Mining and Prospecting.

The New Mexico Development Company.

The people of Lincoln county, and especially of Nogal, have but little comprehension what benefits will accrue from the above named company, when it commences active operations about July 1st., and but few if any of our people appreciate the personal efforts of our townsman, W. A. McIvers, in attracting and interesting northern capital to this country and its mineral resources. It is safe to say that he has done fully as much if not more along this line as any other man in Lincoln county and the class and character of investors he has interested is also worthy of attention. Mr. McIvers' last effort in organizing the New Mexico Development Co., surpasses all his previous efforts, for every individual it is bound together by personal ties as well as business interests. The following is the personal of the gentlemen composing the company: Charles R. Martin, John A. McKay and Jas. A. Price, are and have been honored officials with the Grand Trunk railway system for nearly thirty years, with an acquaintance and influence extending over several thousand miles of road; Geo. H. Williams, a prominent business man of Battle Creek, Mich., and one who is full of push and energy; W. H. Johnston, of Indianapolis, Indiana an important factor with the Allas-Chalmers company of Chicago; Allen Harens and H. A. Hodgson, two of the largest and most successful merchants of Bellevue, Mich.; E. H. Sellers, one of the most prominent attorneys of Detroit, Mich., and W. W. Woodard, for twelve years secretary and manager of one of the largest financial institutions in Iowa. Each of these gentlemen are equipped with extended business acquaintance, and can command through this source, an unlimited quantity of money for development purposes. Now if the people of Lincoln county, will exert the same amount of energy and determination to build up and foster the natural resources which lie at our very door as W. A. McIvers has, this county would soon take rank with any county in the territory.

Capt. J. H. Lloyd, one of the best known mining men in the world, is over at Parsons, having arrived here from Chicago Friday. The Captain was for three years the trusted mining expert of Cecil Rhodes in south Africa. He is a heavy stockholder in the American and Eagle companies of this place.

The Free Gold company have ordered a larger engine, the present one being too small to run their machinery at its full capacity. The new machines work to perfection and are a revelation to all who see them work. The process makes it possible to work placer dirt at a profit that runs above ten cents a ton. The new machines are within the reach of any poor man who owns a placer claim and they are certainly a success in saving all the gold as well as treating the dirt cheaply.

The White Mountain section, which includes the Nogal and Bonito mining districts, consists of a great granite rib or core intersected by various eruptive dikes of trap and relative rocks. Numerous fissure veins cut the area in many directions. On either side there is a contact with the adjoining sedimentary foundation, which is composed principally of limestone and sandstone. It is along this contact that so many great copper, silver and lead deposits are found. The valuable gold ore is found in the true aure veins, which also carry more or less silver, copper and lead.

A party of Indiana capitalists were looking over the property of the Eagle Mining company the past week, all being stockholders and representing a large amount of capital. The party were C. B. Studebaker, Jr., A. B. McFirney and D. L. Gullayle, of South Bend Indiana, D. W. Beiger and A. B. Graham of Mishawaka, Ind. The party spent three days here looking over the property of the Eagle Mining company and the American Mining company and all left for home Saturday night well pleased with their visit.

We say it without fear of successful contradiction that the Nogal and Bonito districts can show up more and better mineral bearing ores for the amount of work done than can any other mining district in the southwest.

C. A. Clark, of Horton, Kans., came in this week to look after some mining interests he has near here. He is interested with C. C. Bourne in some valuable mining claims in the Nogal district.

The Rio Tinto copper mines in Spain worked by the Romans two thousand years ago. The present workings are in enormous leads of Pyrites carrying about three per cent copper. There is said to be fifteen million tons of this ore uncovered.

The American mine at Nogal is bringing that camp into notice of late by turning out some very fine free milling gold ore. The ore appears to be getting better with depth. The Rae mine will also be in operation this summer, in all probability, and with these two well known properties producing the Nogal district should come to the front with alacrity.—El Paso Mining Record.

Nogal is a good location for a custom smelter or some kind of reduction works. There are millions of tons of ore here that will but just pay the expenses, such as mining, freight and smelter charges that would give a small profit if they could be treated at home, thus saving freight charges. This too, would induce many a prospector to sink down deeper into better ore, as it the rule of all mines in this district that the deeper one goes the better the ore.

Here is a novel location notice, and strange to say it is legal, which can not be said of many that are much more nicely worded:

"Its own. We found it. It's 300 feet wide on either side of this stake except on the east and west side and there it's 750 feet. It's called the Bay Horse and we claim him with all his saddles, dips and spurs. He was found on the 3rd. day of April 1902 and we don't want to find anybody jumping onto him or he will have to jump off."

Tungsten Deposits.

The sources of tungsten are the three minerals scheelite, wolframite and hubnorite, and of these scheelite, a tungstate of calcium is the one that can be used in producing the metal or ferro alloy. Thus far scheelite has been found in only one locality in the United States in sufficient quantity. Wolframite and hubnorite occurs abundantly, and the sources of supply greatly exceeds the demand.

For a number of years practically all the tungsten used in the United States was imported from England, Austria, Hungary, Saxony, Germany and Australia. The principal deposits in this country have been found in Arizona, Nevada and Colorado. Deposits have also been found in Oregon, Washington, Idaho, Montana, New Mexico, South Dakota, Connecticut and North Carolina.

Tungsten has been used for making colored cotton goods "fast" or washable, for rendering clothes non inflammable, for the manufacture of stained papers, for coloring glass; as an alloy with copper and aluminum for the manufacture of propeller blades; a calcium tungstate in Roentgen ray apparatus. Now the chief use, either as ferro tungsten or as the powdered metal, is in making tungsten steel. The production of tungsten ores during 1901 amounted to 176 tons, concentrated from 1,221 short tons of crude ore, valued at \$27,720, at an average price of \$158.86 per ton. The price of tungsten ores has decreased from 50 to 75 per cent during the last two years.

If you want to keep posted on Lincoln county mining news, subscribe for THE REPUBLICAN.

There is some good mining prospects being opened up over in Water canyon. The ore runs, gold, silver and lead.

There is so much mining business going on around Nogal that we are unable to keep up with the procession, but we'll be found coming in on the home stretch.

Work will start on the Adams mine soon. The Adams is five miles south of Nogal and already there has been considerable development work done, showing up a strong lead of pay ore.

A. H. Hudspeth, bookkeeper for the V. V. ranch, was in town Wednesday accompanied by Mr. Jackson.

By request we say: Everybody is invited to attend the grand feast and celebration of San Juan, June 24th, at Lincoln, N.M. There will be Races, Barbeque, Dancing, Fireworks etc etc.

We received a communication from Glencoe this week but are sorry to say it got here just before going to press so it will have to go over to next week.

The poles for the Nogal, American, Parsons and Bonito telephone line are being put in place and these places will soon be on good speaking terms.

There was a wedding at Capitan two weeks ago and a separation followed the next morning. Evidently that couple would be good witnesses that "marriage is a failure."

The Capitan Progress has not arrived at this office for the past two weeks. A Capitan citizen informs us that the paper has not suspended but is behind time on account of making its semi-annual change of local news.

Singing Conventions.

There will be a called meeting of the Lincoln county Singing Convention at 10 a. m. June 29th., in South Capitan at the College.

Everybody invited to come; bring your dinners and lots have a big "round up" song service.

W. F. MOORE, Pres.

The host of friends of Rev. R. P. Pope living in Lincoln county will be sorry to hear that he has been assigned to other fields to do missionary work. Rev. Pope was a pioneer preacher in these parts and had made a host of admiring friends among both church goers and sinners. He was an exceptionally sincere minister and was a friend to all, and while being a very devout man he never attempted to force his opinions upon any one.

A number of citizens of Capitan and elsewhere have congratulated THE REPUBLICAN for its article on "scrip" last week. The issuance of this scrip is a curse to the county and a violation of the law and the fact that it is issued by a powerful corporation does not mitigate the offense in the least. The company that issues this scrip should be prosecuted for every piece re issued; and it is the fault of the people, to a certain extent that this is not done.

NOGAL, NEW MEXICO.

\$1.50 a Year.

U. H. BROWN, Business Manager.

Entered at the postoffice at Nogal, New Mexico, as second class matter

Announcement.
FOR PROBATE CLERK.

We are authorized to announce the name of I. L. ANALLA for re-nomination to the office of Probate Clerk of Lincoln County, subject to the choice of the Republican County Convention.

If you are a candidate for office announce it in the REPUBLICAN that all the voters may know it.

The grand jury at El Paso recently returned over two hundred indictments.

Lincoln county's star of prosperity has arisen. At last our wonderful natural resources are being developed.

Paul Kruger says had it not been for the American horse and mule the Boers never would have surrendered to the British. Over three hundred thousand horses and mules were shipped from the United States to South Africa to go into the British army.

There are a great many people that have already found out that the White Mountain country in Lincoln county is far ahead of Clouderoft as a summer resort. There are a thousand places in the White Mountains that is far ahead of Clouderoft for both climate and scenery. Clouderoft is an example of what advertising will do for a place.

The Rock Island is importing waiter girls from Chicago for the Clouderoft hotel. Fifteen went up there the other day. The Rock Island is assisting materially in many ways to swell the population of New Mexico. The next on the program will likely be a colony of kindergarten teachers for the cloud scraping village.

The Alamogordo Improvement company who own the Santa Rosa townsite, have enjoined all the saloons in that town but one from selling liquors. The one excepted is Henry Pfaff's. The Improvement company seems to like Pfaff's brand of "red eye" the best. Suppose it fixes a fellow into the proper condition to be duped into buying their particular kind of wears. A law based upon equity will be no respecter of persons. Pfaff, living in Texas, is no better than a man living in New Mexico, notwithstanding the Improvement company to the contrary opinion.

El Paso is to New Mexico what Kansas City is to Kansas.

If you are a candidate for office let the people know it by announcing it through the columns of THE REPUBLICAN.

Tourists who are out sightseeing should not fail to visit the Montezuma cave near Fort Stanton. This cave has been explored for a distance of over two miles.

Lincoln county has more undeveloped resources than any other like area in New Mexico. Our natural resources are more varied and promising and we can offer capital better inducements than any other section.

Some Democrats are so unjust as to charge the failure of the passage of the statehood bill by the senate to political strategy. Every sane man who keeps posted on the statehood bill knows that Delegate Rody has done all that could be for to secure its passage besides the Republicans have no fear about New Mexico going Democratic this fall.

Lincoln county has a volcano of very recent origin. It is located about 15 miles northwest of White Oaks and the lava flow from its crater reaches southward for a distance of over fifty miles. This lava bed, or as it is locally called, the "Malpais" cover an area of about 400 square miles and can be easily seen from the Rock Island railway. It is said by some geologists to be the most recent lava flow in New Mexico.

The war in South Africa is over and both British and Boer have laid down their arms. The Boers acknowledging the rule of King Edward. The British agrees to donate fifteen million dollars towards restocking the Boer farms. Territory gained by Great Britain 167,465 square miles. The war cost England over one billion dollars in money, 24,000 men killed 75,000 wounded and sick. It required a force of 300,000 British to conquer 70,000. The loss of the Boers can not be correctly estimated. England has won a costly victory. The total white population of the Transvaal is less than 400,000

Grains of Thought.

If fools thought more they would see less.

A lot of good people enjoy telling bad news.

If an editor would tell all he knows about a community one-half of its people would be fighting all the time.

Because you are not smart enough to comprehend what you read in a newspaper, that is no proof that the editor has lied.

Some people having no particular business of their own try to busy themselves attending to other peoples business.

A lie will travel a mile while the truth is getting out of bed.

Some people are so stingy they will not invite a visitor into their house for fear of getting their dirt floors worn out.

Did you ever think that one single grateful thought turned homeward is the most perfect prayer.

The man who is everybody's friend never has a true friend of his own.

The trouble with a man blowing their own horns is they never hit the right tune.

There is no truth in the saying that a woman can make a fool of a man. Nature has always gotten the start of her.

About the only use some men have for a head is that it makes a convenient peg to hang their hats on.

This town has some citizens who are so lazy they have to be worked just like a wheelbarrow—pushed.

A politician and a poor workman always blame their tools.

It seems much easier for some men to buy things on time than to pay for them on time.

The man who stands in readiness for the opportunity when it comes is the only real successful man.

Look at the bright side of every thing and if is something you are buying it is better to look at both sides.

A dose of oil and a lazy man is a bad combination. One works and the other don't.

Commencing May 25th., 1903, passenger trains of the El Paso and Rock Island will arrive at and depart from the Southern Pacific depot at El Paso.

Go to Welch & Titworth, Captain, for Sheepsheads, Marking Paint, Screen Doors, Chicken Netting, etc.

A WOMAN'S DISCOVERY.

Transfusion of Vital Energy Through Electric Impulse. Although a genuine elixir vitae has never been discovered, to satisfy the many seekers who have desired to outlive their generation, Dr. Augusta Brown Girard, of New York, believes that the results of her years of experimenting have proved very gratifying. Her theory is simple, and she is willing that all may benefit by her discovery, which she calls "transfusion of vital energy through electric impulse." She has been able to demonstrate that vitality may be transmitted to a patient from a healthy man or woman, or even from animals. "Man is a vegetable human battery, and may generate vitality in any part of his organism when he knows what nerves are involved and how to manipulate them," Dr. Brown said:

"I sought first to locate the seat of vitality. It may be called the 'germinal spot' or the 'fountain of life.' I believe this spot to be the pineal gland, located at the base of the brain, just above the pons varolii. I call that the positive pole. The negative pole I locate at the medulla spinalis, which is a short distance from the extreme end of the spinal column."

She made many experiments, and has obtained astonishing results. An electrode is fastened upon the head and back of the person or animal from which magnetism is to be drawn and connected, by wire, with a hand around the head of the patient, in proximity to the pineal gland. He rests one hand upon the electrode at the back of the animal. A current is passed from a battery through the vital parts of the animal and is received by the patient. A healthy ox is considered most satisfactory, although astonishing results have been obtained from Newfoundland dogs. A German woman of seemingly inexhaustible vitality has been employed many times. Dr. Brown graduated from the Woman's Medical College, in Chicago, in 1873, and has studied for several years abroad.—Chicago Inter Ocean.

EFFECT OF TOXINS.

It Can Be Combated by Employing the "Starvation Treatment."

In a report made to the Paris Academy of Sciences it was shown that the recent experiments of Telesier and Guinard give some justification to the old saw about "starving a fever;" that starvation treatment is efficacious in combating the effect of toxins. Pneumonia and diphtheria bacilli were employed. Twenty-two dogs were subjected, while in a starving condition, to injections of toxin in amounts which invariably killed the control animals. Four recovered, and in those which died the intestinal lesions were less marked in the starving animals than in those which had received food. If the starvation diet had only continued for five or six days, and if, owing to surplus fat, the animal was able to resist starvation, he fell a victim as readily as an animal receiving food.

One hypothesis in explanation presupposes that the starved cellular elements are ready to seize and assimilate whatever is presented to them and destroy the toxins before they have time to act. According to another hypothesis, which seems to many investigators the better explanation, the toxins act slowly or not at all, because the starving organism does not supply elements whose presence is essential for the production of active poisons.

Behind Her Back.

He—Ah, Miss Roscoe's face is surely her fortune.

She—Yes, so it is. But it isn't like most fortunes you hear about.

He—How's that?

She—It is wiped out every night and rebuilt in the morning.—Cleveland Leader.

A Timely Reward.

Which I rise to remark, And my language is plain, That for wags that are dark And for wags that are vain, This climate of ours is peculiar! —Tammany Times.

Like the Earth. Visitor—And so you are studying astronomy at school. Do you like it? Little Girl—Oh, it's awfully interesting. The weather on the moon is just like it is here. Visitor (incredulously)—Does your astronomy say that? Little Girl—Why, yes. It says if there were people on the moon they'd roast one day and freeze the next.—N. Y. Weekly.

Corrected. "Ah, capital!" the D. D. said, Then he laid his pocket chronometer; "A good text for a sermon? Yes. 'I'll make a minute of it, sir.' Here the layman sprang a thought That did his caution overpower As he replied: "A minute, eh? 'I'll bet my hat you'll make an hour." —Boston Courier.

WELL QUALIFIED.

He—That man is billed to lecture to-night on "Whisky, the Curse of the Country."

She—No doubt he will be interesting, for he is certainly full of his subject.—Up-to-Date.

Educational Note.

The man who walks the tightrope— A feat with danger fraught— Must teach his feet to go the feat, And the tightrope should be taut. —Chicago Times-Herald.

The Mariner's Tale.

First Sailor (from U. S. cruiser)—The last trip we made was the queerest I ever saw.

Second Sailor (from U. S. battle ship)—What happened to you?

First Sailor—We didn't have a collision, nor an explosion; didn't run aground, didn't spring a leak, didn't have a blamed accident of any kind.—Brooklyn Life.

More Appropriate.

She—Yes, it's a good match. He is worth about \$2,000,000 or \$3,000,000 and she about the same.

He—I should think the minister would have found the funeral service more appropriate than the marriage one, in that case.

She—How do you mean?

He—Dust to dust.—N. Y. Tribune.

The Windy Awe.

If you want to be a wheelbarrow And run on wheels, If you hanker in an airship To the stratosphere to soar, If you wish to be a senator And talk for an hour, You must have wind— Lots of wind! —Pittsburgh News.

Artful Audacity.

"So Boraks is going to marry that aged Munn girl, is he?"

"Yes, and the funny part of it is that he told her he wanted to marry her on account of her fortune."

"Eh?"

"He told her she was too young and foolish to have the care of so much money." —Indianapolis Journal.

Here, of course, Patience Traddles—how a better gear is being to invent a flying machine, the man. If you want to make a hit invent a klicking machine.

The Inventor—What would I do with it? Traddles—Why, set it up where it will catch the crowd on the way home from the races! —Town Topics.

Notice of Special Stockholders Meeting.

The Iowa and New Mexico Mining and Milling Company.

Des Moines, Iowa, May 5th, 1902.

At a special meeting of the board of directors of the Iowa and New Mexico Mining and Milling Company, held at the office of the secretary, in Des Moines, Iowa, May 5th, 1902, the following resolutions were adopted unanimously (a majority of the board of directors being present):

Resolved, That for the purpose of amending the articles of incorporation of the Iowa and New Mexico Mining and Milling Company, a special meeting of the stockholders of said company be and is hereby called, to meet at the town of Nogel, New Mexico, on the 30th day of June, A. D. 1902, for the purpose of the consideration and adoption or rejection of the said proposed amendments which are as follows:

First, amend article one (1) by striking out the words "with a branch office in the city of Des Moines and state of Iowa, for the sale and transfer of stock," so that said amended article will read as follows: "The name of the corporation shall be 'The Iowa and New Mexico Mining and Milling Company' and its principal place of business shall be in the town of Nogel, in the county of Lincoln, territory of New Mexico."

Amend article two (2) by striking out the word "mineral" the 35th word in said article, also the 47th word "mineral." And after the following words, "telephones and telegraph," add the word "lines" and after the words "to plat and lay out town sites," insert the words "and to acquire and sell or lease real estate and property for that purpose," and at the end of said article strike out the words "done by a mining company" and add thereto after the word "usually," the words "incidental to such business," so that said article shall read as follows:

Article (3). "The general nature of the business to be transacted by this corporation, shall be to acquire, own, buy, sell and lease mines and mining claims for the mining of gold, silver, copper and other ores, and to mine and reduce gold, silver, copper and other ores, taken from the claims and mines owned and operated by this corporation, and to mill quartz and to reduce ores, to use, and operate tramways, roads, railroads, telephones and telegraph lines, waterways, and water power, in connection with the operation of said mines, to plat and lay out town sites, and acquire and sell or lease real estate and property for that purpose and to do and perform all such other acts as are usually incidental to such business."

Amend article VI (6) by striking out the words "and shall remain unsold as" and inserting the words "which may be sold by the directors to provide," and strike out the words "as such," and insert the words "by the treasury."

So that the first paragraph of said article shall read as follows:

"The amount of capital stock authorized shall be one million dollars, to be divided into shares of one (\$1.00) dollars each, of which one hundred thousand shares shall be set apart and held and known as treasury stock, which may be sold by the directors to provide a contingent fund for future use and shall not be voted while held by the treasury; but when sold and entered upon the books of the corporation and cash paid into the company's treasury for the same, the shares so sold shall have the same voting power as each and all

other shares have. (The balance of said section to remain as originally adopted.)

Amend article VIII (8) by striking out the words the "first Tuesday in December" and inserting the words, "Tuesday following the first Thursday in October." So the amended article shall read as follows:

Article VIII (8). The general affairs of this corporation shall be managed by a board of directors, consisting of nine members, and shall be elected at the annual meeting of the stockholders on the first Thursday following the first Tuesday in October of every year." (The balance of said article to remain as previously adopted.)

Amend article XI (11) by striking out the word "personal," the second word of said article and inserting the word "private" so that the article shall read as follows:

"The private property of the stockholders of this corporation shall not be liable for corporate debts."

Amend Article XIII (13) by inserting after the first two words of said article, the words "except Art. XI, (11)." After the next word following, strike out the word "changed" and insert the word "amended." After the next three words strike out the next sixteen words and at the end of said article strike out the word "by-laws in accord with the law" and in lieu thereof add the words "laws of New Mexico" so that said article XIII (13) shall read as follows:

"These articles, except article XI (11) may be amended at any time in the manner prescribed by the laws of New Mexico."

Amend said articles of corporation by adding thereto an additional article which shall be numbered XIV (14) and which shall read as follows:

"Article (XIV). The directors shall have the power to make by-laws for the corporation and to amend the same, when concurred in by a two thirds vote of all the directors, all directors having been previously notified."

Signed by the following directors:

- H. B. WHITE. T. B. COOKERLY. C. O. BALLIETT. E. CROAK. FRED DEIKMAN. S. H. MILLER. S. S. DOAK.

Directors.

Notice of Suit.

In the District Court of the Fifth Judicial District of the Territory of New Mexico within and for the County of Lincoln.

Juanita Benaydes de Lucero, Plaintiff, vs. Jacinto Lucero, Defendant.

The above named defendant is hereby notified that an action has been brought against him in said Court by the plaintiff praying that the bonds of matrimony now existing between plaintiff and defendant be dissolved on the grounds of abandonment and failure to provide for the care and custody of their minor child Lucia Lucero; and for such other relief as is proper.

That said defendant must appear and answer on or before the 3rd day of July A. D. 1902 or a decree will be entered against him by default.

Plaintiff's attorney is A. A. Sedillo, whose post office address is Socorro, New Mexico.

John E. Griffith, Clerk of said Court

For Sale.

1 span mule, 15 hands, 5 years old. 2 span mules, 14 hands, 6 years old. 6 horses, 16 hands, age 0 to 2 years harness for each team. 1 500 gallon zinc water tank. Lot of tools for sale cheap for cash. All of the above animals are kind and gentle work stock and in good condition. S. T. Gray & Co. Captain N. M.

Local and Personal Items.

Nogal needs a lumber yard badly.

Born, on June 10th., to Arthur May and wife, a son:

Pete Johnson has moved his family here from White Oaks.

Mr. J. H. Lightfoot is visiting in Capitan this week.

The Lincoln county Singing convention meets at Capitan next Sunday.

The fishing season is ripe and the annual amount of "fish stories" are current.

J. E. Poston, a miner at the American was brought down from the mine Wednesday, sick with a fever.

Leo Howard, a stockman from Oklahoma, is here looking up a location for a stock ranch.

Among the features of the Fourth of July celebration at Nogal will be a grand display of fireworks at night.

Mr. Buchanan, representing the Browne & Manzanara company, of El Paso, was here this week accompanied by his bride.

Bud Russell, a miner, at work on the Ibez shaft, was overcome by bad air while at work Wednesday and was brought to town for medical treatment.

Peter DeTamble and a friend from Chicago arrived at Parsons this week to look after mining matters here in which they are interested.

W. T. Healey attended the big circus at Alamogordo Tuesday. Skeeter says he see all the elephants.

A Fort Stanton correspondent of the Albuquerque Journal says that cattle in Lincoln county are poor. Stock here is looking fine, the range is good and fat beef is plentiful.

The Fort Stanton base ball team have been specially invited to attend the Fourth at Nogal and play the Nogal team a match game of ball. The Fort Stanton team is a good one and will make the Nogal boys hustle.

The White Mountain Irrigation company has been incorporated to construct a reservoir and take out a canal on the west side of White Mountain to irrigate lands north of Tularosa. The canal is to be ten miles long.

A force of men who have been employed by J. M. Rice in grading a wagon road from Parsons to Nogal have their work about completed. The road is a good one, suitable for hauling heavy loads over. Mr. Rice deserves much credit for this enterprise. The work is in charge of P. G. James.

A public meeting of the citizens of Nogal was called at the office of the Free Gold Mining company Tuesday evening for the purpose of arranging for a celebration and barbecue at Nogal on July 4th. The meeting was organized by the selection of W. A. McIvers as chairman and Geo. E. Sligh as secretary. A committee of three composed of W. A. McIvers, J. H. Lightfoot and Geo. E. Sligh was chosen to act as a general committee. This committee to have power to appoint all sub-committees and take general supervision for the day. There will be sack races, foot races, wheelbarrow races, base ball, tug-of-war jumping contests, etc., for the amusement of all, as well as plenty to eat. A programme of the day will follow in due time. Everybody invited.

As is generally known in this section, The Capitan Coal Company through its "go-between," the Southwestern Mercantile Company have been issuing a sort of money or scrip to pay off their labor at the mines. This scrip was only good for merchandise. Many of the miners found out that they could purchase goods much cheaper from Welch & Titworth and the Capitan Trading company two stores at South Capitan than they could from the Mercantile company and instead of drawing scrip, they would insist on having cash and go where they could save a large per cent on their purchases. It is a strange co-incidence that every miner who refuses or fails to draw most of his pay in scrip is soon out of a job and told to vacate the company's town. We have been reliably informed that men have been discharged and drove out of town lately on less than ten hours notice. We are not fighting any company except upon the principal that "might does not make right," and that this is still a free country, and that men should still be allowed to spend the earnings of the sweat of their brow wherever they chose.

Distributors of **RELIABLE MERCHANDISE**

J. M. Rice is home again from Chicago.
 W. A. McIvers was in Lincoln Saturday on business.
 Mrs. C. H. Brown is visiting with her parents at Glencoe.
 Guy Herbert has gone to Old Mexico on a business trip.
 Uncle George Hust arrived home Saturday from a week's visit with his daughter at La Luz.
 W. M. Riley has leased a part of the Capitan townsite and is fencing it for a cow pasture.

Coal is being delivered at the American mine from White Oaks at the rate of eight tons per day.
 W. E. White and C. C. Bourne two prosperous farmers from the Mesa were in town Monday.
 Lundy Mathews has taken up a homestead between here and Walnut station and has moved his family there.
 Welch and Titworth, of Capitan were the lowest bidders for supplying the Ft. Stanton hospital.
 Dr. Lane was here from White Oaks this week attending the little child of Mr. and Mrs. Geo. Sligh who has been quite sick.

If you want to celebrate the Glorious Fourth in a fitting style, come to Nogal. There will be plenty to eat and drink. Eating, free; drinks, extra.
 C. B. Studebaker, Jr., of the great Studebaker wagon manufactory of South Bend, Indiana, was here the past week on mining business.
 Arrangements are being made to have all the best race horses in Lincoln county to enter into a free for all contest at Nogal on the Fourth. There are a number of fast horses in the county and the race will be worth seeing.

Nogal needs a lumberyard badly.
 Robert Hurt and wife were over from Capitan Sunday.
 It is reported that Eddybrothers are behind the scheme to build a railroad from Rowell to Torrence.
 The following notice was posted on a cabin door in Water canyon.
 "Mister Macklugie obstick al gon, hant nothin in here to eat. I locked the door and hid the ke under a big rock at corner of house and hid your bed in the hen house on hen roost. Had to go to hunt grub. Good bie bucket hid ni henhouse. Postkript. I'm gon."

IN CYCLODOM.

SKELTON STEED OF STEEL.

Hoofs of rubber and ribs of steel,
 Voice of a motor bell's soft peal,
 Light and strong, and light and strong,
 A moment's touch and instant song;
 A coat of mail, and a coat of mail,
 A bicycle.

It is a fairy steed
 Swifter than a hawk's swiftest speed;
 Never a word of complaint,
 Or a word of faint;
 It will run and go,
 And run and go smoothly slow,
 As you please.

It is a steed for a spur or spin,
 For a dash or a dash-out-win;
 It will take a certain charge—
 A sudden dash for wings—
 Or a dash to rush and raid
 Made by means of the light brigade,
 On bicycles.

It is a steed that does to a turn,
 On level streets and fares to burn;
 It will take a dash on the longest street,
 Or a dash on a bicycle's feet;
 It will take a dash and beaten quills,
 Or a dash, horse ears, out of sight,
 On bicycles.

This is the age of push and go,
 It is the age of the slack and slow;
 It is the age of the racing ground,
 It is the age of the swiftly traversed ground;
 It is the age of the bicycle's page,
 This is the high-flown biking age,
 Of bicycles.

Swiftly changes invention's scene,
 From gas to gasoline,
 From a motor to a motor and mark
 From a motor to a motor and mark;
 This is the day of speed and steel,
 Of the flying man and the whirling wheel,
 The bicycle.

I. EDGAR JONES.

Love at First Sight.

Friend—So yours was a case of love at first sight?
 Mrs. Lonejoy—Yes, indeed. I fell desperately in love with my dear husband the moment I set eyes on him. I remember it all as distinctly as if it were yesterday. I was walking with papa on the promenade at Brighton, when suddenly papa stopped, and, pointing him out, said: "There, my dear, is a man worth \$50,000."—Tit-Bits.

A Limited Monarchy.

Mr. Bluff (host of a little dinner of male friends)—Yes, gentlemen, I hold that every man should be master of his own house. There is no other way. Well, as you are all through, gentlemen, suppose we adjourn to the library for a smoke.

Waggish Guest—Why not smoke here in this grand old dining-room?
 "Um! Mrs. Bluff won't let us."—N. Y. Weekly.

Anything Handy.

When Mr. Jones and Miss Smith made a match the ladies said he was a splendid catch. But since they married comes the news of grim—
 He needs to be—she thrives so much on him!
 —N. Y. Tribune.

TOO EFFEMINATE.

"No, Miss Constance, I do not 'blike.' The practice has become so effeminate, you know."—Punch.

MONEY IN THE ASHES.

Discarded Tin Cans Recycled and Turned into Cash.

On every dumping ground where the city contractors of Brooklyn put their ashes one may see constantly Italian workers hard leveling the heap, usually after lead is deposited, and carefully placing the tomato cans and other tinware in piles by themselves. The contractors do not object if the householders put old cans among the ashes, for this grants a careful leveling by the Italians at the dumping grounds at no expense to the contractors.

The revenue from these cans that are collected by the hundreds of thousands is a matter of surprise to most persons. A two-horse load brings from \$3 to \$3. It takes several days of hard work to get a big wagon load, but the Italians don't seem to mind the labor of it, for there is money immediately in sight as the piles of tin cans grow. They watch jealously their picking grounds, and sometimes make special arrangements with the contractors for the privilege of scraping and raking the ash heaps over.

The tin cans are sold to men with furnaces, who place them in a big caldron and under a slow fire melt the tin and solder and run that part off for future use and sale. Almost all the tin and solder is saved by this process, and is salable for use in making more cans for preserving vegetables.

The heat is then made intense and the iron that remains is melted and cast into ash weights. The demand for these old cans is said to be greater than the supply, and one of the most valuable of the scavenger privileges that the Italians in large cities assume is that of working over an ash dump.—N. Y. Sun.

A Verbal Distinction.

"There are a great many men looking for work," said the philanthropist.
 "Perhaps," said Senator Bergham, as he laid aside a pile of letters; "but it seems to me there must be a great many more looking for positions."—Washington Star.

Sadly Changed.

A pensive maid she was, they said,
 With calm and thoughtful brow;
 But she has changed since she was wed—
 She is ex-pensive now. —Up-to-Date.

THE DIVIDED FAMILY.

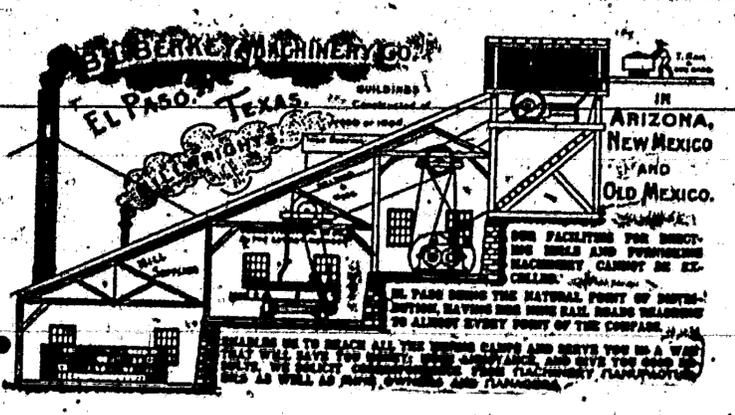

Jimmie—Where are your folks going this summer?
 Tommie—Don't know yet. Ma wants society and pa wants boating and fishing, but I am backing up pa.—N. Y. Truth.

That Was How.

"How," asked the jackdaw, "did you ever gain a reputation for wisdom?"
 "Hoot!" answered the owl.
 Which tells the whole story.—Chicago Tribune.

Defending His Monopoly.

"Tredde is jealous of his prerogatives, ain't he?"
 "What makes you say so?"
 "He got angry the other night and told me not to be a fool."—N. Y. Sun.

They Get.
 An old fellow who cleans out a bank, with a broom, for a dollar a day.
 Gets only the courtesy shown to a dog, except while he's drawing his pay.
 The burglar who cleans out a bank at night, with a Jimmy and powder and saw.
 Gets only a sentence, to pay for his pains, that's the farthest extent of the law.
 The trustee official who cleans out a bank gets the cash and he's nothing to fear.
 But why should the crookedest one of the three be acclaimed as a "financier"?
 —Chicago Times-Herald.

One on Miss Bondelipper.
 Dudely Canesucker (who is not as big a fool as he looks)—Did you give my card to Miss Bondelipper?
 Servant—Yes, sir.
 Dudely—What did she say?
 Servant—She told me to tell you, sir, that she was sorry she was not in.
 Dudely—Ah, indeed! Please tell your mistress that I thank I with glad I didn't call.—*Tammany Times.*

Looking Forward.
 "When I am rich," he said, haughtily, "I will return and taunt you with the opportunity you have missed."
 "When you are rich," she answered, calmly, "I trust you will offer to pay for the broken leg of that spindle-limbed gilt chair."
 And he went forth with a hollow grin.—*Cleveland Plain Dealer.*

Suspicious.
 Landlord (to agent)—I wish you'd keep a close watch on the people who hang that house on X street. I'm afraid they're up to something.
 Agent—What has aroused your suspicions?
 Landlord—They haven't asked for any repairs this month.—*Cleveland Ledger.*

THE MOTOR BICYCLE.

Men and Women Fond of Sport Do Not Favor It.
 The motor-bicycle is being pushed by its manufacturers, especially in England, but whether it will become popular and general is a matter for the future to reveal. It never can become so among those who use the wheel for exercise and from love of sport. It is too much like mounting the wooden horse of a modern merry-go-round instead of a real and spirited animal, but there is a large class of would-be riders to whom the motor-wheel offers much enjoyment.
 These are the women who love the great out-of-doors but find their

THE MOTOR BICYCLE.

strength unequal to the effort of pushing a wheel through long distances, especially uphill. It is, of course, more sport-like than staying in a carriage dragged about by a pony, and that unexciting and specific pleasure has given delight for centuries; and so, although the motor-bicycle may receive the ridicule of the strong and vigorous sportsman, it still merits the consideration of the weaker woman.
 The bicycle form is preferable to the tricycle, although the latter can be mounted and ridden without learning the difficult process of balancing, but it is far less serviceable for general use. On the asphalt street, of course, every thing is serene, but if there are sharp turns to be made or unevenness in the road which elevate one wheel much above the other overturning is an easy thing, for the new tricycles have the two wheels placed only a few inches apart.—*Illustrated American.*

They Differ.
 "Don't you believe all you see in the funny papers about summer girls and their engagements just for fun," said the sad-eyed man. "Why not?" "I thought I had met that kind of girl last summer; but she married me good and tight before the year was out."—*Philadelphia North American.*

The Practical Joker.
 The man who's always playing jokes on other people and who cannot understand why they should kick when he unfolds a trick, somehow can seldom see the slightest sense in jokes that make folks laugh at his expense! —*Cleveland Leader.*

WORKED LIKE A CHARM.

Dr. Swing—So you read my book entitled "How to Cure Sleeplessness." What do you think of it?
 Miss Elghe—Oh, it worked like a charm. I went to sleep before I had read five pages.—*Harlem Life.*

Forewarned.
 They said: "She's fabulously rich!" To win her I was able. Rumor spoke true, for soon I knew her wealth was all a fable. —*Yack.*

Getting Even.
 Sympathetic Citizen—You are not going to arrest that boy for stealing a few apples, are you? Remember you were a boy yourself once.
 Storekeeper—Yes, I remember it, and that's just why I'm going to arrest him. They pulled me in a dozen times when I was a kid.—*Roxbury Gazette.*

Its Fatally Proved.
 Smythe—I wonder what idiot originated the phrase: "There's no accounting for taste."
 Tompkins—Why?
 Smythe—Because I'd like to get at him! I've just been accounting to the milliner and modiste for my wife's taste! —*Brooklyn Life.*

Simple Matters.
 "How is it that all your silver is engraved with your maiden name, Mrs. Hampack?" said one Chicago lady to another.
 "Merely for the sake of uniformity," was the reply. "I always resume my maiden name when I obtain a divorce." —*N. Y. Journal.*

Wiser Than His Wife.
 Mrs. Crimsonbeak (as her husband comes in late at night)—What does the clock say, John?
 Mr. Crimsonbeak (with difficulty)—Nothing, madam, nothing. It's got sense enough to say nothing.—*Youkers Statesman.*

A Morning Call.
 Mrs. Gadd—I'm nearly tired to death; was at Mrs. Nabb's party last night.
 Mrs. Gabb—I didn't go; in fact, did not get an invitation. Were there many there?
 "Oh, no; it was very select." —*N. Y. Weekly.*

In No Danger.
 Resident—Colonel, let me caution you to drink no water while in town unless it is spring water or has been thoroughly boiled.
 Visitor—I drink nothing, sah, but what has been thoroughly distilled, sah.—*Chicago Tribune.*
