well known specialists called in consultation Mr. Bonar Law's iliness is universally inferred to be a parallel to the last days of President Grant.

Tools That Can Be Made by the Amateur

Neatness in the construction of radio equipment depends greatly upon the facilities for handling the metal parts, panels and wiring, and correctly shaping each instrument or wire. By making and using the tools shown in the accompanying sketches the emateur will be greatly aided in his work.

Eight types of tools are shown, the material for which can be readily obtained or found among the contents of the tool box. Each tool will prove indispensable after its use has been learned and mastered.

No. 1. The small tweezer topgs, as shown are made up of saw blades and a screw terminal. Obtain two lengths of hack gaw blades, bend them to shape, drill for the screw terminal and rivets, then assemble. Small ma-

chine scrows and nuts can be used instead of rivers if desired. The tongs will prove very useful when soldering or assembling light apparatus. A wing nut can be used for faster and easier action.

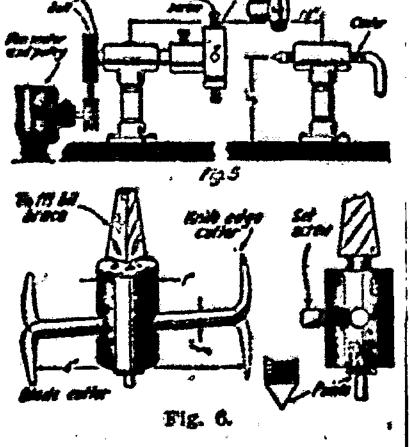

No. 2 is a small stake anvil of light construction. All parts are made from pipe or pipe fittings. As is clearly indicated, the base is made from a pipe flange, into which is screwed a small pipe upright, to the top of which is fit-

No. 8. The cutter and trimmer is made from two steel blades and o handle, sultably fastened to a wooden base. A graduated scale should be upon the base, one blade

No. 4. This is a combination saw. and file holder. A plece of 4-inch steel pipe is cut and bent to the proper size and slotted for the blade ends as shown. This holder will enable s firm hold to be had on saw blades or any type of file, either flat or circular.

No. 5. A very simple and easily constructed coll winder can be made at follows: Two end supports should be made first. They consist of a pipe flange, a short length of pipe and a T. joint. The supports are separated 15 inches and securely fastened to the

bench, making sure that the openings are in line. One support is equipped with an axie, on one end of which is fastened a pulley. The chuck is fastened to the other end with a setscrew. The other support is equipped with a center. The axle can be turned with an electric motor, or the fan can employ the ever-present sewing machine for power. This instrument will aid greatly in winding all forms of coils and can also be used for drilling if desired.

No. 6. The disc cutter shown enables one to cut dials, condenser end plates, etc., from sheets. Bar stock is used throughout, the arrangement being very simple. This tool will fit the bit brace, and, if the size shown is adhered to, will give satisfactory service.

No. 7. This alcohol torch is a necessity in every station and its construction is so simple that every amateur should make one and derive the benefits therefrom. An ink or other bottle

cutting tool shown consists of a handle with an adjustable cibow. When using the knurling disc it is possible to tighten up the numerous thumb scrows and adjusting pieces. The cutting disc will allow easy grooving or cutting off of metal tubing or solid insulating rod. This device will be found very handy in a large assembling room, and the amateur will never regret the time spent in making this or any of the other tools described.

(@ Science and Invention and Radio News.) Trees of the Forests

Absorb Radio Energy

Signals in transit across forests have lost much of their power especially in the spring and early summer when the sap and foliago make the trees better conductors of electricity. Radio waves passing over and through the trees give up energy just as in striking a steel building. If a short length of wire serving as an antenna can absorb sufficient energy from a passing wave to create a sound which can be heard several hundred feet away from the phones, one can realize how much energy may be intercepted by a large steel building with its electric wiring and pipes connected to the ground. Such absorption is partieularly noticeable when short wave lengths are used.

When a wave length is eight to four teen miles long "dead spots" seem to cause little interference. Such a wave is comparatively long compared to steel structures, and for this reason it is thought they do not obstruct the wave's path to such a great extent.

AN AUTHORITY THAT NO ONE EVER DISPUTES

There is at Washington one division of the government that is ever free from criticism as to its motives, even when its decisions are unpopular.

The head of the judicial branch of government—the Supreme Court-has had from its organization the reputation of being absolutely fair and unbiased in its findings, and its members enjoy the entire confidence and respect of the people of the country.

The interesting story of the Supreme Court is told in one of the series on Our Government being mailed monthly to the people of this community. It is an interesting, brief history of the court and its relation to the other branches of the government.
