"Sugar is on the free list now!" It is?—Since when?—not by the McKinley bill. The only free "sugar" on the free list by the McKinley bill is a concentrated juice used by refiners—made free wholly in the interest of the sugar trust.

The coolest thing McKinley ever done was to put ice on the free list. That's hard on the North Star State.

What would the farmers of this country have done if blue clay had not been put on the free list.

The Kansas City packers will follow the example of their Chicago brethren, and will raise the price of canned meats on account of the increased price of tin plate.

The democrats will gain after the 4th of March, a winner in the place of Everts in Wisconsin and another in the place of Everts of New York. The Republicans will elect a successor to Everts of Ohio.

Russell Sage is quoted as saying: "I never lent a dollar which was returned to me unless legally secured. I never backed a note I didn't have to pay, and I never recommended a man for a situation who didn't turn out to be as mean as he could. I now let other men run the philanthropy business."

Mr Oscar Bolich, of Deming has recently made a very valuable discovery in the Tres Hermanos, 25 miles south of Deming, and near the line of the Deming & Pacific Railway location. It is of marble, precisely of the character of that not long since discovered in western Socorro county and now being developed by Mrs. Cadwell, and which she has very appropriately named Resolite.

Hurray for our democratic legislature! Let the first work it does be to abolish the fee system in the sheriff's offices and place these officers on a fair salary.

Meyler Bruner was being congratulated this morning on his good luck. He has been temporarily appointed clerk of the Fifth judicial district under Judge Freeman, but before going to Socorro and assuming charge, he will take a few lessons from Chas. F. Hunt, the competent clerk of this district. The Citizen understands that a young lawyer from the patent office at Washington, D. C., will in a few months be the clerk in reality and Mr. Bruner his assistant. Mr. Bruner will probably qualify and fill bond this afternoon. Citizen.

The election last Thursday is making the republicans stop and think and the following from the Globe Democrat, one of the leading organs of that party, shows that they propose to put the blame where it belongs: "While several agencies have been actively at work in bringing about the republican defeat, the principal instrumentality, and the one which alone would have been sufficient to account for the set back, is the McKinley tariff act. The elections make a new epoch in tariff legislation. In the record of customs revision on the McKinley plan the last chapter has been closed and the word 'this' has been written. Hereafter tariff revision will mean a reduction and not an increase in rates."

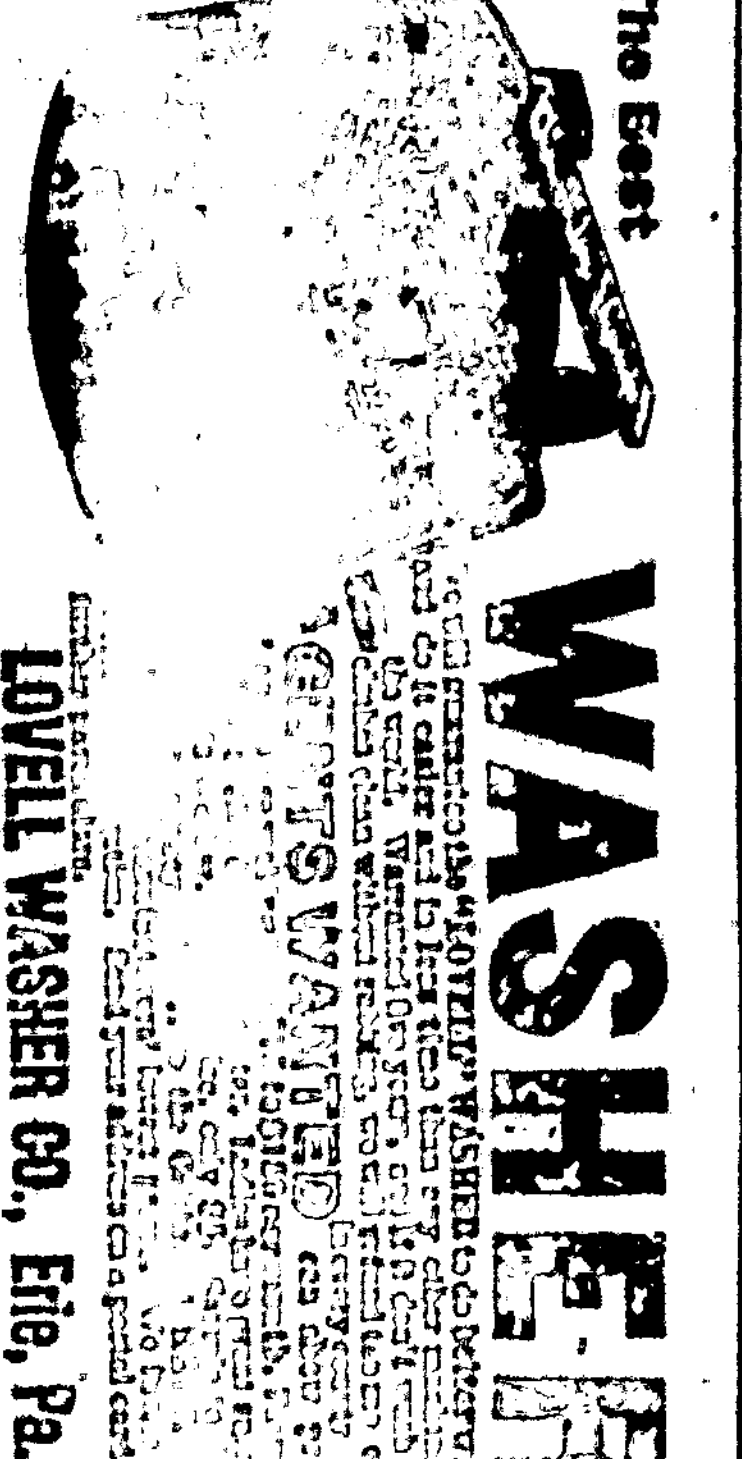

Messrs Bell & Stephens cleaned up after a run of 217 tons of ore, which was worth \$50 per ton. That was one of the best runs ever made in this district, the bars of the glittering metal were grand to behold. The ore was taken from the end of the ground south that is in dispute between Mr. Ball and Snyder and Skillicorn.—Pinos Altos Minor.

**INFORMATION FOR SETTLERS.**

Congress by the act of Aug. 30, 1890, has repealed the arid land act of Oct. 2, 1888, and all land entries made by settlers under that date of the act Oct. 2, 1888, are made valid, except as to reservoir sites selected.

The act of Aug. 30, 1890, limits the amount of land subject to entry by any person under all the various land laws to 320 acres.

Any legal sub-divisional part or the whole of said 320 acres can be entered under the Desert Land Law, or in such amounts as is permitted by the Homestead, Pre-emption and Timber Culture Laws can be entered as shall not exceed in the aggregate 320 acres.

The Timber Culture Law has not been repealed, but it is likely to be repealed during the next session of congress which convenes in December.

Settlers living on United States land prior to Aug. 30, 1890, and who have made reasonable improvements thereon will be entitled to enter said land and in addition thereto 320 acres more when desired, under the act of August 30, 1890.

The usual exception obtains as to the Pre-emption Law, i. e., the entry man must not be the owner of 220 acres of land.

Public land can now be safely entered under any of the foregoing laws; and settlers can be reasonably sure of receiving patent when they comply with those laws in good faith.

All applications for the entry of land, if complete, will be acted upon the same day they are received, if no business permitting; and all correspondence relating thereto will receive prompt and courteous attention.

Settlers and all other persons are requested to remit all moneys to the Receiver after Dec. 1st, 1890; and only currency, postal orders, express orders; postal notes and certified checks will be received.

Letters from this office to settlers calling for additional papers should receive their prompt attention in order that their lands may proceed to patent rapidly.

No unnecessary requirements will be asked for by this office.

Very Respectfully,  
SAMUEL P. McCREA, Register.  
QUINCY VANCE, Receiver.  
U. S. Land Office,  
Las Cruces, N. M.,  
Oct. 25, 1890.

Thursday, Nov. 12, has been set  
apart as a day of Thanksgiving by  
Presidential proclamation.

The republicans throughout the  
country were generally pretty badly  
"scorped" on the 4th inst. The met-  
ropolitan press had been industriously  
engaged ever since in figuring out  
the cause of the disaster. It is wise  
to do this, that the party may recu-  
perate by changing its tactics and get  
in position for the overwhelming  
republican victory that will inevitably  
sweep the country in 1892.—Ita-  
ton Range.

In order that the party may recu-  
perate and stand a chance of regain-  
ing lost ground it must flop over. A  
mere turn, end for end, will not suf-  
fice. It must abandon a high pro-  
tective tariff, such as the McKinley  
provides, go for free coinage of all  
gold and offer some measure of relief  
to farmers.

**The Silver Law.**

When the price of silver rose so  
rapidly immediately after the passage  
of the new silver coinage law, the  
special champions of free coinage  
gave silver and the silver bill credit  
for the sharp advance in prices in the  
cereal grains and other farm prod-  
ucts that occurred at the same time.  
The farmer was roundly abused for  
stating that the rise in the price of  
farm products was due mainly to a  
shortage in production. We stated  
in effect that the glimmer of the cart  
wheel dollar had blinded the eyes of  
the silver advocates so that they  
could not see the relation between  
prices of supply and demand. We  
were told that the rise in the price  
of wheat and corn and oats occurred  
at the time silver advanced in price;  
therefore the advance in silver caused  
the advance in wheat, corn, and oats.  
They did not seem that it might be  
argued with the same or even great-  
er force that the increase in price of  
the cereal grains was the cause of the  
increase in the price of silver. But,  
like the old fogies who noticed that  
it rained when the horns of the moon  
were turned up and reasoned that  
the up-turned horns caused the rain  
these men declared the increasing  
price of silver caused the raise in  
cereals. They did not attempt to  
explain on the silver hypothesis why  
the price of hogs and cattle went  
down at the same time. Our expla-  
nation was that the short crops caused  
the high price of grain. The same  
shortage explained why prices of  
cattle and hogs fell. It was seen  
that it would not do to fatten stock  
on high-priced hay and corn, so the  
stock was run into the great markets  
in large numbers, and the very abun-  
dant gave the market a downward  
turn. Now that silver has gone down  
and it is being understood that the  
hoaxed silver bill was but a shrewd  
game played upon the free coinage  
advocates, the newspapers that were  
so quick to see the relation between  
the increasing price of silver and the  
rising price of grain do not see any  
relation between the decreasing price  
of silver and the stationary price of  
cereals. It is the old failing: men  
are quick to see whatever supports  
their preconceived notions, but slow  
to see what tends to oppose the same  
notion. The farmers are not so  
greatly and directly interested in  
silver as the silver producers and  
speculators would have them think  
they are.

**A "Flop Over."**

The Silver City Enterprise a re-  
publican paper that has stood hereto-  
fore square against everything not  
republican, thus comments on the  
late election:

Election returns from the east in-  
dicate more than republican apathy  
in the off year, in fact it appears that  
too many republicans attended the  
election "but went wrong." Now  
the question is what does it mean?  
It certainly is not an endorsement of  
democracy with Cleveland's tariff  
for revenue only, for that was repu-  
diated two years ago. It simply  
means a rebuke to the McKinley tar-  
iff bill in favor of capital in general.

The signs of the time indicate that  
the country is ripe for the formation  
of a new party. One based on the  
welfare of the masses rather than the  
interests of the capitalists, or de-  
mands such radical reforms in the  
"grand old party" as will restore to  
its standard the rank and file who  
contributed so much to its past glo-  
ry.

The country does not want free  
trade, nor yet a tariff for the rich,  
which is oppressive to the poor. A  
tariff based upon the exact difference  
between the cost of production here  
and the same article from abroad  
laid down in New York would afford  
ample protection to American indus-  
tries without extortion to the home  
consumers. Such a tariff would ad-  
mit foreign goods in time of need to  
check pools, trusts and extortions.

In order to establish and constant-  
ly keep in good working order a tar-  
iff on the line indicated it would be-  
come necessary to establish a bureau  
of statistics to collect information up-  
on every article of commercial im-  
portance in a tariff measure. Great  
changes in value should be promptly  
brought to the attention of congress,  
which could remedy the inequality  
before it had worked serious hard-  
ships upon one class to the great  
profit of another.

The country is in favor of Blaine's  
policy of reciprocal commercial treat-  
ies by means of prohibitive tariff  
measures here. Even though the  
McKinley engine should in time bring  
about such a result, it would be at  
too great a present cost for the pros-  
pective future gain.

Our silver legislation has also been  
disastrous to the country and party.  
From the day silver was demonetized  
in '73 to the present time legislation  
has tended toward favoring the rich.  
No country should legislate against  
one of its staple products. So long  
as silver remains an article of com-  
merce it will fluctuate, as its fluctua-  
tions advance the interests of the  
rich at the cost of the poor.

When the republican party demon-  
etized silver it played into the hands  
of the bond holders both at home and  
abroad and that at a time when our  
war bonds were commencing to ma-  
ture, thus increasing the value of  
these bonds, by reducing the means  
of their payment. Was that legisla-  
tion for the masses or did the capital-  
ists of Wall street have something to  
do with it?

Still later, when the republican  
party in the last congress defeated  
the free coinage act and passed a 4,  
500,000 ounces a month purchasing  
measure play into the hands of the  
rich or poor? Who made the dif-  
ference between 92 and 120 per  
ounce? Was it the poor man dig-  
ging deep into the off corners of his  
pockets for a few pieces of the white  
metal with which to buy shoes for his  
children or the Money Bags of the  
east with their pals of virtuous sena-  
tors dividing the spoils of millions?  
The voice of the multitude has spoken,  
let its warning be heeded!

The Farmers Alliance, used as an  
accessory to the democratic party was  
largely instrumental in defeating the  
republican congressional delegation  
in Kansas. Of course this organiza-  
tion will be short lived, as the repub-  
lican members cannot be galled in  
to remaining with it when they fal-  
ly realize that the aim of its leaders  
is to use it for political purposes.—  
Ita-ton range.

The republicans and democrats  
who belong to the farmers alliance  
are jointly demanding of congress re-  
lief from present oppression and un-  
just class legislation. The last con-  
gress was republican and had the

ability to legislate for the benefit of  
the farmers, but refused so to do.  
The late election may serve as a point  
of reference to both the old parties. The par-  
ty in congress which comes nearer to  
the demands of labor in the matter  
of legislation will get the support of  
the united labor organizations. If  
neither of the old parties offer reme-  
dies for existing evils, then may we  
expect to see a wonderful growth of  
the independent movement evidenced  
by the 1892 election. The sooner  
party leaders in and out of congress  
understand these facts, the better for  
us all.

**Kansas Farms.**

The Farmers Alliance of Kansas  
finds that of 78,000 farmers in that  
state, only 7,500 have lands unen-  
cumbered with mortgages; 21,000  
are tenant farmers, many of them  
tenants on lands they formerly  
owned, but lost by foreclosure. 24,  
000 have mostly defaulted in the  
payment of interest on their loans,  
and are liable to foreclosure at any  
time. A correspondent living at Sol-  
oman City writes that within two  
months 200 teams bearing the be-  
longings of farmers in western Kan-  
sas, have passed his house on the way  
east. These men had "mortgaged  
their farms for all they could" and  
abandoned them, never to return.  
There has also been a collapse of  
many town booms, according to the  
correspondent, and those who have  
loaned money on mortgages at boom  
valuations will run a chance of get-  
ting pinched along with investors in  
western Kansas farm securities.

**Caught The Crook.**

Early yesterday morning Robert  
Curtis, an Atlantic & Pacific break-  
man, was relieved of his gold watch  
and diamond pin, while asleep on  
passenger train en-route to this city.  
When getting off at the depot he  
had occasion to look at his watch, but  
found it gone. This fact brought to  
mind the smooth young man who  
was with him in the car. Officer  
Chaves was applied to for assistance.  
The man answering the description  
given by Curtis was found and  
searched and the watch found in his  
stocking. Mr. Curtis had not yet  
noticed the loss of his pin, but came  
down town later and informed Mar-  
shall Maston of his loss, who searched  
the prisoner again, finding the pin  
on the inside of the coat, under the  
arm. In default of \$500 bond he  
sent to the jail in old town. The  
chances are that he will go over the  
road for his theft.—Albuquerque Democrat.

**Saved The Old Man.**

"Yes," said the young doctor,  
"the baby died, and the mother is  
dead, but I've saved the old man."  
Pennsylvania is gone, and all the  
rest of the country seems to be gone,  
but we've saved Bernillo county.—  
Citizen.

Washington, Nov. 12.—The No-  
vember returns to the department of  
agriculture as to the yield per acre  
make the average of corn 19.9 bush-  
els, potatoes 57.5, buckwheat 14.5,  
hay 1.20 tons, tobacco 7.08 pounds.  
The corn crop makes the smallest  
yield reported except that of 1881,  
which was 18.6. It was 8 below the  
average of the last eight years. The  
decline of the last decade was not  
due to impairment of fertility but to  
unfavorable meteorological influences.

The average rate of the yield of  
potatoes is 57.5 bushels. The condi-  
tion of the crop in October is low-  
er than any report of previous crops  
except in 1887, when the yield was  
50.9 bushels. It imports scarcity and  
warrants high prices.

Moscow, Russia, has a beggar on  
the streets who was once worth 8  
million dollars. He lost it by gam-  
bling and leading a fast life. A fool  
and his money are soon parted.

A lady living in Denver purchased  
a ticket and berth for her little niece,  
aged 11, for San Francisco. Putting  
the little girl aboard the train  
Wednesday morning, she entrusted  
her to the care of the conductor who  
looked after her comfort as far as he  
was able. But his vigilance was not  
at night by a brute in human shape  
who was aboard the same train. On  
Thursday night as the train was

nearing Wallace, this ruffian assaul-  
ed the girl in her berth. The pas-  
senger, at that hour, were all asleep  
and the villain sought to obtain the  
object by silencing the little girl by  
choking her. His work was not  
sure, however, for she managed to  
scream and thus awaken the passen-  
gers. The gentlemen in the car at  
once came to her rescue, and as soon  
as they discovered the purport of  
his villiany their indignation was so  
great that they seized the scoundrel  
and threw him off the train while it  
was running at a high rate of speed.  
No report has yet been received as to  
whether he was killed or not. If he  
was killed he certainly deserved his  
fate.—Albuquerque Democrat.

J. M. Hovey, says the Lordsburg  
Liberal, whose wife eloped with Har-  
ry Phelps, located the recreant wo-  
man at Wilcox last week, and went  
down after her, bringing her back  
Friday night. Saturday Mr. Hovey  
went to Clifton after the woman's  
child and sister on her promise that  
she would take them and go to her  
old home in Pennsylvania. As soon  
as Hovey was out of town the woman  
skipped out again despite her prom-  
ise. Hovey declares the woman can  
go, he will never do any more to  
ward reclaiming her. She seems to  
be utterly depraved.

Jan. F. Hoffman, H. J. Sanders and L. Bader, three soldiers, are now in our county bawling awaiting the action of the next grand jury on a charge of theft. For some time past systematic series of robberies has been puzzling the good people in and around Col. DeLany's store at Fort Stanton. Casks of beer rolled out boldly from the cellar, were among the chief items, and the thieves even got so bold that they went to Mr. DeLany's hog pen, butchered a hog right at the pen and carried off the meat. John Canning got on the track of the beer thieves finally, and the result was that two casks of beer were recovered and three of the suspected parties now waiting trial.

An exchange says that Mrs. Nicholson, of New Orleans, who owns and edits the Picayune, and who is the only woman in the country in such a position, is so quiet, low-voiced and retiring in manner that one would never suspect her of holding the place she fills. When the Women's club, of New York, gave her a reception, and it was announced that she had been made the young club's most honorary member. Mrs. Nicholson, quite like the sweet woman who never saw a composing stick or handled a blue pencil, deputed her husband to acknowledge the compliment in her stead. She sat meanwhile blushing and listening. Mr. Nicholson, who is the business manager of his wife's paper, is a big, genial southerner, with a memory of politics that goes back forty years.

Reciprocity. Yes, we are in favor of reciprocity; but our doctrine involves an equal exchange of the products of one country with another.

As we understand it, Mr. Blaine is for that kind of reciprocity which makes all things even. For example, in this respect he thinks the South American republic affords a good field to put it in practice.

Of course, it must be understood that this is special and applies only to such countries as do not compete with us in the production of the same fabrics, such, for instance, as England, France and Germany.

The land currency question is an easy problem of political economy. It is a solution of the intricate, vexed question of class laws, tariff and currency which have impoverished and degraded labor.

Recent gold discoveries in South Africa have excited a great deal of interest in Europe, and more particularly in England.

so capable of remarkable agricultural developments. The country is being rapidly opened up to settlement, and the hostile natives will soon be subjugated by military force.

A Pathetic Story. Kansas City, Mo., Nov. 12.—A romance of unusual, unfortunate and pathetic detail was made public when two detectives from Toronto discovered in Mr. and Mrs. Asa Barr, of Kansas City, Kansas, the relationship of brother and sister, and the heirs of a fortune left by the relatives of Miss Barr's deceased mother.

Twenty-five years ago two waifs, mere babes, brother and sister, were abandoned by German immigrants at Castel Garden. They were legally adopted, one by a man named Asa Barr, the other by Mrs. Evans.

Not long ago Mrs. Evans died. Quickly following her death occurred that of a wealthy relative in Toronto, Canada, who died intestate.

They arrived here and revealed to the unfortunate couple the fact. The terrible knowledge prostrated Mrs. Barr and her husband is grief-stricken.
